- (1) Tangible stockholders' equity at September 30, 2015 is calculated by excluding intangible assets relating to goodwill (\$1,845,000) and core deposit intangible (\$269,000).
- (2) Ratios are annualized.
- (3) Performance ratios for September 30, 2015 include the adverse impact of non-recurring merger related expenses of \$1,030,000, or \$714,000 net of tax benefit.

Table of Contents**Summary**

OceanFirst Financial Corp. is the holding company for OceanFirst Bank (the "Bank"), a community bank headquartered in Ocean County, New Jersey, serving business and retail customers in the central New Jersey region. The term

"Company" refers to OceanFirst Financial Corp., OceanFirst Bank and all of the Bank's subsidiaries on a consolidated basis. The Company's results of operations are primarily dependent on net interest income, which is the difference between the interest income earned on interest-earning assets, such as loans and investments, and the interest expense on interest-bearing liabilities, such as deposits and borrowings. The Company also generates non-interest income such as income from bankcard services, wealth management, deposit accounts, the sale of investment products, loan originations, loan sales, and other fees. The Company's operating expenses primarily consist of compensation and employee benefits, occupancy and equipment, marketing, Federal deposit insurance, data processing and general and administrative expenses. The Company's results of operations are also significantly affected by general economic and competitive conditions, particularly changes in market interest rates, government policies and actions of regulatory agencies.

Interest-earning assets, both loans and securities, are generally priced against longer-term indices, while interest-bearing liabilities, primarily deposits and borrowings, are generally priced against shorter-term indices. The Company's quarterly net interest margin has stabilized over the last year. The Company has mitigated the adverse impact of low absolute levels of interest rates by growing commercial loans, resulting in a shift in asset mix from lower-yielding securities into higher-yielding loans. Based upon current economic conditions, characterized by moderate growth and low inflation, interest rates may remain at, or close to, historically low levels with increases in the Federal funds rate expected to be gradual. The continuation of the low interest rate environment may have an adverse impact on the Company's net interest margin in future periods.

In addition to the interest rate environment, the Company's results are affected by economic conditions. Recent economic indicators point to some improvement in the U.S. economy, which expanded moderately in 2014 and continues to show modest growth again in 2015. Labor market conditions improved as the national and local unemployment rates in the first nine months of 2015 both decreased compared to prior year levels, while measures of inflation remain subdued.

Highlights of the Company's financial results and corporate activities for the three and nine months ended September 30, 2015 were as follows:

On July 31, 2015, the Company completed its acquisition of Colonial American Bank ("Colonial"), which added \$142.4 million to assets, \$121.2 million to loans, and \$123.3 million to deposits, and strengthens the Bank's position in the attractive Monmouth County, New Jersey marketplace by adding offices in Middletown and Shrewsbury, New Jersey. Colonial's results of operations for August and September are included in the consolidated results for the quarter. The results of operations for the three and nine months ended September 30, 2015 included non-recurring merger related expenses which decreased net income, net of tax benefit, by \$714,000 and \$904,000, respectively, which reduced diluted earnings per share by \$0.04 and \$0.06, respectively.

A commercial loan production office was opened in Mercer County in the first quarter of 2015 to better serve the broader central New Jersey market area. Additionally, during the quarter the Bank opened a new branch in Jackson Township. This branch operates with a smaller staff by handling sales and complex transactions with universal bankers, while routine teller transactions are handled through "Personal Teller Machines", an advanced technology where a live team member in a remote location performs transactions for multiple Personal Teller Machines. Additionally, on July 31, 2015, the Bank executed an agreement to purchase an existing retail branch with total deposits of \$24.6 million and core deposits (all deposits except time deposits) of \$20.2 million located in the Toms

River market. The purchase recently received regulatory approval and is expected to close in the first quarter of 2016.

Total assets increased to \$2.558 billion at September 30, 2015, from \$2.357 billion at December 31, 2014, primarily due to \$142.4 million of assets from the Colonial acquisition. Loans receivable, net increased \$250.1 million at September 30, 2015, as compared to December 31, 2014, which included \$121.2 million of loans acquired from Colonial. Excluding Colonial, commercial loans increased \$106.9 million at September 30, 2015, as compared to December 31, 2014, an annualized growth rate of 19.4%. Deposits increased by \$247.6 million at September 30, 2015, as compared to December 31, 2014, which included \$123.3 million of deposits acquired from Colonial. Excluding Colonial, the deposit increase included \$60.7 million of business deposits, demonstrating the value of relationship based lending.

Net income for the three months ended September 30, 2015, was \$4.7 million, or \$0.28 per diluted share, as compared to net income of \$5.2 million, or \$0.31 per diluted share, for the corresponding prior year period. Net income for the three months ended September 30, 2015 includes non-recurring merger related expenses, net of tax benefit, of \$714,000, which reduced diluted earnings per share by \$0.04. Excluding the non-recurring merger related expenses, the increase in diluted earnings per share over the previous year period was primarily due to higher net interest income and lower provision for loan losses, partly offset by a reduction in other income and higher operating expenses.

Net interest income for the three months ended September 30, 2015 increased to \$19.6 million, as compared to \$18.1 million for the corresponding prior year period reflecting an increase in interest-earning assets of \$181.9 million, which included \$86.4 million from the acquisition of Colonial.

Table of Contents

Other income decreased to \$4.2 million for the three months ended September 30, 2015, as compared to \$5.3 million in same prior year period. The decrease was primarily due to a recognized gain on sale of equity securities of \$591,000 in the prior year period compared to no gain in the current period, lower fees and service charges and lower loan servicing income. The decrease in loan servicing income was due to the sale of servicing rights on a majority of residential mortgage loans serviced for the Federal agencies and was accompanied by a comparable decrease in operating expenses. Operating expenses, excluding merger related expenses, increased \$686,000 for the three months ended September 30, 2015, as compared to the same prior year period due to higher compensation and employee benefits relating to higher salary expense associated with personnel increases in commercial lending, the Colonial acquisition and the opening of two new branches.

The Company remains well-capitalized with a tangible common equity ratio of 9.10% at September 30, 2015. On July 24, 2014, the Company announced the authorization of the Board of Directors to repurchase up to 5% of the Company's outstanding common stock, or 867,923 shares. At September 30, 2015, there were 244,804 shares available for repurchase.

Analysis of Net Interest Income

Net interest income represents the difference between income on interest-earning assets and expense on interest-bearing liabilities. Net interest income depends upon the relative amounts of interest-earning assets and interest-bearing liabilities and the interest rate earned or paid on them.

The following tables set forth certain information relating to the Company for the three and nine months ended September 30, 2015 and 2014. The yields and costs are derived by dividing income or expense by the average balance of assets or liabilities, respectively, for the periods shown except where noted otherwise. Average balances are derived from average daily balances. The yields and costs include certain fees which are considered adjustments to yields.

(1) Amounts are recorded at average amortized cost.

(2) Amount is net of deferred loan fees, undisbursed loan funds, discounts and premiums and estimated loss allowances and includes loans held for sale and non-performing loans.

- (3) Net interest rate spread represents the difference between the yield on interest-earning assets and the cost of interest-bearing liabilities.
- (4) Net interest margin represents net interest income divided by average interest-earning assets.

Comparison of Financial Condition at September 30, 2015 and December 31, 2014

Total assets increased by \$201.2 million to \$2.558 billion at September 30, 2015, from \$2.357 billion at December 31, 2014, primarily due to \$142.4 million of total assets from the Colonial acquisition. Securities, in the aggregate, decreased by \$66.2 million, to \$423.0 million at September 30, 2015, as compared to \$489.2 million at December 31, 2014. Loans receivable, net, increased by \$250.1 million, to \$1.939 billion at September 30, 2015, from \$1.689 billion at December 31, 2014, primarily due to \$121.2 million of loans acquired from Colonial, growth in commercial loans (excluding Colonial) of \$106.9 million and the purchase of two pools of performing, locally originated, one-to-four family, non-conforming mortgage loans for \$22.0 million. As part of the Colonial acquisition, the Company has outstanding goodwill and core deposit intangible at September 30, 2015 of \$1.8 million and \$269,000, respectively.

Deposits increased by \$247.6 million, to \$1.968 billion at September 30, 2015, from \$1.720 billion at December 31, 2014, primarily due to \$123.3 million acquired from Colonial. Excluding Colonial, business deposits increased \$60.7 million, demonstrating the value of relationship based lending. The deposit growth contributed to a decrease in FHLB advances of \$72.2 million, to \$233.0 million at September 30, 2015, from \$305.2 million at December 31, 2014.

Stockholders' equity increased to \$234.7 million at September 30, 2015, as compared to \$218.3 million at December 31, 2014, due to stock consideration of \$11.8 million issued for the purchase of Colonial and net income for the period, partly offset by the repurchase of 373,594 shares of common stock for \$6.5 million (average cost per share of \$17.28) and the cash dividend on common stock of \$6.5 million. At September 30, 2015, there were 244,804 shares available for repurchase under the stock repurchase program adopted in July of 2014.

Comparison of Operating Results for the Three and Nine Months Ended September 30, 2015 and September 30, 2014

General

Net income for the three and nine months ended September 30, 2015 was \$4.7 million and \$15.1 million, or \$0.28 per diluted share and \$0.90 per diluted share, respectively, as compared to net income of \$5.2 million and \$15.0 million, respectively, or \$0.31 per diluted share and \$0.89 per diluted share, respectively, for the corresponding prior year periods. Net income for the three and nine months ended September 30, 2015 includes non-recurring merger related expenses, net of tax benefit, of \$714,000 and \$904,000, respectively, which reduced diluted earnings per share by \$0.04 and \$0.06, respectively. Excluding the non-recurring merger related expenses, the increases in diluted earnings per share over the previous year periods were primarily due to higher net interest income and lower provisions for loan losses, partly offset by a reduction in other income and, for the three months ended September 30, 2015, higher operating expenses.

Table of Contents*Interest Income*

Interest income for the three and nine months ended September 30, 2015 increased to \$22.0 million and \$62.7 million, respectively, as compared to \$20.1 million and \$59.8 million, respectively, in the corresponding prior year periods. Average interest-earning assets increased \$181.9 million and \$129.7 million, respectively, for the three and nine months ended September 30, 2015, as compared to the same prior year periods benefiting from the interest-earning assets acquired from Colonial which averaged \$86.4 million and \$29.1 million, respectively, for the three and nine months ended September 30, 2015. The yield on average interest-earning assets increased to 3.66% for the three months ended September 30, 2015, as compared to 3.63% for the same prior year period. The yield on average interest-earning assets decreased to 3.62% for the nine months ended September 30, 2015, as compared to 3.66% for the same prior year period. The asset yield in both current year periods benefited from a shift in the mix of interest-earning assets as average loans receivable, net, increased \$243.8 million and \$188.2 million, respectively, for the three and nine months ended September 30, 2015, as compared to the same prior year periods, while average interest-earning securities decreased \$60.4 million and \$58.3 million, respectively, as compared to the same prior year periods.

Interest Expense

Interest expense for the three and nine months ended September 30, 2015 was \$2.4 million and \$6.6 million, respectively, as compared to \$2.0 million and \$5.5 million, respectively, in the corresponding prior year periods. The cost of average interest-bearing liabilities increased to 0.50% and 0.47% for the three and nine months ended September 30, 2015, as compared to 0.45% and 0.40% in the same prior year periods as the Company extended its borrowed funds into longer-term maturities, which carry a higher cost, to better manage the Company's interest rate risk. Since December 31, 2013, the Bank has extended \$183.3 million of short-term funding into 3-5 year maturities, extending the weighted average maturity of term borrowings from 1.3 years to 3.1 years at September 30, 2015. The total cost of deposits (including non-interest bearing deposits) was 0.24% and 0.22% for the three and nine months ended September 30, 2015, as compared to 0.23% and 0.24% for the corresponding prior year periods.

Net Interest Income

Net interest income for the three and nine months ended September 30, 2015 increased to \$19.6 million and \$56.1 million, respectively, as compared to \$18.1 million and \$54.3 million, respectively, in the same prior year periods, reflecting an increase in interest-earning assets, partly offset by a lower net interest margin. Average interest-earning assets increased \$181.9 million and \$129.7 million, respectively, for the three and nine months ended September 30, 2015, as compared to the same prior year periods. The net interest margin decreased to 3.26% and 3.24% for the three and nine months ended September 30, 2015, from 3.27% and 3.33%, respectively, for the same prior year periods. Current quarter and, to a lesser extent, year-to-date, 2015 yields and costs were impacted by fair value adjustments to interest-earning assets and interest-bearing liabilities acquired from Colonial as of the July 31, 2015 merger date.

Provision for Loan Losses

For the three and nine months ended September 30, 2015, the provision for loan losses was \$300,000 and \$975,000, respectively, as compared to \$1.0 million and \$1.8 million, respectively, for the corresponding prior year periods. Net charge-offs decreased to \$196,000 and \$654,000, respectively, for the three and nine months ended September 30, 2015, as compared to net charge-offs of \$5.6 million and \$6.4 million, respectively, in the corresponding prior year periods. In September 2014, the Company completed the bulk sale of certain non-performing residential mortgage loans which resulted in a total loan charge-off of \$5.0 million. The provision exceeded the net charge-offs for both the three and nine months ended September 30, 2015 to account for loan growth. Non-performing loans increased by \$3.5

million at September 30, 2015, as compared to June 30, 2015. All of the increase was related to two well-seasoned loans, a \$1.4 million residential mortgage loan and a \$2.3 million commercial real estate loan, for which there are no expected losses.

Other Income

For the three and nine months ended September 30, 2015, other income decreased to \$4.2 million, and \$12.3 million, respectively, as compared to \$5.3 million and \$14.0 million, respectively, in the same prior year periods. In the fourth quarter of 2014, the Company sold the servicing rights on a majority of the residential mortgage loans serviced by the Company for the Federal agencies, recognizing a gain of \$408,000. Smaller, supplemental sales occurred in 2015 resulting in a gain of \$111,000 for the nine months ended September 30, 2015. The sale of loan servicing caused a decrease of \$164,000 and \$507,000 in loan servicing income for the three and nine months ended September 30, 2015, respectively, as compared to the same prior year periods but also reduced operating expenses by similar amounts. For both the three and nine months ended September 30, 2014, the Company recognized gains of \$591,000 and \$938,000, respectively, on the sale of equity securities, as compared to no gains in the current year periods.

Operating Expenses

Operating expenses increased to \$16.1 million and \$44.3 million, respectively, for the three and nine months ended September 30, 2015, as compared to \$14.4 million and \$43.4 million, respectively, in the same prior year periods.

Table of Contents

Operating expenses for the three and nine months ended September 30, 2015 include \$1.0 million and \$1.3 million, respectively, in non-recurring merger expenses relating to the acquisition of Colonial. Compensation and employee benefits expense increased \$523,000 for the three months ended September 30, 2015, as compared to the same prior year period. The increase was primarily due to higher salary expense associated with personnel increases in commercial lending, the Colonial acquisition and the opening of two new branches. Compensation and employee benefits expenses for the nine months ended September 30, 2015 was \$54,000 lower than the prior year period which included \$196,000 in severance related expenses due to the Company's strategic decision to improve efficiency in the residential mortgage loan area.

Provision for Income Taxes

The provision for income taxes was \$2.6 million and \$8.1 million, respectively, for the three and nine months ended September 30, 2015, as compared to \$2.8 million and \$8.1 million, respectively, for the corresponding prior year periods. The effective tax was 35.5% and 34.9%, respectively, for the three and nine months ended September 30, 2015, as compared to 35.1% for both prior year periods.

Liquidity and Capital Resources

The Company's primary sources of funds are deposits, principal and interest payments on loans and mortgage-backed securities, proceeds from the sale of loans, FHLB and other borrowings and, to a lesser extent, investment maturities. While scheduled amortization of loans is a predictable source of funds, deposit flows and mortgage prepayments are greatly influenced by interest rates, economic conditions and competition. The Company has other sources of liquidity if a need for additional funds arises.

At September 30, 2015, the Company had no outstanding overnight borrowings from the FHLB compared to \$111.0 million outstanding at December 31, 2014. The Company utilizes overnight borrowings to fund short-term liquidity needs. The Company had total FHLB borrowings, including the overnight borrowings, of \$233.0 million and \$305.2 million, respectively, at September 30, 2015 and December 31, 2014.

The Company's cash needs for the nine months ended September 30, 2015 were primarily satisfied by principal payments on loans and mortgage-backed securities, proceeds from the sale of mortgage loans held for sale, proceeds from maturities of investment securities and deposit growth. The cash was principally utilized for loan originations, the purchase of loans receivable, the purchase of investment securities and to reduce borrowings. The Company's cash needs for the nine months ended September 30, 2014 were primarily satisfied by principal payments on loans and mortgage-backed securities, proceeds from the sales of mortgage loans held for sale, proceeds from maturities of investment securities, the sale of investment securities available-for-sale, deposit growth and increased total borrowings. The cash was principally utilized for loan originations and the purchase of investment and mortgage-backed securities.

In the normal course of business, the Company routinely enters into various off-balance-sheet commitments. At September 30, 2015, outstanding undrawn lines of credit totaled \$302.6 million; outstanding commitments to originate loans totaled \$120.7 million; and outstanding commitments to sell loans totaled \$5.9 million. The Company expects to have sufficient funds available to meet current commitments arising in the normal course of business.

Time deposits scheduled to mature in one year or less totaled \$113.1 million at September 30, 2015. Based upon historical experience management estimates that a significant portion of such time deposits will remain with the Company.

The Company has a detailed contingency funding plan and comprehensive reporting of funding trends on a monthly and quarterly basis which are reviewed by management. Management also monitors cash on a daily basis to determine the liquidity needs of the Bank. Additionally, management performs multiple liquidity stress test scenarios on a quarterly basis. The Bank continues to maintain significant liquidity under all stress scenarios.

Under the Company's common stock repurchase program, shares of OceanFirst Financial Corp. common stock may be purchased in the open market and through privately negotiated transactions, from time-to-time, depending on market conditions. The repurchased shares are held as treasury stock for general corporate purposes. For the nine months ended September 30, 2015, the Company repurchased 373,594 shares of common stock at a total cost of \$6.5 million, compared with repurchases of 334,630 shares at a cost of \$5.6 million for the nine months ended September 30, 2014. At September 30, 2015, there were 244,804 shares available to be repurchased under the stock repurchase program adopted in July of 2014.

Cash dividends on common stock declared and paid during the first nine months of 2015 were \$6.5 million, as compared to \$6.1 million in the same prior year period. On October 22, 2015, the Board of Directors declared a quarterly cash dividend of thirteen cents (\$0.13) per common share. The dividend is payable on November 13, 2015 to stockholders of record at the close of business on November 2, 2015.

Table of Contents

The primary sources of liquidity specifically available to OceanFirst Financial Corp., the holding company of OceanFirst Bank, are capital distributions from the bank subsidiary and the issuance of preferred and common stock and long-term debt. For the nine months ended September 30, 2015, the Company received dividend payments of \$12.0 million from the Bank. The Company's ability to continue to pay dividends will be largely dependent upon capital distributions from the Bank, which may be adversely affected by capital constraints imposed by the applicable regulations. The Company cannot predict whether the Bank will be permitted under applicable regulations to pay a dividend to the Company. If the Bank is unable to pay dividends to the Company, the Company may not have the liquidity necessary to pay a dividend in the future or pay a dividend at the same rate as historically paid, or be able to meet current debt obligations. At September 30, 2015, OceanFirst Financial Corp. held \$20.1 million in cash.

As of September 30, 2015, the Bank exceeded all regulatory capital requirements as follows (in thousands):

	Actual		Required	
	Amount	Ratio	Amount	Ratio
Tier 1 leverage	\$ 227,087	8.91%	\$ 101,944	4.00%
Common Equity Tier 1	227,087	12.67	80,656	4.50
Tier 1 Capital	227,087	12.67	107,541	6.00
Total Capital	243,803	13.60	143,388	8.00

The Bank is considered a well-capitalized institution under the Prompt Corrective Action Regulations.

In July 2013, the Federal Deposit Insurance Corporation and the other Federal bank regulatory agencies issued a final rule that revised their leverage and risk-based capital requirements and the method for calculating risk-weighted assets to make them consistent with agreements that were reached by the Basel Committee on Banking Supervision and certain provisions of the Dodd-Frank Act. The rule and regulatory capital requirements only pertain to the Bank and not the Holding Company. Among other things, the rule established a new Common Equity Tier 1 minimum capital requirement (4.5% of risk-weighted assets), increased the minimum Tier 1 Capital to risk-weighted assets requirement (from 4% to 6% of risk-weighted assets) and assigned a higher risk weight (150%) to exposures that are more than 90 days past due or are on non-accrual status and to certain commercial real estate facilities that finance the acquisition, development or construction of real property. The new Common Equity Tier 1 capital requirement is intended to measure the financial strength of the Bank by comparing its core equity (equity capital plus disclosed reserves) to its risk-weighted assets. The final rule also requires unrealized gains and losses on certain available-for-sale securities holdings to be included for purposes of calculating regulatory capital unless a one-time opt-out is exercised. The Bank has exercised its opt-out. Additional constraints were also imposed on the inclusion in regulatory capital of mortgage-servicing assets, deferred tax assets and minority interests, including investments in the capital of unconsolidated financial institutions. The rule limits a banking organization's capital distributions and certain discretionary bonus payments if the banking organization does not hold a capital conservation buffer consisting of 2.5% of Common Equity Tier 1 capital to risk-weighted assets in addition to the amount necessary to meet its minimum risk-based capital requirements. The final rule became effective for the Bank on January 1, 2015. The capital conservation buffer requirement will be phased in beginning January 1, 2016 and ending January 1, 2019, when the full capital conservation buffer requirement will be effective.

At September 30, 2015, the Company maintained tangible common equity of \$232.6 million, for a tangible common equity to assets ratio of 9.10%.

Off-Balance-Sheet Arrangements and Contractual Obligations

In the normal course of operations, the Company engages in a variety of financial transactions that, in accordance with generally accepted accounting principles, are not recorded in the financial statements. These transactions involve, to varying degrees, elements of credit, interest rate and liquidity risk. Such transactions are used for general corporate purposes or for customer needs. Corporate purpose transactions are used to help manage credit, interest rate and liquidity risk or to optimize capital. Customer transactions are used to manage customers' requests for funding. These financial instruments and commitments include undrawn lines of credit and commitments to extend credit. The Company also has outstanding commitments to sell loans amounting to \$5.9 million.

Table of Contents

The following table shows the contractual obligations of the Company by expected payment period as of September 30, 2015 (in thousands):

Contractual Obligation	Total	Less than one year	1-3 years	3-5 years	More than 5 years
Debt Obligations	\$ 338,499	\$ 90,026	\$ 103,862	\$ 122,111	\$ 22,500
Commitments to Fund Undrawn Lines of Credit	302,635	302,635			
Commitments to Originate Loans	120,697	120,697			

Commitments to fund undrawn lines of credit and commitments to originate loans are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since some of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company's exposure to credit risk is represented by the contractual amount of the instruments. The commitments to fund undrawn lines of credit primarily relate to commercial loans (\$181.7 million), consumer loans (\$106.8 million) and construction loans (\$14.1 million) at September 30, 2015.

Non-Performing Assets

The following table sets forth information regarding the Company's non-performing assets consisting of non-performing loans and other real estate owned. It is the policy of the Company to cease accruing interest on loans 90 days or more past due or in the process of foreclosure.

	September 30, December 31, 2015 2014 (dollars in thousands)	
Non-performing loans:		
Real estate one-to-four family	\$ 5,481	\$ 3,115
Commercial real estate	17,057	12,758
Consumer	1,741	1,877
Commercial and industrial	115	557
Total non-performing loans	24,394	18,307
Other real estate owned	3,262	4,664
Total non-performing assets	\$ 27,656	\$ 22,971
Purchased credit impaired (PCI) loans	\$ 1,019	\$
Delinquent loans 30-89 days	\$ 8,025	\$ 8,960
Allowance for loan losses as a percent of total loans receivable	0.85%	0.95%

Allowance for loan losses as a percent of total non-performing loans	68.21	89.13
Non-performing loans as a percent of total loans receivable	1.24	1.06
Non-performing assets as a percent of total assets	1.08	0.97

The increase in non-performing loans was primarily related to two well-seasoned loans, a \$1.4 million residential mortgage and a \$2.3 million commercial real estate loan, for which there are no expected losses. Included in the non-performing loan total at September 30, 2015 was \$3.8 million of troubled debt restructured loans, as compared to \$2.0 million of troubled debt restructured loans at December 31, 2014. The increase was primarily due to one restructured commercial real estate loan which was previously performing. Non-performing loans are concentrated in commercial real estate, which comprise 69.9% of the total at September 30, 2015. Non-performing loans do not include \$1.0 million of purchased credit impaired loans acquired from Colonial. At September 30, 2015, the allowance for loan losses totaled \$16.6 million, or 0.85% of total loans, compared with \$16.3 million or 0.95% of total loans at December 31, 2014. The decline in the loan coverage ratio was largely a function of Colonial loans, which under purchase accounting requirements, were acquired at fair value, with no corresponding allowance.

The Company classifies loans and other assets in accordance with regulatory guidelines as follows (in thousands):

	September 30, 2015	December 31, 2014
Special Mention	\$ 20,372	\$ 19,017
Substandard	37,508	34,937

The largest non-performing and Substandard loan relationship consists of two commercial real estate loans to a hotel, golf and banquet facility located in New Jersey for \$6.2 million, criticized due to delinquent payments, continual losses and covenant violations. The bankruptcy court recently approved the Bank taking possession of all collateral in the fourth quarter at which time the loan will be reclassified to other real estate owned and other assets. A reserve has previously

Table of Contents

been established which reflects the best current estimate of the fair value of the collateral. The largest Special Mention loan relationship consists of a commercial real estate loan to a local fitness facility for \$3.9 million. The loan is classified due to operating shortfalls in previous years but is performing as part of a restructuring agreement which extended the term of the loan.

Critical Accounting Policies

Note 1 to the Company's Audited Consolidated Financial Statements for the year ended December 31, 2014 included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014 (the 2014 Form 10-K), as supplemented by this report, contains a summary of significant accounting policies. Various elements of these accounting policies, by their nature, are inherently subject to estimation techniques, valuation assumptions and other subjective assessments. Certain assets are carried in the consolidated statements of financial condition at fair value or the lower of cost or fair value. Policies with respect to the methodologies used to determine the allowance for loan losses, the reserve for repurchased loans and loss sharing obligations, and judgments regarding securities and goodwill impairment are the most critical accounting policies because they are important to the presentation of the Company's financial condition and results of operations. These judgments and policies involve a higher degree of complexity and require management to make difficult and subjective judgments which often require assumptions or estimates about highly uncertain matters. The use of different judgments, assumptions and estimates could result in material differences in the results of operations or financial condition. Goodwill will be evaluated for impairment on an annual basis, or more frequently if events or changes in circumstances indicate potential impairment between annual measurement dates. These critical accounting policies and their application are reviewed periodically and, at least annually, with the Audit Committee of the Board of Directors.

Private Securities Litigation Reform Act Safe Harbor Statement

In addition to historical information, this quarterly report contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 which are based on certain assumptions and describe future plans, strategies and expectations of the Company. These forward-looking statements are generally identified by use of the words believe, expect, intend, anticipate, estimate, project, will, should, may, view, potential, or similar expressions or expressions of confidence. The Company's ability to predict results or the actual effect of future plans or strategies is inherently uncertain. Factors which could have a material adverse effect on the operations of the Company and its subsidiaries include, but are not limited to, changes in interest rates, general economic conditions, levels of unemployment in the Bank's lending area, real estate market values in the Bank's lending area, future natural disasters and increases to flood insurance premiums, the level of prepayments on loans and mortgage-backed securities, legislative/regulatory changes, monetary and fiscal policies of the U.S. Government including policies of the U.S. Treasury and the Board of Governors of the Federal Reserve System, the quality or composition of the loan or investment portfolios, demand for loan products, deposit flows, competition, demand for financial services in the Company's market area and accounting principles and guidelines. These risks and uncertainties are further discussed in the Company's Annual Report on Form 10-K for the year ended December 31, 2014 and subsequent securities filings and should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. The Company does not undertake, and specifically disclaims any obligation, to publicly release the result of any revisions which may be made to any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events. Further description of the risks and uncertainties to the business are included in Item 1, Business, and Item 1A, Risk Factors, of the Company's 2014 Form 10-K and Item 1A, Risk Factors, of this 10-Q.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company's interest rate sensitivity is monitored through the use of an interest rate risk (IRR) model. The following table sets forth the amounts of interest-earning assets and interest-bearing liabilities outstanding at September 30, 2015, which were anticipated by the Company, based upon certain assumptions, to reprice or mature in each of the future time periods shown.

Table of Contents

At September 30, 2015, the Company's one-year gap was negative 0.59% as compared to negative 2.73% at December 31, 2014.

At September 30, 2015 (dollars in thousands)	3 Months or Less	More than 3 Months to 1 Year	More than 1 Year to 3 Years	More than 3 Years to 5 Years	More than 5 Years	Total
Interest-earning assets: (1)						
Interest-earning deposits and short-term investments	\$ 26,880	\$	\$	\$	\$	\$ 26,880
Investment securities	65,425	34,809	42,185	5,849	340	148,608
Mortgage-backed securities	29,694	46,353	85,461	65,104	58,515	285,127
FHLB stock					15,970	15,970
Loans receivable (2)	330,496	409,128	547,795	359,286	307,995	1,954,700
Total interest-earning assets	452,495	490,290	675,441	430,239	382,820	2,431,285
Interest-bearing liabilities:						
Money market deposit accounts	28,711	10,279	29,771	24,367	58,529	151,657
Savings accounts	71,153	23,706	52,590	39,865	122,695	310,009
Interest-bearing checking accounts	518,050	47,823	100,589	79,974	137,504	883,940
Time deposits	43,233	101,671	52,465	61,303	1,414	260,086
FHLB advances	5,621	1,412	103,862	122,111		233,006
Securities sold under agreements to repurchase and other borrowings	105,493					105,493
Total interest-bearing liabilities	772,261	184,891	339,277	327,620	320,142	1,944,191
Interest sensitivity gap (3)	\$ (319,766)	\$ 305,399	\$ 336,164	\$ 102,619	\$ 62,678	\$ 487,094
Cumulative interest sensitivity gap	\$ (319,766)	\$ (14,367)	\$ 321,797	\$ 424,416	\$ 487,094	\$ 487,094
Cumulative interest sensitivity gap as a percent of total interest-earning assets	(13.15)%	(0.59)%	13.24%	17.46%	20.03%	20.03%

(1)

Interest-earning assets are included in the period in which the balances are expected to be redeployed and/or repriced as a result of anticipated prepayments, scheduled rate adjustments, and contractual maturities.

(2) For purposes of the gap analysis, loans receivable includes loans held for sale and non-performing loans gross of the allowance for loan losses, unamortized discounts and deferred loan fees.

(3) Interest sensitivity gap represents the difference between interest-earning assets and interest-bearing liabilities. Additionally, the table below sets forth the Company's exposure to interest rate risk as measured by the change in economic value of equity (EVE) and net interest income under varying rate shocks as of September 30, 2015 and December 31, 2014. All methods used to measure interest rate sensitivity involve the use of assumptions, which may tend to oversimplify the manner in which actual yields and costs respond to changes in market interest rates. The Company's interest rate sensitivity should be reviewed in conjunction with the financial statements and notes thereto contained in the 2014 Form 10-K.

Economic Value of Equity Change in Interest Rates in Basis Points (Rate Shock) (dollars in thousands)	September 30, 2015			December 31, 2014			Net Interest Income			Net Interest Income

Item 4. Controls and Procedures

The Company's management, including the Company's principal executive officer and principal financial officer, have evaluated the effectiveness of the Company's disclosure controls and procedures, as such term is defined in Rule 13a-15(e) and 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended, (the Exchange Act). Based upon their evaluation, the principal executive officer and principal financial officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective. Disclosure controls and procedures are the controls and other procedures that are designed to ensure that the information required to be disclosed in the reports that the Company files or submits under the Exchange Act with the Securities and Exchange Commission (SEC) (1) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and (2) is accumulated and communicated to the Company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. In addition, based on that evaluation, there were no changes in the Company's internal control over financial reporting during the quarter ended September 30, 2015 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

See accompanying Notes to Unaudited Consolidated Financial Statements.

Table of Contents**OceanFirst Financial Corp.****Notes To Unaudited Consolidated Financial Statements****Note 1. Basis of Presentation**

The accompanying unaudited consolidated financial statements include the accounts of OceanFirst Financial Corp. (the Company) and its wholly-owned subsidiary, OceanFirst Bank (the Bank), and its wholly-owned subsidiaries, OceanFirst REIT Holdings, Inc., OceanFirst Services, LLC and 975 Holdings, LLC.

The interim consolidated financial statements reflect all normal and recurring adjustments which are, in the opinion of management, considered necessary for a fair presentation of the financial condition and results of operations for the periods presented. The results of operations for the three and nine months ended September 30, 2015 are not necessarily indicative of the results of operations that may be expected for all of 2015. In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the statements of financial condition and the results of operations for the period. Actual results could differ from these estimates.

Certain information and note disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted, pursuant to the rules and regulations of the Securities and Exchange Commission (the SEC).

These unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Company's Annual Report to Stockholders on Form 10-K for the year ended December 31, 2014.

Note 2. Earnings per Share

The following reconciles shares outstanding for basic and diluted earnings per share for the three and nine months ended September 30, 2015 and 2014 (in thousands):

	Three months ended September 30,		Nine months ended September 30,	
	2015	2014	2015	2014
Weighted average shares issued net of Treasury shares	17,146	17,132	16,954	17,261
Less: Unallocated ESOP shares	(374)	(407)	(382)	(416)
Unallocated incentive award shares and shares held by deferred compensation plan	(39)	(102)	(50)	(97)
Average basic shares outstanding	16,733	16,623	16,522	16,748
Add: Effect of dilutive securities:				
Stock options	200	61	204	93
Shares held by deferred compensation plan	20	20	20	24
Average diluted shares outstanding	16,953	16,704	16,746	16,865

For the three months ended September 30, 2015 and 2014, antidilutive stock options and warrants of 1,064,000 and 781,000, respectively, were excluded from earnings per share calculations. For the nine months ended September 30, 2015 and 2014, antidilutive stock options and warrants of 740,000 and 764,000, respectively, were excluded from earnings per share calculations.

Table of Contents**Note 3. Business Combination**

On July 31, 2015, the Company completed its acquisition of Colonial American Bank (Colonial), which after purchase accounting adjustments added \$142.4 million to assets, \$121.2 million to loans, and \$123.3 million to deposits. Total consideration paid for Colonial was \$11.9 million, including cash consideration of \$127,000 for outstanding warrants and for fractional shares. Colonial was merged with and into the Company s subsidiary, OceanFirst Bank, as of the close of business on the date of acquisition.

The acquisition was accounted for under the acquisition method of accounting. Under this method of accounting, the purchase price has been allocated to the respective assets acquired and liabilities assumed based upon their estimated fair values, net of tax. The excess of consideration paid over the fair value of the net assets acquired has been recorded as goodwill.

The following table summarizes the estimated fair values of the assets acquired and the liabilities assumed at the date of the acquisition for Colonial, net of total consideration paid (in thousands):

	At July 31, 2015		Estimated
	Colonial	Purchase	Fair
	Book Value	Accounting Adjustments	Value
Assets acquired:			
Securities	\$ 6,758	\$	\$ 6,758
Loans	125,063	(3,867)(1)	121,196
Allowance for loan losses	(1,578)	1,578	
Other real estate owned	405	(148)	257
Deferred tax asset – recognition of net operating loss carryforward relating to purchase accounting adjustments		2,292	2,292
Other assets	8,823	952	952
Core deposit intangible		277	277
Goodwill		1,845	1,845
Total assets acquired	139,471	2,929	142,400
Liabilities assumed:			
Deposits	123,103	243	123,346
Federal Home Loan Bank advances	6,800		6,800
Other liabilities	309		309
Total liabilities assumed	130,212	243	130,455
Net assets acquired	\$ 9,259	\$ 2,686	\$ 11,945

(1) Includes a general credit fair value deduction of \$1,722,000; a fair value deduction on credit-impaired loans of \$1,475,000; an interest rate fair value benefit of \$980,000; and further credited by the write-off of Colonial's capitalized loan origination costs of \$1,650,000.

The calculation of goodwill is subject to change for up to one year after the date of acquisition as additional information relative to the closing date estimates and uncertainties become available. As the Company finalizes its review of the acquired assets and liabilities, certain adjustments to the recorded carrying values may be required.

Fair Value Measurement of Assets Assumed and Liabilities Assumed

The methods used to determine the fair value of the assets acquired and liabilities assumed in the Colonial acquisition were as follow. Refer to Note 8, Fair Value Measurements, for a discussion of the fair value hierarchy.

Securities

The estimated fair values of the securities were calculated utilizing Level 2 inputs. The securities acquired are bought and sold in active markets. Prices for these instruments were obtained through security industry sources that actively participate in the buying and selling of securities.

Loans

The acquired loan portfolio was valued utilizing Level 3 inputs and included the use of present value techniques employing cash flow estimates and incorporated assumptions that marketplace participants would use in estimating fair values. In instances where reliable market information was not available, the Company used its own assumptions in an effort to determine reasonable fair value. Specifically, the Company utilized three separate fair value analyses which a market participant would employ in estimating the total fair value adjustment. The three separate fair valuation methodologies used were: 1) interest rate loan fair value analysis; 2) general credit fair value adjustment; and 3) specific credit fair value adjustment.

Table of Contents

To prepare the interest rate fair value analysis, loans were grouped by characteristics such as loan type, term, collateral and rate. Market rates for similar loans were obtained from various external data sources and reviewed by Company management for reasonableness. The average of these rates was used as the fair value interest rate a market participant would utilize. A present value approach was utilized to calculate the interest rate fair value adjustment.

The general credit fair value adjustment was calculated using a two part general credit fair value analysis; 1) expected lifetime losses and 2) estimated fair value adjustment for qualitative factors. The expected lifetime losses were calculated using an average of historical losses of the Company, the acquired bank and peer banks. The adjustment related to qualitative factors was impacted by general economic conditions and the risk related to lack of experience with the originator's underwriting process.

To calculate the specific credit fair value adjustment the Company reviewed the acquired loan portfolio for loans meeting the definition of an impaired loan with deteriorated credit quality. Loans meeting this criteria were reviewed by comparing the contractual cash flows to expected collectible cash flows. The aggregate expected cash flows less the acquisition date fair value resulted in an accretable yield amount which will be recognized over the life of the loans on a level yield basis as an adjustment to yield.

Deposits and Core Deposit Premium

Core deposit premium represents the value assigned to non-interest bearing demand deposits, interest-bearing checking, money market and saving accounts acquired as part of the acquisition. The core deposit premium value represents the future economic benefit, including the present value of future tax benefits, of the potential cost saving from acquiring the core deposits as part of an acquisition compared to the cost of alternative funding sources and is valued utilizing Level 2 inputs.

Time deposits are not considered to be core deposits as they are assumed to have a low expected average life upon acquisition. The fair value of time deposits represents the present value of the expected contractual payments discounted by market rates for similar time deposits and is valued utilizing Level 2 inputs.

Federal Home Loan Bank advances

These borrowings were short term in nature and no fair value adjustments were necessary.

Note 4. Securities

The amortized cost and estimated fair value of securities available-for-sale and held-to-maturity at September 30, 2015 and December 31, 2014 are as follows (in thousands):

		At September 30, 2015

FHLMC	141,494	609	(1,659)	140,444
FNMA	184,003	4,674	(1,182)	187,495
GNMA	620	119		739
Total mortgage-backed securities	326,117	5,402	(2,841)	328,678
Total held-to-maturity	\$ 481,340	\$ 5,524	\$ (12,649)	\$ 474,215
Total securities	\$ 501,240	\$ 5,524	\$ (12,745)	\$ 494,019

During the third quarter 2013, the Bank transferred \$536.0 million of previously designated available-for-sale securities to a held-to-maturity designation at estimated fair value. The securities transferred had an unrealized net loss of \$13.3 million at the time of transfer which continues to be reflected in accumulated other comprehensive loss on the consolidated balance sheet, net of subsequent amortization, which is being recognized over the life of the securities. The carrying value of the held-to-maturity investment securities at September 30, 2015 and December 31, 2014 are as follows (in thousands):

	September 30, 2015	December 31, 2014
Amortized cost	\$ 403,838	\$ 481,340
Net loss on date of transfer from available-for-sale	(13,347)	(13,347)
Accretion of net unrealized loss on securities reclassified as held-to-maturity	2,441	1,424
Carrying value	\$ 392,932	\$ 469,417

There were no realized gains or losses on the sale of securities for the three and nine months ended September 30, 2015. Net realized gains on the sale of securities for the three and nine months ended September 30, 2014 were \$591,000 and \$938,000, respectively.

The amortized cost and estimated fair value of investment securities at September 30, 2015 by contractual maturity are shown below (in thousands). Actual maturities will differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties. At September 30, 2015, corporate debt securities with an amortized cost and estimated fair value of \$55.0 million and \$48.1 million, respectively, were callable prior to the maturity date.

September 30, 2015	Amortized Cost	Estimated Fair Value
Less than one year	\$ 45,234	\$ 45,281
Due after one year through five years	48,034	48,388
Due after five years through ten years	340	342
Due after ten years	55,000	48,072
	\$ 148,608	\$ 142,083

Mortgage-backed securities are excluded from the above table since their effective lives are expected to be shorter than the contractual maturity date due to principal prepayments.

Table of Contents

At September 30, 2015, the amortized cost, estimated fair value and credit rating of the individual corporate debt securities in an unrealized loss position for greater than one year are as follows (in thousands):

Security Description	Amortized Cost	Estimated Fair Value	Credit Rating Moody s/S&P
BankAmerica Capital	\$ 15,000	\$ 13,875	Ba1/BB+
Chase Capital	10,000	8,525	Baa2/BBB-
Wells Fargo Capital	5,000	4,282	A1/BBB+
Huntington Capital	5,000	4,188	Baa2/BB
Keycorp Capital	5,000	4,177	Baa2/BB+
PNC Capital	5,000	4,425	Baa1/BBB-
State Street Capital	5,000	4,350	A3/BBB
SunTrust Capital	5,000	4,250	Baa3/BB+
	\$ 55,000	\$ 48,072	

At September 30, 2015, the estimated fair value of each corporate debt security was below cost. However, the estimated fair value of the corporate debt securities increased as compared to December 31, 2014. The corporate debt securities are issued by other financial institutions with credit ratings ranging from a high of A1 to a low of BB as rated by one of the

Table of Contents

internationally-recognized credit rating services. These floating-rate securities were purchased in 1998 and have paid coupon interest continuously since issuance. Floating-rate debt securities such as these pay a fixed interest rate spread over 90-day LIBOR. Following the purchase of these securities, the required spread increased for these types of securities causing a decline in the market price. The Company concluded that unrealized losses on corporate debt securities were only temporarily impaired at September 30, 2015. In concluding that the impairments were only temporary, the Company considered several factors in its analysis. The Company noted that each issuer made all the contractually due payments when required. There were no defaults on principal or interest payments and no interest payments were deferred. All of the financial institutions are also considered well-capitalized. Credit spreads have decreased for these types of securities and market prices have improved. Based on management's analysis of each individual security, the issuers appear to have the ability to meet debt service requirements over the life of the security. Furthermore, the Company does not have the intent to sell these securities and it is more likely than not that the Company will not be required to sell the securities. The Company has held the securities continuously since 1998 and expects to receive its full principal at maturity in 2028 or prior if called by the issuer. The Company has historically not actively sold investment securities and has not utilized the securities portfolio as a source of liquidity. The Company's long range liquidity plans indicate adequate sources of liquidity outside the securities portfolio.

The mortgage-backed securities are issued and guaranteed by either the Federal Home Loan Mortgage Corporation (FHLMC) or Federal National Mortgage Association (FNMA), corporations which are chartered by the United States Government and whose debt obligations are typically rated AA+ by one of the internationally recognized credit rating services. The Company considers the unrealized losses to be the result of changes in interest rates which over time can have both a positive and negative impact on the estimated fair value of the mortgage-backed securities. The Company does not intend to sell these securities and it is more likely than not that the Company will not be required to sell the securities before recovery of their amortized cost. As a result, the Company concluded that these securities were only temporarily impaired at September 30, 2015.

Note 5. Loans Receivable, Net

Loans receivable, net at September 30, 2015 and December 31, 2014 consisted of the following (in thousands):

	September 30, 2015	December 31, 2014
Real estate:		
One-to-four family	\$ 786,915	\$ 737,889
Commercial real estate, multi family and land	803,340	649,951
Residential construction	51,580	47,552
Consumer	194,306	199,349
Commercial and industrial	129,379	83,946
Total loans	1,965,520	1,718,687
Purchased credit-impaired (PCI) loans	1,019	
Loans in process	(14,145)	(16,731)
Deferred origination costs, net	3,216	3,207
Allowance for loan losses	(16,638)	(16,317)
Loans receivable, net	\$ 1,938,972	\$ 1,688,846

At September 30, 2015 and December 31, 2014, loans in the amount of \$24,394,000 and \$18,307,000, respectively, were three or more months delinquent or in the process of foreclosure and the Company was not accruing interest income on these loans. There were no loans ninety days or greater past due and still accruing interest. Non-accrual loans include both smaller balance homogenous loans that are collectively evaluated for impairment and individually classified impaired loans.

The recorded investment in mortgage and consumer loans collateralized by residential real estate which are in the process of foreclosure amounted to \$2,852,000 at September 30, 2015. The amount of foreclosed residential real estate property held by the Company was \$3,104,000 at September 30, 2015.

The Company defines an impaired loan as all non-accrual commercial real estate, multi-family, land, construction and commercial loans in excess of \$250,000. Impaired loans also include all loans modified as troubled debt restructurings. At September 30, 2015, the impaired loan portfolio totaled \$45,573,000 for which there was a specific allocation in the allowance for loan losses of \$2,400,000. At December 31, 2014, the impaired loan portfolio totaled \$36,979,000 for which there was a specific allocation in the allowance for loan losses of \$2,161,000. The average balance of impaired loans for the three and nine months ended September 30, 2015 was \$46,211,000 and \$40,909,000, respectively and \$41,749,000 and \$42,162,000, respectively, for the same prior year periods.

The Company categorizes all commercial and commercial real estate loans, except for small business loans, into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation and current economic trends, among other factors. This analysis is performed on a quarterly basis. The Company uses the following definitions for risk ratings:

Special Mention. Loans classified as Special Mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the Bank's credit position at some future date.

Substandard. Loans classified as Substandard are inadequately protected by the current net worth and paying capacity of the borrower or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected.

Doubtful. Loans classified as Doubtful have all the weaknesses inherent in those classified as Substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable.

Loans not meeting the criteria above that are analyzed individually as part of the above described process are considered to be Pass rated loans. As of September 30, 2015 and December 31, 2014, and based on the most recent analysis performed, the risk category of loans by loan portfolio segment is as follows, excluding PCI loans (in thousands):

	Pass	Special Mention	Substandard	Doubtful	Total
<u>September 30, 2015</u>					
Commercial real estate	\$ 760,756	\$ 10,727	\$ 31,857	\$	\$ 803,340

Commercial and industrial	82,693	173	1,080		83,946
	\$ 694,680	\$ 12,857	\$ 26,360	\$	\$ 733,897

Table of Contents

For residential, consumer and small business loan classes, the Company evaluates credit quality based on the aging status of the loan, which was previously presented, and by payment activity. The following table presents the recorded investment in residential and consumer loans based on payment activity as of September 30, 2015 and December 31, 2014, excluding PCI loans (in thousands):

	Residential Real Estate	
	Residential	Consumer
<u>September 30, 2015</u>		
Performing	\$ 833,014	\$ 192,565
Non-performing	5,481	1,741
	\$ 838,495	\$ 194,306
<u>December 31, 2014</u>		
Performing	\$ 782,326	\$ 197,472
Non-performing	3,115	1,877
	\$ 785,441	\$ 199,349

The Company classifies certain loans as troubled debt restructurings when credit terms to a borrower in financial difficulty are modified. The modifications may include a reduction in rate, an extension in term, the capitalization of past due amounts and/or the restructuring of scheduled principal payments. Included in the non-accrual loan total at September 30, 2015 and December 31, 2014 were \$3,819,000 and \$2,031,000, respectively, of troubled debt restructurings. At September 30, 2015 and December 31, 2014, the Company has allocated \$587,000 and \$419,000, respectively, of specific reserves to loans that are classified as troubled debt restructurings. Non-accrual loans which become troubled debt restructurings are generally returned to accrual status after six months of performance. In addition to the troubled debt restructurings included in non-accrual loans, the Company also has loans classified as troubled debt restructurings which are accruing at September 30, 2015 and December 31, 2014, which totaled \$26,935,000 and \$21,462,000, respectively. In the second quarter of 2015, the Bank restructured a commercial real estate loan with an outstanding balance of \$3.9 million by extending the term and lowering the monthly repayment amount. The interest rate was unchanged. Troubled debt restructurings are considered in the allowance for loan losses similar to other impaired loans.

The following table presents information about troubled debt restructurings which occurred during the three and nine months ended September 30, 2015 and 2014, and troubled debt restructurings modified within the previous year and which defaulted during the three and nine months ended September 30, 2015 and 2014 (dollars in thousands):

Troubled Debt Restructurings Which Subsequently Defaulted:	Number of Loans	Recorded Investment
None	None	None

As part of the Colonial acquisition PCI loans were acquired at a discount primarily due to deteriorated credit quality. PCI loans are accounted for at fair value, based upon the present value of expected future cash flows, with no related allowance for loan losses.

The following table presents information regarding the estimates of the contractually required payments, the cash flows expected to be collected and the estimated fair value of the PCI loans acquired from Colonial at July 31, 2015 (in thousands):

	July 31, 2015
Contractually required principal and interest	\$ 3,263
Contractual cash flows not expected to be collected (non-accretable discount)	(2,012)
Expected cash flows to be collected at acquisition	1,251
Interest component of expected cash flows (accretable yield)	(220)
Fair value of acquired loans	\$ 1,031

The following table summarizes the changes in accretable yield for PCI loans during the three and nine months ended September 30, 2015 (in thousands):

	Three and Nine months ended September 30, 2015
Beginning balance	\$
Acquisition	220
Accretion	(14)

Reclassification from non-accretable
difference

Ending balance	\$	206
----------------	----	-----

Note 6. Reserve for Repurchased Loans and Loss Sharing Obligations

The reserve for repurchased loans and loss sharing obligations was \$1.0 million at September 30, 2015, unchanged from December 31, 2014 and was \$1.1 million at September 30, 2014 a decrease of \$388,000 from December 31, 2013 due to realized losses. The reserve for repurchased loans and loss sharing obligations was established to provide for expected losses related to repurchase requests which may be received on residential mortgage loans previously sold to investors and other loss sharing obligations. The reserve is included in other liabilities in the accompanying statements of financial condition.

At September 30, 2015, and December 31, 2014, there were no outstanding loan repurchase requests.

Note 7. Deposits

The major types of deposits at September 30, 2015 and December 31, 2014 were as follows (in thousands):

Type of Account	September 30, 2015	December 31, 2014
Non-interest-bearing	\$ 362,079	\$ 279,944
Interest-bearing checking	883,940	836,120
Money market deposit	151,657	95,663
Savings	310,009	301,190
Time deposits	260,086	207,218
Total deposits	\$ 1,967,771	\$ 1,720,135

Table of Contents

Included in time deposits at September 30, 2015 and December 31, 2014, is \$82,929,000 and \$64,416,000, respectively, in deposits of \$100,000 and over.

Note 8. Recent Accounting Pronouncements

In January 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2014-04, Receivables Troubled Debt Restructurings by Creditors (Subtopic 310-40) Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure, which applies to all creditors who obtain physical possession of residential real estate property collateralizing a consumer mortgage loan in satisfaction of a receivable. The amendments in this update clarify when an in-substance repossession or foreclosure occurs and requires disclosure of both (1) the amount of foreclosed residential real estate property held by a creditor and (2) the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure. The amendments in ASU 2014-04 are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2014. The adoption of this standard in the first quarter of 2015 did not to have a material impact on the Company's consolidated financial statements.

In September 2015, the FASB issued ASU 2015-16, Business Combinations, Simplifying the Accounting for Measurement Period Adjustments. The amendments in this Update apply to all entities that have reported provisional amounts for items in a business combination for which the accounting is incomplete by the end of the reporting period in which the combination occurs and during the measurement period have an adjustment to provisional amounts recognized. In these cases, the acquirer must record, in the same period's financial statements, the effect on earnings of changes in depreciation, amortization, or other income effects, if any, as a result of the change to the provisional amounts, calculated as if the accounting had been completed at the acquisition date. The amendments in this Update are effective for fiscal years beginning after December 15, 2015 including interim periods within those fiscal years. The adoption of this Update is not expected to have a material impact on the Company's consolidated financial statements.

Note 9. Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair market measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or the most advantageous) market used to measure the fair value of the asset or liability shall not be adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact and (iv) willing to transact.

The Company uses valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (replacement costs). Valuation techniques should be consistently applied. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability and developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity's own assumptions

about the assumptions market participants would use in pricing the asset or liability and developed based on the best information available in the circumstances. In that regard, a fair value hierarchy has been established for valuation inputs that give the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. Movements within the fair value hierarchy are recognized at the end of the applicable reporting period. There were no transfers between the levels of the fair value hierarchy for the three and nine months ended September 30, 2015. The fair value hierarchy is as follows:

Level 1 Inputs - Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 Inputs - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (for example, interest rates, volatilities, prepayment speeds, loss severities, credit risks and default rates) or inputs that are derived principally from or corroborated by observable market data by correlations or other means.

Level 3 Inputs - Significant unobservable inputs that reflect an entity's own assumptions that market participants would use in pricing the assets or liabilities.

Table of Contents**Assets and Liabilities Measured at Fair Value**

A description of the valuation methodologies used for assets and liabilities measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below. Certain financial assets and financial liabilities are measured at fair value on a non-recurring basis, that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment).

Securities Available-For-Sale

Securities classified as available-for-sale are reported at fair value utilizing Level 2 inputs. In general, fair value is based upon quoted market prices, where available. Most of the Company's available-for-sale securities, however, are fixed income instruments that are not quoted on an exchange, but are bought and sold in active markets. Prices for these instruments are obtained through third party pricing vendors or security industry sources that actively participate in the buying and selling of securities. Prices obtained from these sources include market quotations and matrix pricing. Matrix pricing is a mathematical technique used principally to value certain securities without relying exclusively on quoted prices for the specific securities, but comparing the securities to benchmark or comparable securities.

Other Real Estate Owned and Impaired Loans

Other real estate owned and loans measured for impairment based on the fair value of the underlying collateral are recorded at estimated fair value, less estimated selling costs. Fair value is based on independent appraisals.

The following table summarizes financial assets and financial liabilities measured at fair value as of September 30, 2015 and December 31, 2014, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value (in thousands):

	Fair Value Measurements at Reporting Date Using:			
	Total Fair Value	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs
September 30, 2015				
Items measured on a recurring basis:				
Investment securities available-for-sale:				
U.S. agency obligations	\$ 30,108	\$	\$ 30,108	\$
Items measured on a non-recurring basis:				
Other real estate owned	3,262			3,262
Loans measured for impairment based on the fair value of the underlying collateral	12,844			12,844
	Fair Value Measurements at Reporting Date Using:			
	Total Fair Value	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs
December 31, 2014				
Items measured on a recurring basis:				
Investment securities available-for-sale:				
U.S. agency obligations	\$ 19,804	\$	\$ 19,804	\$

Items measured on a non-recurring basis:

Other real estate owned	4,664	4,664
Loans measured for impairment based on the fair value of the underlying collateral	11,675	11,675

Assets and Liabilities Disclosed at Fair Value

A description of the valuation methodologies used for assets and liabilities disclosed at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy is set forth below.

Cash and Due from Banks

For cash and due from banks, the carrying amount approximates fair value.

Securities Held-to-Maturity

Securities classified as held-to-maturity are carried at amortized cost, as the Company has the positive intent and ability to hold these securities to maturity. The Company determines the fair value of the securities utilizing Level 2 inputs. In general, fair value is based upon quoted market prices, where available. Most of the Company's investment and mortgage-backed securities, however, are fixed income instruments that are not quoted on an exchange, but are bought and sold in active markets. Prices for these instruments are obtained through third party pricing vendors or security industry sources that actively participate in the buying and selling of securities. Prices obtained from these sources include market quotations and matrix pricing. Matrix pricing is a mathematical technique used principally to value certain securities without relying exclusively on quoted prices for the specific securities, but comparing the securities to benchmark or comparable securities.

Table of Contents

Fair value estimates are made at a point in time, based on relevant market data as well as the best information available about the security. Illiquid credit markets have resulted in inactive markets for certain of the Company's securities. As a result, there is limited observable market data for these assets. Fair value estimates for securities for which limited observable market data is available are based on judgments regarding current economic conditions, liquidity discounts, credit and interest rate risks, and other factors. These estimates involve significant uncertainties and judgments and cannot be determined with precision. As a result, such calculated fair value estimates may not be realizable in a current sale or immediate settlement of the security.

The Company utilizes third party pricing services to obtain fair values for its corporate debt securities. Management's policy is to obtain and review all available documentation from the third party pricing service relating to their fair value determinations, including their methodology and summary of inputs. Management reviews this documentation, makes inquiries of the third party pricing service and makes a determination as to the level of the valuation inputs. Based on the Company's review of the available documentation from the third party pricing service, management concluded that Level 2 inputs were utilized for all securities. In the case of the Level 2 securities, the significant observable inputs include benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, other market information and observations of equity and credit default swap curves related to the issuer.

Federal Home Loan Bank of New York Stock

The fair value for Federal Home Loan Bank of New York stock is its carrying value since this is the amount for which it could be redeemed. There is no active market for this stock and the Company is required to maintain a minimum investment based upon the outstanding balance of mortgage related assets and outstanding borrowings.

Loans

Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type such as residential mortgage, consumer and commercial. Each loan category is further segmented into fixed and adjustable rate interest terms.

Fair value of performing and non-performing loans was estimated by discounting the future cash flows, net of estimated prepayments, at a rate for which similar loans would be originated to new borrowers with similar terms. Fair values estimated in this manner do not fully incorporate an exit price approach to fair value, but instead are based on a comparison to current market rates for comparable loans.

Deposits Other than Time Deposits

The fair value of deposits with no stated maturity, such as non-interest-bearing demand deposits, interest-bearing checking accounts, money market accounts and saving accounts are, by definition, equal to the amount payable on demand. The related insensitivity of the majority of these deposits to interest rate changes creates a significant inherent value which is not reflected in the fair value reported.

Time Deposits

The fair value of time deposits is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar remaining maturities.

Securities Sold Under Agreements to Repurchase with Retail Customers

Fair value approximates the carrying amount as these borrowings are payable on demand and the interest rate adjusts monthly.

Borrowed Funds

Fair value estimates are based on discounting contractual cash flows using rates which approximate the rates offered for borrowings of similar remaining maturities.

Table of Contents

The book value and estimated fair value of the Bank's significant financial instruments not recorded at fair value as of September 30, 2015 and December 31, 2014 are presented in the following tables (in thousands):

September 30, 2015	Fair Value Measurements at Reporting Date Using:			
	Book Value	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs
Financial Assets:				
Cash and due from banks	\$ 50,576	\$ 50,576	\$	\$
Securities held-to-maturity	392,932		400,852	
Federal Home Loan Bank of New York stock	15,970			15,970
Loans receivable and mortgage loans held for sale	1,941,278			1,960,827
Financial Liabilities:				
Deposits other than time deposits	1,707,685		1,707,685	
Time deposits	260,086		261,888	
Securities sold under agreements to repurchase with retail customers	77,993	77,993		
Federal Home Loan Bank advances and other borrowings	260,506		262,488	

December 31, 2014	Fair Value Measurements at Reporting Date Using:			
	Book Value	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs
Financial Assets:				
Cash and due from banks	\$ 36,117	\$ 36,117	\$	\$
Securities held-to-maturity	469,417		474,215	
Federal Home Loan Bank of New York stock	19,170			19,170
Loans receivable and mortgage loans held for sale	1,693,047			1,709,819
Financial Liabilities:				
Deposits other than time deposits	1,512,917		1,512,917	
Time deposits	207,218		208,651	
Securities sold under agreements to repurchase with retail customers	67,812	67,812		
Federal Home Loan Bank advances and other borrowings	332,738		332,432	

Limitations

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because a limited market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments and other significant unobservable inputs. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Fair value estimates are based on existing balance sheet financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments. Significant assets and liabilities that are not considered financial assets or liabilities include deferred tax assets, and premises and equipment. In addition, the tax ramifications related to the realization of the unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in the estimates.

Table of Contents**PART II. OTHER INFORMATION****Item 1. Legal Proceedings**

The Company is not engaged in any legal proceedings of a material nature at the present time. From time to time, the Company is a party to routine legal proceedings within the normal course of business. Such routine legal proceedings in the aggregate are believed by management to be immaterial to the Company's financial condition or results of operations.

Item 1A. Risk Factors

For a summary of risk factors relevant to the Company, see Part I, Item 1A, "Risk Factors," in the 2014 Form 10-K. There were no material changes to risk factors relevant to the Company's operations since December 31, 2014.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On July 24, 2014, the Company announced the authorization of the Board of Directors to repurchase up to 5% of the Company's outstanding common stock, or 867,923 shares. Information regarding the Company's common stock repurchases for the three month period ended September 30, 2015 is as follows:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
July 1, through July 31, 2015		\$		358,458
August 1, 2015 through August 31, 2015	44,531	18.00	44,531	313,927
September 1, 2015 through September 30, 2015	69,123	17.45	69,123	244,804

Item 3. Defaults Upon Senior Securities
