Forward-Looking Statements This presentation contains “forward-looking statements” within the meaning of federal securities laws, including statements about anticipated future events and expectations that are not historical facts and the anticipated benefits of the acquisition of ILG, Inc. Such statements include, but are not limited to, statements regarding earnings trends, estimates, and assumptions. We caution you that these statements are not guarantees of future performance and are subject to numerous risks and uncertainties, including volatility in the economy and the credit markets, supply and demand changes for vacation ownership and residential products, competitive conditions, the availability of capital to finance growth, and other matters referred to under the heading “Risk Factors” contained in our most recent annual report on Form 10-K filed with the U.S. Securities and Exchange Commission (the “SEC”) and in subsequent SEC filings, any of which could cause actual results to differ materially from those expressed in or implied in this presentation. These statements are made as of May 7, 2018 and we undertake no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events, or otherwise. In this presentation we use certain financial measures that are not prescribed by United States generally accepted accounting principles (“GAAP”). We discuss our reasons for reporting these non-GAAP financial measures herein, and reconcile the most directly comparable GAAP financial measure to each non-GAAP financial measure that we report (identified by a double asterisk (“**”) on the following pages). Although we evaluate and present these non-GAAP financial measures for the reasons described in the Appendix, please be aware that these non-GAAP financial measures have limitations and should not be considered in isolation or as a substitute for revenues, net income, earnings per share or any other comparable operating measure prescribed by GAAP. In addition, these non-GAAP financial measures may be calculated and / or presented differently than measures with the same or similar names that are reported by other companies, and as a result, the non-GAAP financial measures we report may not be comparable to those reported by others.

Non-GAAP Financial Measures In this presentation, and on the related conference call, we use certain financial measures that are not prescribed by United States generally accepted accounting principles ("GAAP"). We discuss our reasons for reporting these non-GAAP financial measures below, and reconcile the most directly comparable GAAP financial measure to each non-GAAP financial measure that we report (identified by a double asterisk ("**") on the preceding pages). Although we evaluate and present these non-GAAP financial measures for the reasons described below, please be aware that these non-GAAP financial measures have limitations and should not be considered in isolation or as a substitute for revenues, net income, earnings per share or any other comparable operating measure prescribed by GAAP. In addition, these non-GAAP financial measures may be calculated and / or presented differently than measures with the same or similar names that are reported by other companies, and as a result, the non-GAAP financial measures we report may not be comparable to those reported by others. We evaluate non-GAAP financial measures, including Adjusted EBITDA that exclude certain items in the fiscal year ended December 31, 2017, because these non-GAAP financial measures allow for period-over-period comparisons of our on-going core operations before the impact of these items. These non-GAAP financial measures also facilitate our comparison of results from our on-going core operations before these items with results from other vacation ownership companies. Earnings Before Interest Expense, Taxes, Depreciation and Amortization ("EBITDA") and Adjusted EBITDA. EBITDA is defined as earnings, or net income, before interest expense (excluding consumer financing interest expense), provision for income taxes, depreciation and amortization. For purposes of our EBITDA and Adjusted EBITDA calculations, we do not adjust for consumer financing interest expense because the associated debt is secured by vacation ownership notes receivable that have been sold to bankruptcy remote special purpose entities and is generally non-recourse to us. Further, we consider consumer financing interest expense to be an operating expense of our business. We consider EBITDA and Adjusted EBITDA to be indicators of operating performance, which we use to measure our ability to service debt, fund capital expenditures and expand our business. We also use EBITDA and Adjusted EBITDA, as do analysts, lenders, investors and others, because these measures exclude certain items that can vary widely across different industries or among companies within the same industry. For example, interest expense can be dependent on a company's capital structure, debt levels and credit ratings. Accordingly, the impact of interest expense on earnings can vary significantly among companies. The tax positions of companies can also vary because of their differing abilities to take advantage of tax benefits and because of the tax policies of the jurisdictions in which they operate. As a result, effective tax rates and provision for income taxes can vary considerably among companies. EBITDA and Adjusted EBITDA also exclude depreciation and amortization because companies utilize productive assets of different ages and use different methods of both acquiring and depreciating productive assets. These differences can result in considerable variability in the relative costs of productive assets and the depreciation and amortization expense among companies. Adjusted EBITDA reflects additional adjustments for certain items including the exclusion of non-cash share-based compensation expense to address considerable variability among companies in recording compensation expense because companies use share-based payment awards differently, both in the type and quantity of awards granted. Prior period presentation has been recast for consistency. We evaluate Adjusted EBITDA as an indicator of operating performance because it allows for period-over-period comparisons of our on-going core operations before the impact of the excluded items. Together, EBITDA and Adjusted EBITDA facilitate our comparison of results from our on-going core operations before the impact of these items with results from other vacation ownership companies. **Total Revenues Excluding Cost Reimbursements.** Cost reimbursements revenue includes direct and indirect costs that property owners' associations and joint ventures we participate in reimburse to us, and relates, predominantly, to payroll costs where we are the employer. As we record cost reimbursements based upon costs incurred with no added markup, this revenue and related expense has no impact on net income attributable to us because cost reimbursements revenue net of reimbursed costs expense is zero. We consider total revenues excluding cost reimbursements to be a meaningful metric as it represents that portion of revenue that impacts net income attributable to us.

Non-GAAP Financial Measures Adjusted Net Income. We evaluate non-GAAP financial measures, including Adjusted Net Income, Adjusted EBITDA, and Adjusted Development Margin, that exclude certain items in the quarters ended March 31, 2018 and March 31, 2017, because these non-GAAP financial measures allow for period-over-period comparisons of our on-going core operations before the impact of these items. These non-GAAP financial measures also facilitate our comparison of results from our on-going core operations before these items with results from other vacation ownership companies. Certain items - Quarter Ended March 31, 2018. In our Statement of Income for the quarter ended March 31, 2018, we recorded \$2.6 million of net pre-tax items, which included \$3.2 million of acquisition costs, including \$2.5 million of acquisition costs associated with the anticipated future capital efficient acquisition of the operating property in San Francisco, California and \$0.7 million of other acquisition costs, partially offset by a \$0.5 million favorable true up of previously recorded costs associated with Hurricane Irma and Hurricane Maria (recorded in gains and other income) and a \$0.1 million true up of previously recorded litigation settlement expenses. Certain items - Quarter Ended March 31, 2017. In our Statement of Income for the quarter ended March 31, 2017, we recorded \$0.5 million of net pre-tax items, which included \$0.4 million of acquisition costs and \$0.1 million of losses and other expense. **Free Cash Flow and Adjusted Free Cash Flow.** We evaluate Free Cash Flow and Adjusted Free Cash Flow as liquidity measures that provide useful information to management and investors about the amount of cash provided by operating activities after capital expenditures for property and equipment, changes in restricted cash, and the borrowing and repayment activity related to our securitizations, which cash can be used for strategic opportunities, including acquisitions and strengthening the balance sheet. Adjusted Free Cash Flow, which reflects additional adjustments to Free Cash Flow for the impact of organizational and separation related, litigation, and other cash charges, allows for period-over-period comparisons of the cash generated by our business before the impact of these items. Analysis of Free Cash Flow and Adjusted Free Cash Flow also facilitates management's comparison of our results with our competitors' results.
