Disclaimer Regarding Forward-Looking Statements

This quarterly report includes forward-looking statements (within the meaning of Section 27A of the U.S. Securities Act of 1933 and Section 21E of the U.S. Securities Exchange Act of 1934) concerning Canon Inc. (the Company) and its subsidiaries (collectively Canon). To the extent that statements in this quarterly report do not relate to historical or current facts, they constitute forward-looking statements. These forward-looking statements are based on the current assumptions and beliefs of Canon in light of the information currently available to them, and involve known and unknown risks, uncertainties and other factors. Such risks, uncertainties and other factors may cause Canon's actual results, performance, achievements or financial position to be materially different from any future results, performance, achievements or financial position expressed or implied by these forward-looking statements. Canon undertakes no obligation to publicly update any forward-looking statements after the date of this quarterly report. Investors are advised to consult any further disclosures by Canon in its subsequent filings with the U.S. Securities and Exchange Commission pursuant to the Securities Exchange Act of 1934 and its other filings.

The risks, uncertainties and other factors referred to above include, but are not limited to, foreign currency exchange rate fluctuations; the uncertainty of Canon's ability to implement its plans to localize production and other measures to reduce the impact of foreign currency exchange rate fluctuations; uncertainty as to economic conditions in Canon's major markets; uncertainty of continued demand for Canon's high-value-added products; Canon's ability to continue to develop products and to market products that incorporate new technology on a timely basis, are competitively priced, and achieve market acceptance; the possibility of losses resulting from foreign currency transactions designed to reduce financial risks from changes in foreign currency exchange rates; disasters, outages or similar events; and inventory risk due to disruptions in supply chains and shifts in market demand.

Edgar Filing: CANON INC - Form 6-K

1. Canon's consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles.
2. Consumption tax is excluded from the stated amount of net sales.
3. The computation of diluted net income attributable to Canon Inc. shareholders per share for 2017 and the nine months ended September 30, 2017 excludes outstanding stock options because the effect would be anti-dilutive.
4. There were no dilutive securities during the three months ended September 30, 2017.

**(2) Description of Business**

Canon prepares quarterly consolidated financial statements in accordance with U.S. generally accepted accounting principles ( U.S. GAAP ). Financial information presented in sections II. The Business is also in conformity with U.S.GAAP.

The Canon Group (consisting of the Company, 380 consolidated subsidiaries, and 8 affiliates accounted for using the equity method, as of September 30, 2018, collectively, the Group ) is engaged in development, manufacturing, sales, and servicing activities in areas such as office, imaging systems, medical systems, and industrial equipment. No material change in Canon s business has occurred during the nine months ended September 30, 2018.

No additions or removals of significant group entities have occurred during the nine months ended September 30, 2018.

## II. The Business

### (1) Risk Factors

No material changes are recognized pursuant to the risk factors of Canon's business indicated in the Annual Securities Report (Yukashoken Houkokusho) of the previous fiscal year.

### (2) Significant Business Contracts Entered into in the Third Quarter of Fiscal 2018

No material contracts were entered into during the three months ended September 30, 2018.

### (3) Operating Results

Looking back at the global economy in the first nine months of 2018, the U.S. economy continued to grow steadily as employment conditions improved. The European economy continued to grow moderately, mainly driven by domestic demand, while exports remained weak. In China, public investments and consumer spending slowed down and the economies of emerging countries faced slowdowns in market growth mainly due to local currency depreciation. In Japan, although consumer spending appeared to be at a standstill, capital investment continued to improve. As a result, the global economy overall remained in a state of gradual recovery.

As for the markets in which Canon operates amid these conditions, demand for office multifunction devices ( MFDs ) and laser printers remained firm supported by the trend of shifting from monochrome to color models and increasing demand in emerging countries. The decline of the camera market continued and the market for inkjet printers was slightly below the level of the previous year. While demand for medical equipment slowed down in Japan, overall demand grew moderately. Within the Industry and Others sector, although capital investment in organic LED ( OLED ) panel manufacturing equipment faced a temporary slowdown, demand for network cameras enjoyed solid growth.

The average values of the yen during the third quarter and the first nine months of the year were ¥111.47 and ¥109.53 against the U.S. dollar, respectively, year-on-year depreciation of approximately ¥1 and year-on-year appreciation of approximately ¥2, and ¥129.63 and ¥130.88 against the euro, respectively, year-on-year appreciation of approximately ¥1 and year-on-year depreciation of approximately ¥6.

**(3) Operating Results (continued)**

[Third quarter results]

During the third quarter, unit sales of office MFDs increased compared with the same period of the previous year due to the solid sales of color models, mainly outside of Japan. Additionally, unit sales of laser printers increased compared with the same period of the previous year, supported by expanded sales of both monochrome and color models. Total sales volume of interchangeable-lens digital cameras decreased compared with the same period of the previous year, mainly for entry-class models, due to a temporary slowdown in demand. However, sales of mirrorless cameras increased. Looking at inkjet printers, unit sales increased compared with the same period of the previous year, thanks to such factors as expanded sales of home-use models and refillable ink tank models. For medical equipment, sales decreased compared with the same period of the previous year mainly due to the postponement of capital investment by medical institutions related to revisions to Japan's public health insurance program. For industrial equipment, sales of flat-panel display ( FPD ) lithography equipment and manufacturing equipment for OLED panels decreased compared with the same period of the previous year due to a slowdown in investment in OLED panels, and sales of network cameras increased steadily in response to the growing market. Under these conditions, third-quarter net sales decreased by 6.8% year on year to ¥926.5 billion. Although the gross profit ratio dropped by 2.3 points to 46.1%, this was mainly due to the fact that certain costs that were under operating expenses have been reclassified under cost of sales following the adoption of new accounting standards related to revenue recognitions. Excluding the impact of this reclassification, the gross profit ratio increased by 0.8 points to 49.2%. Operating expenses decreased by 11.1% year on year to ¥358.7 billion, thanks to continuous Group-wide efforts to reduce spending as well as the impact of the aforementioned reclassification of figures related to the adoption of new accounting standards. As a result, third-quarter operating profit decreased by 12.4% to ¥68.3 billion. Other income (deductions) decreased by ¥11.1 billion, mainly due to gain on securities contributed to the retirement benefit trust during the same period of the previous year and an increase in foreign currency exchange losses, while income before income taxes decreased by 23.6% year on year to ¥67.1 billion and net income attributable to Canon Inc. decreased by 26.6% to ¥46.3 billion.

Basic net income attributable to Canon Inc. shareholders per share was ¥42.84 for the third quarter, a year-on-year decrease of ¥15.55.

[Nine-month results]

During the first nine months, unit sales of office MFDs increased compared with the same period of the previous year due to the solid sales of color models, mainly outside of Japan. Additionally, unit sales of laser printers, both monochrome and color models, increased compared with the same period of the previous year. Total sales volume of interchangeable-lens digital cameras decreased compared with the same period of the previous year, mainly for entry-class models, due to a temporary slowdown in demand. However, sales of mirrorless cameras increased. Looking at inkjet printers, unit sales increased compared with the same period of the previous year, thanks to such factors as expanded sales of home-use models and refillable ink tank models. For medical equipment, sales decreased compared with the same period of the previous year mainly due to the postponement of capital investment by medical institutions related to revisions to Japan's public health insurance program. For industrial equipment, unit sales of semiconductor lithography equipment increased from the same period of the previous year due to increasing demand for memory devices. However, for FPD lithography equipment and OLED panel manufacturing equipment, sales decreased compared with the same period of the previous year mainly due to a temporary slowdown in capital investment in panel manufacturing equipment which has been particularly high until recently, and sales of network cameras increased steadily in response to the growing market. Under these conditions, net sales for the first nine months ended September 30, 2018 decreased by 2.2% year on year to ¥2,893.6 billion. Although the gross profit ratio dropped by 2.3 points to 46.5%, this was mainly due to the fact that certain costs that were under operating expenses have been reclassified under cost of sales following the adoption of new accounting standards related to revenue

recognitions. Excluding the impact of this reclassification, the gross profit ratio increased by 0.7 points to 49.5%. Operating expenses decreased by 8.1% year on year to ¥1,102.9 billion, thanks to continuous Group-wide efforts to reduce spending as well as the impact of the aforementioned reclassification of figures related to the adoption of new accounting standards. As a result, first nine months operating profit decreased by 0.7% to ¥243.4 billion. Other income (deductions) decreased by ¥0.8 billion, mainly due to an increase in foreign currency exchange losses, while income before income taxes decreased by 0.9% year on year to ¥262.9 billion and net income attributable to Canon Inc. decreased by 3.4% to ¥181.0 billion.

Basic net income attributable to Canon Inc. shareholders per share was ¥167.67 for the first nine months, a year-on-year decrease of ¥4.63.

**(3) Operating Results (continued)**

Looking at Canon's first nine months performance by business unit, starting with the Office Business Unit, unit sales of office MFDs increased from the same period of the previous year, supported by such color models as the next-generation A3 (12 x18 ) color imageRUNNER ADVANCE series, which are compatible with external cloud services, and the imageRUNNER C3020 series, strategic models for emerging countries. As for laser printers, sales increased from the previous year, supported by steady sales of new models that achieved low power consumption, compact body designs and high productivity. Under these conditions, sales for the combined first nine months of the year totaled ¥1,335.7 billion, a year-on-year increase of 0.6%, while operating profit totaled ¥166.5 billion, a year-on-year increase of 6.9%.

Within the Imaging System Business Unit, Canon maintained the top share of the overall interchangeable-lens digital camera market, mainly in major countries in Europe and the Americas and in Japan. Within this, sales of mirrorless cameras increased mainly supported by sales of such new products as the EOS Kiss M. However, unit sales decreased overall compared with the same period of the previous year due to a temporary slowdown in demand, mainly for entry-level models. As for digital compact cameras, although unit sales decreased compared with the same period of the previous year amid the shrinking market, sales of high-value-added models such as the PowerShot G-series enjoyed solid demand. For inkjet printers, unit sales increased compared with the same period of the previous year, supported by steady sales of home-use models and refillable ink tank models due to the implementation of revised sales strategies tailored to each region. As a result, sales for the combined first nine months of the year totaled ¥710.6 billion, a year-on-year decrease of 10.6%, while operating profit totaled ¥80.9 billion, a year-on-year decrease of 30.8%.

Within the Medical System Business Unit, Canon Medical Systems Corporation's computed tomography ( CT ) systems maintained the top share of the Japanese market, and sales grew steadily for such newly launched products as the Vantage Orian, magnetic resonance imaging ( MRI ) systems, which achieved the industry's highest levels of image quality. However, overall sales decreased compared with the same period of the previous year due to restrained purchasing of diagnostic imaging systems in Japan. As a result, sales for the combined first nine months of the year totaled ¥319.4 billion, a year-on-year decrease of 3.9%, while operating profit totaled ¥20.5 billion, a year-on-year increase of 16.8%.

In the Industry and Others Business Unit, unit sales of semiconductor lithography equipment increased from the same period of the previous year due to increasing demand for memory devices. However, for FPD lithography equipment and OLED panel manufacturing equipment, sales decreased compared with the same period of the previous year mainly due to a temporary slowdown in capital investment in panel manufacturing equipment which has been particularly high until recently. As for network cameras, Axis enjoyed solid sales amid increasing market demand. Consequently, sales for the combined first nine months of the year totaled ¥607.1 billion, a year-on-year increase of 6.2%, while operating profit totaled ¥55.5 billion, a year-on-year increase of 45.0%.

Operating profit of each segment includes certain other income and deductions, mainly consisting of net periodic pension cost other than service cost component. Please refer to Note 17 for additional information.

**(3) Operating Results (continued)**Cash Flows

During the first nine months of 2018, cash flow from operating activities totaled ¥193.7 billion, a decrease of ¥220.8 billion compared with the same period of the previous year, mainly owing to increased working capital and payment of income taxes. Cash flow from investing activities increased by ¥4.3 billion a year-on-year to ¥136.5 billion mainly due to a decrease in the sale of fixed assets. Accordingly, free cash flow totaled ¥57.3 billion, a decrease of ¥225.1 billion compared with the corresponding year-ago period.

Cash flow from financing activities recorded an outlay of ¥235.3 billion, mainly owing to the dividend payout, and the repayment of long-term debt.

Owing to these factors, as well as the impact from foreign currency translation adjustments, cash and cash equivalents decreased by ¥186.6 billion to ¥535.2 billion from the end of the previous year.

Non-GAAP Financial Measures

We have reported our financial results in accordance with U.S. GAAP. In addition, we have discussed our results using free cash flow, which is a non-GAAP measure.

We believe this measure, which takes into consideration the Company's operating and investing activities, is beneficial to an investor's understanding of Canon's current liquidity and the alternatives of use in financing activities.

A reconciliation of this non-GAAP financial measure and the most directly comparable measures calculated and presented in accordance with U.S. GAAP are set forth on the following table.

	Billions of yen Nine months ended September 30, 2018
Net cash provided by operating activities	193.7
Net cash used in investing activities	(136.5)
Free cash flow	57.3

**(3) Operating Results (continued)**

Management Issues to be Addressed

No material changes or issues with respect to business operations and finances have occurred during the nine months ended September 30, 2018.

Research and Development Expenditures

Canon's research and development expenditures for the nine months ended September 30, 2018 totaled ¥232.6 billion.

Property, Plant and Equipment

(1) Major Property, Plant and Equipment

There were no significant changes to the status of existing major property, plant and equipment during the nine months ended September 30, 2018.

(2) Prospect of Capital Investment in the first nine months of Fiscal 2018

The new construction of property, plant and equipment, which had been in progress as of December 31, 2017 and was completed during the first nine months of 2018, is as follows:

Name and location	Principal activities and products manufactured	Date of completion
Canon Inc., Shimomaruko, Japan	New training and administration center (Headquarters Operations)	July 2018

There were no significant changes in the plans relevant to the retirement of property, plant and equipment during the nine months ended September 30, 2018. Moreover, there were no significant additional plans for new construction or retirement of property, plant and equipment during the nine months ended September 30, 2018.

## Notes to Consolidated Financial Statements

(1) Basis of Presentation and Significant Accounting Policies(a) Basis of Presentation

The Company issued convertible debentures in the United States in May 1969 and established a program in which its American Depositary Receipts (ADRs) were traded in the U.S. over-the-counter market. Since then, under the U.S. Securities Act of 1933 and the U.S. Securities Exchange Act of 1934, the Company has prepared its annual consolidated financial statements in accordance with U.S. GAAP and filed them with the U.S. Securities and Exchange Commission on Form 20-F. The Company's ADRs were listed on the NYSE in September 2000 after being quoted on NASDAQ from February 1972 to September 2000.

Canon's quarterly consolidated financial statements are prepared in accordance with the recognition and measurement criteria of accounting principles generally accepted in the United States. Certain disclosures have been omitted.

The number of consolidated subsidiaries and affiliated companies that were accounted for by the equity method as of September 30, 2018 and December 31, 2017 are summarized as follows:

	September 30, 2018	December 31, 2017
Consolidated subsidiaries	380	376
Affiliated companies	8	7
Total	388	383

(b) Principles of Consolidation

The consolidated financial statements include the accounts of the Company, its majority owned subsidiaries and those variable interest entities where the Company or its consolidated subsidiaries are the primary beneficiaries. All significant intercompany balances and transactions have been eliminated.

Notes to Consolidated Financial Statements (continued)

(1) Basis of Presentation and Significant Accounting Policies (continued)

(c) Recent Accounting Guidance

*Recently adopted accounting guidance*

In May 2014, the Financial Accounting Standards Board ( FASB ) issued Accounting Standards Update ( ASU ) No. 2014-09, Revenue from Contracts with Customers (Topic 606) Section C Background Information and Basis for Conclusions, which is a new accounting standard related to revenue from contracts with customers, as amended. (Accounting Standards Codification ( ASC ) 606) This standard requires an entity to recognize revenue when promised goods or services are transferred to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Canon adopted this standard from the quarter beginning January 1, 2018 with modified retrospective method of adoption to contracts that were not completed as of the adoption. The cumulative-effects to the retained earnings and the impact on the consolidated result of operations for the nine and three months ended September 30, 2018 from the adoption of this standard were not material. For further information, please refer to Note 10.

In January 2016, the FASB issued ASU No. 2016-01, Financial Instruments Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities, which is an amendment which addresses certain aspects of recognition, measurement, presentation, and disclosure of financial instruments. This guidance includes the requirement that equity investments that do not result in consolidation and are not accounted for under the equity method be measured at fair value with changes in the fair value recognized in net income. Canon adopted this standard from the quarter beginning January 1, 2018, and Canon recognized a cumulative-effect adjustment to retained earnings of ¥5,343 million as of January 1, 2018 for the after-tax unrealized gains of available-for-sale equity securities previously recognized in accumulated other comprehensive income.

In October 2016, the FASB issued ASU No. 2016-16, Income Taxes (Topic 740): Intra-entity Transfers of Assets other than Inventory, which requires an entity to recognize the income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs. Consequently, the amendments in this guidance eliminate the exception for an intra-entity transfer of an asset other than inventory. Two common examples of assets included in the scope of this guidance are intellectual property and property, plant, and equipment. The amendments in this guidance should be applied on a modified retrospective basis through a cumulative effect adjustment directly to retained earnings as of the beginning of the period of adoption. Canon adopted this standard from the quarter beginning January 1, 2018. The adoption of this guidance did not have a material impact on its consolidated results of operation and financial condition.

## CANON INC. AND SUBSIDIARIES

## Notes to Consolidated Financial Statements (continued)

(1) Basis of Presentation and Significant Accounting Policies (continued)

In March 2017, the FASB issued ASU No. 2017-07, Compensation – Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost, which requires an entity to disaggregate the service cost component from the other components of net benefit cost and present it in the same line item or items as other compensation costs arising from services rendered by the pertinent employees during the period. The other components of net benefit cost are required to be presented separately from the service cost component, such as in other income (deductions) in the income statement. The amendments also allow only the service cost component to be eligible for capitalization (for example, as a cost of internally manufactured inventory). The amendments are to be applied retrospectively for the presentation of the service cost component and the other components of net benefit cost, and prospectively for the capitalization of the service cost component of net benefit cost. Canon adopted this guidance from the quarter beginning January 1, 2018. The adoption of the new presentation requirement of the service cost component and the other components of net benefit cost resulted in reclassification of ¥1,609 million from cost of sales, ¥3,322 million from selling, general and administrative expenses and ¥2,495 million from research and development expenses into other income (deductions) for the nine months ended September 30, 2017, and reclassification of ¥529 million from cost of sales, ¥1,108 million from selling, general and administrative expenses and ¥827 million from research and development expenses into other income (deductions) for the three months ended September 30, 2017, respectively. Please refer to Note 16 for additional information. The adoption of the capitalization of the service cost component of net benefit cost did not have a material impact on its consolidated results of operations and financial condition.

*Recently issued accounting guidance not yet adopted*

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842) Section A – Leases: Amendments to the FASB Accounting Standards Codification, which requires lessees to recognize most leases on their balance sheets but recognize expenses on their income statements in a manner similar to current guidance. For lessors, the guidance modifies the classification criteria and the accounting for sales-type and direct financing leases. FASB also modified the definition of lease. The guidance is effective for annual reporting periods beginning after December 15, 2018. Canon currently plans to adopt the guidance from the quarter beginning after January 1, 2019. With regard to the practical expedients for the new guidance, Canon currently plans to adopt the package of practical expedients that allows Canon not to reassess whichever any existing contracts at or expired contracts prior to the adoption date are or contain leases, lease classification and whichever initial direct costs qualify for capitalization, in addition to short term lease exception. Canon also adopt the additional transition method which no restatement of comparative periods is required and not to reassess land easements not previously accounted for as a lease that exist at or expired prior to the adoption date. The adoption of the guidance is expected to have an impact on its consolidated balance sheet by recognizing right-of-use assets and lease liabilities for non-cancelable operating leases. Canon is currently evaluating the effect that the adoption of the guidance will have on its consolidated results of operations and financial condition.

In August 2017, the FASB issued ASU No. 2017-12, Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities, which amends existing guidance to simplify the application of the hedge accounting in certain situations and enable an entity to better portray the economic results of an entity's risk management activities in its financial statements. This guidance eliminates the requirement to separately measure and report hedge ineffectiveness, and requires an entity to present the earnings effect of the hedging instrument in the

same income statement line item which the earnings effect of the hedged item is reported. The guidance is effective for annual reporting periods beginning after December 15, 2018. Canon currently plans to adopt the guidance from the quarter beginning after January 1, 2019. Canon is currently evaluating the effect that the adoption of the guidance will have on its consolidated results of operations and financial condition.

Corporate bonds	640	182	-	822
	945	182	16	1,111

## CANON INC. AND SUBSIDIARIES

## Notes to Consolidated Financial Statements (continued)

(2) Investments (continued)

Maturities of available-for-sale debt securities included in investments in the accompanying consolidated balance sheets are as follows at September 30, 2018:

	Millions of yen	
	Cost	Fair value
Due within one year	1,149	1,149
	1,149	1,149

Realized gains and losses related to debt securities are determined using the average cost method and are reflected in earnings. The unrealized and realized gains and losses were not significant for the nine months ended September 30, 2018 and 2017, respectively.

The portion of unrealized and realized gains and losses related to equity securities for the nine months and three months ended September 30, 2018 are as follows:

	Millions of yen	
	Nine months ended September 30, 2018	Three months ended September 30, 2018
Net gains and losses recognized during the period on equity securities	780	(1,604)
Less: Net gains and losses recognized during the period on equity securities sold during the period	675	103
Unrealized gains and losses recognized during the period on equity securities still held at September 30, 2018	105	(1,707)

Aggregate cost of non-marketable equity securities accounted for under the cost method totaled ¥3,760 million at December 31, 2017.

From the quarter beginning January 1, 2018, Canon measures non-marketable equity securities without readily determinable fair value at cost, minus impairment, if any, plus or minus changes resulting from observable price changes in orderly transactions for the identical or a similar investment of the same issuer. The impairment or other adjustments recorded during the nine months ended September 30, 2018 were not significant. The carrying amount of these investments totaled ¥4,526 million at September 30, 2018.

Time deposits with original maturities of more than three months are ¥181 million and ¥743 million at September 30, 2018 and December 31, 2017, respectively, and are included in short-term investments in the accompanying consolidated balance sheets.

CANON INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (continued)

(10) Revenue

Canon generates revenue principally through the sale of office, imaging system and medical system products, industrial equipment, supplies and related services under separate contractual arrangements. Revenue is recognized when, or as, control of promised goods or services transfers to customers in an amount that reflects the consideration to which Canon expects to be entitled in exchange for transferring these goods or services.

Revenue from sales of office products, such as office MFDs and laser printers, and imaging system products, such as digital cameras and inkjet printers, is recognized upon shipment or delivery, depending upon when the customer obtains controls of these products.

Revenue from sales of equipment that are sold with customer acceptance provisions related to their functionality including optical equipment such as semiconductor lithography equipment and FPD lithography equipment, and certain medical equipment such as computed tomography (CT) systems and magnetic resonance imaging (MRI) systems, is recognized when the equipment is installed at the customer site and the agreed-upon specifications are objectively satisfied.

Most of Canon's service revenues are generated from maintenance services for office products which the customer typically pays a variable amount based on usage, a stated fixed fee or a stated base fee plus a variable amount, and for certain medical system products with a stated fixed fee. Canon recognizes revenue from maintenance service contract on overtime basis as it satisfies the underlying performance obligation. The majority of maintenance service arrangements for office products are executed in combination with related products. Transaction prices for products and maintenance services need to be allocated to each performance obligation on a relative standalone selling price basis where significant judgements are required. Canon estimates the standalone selling price using a range of prices that would meet the allocation objective based on all information that is reasonably available including market conditions and other observable inputs. If transaction prices of the product or service contracts are not within the acceptable range then the revenue is subject to allocation based on the estimated standalone selling prices.

The transaction prices that Canon is entitled to receive in exchange for transferring goods or services to the customer include certain forms of variable consideration, including product discounts, customer promotions and volume-based rebates mainly for imaging system products, which are sold predominantly through distributors and retailers. Canon includes estimated amounts in the transaction price only to the extent it is probable that a significant reversal of cumulative revenue recognized will not occur when the uncertainty associated with the variable consideration is resolved. Variable considerations are estimated based upon historical trends and other known factors at the time of sale, and are subsequently adjusted in each period based on current information.

Canon records amounts received in advance from customers in excess of revenue recognized primarily for optical equipment and maintenance services as deferred revenue until the performance obligation for distinct goods or services are satisfied. Deferred revenue at September 30, 2018 and December 31, 2017 were ¥119,337 million and ¥125,965 million, respectively, and are included in other current liabilities in the accompanying consolidated balance sheets. Revenue recognized for the nine months ended September 30, 2018, which had been included in the deferred revenue balance at December 31, 2017, was ¥92,924 million.

Performance obligations that are unsatisfied or partially unsatisfied at September 30, 2018 primarily relate to maintenance service contracts for the office and medical system products. The original contract periods of these contracts range primarily from one to six years.

CANON INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (continued)

(10) Revenue (continued)

Taxes collected from customers and remitted to governmental authorities are excluded from revenues in the consolidated statements of income.

Canon recognized contract assets primarily for unbilled receivables arising from maintenance services for office products totalled to ¥42,915 million at the adoption date and included in prepaid expenses and other current assets in the consolidated balance sheet with an offsetting impact to trade receivables. Contract assets at September 30, 2018 were ¥58,697 million.

Canon has started separating revenues and cost of sales into products and services in the consolidated statements of income starting from the quarter beginning January 1, 2018, including prior period's presentation. The adoption of the new revenue standard required the reconsideration of the scope of performance obligations related to product maintenance services, which has resulted in a change in classification of revenues between the products and service revenues. Maintenance service revenues, which were historically allocated into products revenues and service revenues, are currently accounted for as a single performance obligation and are classified as service revenues. The reconsideration of the scope of performance obligations did not materially affect the timing of revenue recognition. Canon has also, reclassified certain expenses related to service revenues from operating expenses to cost of sales in the accompanying consolidated statement of income. The amount reclassified for the nine months and three months ended September 30, 2018 were ¥86,195 million and ¥28,708 million, respectively.

Disaggregated revenue by business unit, product and geographic area are described in Note 17.

	Yen	
	Nine months ended	Nine months ended
	September 30, 2018	September 30, 2017
Net income attributable to Canon Inc. shareholders per share:		
Basic	167.67	172.30
Diluted	167.66	172.30

Reconciliations of the numerators and denominators of basic and diluted net income attributable to Canon Inc. shareholders per share computations for the three months ended September 30, 2018 and 2017 are as follows:

	Millions of yen	
	Three months ended	Three months ended
	September 30, 2018	September 30, 2017
Net income attributable to Canon Inc.	46,258	63,051

	Number of shares	
	Three months ended	Three months ended
	September 30, 2018	September 30, 2017

Edgar Filing: CANON INC - Form 6-K

Average common shares outstanding	1,079,752,655	1,079,760,084
Effect of dilutive securities:		
Stock options	73,979	-
Diluted common shares outstanding	1,079,826,634	1,079,760,084

	Yen	
	Three months ended	Three months ended
	September 30, 2018	September 30, 2017
Net income attributable to Canon Inc. shareholders per share:		
Basic	42.84	58.39
Diluted	42.84	58.39

The computation of diluted net income attributable to Canon Inc. shareholders per share for the nine months ended September 30, 2017 excludes outstanding stock options because the effect would be anti-dilutive. There were no dilutive securities during the three months ended September 30, 2017.

---

CANON INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (continued)

(12) Derivatives and Hedging Activities

***Risk management policy***

Canon operates internationally, exposing it to the risk of changes in foreign currency exchange rates. Derivative financial instruments are comprised principally of foreign exchange contracts utilized by the Company and certain of its subsidiaries to reduce the risk. Canon assesses foreign currency exchange rate risk by continually monitoring changes in the exposures and by evaluating hedging opportunities. Canon does not hold or issue derivative financial instruments for trading purposes. Canon is also exposed to credit-related losses in the event of non-performance by counterparties to derivative financial instruments, but it is not expected that any counterparties will fail to meet their obligations. Most of the counterparties are internationally recognized financial institutions and selected by Canon taking into account their financial condition, and contracts are diversified across a number of major financial institutions.

***Foreign currency exchange rate risk management***

Canon's international operations expose Canon to the risk of changes in foreign currency exchange rates. Canon uses foreign exchange contracts to manage certain foreign currency exchange exposures principally from the exchange of U.S. dollars and euros into Japanese yen. These contracts are primarily used to hedge the foreign currency exposure of forecasted intercompany sales and intercompany trade receivables that are denominated in foreign currencies. In accordance with Canon's policy, a specific portion of foreign currency exposure resulting from forecasted intercompany sales is hedged using foreign exchange contracts which principally mature within three months.

***Cash flow hedge***

Changes in the fair value of derivative financial instruments designated as cash flow hedges, including foreign exchange contracts associated with forecasted intercompany sales, are reported in accumulated other comprehensive income (loss). These amounts are subsequently reclassified into earnings through other income (deductions) in the same period as the hedged items affect earnings. Substantially all amounts recorded in accumulated other comprehensive income (loss) as of September 30, 2018 are expected to be recognized in earnings over the next twelve months. Canon excludes the time value component from the assessment of hedge effectiveness. Changes in the fair value of a foreign exchange contract for the period between the date that the forecasted intercompany sales occur and its maturity date are recognized in earnings and not considered hedge ineffectiveness.

***Derivatives not designated as hedges***

Canon has entered into certain foreign exchange contracts to primarily offset the earnings impact related to fluctuations in foreign currency exchange rates associated with certain assets denominated in foreign currencies. Although these foreign exchange contracts have not been designated as hedges as required in order to apply hedge accounting, the contracts are effective from an economic perspective. The changes in the fair value of these contracts are recorded in earnings immediately.

## CANON INC. AND SUBSIDIARIES

## Notes to Consolidated Financial Statements (continued)

(12) Derivatives and Hedging Activities (continued)

Contract amounts of foreign exchange contracts at September 30, 2018 and December 31, 2017 are set forth below:

	Millions of yen

## CANON INC. AND SUBSIDIARIES

## Notes to Consolidated Financial Statements (continued)

(13) Commitments and Contingent Liabilities***Commitments***

As of September 30, 2018, commitments outstanding for the purchase of property, plant and equipment approximated ¥50,002 million, and commitments outstanding for the purchase of parts and raw materials approximated ¥121,177 million.

Canon occupies sales offices and other facilities under lease arrangements accounted for as operating leases. Deposits made under such arrangements aggregated ¥12,953 million and ¥13,740 million at September 30, 2018 and December 31, 2017, respectively, and are included in noncurrent receivables in the accompanying consolidated balance sheets.

Future minimum lease payments required under noncancelable operating leases are ¥25,666 million (within one year) and ¥78,057 million (after one year), at September 30, 2018.

***Guarantees***

Canon provides guarantees for its employees, affiliates and other companies. The guarantees for the employees are principally made for their housing loans. The guarantees for affiliates and other companies are made for their lease obligations and bank loans to ensure that those companies operate with less financial risk.

Canon would have to perform under a guarantee if the borrower defaults on a payment within the contract terms. The contract terms are 1 year to 30 years in case of employees with housing loans, and 1 year to 7 years in case of affiliates and other companies with lease obligations and bank loans. The maximum amount of undiscounted payments Canon would have had to make in the event of default is ¥4,924 million at September 30, 2018. The carrying amounts of the liabilities recognized for Canon's obligations as a guarantor under those guarantees at September 30, 2018 were not significant.

Canon also offers assurance-type warranties under which it generally guarantees the performance of products delivered and services rendered for a certain period or term. Estimated product warranty costs are recorded at the time revenue is recognized and are included in selling, general and administrative expenses. Estimates for accrued product warranty costs are based on historical experience. Changes in accrued product warranty cost for the nine months ended September 30, 2018 and 2017 are summarized as follows:

Nine months ended September 30, 2018

	Millions of yen
Balance at December 31, 2017	17,452
Addition	15,533
Utilization	(11,594)

	Millions of yen
Balance at December 31, 2016	13,168
Addition	13,535
Utilization	(9,787)
Other	(1,405)
Balance at September 30, 2017	15,511

CANON INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (continued)

(13) Commitments and Contingent Liabilities (continued)

***Legal proceedings***

Canon is involved in various claims and legal actions arising in the ordinary course of business. Canon has recorded provisions for liabilities when it is probable that liabilities have been incurred and the amount of loss can be reasonably estimated. Canon reviews these provisions at least quarterly and adjusts these provisions to reflect the impact of the negotiations, settlements, rulings, advice of legal counsel and other information and events pertaining to a particular case. Based on its experience, although litigation is inherently unpredictable, Canon believes that any damage amounts claimed in outstanding matters are not a meaningful indicator of Canon's potential liability. In the opinion of management, any reasonably possible range of losses from outstanding matters would not have a material adverse effect on Canon's consolidated financial position, results of operations, or cash flows.

## CANON INC. AND SUBSIDIARIES

## Notes to Consolidated Financial Statements (continued)

(14) Disclosures about the Fair Value of Financial Instruments and Concentrations of Credit Risk***Fair value of financial instruments***

The estimated fair values of Canon's financial instruments at September 30, 2018 and December 31, 2017 are set forth below. The following summary excludes cash and cash equivalents, trade receivables, finance receivables, noncurrent receivables, short-term loans, trade payables and accrued expenses for which fair values approximate their carrying amounts. The summary also excludes investments and derivative instruments which are disclosed in Note 2 and Note 15, and Note 12, respectively.

	Millions of yen			
	September 30, 2018		December 31, 2017	
	Carrying amount	Estimated fair value	Carrying amount	Estimated fair value
Long-term debt, including current installments	(445,687)	(445,676)	(499,168)	(499,126)

The following methods and assumptions are used to estimate the fair value in the above table.

Long-term debt

Canon's long-term debt instruments are classified as Level 2 instruments and valued based on the present value of future cash flows associated with each instrument discounted using current market borrowing rates for similar debt instruments of comparable maturity. The levels are more fully described in Note 15.

Limitations of fair value estimates

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instruments. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

***Concentrations of credit risk***

At September 30, 2018 and December 31, 2017, one customer accounted for approximately 13% and 8% of consolidated trade receivables, respectively. Although Canon does not expect that the customer will fail to meet its obligations, Canon is potentially exposed to concentrations of credit risk if the customer failed to perform according to the terms of the contracts.

## CANON INC. AND SUBSIDIARIES

## Notes to Consolidated Financial Statements (continued)

(15) Fair Value Measurements

Fair value is the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date. A three-level fair value hierarchy that prioritizes the inputs used to measure fair value is as follows:

- Level 1 - Inputs are quoted prices in active markets for identical assets or liabilities.
- Level 2 - Inputs are quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable, and inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3 - Inputs are derived from valuation techniques in which one or more significant inputs or value drivers are unobservable, which reflect the reporting entity's own assumptions about the assumptions that market participants would use in establishing a price.

*Assets and liabilities measured at fair value on a recurring basis*

The following tables present Canon's assets and liabilities that are measured at fair value on a recurring basis consistent with the fair value hierarchy at September 30, 2018 and December 31, 2017.

	Millions of yen September 30, 2018			
	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Cash and cash equivalents	-	40,500	-	40,500
<b>Available-for-sale (current):</b>				
Corporate bonds	1,149	-	-	1,149
Fund trusts and others	967	352	-	1,319
Equity securities	20,441	-	-	20,441
Derivatives	-	424	-	424
<b>Total assets</b>	<b>22,557</b>	<b>41,276</b>	<b>-</b>	<b>63,833</b>
<b>Liabilities:</b>				
Derivatives	-	3,921	-	3,921
<b>Total liabilities</b>	<b>-</b>	<b>3,921</b>	<b>-</b>	<b>3,921</b>

## CANON INC. AND SUBSIDIARIES

## Notes to Consolidated Financial Statements (continued)

(15) Fair Value Measurements (continued)

	Millions of yen December 31, 2017			Total
	Level 1	Level 2	Level 3	
Assets:				
Cash and cash equivalents	-	70,500	-	70,500
Available-for-sale (current):				
Corporate bonds	1,222	-	-	1,222
Available-for-sale (noncurrent):				
Government bonds	289	-	-	289
Corporate bonds	605	217	-	822
Fund trusts	13	111	-	124
Equity securities	20,901	-	-	20,901
Derivatives	-	544	-	544
<b>Total assets</b>	<b>23,030</b>	<b>71,372</b>	<b>-</b>	<b>94,402</b>
Liabilities:				
Derivatives	-	3,259	-	3,259
<b>Total liabilities</b>	<b>-</b>	<b>3,259</b>	<b>-</b>	<b>3,259</b>

Level 1 investments are comprised principally of Japanese equity securities, which are valued using an unadjusted quoted market price in active markets with sufficient volume and frequency of transactions. Level 2 cash and cash equivalents are valued based on market approach, using quoted prices for identical assets in markets that are not active.

Derivative financial instruments are comprised of foreign exchange contracts. Level 2 derivatives are valued using quotes obtained from counterparties or third parties, which are periodically validated by pricing models using observable market inputs, such as foreign currency exchange rates and interest rates, based on market approach.

*Assets and liabilities measured at fair value on a nonrecurring basis*

During the nine and three months ended September 30, 2018 and 2017, there were no circumstances that required any significant assets or liabilities to be measured at fair value on a nonrecurring basis.

CANON INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (continued)

(16) Supplemental Information

Gains and losses resulting from foreign currency transactions, including foreign exchange contracts, and translation of assets and liabilities denominated in foreign currencies are included in other income (deductions) in the consolidated statements of income. Foreign currency exchange gains and losses were net losses of ¥6,990 million and ¥6,359 million for the nine months ended September 30, 2018 and 2017, respectively, and were net losses of ¥7,287 million and ¥2,894 million for the three months ended September 30, 2018 and 2017, respectively.

Advertising costs are expensed as incurred. Advertising expenses were ¥41,896 million and ¥41,491 million for the nine months ended September 30, 2018 and 2017, respectively, and were ¥12,345 million and ¥13,461 million for the three months ended September 30, 2018 and 2017, respectively.

Shipping and handling costs totaled ¥39,662 million and ¥38,376 million for the nine months ended September 30, 2018 and 2017, respectively, and were ¥13,369 million and ¥13,022 million for the three months ended September 30, 2018 and 2017, respectively, and are included in selling, general and administrative expenses in the consolidated statements of income.

Service cost component of net periodic benefit cost for Canon's employee retirement and severance defined benefit plans were ¥29,245 million and ¥28,388 million for the nine months ended September 30, 2018 and 2017, respectively, and ¥9,908 million and ¥9,462 million for the three months ended September 30, 2018 and 2017, respectively, which are included in cost of sales and operating expenses in the consolidated statements of income. The components other than the service cost component included in other, net of other income (deductions) in consolidated statements of income were a net income of ¥12,680 million and ¥7,426 million for the nine months ended September 30, 2018 and 2017, respectively, and ¥4,274 million and ¥2,464 million for the three months ended September 30, 2018 and 2017, respectively.

Certain debt securities with original maturities of less than three months classified as available-for-sale securities of ¥40,500 million and ¥70,500 million at September 30, 2018 and December 31, 2017, respectively, are included in cash and cash equivalents in the consolidated balance sheets. Fair value for these securities approximates their cost.

## CANON INC. AND SUBSIDIARIES

## Notes to Consolidated Financial Statements (continued)

(16) Supplemental Information (continued)

Finance receivables represent financing leases which consist of sales-type leases and direct-financing leases resulting from the sales of Canon's and complementary third-party products. These receivables typically have terms ranging from 1 year to 6 years. Finance receivables are ¥349,319 million and ¥342,239 million at September 30, 2018 and December 31, 2017, respectively. Finance receivables which are individually evaluated for impairment at September 30, 2018 and 2017 are not significant.

The activities in the allowance for credit losses are as follows:

## Nine months ended September 30, 2018

	Millions of yen
Balance at December 31, 2017	2,681
Charge-offs	(929)
Provision	738
Other	306
Balance at September 30, 2018	2,796

## Nine months ended September 30, 2017

	Millions of yen
Balance at December 31, 2016	2,325
Charge-offs	(1,171)
Provision	1,060
Other	365
Balance at September 30, 2017	2,579

Canon has policies in place to ensure that its products are sold to customers with an appropriate credit history, and continuously monitors its customers' credit quality based on information including length of period in arrears, macroeconomic conditions, initiation of legal proceedings against customers and bankruptcy filings. The allowance for credit losses of finance receivables are evaluated collectively based on historical experience of credit losses. An additional reserve for individual accounts is recorded when Canon becomes aware of a customer's inability to meet its financial obligations, such as in the case of bankruptcy filings. Finance receivables which are past due at September 30, 2018 and December 31, 2017 are not significant.

CANON INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements (continued)

(17) Segment Information

Canon operates its business in four segments: the Office Business Unit, the Imaging System Business Unit, the Medical System Business Unit, and the Industry and Others Business Unit, which are based on the organizational structure and information reviewed by Canon's management to evaluate results and allocate resources.

Based on the realignment of Canon's internal reporting and management structure, from the beginning of the third quarter of 2018, Canon has reclassified certain businesses from Office Business Unit to Industry and Others Business Unit. Segment information for the nine and three months ended September 30, 2018 have reflected this change. Operating results for the nine and three months ended September 30, 2017 also have been restated.

The primary products included in each segment are as follows:

Office Business Unit: Office multifunction devices (MFDs) / Laser multifunction printers (MFPs) /  
Laser printers / Digital continuous feed presses /  
Digital sheet-fed presses / Wide-format printers / Document solutions

Imaging System Business Unit: Interchangeable-lens digital cameras / Digital compact cameras /  
Digital camcorders / Digital cinema cameras / Interchangeable lenses /  
Compact photo printers / Inkjet printers / Large format inkjet printers /  
Commercial photo printers / Image scanners / Multimedia projectors /  
Broadcast equipment / Calculators

Medical System Business Unit: Digital radiography systems / Diagnostic X-ray systems /  
Computed tomography (CT) systems /  
Magnetic resonance imaging (MRI) systems /  
Diagnostic ultrasound systems / Clinical chemistry analyzers /  
Ophthalmic equipment

Semiconductor lithography equipment /

Edgar Filing: CANON INC - Form 6-K

Industry and Others Business Unit: FPD (Flat panel display) lithography equipment /

Vacuum thin-film deposition equipment /

Organic LED (OLED) panel manufacturing equipment / Die bonders /

Micromotors / Network cameras / Handy terminals / Document scanners

(17) Segment Information (continued)

Information about operating results for each segment for the three months ended September 30, 2018 and 2017 is as follows:

	Office	Imaging System	Medical System	Industry and Others <i>(Millions of yen)</i>	Corporate and eliminations	Consolidated
2018:						
Net sales:						
External customers	429,417	228,103	107,556	161,422		926,498
Intersegment	936	230	82	26,839	(28,087)	
Total	430,353	228,333	107,638	188,261	(28,087)	926,498
Operating cost and expenses	380,503	206,904	99,572	173,965	(2,774)	858,170
Operating profit	49,850	21,429	8,066	14,296	(25,313)	68,328
2017:						
Net sales:						
External customers	428,826	270,378	111,327	183,959		994,490
Intersegment	548	143	806	22,471	(23,968)	
Total	429,374	270,521	112,133	206,430	(23,968)	994,490
Operating cost and expenses	386,101	231,355	104,636	188,817	5,586	916,495
Operating profit	43,273	39,166	7,497	17,613	(29,554)	77,995

The accounting policies of the segments are substantially the same as the accounting policies used in Canon's quarterly consolidated financial statements. Canon evaluates performance of, and allocates resources to, each segment based on operating profit.

Operating profit of each segment includes certain other income and deductions, mainly consisting of net periodic pension cost other than service cost component. The other income and deductions included in its four business segments were ¥12,179 million and ¥7,826 million for the nine months ended September 30, 2018 and 2017, respectively, and ¥4,260 million and ¥2,318 million for the three months ended September 30, 2018 and 2017, respectively, which were deducted in corporate and eliminations.

Intersegment sales are recorded at the same prices used in transactions with third parties. Expenses not directly associated with specific segments are allocated based on the most reasonable measures applicable. Corporate expenses include certain corporate research and development expenses. Amortization costs of identified intangible assets resulting from the purchase price allocation of Canon Medical Systems Corporation are also included in corporate expenses.

Information by major geographic area for the nine months ended September 30, 2018 and 2017 is as follows:

	Japan	Americas	Europe (Millions of yen)	Asia and Oceania	Total
2018:					
Net sales:	633,803	770,875	735,259	753,660	2,893,597
2017:					
Net sales:	642,136	804,238	739,311	774,039	2,959,724

Information by major geographic area for the three months ended September 30, 2018 and 2017 is as follows:

	Japan	Americas	Europe (Millions of yen)	Asia and Oceania	Total
2018:					
Net sales:	205,349	259,314	228,652	233,183	926,498
2017:					
Net sales:	200,672	274,092	243,756	275,970	994,490

Net sales are attributed to areas based on the location where the product is shipped to the customers.

(18) Subsequent Event

Canon has entered into a share purchase agreement with Elliott International, L.P. and The Liverpool Limited Partnership dated October 22, 2018, under which Canon has agreed to purchase 7,825,516 shares of the consolidated subsidiary Axis AB ( Axis ), a consolidated subsidiary and purchased the shares with cash of ¥35,468 million on October 25, 2018 (the Transaction ). As a result of the Transaction, Canon holds more than 90 percent (97.9 percent; 68,000,798 shares) of the total number of shares and votes in Axis. Accordingly, an application of delisting of Axis shares from the Nasdaq Stockholm has been approved. The last day of trading in Axis shares in the Nasdaq Stockholm will be November 13, 2018. Canon is also in the process of a compulsory acquisition procedure to acquire all of the remaining outstanding shares under the Swedish Companies Act. Going forward, Canon and Axis will continue to provide innovative network video solutions.
