The financial statements are unaudited. However, Management of registrant believes that all necessary adjustments, including normal recurring adjustments, have been reflected to present fairly the financial position of registrant at December 31, 2007 and the results of its operations and changes in its cash position for the three and six month periods ended December 31, 2007 and 2006 and for the period from inception (July 15, 1987). This quarterly statement has not been reviewed by an independent accountant.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
DECEMBER 31, 2007**

Note 1 SUMMARY OF ACCOUNTING POLICIES

CHANGE OF NAME

On July 11, 1997, the Company changed its name from Tirex America, Inc. to The Tirex Corporation.

NATURE OF BUSINESS

The Tirex Corporation (the "Company") was incorporated under the laws of the State of Delaware on August 19, 1987. The Company was originally organized to provide comprehensive health care services, but due to its inability to raise sufficient capital, was unable to implement its business plan. The Company became inactive in November 1990.

REORGANIZATION

On March 26, 1993, the Company entered into an acquisition agreement (the "Acquisition Agreement") with Louis V. Muro, currently an officer and a director of the Company, and former Officers and Directors of the Company (collectively the "Seller"), for the purchase of certain technology owned and developed by the Seller (the "Technology") to be used to design, develop and construct a prototype machine and thereafter a production quality machine for the cryogenic disintegration of used tires. The Technology was conceptually developed by the Seller prior to their affiliation or association with the Company.

DEVELOPMENTAL STAGE

At December 31, 2007, the Company is still in the development stage. The operations consist mainly of raising capital, obtaining financing, developing equipment, obtaining customers and supplies, installing and testing equipment and administrative activities.

BASIS OF CONSOLIDATION

The consolidated financial statements include the consolidated accounts of The Tirex Corporation, Tirex Canada R&D Inc., The Tirex Corporation Canada Inc., Tirex Advanced Products Quebec Inc. and Tirex Acquisition Corp., all of these subsidiaries currently being dormant. Certain of these companies have actually been de-registered by government authorities but could easily be revived if circumstances would warrant such action. Tirex Canada R&D Inc. is held 51% by two shareholders of the Company. The shares owned by these shareholders are held in escrow by the Company's attorney and are restricted from transfer thereby allowing for a full consolidation of this Company. The Tirex Corporation Canada Inc., Tirex Advanced Products Quebec Inc. and Tirex Acquisition Corp. are 100% held by the Company. All subsidiary companies are dormant. All inter-company transactions and accounts have been eliminated in consolidation.

CASH AND CASH EQUIVALENTS

For purposes of the statement of cash flows, all highly liquid debt instruments purchased with a maturity of three months or less, were deemed to be cash equivalents.

INVENTORY

The Company values inventory, which consists of finished goods and equipment held for resale, at the lower of cost (first-in, first-out method) or market.

**THE TIREX CORPORATION  
A DEVELOPMENT STAGE COMPANY**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
DECEMBER 31, 2007**

**PROPERTY AND EQUIPMENT**

Property and equipment are recorded at cost less accumulated depreciation and provisions for write-downs. Depreciation is computed using the straight-line method over the estimated useful lives of five years. No depreciation is recorded for equipment written down to salvage value.

Repairs and maintenance costs are expensed as incurred while additions and betterments are capitalized. The cost and related accumulated depreciation of assets sold or retired are eliminated from the accounts and any gains or losses are reflected in earnings.

**INVESTMENT**

An investment made by the Company, in which the Company owns less than a 20% interest, is stated at cost value. The cost value approximates the fair market value of the investment.

**ESTIMATES**

Preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates.

**ADOPTION OF STATEMENT OF ACCOUNTING STANDARD NO. 123**

In 1997, the Company adopted Statement of Financial Accounting Standards ("SFAS") No. 123, Accounting for Stock-Based Compensation. SFAS 123 encourages, but does not require, companies to record stock-based Compensation and other costs paid by the issuance of stock at fair value. The Company has chosen to account for stock-based compensation, stock issued for non-employee services and stock issued to obtain assets or in exchange for liabilities using the fair value method prescribed in SFAS 123. Accordingly, compensation cost for stock options is measured as the excess, if any, of the quoted market price of the Company's stock at the date of the grant over the amount an employee must pay to acquire the stock.

**ADOPTION OF STATEMENT OF ACCOUNTING STANDARD NO. 128**

In 1997, the Company adopted Statement of Financial Accounting Standards ("SFAS") No. 128, Earnings per Share. SFAS 128 changes the standards for computing and presenting earnings per share (EPS) and supersedes Accounting Principles Board Opinion No. 15, Earnings per Share. SFAS 128 replaces the presentation of Primary EPS with a presentation of Basic EPS and replaces the presentation of Fully Diluted EPS with a presentation of Diluted EPS. It also requires dual presentation of Basic and Diluted EPS on the face of the income statement for all entities with complex capital structures and requires a reconciliation of the numerator and denominator of the Basic EPS computation to the numerator and denominator of the Diluted EPS computation. SFAS 128 is effective for financial statements issued for periods ending after December 15, 1997, including interim periods. SFAS 128 also requires restatement of all prior-period EPS data presented.

As it relates to the Company, the principal differences between the provisions of SFAS 128 and previous authoritative pronouncements are the exclusion of common stock equivalents in the determination of Basic Earnings Per Share and the market price at which common stock equivalents are calculated in the Determination of Diluted Earnings Per Share.

A Basic Earnings per Share is computed using the weighted average number of shares of common stock outstanding for the period. Diluted Earnings per Share is computed using the weighted average number of shares of common stock and dilutive common equivalent shares related to stock options and warrants outstanding during the period.

**THE TIREX CORPORATION  
A DEVELOPMENT STAGE COMPANY**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
DECEMBER 31, 2007**

The adoption of SFAS 128 had no effect on previously reported loss per share amounts for the year ended June 30, 1997. For the years ended June 30, 2006 and June 30, 2005, Primary Loss per Share was the same as Basic Loss per Share and Fully Diluted Loss per Share was the same as Diluted Loss per Share. A net loss was reported in 2006 and 2005, and accordingly, in those years, the denominator for the Basic EPS calculation was equal to the weighted average of outstanding shares with no consideration for outstanding options and warrants to purchase shares of the Company's common stock because to do so would have been anti-dilutive.

**FAIR VALUE OF FINANCIAL INSTRUMENTS**

The carrying amount of the Company's financial instruments, which principally include cash, note receivable, accounts payable and accrued expenses, approximates fair value due to the relatively short maturity of such instruments.

The fair values of the Company's debt instruments are based on the amount of future cash flows associated with each instrument discounted using the Company's borrowing rate. At December 31, 2007 and June 30, 2007, respectively, the carrying value of all financial instruments was not materially different from fair value.

**INCOME TAXES**

The Company has net operating loss carryovers of approximately \$30.9 million as of December 31, 2007, expiring through 2028. However, based upon present Internal Revenue Service regulations governing the utilization of net operating loss carryovers where the corporation has issued substantial additional stock and there has been a change in control as defined by the Internal Revenue Service regulations, a substantial portion of this loss carryover may not be available to the Company.

The Company adopted Statement of Financial Accounting Standards ("SFAS") No. 109, Accounting for Income Taxes, effective July 1993. SFAS No. 109 requires the establishment of a deferred tax asset for all deductible temporary differences and operating loss carryforwards. Because of the uncertainties discussed in Note 2, however, any deferred tax asset established for utilization of the Company's tax loss carryforwards would correspondingly require a valuation allowance of the same amount pursuant to SFAS No. 109. Accordingly, no deferred tax asset is reflected in these financial statements.

The Company does not currently have research and experimental development tax credits receivable from the Canadian Federal government and the Quebec Provincial government as at December 31, 2007.

**FOREIGN CURRENCY TRANSLATION**

Assets and liabilities of non-U.S. subsidiaries that operate in a local currency environment are translated to U.S. dollars at exchange rates in effect at the balance sheet date for monetary items and historical rates of exchange for non-monetary items with the resulting translation adjustment recorded directly to a separate component of shareholders' equity. Income and expense accounts are translated at average exchange rates during the year. Currency transaction gains or losses are recognized in current operations.

**REVENUE RECOGNITION**

Revenue from the sale of TCS Systems will be recognized when the installed product is accepted by the Customer. All other revenue from other products will be recognized when shipped to the customer.

**THE TIREX CORPORATION**  
**A DEVELOPMENT STAGE COMPANY**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**DECEMBER 31, 2007**

Note 2 GOING CONCERN

As reported in the accompanying financial statements, the Company incurred a net loss of \$480,849 for the year ended June 30, 2007 and a net loss of \$217,725 for the six months ended December 31, 2007.

In March 1993, the Company had begun its developmental stage with a new business plan. As of March 2000, the Company had developed a production quality prototype of its patented system for the disintegration of scrap tires, but nonetheless continued its research and development efforts to improve the machine's performance and to permit greater flexibility in design for specific customer applications. Due to the Company's lack of working capital during the year ended June 30, 2002, all rubber crumb production was suspended and research and development efforts have been hampered. Pending receipt of funding from operations, government assistance, loans or equity financing, crumb rubber production and previous research and development efforts will not be resumed. While the Company has engaged the process of marketing the TCS System to numerous potential clients since the beginning of the fiscal year commencing July 1, 2000, as of December 31, 2007, the Company had not yet consummated an unconditional purchase order for a TCS System.

The Company is dependent on the success of its marketing of its TCS Systems, and/or raising funds through equity sales, bank or investor loans, governmental grants or a combination of these, to continue as a going concern. The Company's uncertainty as to its ability to generate revenue and its ability to raise sufficient capital, raise substantial doubt about the entity's ability to continue as a going concern. The financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern.

Note 3 PROPERTY AND EQUIPMENT

As at December 31, 2007, plant and equipment consisted of the following:

Furniture, fixtures and equipment	\$149,516
Manufacturing equipment	62,400
Subtotal	211,916
Less: Accumulated depreciation and amortization	186,916
Total	\$ 25,000

Depreciation and amortization expense charged to operations for the six months ended December 31, 2007 was zero. Depreciation and amortization expense charged to operations for the year ended June 30, 2007 was \$25,000.

Note 4 GOVERNMENT LOANS

Canada Economic Development

Loans payable under the Program for the Development of Quebec SMEs based on 50% of approved eligible costs for the preparation of market development studies in certain regions. At December 31, 2007, the balance of these loans was \$112,141 (June 30, 2007 - \$104,710). The loans are unsecured and bear interest at 8%.

**THE TIREX CORPORATION  
A DEVELOPMENT STAGE COMPANY**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
DECEMBER 31, 2007**

Note 5 CAPITAL LEASE OBLIGATIONS

The Company leased certain manufacturing equipment under agreements classified as capital leases. The cost and the accumulated amortization for such equipment as of December 31, 2007 and June 30, 2007 was \$62,400 and \$62,400, respectively. The equipment under capital leases has been included in property and equipment on the balance sheet. The Company is in arrears on payment of these leases but default has not been declared. The lease expired on June 30, 2004. The leased equipment is not part of the Company's TCS System prototype.

Note 6 CONVERTIBLE SUBORDINATED DEBENTURES

The Company issued Type B Convertible Subordinated Debentures between December 1997 and February 1998. These debentures bore interest at 10% and were convertible into common shares of the Company at \$0.20 per share. The conversion privilege on the remaining \$55,000 of these debentures expired and the amount is now included on the Balance Sheet in Long term deposits and notes.

Note 7 CONVERTIBLE NOTES

The Convertible Notes appearing on the balance sheet consisted of an investment arrangement with a group of institutional investors involving a multi-stage financing under which the Company had access to, at its option, up to \$5,000,000. A first tranche of \$750,000 was completed but no further draw downs were made. The terms of the convertible note were:

Balance at December 31, 2007	\$399,389
Interest rate	8%, payable quarterly, commencing June 30, 2001
Issue date	February 26, 2001
Maturity date	February 26, 2003
Redemption rights	If not converted, the holder may require the Company to redeem at any time after maturity for the principal amount plus interest.
Conversion ratio	Lower of (i) 80% of the average of the three lowest closing bid prices for the thirty trading days prior to the issue date, which equals \$.073, or (ii) 80% of the average of the three lowest closing bid prices for the sixty trading days prior to the conversion date.
Common stock warrants	The Convertible Notes carried an option to purchase Common stock warrants at the rate of one Warrant for each \$1.25 of purchase price. The exercise price on the first tranche of \$ 750,000 is \$ .077 per share.

Certain current and previous Directors and Officers of the Company have pledged approximately 12,000,000 of their personal shares of Common Stock of the Company as security for the Convertible Notes until such time as the Company files with the Securities and Exchange Commission a Registration Statement on Form SB-2, to register common stock and warrants issuable upon the conversion of the notes, no later than 150 days after the issue date of the Convertible Notes. This deadline was not met and, as such, the investors served a notice of default to the Company on July 19, 2001. The Registration Statement was never declared effective by the Securities and Exchange

Commission and was eventually withdrawn. Thus, the Convertible Notes cannot be converted to Common Stock nor may the Common Stock warrants be exercised. On April 24, 2002 the Company entered into a Settlement Agreement with the Note holders. The Company was forced to default on this Settlement Agreement. Accordingly, the terms of the Convertible Notes have become effective once again. Approximately two-thirds of the collateral shares provided to the investors were the property of former Tirex Director, Louis A, Sanzaro, now deceased. While we have not confirmed the disposition of the liabilities of our company toward the estate of Mr. Sanzaro, the company intends to act in accordance with the testament of Mr. Sanzaro.

**THE TIREX CORPORATION**  
**A DEVELOPMENT STAGE COMPANY**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**DECEMBER 31, 2007**

Note 8 CONVERTIBLE NOTES

A convertible note, under a private arrangement, consists of the following:

Balance at December 31, 2007	\$ 185,556
Interest rate	8%
Issue date	July 19 <sup>th</sup> , 2000
Maturity date	January 19 <sup>th</sup> , 2002
Redemption rights	If not converted, the holder may require the Company to redeem at any time after maturity for the principal amount plus interest.
Conversion ratio	Not convertible prior to July 19 <sup>th</sup> , 2001, at 20% discount to market between July 19 <sup>th</sup> , 2001 and January 19 <sup>th</sup> , 2002 or at 25% to market if held to maturity, to a maximum of not more than 2,500,000 shares.

During Fiscal 2006, 2007 and the first half of Fiscal 2008, the Company president completed a series of small private placements with various investors having a total aggregate value as of December 31, 2007 of US\$144,800. During the first and second quarters of Fiscal 2008, ten further private placements were undertaken for cash consideration of \$30,100. Subsequent to the period covered by this report, a further \$15,000 representing 3,000,000 shares was transacted. Insofar as the Company does not have enough common shares available for issuance, the investors agreed to accept that the investment would be in the form of non-interest-bearing convertible debt with no fixed terms of repayment and that their investment would be made via Tirex President, John Threshie. When an adequate number of common shares become available, these investors will be able to convert their loans at pre-determined prices. Any conversion would be proportionally adjusted in the event of stock splits or reverse splits.

**THE TIREX CORPORATION**  
**A DEVELOPMENT STAGE COMPANY**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**DECEMBER 31, 2007**

<u>Fiscal Period</u>	<u>Cash Invested</u>	<u>Maximum share conversion</u>
Up to June 30, 2007	\$114,700	26,040,000
First quarter 2008	10,700	3,840,000
Second quarter 2008	<u>19,400</u>	<u>5,460,000</u>
TOTAL	\$144,800	35,340,000

In February 2008 (third quarter of Fiscal 2008), an additional \$15,000 was invested representing 3 million shares.

As noted above, over the thirty months ended December 31, 2007, the expenses of our company have been funded by a series of loans made by a significant number of individuals investing modest amounts each totaling approximately US\$144,800 through Tirex President, John L. Threshie Jr. Insofar as the funds were lent to Mr. Threshie rather than to Tirex directly, with Mr. Threshie then paying personally the expenses of Tirex, which expenses have been duly recorded in our accounts offset by a liability to Mr. Threshie, the liability on our books is still listed as being toward Mr. Threshie. Thus no direct liability toward these investors is on our books.

In addition to the above liability for shares, Tirex is liable for the replacement of 11,986,315 shares which were delivered as collateral by Tirex Directors, Threshie, Muro and Sanzaro (recently deceased) for the \$750,000 of convertible debt contracted for in 2001, which shares were sold by the debt holders.

#### Note 9 RELATED PARTY TRANSACTIONS

Convertible loans include amounts primarily due to Directors, Officers and employees. Historically, such amounts due have been repaid through the issuance of stock. At December 31, 2007 and June 30, 2007, the balances owing to Directors and Officers was \$2,446,929 and \$2,284,429, respectively. These amounts are without interest or terms of repayment.

Long-term deposits and notes included an amount of \$118,500 at December 31, 2007, which is payable to Ocean Tire Recycling & Processing Co., Inc., a company previously owned by a former Director of the Company, Louis A. Sanzaro, now deceased. We expect that the Executor of the estate of Mr. Sanzaro will contact us with respect to the disposition of our liabilities toward the estate of Mr. Sanzaro.

#### Note 10 COMMON STOCK

During the year ended June 30, 2007 and the six months ended December 31, 2007, the Company did not issue any common stock in exchange for services performed.

During the year ended June 30, 2004, an Officer of the Company exercised stock options pursuant to a services agreement. The exercise of these stock options entitled the Officer to 1,500,000 common shares of the Company on a cash-less basis. The Company does not have sufficient authorized and unissued shares available at December 31, 2007 for issuance of this stock and as such, the amount attributable to these shares has been recorded as part of the balances owing to Directors and Officers included in Convertible loans.

On January 31, 2001, the Company's stockholders approved an amendment to the Articles of Incorporation of the Company to increase the number of authorized shares of common stock, par value \$0.001, from 165,000,000 shares to 250,000,000 shares.

**THE TIREX CORPORATION  
A DEVELOPMENT STAGE COMPANY**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
DECEMBER 31, 2007**

As at December 31, 2007, the Company had 249,895,892 Common shares issued and outstanding, versus its authorization of 250,000,000 shares.

Note 11 CONVERTIBLE DEBT

In the event that holders of convertible rights of option exercise such rights of conversion, the Company does not have sufficient number of authorized shares conversion stock to fulfill such obligations and a shareholder meeting would be required to approve the additional authorized number of shares. There is no assurance that the shareholders would approve the increase to the number of authorized shares of stock to meet the conversion obligations under the various conversion agreements or options or agree to a reverse split of the stock.

Note 12 GOVERNMENT ASSISTANCE

The Company has been eligible for and has made claims for tax credits related to scientific research and experimental development expenditures made in Canada in previous years. These amounts, under Canadian Federal and Provincial tax law in conjunction with its annual tax return filings, need not be offset against taxes otherwise payable to become refundable to the Company at the end of its fiscal year. As such, during the year ended June 30, 2003, the Company received approximately \$246,970, which was recorded as an increase in stockholders' equity paid-in capital. Since the last tax credit claim for which the Company received cash during Fiscal 2003, the Company did not make any additional claims for tax credits as it was not eligible to do so. As such, the Company has not recorded any additional tax credits receivable and this account balance remains at zero as of December 31, 2007. .

Note 13 COMMITMENTS

Rental expense for the six months ended December 31, 2007 amounted to zero. Rental expense for the year ended June 30, 2007 amounted to zero.

At December 31, 2007, the Company was in arrears of rent, including interest and related charges, in the approximate amount of \$560,000. A settlement agreement with the former landlord is in place under the terms of which the Company would pay to the former landlord the sum of \$140,000 from the proceeds to the Company of revenues from each of the first four sales of TCS Systems.

Note 14 LITIGATION

An action was instituted by Plaintiffs, an individual and a corporation, in a Canadian court alleging a breach of contract and claims damages of approximately \$508,600 representing expenses and an additional approximate amount of \$1,874,000 in loss of profits. The current action follows two similar actions taken in United States courts, the first of which was withdrawn and the second of which was dismissed based on forum non convenienc and other considerations. A detailed answer has been filed by the Company denying all liability, stating further that Plaintiffs failed to comply with their obligations. Counsel for the Company believes that the Company has meritorious defenses to all of the Plaintiff's claims. The action is still pending.

A Plaintiff instituted an action, a corporation, in August 2001 in a Canadian court claiming approximately \$63,000 is due and owing for the manufacture and delivery of tire disintegrators. The Company has prepared its defense and a cross claim against the Plaintiff as the product delivered was defective and the Company believes it is entitled to a

reimbursement of sums paid. The action is still pending.

An action was instituted by a Plaintiff, the Company's landlord, against the Company in June 2001 for arrears of rent in the amount of approximately \$113,900. Subsequent additions to arrearages with respect to rent and property taxes raised the amount due to approximately \$560,000. A settlement agreement with the former landlord is in place, under the terms of which the Company would pay to the former landlord the sum of \$140,000 from the proceeds to the Company of revenues from the first four sales of TCS Systems.

**THE TIREX CORPORATION  
A DEVELOPMENT STAGE COMPANY**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
DECEMBER 31, 2007**

Note 15 ACCUMULATED OTHER COMPREHENSIVE INCOME

The deficit accumulated during the development stage included accumulated comprehensive other income totaling \$103,396.

ITEM 2 - MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND PLAN OF OPERATIONS

The following is management's discussion and analysis of significant factors which have affected the Company's financial position and operations during the three and six month periods ended December 31, 2007. This discussion also includes events which occurred subsequent to the end of the last quarter and contains both historical and forward-looking statements. When used in this discussion, the words "expect(s)", "feel(s)", "believe(s)", "will", "may", "anticipate(s)", "intend(s)" and similar expressions are intended to identify forward-looking statements. Such statements are subject to certain risks and uncertainties, which could cause actual results to differ materially from those projected.

In March 2000, we announced that our tire recycling technology prototype was ready for replication and commercialization. Our technology has been upgraded and refined since that year 2000 date. The intellectual property owned by Tirex comprises the patented fracturing mill (both US and Canadian patents) which permits the effective separation of the materials components of the tires, and this at a significant cost saving. The intellectual property of our process is recognized in the Manufacturing License Agreement we have with Simpro [www.simpro.it](http://www.simpro.it). Our patent renewals for both the USA and Canada have both been completed.

Since the March 2000 announcement respecting the commercial availability of its TCS-1 model, Tirex worked to complete the design of the TCS-2, the version of the technology which processes two million tires per year, and has worked with its manufacturing partner, Simpro S.p.A. of Turin, Italy, to refine the technology and to create the possibility of auxiliary crumb rubber processing to permit the production of much finer mesh crumb rubber than the initial technology delivers. These refinements, at no significant additional cost to customers, allow for access to higher-value crumb rubber markets which some customers desire. The TCS-2 is now the primary model being offered to customers for reasons of capital and operating cost efficiencies per unit volume of output of finished product although inquiries for TCS-3 and TCS-4 models have been entertained.

As we continued with the technological refinement of our technology, we also initiated the first substantial marketing efforts in order to conclude a first purchase and sales agreement of a TCS System. In this regard, Tirex responded to requests for information and has engaged in negotiations with potential customers throughout the world. Since the conclusion of our development efforts respecting the TCS-2 system, Tirex accelerated its efforts to make our technology known and to attempt to secure that first unconditional sales agreement. Simultaneously, our manufacturing partner, Simpro, which also has a non-exclusive marketing agreement, has been actively negotiating with numerous potential customers, most recently with customers based in the Middle East, the Far East, Russia and with British interests who indicated their interest to install one or more systems in the Middle East. The process has been slower than what Management would have preferred, but Management recognizes that the TCS element of the British / Middle East initiative represents but a fraction of the total industrial development program being considered by this potential customer, and thus the timing of the conclusion of the agreement is constrained by other negotiations in which we have no interest. Insofar as none of the above opportunities have reached the point of being actual agreements, we cannot offer any guarantees that any of the above will actually result in formal contracts.

During Calendar 2007, Tirex developed a relationship with New York based individuals who have expressed their belief in our technology and have represented to us that they would be able to put together US-based TCS projects. Necessary marketing and business plans were completed to pursue the opportunities presented to us. These New York individuals have devoted substantial time to the understanding of our technology and to the structure and key successful factors of the tire recycling industry. We are awaiting further developments with respect to the New York initiative. While Tirex has no reason to doubt the abilities of these individuals, neither can we assure that they will, in fact, be successful with their efforts to sell TCS systems.

In the context of the information being provided to potential customers, we point out to these persons or entities that the original TCS-1 prototype located in Montreal has been disassembled and that the patented fracturing mill is currently physically located in Italy for reference in research and development purposes. These customers are also provided copies of videotapes which include, among other things, a visual demonstration of the prototype actually in use. In addition, these customers are provided with documentation as to the various accreditations and attestations as to the effectiveness of the TCS technology, this documentation coming entirely from independent sources, including private sector engineering firms, public sector government agencies and internationally-accredited technical universities. Customers are also offered the free-of-charge possibility to obtain tailor-made pro-forma financial forecasts for their specific region, based on an adjustable financial model created by our Chief Financial Officer, which allows for the input of local economic costing of goods and services, local taxation conditions, and various loan and depreciation scenarios.

Despite this important quantity of substantiation of the effectiveness of the TCS technology and the substantial offers of assistance in the development of the business plans for these customers, the conclusion of the first purchase and sales agreement has proven elusive. Our manufacturing partner, Simpro, has succeeded in putting into place a limited performance guarantee with respect to the installations which it would accomplish, and this performance guarantee, backed by a major international insurance company, is offered to potential customers. Even with performance guarantees, conclusion of an agreement has been difficult. At issue is that Tirex is not in a position to simply sell new technology systems into an established industry. Also with Simpro selling its systems in Euros, and considering the appreciation of the Euro versus US Dollar, North American sales have proven very difficult. Most potential customers are confronted with the reality of becoming involved in a recycling industry which has complexities not found in other industrial sectors. To screen inquiries from potential customers and to assist them in their own decision-making process as to whether or not they want to really participate in this industrial sector, Tirex routinely sends out a questionnaire to such persons pertaining to the key success factors of their proposed initiative to ascertain their readiness and capability to become involved in such activities.

While negotiations on several fronts have progressed to an advanced stage, as of December 31, 2007, no unconditional contracts had been concluded.

Management attributes the difficulty in concluding a sale primarily to the lack of a long-term track record of the system and to the lack of a demonstration unit to establish the visual confirmation for customers that the technology actually works as represented. While the video of the prototype creates interest, it would appear that, by itself, it cannot replace the visual impact of a functioning fracturing mill. The approximate installed cost of a TCS-2 is 5,500,000 Euros (currently approximately US\$8.16 million using the exchange rate of February 4, 2008 i.e. 1 Euro = US\$1.4832, which is a lot of money for most entrepreneurs or their financial backers for unproven long-term technology. The project cost is not limited to the acquisition cost of the TCS. Depending somewhat on the location, we consider that the entrepreneur is facing a total investment cost of approximately US\$9 million to US\$10 million, taking into account pre-production and early production losses, local infrastructure costs, freight an in-transit insurance, local labor, permits and a reasonable allocation for working capital to support early operations. There could also be import duties on equipment imported from Europe.

During the second quarter of Fiscal 2007, Tirex engaged several new commissioned representatives from New York and Connecticut, each with extensive marketing and business development backgrounds. These commission-based representatives are still committed to our technology. Other than the possibilities for system installations outside of North America, where Simpro has been undertaking the primary development activities, the most active opportunities in North America on which Tirex has been working during the last two years, and on which efforts continue, include projects New York State, California very recently and a significant possibility for a Quebec-based project. The California opportunity presented itself very late in the second quarter of Fiscal 2008. The California-based investors have represented to us that they would be capable of putting together the necessary financial package for the acquisition and installation of one or more TCS systems in that state.

In all cases, it has been represented to either Tirex or Simpro that these projects have done their due diligence and either all or a major part of their funding requirement is feasible. Management, however, is not in a position to assert that TCS System sales contracts will be concluded.

As noted, these opportunities may not conclude in definitive agreements. Until there is a commercial system in operation, and regardless of Management's optimism, there can be no assurance that these opportunities will actually result in unconditional sales contracts.

Tirex continues to be listed on the Internet Recycling Exchange and FundingPost.com. Combined with our web site, [www.tirex.tcs.com](http://www.tirex.tcs.com), and Mr. Threshie's network, it continues to generate interest on a global basis. What appears to be quite clear is the desire to acquire new technologies to replace existing technologies which are either being phased out by evolving government regulations or which are not economically viable in the absence of tire recycling subsidies. Furthermore, government subsidies and focus, as is the case in New York, are towards technologies that can produce higher value added recycled products.

The Agreement with Simpro means that the gross revenues from sales will be recorded on Simpro's books, not in the books of Tirex, unless Simpro refuses the contract at which time the gross revenues would be recorded by Tirex. The amount remitted back to Tirex by Simpro would take the form of a royalty and would be accounted for as such. Regardless of the contract structure and the accounting effects which result, generally accepted accounting principles in effect in the USA have the effect that the revenues to Tirex resulting from such transactions will not be recognizable until the systems will have been accepted by the customers. Given the time line required to manufacture, install and have accepted these systems, it is impossible that any revenues would become recognizable, from the point of view of US Generally Accepted Accounting Principles, during our fiscal year which will end June 30, 2008. While the Company will benefit from the periodic cash inflows resulting from progress payments during the next approximately ten months, the royalty will, in fact, not have been earned until the systems are accepted by the customers.

As a result of this period preceding the commencement of commercial operations, we have had to cover our overhead costs from sources other than from commercial revenues. We expect that some portion of our future overhead costs, which may be significant, will continue to be covered from sources other than commercial revenues. Since March of 2003, our monthly our-of-pocket cash costs have been reduced to inconsequential amounts, and thus our requirement to find financial resources to fund operations is minimal. Our greatest expense, from an accounting standpoint, is for salaries. These salaries have not been paid for over six years, but rather set up as payables and represent by far the greatest proportion of our current liabilities. Our cash flow deficit condition will continue until such time as the Company will start generating revenues from the sale of TCS Systems. Until we can succeed in securing an unconditional sales contract for the sale of one or more systems employing our technology, the company will not be engaging any significant financial commitments and will not be engaging in any significant research and development activities nor increasing employment.

Since 2005, the expenses of our company have been funded by a series of loans made by a significant number of individuals investing modest amounts totaling approximately US\$125,000 to September 21, 2007. Of this total, \$10,700 representing 3,840,000 shares were related to first quarter Fiscal 2008 transactions and \$19,400 representing 5,460,000 shares were related to second quarter activities. Subsequent to the period covered by this report, a further \$15,000 representing 3,000,000 shares was transacted. Each investment was made through Tirex President, John L. Threshie Jr. Insofar as Tirex does not have shares to issue at this time, these investors, fully cognizant of our situation and so documented in writing, have accepted that their investment is being made via Mr. Threshie and represents a convertible debt, the conversion of which can occur once Tirex will have shares available for issuance. To December 31, 2007, approximately 35.34 million shares are involved, this number being before any adjustments to our share authorization structure which would cause a proportionate adjustment to the number of shares actually issuable. We will require a modification to our share authorization. This convertible debt is priced at fixed prices rather than as a discount to market. Insofar as the funds were lent to Mr. Threshie rather than to Tirex directly, with Mr. Threshie then paying personally the expenses of Tirex, which expenses have been duly recorded in our accounts offset by a liability to Mr. Threshie, the liability on our books is still listed as being toward Mr. Threshie. Thus no direct liability toward these investors is on our books. However, once shares will become available for issuance, the amounts due to Mr. Threshie will be transferred by him to these investors and the shares issued accordingly. Some shares could be issued to Mr. Threshie to cover his position, but such shares would be accounted for as a reduction of the salary currently payable to Mr. Threshie. In the event of a share capital restructuring, a proportionate adjustment to the number of otherwise shares would be effected.

In addition to the above liability for shares, Tirex is liable for the replacement of 11,986,315 shares which were delivered as collateral by Tirex Directors, Threshie, Muro and Sanzaro (deceased approximately twenty-one months ago, and thus the shares due to his estate) for the \$750,000 of convertible debt contracted for in 2001, which shares were sold by the debt holders.

We will require a modification to our share authorization in order to be able to satisfy the obligation to issue new shares. Once shares will become available for issuance, the amounts due to Mr. Threshie, Mr. Muro and the estate of Mr. Sanzaro will be will be satisfied. With respect to a portion of the shares issuable to Mr. Threshie, these shares will be transferred by him to and thence to the indirect investors noted above.

Since August 2005, the office rent of Tirex has been assumed by Mr. Threshie. Until mid August 2006, this amount was CA\$1,500 per month. This amount was accrued as a liability to Mr. Threshie on our books. For a period of three weeks from mid-August to early September 2006, Mr. Threshie and the Tirex office was lodged personally by Tirex CFO, Michael Ash, who has provided these premises at a discounted rate of CA\$1,000 for the three-week period in question. Effective the week following Labor Day 2006, the Tirex Head Office was relocated to Stratford, Connecticut where office and operational expenses are relatively nominal.

In February of 2001, we concluded a private financing with an investor group. Under the terms of the Agreement, we had the contractual right to require the Investor to purchase up to US\$5,000,000 of put notes. We drew down US\$750,000 of this amount and used the proceeds of this financing toward legal and consulting fees due, normal operating expenses such as payroll, rent and taxes and the acquisition of equipment for our prototype TCS-1 Plant. In July of 2001, the Company entered into a technical default with respect to the Agreement by not having an SB-2 Registration Statement declared effective by the SEC. After several months of negotiations, the Company entered into a Settlement Agreement with the Investor Group which provided for a cash pay down of the amount owed, including interest and penalties over a period of approximately two years starting with the date the Settlement Agreement was signed, the right of the Investor Group to continue to be able to sell up to 600,000 collateral and Rule 144 shares per month and the issuance of three series of warrants, 500,000 each, exercisable at prices of one cent, five cents and ten cents over a three year period. This Settlement Agreement was announced in April of 2002, and details of the terms of the Agreement are filed as an Exhibit to this Report. The Company, in the absence of having completed its first sales of TCS Systems according to our expectations, was unable to generate the cash flow necessary to pay down the Convertible Note in accordance with the terms of the Settlement Agreement. Thus, the Company once again finds itself in a position of default. Numerous recourses are available to the holders of the Convertible Notes, but to date, these recourses have not been exercised. Such recourses can be exercised at any time and the fact that they have not been exercised so far does not preclude their being exercised now or in the future. The Company has kept the Convertible Note holders apprised of its efforts to sell TCS Systems and thus restart the repayments on the Convertible Notes. The collateral shares provided by the directors, totaling approximately 11,986,000 shares, have been sold by the investors.

The previously unsigned Executive Agreements respecting Messrs. Threshie, Muro and Ash were signed. New Agreements covering the period from 2007 to 2010 have been negotiated and signed by the Corporation and the Executives. No significant changes from the previous agreements were agreed upon.

Because of the lengthy delay preceding the commencement of commercial operations, we have historically had to cover our overhead costs from sources other than from commercial revenues. We expect that some portion of our future overhead costs, which may be significant, will continue to be covered from sources other than commercial revenues. Since March of 2003, our monthly out-of-pocket cash costs have been reduced to relatively inconsequential amounts, and thus our requirement to find financial resources to fund operations has been minimal. Our greatest expense, from an accounting standpoint, is for salaries. These salaries have not actually been paid for periods ranging from four to six years, but rather set up as payables. Our cash flow deficit condition will continue until such time as the Company will start generating revenues from the sale of TCS Systems. Until we can succeed in securing an unconditional sales contract for the sale of one or more systems employing our technology, the company will not be engaging any significant financial commitments and will not be engaging in any significant research and development activities nor increasing employment.

## Liquidity and Capital Resources

As of December 31, 2007, the Company had total assets of \$208,297 as compared to \$233,297 at December 31, 2006 reflecting a decrease of \$25,000, and no change versus total assets at June 30, 2007. Except for a \$25,000 valuation decrease in Property and Equipment recorded in the fourth quarter of Fiscal 2007, there were no other changes in the value of individual assets, representing Notes Receivable, Inventory and an Investment, from December 31, 2006 to December 31, 2007, and no changes in the value of individual assets from June 30, 2007 to December 31, 2007.

As of December 31, 2007, the Company had total liabilities of \$6,360,741 as compared to \$5,583,380 at December 31, 2006, reflecting an increase of \$660,536, and reflecting an increase of \$372,028 versus total liabilities as at June 30, 2007, which total amounted to \$5,988,713. The increase in total liabilities from December 31, 2006 to December 31, 2007 is primarily attributable to an increase of \$412,915 in Accounts Payable and Accrued Liabilities and by an increase of \$330,000 in Convertible Loans. The increase in total liabilities from June 30, 2007 to December 31, 2007 is primarily attributable to an increase of \$196,701 in Accounts Payable and Accrued Liabilities and to an increase of \$167,500 in Convertible Loans.

Reflecting the foregoing, the financial statements indicate that as at December 31 30, 2007, the Company had a working capital deficit (current assets minus current liabilities) of \$3,095,634 compared to a working capital deficit of \$2,648,003 as at December 31, 2006, reflecting an increase of \$447,631. The working capital deficit of \$3,095,634 as at December 31, 2007 compares to a working capital deficit of \$2,890,836 as at June 30, 2007, reflecting an increase of \$204,798.

The financial statements which are included in this report reflect total operations and other expenses of \$109,077 for the three month period ended December 31, 2007 versus \$138,914 for the comparative three month period ended December 31, 2006, reflecting a decrease of \$29,837.

The success of the tire recycling manufacturing business and the ability to continue as a going concern will be dependent upon the ability of the Company to obtain adequate financing to commence profitable, commercial manufacturing and sales activities and the TCS Systems ability to meet anticipated performance specifications on a continuous, long term commercial basis.

The Company believes that the amounts accrued to date in respect of the shares issued to compensate the executive officers and consultants reflect the fair value of the services rendered, and that the recipients of such shares received such shares at an appropriate and reasonable discount from the then current public market price. The Company believes that the discount is warranted due to the fact that there are often restrictions on the transfer of said shares arising out of the absence of registration, and the uncertainty respecting our ability to continue as a going concern.

From inception (July 15, 1987) through December 31, 2007, the Company has incurred a cumulative net loss of \$30,661,310. Approximately \$1,057,356 of such cumulative net loss was incurred prior to the inception of the Company's present business plan, in connection with the Company's discontinued proposed health care business and was due primarily to the expending of costs associated with the unsuccessful attempt to establish such health care business. The Company never commenced the proposed health care operations and therefore, generated no revenues therefrom.

## Item 3 - Controls and Procedures

The Company's management, with the participation of its Chief Executive Officer, who is the Company's principal executive officer, and its Chief Financial Officer, who is the Company's principal financial officer, has evaluated the effectiveness of the Company's disclosure controls and procedures as of December 31, 2007. Based upon that evaluation, the Chief Executive Officer and the Chief Financial Officer have concluded that the Company's disclosure controls and procedures are effective in alerting them in a timely manner to material information relating to The Tirex

Corporation, including its consolidated subsidiaries, required to be included in this report and the other reports that the Company files or submits under the Securities Exchange Act of 1934. During the second quarter of fiscal 2007-08, there have been no changes in the Company's internal control over financial reporting that have materially affected, or that are reasonably likely to materially affect, its internal control over financial reporting.

PART II: OTHER INFORMATION

**Item 1:**

**Item 1 - Legal Proceedings**

We are presently a party in the following legal proceedings, the status of which has not changed since the Company filed its Annual Report on Form 10-KSB for Fiscal 2007.

IM(2) Merchandising and Manufacturing, Inc and David B. Sinclair v. The Tirex Corporation, Tirex Corporation Canada, Inc., et al.

Lefebvre Frères Limited v. The Tirex Corporation

Tri-Steel Industries Inc. v. The Tirex Corporation

No director, officer, or affiliate of the Company, or any associate of any of them, is a party to or has a material interest in any proceeding adverse to us.

**Item 2: - Unregistered Sales of Equity Securities and Use of Proceeds**

None

**Item 3 - Defaults Upon Senior Securities**

Other than defaults previously reported on in prior periods, there were no other defaults upon senior securities.

**Item 4 - Submission of Matters to a Vote of Security Holders**

During the three-month period ended September 30, 2007, there were no submissions of matters to a vote of Security Holders.

**Item 5 Other Information**

There have been no material changes in the way in which shareholders may nominate directors.

**Item 6 - Exhibits and Reports on Form 8-K**

Exhibits

Exhibit 31.1 Certification of Form 10-Q filing by the Chief Executive Officer

Exhibit 31.2 Certification of Form 10-Q filing by the Chief Financial Officer

Exhibit 32.1 Certification Pursuant to the Sarbanes-Oxley Act by the Chief Executive Officer

Exhibit 32.2 Certification Pursuant to the Sarbanes-Oxley Act by the Chief Financial Officer

No Reports on Form 8-K were filed during the period covered by this report

SIGNATURES

In accordance with the requirements of the Exchange Act, the registrant has caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

THE TIREX CORPORATION

Date: February 13, 2008

By /s/ John L. Threshie, Jr.
