FORWARD-LOOKING STATEMENTS

This quarterly report contains forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995 with respect to Harmony's financial condition, results of operations, business strategies, operating efficiencies, competitive positions, growth opportunities for existing services, plans and objectives of management, markets for stock and other matters. Statements in this quarter that are not historical facts are "forward-looking statements" for the purpose of the safe harbour provided by Section 21E of the U.S. Securities Exchange Act of 1934, as amended, and Section 27A of the U.S. Securities Act of 1933, as amended. Forward-looking statements are statements that are not historical facts. These statements include financial projections and estimates and their underlying assumptions, statements regarding plans, objectives and expectations with respect to future operations, products and services, and statements regarding future performance. Forward-looking statements are generally identified by the words "expect", "anticipates", "believes", "intends", "estimates" and similar expressions. These statements are only predictions. All forward-looking statements involve a number of risks, uncertainties and other factors and we cannot assure you that such statements will prove to be correct. Risks, uncertainties and other factors could cause actual events or results to differ from those expressed or implied by the forward-looking statements. These forward-looking statements, including, among others, those relating to the future business prospects, revenues and income of Harmony, wherever they may occur in this quarterly report and the exhibits to this quarterly report, are necessarily estimates reflecting the best judgement of the senior management of Harmony and involve a number of risks and uncertainties that could cause actual results to differ materially from those suggested by the forward-looking statements. As a consequence, these forward-looking statements should be considered in light of various important factors, including those set forth in this quarterly report. Important factors that could cause actual results to differ materially from estimates or projections contained in the forward-looking statements include, without limitation: overall economic and business conditions in the countries in which we operate; the ability to achieve anticipated efficiencies and other cost savings in connection with past and future acquisitions; increases or decreases in the market price of gold; the occurrence of hazards associated with underground and surface gold mining; the occurrence of labour disruptions; availability, terms and deployment of capital; changes in government regulations, particularly mining rights and environmental regulations; fluctuations in exchange rates; currency devaluations and other macro-economic monetary policies; and socio-economic instability in the countries in which we operate.

Harmony's Integrated Annual Report and the Form 20-F filed with the United States' Securities and Exchange Commission for the financial year ended 30 June 2014 are available on our website at

CONTACT DETAILS

COMPETENT PERSON'S DECLARATION

Harmony reports in terms of the South African Code for the Reporting of Exploration results, Mineral Resources and Ore Reserves (SAMREC).

In South Africa, Harmony appoints an ore reserve manager at each of its operations who takes responsibility for the compilation and reporting of

mineral resources and mineral reserves at their operations. In Papua New Guinea, competent persons are appointed for the mineral resources and

mineral reserves for specific projects and operations.

The mineral resources and mineral reserves in this report are based on information compiled by the following competent persons:

Resources and Reserves South Africa: Jaco Boshoff, BSc (Hons), MSc, MBA, Pr. Sci. Nat., who has 19 years' relevant experience and is registered

with the South African Council for Natural Scientific Professions (SACNASP) and a member of the South African Institute of Mining and Metallurgy (SAIMM).

Resources and Reserves Papua New Guinea: Gregory Job, BSc, MSc, who has 26 years' relevant experience and is a member of the Australian

Institute of Mining and Metallurgy (AusIMM). Mr Job has sufficient experience relevant to the styles of mineralisation and types of deposits under

consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code

for Reporting of Exploration Results, Mineral Resources and Ore Reserves (the "JORC Code").

Mr Boshoff and Mr Job are full-time employees of Harmony Gold Mining Company Limited. These competent persons consent to the inclusion in

the report of the matters based on the information in the form and context in which it appears.

Mineral Resource and Reserve information as at 30 June 2014 has not changed.

CHIEF EXECUTIVE OFFICER'S REVIEW

1. Safety

Following a fatality free December 2014 quarter in South Africa, it is with regret that I report two fatalities at our South African operations during the March 2015 quarter. Our sincere condolences go to the families and friends of Mosoeu Ntsutheleng (contractor team leader at Kusasalethu) and Michael Chobeng (development team leader at Masimong).

On 22 February 2015 we had an underground fire at Kusasalethu. I am grateful to report that all of the 486 underground employees were safely brought to surface.

2. Gold market

During the March 2015 quarter the average US dollar gold price received increased by 2% to US\$1 220/oz (Dec 14: US\$1 200/oz). The increase in the gold price during the March 2015 quarter combined with the weakening of the rand against the dollar to R11.74/US\$ (Dec 14: R11.22/US\$), resulted in an increase in the rand gold price received to R460 569/kg (Dec 14: R432 963/kg). We believe that the gold price will remain at current levels for some time to come.

3. Operational results

Gold production for the March 2015 quarter was impacted by slow start-ups after the December 2014 holidays, as well as safety stoppages. As a result, gold production was 10% (817 kilograms) lower at 7 642 kilograms in the March 2015 quarter compared to the December 2014 quarter (8 459 kilograms).

Our focus is on ensuring that our mines are safe and profitable. Target 3 has been closed, we have stopped the Phakisa decline, the restructuring of Kusasalethu was completed during the quarter and we continue to monitor each of our mines closely.

During the March 2015 quarter Kusasalethu showed an increase in grade and a reduction in costs. Tonnes mined were less than planned due to a fatal accident and a fire during the quarter.

A fatal accident early in the quarter and an underground fire at Masimong impacted negatively on volume. Following two loss-making quarters, it was decided to scale down ore body development at Masimong in an effort to restore the mine to profitability. The plan has already been partially implemented and will impact on the life of mine - we expect that the life of mine will be shortened to about 2 years.

Doornkop's performance was disappointing due to grade and volume constraints. Doornkop posted a net loss in the last three quarters and we are investigating alternatives to return the mine to profitability, which includes restructuring.

At Hiddden Valley a revised life of mine plan is being considered with reduced stripping requirements, which will enhance cash generation in the short term. Cost reduction initiatives being pursued at the mine includes revising the organisational structure. An operational improvement program has also been launched, with a specific focus on mining and maintenance discipline.

After recording three very good production quarters, unexpected low grades and poor ground conditions at Tshepong resulted in lower production during the March 2015 quarter. The crews had to be moved to mainly ledging and over-stoping areas. During the quarter new stope faces were established and the outlook for the June 2015 quarter on both volume and grade is positive.

4. Financial results

Despite lower gold production, production profit increased by 4% to R643 million in the March 2015 quarter compared to R618 million in the previous quarter, mainly due to a 10% decrease in operating costs supported by a 6% increase in the average gold price received.

Cash operating cost for the March 2015 quarter decreased by 4% when compared to the previous quarter, as a result of a decrease in the costs of consumables and labour. The restructuring at Kusasalethu was completed and the full cost saving will be realised in the June 2015 quarter. Kusasalethu's cost for the March 2015 quarter decreased by 8% when compared to the December 2014 quarter. Total capital expenditure for the March 2015 quarter decreased by 15% to R583 million.

Revenue

Revenue decreased by R287 million (8%) to R3 428 million as a result of the 13% decrease in gold sold to 7 444kg, which was partially offset by a 6% increase in the rand gold price received at R460 569/kg in the March 2015 quarter.

Production costs

The decrease in production costs in the March 2015 quarter is mainly as a result of the gold stock increase of R178 million, a decrease in consumables of R91 million due to lower production and a decrease in labour costs of R26 million as a result of the restructuring of our South African operations during the quarter.

Other items

Other items included in cost of sales decreased to R63 million in the March 2015 quarter. Restructuring cost related to employee termination was largely accounted for in the December 2014 quarter.

Exploration expenditure

The decrease in exploration expenditure in the March 2015 quarter is due to the capitalisation of the Golpu feasibility study costs, following the approval of the updated prefeasibility by the Harmony board in December 2014. The

project has progressed to the final feasibility study stage.

Other expenses – net

The increase to R127 million in expenses in the March 2015 quarter is mainly due to the foreign exchange translation loss of R118 million recorded on the US\$ borrowings. The rand weakened from US\$/R11.57 at 31 December 2014 to US\$/R12.17 at 31 March 2015.

Harmony Gold Mining Company Limited

Results for the third quarter FY15 and nine months ended 31 March 2015

4

Borrowings

Borrowings decreased by R261 million. The US\$300 million syndicated loan (US\$270 million drawn) was refinanced by a new revolving credit facility of up to US\$250 million, of which US\$205 million was committed and utilised at 31 March 2015. R400 million was drawn down on the R1.3 billion Nedbank facility.

5. Employee relations

We live our 5 values – safety, accountability, achievement, being connected and being honest. Our pro-active communication campaign is focused on keeping our employees informed about the state of the mine they work at as well as the health of Harmony. We engage with all the unions – whether formally recognised or not.

5.1 Section 189A restructuring processes

The Kusasalethu Section 189A process was concluded in February 2015.

1 271

During the June 2015 quarter operational restructuring will take place at Masimong, Doornkop and Hidden Valley. These processes will most likely include a Section 189A process. Labour will be reduced by approximately 400 employees at Masimong during the June 2015 quarter.

5.2 Preparations for the 2015 wage negotiations

As the current wage agreement concludes at the end of June 2015, preparations for wage negotiations are well underway, with the primary gold producers (representing close on 80% of employees in the gold industry) bargaining centrally under the auspices of the Chamber of Mines. In addition to centralised negotiations, much emphasis has been placed on direct engagement with employees and unions during the past two years and particularly in fostering an understanding of the economic circumstances of the sector as a whole and

Harmony's mines specifically.

What is clear is that high increases and indeed industrial action will lead to downscaling of operations and even closure of vulnerable mines. Job losses would be inevitable.

In engaging with unions in the coming months, we will be proposing an Economic and Social Compact, the fundamental principles of which are partnerships, sustainability and job retention. Rather than simply tabling and acceding to demands which typically characterises positional bargaining, we will be seeking to agree a set of mutually binding principles that spells out the obligations, rights and responsibilities of the companies and organised labour. Wages and conditions of service will be only one aspect of this Compact. Stakeholders will be apprised of progress as negotiations progress.

6. Mining Charter

On 31 March 2015 the Minister of Mineral Resources (DMR), Minister Advocate Ngoako Ramatlhodi, announced the Department of Mineral Resources' assessment of the mining industry's compliance with the Mining Charter.

Harmony acknowledges the DMR's account of the mining industry's success in achieving these targets and recognises the role of the mining industry as a driver of growth and development in South Africa. There is a difference of opinion, however, between the mining companies and the DMR in how some black economic empowerment (BEE) transactions are recognised. To this end, the DMR and the mining industry have agreed to jointly seek a 'declaratory order' from a South African court to ensure the correct interpretation of the rules governing the BEE component of the Charter. This is a proactive and necessary step to promote regulatory certainty for the mining industry and commenced in April 2015.

Harmony will continue its journey to cement its future in South Africa – pro-actively participating in transforming the South African mining industry – committed to identifying other opportunities to further facilitate HDSA (Historically disadvantaged South Africans) ownership, transform our workforce, invest in developing South Africans and create opportunities for small business entrepreneurs. Harmony's presence in South Africa is real and lasting and so will our legacy be.

Harmony believes that its performance in terms of each of the nine pillars set out in the Mining Charter illustrates that it does more than just comply. The nine pillars of the Charter are: reporting, ownership, housing and living conditions, procurement and enterprise development, employment equity, human resources development, mine community development, sustainable development and growth and beneficiation.

7. Golpu

Work on both the Feasibility Study for stage one and the Prefeasibility Study for stage two continued during the quarter. Stage one targets the upper higher value portion of the ore body. Stage two will encompass the rest of the ore reserve. Both studies are scheduled to be completed by the end of calendar year 2015.

5

The organisation structure for the Wafi-Golpu team has been completed and recruitment has commenced. Negotiation of the terms of a Pre Mine Development Agreement (PDMA) is in progress with the government and is intended to cover fiscal stability, regulatory stability and a framework for the mine development contract. Commencement of advanced exploration is dependent on PDMA progress and board approval.

8. Conclusion

We have responded to a lower gold price, first by rationalising our assets and then restructuring our portfolio – cutting costs, reducing labour numbers and focusing on mining only safe, profitable ounces. During the next couple of months we will continue to improve the performance of our assets and restructure Masimong, Doornkop and Hidden Valley for profitability. We are assessing ways of funding Golpu and unlocking the true value of each of our assets, which will ensure shareholder returns in the long term.

** For the March 2014 quarter: Cash generated by operating activities previously reported as R750 million restated to R778 million. Cash utilised by investing activities previously reported as (R602 million) restated to (R630 million). This is mainly related to the change in accounting policy for IFRIC 20.*

#

For the nine months ended 31 March 2014: Cash generated by operating activities previously reported as R1 668 million restated to R1 789 million. Cash utilised by investing activities previously reported as (R1 854 million) restated to (R1 975 million). This is mainly related to the change in accounting policy for IFRIC 20.

The accompanying notes are an integral part of these condensed consolidated financial statements.

13

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

for the nine months ended 31 March 2015 (Rand)

1.

Accounting policies

Basis of accounting

The condensed consolidated financial statements for the nine months ended 31 March 2015 have been prepared in accordance

with IAS 34, Interim Financial Reporting, JSE Listings Requirements, SAICA Financial Reporting Guides as issued by the Accounting

Practices Committee and Financial Pronouncements as issued by the Financial Reporting Standards Council, and in the manner

required by the Companies Act of South Africa. They should be read in conjunction with the annual financial statements for the

year ended 30 June 2014, which have been prepared in accordance with International Financial Reporting Standards as issued by

the International Accounting Standards Board (IFRS). The accounting policies are consistent with those described in the annual

financial statements, except for the adoption of applicable revised and/or new standards issued by the International Accounting

Standards Board.

The following accounting standards, amendments to standards and new interpretations have been adopted with effect from

1 July 2014 and had no impact on the financial results of the group:

IFRSs

Annual Improvements 2010 – 2012 Cycle

IAS 32

Amendment – Presentation – Offsetting Financial Assets and Financial Liabilities

IAS 36

Amendment – Impairment of Assets – Recoverable amount disclosures for non-financial assets

Included in the December 2014 quarter is a credit of R11 million as a result of work performed in the Free State and at Deelkraal, resulting in a reduction in the rehabilitation liability.

2

The March 2015 quarter total includes a credit for Kusasalethu following the conclusion of the Section 189A process during the quarter. The December 2014 quarter total includes amounts relating to management retrenchments and retrenchment of employees at Target 3, Ernest Oppenheimer Hospital and a provision for Kusasalethu.

4.

Exploration expenditure

The Harmony board approved the updated Golpu project prefeasibility study in December 2014. The approval and the progression to the final feasibility study stage, demonstrates the technical and commercial viability of the Golpu project and as a

result Harmony

started capitalising project exploration and evaluation expenditure in respect of the Golpu project in the March 2015 quarter.

5.

Loss on scrapping of property, plant and equipment

As reported last quarter, management embarked on a life-of-mine optimisation process in respect of the South African operations

which was finalised at the end of the December 2014 quarter. The optimisation ensured greater focus on mining profitable and

higher grade areas at our operations and therefore resulted in the abandonment of lower grade and unprofitable areas from the

life-of-mine plan for most of the operations.

In the case of Kusasalethu and Masimong, the optimisation led to the abandonment of levels and areas with a carrying value. The

abandonment of these areas resulted in the derecognition of property, plant and equipment as no future economic benefits are

expected from their use or disposal and a loss on scrapping of property, plant and equipment of R214 million on Kusasalethu and

R216 million on Masimong was recorded in the December 2014 quarter.

6.

Investment in associate

Harmony holds a 10.38% share in Rand Refinery Proprietary Limited (Rand Refinery). Due to the issues experienced at Rand Refinery

following the implementation of a new Enterprise Resource Planning (ERP) system on 1 April 2013, Harmony provided for its full

share of loss for the inventory discrepancy and recognised a R127 million loss in the June 2014 quarter.

As a precautionary measure following the challenges experienced by the implementation of the software system, Rand Refinery's

shareholders have extended Rand Refinery an irrevocable, subordinated loan facility of up to R1.2 billion. The facility is convertible

to equity after a period of two years. The agreements relating to the facility were signed on 23 July 2014.

During the December 2014 quarter, Rand Refinery Proprietary Limited drew down R1.02 billion on the shareholders loan. Harmony's

portion of the shareholders' loan was R120 million. Interest on the facility is JIBAR plus a margin of 3.5%.

15

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS CONTINUED

for the nine months ended 31 March 2015 (Rand)

7. Borrowings

During the March 2015 quarter, the US\$300 million syndicated revolving credit facility (US\$270 million drawn) was refinanced by a

new revolving credit facility of US\$250 million. R400 million was drawn down on the R1.3 billion Nedbank revolving credit facility

during the March 2015 quarter.

increasing the borrowings balance and Other expenses (net).

8.

Financial risk management activities

Fair value determination

The following table presents the group's assets and liabilities that are measured at fair value by level within the fair value hierarchy:

Level 1: Quoted prices (unadjusted) in active markets for identical assets;

Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset, either directly or indirectly (that

is, as prices) or indirectly (that is, derived from prices);

Level 3: Inputs for the asset that are not based on observable market data (that is, unobservable inputs).
