NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
SUMMIT BANCSHARES, INC. AND SUBSIDIARIES
FOR THE THREE MONTHS ENDED MARCH 31, 2004 AND 2003 (UNAUDITED)
AND FOR THE YEAR ENDED DECEMBER 31, 2003 (UNAUDITED)

NOTE 1 - Summary of Significant Accounting and Reporting Policies

Edgar Filing: SUMMIT BANCSHARES INC /TX/ - Form 10-Q

The accounting and reporting policies of Summit Bancshares, Inc. are in accordance with accounting principles generally accepted in the United States of America and the prevailing practices within the banking industry. A summary of the more significant policies follows:

Basis of Presentation and Principles of Consolidation

The consolidated financial statements of Summit Bancshares, Inc. (hereinafter, collectively with its subsidiaries, the Corporation), include its accounts and its direct and indirect wholly-owned subsidiaries, Summit Delaware Financial Corporation, Summit Bank, National Association (the Bank) and SIA Insurance Agency, Inc. (SIA). All significant intercompany balances and transactions have been eliminated in consolidation.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ materially from those estimates.

Cash and Due From Banks

The Bank is required to maintain certain noninterest-bearing cash balances at the Federal Reserve Bank based on its level of deposits. During the first three months of 2004, the average cash balance maintained at the Federal Reserve Bank was \$2,141,000. Compensating balances held at correspondent banks, to minimize service charges, averaged approximately \$19,324,000 during the same period.

Investment Securities

The Corporation has adopted Statement of Financial Accounting Standards No. 115, *Accounting for Certain Investments in Debt and Equity Securities* (SFAS 115). At the date of purchase, the Corporation is required to classify debt and equity securities into one of three categories: held-to-maturity, trading or available-for-sale. At each reporting date, the appropriateness of the classification is reassessed. Investments in debt securities are classified as held-to-maturity and measured at amortized cost in the financial statements only if management has the positive intent and ability to hold those securities to maturity. Securities that are bought and held principally for the purpose of selling them in the near term are classified as trading and measured at fair value in the financial statements with unrealized gains and losses included in earnings. Investments not classified as either held-to-maturity or trading are classified as available-for-sale and measured at fair value in the financial statements with unrealized gains and losses reported, net of tax, in a separate component of shareholders' equity until realized.

The Corporation has the ability and intent to hold to maturity its investment securities classified as held-to-maturity; accordingly, no adjustment has been made for the excess, if any, of amortized cost over market. In determining the investment category classifications at the time of purchase of securities, management considers its asset/liability strategy, changes in interest rates and prepayment risk, the need to increase capital and other factors. Under certain circumstances (including the deterioration of the issuer's creditworthiness, a change in tax law, or statutory or regulatory requirements), the Corporation may change the investment security classification. In the periods reported for 2004 and 2003, the Corporation held no securities that would have been classified as trading securities.

All investment securities are adjusted for amortization of premiums and accretion of discounts. Amortization of premiums and accretion of discounts are recorded to income over the contractual maturity or estimated life of the individual investment on the level yield method. Gain or loss on sale of investments is based upon the specific identification method and the gain or loss is recorded in non-interest income. Income earned on the Corporation's investments in state and political subdivisions is not taxable.

Loans and Allowance for Loan Losses

Loans are stated at the principal amount outstanding less unearned discount, deferred fees and the allowance for loan losses. Unearned discount on installment loans is recognized as income over the terms of the loans by a method approximating the interest method. Interest income on all other loans is recognized based upon the principal amounts outstanding, the simple interest method. Loan origination fee income, net of direct loan origination costs, is deferred and amortized over the life of the related loan. The accrual of interest on a loan is discontinued when, in the opinion of management, there is doubt about the ability of the borrower to pay interest or principal. Interest previously earned, but uncollected on such loans, is written off. After loans are placed on non-accrual all payments received are applied to principal and no interest income is recorded until the loan is returned to accrual status or the principal has been reduced to zero.

NOTE 1 - Summary of Significant Accounting and Reporting Policies (cont d.)

The Corporation has adopted Statement of Financial Accounting Standards No. 114, Accounting by Creditors for Impairment of a Loan, as amended by Statement of Financial Accounting Standards No. 118, Accounting by Creditors for Impairment of a Loan - Income Recognition and Disclosure. Under this standard, the allowance for loan losses related to loans that are identified for evaluation in accordance with Statement No. 114 (impaired loans) is based on discounted cash flows using the loan's initial effective rate or the fair value of the collateral for certain collateral dependent loans.

The allowance for loan losses is comprised of amounts charged against income in the form of a provision for loan losses for certain loans when it is probable that all amounts due pursuant to the contractual terms of the loan will not be collected. In these situations, a reserve is recorded when the carrying amount of the loan exceeds the discounted cash flows using the loan's initial effective interest rate or the fair value of the collateral for certain collateral dependent loans. Income on impaired loans is recognized based on the collectibility of the principal amount. Adjustments to the allowance for loan losses will be reported in the period such adjustments become known or are reasonably estimable.

The amount maintained in the allowance reflects management's continuing assessment of the potential losses inherent in its loan portfolio based on its evaluation of a number of factors, including the Bank's loss experience in relation to outstanding loans and the existing level of the allowance, prevailing and prospective economic conditions, and management's continuing review of the discounted cash flow values of impaired loans and its evaluation of the quality of the loan portfolio. Loans are charged against the allowance for loan losses when management believes that the collectibility of the principal is unlikely.

The evaluation of the adequacy of loan collateral is often based upon estimates and appraisals. Because of changing economic conditions, the valuations determined from such estimates and appraisals may also change. Accordingly, the Corporation may ultimately incur losses which vary materially from management's current estimates.

Premises and Equipment

Land is carried at cost. Premises and equipment are stated at cost less accumulated depreciation and amortization. Depreciation expense is computed on the straight-line method based upon the estimated useful lives of the assets ranging from three to forty years. Maintenance and repairs are charged to non-interest expense. Renewals and betterments are added to the asset accounts and depreciated over the periods benefited. Depreciable assets sold or retired are removed from the asset and related accumulated depreciation accounts and any gain or loss is reflected in the income and expense accounts.

Other Real Estate

Other real estate is foreclosed property held pending disposition and is valued at the lower of its fair value or the recorded investment in the related loan. At foreclosure, if the fair value, less estimated costs to sell, of the real estate acquired is less than the Corporation's recorded investment in the related loan, a write-down is recognized through a charge to the allowance for loan losses. Any subsequent reduction in value is recognized by a charge to income. Operating expenses of such properties, net of related income, and gains and losses on their disposition are included in non-interest expense.

Federal Income Taxes

The Corporation joins with its subsidiaries in filing a consolidated federal income tax return. The subsidiaries pay to the parent a charge equivalent to their current federal income tax based on the separate taxable income of the subsidiaries.

The Corporation and the subsidiaries maintain their records for financial reporting and income tax reporting purposes on the accrual basis of accounting. Deferred income taxes are provided in accordance with Statement of Financial Accounting Standards No. 109, Accounting for Income Taxes. Deferred income taxes are provided for accumulated temporary differences due to basic differences for assets and liabilities for financial reporting and income tax purposes.

Realization of net deferred tax assets is dependent on generating sufficient future taxable income. Although realization is not assured, management believes it is more likely than not that all of the net deferred tax assets will be realized. The amount of the net deferred tax asset considered realizable, however, could be reduced in the near term if estimates of future taxable income are reduced.

Cash and Cash Equivalents

Edgar Filing: SUMMIT BANCSHARES INC /TX/ - Form 10-Q

For the purpose of presentation in the Statements of Cash Flows, cash and cash equivalents include cash on hand, clearings and exchanges, and balances due from correspondent banks.

Reclassification

Certain reclassifications have been made to the 2003 financial statements to conform to the 2004 presentation.

8

NOTE 1 - Summary of Significant Accounting Policies (cont d.)

Earnings Per Common and Common Equivalent Shares

Statement of Financial Accounting Standards No. 128 (SFAS 128), Earnings Per Share, requires presentation of basic and diluted earnings per share. Basic earnings per share has been computed by dividing net income available to common shareholders by the weighted average number of common shares outstanding for the reporting period. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock. Net income per common share for all periods presented has been calculated in accordance with SFAS 128. Outstanding stock options issued by the Corporation represent the only dilutive effect reflected in diluted weighted average shares.

Stock-Based Compensation

The Corporation accounts for stock-based compensation in accordance with the intrinsic value based method recommended by Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees. Under the intrinsic value based method, compensation cost is the excess, if any, of the quoted market price of the stock at grant date over the amount an employee must pay to acquire the stock. The impact on the financial statements of using this method is disclosed in Note 13, Stock Option Plans to the financial statements.

SFAS No. 123, Accounting for Stock-Based Compensation, as amended by SFAS 148, requires pro forma disclosures of net income and earnings per share for companies not adopting its fair value accounting method for stock-based compensation. The pro forma disclosures presented in Note 13, Stock Option Plans use the fair value method of SFAS 123 to measure compensation expense for stock-based compensation plans.

Comprehensive Income

Comprehensive income includes all changes in shareholders' equity during a period, except those resulting from investments by and distributions to owners and treasury stock transactions. Besides net income, the other component of the Corporation's comprehensive income is the after tax effect of changes in the fair value of securities available for sale. Comprehensive income for the periods ended March 31, 2004 and 2003 and for the year ended December 31, 2003 is reported in Note 22, Comprehensive Income.

Audited Financial Statements

The consolidated balance sheet as of December 31, 2003, and the consolidated statements of income, changes in shareholders' equity and cash flows for the year ended December 31, 2003 are headed "unaudited" in these financial statements. These statements were reported as "audited" in our Annual Report of Form 10-K for the year ended December 31, 2003 filed with the Securities and Exchange Commission but are required to be reflected in these statements as unaudited because of the absence of an independent auditor's report.

The Corporation has available a line of credit with the FHLB of Dallas which allows it to borrow on a collateralized basis at a fixed term. The borrowings are collateralized by a blanket floating lien on all first mortgage loans, the FHLB capital stock owned by the Corporation and any funds on deposit with FHLB. At March 31, 2004, the Corporation had \$100.0 million of borrowings outstanding under the line of credit at a rate of 1.26%, \$85.0 million of which matures in 2004 and the remaining \$15.0 million matures in 2005. \$30.0 million was borrowed for thirty days on the last day of the quarter for the purpose of maximizing the borrowing potential for the Corporation over the next year based on limits established by the FHLB. For the three months ended March 31, 2004, the Corporation had average borrowings under the line of credit of \$65.8 million. For the three months ended March 31, 2003, the Corporation had \$22.0 million of borrowings outstanding under the line of credit

Edgar Filing: SUMMIT BANCSHARES INC /TX/ - Form 10-Q

at a rate of 1.65% which matured during 2003. In addition, at March, 31, 2003, the Corporation had \$2,300,000 borrowed under a match funding agreement with the FHLB at a rate of 4.41% which matured in June 2003. At December 31, 2003, \$50.0 million of borrowings were outstanding at a rate of 1.52%, \$45.0 million of which matures during 2004 and \$5.0 million of which matures in April 2005. For the year ended December 31, 2003, the Corporation had average borrowings of \$30.5 million.

12

NOTE 8 Notes Payable

On September 15, 2003, the Corporation obtained lines of credit from a bank under which the Corporation may borrow \$11,000,000 at prime rate. The lines of credit are secured by stock of the Bank and mature on September 15, 2004, whereupon, if balances are outstanding, the lines convert to term notes having five year terms. The Corporation will not pay a fee for any unused portion of the lines. As of March 31, 2004, no funds had been borrowed under these lines nor were any borrowings outstanding.

NOTE 11 - Related Party Transactions

The Bank has made transactions in the ordinary course of business with certain of its and the Corporation's officers, directors and their affiliates. All loans included in such transactions are made on substantially the same terms, including interest rate and collateral, as those prevailing at the time for comparable transactions with other persons and all loans are current as to principal and interest payments. Total loans outstanding to such parties amounted to approximately \$9,389,000 at December 31, 2003.

NOTE 12 - Commitments and Contingent Liabilities

In the normal course of business, there are various outstanding commitments and contingent liabilities, such as guarantees and commitments to extend credit, which are not reflected in the financial statements. No losses are anticipated as a result of these transactions. Commitments are most frequently extended for real estate, commercial and industrial loans.

At March 31, 2004, outstanding documentary and standby letters of credit totaled \$4,463,000 and commitments to extend credit totaled \$149,455,000.

In addition, the Corporation leases certain office facilities under operating leases. Rent expense for all operating leases totaled \$246,000 and \$148,000 for the three months ended March 31, 2004 and 2003, respectively, and \$981,000 for the year ended December 31, 2003. There have been no material changes in the future minimum lease payments payable by the Corporation since December 31, 2003. See the 2003 Report on Form 10-K for information regarding these commitments.

14

NOTE 13 - Stock Option Plans

The Corporation has two Incentive Stock Option Plans, the 1993 Plan and the 1997 Plan, (each, a Plan, and, collectively, the Plans). Each Plan has reserved 600,000 shares (adjusted for two-for-one stock splits in 1995 and 1997) of common stock for grants thereunder. The Plans provide for the granting to executive management and other key employees of the Corporation and its subsidiary incentive stock options, as defined under the current tax law. The options under the Plans will be exercisable for ten years from the date of grant and generally vest ratably over a five year period. Options will be and have been granted at prices which will not be less than 100-110% of the fair market value of the underlying common stock at the date of grant.

The following is a summary of transactions during the periods presented:

	Shares Under Option	
	Three Months Ended March 31, 2004	Year Ended December 31, 2003
Outstanding, Beginning of Period	379,659	418,934

	<u> </u>	<u> </u>

Options outstanding at March 31, 2004 ranged in price from \$4.50 to \$31.76 per share with a weighted average exercise price of \$13.89 and 305,749 shares exercisable. At March 31, 2004, there remained 321,250 shares reserved for future grants of options under the 1997 Plan.

Edgar Filing: SUMMIT BANCSHARES INC /TX/ - Form 10-Q

The Corporation accounts for the Plans under the recognition and measurement principles of Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees, under which no compensation cost has been recognized for options granted. The following table illustrates the effect on net income and earnings per share if the Corporation had applied the fair value recognition provisions of Financial Accounting Standards Board (FASB) Statement No. 123, Accounting for Stock-Based Compensation, to stock-based compensation.

NOTE 14 - Employee Benefit Plans

401(k) Plan

The Corporation implemented a 401(k) plan in December 1997 covering substantially all employees. The Corporation made no contribution to this plan in 1998 or 1999. In 2000 through 2003, the Corporation made matching contributions, not to exceed 6% of the employee's annual compensation, to the participant's deferrals of compensation up to 100% of the employee contributions.

The amount expensed in support of the plan was \$111,000 and \$105,000 during the first three months of 2004 and 2003, respectively, and \$411,000 for the year 2003.

Supplemental Executive Retirement Plan

In 2002, the Corporation established a Supplemental Executive Retirement Plan (the Retirement Plan) to provide key employees with retirement, death or disability benefits. For currently employed employees, the Retirement Plan replaces the previous Management Security Plan. The current Retirement Plan is a defined contribution plan. The expense charged to earnings for such future obligations was \$44,000 and \$49,000 for the first three months of 2004 and 2003, respectively, and \$202,000 for the year 2003.

15

NOTE 14 - Employee Benefit Plans (cont. d.)

Employment Contracts

The Chief Executive Officer of the Corporation has entered into a severance agreement providing for salary and fringe benefits in the event of termination for other than cause and under certain changes in control.

Other Post Retirement Benefits

The Corporation provides certain health care benefits for certain retired employees who bear all costs of these benefits. These benefits are covered under the Consolidated Omnibus Budget Reconciliation Act (COBRA).

NOTE 15 - Earnings per Share

The following data shows the amounts used in computing earnings per share and the weighted average number of shares of dilutive potential common stock (dollars in thousands):

	Three Months Ended March 31,		Year Ended December 31, 2003
	2004	2003	
Net income	\$ 2,451	\$ 2,433	\$ 9,768

Weighted number of common shares and dilutive potential common stock used in Diluted EPS	6,346,072	6,276,486	6,317,162

NOTE 16 - Financial Instruments with Off-Balance Sheet Risk

The Corporation is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include loan commitments, standby letters of credit and documentary letters of credit. The instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the financial statements.

The Corporation's exposure to credit loss in the event of non-performance by the other party of these loan commitments and standby letters of credit is represented by the contractual amount of those instruments. The Corporation uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments.

The total contractual amounts of financial instruments with off-balance sheet risk are as follows (in thousands):

	March 31,	
	2004	2003
Financial Instruments Whose Contract Amounts Represent Credit Risk:		
Loan Commitments Including Unfunded Lines of Credit	\$ 149,455	\$ 123,766
Standby Letters of Credit	4,463	9,720

Loan commitments are agreements to lend to a customer as long as there is no customer violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Standby letters of credit are conditional commitments by the Corporation to guarantee the performance of a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers.

Since many of the loan commitments and letters of credit may expire without being drawn upon, the total commitment amount does not necessarily represent future cash requirements. The Corporation evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Corporation upon extension of credit, is based on management's credit evaluation of the counterparty. Collateral held varies but may include accounts receivable, inventory, property, plant and equipment, owner-occupied real estate and income-producing commercial properties.

NOTE 17 - Concentrations of Credit Risk

The Bank makes commercial, consumer and real estate loans in its direct market which is defined as Fort Worth and its surrounding area. The Board of Directors of the Bank monitors concentrations of credit by purpose, collateral and industry at least quarterly. Certain limitations for concentration are set by the Board of Directors of the Bank. Additional loans in excess of these limits must have prior approval of the bank's directors' loan committee. Although the Bank has a diversified loan portfolio, a substantial portion of its debtors' abilities to honor their contracts is dependent upon the strength of the local and state economy.

NOTE 18 - Litigation

The Corporation is involved in legal actions arising in the ordinary course of business. It is the opinion of management, after reviewing such actions with outside legal counsel, that the settlement of these matters will not materially affect the Corporation's financial position.

NOTE 19 - Stock Repurchase Plan

On April 20, 2004, the Board of Directors of the Corporation approved a stock repurchase plan. The plan authorized management to purchase up to 307,680 shares of the Corporation's common stock over the next twelve months through the open market or in privately negotiated transactions in accordance with all applicable state and federal laws and regulations.

In the three months ended March 31, 2004, no shares were purchased by the Corporation through a similar repurchase plan through the open market.

NOTE 20 - Subsequent Events

On April 20, 2004, the Board of Directors of the Corporation approved a quarterly dividend of \$.14 per share to be paid on May 14, 2004 to shareholders of record on May 3, 2004.

The Corporation signed a definitive agreement on February 5, 2004 to acquire ANB Financial Corporation, the parent company of Arlington National Bank. This acquisition allows the Corporation to expand its presence into the Arlington, Texas market in Tarrant County. The Corporation will assume approximately \$55 million in loans and \$80 million in deposits from ANB Financial Corporation. Completion of the acquisition is expected to occur April 30, 2004 with an effective date of May 1, 2004, following regulatory approval, at which time the four Arlington locations will become branches of Summit Bank, N.A.

The Corporation on May 3, 2004, will establish Summit Bancshares, Inc. Statutory Trust I (the Issuer Trust) as a wholly owned subsidiary of Summit Bancshares, Inc. The Issuer Trust will offer \$12,000,000 of Floating Rate (three-month LIBOR plus a margin of 2.65 percent) Capital Securities (the Capital Securities), which represent beneficial interests in the assets of the Issuer Trust. The Capital Securities will be offered and sold to qualified institutional buyers (as defined in Rule 144A under the Securities Act of 1933, as amended). The proceeds from the sale of the Capital Securities will be used to fund a portion of the cash consideration for the acquisition of ANB Financial Corporation discussed in the previous paragraph.

NOTE 21 - Fair Values of Financial Instruments

The following methods and assumptions were used by the Corporation in estimating its fair value disclosures for financial instruments:

Cash and cash equivalents: The carrying amounts reported in the balance sheet for cash and due from banks and federal funds sold approximate those assets' fair values.

Investment securities (including mortgage backed securities): Fair values for investment securities are based on quoted market prices, where available. If quoted market prices are not available, fair values are based on quoted market prices of comparable instruments.

Loans: For variable rate loans, fair values are based on carrying values. The fair values for fixed rate loans such as mortgage loans (e.g., one-to-four family residential) and installment loans are estimated using discounted cash flow analysis. The carrying amount of accrued interest receivable approximates its fair value.

Deposit liabilities: The fair value disclosed for interest-bearing and noninterest-bearing demand deposits, passbook savings, and certain types of money market accounts are, by definition, equal to the amount payable on demand at the reporting date or their carrying amounts. Fair values for fixed rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered on certificates to a schedule of aggregated expected monthly maturities on time deposits.

Short term borrowings: The carrying amounts of borrowings under repurchase agreements approximate their fair values.

NOTE 21 - Fair Values of Financial Instruments (cont'd.)

Item 2 - Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with the consolidated financial statements, accompanying notes and selected financial data appearing elsewhere in this Quarterly Report on Form 10-Q and in our Annual Report on Form 10-K and may contain certain forward-looking statements that are based on current management expectations. Generally, verbs in the future tense and the words believe, expect, anticipate, estimate, intends, opinion, potential and similar expressions identify forward-looking statements. Examples of this forward-looking information can be found in, but are not limited to, the expected effects of accounting pronouncements and government regulation applicable to our operations, the discussion of allowance for loan losses, subsequent events and quantitative and qualitative disclosure about market risk. Our actual results could differ materially from those management expectations. Further information concerning our business, including additional risk factors and uncertainties that could cause actual results to differ materially from the forward-looking statements contained in this Quarterly Report on Form 10-Q, are set forth below under the heading Factors That May Affect Future Results. These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. The forward-looking statements contained herein speak only as of the date of this Quarterly Report on Form 10-Q and, except as may be required by applicable law and regulation, we do not undertake, and specifically disclaim any obligation to, publicly update or revise

Edgar Filing: SUMMIT BANCSHARES INC /TX/ - Form 10-Q

such statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events. Except as the context otherwise requires, references herein to the Corporation, we, or our refer to the business of Summit Bancshares, Inc. and its consolidated subsidiaries.

Overview

Our business has been conducted primarily through our wholly-owned subsidiaries, Summit Bank, National Association, (the Bank), Summit Delaware Financial Corporation and SIA Insurance Agency, Inc. (SIA). The Bank currently operates its branch offices in seven locations in Fort Worth.

Our results of operations are primarily dependent on net interest income, which is the difference between the income earned on our loan and investment portfolios and our cost of funds, consisting of the interest paid on deposits and borrowings. Results of operations are also affected by our allowance for loan losses, investment activities, loan servicing fees and other fees. Our non-interest expense principally consists of compensation and benefits, occupancy and equipment expense, advertising costs, data processing expense and other expenses.

Net income for the first quarter of 2004 was \$2,451,000, an increase of \$18,000, or 0.7%, compared with \$2,433,000 recorded for the first quarter of 2003. On a weighted average share basis, net income for the first quarter of 2004 remained constant at \$0.39 per diluted share as compared to the same period from the prior year. The increase in earnings during the first quarter of 2004 was primarily due to an increase in net interest income of \$848,000 over the first quarter of 2003. The increase in net interest income was primarily due to growth in average loans of 6.7% from the fourth quarter of 2003 and 20.5% compared to the first quarter of 2003, which more than offset the impact of the low interest rate environment and a lower net interest margin as compared to the first quarter of 2003. The increase in non-interest expenses during the first quarter of 2004 compared to the first quarter of 2003 was primarily attributable to expansion initiatives and enhanced infrastructure.

Based in part on an improving economy in our market area and our hiring of additional commercial lending personnel, total loans at March 31, 2004 were \$593.3 million, which represented an increase of \$39.5 million, or 7.1%, over total loans at December 31, 2003 and an increase of \$103.9 million, or 21.2%, over total loans at March 31, 2003. We do not expect to see loan growth rates from quarter to quarter to be as high as they have the past two quarters but do expect double digit loan growth for the full year of 2004. Total deposits at March 31, 2004 of \$656.4 million increased \$15.0 million, or 2.3% from December 31, 2003 and increased \$69.5 million, or 11.8%, from \$586.9 million at March 31, 2003. Growth was experienced in every category of deposits with the largest growth coming in demand deposits and savings deposits which increased \$21.0 million and \$20.0 million, respectively. Shareholders' equity was \$71.6 million at March 31, 2004, which represented an increase of \$2.9 million, or 4.2%, compared to December 31, 2003 and an increase of \$5.0 million, or 7.5%, from March 31, 2003.

The following table shows selected performance ratios for the first quarters of 2004 and 2003 that management believes to be key indicators of our performance:

	First Quarter	
	2004	2003
Annualized Return on Average Assets (ROAA)	1.22%	1.43%
Annualized Return on Average Shareholders' Equity (ROAE)	14.06	14.89
Shareholders' Equity to Assets - Average	8.68	9.62
Dividend Payout Ratio	35.09	30.46
Net Interest Margin (tax equivalent)	4.36	4.67
Efficiency Ratio	55.94	54.41

The return on average assets ratio is calculated by dividing net income by average total assets for the period. Management believes our return on average assets ratio of 1.22% for the first quarter of 2004 compares favorably to the return on average assets ratio of other financial institutions in our peer group, which was 1.25% in the first quarter of 2004. Our peer group is comprised of other publicly traded bank holding companies headquartered in Texas and was selected by our management.

The return on average shareholders' equity ratio is calculated by dividing net income by average shareholders' equity for the period. Management believes our return on average shareholders' equity ratio of 14.06% in the first quarter of 2004 compares favorably to the return on average shareholders' equity ratio of other financial institutions in our peer group, which was 13.66% in the first quarter of 2004.

The shareholders' equity to assets ratio is calculated by dividing average shareholders' equity by average total assets for the period. Management believes our average shareholders' equity to average assets ratio of 8.68% in the first quarter of 2004 compares favorably to the

Edgar Filing: SUMMIT BANCSHARES INC /TX/ - Form 10-Q

average shareholders' equity to average asset ratio of other financial institutions in our peer group, which was 9.18% in the first quarter of 2004.

The dividend payout ratio is determined by dividing the total dividends paid by net income for the period. Our dividend payout ratio results in a yield-to-market price return equal to or greater than our peer group.

Net interest margin is calculated by dividing net interest income on a tax equivalent basis by average total earning assets. Management believes our net interest margin of 4.36% in the first quarter of 2004 compares favorably to the net interest margin ratio of other financial institutions in our peer group, which was 4.05% in the first quarter of 2004.

The efficiency ratio is calculated by dividing non-interest expenses by the sum of total non-interest income and net interest income for the period. The efficiency ratio provides a measure of the extent to which our revenues are absorbed by our non-interest expenses. Management believes our efficiency ratio of 55.94% in the first quarter of 2004 compares favorably to the average efficiency ratio of other financial institutions in our peer group, which was 60.50% in the first quarter of 2004.

(1) Loan interest income includes fees and loan volumes include loans on non-accrual. The loan fees include loan origination fees which are considered adjustments to interest income. These fees aggregated \$334,000 and \$262,000 at March 31, 2004 and 2003, respectively, and \$1,248,000 for the year ended December 31, 2003. Related loan origination costs are not separately allocated to loans, but are charged to non-interest expense. For the purpose of calculating loan yields, average loan balances include non-accrual loans with no related interest income.

(2) Presented on tax equivalent basis (T/E) using a federal income tax rate of 34% both years.

The net interest margin was 4.36% for the first quarter of 2004, which represented a decrease of 31 basis points from the first quarter of 2003. This decrease in net interest margin reflected a 45 basis point decrease in yield on earning assets from the first quarter of 2003 to the first quarter of 2004, which was partially offset by a 21 basis point decrease in rates paid on interest-bearing liabilities from the first quarter of 2003 to the first quarter of 2004. The decrease in net interest margin also reflected less earned income from our investment in earning assets of our non-interest fundings, demand deposits and shareholders equity, in the first quarter of 2004 compared to the first quarter of 2003 due to the lower interest rate environment during the first quarter of 2004.

In the event that our average loans continue to grow during 2004 and we are unable to fund any such growth solely through the generation of additional deposits, we may be required to obtain funding from secondary sources, such as the Federal Home Loan Bank, which could have a negative impact on our net interest margin. Therefore, we may experience a slightly lower net interest

21

margin during the second quarter of 2004 as a result of any such borrowings and as our investment portfolio and maturing fixed rate loans reprice at lower rates. Because of the composition of our balance sheet and our emphasis on commercial lending, we are market interest rate sensitive and expect to benefit from any market interest rate increases.

Net Interest Income

Net interest income (tax equivalent) for the first quarter of 2004 was \$8,319,000, which represented an increase of \$850,000, or 11.4%, compared to the first quarter of 2003. In the first quarter of 2004, tax equivalent interest income increased \$949,000, or 10.2%, while interest expense increased \$99,000, or 5.5%, compared to the first quarter of 2003. The net increase in net interest income resulted from a 18.4% growth in average earning assets for the first quarter of 2004 compared to the first quarter of 2003, which offset a 25 basis point decrease in market interest rates (as measured by average market rates published in the *Wall Street Journal*) from the first of January 2003 through March 2004.

The table below analyzes the increase in net interest income on a fully tax equivalent basis for the three month periods ended March 31, 2004 and 2003. Non-accruing loans have been included in assets for these computations, thereby reducing yields on total loans. The changes in interest due to both rate and volume in the rate/volume analysis table below have been allocated to volume or rate change in proportion to the absolute amounts of the change in each.

Non-Interest Income

The major component of non-interest income is service charges on deposits. Other service fees are the majority of other non-interest income. The following table reflects the changes in non-interest income during the periods presented (dollars in thousands):

	Three Months Ended March 31,		
	2004	2003	% Change
Service Charges on Deposit Accounts	\$ 906	\$ 758	19.5%
Non-recurring Income	167	-0-	100.0
Other Non-interest Income	494	590	(16.3)
Total Non-interest Income	\$ 1,567	\$ 1,348	16.2%

The decrease in other non-interest income in the first quarter of 2004 is primarily due to decreases in mortgage brokerage/origination fees, letter of credit fees and exchange fees. Mortgage brokerage fees declined due to a slowdown in mortgage re-financings compared to the previous year. The non-recurring income in the first quarter of 2004 represented the gain on sale of assets previously held in other assets.

Non-interest Expense

Non-interest expenses include all expenses other than interest expense, the provision for loan losses and income tax expense. The following table summarizes the changes in non-interest expense during the periods presented (dollars in thousands):

**Three Months Ended
March 31,**

	2004	2003	% Change

Total Other Expenses	1,229	1,185	3.7
Total Non-interest Expense	\$ 5,530	\$ 4,797	15.3%

Total non-interest expense increased 15.3% in the first quarter of 2004 over 2003, reflecting increases in salaries and benefits, occupancy and equipment and business development expenses, which were offset partially by a decline in item processing expenses. As a percent of average assets, non-interest expenses were 2.75% in the first quarter of 2004 (annualized) and 2.83% in the same period of 2003.

The increase in salaries and employee benefit expenses for the first quarter of 2004 was due to salary merit increases, the opening of a new branch location during the second quarter of 2003 and several additions during the latter half of 2003 to the lending staff.

The increase in occupancy and equipment expense for the first three months of 2004 was due to the opening of the new branch mentioned above and the relocation and centralization of the administrative, credit and data processing departments into a new facility which was leased beginning in May 2003.

The increase in business development expenses during the first quarter of 2004 was related to the growth in loans and new business relationships.

The decline in item processing expenses during the first quarter of 2004 was achieved due to the Corporation's chief technology officer renegotiating terms of the data processing contract with the Corporation's outside processing company.

Allowance for Loan Losses and Non-Performing Assets

Our allowance for loan losses was \$8,320,000, or 1.40% of total loans, as of March 31, 2004 compared to \$7,365,000, or 1.50% of total loans, as of March 31, 2003. For the three months ended March 31, 2004 and 2003, net charge-offs (recoveries) were .01% and (.07)% of loans, respectively, not annualized.

Transactions in the provision for loan losses are summarized as follows (in thousands):

At March 31, 2004 the ratio of non-accrual loans to total loans were .41% and non-performing assets represented .41% of loans and other real estate owned/foreclosed assets at the same date.

As of March 31, 2004, non-accrual loans were comprised of \$1,836,000 in commercial loans, \$351,000 in real estate mortgage loans, \$65,000 in interim construction loans and \$153,000 in consumer loans.

As of March 31, 2004, there was no other real estate owned. However, the Corporation has \$7,000 in Other Foreclosed Assets which represents two motor vehicles. These assets are in process of liquidation. The cost of liquidation will be recorded as a current period expense.

The following table summarizes the relationship between non-performing loans, criticized loans and the allowance for loan losses (dollars in thousands):

	March 31 2004,	December 31, 2003	September 30, 2003	June 30, 2003	March 31 2003,
Non-Performing Loans	\$ 2,405	\$ 2,351	\$ 1,514	\$ 1,458	\$ 2,226
Criticized Loans	26,888	27,737	31,933	26,917	23,061
Allowance for Loan Losses	8,320	7,784	7,483	7,412	7,365
Allowance for Loan Losses as a Percent of:					
Non-Performing Loans	346%	331%	494%	508%	331%
Criticized Loans	31%	28%	23%	28%	32%

Loans are graded on a system similar to that used by the banking industry regulators. The first level of criticized loans is Other Assets Especially Mentioned (OAEM). These loans are fundamentally sound but have potential weaknesses which may, if not corrected, weaken the asset or inadequately protect the bank's credit position at some future date. The second level is Substandard, which are loans inadequately protected by current sound net worth, paying capacity or pledged collateral of the borrower. The last level of criticized loans, before they are charged-off, is Doubtful. Doubtful loans are considered to have inherent weaknesses because collection or liquidation in full is highly questionable. In addition to the above grading system, the Corporation maintains a separate watch list which further aids the Corporation in monitoring loan quality. Watch list loans show warning elements where the present status portrays one or more deficiencies that require attention in the short run or where pertinent ratios of the account have weakened to a point where more frequent monitoring is warranted.

Criticized loans, loans classified as OAEM, Substandard or Doubtful as noted above, have increased in the past year. A significant portion of this increase is due to enhanced classification procedures and the employment of a Chief Credit Officer in the third quarter of 2001 who is responsible for monitoring loan quality by ensuring that the quality is sustained, that individual loans perform as agreed and that the Bank receives an appropriate return for the risk in the portfolio. The Corporation remains diligent in its efforts to identify any loan that might reflect weakness of the borrower as soon as possible. Management is not aware of any potential loan problems that have not been disclosed, to which serious doubt exist as to the ability of the borrower to substantially comply with the present repayment terms.

Interest Rate Sensitivity

Interest rate sensitivity is the relationship between changes in market interest rates and net interest income due to the repricing characteristics of assets and liabilities.

The following table, commonly referred to as a static GAP report, indicates the interest rate sensitivity position at March 31, 2004 and may not be reflective of positions in subsequent periods (dollars in thousands):

Periodic Gap to Total Assets	(9.04)%	1.21%	0.86%			
Cumulative Gap to Total Assets	(9.04)%	(7.83)%	(6.97)%			

The preceding static GAP report reflects a cumulative liability sensitive position during the one year horizon. An inherent weakness of this report is that it ignores the relative volatility any one category may have in relation to other categories or market rates in general. For instance, the rate paid on NOW accounts typically moves slower than the three month T-Bill. Management attempts to capture this relative volatility by utilizing a simulation model with a beta factor adjustment which estimates the volatility of rate sensitive assets and/or liabilities in relation to other market rates.

25

Beta factors are an estimation of the long term, multiple interest rate environment relation between an individual account and market rates in general. For instance, NOW, savings and money market accounts, which are repricable within 30 days, will have considerably lower beta factors than variable rate loans and most investment categories. Taking this into consideration, it is quite possible for a bank with a negative cumulative GAP to total asset ratio to have a positive beta adjusted GAP risk position. As a result of applying the beta factors established by management to the earning assets and interest bearing liabilities in the static gap report via a simulation model, the negative cumulative GAP to total assets ratio at one year of (6.97%) was reversed to a positive 22.23% beta adjusted GAP position. Management feels that the beta adjusted GAP risk technique more accurately reflects the Corporation's GAP position.

Capital

At March 31, 2004, shareholders' equity totaled \$71.6 million, an increase of \$2.9 million, or 4.2%, compared to December 31, 2003, and an increase of \$5.0 million, or 7.5%, compared to March 31, 2003. This increase reflected an increase in retained earnings and the impact of the retirement of treasury stock. During the first quarter of 2004, we repurchased no shares of Common Stock. Our ability to repurchase shares of Common Stock is subject to various banking laws, regulations and policies as well as rules and regulations of the Securities and Exchange Commission. Our board of directors has authorized the repurchase of up to 5% of our outstanding Common Stock.

We and the Bank are subject to capital adequacy guidelines established by the Federal Reserve Board and other regulatory authorities. The table below illustrates the Bank's and our compliance with the capital adequacy guidelines as of March 31, 2004 and 2003 (dollars in thousands):

	March 31, 2004		March 31, 2003	
	The Consolidated Corporation	Summit Bank, N.A.	The Consolidated Corporation	Summit Bank, N.A.

Total Capital	12.26	12.13	13.34	13.10

As of March 31, 2004, we and the Bank exceeded our risk-based capital and leverage requirements set by regulatory authorities and satisfied the criteria for classification as a well capitalized institution under the rules of the Federal Deposit Insurance Corporation Improvement Act of 1991.

Liquidity

Our primary internal sources of liquidity consist of the federal funds that we sell and our portfolio of marketable investment securities, particularly those with shorter maturities. Federal funds sold and investment securities maturing within 30 days represented \$41.7 million, or 4.9%, of total assets as of March 31, 2004. Additionally, our ability to sell loan participations, purchase federal funds and obtain advances from the Federal Home Loan Bank serve as secondary sources of liquidity. The Bank has approved federal funds lines at other banks.

Our liquidity is enhanced by the fact that 89.9% our total deposits at March 31, 2004 were core deposits. For this purpose, core deposits are defined as total deposits less public funds and certificates of deposit greater than \$100,000. Our loan to deposit ratio averaged 90.6% for the three month period ended March 31, 2004.

In the event that our average loans continue to grow during 2004 and we are unable to fund any such growth solely through the generation of additional deposits, we may be required to obtain funding from secondary sources, including purchasing federal funds, obtaining advances from the Federal Home Loan Bank or other secondary sources. In such event, our business, results of operations and financial condition could be negatively impacted.

Our income, which provides funds for the payment of dividends to our shareholders and for other corporate purposes, is derived from our investment in the Bank.

Subsequent Events

On April 20, 2004, the Board of Directors of the Corporation approved a quarterly dividend of \$.14 per share to be paid on May 14, 2004 to shareholders of record on May 3, 2004.

The Corporation signed a definitive agreement on February 5, 2004 to acquire ANB Financial Corporation, the parent company of Arlington National Bank. This acquisition allows the Corporation to expand its presence into the Arlington, Texas market in Tarrant County. The Corporation will assume approximately \$55 million in loans and \$80 million in deposits from ANB Financial Corporation. Completion of the acquisition is expected to occur April 30, 2004 with an effective date of May 1, 2004, following regulatory approval, at which time the four Arlington locations will become branches of Summit Bank, N.A.

The Corporation on May 3, 2004, will establish Summit Bancshares, Inc. Statutory Trust I (the Issuer Trust) as a wholly owned subsidiary of Summit Bancshares, Inc. The Issuer Trust will offer \$12,000,000 of Floating Rate (three-month LIBOR plus a margin of 2.65 percent) Capital Securities (the Capital Securities), which represent beneficial interests in the assets of the Issuer Trust. The Capital Securities will be offered and sold to qualified institutional buyers (as defined in Rule 144A under the Securities Act of 1933, as amended). The proceeds from the sale of the Capital Securities will be used to fund a portion of the cash consideration for the acquisition of ANB Financial Corporation discussed in the previous paragraph.

Critical Accounting Policies

Our accounting policies are fundamental to understanding management's discussion and analysis of results of operations and financial condition. We have identified our policy with respect to allowance for loan losses as critical because it requires management to make particularly difficult, subjective or complex judgments about matters that are inherently uncertain and because of the likelihood that materially different amounts would be reported under different conditions or using different assumptions. There have been no material changes in our application of accounting policies since December 31, 2003. We, in consultation with our Audit Committee of the Board of Directors, have reviewed and approved this critical accounting policy, which is further described under the captions Loan and Allowance for Loan Losses in Note 1 (Summary of Significant Accounting Policies) to the Financial Statements.

These evaluations are inherently subjective because, even though they are based on objective data, it is management's interpretation of that data that determines the amount of the appropriate allowance. Therefore, from time to time (but at least quarterly), management reviews the actual performance and write-off history of the loan portfolio and compares that to previously determined allowance coverage percentages. In this

manner, management evaluates the impact the previously mentioned variables may have had on the loan portfolio to determine which changes, if any, should be made to the assumptions and analyses. Recent analysis has indicated that projections of estimated losses inherent in the loan portfolio has approximated actual write-off experience during the current economic environment.

Actual results could differ materially from estimates as a result of changes in economic or market conditions and other factors. Changes in our evaluations and the assumptions underlying these evaluations could result in a material change in the allowance. While we believe that the allowance for loan losses has been established and maintained at levels adequate to reflect the risks inherent in the loan portfolio, future increases may be necessary if economic or market conditions and other factors differ substantially from the conditions that existed at the time of the initial determination.

Factors That May Affect Future Results

This Quarterly Report on Form 10-Q contains forward-looking statements concerning the business, results of operations and financial condition of us and our subsidiaries. The forward-looking statements are based upon management's current expectations and assumptions about future events. Such expectations and assumptions have been expressed in good faith, and management believes that there is a reasonable basis for them.

A number of risks and uncertainties could cause our actual results to differ materially from the forward-looking statements contained in this Quarterly Report on Form 10-Q. These risks and uncertainties include, without limitation:

Changes in, or the effects of, competition for our products and services;

Our ability to effectively manage interest rate risk and other market, credit and operation risks;

Our ability to develop competitive new products and services in a timely manner and the acceptance of such products and services by our customers and potential customers;

The costs and effects of litigation involving us and of unexpected or adverse outcomes in such litigation;

Our ability to successfully integrate, and to achieve anticipated cost savings and revenue enhancements with respect to, acquired businesses and operations;

Our ability to attract and retain key employees;

Changes in general local, regional and international economic conditions;

27

Changes in, or the effects of, trade, monetary and fiscal policies, laws and regulations, including interest rate policies, of the Federal Reserve Board and other regulatory authorities;

Changes in consumer and business spending, borrowing and saving habits;

Changes in laws, regulations and policies applicable to us; and

Political instability and acts of war or terrorism.

Item 3 Quantitative and Qualitative Disclosure about Market Risk

There have been no material changes in market risks faced by the Corporation since December 31, 2003. For more information regarding quantitative and qualitative disclosures about market risk, please refer to the Corporation's Annual Report on Form 10-K as of and for the year ended December 31, 2003, and in particular, Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations Interest Rate Sensitivity and Liquidity.

Item 4 Controls and Procedures

The Corporation's management, including the Corporation's principal executive officer and principal financial officer, has evaluated the effectiveness of the Corporation's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) as of the end of the Corporation's fiscal quarter ended March 31, 2004. Based on that evaluation, the Corporation's principal

executive officer and principal financial officer have concluded that the Corporation's disclosure controls and procedures were effective as of the end of the Corporation's fiscal quarter ended March 31, 2004.

There were no changes in the Corporation's internal control over financial reporting that occurred during the Corporation's fiscal quarter ended March 31, 2004 that have materially affected, or are reasonably likely to materially affect, the Corporation's internal control over financial reporting.
