Indicate by check mark whether the registrant files or will file annual reports  
under cover of Form 20-F or Form 40-F

Form 20-F  Form 40-F

Indicate by check mark whether the registrant by furnishing the information  
contained in this Form is also thereby furnishing the information to the  
Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes  No

If "Yes" is marked, indicate below the file number assigned to the registrant in  
connection with Rule 12g-32(b):82-\_\_\_\_\_

RESEARCH UPDATE

PHASE 3 STROKE TRIAL SHOWS THAT NOVOSEVEN(R) REDUCES BLEEDING IN THE BRAIN, BUT  
DOES NOT IMPROVE LONG-TERM CLINICAL OUTCOMES

Novo Nordisk today announced the initial results of a phase 3 clinical trial  
investigating NovoSeven(R) (recombinant activated factor VII) for the treatment  
of people suffering from bleeding in the brain, also known as intracerebral

## Edgar Filing: NOVO NORDISK A S - Form 6-K

haemorrhage, or ICH.

The trial showed that treatment with NovoSeven(R) significantly reduced intracerebral bleeding compared to placebo treatment. Improvement in clinical outcomes in terms of functional independence and neurological impairment was observed on day 15 after the bleeding, but mortality and severe disability was not improved at the end of the study period (day 90). With regard to safety, study results were in line with the established safety profile of NovoSeven(R).

As mortality and severe disability at day 90 was the primary endpoint of the study, Novo Nordisk has decided not to seek regulatory approval for NovoSeven(R) in ICH. Novo Nordisk's other research and development activities within the management of critical bleedings will continue as planned.

Lars Rebien Sorensen, president and chief executive officer of Novo Nordisk, said: "These results are disappointing, particularly given the encouraging results we saw in the phase 2 trial. We hoped that NovoSeven(R) could become a treatment for the people who suffer from ICH, and for whom no effective medical treatment exists."

The phase 3 trial in ICH involved 821 patients from 22 countries in a multi-centre, randomised, double-blind, placebo-controlled efficacy and safety study. People suffering from spontaneous ICH confirmed by a CT (Computed Tomography) scan were randomised to receive either NovoSeven(R) or placebo within four hours of symptom onset, in addition to conventional treatment.

Further details from the phase 3 trial results are expected to be communicated at the 59th Annual Meeting of the American Academy of Neurology held in Boston from 28 April to 5 May 2007, and at the European Stroke Congress in Glasgow from 29 May to 1 June 2007.

The results of the phase 3 trial do not change Novo Nordisk's expectations for the company's financial results for 2007, which were provided on 31 January in Novo Nordisk's financial statement for 2006.

Conference call

At 10.00 am CET today, corresponding to 4.00 am New York time, a conference call for investors will be held. Investors will be able to listen in via a link on [novonordisk.com](http://novonordisk.com), which can be found under 'Investors - Download centre'.

About NovoSeven(R)

Factor VIIa is a naturally occurring protein found in the blood. It plays a crucial role in the coagulation process. NovoSeven(R) (recombinant human coagulation factor VIIa) has been developed by Novo Nordisk. It is licensed for the treatment of bleeding episodes and for the prevention of bleeding during surgery or invasive procedures in patients with congenital haemophilia with inhibitors to coagulation factors VIII or IX. It is also licensed for treatment of bleeding in patients with acquired haemophilia and congenital factor VII deficiency, two very rare but serious coagulation factor deficiencies. In Europe, NovoSeven(R) is furthermore licensed for treatment of bleeding in patients with Glanzmann's thrombasthenia with antibodies to GP IIb-IIIa and/or HLA, and with past or present refractoriness to platelet transfusions.

Novo Nordisk is a healthcare company and a world leader in diabetes care. The company has the broadest diabetes product portfolio in the industry, including the most advanced products within the area of insulin delivery systems. In addition, Novo Nordisk has a leading position within areas such as haemostasis management, growth hormone therapy and hormone replacement therapy. Novo Nordisk

## Edgar Filing: NOVO NORDISK A S - Form 6-K

manufactures and markets pharmaceutical products and services that make a significant difference to patients, the medical profession and society. With headquarters in Denmark, Novo Nordisk employs more than 23,600 employees in 79 countries, and markets its products in 179 countries. Novo Nordisk's B shares are listed on the stock exchanges in Copenhagen and London. Its ADRs are listed on the New York Stock Exchange under the symbol 'NVO'.
