IUSACELL ANNOUNCES

Mexico City, June 20, 2005 - Grupo Iusacell, S.A. de C.V., [BMV: CEL, NYSE: CEL], announced that this company does not have knowledge of some relevant event that has motivated the movement of its shares negotiated in the Mexican stock-market (BMV) today.

ABOUT IUSACELL

Grupo Iusacell, S.A. de C.V. (Iusacell, NYSE and BMV: CEL) is a wireless cellular and PCS service provider in Mexico encompassing a total of approximately 92 million POPs, representing approximately 90% of the country's total population. Independent of the negotiations towards the restructuring of its debt, Iusacell reinforces its commitment with customers, employees and suppliers and guarantees the highest quality standards in its daily operations offering more and better voice communication and data services through state-of-the-art technology, such as its new 3G network, throughout all of the regions in which it operate.

LEGAL DISCLAIMER

Grupo Iusacell, S.A. de C.V. quarterly reports and all other written materials may from time to time contain statements about expected future events and financial results that are forward-looking and subject to risks and uncertainties. For those statements, the Company claims the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995. Discussion of factors that may affect future results is contained in our filings with the Securities and Exchange Commission.

4

Report or other document is not a press release, is not required to be and has not been distributed to the registrant's security holders, and, if discussing a material event, has already been the subject of a Form 6-K submission or other Commission filing on EDGAR.

Indicate by check mark whether by furnishing the information contained in this Form, the registrant is also thereby furnishing the information to the Commission pursuant to rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes No

If "Yes" is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b) 82 ---_____

Dawn Moss, Corporate Secretary

NEWS RELEASE

ELD No. 04-13

TSX: ELD AMEX: EGO

October 28, 2004

THIRD QUARTER 2004 FINANCIAL RESULTS

(all figures in thousands of United States dollars unless otherwise indicated)

SIGNATURE

Vancouver, BC - Paul N. Wright, President and Chief Executive Officer of Eldorado Gold Corporation (Eldorado , the Company , or we) is pleased to report the Company s Unaudited Third Quarter 2004 Financial Results.

Highlights

- Eldorado announces CDN \$67,500 bought deal of common shares
- Construction Permit issued by Director of Public Works, Usak for Kisladag Gold Project (Kisladag Project)
- Hatch Engineering have been awarded the contract to carry out the engineering and procurement of the crushing, screening and conveying system and overall site services
- Merit Consultants have been retained to provide construction management service to the total project including infrastructure projects already underway
- Road construction, water well drilling and electrical power line construction are underway at the Kisladag Project
- Company is debt free and production remains unhedged
- \$82,600 cash balance
- Exploration drill targets defined for 2004 -2005 program

Financial Results

The Company continues to be in a strong financial position. As at September 30, 2004 it had \$82,600 in cash and short-term deposits. Cash is available to fund the \$63,000 Kisladag Project and carry out planned exploration. The Company is debt free and production remains unhedged. Eldorado s consolidated cash from operations for Q3 2004 was (\$156) compared to \$1,815 in Q3 2003. The negative cash flow from operations in Q3 2004 is a direct result of lower gold sales and higher operating costs.

During Q3 2004 Eldorado sold 21,732 ounces of gold at an average realized price of \$400/oz. compared to the sale of 24,850 ounces of gold at an average realized price of \$358/oz. in Q3 2003. For the nine month period ended September 30, 2004 gold

sales were 61,949 ounces at an average realized price of \$402/oz. compared to the first nine months of 2003 of gold sales of 73,072 ounces at an average realized price of \$353/oz. Gold sales revenue for Q3 2004 of \$8,702 decreased compared to Q3 2003 of \$9,449. The decrease in gold sales revenues is a result of lower gold production in the quarter resulting from the Shaft Deepening Project (Shaft Deepening) at the São Bento Mine (São Bento) and the presence of a metabasite intrusive that intersects the orebody in the area scheduled for mining.

Eldorado reports a net loss of \$1,343 for Q3 2004 compared to a net loss of \$1,631 for Q3 2003. The net loss reported for Q3 2004 results primarily from lower sales volumes and higher operating costs per ounce.

On October 27, 2004 the Company entered into a bought deal agreement to purchase 18,000,000 Common Shares of the Company at a price of CDN \$3.75 per Common Share for gross proceeds of CDN \$67,500 million. The Company has granted an option, to purchase up to an additional 2,700,000 Common Shares (CDN \$10,125,000), exercisable at the Offering Price for a period of 30 days from the Closing Date. The offering is expected to close on or about November 12, 2004. Net proceeds are to be used for exploration of the Company's properties in Turkey and Brazil, for property acquisitions and for general corporate purposes.

São Bento

In Q3 2004 São Bento produced 21,399 ounces of gold at a cash operating cost of \$295/oz. compared to 23,327 ounces at a cash operating cost of \$245/oz. in Q3 2003. Gold production for the nine month period ended September 30, 2004 was 60,564 ounces at a cash operating cost of \$291/oz. compared to 71,930 ounces at a cash operating cost of \$231 /oz. in 2003.

Higher cash costs per ounce in 2004 are driven by lower production levels. Production in Q3 2004 continued to be negatively impacted by the high level of waste handling, poor ground conditions and the presence of the metabasite intrusive that intersects the orebody in the area scheduled for mining. The intrusive has also altered the local mineralogy of the ore, which is causing higher oxygen and cyanide consumption. Revised estimates of ore production are 85,000 ounces of gold produced at a cash cost of \$290/oz for 2004 improving to 94,000 ounces at \$265/oz. in 2005. The Company expects an improvement in mine performance once the shaft deepening is completed in the Q2 2005.

Kisladag Project

In 2004, the Company achieved two significant milestones at its Kisladag Project, acquiring all of the private lands required for development of the Kisladag Project and receipt of the Construction Permit by the Directorate of Public Works Usak. The Company had previously purchased all necessary Treasury Land and secured access to Forestry Land. Successful completion of the private land purchase and receipt of the Construction Permit enables the Company to remain on schedule to commence production late in 2005. Site activities are underway with road construction, contractors mobilizing to site, water well drilling and electrical powerline construction.

Kisladag will commence production at an annualized rate of 164,000 ounces for its first year increasing in year two to 240,000 oz. annually at a cash operating cost of \$165/oz. for a planned mine life of 14 years.

Efemçukuru Project

With Kisladag construction underway, the permitting and engineering expertise in the Company will be focused on delivering our Efemçukuru Project to a construction decision. Specifically, we intend to complete and submit the Environmental Impact Assessment Report to the Ministry of Environment and Forestry in Q4 2004.

Exploration

Eldorado is embarking on a period of aggressive exploration at its properties in Brazil and Turkey. In addition to the properties discussed below we have a pipeline of projects controlled by Eldorado that will be the subject of evaluation in 2005 and beyond.

In Brazil, drilling will begin in Q4 2004 at the Bonfim Project, testing the down plunge extension of the Bonfim Mine mineralization. Based on the interpretation of an induced polarization survey which defined specific targets, along with geologic mapping and sampling, we have designed a 2,000-meter drill program to be completed in Q4 2004. At the Cassipore project in Amapa State, an auger drilling program was begun in Q3, and results of this shallow drilling will be available mid Q4. Also in Amapa State, soil sampling and mapping continued at the Tartarugalzinho Project in Q3. Both Cassipore and Tartarugalzinho will be the subject of diamond drilling in 2005.

In Turkey, in the Western Pontide district, work was done on Toplak Tepe, Koyulhisar (KK and S zones) and the AT project. All of these projects were the subject of soil and rock chip sampling and geologic mapping. At Koyulhisar 2,700 meters of trenching will be completed in Q4 to define drill targets. An initial drill program of 6 reverse circulation holes will be completed in Q4 2004 at the AT project, following up on geochemical anomalies and pre-modern workings in a vein structure. In the joint venture area of western Turkey, work continued on the AS porphyry gold system, and in Q4 a road will be permitted for detailed mapping and sampling and to provide drill access.

In China we continue to work on reviewing the three operating mines and one development project identified from the review of China National Gold Corporation's (CNGC) gold assets. In addition to the CNGC assets identified by Eldorado, the Company has been actively evaluating a number of exploration, development, and mining properties brought to us by various third parties.

Corporate Developments

We are extremely pleased with our exploration progress and at Kisladag where we continue be encouraged with the ongoing support from the regulatory agencies and local communities , commented Paul Wright, President and Chief Executive Officer. With Kisladag construction underway, the permitting and engineering expertise in the Company will be focused on completing and submitting the Efemçukuru Project Environmental Impact Assessment Report to the Ministry of Environment and Forestry later this year.

Eldorado is a gold producing and exploration company with gold assets in Brazil and Turkey; two countries that we believe have substantial geological potential. With our international expertise in mining, finance and project development, together with highly skilled and dedicated staff, we believe that Eldorado is well positioned to experience continued growth and value as we create and pursue new opportunities.

Certain of the statements made may contain forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, which involve known and unknown risk, uncertainties and other factors which may cause the actual results, performance or achievements of the Company, or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Forward-looking statements are subject to a variety of risks and uncertainties, which could cause actual events, or results to differ from those reflected in the forward-looking statements. Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in forward looking statements. Specific reference is made to Narrative Description of the Business

Risk Factors in the Company's Annual Information Form. Forward-looking statements in this release include statements regarding the expectations and beliefs of management, the assumed long-term price of gold, the estimation of mineral reserves and resources, the realization of mineral reserve estimates, the potential of Eldorado's properties and expectations of growth. We do not expect to update forward-looking statements continually as conditions change and you are referred to the full discussion of the Company's business contained in the Company's reports filed with the securities regulatory authorities.

Eldorado Gold Corporation's shares trade on the Toronto Stock Exchange (TSX: ELD) and the American Stock Exchange (AMEX: EGO). The TSX has neither approved nor disapproved the form or content of this release.
