Ship Finance International Limited (NYSE: SFL) - Earnings Release

Reports preliminary 4Q 2015 results and quarterly dividend of \$0.45 per share

Hamilton, Bermuda, February 29, 2016. Ship Finance International Limited (“Ship Finance” or the “Company”) today announced its preliminary financial results for the quarter ended December 31, 2015.

Highlights

• Declaration of fourth quarter dividend of \$0.45 per share, our 48th consecutive dividend

• Charter backlog increased to \$4.4 billion

• \$20.6 million in profit share from Frontline in the quarter as a result of a strong tanker market

• Acquisition of two 18-20,000 TEU class container vessels with long term charters, adding \$460 million to the charter backlog

• Acquisition of two 114,000 dwt LR2 product tanker vessels with long term charters, adding \$113 million to the charter backlog

• Successful delivery of two 9,500 TEU container vessel in combination with charters to Maersk Line

• Sale of three older vessels, including two Suezmax tankers and an offshore support vessel subsequent to quarter end, a continuation of the Company’s strategy to renew and diversify its fleet

Selected key financial data:

Three Months Ended

	Dec 31, 2015	Sep 30, 2015
Charter revenues ⁽¹⁾	\$170m	\$167m
EBITDA ⁽²⁾	\$142m	\$136m
Net income	\$54m	\$45m
Earnings per share	\$0.58	\$0.49

Ole B. Hjertaker, CEO of Ship Finance Management AS, said in a comment: We are pleased to report a strong quarter with sequential growth in revenue, EBITDA and net income. Throughout the course of 2015, we further diversified our revenues across additional segments and counterparts and ended the year with an increased charter backlog of \$4.4 billion.

We have now declared our 48th consecutive dividend, and have been profitable every quarter since our inception, which is a unique combination in the shipping and offshore markets. Our business model has proven to be resilient and tested through most market cycles, and we have demonstrated our ability to navigate through market downturns while at the same time creating long term value and optionality, as illustrated by the effect of the new Frontline agreements in 2015.

Dividends and Results for the Quarter Ended December 31, 2015

The Board of Directors has declared a quarterly cash dividend of \$0.45 per share. The dividend will be paid on or about March 30, 2016 to shareholders on record as of March 16, 2016 and the ex-dividend date will be March 14, 2016. This is the 48th consecutive quarterly dividend declared by the Company.

1. Charter revenues include total charter hire from all vessels and rigs, including assets in 100% owned subsidiaries classified as ‘Investment in associates’ and profit share income.

2. EBITDA is a non- GAAP measure and includes assets in 100% owned subsidiaries classified as 'Investment in associates'. For more details please see Appendix 1.

The Company reported total U.S. GAAP operating revenues on a consolidated basis of \$113.9 million, or \$1.22 per share, in the fourth quarter of 2015. This number excludes \$8.9 million of revenues classified as 'repayment of investments in finance lease', and \$47.2 million of charter revenues earned by 100% owned assets classified as 'investment in associate'.

The 50% profit share agreement with Frontline had a positive contribution of \$20.6 million, or \$0.22 per share in the fourth quarter. There was also a \$0.4 million profit share in the fourth quarter relating to some of our dry bulk carriers. Reported net operating income pursuant to U.S. GAAP for the quarter was \$48.5 million, or \$0.52 per share, and reported net income was \$54.3 million, or \$0.58 per share. This is after impairment charges of approximately \$33.8 million, and non-recurring gains of approximately \$33.0 million in the quarter.

The impairments include a charge of \$13.2 million related to two offshore support vessels and approximately \$20.6 million related to marketable securities. These charges were offset by a gain on the sale of two older tanker vessels of \$4.1 million and a gain of \$28.9 million on the early redemption of notes issued by Frontline.

Business Update

As of December 31, 2015, and adjusted for subsequent sales, the fixed-rate charter backlog from the Company's fleet of 75 vessels and rigs was approximately \$4.4 billion, with an average remaining charter term of 5.4 years, or 9.1 years if weighted by charter revenue. Some of our charters include purchase options which, if exercised, may reduce the fixed charter backlog and average remaining charter term, but will increase the cash held on the Company's balance sheet.

In November, Ship Finance took delivery of the first of the three 9,300-9,500 TEU newbuilding container vessels, while the second vessel was delivered in February 2016. Both vessels commenced five year time charters immediately upon their respective deliveries, and the third vessel is expected in the second quarter of this year.

Each of the three vessels has been chartered to Maersk Line for a minimum period of five years, with options for the charterer to extend each charter by up to two years. The aggregate EBITDA contribution from these three vessels during the firm period of the charters is estimated to be more than \$32 million per year on average.

In November, the Company announced that it had agreed to acquire two 18-20,000 TEU class container vessels with expected delivery dates in late 2016 and early 2017. The vessels will be bareboat chartered out to a major container line for a period of 15 years from delivery, and lease financing has been secured for the full term of the charter. The aggregate EBITDA contribution from these two vessels is estimated to be \$31 million per year from delivery.

In December, Ship Finance entered into agreements for the construction of two 114,000 dwt LR2 product tankers at a shipyard in Korea, scheduled for delivery during the second half of 2017. Both vessels have been chartered out on long term time charters to a US based investment-grade energy company. The charter period will be a minimum of seven years with options to extend the charter period by up to two years. The aggregate EBITDA contribution from the vessels is estimated to be approximately \$11 million per year on average during the firm period of the charter.

In October, the Company sold and delivered the 1995-built Suezmax tanker Front Splendour to an unrelated third party. Ship Finance received net proceeds of approximately \$13 million after compensation to Frontline of \$1.3 million for the early termination of the charter. The Company recorded a gain of approximately \$2.4 million on the sale in the fourth quarter.

In November, the Company announced that it had agreed to sell an additional older Suezmax tanker, the 1998-built Mindanao, to an unrelated third party. The vessel was delivered to its new owner in December, and Ship Finance received net proceeds of approximately \$18 million after compensation to Frontline of approximately \$3.3 million for the early termination of the charter. The Company recorded a gain of \$1.7 million on the sale in the fourth quarter. Following the sale of the Mindanao, Ship Finance has 14 vessels on charter to Frontline, including 12 VLCCs and two Suezmax crude oil carriers.

In February 2016, the Company sold and delivered the 1999-built offshore support vessel Sea Bear to an unrelated third party and simultaneously agreed to terminate the corresponding charter party with a subsidiary of Deep Sea Supply. Ship Finance received total gross proceeds of approximately \$19.6 million in a combination of cash sales proceeds and amortizing notes from Deep Sea Supply, as compensation for the cancellation of the charter. The notes are senior unsecured with an interest rate of 7.25% and have a tenor of six years.

The Company recorded an impairment charge of approximately \$8.1 million in the fourth quarter of 2015 relating to the sale of Sea Bear. At the same time the Company also recorded an impairment charge of approximately \$5.2 million related to the 1998-built sister vessel Sea Leopard, which is on charter to a subsidiary of Deep Sea Supply BTG.

The crude oil tanker market remained strong into the fourth quarter, strengthening further towards the end of the period and into the first quarter of 2016. The market has since softened again from the peak, but remains at relatively firm levels. The profit share contribution from the vessels on charter to Frontline was \$20.6 million in the fourth quarter.

The Company also has exposure to the crude oil tanker market through two modern Suezmax tankers trading in a pool with two sister vessels owned by Frontline. Three of the vessels have been fixed on period charters for two years with a combination of fixed rate and profit split, effectively locking in a profitable base rate and still retaining optionality if the market strengthens further. In the fourth quarter, the average daily time charter equivalent revenues were approximately \$35,300 for each of these two vessels.

The Company has four drilling units on long term charters. The rigs generated approximately \$52 million in aggregate EBITDA in the fourth quarter of 2015. All the rigs are chartered out on bareboat charters whereby our customers are responsible for operating costs and maintenance. The drilling market has experienced a dramatic downturn linked to reduced activity levels following the drop in oil price. In light of this backdrop, it is important to note that the Company has focused on rapid reduction of financial leverage on its drilling rigs since they were acquired, and Ship Finance currently has a comfortable level of financing on these units.

In the fourth quarter, the Company received reduced charter payments on the jack-up drilling rig Soehanah, which is chartered to a subsidiary of the Indonesia-based drilling company Apexindo. The charter hire received and recorded in the quarter was approximately \$4.6 million, \$2.3 million lower than in the previous quarter. The reduced amount is due to a soft drilling market in the region, and Ship Finance is in a dialogue with this customer to find a longer-term solution. In the meantime the rig is active and currently on a short term sub-charter to an oil company.

Two 1,700 TEU feeder-size container vessels are chartered in the short term market, and the rates achieved in this market are marginally above operating expense levels. Six Handysize dry bulk carriers are chartered out on short term time charters, with a fixed base rate plus profit share. This profit share contributed approximately \$0.4 million in incremental earnings in the quarter. The Company intends to continue chartering out these vessels in the short term market until long term rates improve.

Ship Finance owns a number of other vessels, including offshore support vessels, container vessels, car carriers, chemical tankers and dry bulk carriers. The majority of our vessels and rigs are chartered out on long term, fixed rate contracts that provide the Company with stability in cash flow and earnings, despite fluctuations in the short term charter markets.

Financing and Capital Expenditure

As of December 31, 2015, Ship Finance had approximately \$398 million available liquidity, including approximately \$70 million in cash and approximately \$328 million available under revolving credit facilities.

In addition, the Company had marketable securities of approximately \$200 million, based on prevailing market prices at year end. This includes investments in senior secured bonds with a book value of approximately \$35.1 million, after a non-cash impairment charge of \$20.6 million in the fourth quarter. The Company also owns 11 million shares in Frontline, which, following the merger between Frontline and Frontline 2012, represents approximately 7% ownership in the merged entity. The secured bonds and the Frontline shares are recorded as 'Available for sale securities' on the balance sheet.

In December, Frontline redeemed \$113 million of senior unsecured loan notes held by Ship Finance. The notes were redeemed at par value, and a book gain of \$28.9 million was recorded in the fourth quarter.

Subsequent to quarter end, the Company redeemed the outstanding amount due under the \$125 million Senior Unsecured Convertible Notes issued in 2011. The notes were due in February 2016, and the redemption was made from the Company's available liquidity. The Company had a share settlement option with respect to these notes, but it was deemed more accretive for our shareholders to settle in cash.

As of December 31, 2015, the Company had net capex commitments related to two 9,300-9,500 TEU container vessels of approximately \$12 million per vessel, payable upon their respective deliveries from the shipyard. This is after committed financing of \$70 million per vessel at very attractive terms. One of the vessels was delivered in February, and the other is scheduled for delivery in the second quarter of 2016.

The two 18-20,000 TEU class container vessels with expected delivery dates in late 2016 and early 2017 will be financed through a 15-year lease agreement, and the net remaining capital expenditure is \$15 million per vessel, payable upon the vessels' respective deliveries from the shipyard.

Ship Finance has also entered into agreements for the construction of two product tankers at a shipyard in Korea. The combined contract price is approximately \$109 million, and delivery is scheduled during the second half of 2017. Ship Finance has secured long term charters to a strong counterparty, and the Company intends to secure long term financing in due course.

The Company is in compliance with all financial covenants and several of our financing arrangements are in subsidiaries with only limited guarantees from Ship Finance.

Strategy and Outlook

Over the last year the Company has entered into contracts to make new investments of approximately \$1 billion by agreeing to acquire 15 vessels, spread across the container, dry bulk and tanker sectors. In the same period, older units have been disposed of, as part of the Company's continuous fleet renewal program.

Our diversified approach to managing our portfolio of assets gives us the opportunity to benchmark transactions across our main markets. We believe this will enable us to generate superior returns over time compared to an approach that focuses on one segment only. The long term strategy of the Company is to continue building our dividend distribution capacity on the back of a diversified portfolio of high quality assets chartered to strong counterparties.

Accounting Items

Under U.S. GAAP, subsidiaries owning the drilling units West Hercules, West Taurus and West Linus have been accounted for as 'investment in associate' using the 'equity method'.

All these equity accounted subsidiaries are wholly owned by Ship Finance, but due to the conservative structure of the leases, Ship Finance has not been deemed 'primary beneficiary' according to U.S. GAAP. As a result of the accounting treatment, operating revenues, operating expenses and net interest expenses in these subsidiaries are not shown in Ship Finance's consolidated income statement. Instead, the net contribution from these subsidiaries is recognized as a combination of 'Interest income from associates and long term investments' and 'Results in associate'.

In Ship Finance's consolidated balance sheet, the net investments are shown as a combination of 'Investment in associate' and 'Amount due from related parties - Long term'. The reason for this treatment is that a part of the investment in these subsidiaries is in the form of intercompany loans. For a further detailed explanation of these features, please consult our 'Accounting Items' presentation available as webcast at our website at www.shipfinance.bm.

Forward Looking Statements

This press release contains forward looking statements. These statements are based upon various assumptions, many of which are based, in turn, upon further assumptions, including Ship Finance management's examination of historical operating trends, data contained in the Company's records and other data available from third parties. Although Ship Finance believes that these assumptions were reasonable when made, because assumptions are inherently subject to significant uncertainties and contingencies which are difficult or impossible to predict and are beyond its control, Ship Finance cannot give assurance that it will achieve or accomplish these expectations, beliefs or intentions.

Important factors that, in our view, could cause actual results to differ materially from those discussed in the forward-looking statements include the strength of world economies, fluctuations in currencies and interest rates, general market conditions including fluctuations in charter hire rates and vessel values, changes in demand in the markets in which we operate, changes in demand resulting from changes in OPEC's petroleum production levels and worldwide oil consumption and storage, developments regarding the technologies relating to oil exploration, changes in market demand in countries which import commodities and finished goods and changes in the amount and location of the production of those commodities and finished goods, increased inspection procedures and more restrictive import and export controls, changes in our operating expenses, including bunker prices, dry docking and insurance costs, performance of our charterers and other counterparties with whom we deal, timely delivery of vessels under construction within the contracted price, changes in governmental rules and regulations or actions taken by regulatory authorities, potential liability from pending or future litigation, general domestic and international political conditions, potential disruption of shipping routes due to accidents or political events, and other important factors described from time to time in the reports filed by the Company with the Securities and Exchange Commission.
