Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes No

Clarifications on the contract with GDK Engenharia

(Rio de Janeiro, July 19, 2005). PETRÓLEO BRASILEIRO S/A - PETROBRAS, [Bovespa: PETR3/PETR4, NYSE: PBR/PBRA, Latibex: XPBR/XPBRA], a Brazilian international energy company, wishes to clarify that GDK Engenharia S.A was retained to build and assemble Platform P-34's industrial unit. The cost of the work amounted to about US\$ 88 million and the platform, once concluded, is scheduled to begin operations next year in the Jubarte Field with a production capacity of 60,000 barrels/day.

In accordance with Decree 2745, this contract was the outcome of an Invitation to Bid, the processing of which took place between January and June 2004. In addition to GDK, the following companies were also invited to participate in the bidding process: ABB-Camargo Correa and Andrade Gutierrez Consortium; Construtora Norberto Odebrecht S.A.; Fels Setal S.A.; GDK Engenharia S.A.; Mauá Jurong S.A.; Mendes Júnior Trading e Engenharia S.A.; Promon Engenharia Ltda; Techint S.A.; Technip Engenharia S.A and UTC Engenharia S.A.

Four of these companies officially declined the invitation to bid, one failed to put in a bid, two formed a consortium, presenting a joint proposal, and three submitted individual proposals. Out of the four proposals received, three were approved on technical grounds by the Tender Bid Committee. The difference between GDK's bid and the company classified in second place was approximately US\$ 10 million. The contract with GDK was signed on July 9 2004 for completion within a term of 510 days. The platform under construction is expected to leave the port of Vitória late this year.

GDK Engenharia has had a record of supplying services to Petrobras since 1994. Since that date, among the services for which Petrobras has retained GDK are: maintenance of industrial equipment; repair and expansion of property installations; construction and assembly of industrial structures for oil and gas; and maintenance construction, assembling and restoration of pipelines. The work involving the contract for supplying P-34 is an area in which GDK has a proven track record.

In 2001, contracts signed between Petrobras and GDK amounted in round figures to R\$ 126 million, in 2002 to R\$ 430 million, in 2003 to R\$ 145 million, in 2004 to R\$ 512 million and in 2005 to R\$ 272 million.

The P-34 Platform contract has been audited by the Federal Audit Court (TCU) and no irregularity was identified.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
