Forward-Looking Statements

This Report on Economic and Financial Analysis contains forward-looking statements relating to our business. Such statements are based on management's current expectations, estimates and projections about future events and financial trends, which could affect our business. Words such as: believes, anticipates, plans, expects, intends, aims, predicts, foresees, projects, guidelines, should and similar expressions are intended to identify forward-looking statements. These statements, however, do not guarantee future performance and involve risks and uncertainties, which could be beyond our control. Furthermore, certain forward-looking statements are based on assumptions that, depending on future events, may prove to be inaccurate. Therefore, actual results may differ materially from the plans, objectives, expectations, projections and intentions expressed or implied in such statements.

Factors which could modify actual results include, among others, changes in regional, national and international commercial and economic conditions; inflation rates; increase in customer delinquency on the account of borrowers in loan operations, with the consequent increase in the allowance for loan losses; loss of funding capacity; loss of clients or revenues; our capacity to sustain and improve performance; changes in interest rates which could, among other events, adversely affect our margins; competition in the banking sector, financial services, credit card services, insurance, asset management and other related sectors; government regulations and fiscal matters; disputes or adverse legal proceedings or rulings; as well as credit risks and other loan and investment activity risks.

Accordingly, the reader should not rely excessively on these forward-looking statements. These statements are valid only as of the date they were prepared. Except as required under applicable legislation, we assume no obligation whatsoever to update these statements, whether as a result of new information, future events or for any other motive.

Few numbers of this Report were submitted to rounding adjustments.
Therefore, amounts indicated as total in certain charts may not correspond to the arithmetic sum of figures preceding them.

Highlights

The main figures obtained by Bradesco in 1Q09 are presented below:

1. Net income for 1Q09 totaled R\$1.723 billion (a -9.6% variation relative to the adjusted net income of R\$1.907 billion in 1Q08), corresponding to EPS of R\$2.42 (accumulated over 12 months) and a 21.0% return on Average Shareholders' Equity).
2. Net income comprised R\$1.073 billion from financial activities, which represented 62% of the total, and R\$650 million from Insurance and Private Pension Plan activities, which accounted for 38% of total Net Income.
3. Market capitalization as of April 30, 2009 stood at R\$76.389 billion.
4. Total Assets reached R\$482.141 billion in March 2009, an increase of 35.6% in relation to the same period in 2008. Annualized return on average Assets reached 1.5%, vis-à-vis 2.2% in the same period of last year.
5. The Expanded Loan Portfolio⁽²⁾ stood at R\$214.291 billion, 26.5% higher on a y-o-y analysis. Loans to individuals totaled R\$73.630 billion (up by 18.3%), while loans to corporations totaled R\$140.661 billion (up by 31.2%) ..
6. Assets under Management reached R\$640.347 billion, an increase of 26.7% vis-à-vis the R\$505.365 billion of March 2008.
7. Shareholders' Equity stood at R\$35.306 billion in March 2009, a 7.3% y-o-y growth. The Capital Adequacy Ratio (Basel II) stood at 16.0% in 1Q09, 13.2% of which being Tier I Capital.
8. Remuneration to shareholders in the form of Interest on Shareholders' Capital and Dividends paid and provisioned in 1Q09 amounted to R\$2.528 billion, R\$ 647 million of which related to the income generated in the quarter, equivalent to 37.6%, and R\$1.881 billion related to the fiscal period of 2008.
9. The Efficiency Ratio in March 2009 stood at 41.5% (41.7% in March 2008).
10. In the quarter, investments in infrastructure, information technology and telecommunications amounted to R\$793 million, up by 43.9 % y-o-y.
11. In the period, taxes and contributions, including social security, paid or provisioned, totaled R\$3.159 billion, R\$1.686 billion of which stemming from main activities developed by the Bradesco Organization, equivalent to 97.85% of the Net Income and R\$1.473 billion related, mainly, to financial intermediation taxes withheld and paid by third parties.
12. Bradesco has a comprehensive distribution network, with 4,559 Branches (3,375 branches + 1,184 mini-branches(PABs)), 29,764 ATMs in the Bradesco Dia&Noite (Day&Night) Network, 16,710 Bradesco Expresso outlets, 5,959 Banco Postal (Postal Bank) Branches, 2,695 Electronic Service Branches and 152 branches of Finasa Promotora de Vendas. 5,679 ATMs in the Banco24Horas (24HourBank) Network are also available to Bradesco clients.

13. Awards and Acknowledgements received in 1Q09:

- The highest profitability in the private sector of U.S. and Latin America (Consultoria Econômica);
- Most valuable brand of the banking sector in Latin America and 1st worldwide (Brand Finance/The Banker);
- 2nd world's most valuable brand among retail banks (The Banker);
- Best Private Banking in Brazil for the second consecutive year (Euromoney);
- The most liquid bank in Latin America (Global Finance);
- Sustainability International Award (Golden Peacock Global Award for Corporate Social Responsibility 2009);
- The leader in the Insurance Market in 2008 (Insurance Brokers Union of São Paulo (Sincor-SP)/Valor Econômico);
- The largest private agent of the National Bank for Economic and Social Development (BNDES) in 2008 (Gazeta Mercantil), and
- Banco Bradesco and BMC - the leaders in payroll deductible loans for the Social Security National Institute (INSS) benefit recipients (Ministry of Social Security).

14. Socially, aiming at contributing to a better education in Brazil, Bradesco has been developing for over 52 years a broad social and educational program through Fundação Bradesco, maintaining 40 schools mainly located in regions of acute socio-economic poverty throughout all Brazilian states and Brasília, the Federal District. In 2009, with a budget estimated at R\$231.343 million, Fundação Bradesco will be able to service over 642 thousand people in the various segments of operation. Among these services, 111,762⁽³⁾ students will receive free-of-charge quality education.

- (1) Excluding the assets valuation adjustment recorded in Shareholders' Equity;
- (2) Considering Sureties, Guarantees, credit cards receivables (cash purchases and credit purchases from storeowners) and loan assignment (Receivables Securitization Funds - FIDC); and
- (3) Forecast.

Net Income and Profitability

In 1Q09, the net income stood at R\$1,723 million, a decrease of 4.6%, in the q-o-q comparison and of 9.6% in the y-o-y comparison, the reasons of which will be commented below, in the analysis of the main items of the statement of income.

It is worth mentioning that the economic crisis affected the financial activity, slowing down credit growth and causing higher delinquency.

*Efficiency Ratio **

In the 1Q09, the Efficiency Ratio reached 41.5%, an improvement in the q-o-q comparison, basically due to the increase of the net interest income and ongoing cost control initiatives (personnel and administrative expenses).

In the y-o-y comparison, in addition to the increase of the net interest income and cost control, the return of technical provision for individual health portfolio to normal levels also contributed to this improvement.

* Efficiency Ratio (ER) = $\frac{\text{Personnel} + \text{Employee Profit Sharing (PLR)} + \text{Administrative Expenses}}{\text{Net Interest Income} + \text{Income from Insurance} + \text{Fee Income} + \text{Equity in the Earnings (Losses of Unconsolidated Companies)} + \text{Other Operating Expenses} + \text{Other Operating Income}}$. If we considered the ratio between total administrative costs (Personnel Expenses + Administrative Expenses + Other Operating Expenses + Tax Expenses not related to revenue generation) and generation of revenue net of related taxes, ER in 1Q09 would be 52.9% .

Adjusted Net Interest Income

In the q-o-q comparison, the R\$989 million variation was due to:

The increase in income from interest-earning operations in the amount of R\$378 million, was due to the growth in average business volumes and higher growth of loans to individuals;

The increase in non-interest income in the amount of R\$611 million, was due to higher securities/treasury gains, highlighting the positive mark-to-market effect in loan derivatives (Credit Default Swaps - CDS) on sovereign Brazilian bonds issued abroad (R\$132 million in 1Q09 and R\$(276) million in 4Q08), due to smaller volatility in the world's financial markets.

In the y-o-y comparison, the increase of R\$1,611 million, which corresponded to a 26.6% growth in Net Interest Income, was due to:

The increase of R\$1,048 million in income from interest-earning operations, basically due to increase in average business volumes.

The increase of R\$563 million, basically due to higher treasury/securities gains, in the amount of R\$505 million; and higher credit recovery, in the amount of R\$80 million.

*Loan Portfolio Expanded Concept**

In March 2009, loan operations of Bradesco amounted to R\$214.3 billion, in line with the previous quarter, reflecting a drop of demand in the period.

In the y-o-y comparison, the portfolio grew by 26.5%, of which: Large Corporates 33.1%, Small and Medium-Sized Enterprises (SMEs) 28.7% and Individuals 18.3% . In the Corporate segment, products that contributed to main increases were: working capital, exports financing and operations abroad. In the Individuals segment, we highlight Consumer Sales Financing (CDC)/Leasing of vehicles and consumer loan.

Taking into consideration the Brazilian Central Bank's (Bacen) criteria (which excludes Sureties and Guarantees, receivables from credit cards (cash purchases and credit purchases from storeowners) and loan assignment (FIDC)), loan operations amounted to R\$174.1 billion, up by 0.4% in the quarter and 25.2% in one year.

* Including Sureties and Guarantees, receivables from credit cards (cash purchases and credit purchases) and loan assignment (FIDC).

Provision for Loan Losses (PLL)

The increase in PLL expenses reflects the effects of the world's financial crisis, which implied an economic slowdown in the country, temporarily affecting the capacity of payment of companies and individuals. The deterioration of ratings of some companies and of individuals payments in arrear led us to increase provisioning levels. It is worth mentioning that we began in this quarter to record provisions for credit card operations related to cash and credit purchases from storeowners. The initial effect of which was R\$177 million, amount that should not be repeated over the next quarters.

Delinquency ratio > 90 days

The Total delinquency ratio of 90 days, steady in the previous quarters, increased to 4.3% in this period for the reasons already commented. We are working with a scenario of a slight growth of this ratio for the next 2 quarters, which may then stabilize until the end of the year.

Coverage Ratio

The balance of PLL stood at R\$11.424 billion on March 31, 2009, composed by R\$9.735 billion of provisions required by the Brazilian Central Bank and by R\$1.689 billion of excess provisions, calculated by in-house criteria and policies.

In the chart below, we present the coverage ratio of the Provision for Loan Losses related to loans overdue by more than 90 days. Although a decrease has been seen in this quarter, it remains in a comfortable level.

Insurance, Pension Plans and Savings Bonds

The result of Insurance, Pensions Plans and Savings Bonds (*) of R\$537 million, as classified in the Consolidated Statement of Income, shows a slight variation when compared to the 4Q08 (R\$543 million) and to the 1Q08 (R\$537 million).

Nevertheless, the financial result, an important element for analysis of full performance of these activities, is classified in the Net Interest Income. Thus, we analyze below the evolution of the net income and the combined ratio:

(*) Including Retained Premiums, Technical Provisions Variations, Retained Claims, Savings Bonds Raffles and Redemptions and Sales Expenses.

The better result in relation to the 4Q08 is basically due to the drop in claims in Health and Auto/P&C segments, the increase in financial revenues and the decrease in general/administrative expenses.

Year-on-year, the drop in the net income was due to lower gains from equities of R\$43 million and the increase in the Social Contribution on Net Income (CSLL) rate, that burdened the taxable income by 6%.

In terms of solvency, Bradesco's Insurance Group (Grupo Bradesco de Seguros e Previdência) complies with the Susep (Insurance Superintendence) rules which took effect as of January 1, 2008, and is also adjusted to the international standards (Solvency II). The financial leverage ratio stood at 2.4 times the Shareholders' Equity.

It is worth mentioning that the Insurance Group is the market leader in the consolidated premiums of Insurance, Contribution Revenues and Income from Savings Bonds (base date January 2009).

Note: We point out that the Statement of Income of Bradesco's Insurance Group (Grupo Bradesco de Seguros e Previdência) is already included in the Consolidated Statement of Income of Bradesco. Detailed information on the insurance segment can be found on Chapter 2 of the Report on Economic and Financial Analysis of 1Q09.

Fees and Commissions

Fees and commissions remained in line on a q-o-q and y-o-y basis. Higher business volume and client base offset the loss originated from fees adjustment and the loan operations fee which can no longer be charged from individuals.

Administrative Expenses

In the q-o-q comparison, the decrease of administrative expenses is due to lower expenses related to advertisement and marketing of R\$101 million and third-party services of R\$61 million.

In the y-o-y comparison, the increase is due to the expansion of the distribution network and the increase in business volumes, in addition to investments in the Information Technology (IT) improvement project, aiming at the optimization of the IT platform, including the replacement of systems architecture.

Personnel Expenses

In 1Q09, the R\$114 million decrease expenses is basically due to lower Structural expenses in the amount of R\$64 million, basically related to higher vacation expenses in 1Q09, which is usual during the first-quarter period, and lower Non-Structural expenses in the amount of R\$50 million related to lower expenses with management and employees profit sharing (PLR), as well as lower training expenses.

In the y-o-y comparison, the R\$39 million increase was basically due to Structural increased expenses in the amount of R\$134 million, due to the increase in distribution network and the 2008 bargaining agreement (wage increase between 8.15% and 10%), as well as benefits and others, and by lower

Non-Structural expenses in the amount of R\$95 million, basically due to lower expenses with PLR and lower labor claims provisions.

Obs.: Structural = Compensation + Social Taxes + Benefits.

Non-Structural = Employee Profit Sharing (PLR) + Training + Labor Provision.

Tax Expenses

The R\$89 million increase of tax expenses in 1Q09 in relation to 4Q08 is mainly due to higher PIS/Cofins expenses, in the amount of R\$80 million, due to the increase in the taxable income in 1Q09, especially net interest income.

In the y-o-y comparison, tax expenses remained practically stable.

Other Operating Revenues and Expenses

In the q-o-q comparison, the variation of other operating revenues and expenses stood at R\$259 million, basically comprised by higher operating provision expenses, in the amount of R\$192 million, mostly civil liabilities, which include, particularly, provisions for contingencies related to economic plans.

In the y-o-y comparison, the increase of R\$254 million was basically due to the increase in expenses with operating provisions, in the amount of R\$91 million, the surge with sundry losses of R\$74 million and higher goodwill amortization, in the amount of R\$25 million.

Income Tax and Social Contribution

Both in the q-o-q and y-o-y comparisons, we observe an average rate (calculated considering the earnings before income tax and social contribution less equity in the earnings (losses) of unconsolidated companies and interest on shareholders' capital) close to the effective tax rate of 34%. Thus, nominal values variations reflect the trend of results in the respective periods.

Tax credits originated in previous periods, deriving from the social contribution rate increase to 15%, are recorded in the consolidated financial statements, until the limit of corresponding consolidated tax liabilities. The balance not yet activated reaches R\$926 million. Further details may be obtained in Note 34 to the Financial Statements.

(* IR and CS average rate on Net Income = (Net Income before taxes - (interest on shareholders' capital expense +/- Equity in the Earnings (Losses) of Unconsolidated Companies)).

Unrealized Gains

Total unrealized gains, mainly represented by securities, posted an increase of R\$688 million in this quarter, mainly due to the R\$571 million growth in securities marked-to-market. These gains followed the market recovery after a period of volatility. It is worth mentioning that these securities are mostly used to guarantee technical provisions, which are long-term liabilities and not marked-to-market.

Economic Scenario

The 1Q09 was characterized, on one hand, by intensive effects of the international crisis on Brazil, and on the other hand, by a perception of Brazil's economy resilience in opposition to a severe global crisis. The Brazilian industrial production, which had dropped by 14.8% in December, declined by 17.2% on average in the first two-month period of 2009, showing an aggravation of the effects related to the abrupt world credit crunch, a significant decrease in global trade which, in some countries, such as Japan, dropped by half, strong inventories adjustments undertaken by companies since early this year to adjust to the new demand levels and due to consumers and businessmen gloomy expectations as to the potential negative impact of the global crisis. In response to this strong slowdown in activities and favorable prospects for inflation market expectations for 2009 the CPI decreased from 5.29% in December to 4.32% in March the Brazilian Central Bank decreased the Base rate (Selic) by 3.5 p.p. this year to 10.25%, and is signaling that a less severe monetary policy process will continue in the 2Q09. This signal resulted in real interest rates dropping from 8.5% in December to 5.5% at the end of March, which is the lowest historical level and certainly will contribute to an upturn in economic activities in the quarters ahead.

Despite of the negative surprise with the industry production in 1Q09, employment, income and retail sales have been performing better-than-expected, attesting the Brazilian market resilience to the external shock. While production was down by 17.4%, trade was up by 6.0% in January, partially boosted by the levels of the real income, which rose by 5.2% in the first two-month period of the year. The low inflation and the lack of crisis in the balance of payments in Brazil are brand new events in episodes of severe global crisis and, very likely, help to understand Brazil's economic resilience. Additionally, several tax anti-cycle initiatives and the corporate protection network built up over the past years helped softening the impact of the global crisis on the household consumption.

Finally, the most recent measures taken by the American Government a decision made by the Federal Reserve (FED) to buy government securities and the public-private investment plan to purchase toxic assets from banks balance sheets and more favorable economic data recovery of industry in China, improved real estate sales in the U.S. have led to a less negative perception in relation to the next quarters. Even though uncertainties and risks are still very high, there are attempting signs of stabilization in the global economy, with recovery of actual data, markets and commodities prices that may suggest that the most intense phase of the crisis has already been overcome, which creates optimistic expectations for the 2H09.

From this expectation of a gradual recovery of the global economy and taking in consideration Brazil's economy resilience, we expect the Brazilian growth to be close to zero in 2009, with nominal base rate of approximately 9.25% by year-end and a CPI inflation close to 4.0% .

Adjusted Margin Average Rate(*)	8.4%	7.9%	9.2%				

(*) (Adjusted Financial Margin)/(total average assets permanent assets purchase and sale commitments)

Adjusted financial margin reached R\$7,661 million in 1Q09. Compared to 4Q08, there was a 14.8% growth or R\$989 million in the financial margin. It is possible to observe that the variation in the interest margin had a positive impact due to the volume of transactions, contributing with R\$314 million, and the increase in spreads, contributing with R\$64 million.

Y-o-y, there was an increase of R\$1,611 million or 26.6% . Interest variation was influenced by the increase in the volume of transactions, contributing positively in the financial margin in R\$1,653 million, which was partially minimized by spread decrease, in the amount of R\$605 million.

*Financial Margin - Interest**Interest Financial Margin Breakdown*

		R\$ million
Interest Financial Margin Breakdown		

	1Q09	4Q08	1Q08	Variation	
				Qtr.	12M

Securities / Other	714	629	585	85	129
Financial Margin	6,592	6,214	5,544	378	1,048

Q-o-q, it is possible to observe a significant growth of 6.1% or R\$378 million in the interest financial margin, mainly in loans .

Y-o-y, it is possible to observe a growth of R\$1,048 million or 18.9% in the interest financial margin, with Loan and Securities/Other business lines contributing the most for this growth.

Interest Financial Margin Rates

The annualized interest financial margin rate reached 7.2% in 1Q09, an increase when compared to the 7.3% index recorded in the previous quarter.

Y-o-y, we also a decrease, mainly due to the growth in loan volume in lower spread portfolios. Additionally, there was a drop on the economy basic interest rate and an increase in funding volume, improving Bradesco's liquidity and reaffirming its solidity.

Interest Financial Margin Annualized Average Rate

	1Q09			4Q08		
	Interest	Average Balance	Average Rate	Interest	Average Balance	Average Rate

Loan Financial Margin Interest**Loan Financial Margin Breakdown**

						R\$ million
Financial Margin - Loan						
		1Q09	4Q08	1Q08	Variation	
					Quarter	12M
Interest due to Volume					117	1,082
Interest due to Spread					203	(335)
Financial Margin Interest		4,576	4,256	3,829	320	747
Revenues		8,732	11,340	7,107	(2,608)	1,625
Expenses		(4,156)	(7,084)	(3,278)	2,928	(878)

In 1Q09, the interest financial margin rate in loan operations reached R\$4,576 million against R\$4,256 million in the previous quarter, representing a growth of 7.5% or R\$320 million. This variation was positively impacted in R\$117 million in volume and R\$203 million in spreads due to mid and long-term prefixed operations carry over, as a consequence of the National Financial System's funding and financing structure.

Year-on-year, there was a 19.5% growth or R\$747 million in the financial margin. This variation is mainly due to the increase in the volume of transactions, which positively contributed to the financial margin in R\$1,082 million. This result offset the effect in the margin due to the reduction in spreads in the amount of R\$335 million.

In the periods compared, we can observe that the most relevant products in the corporate portfolio were business turnover products: Working Capital and Real Estate Financing, and also vehicle leasing in both individual and corporate portfolios.

Loan Financial Margin Net Margin

In this graph we show a summary of loan activity. The gross margin line refers to interest income from loans, net of opportunity cost (basically the Interbank Deposit Certificate rate - CDI over accumulated in the period).

In the PDD curve, we observe the delinquency cost, represented by allowance for loan losses(PDD) expenses plus discounts granted in negotiations and net loans recoveries.

The Net Margin curve presents the result of loan interest income, net of losses, which in 2009, recorded a drop of 12.4% compared to 1Q08 and to 4Q08 a drop of 20.7% . Basically, due to the effects of the world financial crisis, which caused an economic slowdown in Brazil, temporarily preventing companies and individuals from complying with their financial commitments. Our provision level was increased due to rating deterioration in some companies and/or individual s payment delay.

Adjusted Interest Financial Margin Loan**Balance of Expanded Loan Portfolio**

Loan operations (including sureties, guarantees and credit card purchases in a lump sum and installment purchase plan) ended 1Q09 amounting to R\$214.3 billion, an increase of 26.5% over the last 12 months and a slight decrease of 0.5% in relation to the previous quarter.

Excluding FIDC operations, sureties, guarantees and amounts receivable from credit card, the loan portfolio totaled R\$174.1 billion, an increase of R\$35.1 billion, or 25.2%, in relation to March/08 and R\$698 million or 0.4% this quarter.

Loan Portfolio Breakdown by product and type of client (individual and corporate)

Below, the breakdown of main loan products:

Individuals	R\$ million			Variation %	
	Mar09	Dec08	Mar08	Quarter	12 months
Vehicles CDC	19,540	20,496	21,265	(4.7)	(8.1)
Leasing	12,575	11,516	5,272	9.2	138.5
Credit Card (1)	9,278	9,668	8,188	(4.0)	13.3
Personal Loan	8,179	7,774	7,376	5.2	10.9
Payroll Deductible Loan (2)	6,978	6,839	6,311	2.0	10.6
Rural Loan	4,063	4,125	3,384	(1.5)	20.1
Onlending BNDES	2,876	2,898	2,867	(0.8)	0.3
BNDES Onlending	2,268	2,485	1,884	(8.7)	20.4
Overdraft Facilities	2,413	2,162	2,189	11.6	10.2
Sureties and Guarantees	386	448	344	(13.8)	12.2
Other (3)	5,074	5,357	3,146	(5.3)	61.3
Total	73,630	73,768	62,226	(0.2)	18.3

(1) In March 2009, it includes R\$5,589 million of cash and installment plan from storeowners. In December 2008, includes R\$6,124 million and in March 2008, R\$4,913 million;

(2) In March 2009, it includes R\$381 million of loan assignment (FIDC) and in December 2008, R\$447 million; and

(3) In March 2009, it includes R\$41 million of loan assignment (FIDC) and in December 2008, R\$48 million.

In the individuals segment, more improvements in leasing, personal loan, credit card, rural loan and real estate financing portfolios can be observed in the last 12 months. As of 2008, the highlight was especially new vehicle financing in the leasing segment, which justifies high growth indexes. A solid growth of these operations is also due to IOF exemption, which made this product more attractive for clients.

Loan Financial Margin Interest

Corporate Clients	R\$ million			Variation %	
	Mar09	Dec08	Mar09	Quarter	12 Months
Working Capital	25,795	25,869	16,099	(0.3)	60.2

Other	9,050	9,835	10,361	(8.0)	(12.7)
Total	140,661	141,577	107,182	(0.6)	31.2

(1) In March 2009, it includes R\$1,466 million of cash and installment plans from storeowners, in December 2008, R\$1,424 million and March 2008, R\$396 million; and

(2) We highlight that almost 89.2% of surety and guarantee operations are carried out with Large Companies.

In the corporate clients segment, in the last 12 months, higher growth was seen in export financing, operations abroad, working capital, leasing and real estate financing products.

Loan Portfolio Consumer Financing

In the graph above, the types related to the consumer financing for individuals were considered (CDC/ vehicle leasing, personal loans and asset financing, rotating credit card and amounts related to credit card purchases in one lump sum and installment purchase plan from storeowners, which are not included in the total loan operations).

The amount reached R\$58.0 billion and growths were 0.2% and 15.4% in the last 12 months. The highlights are the segments of vehicle financing (CDC and Leasing), consigned loans and payroll-deductible loan in the amount of R\$35.4 billion, accounting for 61.0% of total consumer financing balance, which due to its guarantees and characteristics; provide an adequate credit risk level to the portfolio.

Breakdown of Vehicle Portfolio

	R\$ million			Variation %	
	Mar09	Dec08	Mar08	Quarter	12 months
CDC Portfolio	22,639	23,792	24,786	(4.8)	(8.7)
Individuals	19,540	20,496	21,265	(4.7)	(8.1)

Corporate	13,277	13,370	10,093	(0.7)	31.5

In March 2009, vehicle financing operations amounted to R\$45.5 billion, a 24.0% growth in the 12-month period and, in the quarter, the balance remained stable, basically due to a decrease in demand. Out of the Vehicle Portfolio total, 49.8% refers to CDC, 41.2% refers to Leasing and 9.0% represents Finame. Individuals represent 70.8% of the portfolio whereas Corporates represented 29.2%. Highlight to Leasing to individuals, with a 138.5% growth in the 12-month period and 9.2% in the quarter.

By Client Profile

Below, the total of loan operations by type of client, with highlights to a higher contribution from corporate clients, both in the quarter and in the twelve months ended in March 2009, mainly large corporations that were affected by capital markets slowdown.

	R\$ million			Variation %	
	Mar09	Dec08	Mar08	Quarter	12 months
Large Corporations	52,662	52,961	38,493	(0.6)	36.8

- (1) Pursuant to Bacen Standard; and
- (2) Cash and Installment Purchase from storeowners

*Loan Financial Margin Interest**Portfolio Concentration Distribution by Business Segment*

The portfolio distribution by economic activity sector did not have a concentration. Despite their significant participation, operations for individuals are dispersed. This quarter, we point out a greater contribution from Services sector balance.

Activity Sector	R\$ million							
	Mar09	%	Dec08	%	Mar08	%	Dec07	%
Public Sector	1,561	0.9	941	0.6	913	0.6	901	0.7

Exploration	2,392	1.4	2,246	1.3	1,806	1.3	1,623	1.2
Individuals	67,233	38.6	66,701	38.4	56,969	41.0	53,474	40.7
Total	174,121	100.0	173,423	100	139,019	100.0	131.307	100.0

*Loan Portfolio Breakdown **

Over the last twelve months, the breakdown of consolidated loan portfolio indicated the adequacy and the consistency of loan valuation instruments used in the granting process, maintaining its quality. Out of 25.2% increase or R\$35.1 billion in the Organization's loan portfolio, 16.4% (R\$22.9 billion) derived from new borrowers, as per graph below:

Loan Portfolio Breakdown By Rating

Breakdown of Portfolio by Rating Between March 2008 and 2009						
Rating	Total Loan in March 2009		New Borrowers Between April 2008 and March 2009		Remaining Borrowers in March 2008	
	R\$ million	%	R\$ million	%	R\$ million	%
AA C	160,560	92.2	21,392	93.6	139,168	92.0
D	3,521	2.0	444	1.9	3,077	2.0
E H	10,040	5.8	1,025	4.5	9,015	6.0
Total	174,121	100.0	22,861	100.0	151,260	100.0

In the chart above, both new borrowers and those remaining in March/08, showed good loan quality, which evidences the adequacy and consistency of loan policy and valuation instruments used by the Organization.

Loan Operations By Rating %

Client Characteristics	By Rating								
	Mar09			Dec08			Mar08		
	AA-C	D	E-H	AA-C	D	E-H	AA-C	D	E-H
Large Corporations	98.0	1.0	1.0	98.7	0.4	0.9	98.8	0.6	0.6
SMEs	91.9	2.6	5.5	93.8	2.0	4.2	94.0	1.9	4.1
Individuales	87.9	2.4	9.7	88.9	2.2	8.9	89.4	1.9	8.7
Total	92.2	2.0	5.8	93.4	1.6	5.0	93.4	1.6	5.0

The lower contribution from credits rated between AA-C, shows the effects of the world financial crisis that generated the economic slowdown which reduced clients' temporary ability of complying with their financial commitments, resulting in late payments and rating deterioration.

Loan Portfolio By Currency

In the quarter, the representativeness of foreign currency operations was stable, basically due to the slight decrease in the variation of the dollar offset by the increase in foreign currencies.

In March 2009, total loan operations in domestic currency reached R\$160.2 billion (R\$159.6 billion in December 2008 and R\$126.9 billion in March 2008) and foreign currency operations amounted to R\$13.9 billion (R\$13.9 billion in December 2008 and R\$12.2 billion in March 2008).

In March 2009, the balance of indexed and/or foreign currency-denominated loans and onlending (excluding ACCs) reached the total amount of US\$6.0 billion, up 1.4% in U.S. dollar in the quarter and only 0.4% in reais, due to Real appreciation. Over the last 12 months, a drop of 13.5% and a growth of 14.5%, respectively were recorded.

Loan Portfolio By Debtor

In the last twelve months, the concentration levels of loan operations of the total portfolio by debtor had an increase in all levels of the largest debtors, and also a decrease was verified in the quality of these assets with lower participation of the ratings AA and A.

In the quarter, the concentration levels of loan operations in the total portfolio by debtor kept steady all levels.

Loan Portfolio By Flow of Maturities

The flow of maturities of performing loans operations and/or installments coming due has been extended, mainly due to CDC/vehicle leasing and real estate financing operations that are, by their nature, of longer terms, however of lower risk due to their characteristics. The maturities of operations and or installments with maturities longer than 180 days represented 60.0% of the total portfolio in March 2009, against 57.5% twelve months ago.

Provisioning

	R\$ million							
PDD Expenses	1Q09	4Q08	3Q08	2Q08	1Q08	4Q07	3Q07	2Q07
Accounting	(2,920)	(2,559)	(1,824)	(1,834)	(1,667)	(1,556)	(1,438)	(1,344)
Recoveries	312	353	345	312	232	288	166	218
Discounts	(114)	(85)	(92)	(87)	(77)	(76)	(75)	(73)
PDD adjustment (non-recurring)	177	597						
Managerial	(2,545)	(1,694)	(1,571)	(1,609)	(1,512)	(1,344)	(1,347)	(1,199)

The increase on the PDD expense reflects the effects of the world financial crisis, causing an economic slowdown in Brazil, temporarily preventing companies and individuals from complying with their financial commitments. Our provisioning level was increased due to rating deterioration in some companies and/or individuals payment delay.

It is worth noting that in 1Q09 the Organization decided to record credit card operations provision referring to cash and installment purchase plan from storeowners, whose initial effect was R\$177 million, which should not repeat itself in the next quarters.

Allowance for Loan Losses

The provision balance variation in 1Q09 is higher than the loan portfolio growth, representing 6.6% of the total loan portfolio guaranteeing the 36.1% coverage margin above the expected drop for the next 12 months.

PDD x Delinquency x Loss

It is important to highlight the adequacy of the provisioning criteria adopted that can be proved by analyzing the historical data of allowances for loan losses and losses effectively occurred in the subsequent twelvemonth period. For instance, in March 2008, for an existing provision of 5.8% of the portfolio, the loss in the twelve subsequent months was 4.2% on that date, that is, the existing provision covered the loss by a margin of more than 35%.

The total amount of provision is composed of general provision (client and/or operation classification), specific provision (non-performing) and excess provision (internal policies and criteria).

It is worth mentioning that Bradesco has excess provision of R\$1.7 billion, in relation to that required by Bacen. Nevertheless, if we compare with expected effective losses for the next 12 months, the surplus is R\$3.1 billion.

Funding Financial Margin Interest

When coverage margin is analyzed under the write-off net of recovery viewpoint, we observe that it increases significantly: in March 2008, for an existing provision of 5.8% of portfolio, net loss in the subsequent 12 months was 3.2% on that date, i.e., the existing provision covered the loss by a margin of more than 80%.

Delinquency Ratio > 90 days

Total delinquency ratio, which remained steady over previous quarters, increased 4.3% in 1Q09 basically due to the effects of the world financial crisis, causing an economic slowdown in Brazil, temporarily preventing companies and individuals from complying with their financial commitments. Our provisioning level was increased due to rating deterioration in some companies and/or individual's payment delay. It is worth noting that in 1Q09 the Organization decided to record credit card operations provision referring to cash and installment purchase plan from storeowners, whose initial effect was R\$177 million, which should not repeat itself in the next quarters.

Funding Financial Margin Interest

We closed 1Q09 with a 4.3% total delinquency ratio, which shows a q-o-q increase. However, as of March 2009, a reduction in the growing rhythm of this ratio can be observed, according to the graphs below. For the next two quarters, we expect some growth in the delinquency ratio over 90 days, which may, as we expect, reach approximately 4.9% of the total portfolio, which may stabilize by 4Q09.

The graph below presents a 61 to 90-day delinquency ratio, showing a negative acceleration and stability in the past two months, reaffirming previous statements.

Funding Financial Margin Interest**Loan Portfolio Portfolio Indicators**

Aiming at facilitating the follow-up of the quantitative and qualitative performance of Bradesco's loan portfolio, we present below a comparative summary of the main figures and indicators

	R\$ milhões (exceto percentuais)			
	Mar09	Dez08	Mar08	Dez07
Total Loan Operations	174,121	173,423	139,019	131,307

We remain prepared to take full advantage of any business opportunities. In 2009 we will continue giving priority to increasing the loan portfolio always respecting the granting policy, focusing on the risk/return ratio

Funding Financial Margin Breakdown

				R\$ million	
	Financial Margin		Funding		
	1Q09	4Q08	1Q08	Variation	
				Quarter	12 months
Interest due to Volume				46	261
Interest due to Spread				(127)	(85)
Interest Financial Margen	749	830	573	(81)	176

In 1Q09, the funding interest financial margin reached R\$749 million against the R\$830 million from the previous quarter, a decrease of 9.8% or R\$81 million. This variation was impacted negatively in R\$127 million in spreads due to the interest rate drop in the market, and partially minimized in R\$46 million due to the volume.

Year-on-year, there was an increase of 30.7% or R\$176 million in the financial margin, mainly due to the increase in the volume of transactions that contributed positively to the financial margin in R\$261 million. This result offset the margin effect due to spreads decrease in the amount of R\$85 million.

Loan x Funding

To analyze Loan Operations x Funding ratio, it is necessary to discount the committed amount related to compulsory deposits collected with Bacen and the amount of funds available held for service stations operations from total clients funding. These funds added to those derived from domestic and international lines provide the institution's funding to meet loans and financing needs.

Banco Bradesco shows low reliance on interbank funds and foreign credit lines in view of its effective funding capacity with clients. This efficiency is a result of an extensive network, an ample product portfolio and market's confidence in Bradesco brand.

As you can see below, the percentage of utilization of funds improved when compared to previous periods. This shows that Banco Bradesco was able to basically meet the funding needs required in loan operations, by means of funds raised with clients.

Q-o-q, seasonal factors and economic activity slowdown impacted the growth of funding and investments as can be observed in the chart below. Funds utilization ratio kept improving throughout the period, which shows clients confidence in Bradesco Brand.

Funding x Investments	R\$ million			Variation %	
	Mar09	Dec08	Mar08	Quarter	12 months
Demand Deposits + Investment Account	25,882	28,612	26,680	(9.5)	(3.0)

B/A (%)	82.9	83.0	92.1		

(1) Debentures used basically to back purchase and sale commitments.

(2) Does not comprise amounts from public bonds pegged to savings accounts; and

(3) Comprises an amount related to cards (cash and installment purchase plan from storeowners) of R\$7,054 million in March 2009, R\$7,548 million in December 2008 and R\$5,309 million in March 2008. In March 2009 it comprises R\$3,662 million in December 2008, R\$3,564 million from CDI acquired in the open market.

Deposit, Debentures and Subordinated Debt

Below we point out the growth of such funding:

	R\$ million			Variation %	
	Mar09	Dec08	Mar08	Quarter	12 months
	Demand Deposits + Investment Account	25,882	28,612	26,680	(9.5)
Savings Deposit	37,392	37,769	33,290	(1.0)	12.3
Time Deposit	105,424	97,414	46,430	8.2	127.1
Debentures	33,182	36,138	36,593	(8.2)	(9.3)
Borrowing and Onlending	30,420	31,947	24,013	(4.8)	26.7
Funds from Issuance of Securities	9,280	9,012	7,222	3.0	28.5
Subordinated Debt	19,745	19,249	16,537	2.6	19.4
Total	261,325	260,141	190,765	0.5	37.0

Demand Deposits and Investment account

The R\$798 million variation in the last 12 months, ended March 2009 derives from: (i) reduction of deposits from corporate clients in the amount of R\$455 million; and: (ii) by reduction of deposits from individuals, in the amount of R\$343 million.

A decrease of R\$2,730 million in the last quarter is composed of: a) decreased deposits from corporate clients in the amount of R\$879 million; and b) lower deposits from individuals in the amount of R\$1,851 million resulting from the 4Q08 seasonality by the liquidity increase (Christmas bonus).

Savings Deposits

The increase in the 12-month period is mainly due to: a) deposits made partially in view of the migration of resources deriving from investment funds; and b) deposits remuneration (TR + 0.5% p.m.), which reached 8.1% in the last 12 months.

The variation in the quarter is basically due to deposits remuneration (TR + 0.5% p.m.), which reached 1.9% in 1Q09, mitigated by the redemptions recorded in the quarter.

Time Deposits

The increment in the year mainly derives from: a) deposits remuneration; b) higher volume raised in the period resulting from investors and branch network clients, partially, due to the migration of resources deriving from investment funds and c) as funding for loan demand growth.

Debentures

The negative 8.2% and 9.3% variation q-o-q and y-o-y, respectively, refer to the repurchase of these securities that had been used as a base in purchase and sales commitments.

Subordinated debts

In March 2009, Bradesco's subordinated debts amounted to R\$19,745 million (R\$3,261 million abroad and R\$16,484 million in Brazil). In the 12-month period R\$1.4 billion of Subordinated CDB in the domestic market were issued, operations with maturity in 2014. It is worth pointing out that, out of the total subordinated debts, R\$10,942 million are used for Capital Adequacy Ratio (Basel II) calculation purposes.

Borrowing and Onlending

The variation in 12-month period ended March 2009 is due to the increase in the volume of borrowings and onlending abroad, in the amount of R\$3,325 million, and in Brazil, in the amount of R\$3,082 million (mainly through Finame and BNDES operations), influenced by the exchange variation of 32.4% in the period, which impacted borrowings and onlendings denominated and/or indexed in foreign currency, whose balances were R\$9,355 million in March 2008 and R\$12,680 million in March 2009.

The variation in the quarter is due to: a) the decrease in the volume of borrowings and onlendings abroad in the amount of R\$1,525 million, influenced by the negative exchange variation of 0.9% in 1Q09, which impacted onlendings and borrowings denominated an/or indexed in foreign currency, whose balances were R\$14,205 million in December 2008 and R\$12,680 million in March 2009.

Funds from Issuance of Securities

The 3.0% increase or R\$268 million in 1Q09 mainly results from the increase in agribusiness credit letters operations in the amount of R\$282 million and MT100 securities issue in the amount of R\$160 million, which was mitigated by the reduction in mortgage letters in the amount of R\$184 million.

In the 12-month period, there was a 28.5% variation, or R\$2,058 million, mainly due to the increase in agribusiness credit letters in the amount of R\$1,635 million, the issuance of MT100 securities, in the amount of R\$2,147 million, which was mitigated by the reduction in debentures in the amount of R\$1,133 million resulting from the purchase of said securities.

Securities / Other Financial Margin Interest***Securities / Other Financial Margin Breakdown***

		R\$ million				
		Financial Margin		Securities/Other		
		1Q09	4Q08	1Q08	Variation	
					Quarter	12 months
Interest	due to volume				40	212
Interest	due to spread				45	(83)

Edgar Filing: BANK BRADESCO - Form 6-K

Interest Financial Margin	714	629	585	85	129
Revenues	4,820	5,779	2,460	(959)	2,360
Expenses	(4,106)	(5,150)	(1,875)	1,044	(2,231)

Q-o-q, there was a 13.5% increase, or R\$85 million. In 1Q09, interest financial margin in Securities/Other reached R\$714 million against R\$585 million in the same quarter of the previous year a growth of 22.1% or R\$129 million.

Securities Financial Margin - Interest

Insurance Financial Margin Breakdown

	R\$ million				
	Financial Margin			Insurance	
	1Q09	4Q08	1Q08	Variation	
				Quarter	12 months
Interest due to volume				21	56
Interest due to spread				33	(60)
Interest Financial Margin	553	499	557	54	(4)
Revenues	1,926	1,425	1,581	501	345
Expenses	(1,373)	(926)	(1,024)	(447)	(349)

The result from insurance business line, q-o-q, posted a 10.8% growth (R\$54 million) in the interest financial margin, mainly influenced by the increase in the volume of technical provisions that, in 4Q08 was R\$64,587 million and increased to R\$66.673 million in 1Q09.

In spite of a greater volume in technical provisions of R\$66.673 million for 1Q09 against R\$59,722 million for the same period in 2008, the financial insurance margin remained practically steady, due to the drop in interest rates.

Financial Margin Non-Interest

Financial Margin Non-Interest Breakdown

	R\$ million				
	Financial Margin			Insurance	
	1Q09	4Q08	1Q08	Variation	
				Quarter	12 months

Edgar Filing: BANK BRADESCO - Form 6-K

Loans	312	353	232	(41)	80
Funding	(60)	(56)	(38)	(4)	(22)
Insurance	59	42	95	17	(36)
Securities/Other	758	119	217	639	541
Total	1,069	458	506	611	563

Variations in the Non-Interest Financial Margin mainly derive from:

Loans: represented by recovery of loan operations written down for losses, we can point out the largest recoveries that took place in 4Q08, due to the higher volume of funds in economy.

Fundings: represented by expenses with the Deposit Guarantee Association, the growth in the periods compared is mainly due to the increase in the client base.

Insurances: represented by gains with equities, variations in the periods are associated to market conditions which enabled a higher/lower opportunity to gain realization.

Financial Margin Non-Interest

Securities/Other: the variations recorded are related to higher gains with securities/treasury, which we highlight the variation in 4Q08, mark-to-market loan derivatives (CDS – Credit Default Swap), related to Brazilian government securities issued abroad (R\$132 million in 1Q09 and R\$(276) million in 4Q08), deriving from the lower volatility of global financial markets.

Insurance, Private Pension Plans and Certificated Savings Plans

* Life/VGBL/PGBL/Traditional.

** The ratios were reclassified pursuant to Susep Circular Letter 356. For comparison purposes, the amount of R\$99.8 million related to INBR tail expansion from 5 to 7 years (life line) was excluded from 4Q08 and the year 2008. The historic increase in the occurrence date and the notice date ratio was adjusted from 60 to 84 months to comply more precisely with the statistical behavior of older Claims.

*** Data of January 2009, November 2008 and February 2008.

Due to a solid structure, a policy of cutting-edge products and the confidence conquered on the market, Bradesco Vida e Previdência maintained its leadership in January 2009 in the two markets where it operates, with a 34.2% share of income from pension plans and VGBL and 17.4% from individual insurance premiums.

1Q09 X 1Q08

Increase in the Social Contribution on Net Income (CSLL) rate from 9% to 15%, which encumbered 1Q09 result in R\$36 million, a drop on the production of private pension plans and drop in the financial result due to a drop in the interest rate and the dividends paid in 2008, in the amount of R\$2.3 billion, were the reasons for the 16.6% drop in the net income of 1Q09 y-o-y.

1Q09 X 4Q08

Despite the good performance of the main indicators of life segment, such as claim (a 4.7 p.p. decrease) and selling with a 2.6 p.p. drop, and the improvement in the administrative efficacy, the company posted a 6.8% decrease in the result compared to the previous quarter. This decrease was a consequence from the lower financial result calculated in the period, which reduced the net income in R\$55 million, due to the drop in interest rate and the dividend paid in 4Q08, in the amount of R\$670 million.

The technical provisions of Bradesco Vida e Previdência, in March 2009, reached R\$57.4 billion, R\$54.7 billion from private pension plans and VGBL and R\$2.7 billion from life, personal accidents and other lines, up by 11.2% in relation to March 2008.

The Investment Portfolio of Private Pension Plan and VGBL represented 37.4% of the market. Source: Fenaprevi (data from January 2009).

Growth of Participants and Life and Personal Accidents Policyholders

In March 2009, the number of Bradesco Vida e Previdência clients grew 13.0% in relation to March 2008, exceeding the record of 1.9 million private pension plan and VGBL participants and 17.8 million of personal accident life insurance policyholders. This expressive growth was driven by the strength of Bradesco brand and by the agreement in selling and management policies.

1Q09 X 1Q08

The R\$5 million drop in the financial result, mainly, from lower gain with shares, and the increase in the CSLL rate to 15%, which encumbered 1Q09 expenses in R\$5 million were the triggers for the 15.3% drop in the net income y-o-y.

1Q09 X 4Q08

The 13.4% drop in certified savings plans, together with the drop in interest rate and lower gains in the realization of shares, which directly impacted 1Q09 results, offset by the significant decrease in the administrative expense, reduced the net income in R\$5 million compared to 4Q08.

Bradesco Capitalização started 2009 in an outstanding position in the certificated savings plans market, a result of a policy of transparent performance, characterized by fitting its products according to the consumers' potential demand.

In order to offer a plan that best suits clients' profile and budget, several products were developed that vary according to the payment conditions (lump-sum payment or monthly payment), term of contribution, frequency of drawings and premium amounts. This phase was mainly reminded by the approach to the public, by consolidating the *Pé Quente Bradesco* products family.

Among them, we can highlight the performance of social and environmental products, where part of the amount collected is transferred to social responsibility projects, in addition to enabling the client with a financial reserve. Currently, Bradesco Capitalização has a partnership with the following social and environmental institutions: Fundação SOS Mata Atlântica, which contributes to the development of reforestation projects; Instituto Ayrton Senna, whose main differential is the transfer of a percentage of the amount collected with securities to social projects; Brazilian

Institute of Cancer Control, who contributed with the development of prevention, early diagnosis and treatment of cancer in Brazil, and Fundação Amazonas Sustentável, where part of the amount collected is destined to the development of environmental preservation and sustainable development programs and projects.

* Data of January 2009, November 2008, July 2008, May 2008, February 2008, November 2007, July 2007 and June 2007.

(1) In compliance with Susep Circular Letter 379/2008 as of January 2009, amounts related to technical provisions are presented by gross amount and reinsurance balance (PPNG, PSL and IBNR) were classified in assets on March 31, 2009.

(2) For 4Q08 ratio calculation, R\$40 million related to damages caused by the flood in the state of Santa Catarina were excluded.

Insurance premiums from Auto/RE line corresponded to 9.8% of the market (market data of January 2009).

1Q09 X 1Q08

The increase in the CSLL rate, the drop in the financial result due to the drop in the interest rate, offset by the decrease in administrative expenses, caused a R\$12 million decrease in 1Q08's net income y-o-y.

1Q09 X 4Q08

The improvement of 5.4 p.p. in the combined index is a reflex from the better performance in the following indexes, being responsible for the increase in 1Q09's result.

Claims affected in the last quarter by floods in the Southeastern Brazil, posted a 3.0 p.p. drop in 1Q09, not considering the amount of R\$40 million in 4Q08 that refer to indemnifications paid related to floods already mentioned;

Administrative efficiency the 4.6 p.p. drop in this index is a reflex from renegotiations with suppliers and service providers, taking into account the labor agreement from January 2009.

Grupo Bradesco de Seguros e Previdência maintained an outstanding position among main insurance companies of the basic lines in the Brazilian insurance market, contributing to the market global sales, reaching 5.1% of total in January 2009.

In lines related to equity insurance, Bradesco Auto/ RE has renewed the insurance programs of its main clients through partnerships with brokers specialized in the segment and proximity to Bradesco Corporate and Bradesco Empresas.

The fact that the oil industry had outstanding performance and civil construction had picked up has also contributed to the growth of Bradesco Auto/RE in this segment.

In Aeronautic and Maritime Hull insurances, the interchange with Bradesco Corporate and Bradesco Empresas Managers is highly used, taking advantage of market increase in sales of new crafts, as well as in the maritime segment, naval constructions.

The transportation segment is still the primary focus, with essential investments to improve new businesses, especially, among others, the qualification of Transportation Products Managers that will be established in the main Brazilian economic centers, and the creation of Bradesco Cargo System, a complete transport insurance management system on the internet.

Other important launch was the Auto + Residencial insurance that consists of the policyholder contracting vehicle and home insurances together, providing more protection for policyholders.

Despite strong competition in the Auto/RCF Lines, the insurance company has increased its client base. This is mainly due to the current product improvement and to the creation of products for specific groups. Among these, we can name *Bradesco Seguro Exclusivo Cliente Bradesco*, for Banco Bradesco's account holders, *Auto Mulher*, for the female public and *Auto Corretor*, for insurance brokers.

Grupo Bradesco de Seguros e Previdência market share in the Auto/RCF portfolio in January 2009 was 14.3% .

Number of Policyholders of Auto/RE Line

In the mass insurance of basic lines, whose products are targeted at individuals, self-employed professionals and SMEs, the launch of new products, along with the continuous improvement of methods and systems, have contributed to the growth of the client base. Such increase can be observed mainly in residential and equity insurance, such as *Bradesco Seguro Residencial* and *Bradesco Seguro Empresarial*. The new insurance line targeted at supporting machinery and equipment used in sectors in expansion (such as agriculture, civil construction and industry) also stands out: *Bradesco Seguro Equipamentos*, *Bradesco Seguro Benfeitorias*, *Bradesco Seguro Penhor Rural Público* and *Bradesco Seguro Penhor Rural Privado*. These products gained more competitiveness and a new issue process, enabling a faster quoting process and a better use of business opportunities.

* Data of January 2009, November 2008, July 2008, May 2008, February 2008, November 2007, July 2007 and June,2007.

1Q09 X 1Q08

There was an expressive y-o-y growth in the net income due to the 25.2% increase in revenues (above market, which was 15.0% data from December 2008), a 3.3 p.p. decrease in claims and administrative expenses lower than in 1Q08, despite the collective bargaining agreement. These factors offset the increase in the CSLL rate that encumbered the result in 6% of the taxable revenue.

1Q09 X 4Q08

Factors that influenced the result in 1Q09 and that together caused a 21.2% increase compared to 4Q08:

Drop of 5.8 p.p. in claims, which in 4Q08 were affected by the appreciation of the dollar, a direct reflex in laboratory costs, prosthesis and medicine;

Administrative expenses lower than in 2008, despite the collective bargaining agreement of January 2009; and

Financial result posting a slight decrease compared to 4Q08, due to the drop in the interest rate.

In March 2009, Bradesco Saúde and Bradesco Dental maintained its outstanding market position in the corporate segment (source: ANS). Brazilian companies are increasingly convinced that health and dental insurance are the best alternatives for meeting their medical, hospital and dental care needs.

Over 27 thousand companies in Brazil have Bradesco Saúde and Bradesco Dental insurance. Among the 100 largest companies in revenues in Brazil, 39 are clients from both insurance companies. When considering Mediservice, this figure is increased to 45. (source: Exame Magazine *Melhores e Maiores* from July 2008).

Mediservice S.A. became part of Grupo Bradesco de Seguros e Previdência as of February 22, 2008. With a portfolio of over 263,000 clients, Mediservice has healthcare and dental plans for corporate clients in post-payment basis.

Number of Policyholders of Health Line

The three companies together have 3.9 million clients. The large market share of corporate insurance in the total of this portfolio (93.8% in March 2009) confirms its high level of expertise and customization in the corporate plans, a competitive advantage in the supplementary health insurance market.

Bradesco Dental

	1Q09	4Q08	3Q08	2Q08
Net Income (R\$ million)	10	6	6	6
Net Premiums Written (R\$ million)	48	46	42	26
Technical Provisions (R\$ million)	24	21	20	20
Claims Ratio %	54.0	57.1	53.0	40.6
Selling Ratio %	5.5	4.8	3.8	4.0
Combined Ratio %	71.5	78.5	76.1	63.5
Insured (in thousands)	1,221	1,135	1,072	957

A drop of 7.0 p.p. in the combined ratio is a reflex of claims drop and the maintenance of general and administrative expenses to 2008 levels, despite the collective bargaining agreement of 6.7% in January 2009, which reflected in the 66% increase in the net income in relation to the net income posted in 4Q08.

Fee and Commission Income

Below, the breakdown and variations of fee and commission income for the respective periods:

Fee and Commission Income	R\$ million				
	1Q09	4Q08	1Q08	Variation	
				Quarter	12 Months
Card Income	823	865	677	(42)	146

Asset Management	369	386	385	(17)	(16)
Collections	236	254	225	(18)	11

Edgar Filing: BANK BRADESCO - Form 6-K

Interbank Fee	87	95	83	(8)	4
Consortium Management	80	84	72	(4)	8
Custody and Brokerage Services	89	101	72	(12)	17
Tax Payments	63	61	59	2	4
Other	161	96	153	65	8
Total	2,837	2,818	2,803	19	34

Below, the explanations of main items that influenced the expansion of fee and commission income between the periods:

Card Income

In 1Q09, the R\$42 million decrease is basically related to the lower volume of transactions carried out when compared to 4Q08, which posted a seasonal increase.

Y-o-y, the increase of R\$146 million reflects the 14.7% increase of card base, which increased from 74,251 thousand in March 2008 to 85,185 thousand in March 2009, as well as an increase of 14.0% related to the number of transactions, which was 238,940 thousand in 1Q08 to 272,452 thousand in 1Q09.

Revenues in 1Q09 reached R\$17.3 billion with a 12.3% growth compared to 1Q08.

In 1Q09, Cards Fee Income reached R\$823 million, a 21.5% growth compared to 1Q08, due to excellent performance, mainly in purchase and fee income.

Checking Accounts

In March 2009, we reached the historical record of 20.2 million account holders, accounting for a growth of 5.7% in relation to the same period of last year.

The balance of revenues with Bradesco's Checking Account in 1Q09 was R\$548 million, maintaining almost stable compared to 4Q08, considering the lower number of business days.

In the comparison between 1Q09 and 1Q08, the 5.2% decrease, R\$30 million, is mainly due to the realignment of fees charged from individuals as of 2Q08.

Loan Operations

In 1Q09, the R\$59 million increase was basically due to the recovery in operation volume, main vehicle financing and commission on the assigned loan facility.

When comparing 1Q09 and 1Q08, the R\$118 million decrease was impacted by the fact that Loan Opening Fee (TAC) was no longer charged from individuals in the amount of R\$153 million, mitigated by greater Income from Guarantees Rendered in the amount of R\$43 million.

Asset Management

Lower asset management revenue in 1Q09, R\$17 million, was basically impacted by the lower number of business days, as well as by the realignment of administration fees.

The balance of Funds and Portfolios Managed had a 7.4% improvement in March 2009 compared to December 2008, highlighting equities that contributed with a 14.8% growth in the period, due to partial market recovery after a period of great volatility, recovering from the drop of 18.6% recorded in 4Q08.

In the 12-month period, the increase in the Managed Resources portfolio recorded a 9.3% growth.

Shareholders` Equity	R\$ million			Variation %

Overall Total		200,975	187,151	183,822	7.4	9.3

Collection

The 7.1% decrease in 1Q09 is related to volumes processed due to the lower number of business days.

Y-o-y, the 4.9% increase is basically due to the higher business volume, of which Bradesco is market leader with 30.2% market share, according to data made available by the Brazilian Central Bank (Sisbacen - December/08 base)

Interbank Fee

The factors that contributed to the 8.4% decrease in 1Q09 derived from the lower volume of securities and documents offset due to the less number of business days, in addition to the decrease in financial transactions in the period.

In the annual comparison, the 4.8% growth is essentially due to the increase in transaction volume.

Payment

The increases observed in the last 12 months are essentially due to the increase on the volume of tax collected, of which Bradesco is the leader among the private banks for the following taxes: Federal Revenue Collection Document (DARF), DAF and Social Pension Plan Voucher (GPS).

Source: Federal Revenue/Serpro and INSS/Febraban.

Consortium Management

The 11.1% growth q-o-q results from the 16.5% increase in active quotas, varying from 301,011 March 31, 2008 to 350,744 on March 31, 2009, where Bradesco Consórcios is leader in all segments it operates.

Q-o-q, the decrease in revenues derive from the reduction in the active real estate quotas from 139,841 to 137,969.

Custody and Brokerage Services

The 11.9% reduction q-o-q was basically impacted by the lower volume of transactions carried out in the Stock Exchange.

Y-o-y, the 23.6% growth is basically related to the acquisition of Àgora Corretora.

Administrative and Personnel Expenses

Total Administrative and Personnel Expenses	3,903	4,180	3,552	(277)	351	

In 1Q09, Administrative and Personnel Expenses decreased R\$277 million when compared to the previous quarter, down by 6.6%, from R\$4,180 million in 4Q08 to R\$3,903 million in 1Q09.

When comparing to 1Q08, Administrative and Personnel Expenses increased R\$351 million or 9.9% .

Personnel Expenses

In 1Q09, personnel expenses reached R\$1,776 million, a 6.0% decrease (R\$114 million), compared to the previous quarter.

Structural decrease of R\$64 million, of which:

R\$52 million referring to lower expenses with vacation concentration in 1Q09.

Non-structural decrease of R\$50 million, of which:

R\$18 million referring to lower training expenses; and

R\$29 million from lower expenses with managers and employees profit sharing (PLR).

When comparing 1Q09 to 1Q08, the R\$39 million growth was mainly due to:

Structural R\$134 million, of which:

R\$150 million refer to the expansion of service stations (from 32,758 in 1Q08 to 39,427 in 1Q09) and the number of employees (from 83,124 in 1Q08 to 86,650 in 1Q09), as well as the increase in salary levels (according to the 2008 collective bargaining agreement - 8.15% to 10%), in benefits and other; and

Mitigated by the higher vacation concentration y-o-y in the amount of R\$17 million.

Non-structural decrease of R\$(95) million, of which:

R\$61 million due to lower expenses from managers and employees profit sharing (PLR); and

R\$31 million from lower expenses with labor claims.

Administrative Expenses

In 1Q09, administrative expenses reached R\$2,127 million, a 7.1% decrease (R\$163 million), compared to 4Q08.

Main variations were:

R\$101 million due to lower expenses with marketing and advertising, reflecting the end-of-year seasonality, months where expenses with advertisement are concentrated;

R\$61 million due to lower expenses with third-party services; and.

R\$17 million due to lower expenses with maintenance and repairs.

Comparing 1Q09 to 1Q08, there was a R\$312 million growth, a 17.2% variation, mainly due to:

organic growth and resulting increment of service stations (from 32,758 in 1Q08 to 39,427 in 1Q09), that directly impacted main administrative expenses items;

higher business volume;

investments in the improvement and optimization of IT platform; and

contractual adjustments based on inflation indexes of the period (IGP-M 6.3% and IPCA 5.6%) .

Coverage ratio ()*

The Coverage Ratio of the 12-month period, that had been posting continuous improvement up to 4Q07 started a drawback trend, basically influenced by: (i) investments in our technological platform (IT Improvements Project); (ii) expansion of our customer service network (from 32,758 in 1Q08 to 39,427 in 1Q09); and (iii) by fees realignment and by the end of collection of Loan Opening Fee (TAC) for individuals as of 2008.

In the first three months of 2009, the drawback was 1.5 p.p. (from 73.1% to 71.6%) and, y-o-y, there was a 7.1 p.p. worsening (from 78.7% to 71.6%) .

This drawback trend shall be reversed in the following quarters due to increase in business and client base.

Tax Expenses

The R\$89 million increase in tax expenses in the last quarter mainly derives from the increase in PIS/ Cofins expenses amounting to R\$80 million, due to the increase in taxable income in 1Q09, specially financial margin.

Y-o-y, tax expenses remained practically steady.

Equity in the earnings of unconsolidated companies

In 1Q09, equity in the earnings of unconsolidated companies reached R\$6 million, a R\$41 million decrease compared to 4Q08. When comparing 1Q09 to 1Q08, there was a R\$26 million decrease.

Both the variation in the period and the variation in the quarter is mainly due to the lower results obtained from the unconsolidated company IRB-Brasil Resseguros.

Other Operating Expenses (Net of Operating Revenues)

In 1Q09, other operating expenses, net of operating revenues, reached R\$1,262 million, a 25.8% increase (R\$259 million) compared to the previous quarter.

Q-o-q, the negative variation of R\$259 million derives mainly from: higher operating provision in the amount of R\$192 million basically due to civil provisions including provision for contingencies related to economic plans.

Y-o-y, the increase of R\$254 million is mainly due to higher expenses with operating provisions in the amount of R\$91 million, the increase in sundry losses in the amount of R\$74 million, and the increase in goodwill amortization in the amount of R\$25 million.

Operating Result

In 1Q09, the Operating Result reached R\$2,371 million, a 2.8% decrease (R\$68 million), compared to 4Q08.

The variation in the quarter is due to: (i) higher allowance for loan losses expenses, in the amount of R\$958 million; (ii) higher operating expenses (net of revenues), in the amount of R\$259 million; (iii) higher tax expenses in the amount of R\$89 million; (iv) decrease in the equity in the earnings of unconsolidated companies in the amount of R\$41 million; and (v) reduction of operational income from insurance, private pension plan and certificated savings plans, in the amount of R\$6 million, **mitigated** by: (vi) higher financial margin, in the amount of R\$989 million; (vii) decrease in personnel and administrative expenses, in the amount of R\$277 million; and (viii) increase in fee and commission income, in the amount of R\$19 million.

Comparing 1Q09 to 1Q08, there was a decrease of R\$197 million, a 7.7% variation.

The variation in the period refers to: (i) higher expenses with allowance for loan losses, in the amount of R\$1,253 million; (ii) increase in personnel and administrative expenses, in the

amount of R\$351 million; (iii) higher operating expenses (net of revenues), in the amount of R\$254 million; and (iv) decrease in the equity in the earnings of unconsolidated companies in the amount of R\$26 million, **mitigated** by: (v) higher financial margin, in the amount of R\$1,611 million; (vi) increase in fee and commission income in the amount of R\$34 million; (vii) lower tax expenses, in operating amount from R\$20 million; and (viii) increase in operating income from insurance, private pension plans and certificated savings plan, in the amount of R\$22 million.

Non-Operating Income

In 1Q09, non-operating income was negative in R\$39 million, due to higher expenses with the sale of assets and higher provision for foreclosed assets. Y-o-y, there was a decrease of R\$54 million, due to higher expenses with the sale of assets and higher provision for foreclosed assets.

Sustainability

Bradesco published its 2008 Sustainability Report, which presents the core of Bradesco Organization's sustainability culture and a set of information regarding the main aspects of the initiatives carried out by the Company in compliance with the economic, environmental and social guidance already integrated by the Bank of the Planet. To read the 2008 Sustainability Report, visit www.bradesco.com.br/rsa.

National Day of Voluntary Action (*Dia Nacional de Ação Voluntária*) More than 1.6 million services were provided in the 7th edition of the National Day of Voluntary Action that took place on March 15, promoted by Fundação Bradesco in its 40 school units and other 208 locations near them. This year, 31,478 people volunteered, most of them students, teachers and employees of Fundação Bradesco and Bradesco Organization.

Investor Relations Area IR

In 1Q09, we participated in four seminars abroad (Miami, Cancun, Acapulco and New York) and, for the second time, in the World Money Show, in Orlando.

In Brazil, we held Apimec meetings in the cities of Ribeirão Preto, Santos and Florianópolis, the first two in partnership with the Brazilian Institute of Investors (INI). We also carried out an INI meeting in São Paulo and took part in conferences in the cities of São Paulo and Campinas, in addition to meet investors in one-on-one meetings at our headquarters.

Corporate Governance

Bradesco is AAA+ rated in Management & Excellence, placed as the first Latin American bank to obtain the highest Corporate Governance rating, in addition to the AA (Great Corporate Governance Practices) rating granted by Austing Rating.

Every shareholder is entitled, in addition to 100% of Tag Along to common shares and 80% to preferred shares, to a minimum mandatory dividend of 30% of adjusted net income, percentage higher than the minimum 25% set forth by the Brazilian Corporate Law. The preferred shares are entitled to dividends 10% higher than those attributed to common shares.

Regarding the Corporate Governance structure, Bradesco's Board of Directors is supported by 5 statutory committees (Ethical Conduct, Audit, Internal Controls and Compliance, Compensation and Integrated Risk Management and Capital Allocation), in addition to 33 Executive Committees that support the Board of Executive Officers.

On March 10, 2009, all matters of the agenda of the Shareholders' Meetings were approved, among them, the common and preferred shares reverse split with the simultaneous split of each share after the reverse split.

For further information, please visit: <http://www.bradesco.com.br/ri/> Corporate Governance Section.

(*) For comparison purposes, in 2008, there was a 50% stock bonus, which was applied to 2007; and

(**) Number of shares (disregarding treasury shares) x closing price of common and preferred shares of the last day of the period.

In 1Q09, Bradesco preferred shares appreciated by 2.5% (adjusted per dividends), while Ibovespa had a positive performance of 9.0% . The period was remarked by stock market volatility, still the effects of the word financial crisis.

Main Ratios

Market value: considers the closing price of common and preferred shares multiplied by the respective number of shares (disregarding treasury shares).

Market value/shareholders equity: indicates the number of times Bradesco s market value is higher than its accounting shareholders equity.

Formula used: number of common and preferred shares multiplied by the closing price of common and preferred shares of the last business day of the period. The amount is divided by the accounting shareholders equity of the period.

Dividend yield: is the ratio between share price and dividends and/or Interest on Shareholders' Equity distributed to shareholders in the last 12 months, indicating the investment result by the profit sharing.

Formula used: amount received by shareholders as dividends and/or Interest on Shareholders' Equity in the last 12 months, divided by the preferred share closing quote of the last day of the period.

Payout Index: it indicates the percentage of net income paid as dividends/Interest on Shareholders' Equity (YTD).

Formula used: amount received by shareholders as dividends and/or Interest on Shareholders' Equity (net of income tax) divided by the book net income adjusted by non-recurring goodwill amortization (disregarding legal reserve (5% of net income)).

Dividends/Interest on Shareholders' Equity JCP

In 1Q09, R\$647 million was allocated to shareholders as Dividends and Interest on Shareholders' Equity, equivalent to 34.7% of adjusted net income for the quarter and 34.0% YTD. The amounts allocated over the years have surpassed the limits set forth by the Brazilian Corporation Law and Bradesco's Bylaws.

Investments in Infrastructure, Information Technology and Telecommunication

Bradesco has been continuously increasing its investments in IT, especially infrastructure, IT and telecommunications, always with a view to providing its clients with higher quality service in high availability and reliable environment. Only in the first three months of 2009 Bradesco invested R\$793 million (R\$194 million in infrastructure and R\$599 million in IT/telecommunications).

Making evident the strategic importance of business support and the constant concern of the Bradesco in automating its processes, optimizing resources, since 2004, Bradesco has invested approximately R\$10.5 billion in infrastructure, information technology and telecommunications.

	Years					R\$ million
	2004	2005	2006	2007	2008	1Q09
	Infrastructure	230	245	354	478	667
IT/Telecommunication	1,302	1,215	1,472	1,621	2,003	599
Total	1,532	1,460	1,826	2,099	2,670	793

On a daily basis, approximately 169 million transactions are processed, from clients and back office, to an account basis that exceeded 52 million, and over 85 million debit/credit cards. E-channels respond for 87% of transactions carried out by clients.

Our over 10 million Internet Banking users can see the image of checks debited into account, front and back, and they can also print copies.

After transferring 100% of mainframe processing platform to the new Information Technology Center (CDI), the migration of servers and sub-systems of other technologic platforms are at an advanced stage.

We also would like to point out the mass use of security devices such as chip card, biometrics (Palm Secure), security key card (tancode) and electronic (token), available in customer service channels to provide them safer transactions.

*Market Risk**Market Risk Analysis*

For Bradesco, risk management is essential in all its activities and uses it to add value to its business as it supports the commercial areas in the planning of its activities, maximizing own and third-party fund use for the benefit of

shareholders and the community. For further information on risk management and compliance, please visit: www.bradesco.com.br/ir - [Financial Information/ Quarterly Reports](#).

The 1Q09 maintained the same behavior observed in 4Q08, when market recovery was followed by uncertain moments regarding the deep impact of the crisis upon countries' economies. Central

Banks throughout the world continued adopting measures aiming at inserting liquidity within the market, to facilitate credit and reinstate trust in the financial systems affected by the crisis. These measures included the maintenance of monetary policy flexibility, keeping interest rates in the lowest levels never before seen in history, creating systems that guarantee the transactions among financial institutions and the purchase of long-term securities (United States and Japan).

Edgar Filing: BANK BRADESCO - Form 6-K

Despite the disclosed plans, the lack of details and the concern with the real efficacy of the measures that had already been adopted contributed for the high volatility of the market, however, way lower than the one observed in 4Q08. Corporate results disclosure throughout the quarter confirmed the strong impact of the crisis upon activities from different segments. Gross Domestic Product (GDP) in 4Q08 posted a severe drop in the main advanced economies (United States, the Eurozone and England) and also in emerging economies, showing the high level of global slowdown. However, March was slightly more optimistic. The main reasons for that came from the United States, from some North American Banks stating that the first months of 2009 posted revenues and that they would no longer need help from the government, and from the disclosure of some economic indexes that posted some figures above market's expectations. In addition, this slight optimistic scenario was strengthened by the approval of the Public Private Investment Program by the United States, whose purpose is to absorb up to US\$1 trillion bad securities from the banks (securities pegged to home and commercial mortgages), and by some signs that China would be recovering the demand for basic materials.

In the domestic scenario, the Brazilian Government, in order to stimulate credit, announced a housing program that expects the expansion of real state financing and job creation in civil construction, and which kept low taxes to stimulate the sectors that had strong slowdown, mainly the automobile industry.

Regarding the monetary policy, due to the drop in the economic activity and prices settlement, the Monetary Policy Committee (Copom) began the flexibility cycle and decided to reduce the basic interest rate (Selic) in both meetings held in the period, from 13.75% to 11.25% p.a.. Futures market for local interest rates is already studying the other reductions in the Selic rate for 2009. It is also worth highlighting Bacen's revision for GDP growth projections, from 3.2% to 1.2%, and for the inflation, from 4.7% to 4% in 2009.

The decrease of volatility in the 1Q09 compared to the 4Q08, allied to better market liquidity, influenced the Trading Portfolio VaR that posted a decrease in the period, mainly due to IPCA and Sovereign bonds/Eurobonds and Treasury risk factors.

Backtesting Trading Portfolio VaR

The methodology applied and current statistical models are validated on a daily basis using backtesting techniques. The backtesting compares the daily VaR calculated with the result obtained with these positions (excluding result with intraday positions, brokerage rates and commissions). Its main purpose is to monitor, validate and evaluate the adherence to the VaR model and the number of disruptions must be in accordance with the reliability interval previously established in the modeling.

Stress Analysis

To estimate the possible loss not included in VaR, the Organization evaluates daily the possible effects on the positions of stress scenarios. Stress analysis is a tool that tries to quantify the negative impact of shocks and economic events financially unfavorable to the positions of the institution. Thus, crisis scenarios are prepared by the Organization's economic area, for risk factors in which the trading portfolio has a position. Thus, considering the diversification effect among risk factors, the possibility of the average estimated loss in a stress situation would be R\$1,118 million in the 1Q09, and the maximum estimated loss would be approximately R\$1,576 million.

Trading Portfolio Stress Analysis

	R\$ thousand							
	Without Diversification				With Diversification			
	Mar09	Dec08	Sep08	Dec08	Mar08	Mar09	Dec08	Sep08
Stress Analysis - Trading Portfolio

Besides the follow-up and control of VaR and stress analysis, a sensitivity analysis of the trading portfolio is made daily, measuring the effect on the portfolio of the moves of the market curves and prices.

Independent Auditors Report on the Limited Review of Supplementary Accounting Information presented in the Report on Economic and Financial Analysis

To the Board of Directors
Banco Bradesco S.A.

1. In connection with our limited reviews of the Quarterly Information of Banco Bradesco S.A. and its subsidiaries (consolidated) as of March 31, 2009, December 31 and March 31, 2008, on which we issued a report without exceptions dated April 30, 2009, we carried out a limited review of the supplementary accounting information presented in the Report on Economic and Financial Analysis. This supplementary information was prepared by the Bank's management to permit additional analysis and is not a required part of the Quarterly Information.

2. Our work was carried out in accordance with the specific standards established by the Institute of Independent Auditors of Brazil (IBRACON), in conjunction with the Federal Accounting Council (CFC), for the purpose of reviewing the supplementary accounting information described in paragraph one and mainly comprised: (a) inquiries of and discussions with management responsible for the accounting, financial and operating areas of the Bank and its subsidiaries with regard to the main criteria used for the preparation of this additional accounting information and (b) a review of the significant information and the subsequent events which have, or could have significant effects on the financial position and operations of the Bank and its subsidiaries.

3. Based on our limited reviews, we are not aware of any material modifications which should be made to the supplementary information, referred to above, in order that this information be fairly presented, in all material respects, in relation to the Quarterly Information, referred to in paragraph one, taken as a whole.

Management Report

Dear Shareholders,

We hereby present to you the Consolidated Financial Statements of Banco Bradesco S.A. for the period ended March 31, 2009, pursuant to the Brazilian Corporation Law.

The global scenario still demands prudent actions. Within this context, Bradesco Organization remains realistic and strong, renewing its constructive and positive view regarding Brazil's outlooks. Bradesco is also aware of opportunities that may arise from unstable environment.

At Bradesco Organization, amongst the material events of 1Q09, we can highlight:

March 10, date of Fundação Bradesco's 66th anniversary, was very important for us. Mr. Luiz Carlos Trabuco Cappi, having worked 40 years for the Organization, was the successor of Mr. Márcio Artur Laurelli Cypriano, as the CEO of Banco Bradesco. Mr. Cypriano have reached the limit age provided for by the Bank's Bylaws for the position and after 10 years of profitable and calm management, did not have his term renewed. He remains as a member of the Board of Directors, providing the Organization with his important collaboration.

Also on March 10, the Special Shareholders Meeting approved the Bank's common and preferred shares reverse split, in the proportion of fifty (50) to one (1), with simultaneous split for each share, after they are grouped in the proportion of one (1) to fifty (50), respecting the respective type of shares. For the rounding of shareholdings that arise from fractions of shares, at the shareholders' free and exclusive discretion, a 61-day term was granted starting on April 8, 2009 and ending on June 8, 2009.

In 1Q09, Bradesco recorded a Net Income of R\$1.723 billion, corresponding to R\$0.56 per share and annualized profitability of 21.01% on average Shareholders' Equity (*). The annualized return on Average Total Assets stood at 1.48%.

In 1Q09, R\$2.528 billion were paid and provisioned as Interest on Shareholders' Equity and Dividends to shareholders, of which R\$647 million as income for the quarter (R\$124 million paid and R\$523 million provisioned) and R\$1.881 billion referring to 2008 (a monthly payment of R\$39 million on January 2, 2009 and a supplementary payment of R\$1.842 billion on March 9, 2009).

In the period, the Organization's taxes and contributions, including social security contributions, paid or provisioned, amounted to R\$3,159 billion, of which R\$1,473 billion of taxes withheld and collected from third-parties, mainly from financial intermediation, and R\$1,686 billion was calculated based on the activities developed by Bradesco Organization, equivalent to 97.85% of Net Income.

The control of administrative expenses and the permanent effort to increase revenues reflect the improvement in the Operating Efficiency Ratio (IEO), accumulated for 12 months, from 41.65%, in March 2008, to 41.50%, on March 31, 2009.

The Capital Stock realized was R\$23 billion at the end of the quarter. Added to Equity Reserves of R\$12.306 billion, it comprised the Shareholders' Equity in the amount of R\$35.306 billion, a growth of 7.28% compared to the previous year, corresponding to a book value of R\$11.50 per share.

Bradesco's market value, calculated based on the quotation of its shares, reached R\$65.154 billion on March 31, equivalent to 1.85 times the accounting Shareholders' Equity, maintaining with a positive perception despite the 30.41% decrease due to the current economic scenario, which was R\$93.631 billion in the same period of the previous year.

Edgar Filing: BANK BRADESCO - Form 6-K

It is worth pointing out that the Managed Shareholders' Equity corresponds to 7.39% of consolidated Assets that amounted to R\$482.141 billion, a 35.63% growth over March 2008. Therefore, the capital adequacy ratio in the consolidated financial result reached 16.58% and in the consolidated economic-financial result reached 16.04%, higher than the minimum of 11% regulated by Resolution 2,099, as of August 17, 1994 of the National Monetary Council, in conformity with the Basel Committee. At the end of the quarter, the fixed assets to shareholders' equity ratio compared to consolidated reference shareholders' equity stood at 48.93% in the consolidated financial result and 14.12% in the consolidated economic-financial result, in conformity with the maximum limit of 50%.

Pursuant to Article 8 of Circular Letter 3,068, dated November 8, 2001 of the Brazilian Central Bank, Bradesco declares to have financial capacity and plans to hold to maturity securities classified in the held-to-maturity securities category.

Global funds raised and managed by Bradesco Organization amounted to R\$640,347 billion on March 31, a growth of 26.71% y-o-y and distributed as follows:

R\$260,763	billion in demand deposits, time deposits, interbank deposits, other deposits, open market and savings account;
R\$200,975	billion in assets under management, comprising investment funds, managed portfolios and third-party fund quotas, 9.33% higher than March/2008;
R\$102,108	billion recorded in the exchange portfolio, borrowings and onlendings, own working capital, tax payment and collection and related taxes, funds from issuance of securities, subordinated debt in the country and other funding;
R\$66,673	billion recorded in technical provisions for insurance, supplementary private pension plan and certificated savings plan, with a 11.64% increase when compared to the previous year;
R\$9,828	billion in foreign funding, by means of public and private issues, subordinated debt and securitization of future financial flows, representing US\$4.245 billion.

At the end of the period, loan operations recorded a balance of R\$214,291 billion, including:

R\$10,220	billion in advances on exchange contracts, for a total portfolio of US\$10.839 billion of export financing;
US\$1,998	billion operations of import financing in foreign currency;
R\$21,662	billion in Leasing;
R\$10,703	billion in business in the rural area;
R\$58,024	billion in consumer financing;

Edgar Filing: BANK BRADESCO - Form 6-K

R\$32,693	billion in sureties and guarantees;
R\$7,054	billion of credits receivable from credit cards;
R\$14,533	billion referring to foreign and domestic fund onlending operations, mainly originated from the BNDES (National Economic and Social Development Bank), as the main onlending agent.

For Real Estate Financing, the Organization allocated in the quarter funds for the construction and acquisition of own house in the amount of R\$654.604 million, corresponding to 5,307 properties.

To support company's capitalization, Bradesco, through Banco Bradesco BBI S.A., intermediated primary and secondary offering of shares, debentures and promissory notes, in addition to Receivables Securitization Fund operations that, in the period, totaled R\$1.950 billion, representing 30.90% of the total volume of these issues recorded at the Brazilian Securities and Exchange Commission (CVM). It is also worth highlighting Projects Financing and Structured Operations, caring for structuring, origination, distribution and management of clients assets, flows and financial inventory.

Standing out in the areas of Insurance, Private Pension Plan and Certificated Savings Plan, *Grupo Bradesco de Seguros e Previdência* recorded, on March 31, Net Income of R\$649.552 million and Shareholders' Equity of R\$9.384 billion. Insurance written premiums, pension plan contributions and savings bond income reached R\$5.514 billion, a growth of 2.74% compared to the same period in the previous year.

On March 31, Bradesco Organization's network, had at its clients and users disposition, 33,475 outlets with 29,764 Bradesco Dia&Noite ATMs, 29,339 of them also working on weekends and holidays, in addition to 5,679 Banco24Horas machines, available to Bradesco clients, who can do withdrawals, print statements and view balances. The network also had 884 Correspondent Banks from Banco Finasa BMC, available for services in the payroll-deductible loans and vehicles segments:

5,742	Branches, Banking Service Branches (PAB) and Advanced Service Branches (PAA) in the country (Branches: Bradesco's 3,346, Banco Finasa BMC's 24, Banco Bankpar's 2, Banco Bradesco BBI's 1, Banco Bradesco Cartões 1 and Banco Alvorada's 1; PABs: 1,184; and PAAs: 1,183);
4	Branches Overseas, 1 in New York, 2 in Grand Cayman and 1 in Nassau, in the Bahamas;
7	Subsidiaries Overseas (Banco Bradesco Argentina S.A., in Buenos Aires; Banco Bradesco Luxembourg S.A., in Luxembourg; Bradesco Securities, Inc., in New York; Bradesco Securities UK Limited, in London; Bradesco Services Co., Ltd., in Tokyo; Cidade Capital Markets Ltd., in Grand Cayman; and Bradesco Trade Services Limited, in Hong Kong);

Edgar Filing: BANK BRADESCO - Form 6-K

5,959	Banco Postal branches;
16,710	Bradesco Expresso service stations;
1,512	Eletronic Service Branches in companies (PAE)
3,389	Outplaced Terminals of Bradesco Dia&Noite (Day&Night) ATM network; and
152	Branches of Finasa Promotora de Vendas, a company present in 22,445 car dealers.

Pursuant to CVM Rule 381, Bradesco Organization did neither contract nor had services provided by PricewaterhouseCoopers Auditores Independentes not related to external audit on levels exceeding 5% of its total costs in the quarter. The policy adopted complies with the principles preserving the auditor's independence, in accordance with internationally accepted criteria, which are: the auditor must neither audit its own work, nor perform managerial tasks at its client or promote its client's interests.

Bradesco's Human Resources Managerial Policy maintains a model of excellence, guided by respect and transparency in its relations through continual investment in development, knowledge sharing and valuation of the human being. In the quarter there were 601 courses, with 487,441 attendances. The assistance benefits, focused on ensuring well-being, improving quality of life and safety of employees and their dependents, reached, by the end of the period, 182,736 lives.

A Pioneer in the Organization's social investment, Fundação Bradesco develops a broad social and educational program in its 40 Schools primarily installed in the country's most underprivileged regions in all Brazilian states and the Federal District. With a planned budget of R\$231.343 million for the year, it will provide over 642 thousand assistances across its performance segments, with free and quality education, of which 112 thousand students are served in their own Schools, in Basic Education from Kindergarten to High School and Technical Professional Education in high school level, in Youth and Adult Education and in the Preliminary and Continuing Qualification, and more than 530 thousand assistances in other on-site and distance education courses, through its Virtual School, its e-learning portal and CIDs Digital Inclusion Centers. Meals, medical and dental assistance, uniform and school supplies are ensured for approximately 50 thousand Basic Education students, free of charge.

Developed by the Organization, the Finasa Sports Program has, in the city of Osasco, São Paulo, 53 qualification and specialization centers to teach volleyball and basketball in private and state schools and in Municipal Sports Centers, in SESI and in private schools, including Fundação Bradesco's school units. It currently assists over 2,300 9 to 18 year-old girls, emphasizing the commitment to defending a Country open to talent, effort and citizenship valuation.

We have registered important acknowledgements to Bradesco in the quarter:

Bradesco is the 1st most valuable brand in the world in the banking segment, according to a study prepared by the international consulting firm Brand Finance, published on the special issue Top 500 Global Financial Brands 2009, of The Banker magazine, which also showed Bradesco as the 5th largest brand value in the world among the retail Banks and the most valuable brand in Brazil;

It was chosen as the Institution with best quality in treasury operations in Latin America by Global Finance magazine, a publication specialized in international finance, in the Best Provider of Money Market Funds In Latin America category;

Winner in the categories Best Work in Air and Best Work in Fauna and Flora in the third edition of Brazil Environment Award *Prêmio Brasil de Meio Ambiente*, coordinated by Editora JB, which is responsible for the publication of *Jornal do Brasil*;

The first Brazilian company to receive the Golden Peacock Global Award for Corporate Social Responsibility 2009. The acknowledgement is given to companies that adopt the best corporate social and environmental responsibility policies;

Recognized as the best Private Banking of the country, for the second consecutive year, by Euromoney magazine, one of the most respected publications specialized in international finances; and

Bradesco Asset Management BRAM received the maximum grade from Moody's, one of the main risk assessment agencies of the world rated with MQI, the highest grade in the international management quality level.

Once more the results reached confirmed Bradesco's commitment to always offering high quality products and services. These advances are achieved thanks to the support and the trust of our shareholders and clients and the efficient and dedicated work of our personnel and other employees. For all of that, we would like to thank all of you.

Cidade de Deus, April 30, 2009

**Board of Directors and
Board of Executive Officers**

(*) It does not take into account the mark-to-market effect of available-for-sale securities recorded in the shareholders equity.

1) Operations

Banco Bradesco S.A. (Bradesco) is a private-sector publicly-held company that, operating as a Multiple Service Bank, carries out all types of authorized banking activities through its commercial, foreign exchange, consumer financing and housing loan portfolios. The Bank also operates in a number of other activities through its direct and indirect subsidiaries, particularly in leasing, investment banking, consortium management, credit cards, insurance, private pension plans and certificated savings plans. Operations are conducted within the context of the Bradesco Organization companies, working in an integrated manner in the market.

2) Presentation of the Financial Statements

The consolidated financial statements of Bradesco include the financial statements of Banco Bradesco, its foreign branches and its direct and indirect subsidiaries and jointly-controlled investments, in Brazil and abroad, and SPEs. They were prepared based on accounting practices determined by the Brazilian Corporation Law 6,404/76, amendments introduced by Law 11,638/07 and Provisional Measure 449/08 related to the accounting of operations, as well as the rules and instructions of the National Monetary Council (CMN), Brazilian Central Bank (Bacen), Brazilian Securities and Exchange Commission (CVM), National Private Insurance Council (CNSP), Insurance Superintendence (Susep), National Agency for Supplementary Healthcare (ANS) and Committee for Accounting Pronouncements (CPC), when applicable, and consider the financial statements of leasing companies based on the finance lease method, whereby leased fixed assets are reclassified to the leasing operations account, less the residual value paid in advance lessee.

Accordingly, for preparation purposes, intercompany investments, asset and liability account balances, revenue, expenses and unrealized profit were eliminated from these financial statements, as well as presenting separately the portions of the net income and the shareholders' equity referring to the interest of minority shareholders. In the case of investments which are jointly controlled with other shareholders, asset, liability and income components were included in the consolidated financial statements in proportion to the percentage capital stock of each investee. Goodwill in financing acquisition in subsidiaries and jointly-controlled investments was fully amortized up to March 31, 2008 (Note 15a). The exchange variation arising from transactions of foreign branches and subsidiaries is presented in the income accounts with derivative financial instruments, in order to eliminate the effect of the protection instruments of these investments.

The financial statements include estimates and assumptions, such as the calculation of the allowance for loan losses, estimates of the fair value of certain financial instruments, provision for contingencies, losses from non-financial asset impairment, other provisions, the calculation of technical provisions for insurance, supplementary pension plans and certificated savings plans and the determination of the useful life of specific assets. Actual results could differ from these estimates and assumptions.

(1) Current name of Banco BMC S.A.;

(2) Companies/branches whose audit (review) services in 2008 were carried out by other independent auditors;

(3) Branch incorporated by Banco Bradesco S.A. Grand Cayman Branch in March 2009;

(4) Reduction in ownership interest due to the acquisition of Ágora Corretora upon the assignment of Banco Bradesco BBI S.A. s shares to the former controlling shareholders of Ágora, in September 2008;

(5) Companies whose audit (review) services in 2009 were carried out by other independent auditors;

(6) Companies proportionally consolidated, pursuant to CMN Resolution 2,723 and CVM Rule 247;

(7) Company merged into Banco BMC S.A. in April 2008;

(8) The special purpose entity called Brazilian Merchant Voucher Receivables Limited is being consolidated. The company takes part in the securitization operation of the future flow of credit card bills receivables of clients domiciled abroad (Note 16d);

(9) The special purpose entity called International Diversified Payment Rights Company is being consolidated. The company takes part in the securitization operation of future flow of payment orders received from overseas (Note 16d);

(10) Company acquired in September 2008; and

(11) Company sold in July 2008.

3) Significant Accounting Policies

a) Functional and presentation currencies

The financial statements are presented in Reais, which is Bradesco's functional currency.

Operations in foreign branches and subsidiaries are basically a continuation of the activities in Brazil, therefore, assets, liabilities and results are adjusted to comply with the accounting practices adopted in Brazil and translated into Reais according to the relevant currency's exchange rate. Gains and losses arising from this translation are registered in the income for the period.

b) Determination of income

The income is determined on the accrual basis of accounting that establishes that income and expenses should be included in the determination of the results of the period in which they take place, always simultaneously when they are correlated, regardless of receipt or payment. Transactions with prefixed rates are recorded at their redemption value and income and expenses for the future period are recorded as a discount to the corresponding assets and liabilities. Income and expenses of a financial nature are prorated daily and calculated based on the exponential method, except when relating to discounted notes or to cross-border transactions which are calculated based on the straight-line method. Post-fixed or foreign-currency-indexed transactions are adjusted to the balance sheet date.

The insurance, coinsurance and commission premiums, net of premiums assigned in coinsurance, reinsurance and corresponding commissions are appropriated to the income by effectiveness of the corresponding insurance policies and invoices and are deferred for appropriation on a straight-line basis over the terms of the insurance policies, during the risk coverage period, by means of recording and reversal of unearned premiums reserve and deferred selling expenses. The accepted coinsurance and retrocession operations are recorded based on the information received from other companies and Brasil Resseguros S.A. (IRB), respectively.

The supplementary pension plans contributions and life insurance premiums covering survival are recognized in income when effectively received.

The revenue from certificated savings plans is recognized at the time it is effectively received. The expenses for placement of bonds, classified as Selling Expenses, are recorded as they are incurred. Brokerage expenses are recorded when the certificated savings plans contributions are effectively received. Payments for drawing redemptions are considered as expenses in the month when they take place.

The expenses for technical provisions for private pension plans and certificated savings plans are recorded at the same time as the corresponding revenues thereof are recognized.

c) Cash and cash equivalents

Cash and Cash Equivalents are represented by: availability of domestic and foreign currency funds and investments in gold, open markets and interest-earning deposits in other banks, whose maturity on the effective application date was 90 days or less and present an insignificant risk of fair value change, which will be used by the Bank to manage its short-term commitments.

d) Interbank investments

Purchase and sale commitments subject to unrestricted movement agreements are adjusted to market value. Other assets are recorded at acquisition cost, including income earned up to the balance sheet date, net of loss accrual, when applicable.

e) Securities

Trading securities securities acquired for the purpose of being actively and frequently traded, adjusted to market value as a counter-entry to income for the period;

Available-for-sale securities securities which are not specifically intended for trading purposes or as held to maturity, adjusted to market value as a counter-entry to a specific account in shareholders equity, at amounts net of tax effects; and

Held-to-maturity securities securities for which there is intention and financial capacity to hold in the portfolio up to maturity, recorded at acquisition cost, plus income earned, as a counter-entry to income for the period.

The securities classified in the trading and available-for-sale categories, as well as derivative financial instruments are stated by its estimated fair value in the consolidated balance sheet. The fair value generally is based on market prices quotations for assets or liabilities with similar characteristics. If market prices are not available, fair values are based on market operators quotations, pricing models, discounted cash flows or similar techniques for which the determination of fair value may require judgment or significant estimates by the management.

f) Derivative financial instruments (assets and liabilities)

These are classified based on Management's intended use thereof on the date of the contracting of the operation and whether it was carried out for hedging purposes or not.

Bradesco takes part in operations involving derivative financial instruments destined to meet its own needs in order to manage the Bank's global exposure, as well as for meeting its clients' requests, for the management of their positions, where valuations or devaluations are recorded in income or expenses accounts of the respective financial instruments.

Derivative financial instruments used to mitigate risks deriving from exposure to variations in financial assets and liabilities market value are considered hedge and are classified according their nature in:

Market risk hedge: financial instruments classified in this category as well as their hedge-related financial assets and liabilities have their gains and losses, realized or not, recorded in income account.

Cash flow hedge: for financial instruments classified in this category, the effective valuation or devaluation portion is recorded, net from tax effects, in a specific account emphasized in the Shareholders' Equity. Non-effective portion of the respective hedge is directly recognized in an income account.

g) Loan and leasing operations, advances on foreign exchange contracts, other receivables with characteristics of loan assignment and allowance for loan losses

Loan and leasing operations, advances on foreign exchange contracts and other receivables with characteristics of loan assignment are classified at their corresponding risk levels in compliance with: (i) the parameters established by CMN Resolution 2,682, at nine levels from AA (minimum risk) to H (maximum risk); and (ii) Management's risk level assessment. This assessment, which is carried out on a periodic basis, considers current economic conditions and past loan loss experience, as well as specific and general risks relating to operations, borrowers and guarantors. Moreover, the length of the delay in payment defined in CMN Resolution 2,682 is also taken into account for client risk rating purposes as follows:

Past-due period (1)	Client rating
From 15 to 30 days	B
From 31 to 60 days	C
From 61 to 90 days	D
From 91 to 120 days	E
From 121 to 150 days	F
From 151 to 180 days	G
More than 180 days	H

(1) For operations falling due for over 36 months, the terms are doubled, as allowed by CMN Resolution 2,682/99.

The accrual of these operations past due up to 59 days is recorded in revenues and subsequent to the 60th day, in unearned income.

Past-due operations rated at H level remain at this level for six months, subsequent to which they are written-off against the existing allowance and controlled in memorandum accounts for at least five years, no longer being recorded in equity accounts.

Renegotiated operations are maintained, at least, with a classification equal to their prior rating. Renegotiations already written-off against the allowance and which are recorded in memorandum accounts, are rated as H level and the possible revenues derived from their renegotiation are recognized as revenue only when they are effectively received. When there is a significant amortization of the operation or when new material facts justify the risk level change, the operation may be reclassified to a lower risk category.

The allowance for loan losses is calculated in an amount sufficient to cover probable losses and takes into consideration CMN and Bacen rules and instructions, connected to assessments carried out by the Management, in the credit risk determination.

h) Income tax and social contribution (assets and liabilities)

Tax credits on income tax and social contribution, calculated on tax losses, negative basis of social contribution and temporary additions are recorded in *Other Receivables - Sundry* and the provision for deferred tax liabilities on depreciation excess and market value adjustments of securities is recorded in *Other Liabilities - Tax and Social Security Activities*, and for depreciation excess only income rate is applied.

Tax credits on temporary additions will be realized upon use and/or reversal of the corresponding provisions on which they were recorded. Tax credits on tax losses and negative basis of social contribution will be realized as taxable income is generated, considering the 30% limit of the taxable profit of the reference period. Such tax credits are recorded based on the current expectations for realization, taking into account the technical studies and analyses carried out by the Management.

The provision for income tax is recorded at the base rate of 15% of taxable income, plus a 10% surcharge. As of May 1, 2008, social contribution on pre-tax income is calculated at a 15% rate for financial institutions and insurance companies and at 9% for other companies (up to April 30, 2008, this rate was 9% for all types of companies). The increase in the rate of social contribution payable by companies in the financial and insurance sectors was introduced by Provisional Measure 413 of January 3, 2008, (which became Law 11,727 on June 23, 2008) and is calculated pursuant to the rules issued by the tax authorities.

Tax credits from previous periods, resulting from the increase of the Social Contribution rate to 15% are recorded up to the limit of the corresponding consolidated tax liabilities (Note 34).

Provisions were recorded for other income and social contribution taxes in accordance with specific applicable legislation.

Pursuant to Provisional Measure 449/08, the changes in the determination criteria for income, cost and expenses used in the assessment of net income for the year, enacted by Law 11,638/07 and by Articles 36 and 37 of the aforementioned Provisional Measure, shall not have effect on the assessment of taxable income for corporate entities opting for the RTT, but, for tax purposes, the accounting methods and criteria in force on December 31, 2007 shall be considered. For accounting purposes, the tax effects of adopting the Law 11,638/07 are recorded in corresponding deferred assets and liabilities.

i) Prepaid expenses

These record investments of resources in prepayments, whose rights of benefits or service provision will take place in future periods; therefore, they are recorded in assets considering the accrual method of accounting.

Prepayments correspond to the installment already paid for service rights to be received or for the future use of financial assets or resources from third parties.

This group is basically represented by: insurance selling expenses, insurance expenses and advertising expenses, as described in Note 12b. Commission in the placement of financing were recorded under this item up to March 31, 2008 and as of April, they will be allocated to the respective financing / leasing operations balance.

Thus, based on the accrual method of accounting and the confrontation between income and expense, incurred costs related to underlying assets which will generate income in subsequent periods are recorded in prepaid expenses. These assets are appropriated to the income in accordance with terms and amounts of benefits which are expected and directly written-off in the income when underlying assets and rights are no longer part of the institution's assets or the expected future benefits cannot be realized.

j) Investments

The investments in subsidiaries, jointly controlled companies and affiliated companies, with significant influence or interest of 20% or more in the voting capital, are evaluated by the equity accounting method.

Fiscal incentives and other investments are recorded at acquisition cost, net of the provision for losses, when applicable.

k) Fixed assets

These correspond to the rights aiming corporeal assets destined to the maintenance of activities or performed with this purpose, including those deriving from operations transferring risks, benefits and controls of entities assets.

This is stated at acquisition cost, net of respective accumulated depreciations, calculated by the straight-line method according to the estimated useful-economic life of assets, of which: premises 4% p.a.; furniture and fixtures, machinery and equipment 10% p.a.; transport systems 20% p.a.; and data processing systems 20% to 50% p.a.

102

l) Intangible assets

Intangible assets are the rights acquired related to non corporeal assets meant for the entity's maintenance or exercised with that purpose. Intangible assets with established useful life are usually amortized according to the straight-line method within an estimated economic benefit period.

Intangible assets are comprised of:

Future profitability of client portfolio acquired and acquisition of the right to provide banking services.

These are recorded and amortized in the period in which asset shall directly and indirectly contribute to the future cash flow.

Software

Software is recorded at cost less amortization by the straight-line method during the estimated useful life (20% to 50% p.a.), as from the date it is available for use. Internal software development expenses are recognized as assets when it is possible to show its intention and ability of completing such development, recording costs directly attributable to the software, which will be amortized during its estimated useful life, considering future economic benefits generated.

m) Impairment of non-financial assets

The book value of non-financial assets, except other assets and tax credits, are tested, at least annually, for impairment, which is recognized in the income for the year if the accounting value of an asset or its cash-generating unit exceeds its recoverable value.

A cash generating unit is the smallest identifiable group of assets that generates cash flows materially independent from other assets and groups. Impairment losses are recognized in income for the period.

n) Deposits and federal funds purchased and securities sold under agreements to repurchase

These are recorded at the amount of the liabilities and include, when applicable, related charges up to the balance sheet date, on a daily *pro rata* basis.

o) Provisions relating to insurance, private pension plans and certificated savings plans activities

Technical provisions are calculated according to actuarial technical notes approved by Susep and ANS, and criteria set forth by CNSP Resolutions 036/2000, 162/2006, 181/2007 and 195/2008.

Insurance of basic, life and health lines

Unearned Premiums Provision (PPNG) comprises retained premiums which are deferred during the term of effectiveness of the insurance agreements, determining the *pro rata* day value of the unearned premium of the period of the risk to accrue (future risk of policies in effect). When this provision's insufficiency is ascertained by means of actuarial calculation, the Provision of Premium Insufficiency will be recorded.

The provision of Incurred but not Reported (INBR) claims is calculated on an actuarial basis to quantify the amount of claims occurred and not reported by those policyholders/beneficiaries. Pursuant to CNSP Resolution 195/2008, as of 2009, insurance companies are not to deduct the calculation of provisions of amounts transferred to third parties through reinsurance operations.

The provision of unsettled claims is recorded based on the indemnities payment estimates, pursuant to notices of claims received from those policyholders until the balance sheet date. The provision is monetarily restated and includes all claims under litigation. In the case of health insurance, according to the technical note approved by ANS, the provision of unsettled claims complements the provisions of IBNR claims.

Supplementary Premium Provision (PCP) is recorded on a monthly basis to complement PPNG, considering the effective risks issued or not. The value of the PCP is the difference, if positive, between the average of the sum of the PPNG values daily verified and the recorded PPNG;

Other technical provisions refer to provision to face differences of future readjustments of premiums and those required for the technical balance of the individual health plan portfolio, adopting a formulation included in the actuarial technical note approved by ANS.

The Provision of Benefits to be granted, of individual health plan portfolio, refers to a 5-year coverage for dependents in case the policyholders is deceased, adopting a formulation included in the actuarial technical note approved by ANS.

The Provision of Benefits Granted, of individual health plan portfolio, is comprised by liabilities arising from payment release contractual clauses referring to the health plan coverage, and its accounting complies with Resolution RN 75/2004 of ANS, and by premiums for the payment release of Bradesco Saúde policyholders Plano GBS .

Supplementary private pension plans and life insurance covering survival

The mathematical provision of benefits to be granted refers to participants whose benefits have not started yet. The mathematical provision of benefits granted refers to participants already using the benefits. Mathematical provisions related to private pension plans known as traditional represent the difference between the current value of the future benefits and the current value of the future contributions, corresponding to the obligations assumed under the form of retirement, disability, pension and savings funds plans. They are calculated according to the methodology and premises set forth in the actuarial technical notes. The provisions linked to Long-Term Life Insurance (VGBL) covering survival and to the private pension plans of PGBL category represent the amount of the contributions made by the participants, net of loadings and other contractual charges, plus financial earnings generated by the investment of resources in Exclusive Investment Funds (FIE).

The contribution insufficiency provision is established to complement the mathematical provisions of benefits granted and to be granted, should they not be sufficient to guarantee future commitments. The provision is calculated on an actuarial basis and takes into consideration the actuarial table AT-2000 (soften), increased by 1.5% (improvement), considering males apart from females, who have higher life expectancy, and the actual interest rate of 4.3% p.a.

The financial fluctuation provision is established up to the limit of 15% of the mathematical provision of benefits to be granted related to the private pension plans in the category of variable contribution with guarantee of earnings to meet possible financial fluctuations; and

The administrative expenses provision is established to cover administrative expenses of the defined benefit and variable contribution plans. It is calculated in conformity with the methodology set forth in the actuarial technical note.

Certificated savings plans

The mathematical provision for redemptions is constituted for each active or suspended certificated savings plan during the estimated term in the general conditions of the plan. It is calculated according to the methodology set forth in the actuarial technical notes approved by Susep.

The provisions for redemptions are established by the values of the expired certificated savings plans and also by the values of the certificated savings plans which have not expired but whose early redemption has been required by the clients. The provisions are monetarily restated based on the indexes estimated in each plan; and

The provisions for unrealized and payable drawing are recorded to meet premiums arising from future drawing (unrealized) and also for premiums arising from drawing in which clients were already selected (payable).

p) Contingent assets and liabilities and legal liabilities tax and social security

The recognition, measuring and disclosure of contingent assets and liabilities and legal liabilities are made according to the criteria defined in CMN Resolution 3,535/08 and CVM Resolution 489/05.

Contingent Assets: are not recognized on an accounting basis, except when Management has total control of the situation or when there are real guarantees or favorable judicial decisions, to which no further appeals are applicable, characterizing the gain as practically certain and by the confirmed capacity of its receipt or compensation with other liability recovery. The contingent assets whose chances of success is probable are disclosed in the notes to the financial statements (Note 18a);

Contingent Liabilities: are recorded taking into consideration the opinion of the legal advisors, the nature of the lawsuits, the similarity with previous processes, the complexity and positioning of courts, whenever the loss is evaluated as probable, which would cause a probable outflow of resources for the settlement of liabilities and when the amounts involved are measurable with sufficient assurance. The contingent liabilities classified as possible losses are not recognized on an accounting basis, and they must only be disclosed in the notes, when individually material, and those classified as remote do not require provision nor disclosure (Notes 18b and 18c); and

Legal Liabilities Tax and Social Security: result from judicial proceedings related to tax liabilities, whose purpose of contestation is their legality or constitutionality, which, regardless of the evaluation about the probability of success, have their amounts fully recognized in the financial statements (Note 18b).

q) Funding expenses

On funding transactions upon issue of securities, related expenses are recorded as an offsetting entry to liabilities and allocated to income according to the term of the transaction.

r) Other assets and liabilities

The assets are stated at their realizable amounts, including, when applicable, related income and monetary and exchange variations (on a daily *pro rata* basis), and provision for loss, when deemed appropriate. The liabilities include known or estimated amounts, plus related charges and monetary and exchange variations (on a daily *pro rata* basis).

4) Information for Comparison Purposes**Reclassifications**

For a better comparison of the financial statements, reclassifications were carried out in the balances of the 1Q08, to comply with the accounting procedures/classifications adopted in the 1Q09:

(1) For comparison purposes with the criterion adopted by Bacen Circular Letter 3,068 and due to securities characteristics, we are considering the derivative financial instruments, except the ones considered cash flow hedge under the category Trading Securities ;

(2) These refer to investment funds and managed portfolios applied in purchase and sale commitments with Bradesco, whose owners are subsidiaries, except the ones considered cash flow hedge included in the consolidated financial statements;

(3) The investment fund quotas were distributed according to instruments composing their portfolios and preserving the classification of funds category;

(4) In compliance with the provisions of Article 8 of Bacen Circular Letter 3,068, Bradesco declares that it has both the financial capacity and the intention to hold to maturity the securities classified in the held-to-maturity securities category. This financial capacity is evidenced in Note 32a, which presents the maturities of asset and liability operations on the reference date of March 31, 2009. On June 30, 2008, R\$9,248,661 thousand were transferred from Available-for-Sale Securities to Held-to-Maturity Securities , related to securities held by Bradesco Vida e Previdência, pursuant to Susep/Decon/Geaco Circular Letter 130/08; On December 31, 2008, R\$454,090 thousand of shares issued by Visa Inc. and R\$9,836,218 thousand were transferred from NTN Available-for-Sale Securities to Trading Securities ; and respective amounts of R\$454,090 thousand and R\$211,085 thousand were also transferred, due to the management s intention as to their trading;

(5) The number of days to maturity was based on the maturity of the securities, regardless of their accounting classification;

(6) This column reflects book value subsequent to mark-to-market according to item (7), except for held-to-maturity securities, whose market value is higher than the restated cost value in the amount of R\$2,168,206 thousand (December 31, 2008 R\$1,550,399 thousand and March 31, 2008 R\$1,428,075 thousand); and

(7)The market value of securities is determined based on the market price available on the balance sheet date. Should there be no market prices available, amounts are estimated based on the prices quoted by dealers, on price definition models, quotation models or price quotations for instruments with similar characteristics; in case of investment funds, the restated cost reflects the market value of respective quotas.

e) Derivative financial instruments

Bradesco carries out transactions involving derivative financial instruments, which are recorded in equity or memorandum accounts, to meet its own needs to manage Bradesco's global exposure, as well as to answer its clients requests, in order to manage their exposures. These operations involve a series of derivatives, including interest rate swaps, currency swaps, futures and options. Bradesco's risk management policy is based on the utilization of derivative financial instruments with a view to mitigating risks deriving from operations carried out by Bradesco and its subsidiaries.

Securities classified in the trading and available-for-sale categories, as well as derivative financial instruments are stated at the consolidated balance sheet by its estimated fair value. The fair value generally is based on market prices quotations for assets or liabilities with similar characteristics. Should market prices not be available, fair values are based on market operator's quotations, pricing models, discounted cash flows or similar techniques to which the determination of fair value may require judgment or significant estimates by management.

To derivative financial instruments, market price quotations are used to determine the fair value of these instruments. The fair value of swaps is determined by using discounted cash flows modeling techniques that use yield curves, reflecting adequate risk factors. The information to build yield curves is mainly obtained at BM&FBovespa (Futures and Commodities Exchange) and in the domestic and international secondary market. These yield curves are used to determine the fair value of currency swaps, interest rate and other risk factors swaps. The fair value of forward and futures contracts is also determined based on market price quotations for derivatives traded at the stock exchange or using methodologies similar to those outlined for swaps. Fair Value of loan derivative instruments is determined based on market price quotation or from specialized entities. The fair value of options is determined based on mathematical models, such as Black & Scholes, using yield curves, implied volatilities and the fair value of corresponding assets. Current market prices are used to price the volatilities.

Derivative financial instruments in Brazil mainly refer to swap and futures operations and are recorded at Cetip (OCT Clearing House) and BM&FBovespa. Operations involving forward contracts of indexes and currencies are carried out to manage hedge institution's global exposures and operations to meet our clients' needs.

Derivative financial instruments abroad refer to swap, forward, options, credit and futures operations and are mainly carried out at the stock exchanges of Chicago and New York, as well as at over-the-counter markets.

Foreign (stock exchange) (1)	2,985,193	3,297,461	4,015,954
Total	158,196,328	125,265,975	150,755,701

(1) Comprise operations carried out at the Stock Exchanges of Chicago and New York and at over-the-counter markets.

On March 31, 2009, counter-parties are distributed among corporate clients with 86%, financial institutions with 12% and individuals/others with 2%. Specifically regarding exchange financial instruments, we point out that Bradesco did not carry out exotic options, so called target forward swap, or any other leveraged derivatives, as well as amounts payable or receivable, outstanding on March 31, 2009, do not show concentration regarding individual counter-parties.

f) Credit Default Swaps (CDS)

They usually represent a bilateral agreement in which one of the parties purchases protection against credit risk of a certain financial instrument (the risk is transferred). The selling counterparty receives a stream of payments that is usually paid in a linear manner during the operation effectiveness.

In case of default, the purchasing counterparty shall receive a payment to offset the value of the loss incurred in the financial instrument. In such case, the selling counterparty usually receives the asset object of the agreement in exchange for the payment.

	Derivatives with companies	(4,630)	(4,674)		(255)	(257)	

Received

Credit swaps whose underlying assets are:

Securities	Brazilian public debt bond	11,554,006	12,831,299	11,612,275			
	Derivatives with companies	168,978	219,306	367,500	18,558	24,124	40,425
Total		10,944,984	12,265,278	9,349,129	18,303	23,867	(151,976)
Deposited margin		1,316,760	1,733,378	1,069,571			

Bradesco carries out operations involving credit derivatives with the purpose of maximizing its risk exposure and asset management. Contracts related to the credit derivatives operations described above have several maturities until 2017, 93.2% of which mature by 2010. The mark-to-market of protection rates that remunerates the risk receiving counterparty amounts to R\$(261,164) thousand (December 31, 2008 R\$(393,264) thousand and on March 31, 2008 R\$(97,476) thousand). During the period there was no occurrence of a credit event related to triggering events provided for in the contracts.

g) Cash flow hedge

Bradesco uses cash flow hedges to protect its cash flows from the variability attributable to variable interest risk from Bank Deposit Certificate (CDB) indexed to the Interbank Deposit Rate (DI CETIP), converting variable payments into fixed payments.

Bradesco traded DI Future contracts in 2009, used as cash flow hedge for funding linked to DI CETIP. The following table presents the DI Future position as of March 31, 2009:

		R\$ thousand
DI Future with maturity between the years of 2010 and 2012		20,475,182
Funding referring to CDI		20,279,968
Market adjustment recorded in Shareholders' Equity (1)		(225,784)
Non-effective market value recorded in result		1,732

(1) The adjustment in the shareholders' equity is R\$135,470 thousand net from tax effects.

Effectiveness of the hedge portfolio was in conformity with Bacen Circular Letter 3,082/02.

Additional provision (3)	1,689,372	1,620,570	1,153,950

(1) For operations with installments overdue for more than 14 days;

(2) Recorded based on the client/transaction classification and accordingly not included in the preceding item; and

(3) The additional provision is recorded based on Management's experience and expected realization of the loan portfolio, to determine the total provision deemed sufficient to cover specific and general loan risks, linked to the provision calculated based on risk level ratings and the corresponding minimum percentage of provision established by CMN Resolution 2,682. The additional provision per client was classified according to the corresponding risk levels (Note 10f).

h) Recovery and renegotiation

Expenses from allowance for loan losses, net of recoveries of written-off credits.

Leased assets		22,222	(11,368)	10,854	12,741	10,588
Total on March 31, 2009		7,687,711	(4,401,584)	3,286,127		
Total on December 31, 2008		7,532,252	(4,282,867)		3,249,385	
Total on March 31, 2008		4,978,606	(2,865,024)			2,113,582

Premises and equipment of the Bradesco Organization present an unrecorded increase of R\$1,611,334 thousand (December 31, 2008 R\$1,570,878 thousand and March 31, 2008 R\$1,381,454 thousand) based on appraisal reports prepared by independent experts in 2009, 2008 and 2007.

The Bank executed lease agreements, for data processing systems, which are presented under premises and equipment. According to this accounting policy, assets and liabilities are classified in the financial statements and asset depreciation is calculated according to our own assets depreciation policy. Interest rates on this liability are also recognized.

The fixed assets to reference shareholders' equity ratio in relation to economic-financial consolidated is 14.12% (December 31, 2008 13.55% and March 31, 2008 12.07%), and in relation to the financial consolidated basis is 48.93% (December 31, 2008 48.02% and March 31, 2008 47.70%), within the maximum 50% limit.

The difference between the fixed assets to shareholders' equity ratio of the economic-financial consolidated and of the financial consolidated derives from the existence of non-financial subsidiaries which have high liquidity and low fixed assets to shareholders' equity ratio, with the consequent increase in the fixed assets to shareholders' equity ratio of the consolidated financial. Whenever necessary, we may reallocate the funds for the financial companies through the

payment of dividends/interest on shareholders' equity to financial companies or corporate reorganization between the financial and non-financial companies, thus allowing the improvement of that ratio.

15) Intangible Assets

a) Goodwill

Goodwill from investment acquisition in Ágora Corretora amounted to R\$694,662 thousand, of which R\$203,114 thousand represents the difference between book value and market value of shares recorded in Permanent Assets (BM&FBovespa shares), being amortized upon their realization which, up to September 2008, were classified as Deferred Charges; and R\$491,548 thousand representing future profitability/client portfolio, which will be amortized within five (5) years. In the period, goodwill was amortized in the amount of R\$24,577 thousand.

Goodwill related to companies acquired up to March 31, 2008 was fully amortized, corresponding to R\$53,030 thousand on March 31, 2008.

b) Intangible assets

Acquired intangible assets have defined useful life and comprise:

	Amortization rate (1)	Cost	Amortization	Residual value		
				2009		2008
				March 31	December 31	March 31
				R\$ thousand		
Acquisition of right for banking services	Contract	2,532,245	(996,337)	1,535,908	1,594,666	1,395,329
Software (2)	10% to 20%	2,811,838	(1,625,507)	1,186,331	1,189,343	980,380
Future profitability/client portfolio (3)	20%	832,831	(57,347)	775,484	458,778	
Other	20%	189,747	(51,687)	138,060	70,046	65,154
Total on March 31, 2009		6,366,661	(2,730,878)	3,635,783		
Total on December 31, 2008		5,832,703	(2,519,870)		3,312,833	
Total on March 31, 2008		4,399,199	(1,958,336)			2,440,863

(1) The amortization of intangible assets is usually linear throughout an estimated period of economic benefit and accounted as other administrative expenses and other operating expenses;

(2) Software acquired and/or developed by specialized companies; and

(3) Goodwill in the acquisition of shareholders' interest at Ágora Corretora, R\$434,201, in Integritas Participações S.A., R\$305,165 and in Europ Assistance Serviços de Assistência Personalizados, R\$36,118.

Impairment losses in intangible assets were not recorded in the period.

Expenses with research and development of systems corresponded to R\$17,391 thousand in the period (4Q08 R\$24,315 thousand; 1Q08 R\$13,167 thousand).

c) Breakdown of intangible assets by class:

	R\$ thousand				
	Acquisition of bank rights	Software	Future profitability/client portfolio	Other	Total

(1) This refers to installment of issuances of simple debentures not convertible into Bradesco Leasing S.A. Arrendamento Mercantil Shares, maturing on May 1, 2011 with a 104% of CDI remuneration, whose installments referring to interest are classified in the short term;

(2) Issuance of securities in the international market for foreign exchange operations for customers, through purchase and sale of foreign currencies, related to discounts of export bills, pre-financing of exports and financing of imports, substantially in the short term; and

(3) Pursuant to CVM Rule 556 and CPC 08, expenses related to fund raising are recorded as write-down to respective funding and appropriated to income for the term of the operation.

d) Since 2003, Bradesco Organization has been entering into certain agreements designed to optimize its funding and liquidity management activities through the use of SPEs. These SPEs, named International Diversified Payment Rights Company and Brazilian Merchant Voucher Receivables Limited, are financed with long-term liabilities and settled with future cash flows of the underlying assets, which basically include:

(i) Current and future flows of money orders remitted by individuals and corporate entities located abroad to beneficiaries in Brazil for which the Bank acts as paying agent; and

(ii) Current and future flows of credit card receivables arising from expenses made in the Brazilian territory by holders of credit cards issued outside Brazil.

Long-term securities issued by SPEs and sold to investors are settled through funds derived from the money order flows and credit card bills. Bradesco is obliged to redeem these securities in specific cases of delinquency or if SPEs operations are discontinued.

Funds derived from the sale of current and future money orders flows and credit card receivables, received by the SPEs, must be maintained in a specific bank account until a specific minimum limit is attained.

We present below the main features of the notes issued by SPEs:

--------------	----------------	------------------	----------------

18) Contingent Assets and Liabilities and Legal Liabilities Tax and Social Security

a) Contingent assets

Contingent assets are not recorded on an accounting basis; however, there are ongoing proceedings whose prospects of success are good. The main one is:

PIS R\$53,814 thousand: it pleads the compensation of PIS on the Gross Operating Revenue, collected pursuant to Decree Laws 2,445 and 2,449/88, over what exceeded the amount due under the terms of the Supplementary Law 07/70 (PIS Repique).

b) Contingent liabilities classified as probable losses and legal liabilities tax and social security

Bradesco Organization is currently party to a number of legal suits in the labor, civil and tax scopes, arising from the normal course of its business activities.

Provisions were recorded based on the opinion of our legal advisors; the types of lawsuit; similarity with previous lawsuits; complexity and positioning of the courts, whenever loss is deemed probable.

The Organization's Management considers that the provision recorded is sufficient to cover losses generated by the corresponding proceedings.

The liability related to the legal liability in litigation is maintained until the definite successful outcome of the lawsuit, represented by favorable judicial decisions, for which appeals are no longer appropriate or due to statute of limitation.

I Labor claims

These are claims brought by former employees seeking indemnity, especially the payment of unpaid overtime. In the proceedings requiring judicial deposit, the amount of labor claims is recorded considering the effective perspective of loss of these deposits. For other proceedings, the provision is recorded based on the average value determined by the total payments made of the claims ended in the last 12 months, considering the year of the determination of judicial deposits.

Following the effective control over working hours implemented in 1992, via electronic time cards, overtime is paid regularly during the employment contract and, accordingly, claims on an individual basis subsequent to 1997 substantially reduced its amounts.

II Civil lawsuits

These are claims for pain and suffering and property damages, mainly protests, bounced checks, the inclusion of information about debtors in the restricted credit registry and the replacement of inflation rates excluded as a result of economic plans. These lawsuits are individually controlled and provisioned whenever the loss is evaluated as probable, considering the opinion of our legal advisors, the nature of lawsuits, and similarity with previous lawsuits, complexity and positioning of courts.

The issues discussed in the lawsuits usually are not events that cause a representative impact on the interest income. Most of these lawsuits are brought at the Special Civil Court (JEC), in which the requests are limited to 40 minimum wages. Moreover, approximately 50% of JEC's lawsuits are judged unfounded and the historical average amount of condemnation imposed corresponds to only 5% of the total amount claimed.

It is worth pointing out the increase in claims pleading the incidence of inflation rates which were excluded as a result of the savings accounts balance restatement due to Economic Plans (specially Bresser and Verão Economic Plans), although the Bank had complied with the legal requirements in force at the time.

Presently, there are no significant administrative lawsuits in course, filed as a result of the lack of compliance with National Financial System regulations or payment of fines, which could cause representative impacts on the Bank's interest income.

III Legal liabilities tax and social security

The Bradesco Organization is judicially disputing the legality and constitutionality of certain taxes and contributions, for which provisions have been recorded in full, despite the likelihood of a successful medium-and long-term outcome based on the opinion of our legal advisors.

The main matters are:

Cofins R\$2,528,290 thousand: moves to calculate and collect Cofins, as from October 2005, on the effective income, whose concept is in Article 2 of Supplementary Law 70/91, removing the unconstitutional increase of the calculation basis intended by paragraph 1 of Article 3 of Law 9,718/98;

CSLL R\$1,399,084 thousand: questions CSLL required from financial institutions in the reference years from 1995 to 1998 at rates higher than the ones applied to general legal entities, not complying with the constitutional principle of isonomy;

IRPJ/Loan Losses - R\$580,881 thousand: moves to deduct, for purposes of determination of the calculation basis of due IRPJ and CSLL, the amount of effective and definite losses, total or partial, suffered in the reference years from

1997 to 2006, when receiving credits, regardless of the compliance with the conditions and terms provided for in Articles 9 to 14 of Law 9,430/96 that only apply to the temporary losses;

INSS Autonomous Brokers R\$645,112 thousand: it discusses the incidence of the social security contribution on the remunerations paid to autonomous service providers, established by Supplementary Law 84/96 and subsequent regulations/amendments, at the rate of 20% and additional of 2.5%, under the argument that the services are not provided to insurance companies, but to policyholders, thus being out of the incidence field of the contribution provided for in item I, Article 22, of Law 8,212/91, with new wording in Law 9,876/99;

CSLL R\$519,946 thousand: it pleads the non-collection of CSLL of the reference years from 1996 to 1998, years in which some companies of the Bradesco Organization did not have employees, once item I, Article 195, of the Federal Constitution provides that this contribution is only due by employers; and

PIS R\$267,263 thousand: moves for the compensation of amounts unduly overpaid in the reference years of 1994 and 1995 as contribution to PIS, corresponding to the exceeding amount to what would be due on the calculation basis constitutionally provided for, i.e., gross operating revenue, as defined in the income tax legislation concept in Article 44 of Law 4,506/64, not including interest income.

IV Provisions divided by nature

	R\$ thousand		
	2009		2008
	March 31	December 31	March 31
Labor claims	1,554,544	1,553,143	1,559,990
Civil lawsuits	1,649,911	1,524,423	1,508,755
Subtotal (1)	3,204,455	3,077,566	3,068,745
Tax and social security (2)	7,407,905	7,052,932	6,608,847
Total	10,612,360	10,130,498	9,677,592

(1) Note 20b; and

(2) Classified under item Other liabilities tax and social security (Note 20a).

V Breakdown of Provisions

	R\$ thousand		
	2009		
	Labor claims	Civil lawsuits	Tax and social security (1)
At the beginning of the period	1,553,143	1,524,423	7,052,932
Monetary restatement	50,737	47,470	150,276
Recordings/Reversals	61,712	197,471	205,986
Payments	(111,048)	(119,453)	(1,289)
At the end of the period	1,554,544	1,649,911	7,407,905

(1) It comprises, substantially, legal liabilities.

c) Contingent liabilities classified as possible losses

The Bradesco Organization maintains a follow-up system for all administrative and judicial proceedings in which the institution is the plaintiff or defendant and based on the opinion of the legal advisors classifies the lawsuits according to the expectation of non-success. The administrative and judicial proceedings trends are periodically analyzed and, if necessary, these proceedings risks are reclassified. In this context the contingent proceedings evaluated as risk of possible loss are not recognized on an accounting basis, and the main proceedings are related to leasing companies Tax on Service of Any Nature (ISSQN), in the amount of R\$28,790 thousand. In this proceeding, the demand of the referred tax by municipalities other than those where the companies are set up and to which the tax is collected in compliance with the law is discussed.

The Special Shareholders Meeting held on March 10, 2009 resolved on the reverse split of common and preferred shares in the proportion of fifty (50) to one (1), with the simultaneous split of each share, after the reverse split, in the proportion of one (1) to fifty (50), respective types respected, with maturity term of sixty-one (61) days, as from April 8, 2009 to mature on June 8, 2009, so that the shareholders, at their own and free discretion, may adjust their position of shares, by type, in multiples lots of fifty (50) shares, by means of trading at BM&FBovespa S.A., through the brokerage firm of their choice.

Simultaneously to the transaction on the Brazilian Market, complying with the same maturities, the same procedure will be adopted on the International Market, for securities traded in New York USA and Madrid - Spain.

c) Interest on shareholders equity/dividends

Preferred shares have no voting rights, but are entitled to all rights and advantages attributed to common shares and, in compliance with Bradesco's Bylaws, have priority for repayment of capital and ten per cent (10%) additional of interest on shareholders equity and/or dividends, in accordance with the provisions of Paragraph 1, item II, of Article 17 of Law 6,404/76, with the new wording in Law 10,303/01.

According to Bradesco's Bylaws, shareholders are entitled to interest on shareholders equity and/or dividends, which correspond together to at least 30% of the net income for the year, adjusted in accordance with the Brazilian Corporation Law.

Interest on shareholders equity is calculated based on the shareholders equity accounts and limited to the variation in the Federal Government (TJLP), subject to the existence of profits, computed prior to the deduction thereof, or of retained earnings and revenue reserves in amounts that are equivalent to, or exceed twice, the amount of such interest.

Bradesco's capital remuneration policy aims at distributing the interest on shareholders equity, at the maximum amount calculated pursuant to prevailing laws, which is estimated, net of Withholding Income Tax, in the calculation of mandatory dividends of the year provided for in the Company's Bylaws.

At the Board of Directors Meeting held on December 5, 2008, the board members approved the proposal of the Board of Executive Officers related to the payment of supplementary interest on shareholders equity to shareholders related to 2008, in the amount of R\$0.571482431 (net of tax R\$0.485760066) per common share and R\$0.628630674 (R\$0.534336073 net of taxes) per preferred shares, the payment of which was made on March 9, 2009.

At a Board of Directors Meeting held on January 20, 2009, the board members approved the proposal of the Board of Executive Officers to increase by 10% the amount of monthly dividends, paid in advance to shareholders, according to the Monthly Compensation System, from R\$0.012017500 to R\$0.013219250, related to common shares, and from R\$0.013219250 to R\$0.014541175, related to preferred shares, effective since the dividends related to February 2009 paid on March 2, 2009, benefiting shareholders registered in the Company's records on February 2, 2009.

The calculation of interest on shareholders equity related to 1Q09 is shown as follows:

	R\$ thousand	% (1)
Net income for the period	1,723,012	
(-) Legal reserve	(86,151)	
Adjusted calculation basis	1,636,861	
Supplementary interest on shareholders equity (gross) provisioned (payable)	523,150	
Withholding income tax on interest on shareholders equity	(78,473)	
Interest on shareholders equity (net)	444,677	

Monthly dividends paid		123,931	
Interest on shareholders equity (net) and dividends for March 31, 2009		568,608	34.74
Interest on shareholders equity (net) for March 31, 2008		629,170	31.50

(1) Percentage of interest on shareholders equity/dividends over adjusted calculation basis.

Interest on shareholders equity and dividends were paid and provisioned as follows:

Description	Per share (gross) (1)		Gross paid/ provisioned amount	Withholding Income Tax (IRRF) (15%)	R\$ thousand
	Common shares	Preferred shares			Net paid/ provisioned amount
Monthly dividends	0.038456	0.042302	123,931		123,931
Supplementary interest on shareholders equity provisioned	0.162309	0.178540	523,150	78,473	444,677
Total for 1Q09	0.200765	0.220842	647,081	78,473	568,608

d) Treasury shares

Up to March 31, 2009, 146,721 common shares and 34,600 preferred shares were acquired and held in treasury, in the amount of R\$5,180 thousand. The minimum, weighted average and maximum cost per share is, respectively, R\$16.49278, R\$28.56446 and R\$38.33945. These shares market value on March 31, 2009 was R\$19.22 per common share and R\$23.10 per preferred share.

Bonuses		11,954
INSS contribution		10,473
Total		57,150

Post-employment benefits

	March 31, 2009	R\$ thousand
Defined contribution supplementary private pension plans		13,430
Total		13,430

Bradesco Organization does not maintain long-term benefits related to severance pay or share-based compensation for its key Management personnel.

Other information**D) According to the prevailing laws, financial institutions are not allowed to grant loans or advances to:**

- a) Officers and members of the advisory, administrative, fiscal or similar councils, as well as to respective spouses and immediate family members;
- b) Individuals or corporations that hold interest in their capital, with over 10%;
- c) Corporations holding over 10% of interest, the financial institution itself, any officers or administrators of the institution, as well as their spouses and respective immediate family members;

Therefore, no loans or advances are granted by the financial institutions to any subsidiary, members of the Board of Directors or Board of Executive Officers and relatives.

II) Shareholding

Members of the Board of Directors and Board of Executive Officers, jointly, have the following shareholding at Bradesco on March 31, 2009:

Common shares	0.74%
Preferred shares	1.11%
Total shares	0.93%

32) Financial Instruments

a) Risk management process

Bradesco approaches on an integrated basis the management of all risks inherent to its activities, supported by its Internal Controls and Compliance structure. This multidisciplinary vision enables the improvement of risk management standards and avoids the existence of gaps which may jeopardize its correct identification and measurement.

Credit risk management

Credit risk is the possibility that a counterparty of a loan or financial operation may not wish or may suffer some change in its ability to comply with its contractual liabilities, which may generate losses for the Organization.

Aiming at mitigation of credit risk, Bradesco continuously works in the follow-up of credit activities processes, in improvements, examination and preparation of inventories of loan assignment and recovery standards, in the monitoring of concentrations and identification of new components offering credit risks.

Market risk management

Market risk is related to the possibility of loss from fluctuating rates caused by unhedged terms, currencies and indices of the Institution's asset and liability portfolios.

At Bradesco, market risks are managed by means of methodologies and standards adherent and compatible with the national and international market reality, enabling us to make the Organization's strategic decisions with high agility and level of reliance.

(3) Other commitments recorded in memorandum accounts.

In its market risk management process, Bradesco Organization uses methods that comply with the best international practices, and risk limits are defined in specific Committees and validated by Senior Management. Compliance is monitored on a daily basis by the market risk area. The methodology used to determine trading portfolio risk is parametric VaR, which has a reliability level of 99%, and one-day perspective. Correlations and fluctuations are calculated based on statistical methods in which recent returns have more importance. The fluctuations and correlations used by the models are calculated on statistical bases that are used on forward-looking processes, in accordance with economic studies. The methodology applied and current statistical models are daily assessed using backtesting techniques.

We present the VaR in the chart below

Risk factors	R\$ thousand		
	2009		2008
	March 31	December 31	March 31
Prefixed	16,282	76,236	14,364

Sensitivity analysis

As a good risk management governance practice, Banco Bradesco maintains a continued risk management process, which encompasses control of all positions exposed to market risk by means of measures compatible with the best international practices and the New Basel Capital Accord – Basel II. It is also worth mentioning that the financial institutions have risk limits and controls and leverage regulated by Bacen.

Market risk limits are proposed by specific committees, assessed by the Market and Liquidity Risk Management Executive Committee and validated by the Integrated Risk Management and Capital Allocation Committee, observing the limits laid down by the Board of Directors, according to the characteristics of operations, which are divided into the following portfolios:

Trading Portfolio: consisted of all financial instruments, commodities, derivatives operations held for trading or as hedge of other trading portfolios, which are not subject to trading restrictions. Operations intended for trading are those destined to resale, to take advantage from expected or effective price movements, or for arbitrage purposes.

Banking Portfolio: operations not classified in the Trading Portfolio. These consist of structural operations deriving from several lines of business of the Organization and eventual hedges.

The following table presents the financial exposure sensitivity analysis (Trading and Banking Portfolios) pursuant to CVM Rule 475 of December 17, 2008 and does not reflect how these market risk exposures are managed in the Organization's daily operations, according to information provided in this note.

The financial exposure impacts of the Banking Portfolio (mainly interest rates and price indexes) stated in the following table do not necessarily represent an accounting loss for the Organization, due to the following reasons:

1. part of loan operations held in the Banking Portfolio is funded by demand deposits and/or savings deposits, which furnishes a natural hedge for eventual interest rate fluctuations.

2. for the Banking Portfolio, interest rates fluctuations do not mandatorily have a material impact over the Organization's results, since the intention is to hold the loan operations until their maturity.

3. derivative operations of the Banking Portfolio are used to hedge clients' operations or to hedge investments abroad, considering the tax effect on foreign exchange rate fluctuation.

Trading and Banking Portfolios		On March 31		
		R\$ thousand		
Risk factors	Definition	Scenarios		
		1	2	3
Interest rates in Reais	Exposures subject to fixed interest rates variation in Reais	(707)	(325,996)	(599,359)
Price indexes	Exposures subject to the variation of price index coupons	(5,553)	(721,657)	(1,372,304)
Domestic exchange coupon	Exposures subject to the variation of foreign currency coupon rate	(87)	(6,519)	(12,746)

Equities	Exposures subject to stocks price variation	(8,465)	(211,619)	(423,237)
Sovereign/Eurobonds and treasuries	Exposures subject to the interest rate variation of securities traded on the international market	(2,201)	(99,481)	(195,916)
Other	Exposures not classified into previous definitions		(37)	(74)
Total not correlated (1)		(19,255)	(1,421,369)	(2,715,756)
Total correlated (1)		(13,511)	(1,270,512)	(2,334,820)

(1) Amounts net of tax effects

Operations with derivatives of the Banking portfolio refer, mainly, to future market operations for cash flow hedges of CDI-related funding in the amount of R\$20,475,182 thousand (Note 8g), and are structured for the purpose of offsetting interest rate fluctuations; hedge of investments abroad, which totaled R\$9,323,886 thousand (R\$9,094,833 thousand on December 31, 2008 and R\$8,940,925 thousand on March 31, 2008) (Note 13a), are structured for the purpose of offsetting exchange rate fluctuations, also considering tax effects.

Additionally, we present below the sensitivity analysis of the Trading Portfolio, which represent exposures that might cause material impacts on the Organization's results. It is worth mentioning that results show the impacts for each scenario in a static portfolio position on March 31, 2009. The market dynamism makes this position to change continuously and does not mandatorily reflect current position. In addition, as mentioned before, we maintain a continued management process of market risks, which continuously seeks, through market dynamics, ways of mitigating/minimizing related risks, according to the strategy determined by senior management, i.e., in case of signs of deterioration signs in a certain position, proactive measures are taken to minimize potential negative impacts, aiming at maximizing the risk/return ratio for the Organization.

Trading Portfolio		On March 31 R\$ thousand		
		Scenarios		
Risk factors	Definition	1	2	3
Interest rates in R\$	Exposures subject to fixed interest rates variation and coupon in Reais	(211)	(59,933)	(118,738)
Price indexes	Exposures subject to the variation of price index coupons	(2,332)	(179,502)	(348,891)
Exchange coupon	Exposures subject to the variation of foreign currency coupon rate	(32)	(2,800)	(5,548)

Sovereign/Eurobonds and treasuries	Exposures subject to the interest rate variation of securities traded on the international market	(1,682)	(69,583)	(138,319)
Other	Exposures not classified into previous definitions		(28)	(57)
Total not correlated (1)		(7,507)	(393,096)	(774,053)
Total correlated (1)		(5,048)	(243,689)	(478,943)

(1) Amounts net of tax effects

The sensitivity analysis was carried out based on the scenarios below, always considering that these impacts would materially affect our positions:

Scenario 1: based on market information (BM&FBovespa, Andima, etc), 1 base point shocks were applied for interest rates and 1% variation for prices. For instance, the exchange rate of Reais/Dollar of R\$2.33 and 1-year fixed interest rates of 9.81% p.a.

Scenario 2: 25% shocks were determined based on the market on March 31, 2009. For instance, the exchange rate of Reais/Dollar stood at R\$2.88 and 1-year fixed interest rates of 12.25% p.a., with fluctuations of other risk factors representing a 25% shock on the respective curves or prices.

Scenario 3: 50% shocks were determined based on the market on March 31, 2009. For instance: the exchange rate of Reais/Dollar stood at R\$3.46 and 1-year fixed interest rates of 14.70% p.a., with fluctuations of other risk factors representing 50% shock on the respective curves or prices.

Liquidity Risk

Liquidity risk management is designed to control the different unhedged settlement terms of the Institution's rights and obligations, as well as the liquidity of the financial instruments used to manage the financial positions.

The knowledge and monitoring of this risk are crucial, especially to enable the Organization to settle transactions in a timely and secure manner.

At Bradesco, liquidity risk management involves a series of controls, mainly the establishment of technical limits, with an ongoing assessment of the positions assumed and financial instruments used.

We present the Balance Sheet by maturity in the chart below:

- (1) Investments in investment funds are classified as up to 30 days; and
(2) Demand and savings deposits and technical provisions for insurance, private pension plans and certificated savings plans comprising VGBL and PGBL products are classified as up to 30 days, without considering average historical turnover.

Capital Adequacy Ratio (Basel)

The Organization's risk management seeks to optimize the risk-return ratio, aiming at minimizing losses, through the implementation of well-defined business strategies and maximizing efficiency in the combination of factors which impact the Capital Adequacy Ratio (Basel).

We present the Capital Adequacy Ratio in the chart below:

		R\$ thousand					
		Basel II (1)				Basel I

Edgar Filing: BANK BRADESCO - Form 6-K

Risk-weighted assets (2) (c)	289,035,178	295,943,503	282,008,207	293,796,635	283,207,093	311,837,641
Capital adequacy ratio (a/c)	16.58%	16.04%	16.93%	16.09%	15.55%	13.92%

(1) Article 4 of Circular Letter 3,389 of Bacen includes the option based on the exclusion prerogative of the short position in foreign currency for purposes of ascertaining the Capital Adequacy Ratio, also computing tax effects, carried out with the purpose of providing hedge for interest in investments abroad. Bradesco chose this prerogative on September 29, 2008.

(2) As of July 1, 2008, with the New Basel Capital Accord (Basel II), risk-weighted assets are determined based on required reference shareholders' equity divided by 11%, which is the minimum capital required by Bacen.

(3) As of December 2008, Bacen, through Resolution 3,674, allowed financial institutions and other institutions authorized to operate by Bacen, which record an additional provision to the minimum percentages required by Resolution 2,682 of December 21, 1999, to fully add the respective amount to Tier I of reference shareholders' equity (PR), for the purposes of determining the Reference Shareholders' Equity (PR) referred to in Resolution 3,444 of February 28, 2007.

Pursuant to the New Basel Capital Accord (Basel II), the Brazilian Central Bank published Resolutions 3,380 and 3,464, concerning the structures for operating and market risks management, respectively. It also published Circular Letters 3,360, 3,361 to 3,366, 3,368, 3,383, 3,388 and 3,389, which define the necessary methodologies of portions of capital for credit, market and operating risks, respectively, as well as Resolutions 3,444, amending rules for the determination of reference shareholders' equity, and 3,490, regarding the determination of required reference shareholders' equity to be applied as of July 1, 2008.

b) Market value

The book value, net of provisions for devaluations of the main financial instruments is as follows:

Portfolios	Unrealized income (loss) without tax effects							
	Book value	Market value	In the result			In shareholders equity

(1) It includes advances on foreign exchange contracts, leasing operations and other receivables with loan assignment features;

(2) It refers to shares of publicly-held companies not considering the increment in investments in affiliated companies; and

(3) It includes the increase of the interest in BM&F S.A. in the amount of R\$66,258 thousand (December 31, 2008 R\$108,351 thousand and March 31, 2008 - Bovespa Holding R\$430,790 thousand and BM&F - R\$301,328 thousand).

Determination of market value of financial instruments:

Securities and derivative financial instruments, investments, subordinated debts and treasury shares are based on the market price practiced on the balance sheet date. Should there be no available market price quotations, amounts are estimated based on the prices quoted by dealers, on price definition models, quotation models or quotations for instruments with similar characteristics;

Prefixed loan operations were determined by discounting estimated cash flows, using interest rates applied by the Bradesco Organization for new contracts with similar features. These rates are compatible with prices practiced in the market on the balance sheet date; and

Time deposits, funds from issuance of securities and borrowing and onlending were calculated by discounting the difference between the cash flows under the contract terms and the rates practiced in the market on the balance sheet date.

33) Employee Benefits

Bradesco and its subsidiaries sponsor a supplementary private pension plan for employees and directors, in the PGBL modality, which is a private pension plan of the variable contribution type that allows the accumulation of financial resources by participants over their professional careers through contributions paid by themselves and the sponsoring company. The related resources are invested in Exclusive Investment Fund (FIE).

PGBL is managed by Bradesco Vida e Previdência S.A. and Bradesco Asset Management (BRAM). Securities Dealer (DTVM) is responsible for the financial management of FIE funds.

The contributions paid by employees and directors of Bradesco and its subsidiaries are equivalent to 4% of the salary, except for participants who, in 2001, opted to migrate to the PGBL plan from the defined benefit plan, whose contributions to the PGBL plan were maintained at the levels in force for the defined benefits plan at the time of migration, respecting nevertheless the 4% minimum.

The actuarial liabilities of the variable contribution plan (PGBL) are fully covered by net assets of the corresponding FIE.

In addition to the aforementioned variable contribution plan (PGBL), former participants of the defined benefit plan are guaranteed a proportional deferred benefit, corresponding to their accumulated rights in this plan. For participants of the defined benefit plan, transferred or not to the PGBL plan, retired participants and pensioners, the present value of the plan's actuarial liabilities is fully covered by guaranteeing assets.

Banco Alvorada S.A. (merging company of Banco Baneb S.A.) maintains supplementary retirement plans of variable contribution and defined benefit, through Fundação Baneb de Seguridade Social - Bases (related to former employees of Baneb). The actuarial liabilities of the variable contribution and defined benefit plans are fully covered by assets of the plans.

Banco Bradesco BBI S.A. (current name of Banco BEM S.A.) sponsors supplementary retirement plans of both defined benefit and variable contribution types, through the Assistance and Retirement Pension Fund for the employees of the bank of the State of Maranhão (Capof).

Alvorada Cartões, Crédito, Financiamento e Investimento S.A. (Alvorada CCFI) (merging company of Banco BEC S.A.) sponsors a defined benefit plan by means of the Private Pension Plan Fund of the Bank of the State of Ceará. (Cabec)

The funds guaranteeing the private pension plans are invested in compliance with the applicable legislation (government securities and private securities, listed company shares and real estate properties).

Bradesco in its facilities abroad provide their employees and directors with a private pension plan with variable contribution, which enables us to accumulate financial resources during the participant's professional career, by means of contributions paid by himself/herself and in equal proportion by Bradesco. The contributions of employees, directors and of Bradesco in its facilities abroad are jointly equivalent to at most 5% of the annual salary of the benefit.

Expenses with contributions made in 1Q09 amounted to R\$51,214 thousand (4Q08 R\$89,427 thousand and 1Q08 R\$77,942 thousand).

In addition to this benefit, Bradesco and its subsidiaries offer their employees and directors several other benefits including: health insurance, dental care, life and personal accident insurance, as well as professional training, the expenses for which, including the aforementioned contributions, amounted to R\$364,123 thousand in 1Q09 (4Q08

R\$420,845 thousand and 1Q08 R\$361,847 thousand).

2014 (1 st Quarter)	40,385	15,996	1		56,382
Total	8,330,787	3,813,100	1,250,500	384,920	13,779,307

							R\$ thousand
Social contribution tax credit - Provisional Measure 2,158-35							
	2009	2010	2011	2012	2013	2014 and 2015	Total
Total	82,625	10,396	115,604	38,170	16,572	143,179	406,546

Projected realization of tax credits is estimated and it is not directly related to the expected accounting income.

The present value of tax credits, calculated based on the average funding rate, net of tax effects, amounts to R\$12,960,602 thousand (December 31, 2008 R\$11,879,228 thousand and March 31, 2008 R\$8,609,839 thousand), of which R\$11,069,727 thousand (December 31, 2008 R\$10,269,897 thousand and March 31, 2008 R\$7,536,491 thousand) includes temporary differences, R\$1,535,560 thousand (December 31, 2008 R\$1,256,550 thousand and March 31, 2008 R\$680,107 thousand) includes tax losses and negative basis of social contribution and R\$355,315 thousand (December 31, 2008 R\$352,781 thousand and March 31, 2008 R\$393,241 thousand) comprises tax credit over social contribution Provisional Measure 2,158-35.

e) Unrecorded tax credits

The amount of R\$75,238 thousand (December 31, 2008 R\$70,155 thousand and March 31, 2008 R\$65,755 thousand) was not recorded as tax credit, and will be recorded when it presents effective prospects of realization according to studies and analyses prepared by the Management and in accordance with Bacen rules.

Due to the *Ação Direta de Inconstitucionalidade* (lawsuit filed at the Supreme Court claiming the unconstitutionality of law approved by congressmen) filed by the National Confederation of the Financial System (Consif) against Provisional Measure 413 of January 3, 2008 (converted into Law 11,727 of June 23, 2008, Articles 17 and 41), tax credits from previous periods arising from the Social Contribution rate increase from 9% to 15% were recorded up to the limit of the corresponding consolidated tax liabilities. Tax credit balance related to Social Contribution rate increase not recorded amounts to R\$925,951 thousand (note 3h).

f) Deferred tax liabilities

	R\$ thousand		
	2009		2008
	March 31	December 31	March 31
Adjustment to market value of derivative financial instruments	586,031	485,716	719,365
Excess depreciation	1,892,706	1,324,688	693,544
Operations in future liquidity market	1,768	1,807	55,994
Others	684,534	655,639	337,599
Total	3,165,039	2,467,850	1,806,502

The deferred tax liabilities of companies of the financial and insurance sectors were established considering the increase of the social contribution rate, determined by Provisional Measure 413 of January 3, 2008 (converted into Law 11,727 of June 23, 2008) (note 3h).

35) Other Information

a) The Bradesco Organization manages investment funds and portfolios whose net equity on March 31, 2009 to R\$200,975,384 thousand (December 31, 2008 amounts to R\$187,150,053 thousand and March 31, 2008 R\$183,821,652 thousand).

b) During 4Q08, Bacen amended reserve requirements rules, aiming at improving liquidity in Brazil's financial system, due to the shortage of foreign funds. Main amendments are outlined below:

Description	Previous Rule	Current Rule
Decrease in Bacen additional compulsory deposit requirement collected from demand deposits, savings deposits and time deposits	Bacen collects the amount in excess of R\$100 million	Bacen collects the amount in excess of R\$1 billion
Decrease in the rate to calculate Bacen additional compulsory deposit requirement collected from demand and time deposits	8%	Demand deposits 5% Time deposits 5% (4% as of January 5, 2009)
Decrease in the rate of Bacen compulsory deposit requirement collected from demand deposits	45%	42%
Decrease in the amount subject to collections over time deposits	Bacen collects the amount that exceeds R\$300 million	Bacen collects the amount that exceeds R\$2 billion
Compliance with Bacen compulsory deposit requirement collected from time deposits	100% in government securities, not deducting acquired credits	30% in government securities (40% as of January 5, 2009) 70% in cash, not remunerated (60% as of January 5, 2009) may be replaced by credits acquired up to June 30, 2009 from financial institutions, basically derived from (i) loan operations; (ii) receivables from leasing operations; (iii) advances and other issuance credits or liability of non-financial individuals and corporations, (iv) interbank deposits with guaranteed assets provided for by laws; (v) fixed income securities issued by non-financial entities, composing the institution's portfolio or investment funds; (vi) receivables pertaining to Receivables Securitization Funds (FIDC); (vii) FIDC quotas organized by the Deposit Guarantee Association (FGC); and (viii) foreign currency acquisitions with Bacen made with financial institution's resale commitment, combined with Bacen's repurchase commitment, only accepting the deduction of credits acquired from institutions whose Reference Shareholders' Equity reaches up to R\$7 billion in August 2008.

Compulsory deposit requirement over interbank deposits raised from leasing companies	Collection rate of 25%, 100% pegged by government securities	As of January 5, 2009 it includes the compulsory deposit requirement collected from time deposits, the collection rate is 15%, maintaining the characteristics of requirement compliance mentioned above.

Independent Auditors Report on Limited Review

To the Board of Directors
Banco Bradesco S.A.

1. We carried out limited reviews of the accounting information presented in the consolidated Quarterly Information of Banco Bradesco S.A. and its subsidiaries, comprising the consolidated balance sheets as of March 31, 2009, December 31 and March 31, 2008 and the related consolidated statements of income, of changes in stockholders equity, of cash flows and of value added for the quarters then ended. This information is the responsibility of the Bank's management.
2. Our reviews were carried out in accordance with specific standards established by the Institute of Independent Auditors of Brazil (IBRACON), in conjunction with the Federal Accounting Council (CFC) and mainly comprised: (a) inquiries of and discussions with management responsible for the accounting, financial and operating areas of the Bank with regard to the main criteria used for the preparation of the Quarterly Information and (b) a review of the significant information and the subsequent events which have, or could have significant effects on the financial position and operations of the Bank and its subsidiaries.
3. Based on our limited reviews, we are not aware of any material modifications which should be made to the Quarterly Information referred to above, in order that this information be stated in accordance with accounting practices adopted in Brazil.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
