2. Management's Comments according to Item 10 of the Reference Form of CVM Rule #481, as of 12.7.2009

10. Board's Comments

10.1 The Board should comment on:

a) General financial and equity conditions

- **2010**

In 2010, the real appreciated by 4.3% in relation to the U.S. dollar, reaching R\$ 1.6662 per US\$ 1.00 on December 31, 2010 as compared to R\$ 1.7412 per US\$ 1.00 on December 31, 2009. The Central Bank increased the base interest rate from 8.75% in December 2009 to 10.75% in December 2010.

The year of 2010 was characterized by the world economic growth recovery, although at a slower and uneven pace across the countries. If, on one hand, some developed countries will still have to overcome some difficulties generated by economic destabilization occurred in 2008/2009, on the other hand the clear perception that this scenario open new opportunities for emerging countries remains, in particular for countries like Brazil where the democratic environment is consolidated and the business sector has achieved a capacity consistent with such new challenges.

In spite of many challenges faced by long-term growth, Bradesco is prudently optimistic on perspectives for the next years. Brazilian economy, right at the end of 2009, presented solid bases for growth recovery, as confirmed at the end of 2010, which was marked by a robust GDP expansion to the highest level since 1985.

In the political environment, 2010 was a year where the full exercise of citizenship evidenced a deeply-rooted democratic system establishing freedom of speech and choice as a target.

Advances occurred not only in economic indicators, but also in social indicators. In fact, improvements in people's life quality, especially in consumption power, were encouraging as achievements that introduced a great part of population in the middle class, which is a significant statistical data in the country's history.

Among the most significant events in 2010, the following stand out: a) expressive volume of credit operations that increased by 20.75% over 2009, and the recovery of overdue credits, which increased by 57.94% over the previous year; b) expansion of Customer Service

Network operating in all Brazilian municipalities through the opening of 178 new Branches; c) reorganization of facilities abroad to meet properly the demands of the international market; d) Bradesco presence as the leading coordinator of Petrobras capitalization process, the greatest operation of the kind in Brazilian and world stock markets; e) acquisition of the whole capital stock of Ibi Services in Mexico, where partnership with C&A in that country made part of the deal; f) partnership with Banco do Brasil and Caixa Econômica Federal for creation and management of a Brazilian card brand - ELO; g) Bradesco permanence in Dow Jones Sustainability World Index and in the Corporate Sustainability Index - ISE; h) and from socioenvironmental liability standpoint, the launch of the Corporate Code of Ethics of Bradesco Organization in Braille.

Book Net Income was R\$ 10.022, corresponding to earnings per share of R\$ 2.66 and an annualized Return on Shareholders' Equity of 22.7%. The annualized Return on Average Total Assets stood at 1.7%, and remained stable in relation to the previous year. The Consolidated Shareholders' Equity amounted to R\$ 48.043 billion, while the total balance of assets amounted to R\$ 637.485 billion.

Credit Operations

Supported by the credit democratization strategy and the continuing expansion and diversification of its funding, Bradesco increased its volume of operations, including through direct financing and partnerships with market agents, as well as individual lines, such as payroll-deductible loans through its extensive branch, service points and Banco Postal network, and the Customer Service Center 0800 Loans.

- R\$ 274.227 billion in consolidated loan operations at year-end, including advances on exchange contracts, sureties and guarantees, credit card receivables and leasing, up 20.23% in the period.
- R\$ 16.290 billion in the allowance for loan losses.

The fiscal year of 2009, began with the worst possible forecasts for the global economy, but ended with consistent signs of recovery. The actual pace of recovery varied from country to country, accompanied by a lingering degree of uncertainty regarding the developed world, where the adjustments in progress may impose reduced consumption growth over the previous years' levels. At the same time, we see challenges ahead related to the strong fiscal deterioration in these nations as part of the anti-cyclical response to the risk of an economic depression.

Brazil has successfully overcome the challenges imposed by the crisis. The adoption of anti-cyclical policies resulted in a decline in household consumption, the main component of GDP, but not nearly to the same extent as in previous periods of major turbulence. The decline in

investments temporarily interrupting the expansion cycle of the previous five years is already showing unmistakable signs of a reversal thanks to reduced idle capacity, the favorable outlook for domestic demand and the opportunities arising from the World Cup and the Olympic Games, as well as from pre-salt oil exploration. At that occasion, Brazil was already one of the main destinations for direct investments by foreign companies.

Book Net Income was R\$ 8.012 billion, corresponding to earnings per share of R\$ 2.34 and an annualized Return on Shareholders' Equity of 21.4%. The annualized Return on Average Total Assets stood at 1.7%, compared to 1.9% in the previous year. Total Consolidated Shareholders' Equity amounted to R\$ 41.754 billion, the balance of total assets amounted to R\$ 506.223 billion.

Credit Operations

Supported by the credit democratization strategy and the continuing expansion and diversification of its funding, Bradesco increased its volume of operations, including through direct financing and partnerships with market agents, as well as individual lines, such as payroll-deductible loans through its extensive Branches Network, Service Stations and Banco Postal, and the Customer Service Center 0800 Loans.

- R\$ 228.078 billion in consolidated loan operations at year-end, including advances on exchange contracts, sureties and guarantees, credit card receivables and leasing, up 6.78% in the period.
- R\$ 16.313 billion in the allowance for loan losses.

Funding and Asset Management

All in all, the Bank managed R\$ 20.910 million in checking accounts and was responsible for 17.73% of the Brazilian Savings and Loan System - SBPE.

At the close of the year, funds raised and managed totaled R\$ 702.065 billion, 17.48% more than the previous year, as follows:

- R\$ 284.346 billion in demand deposits, time deposits, interbank deposits, other deposits, open market and savings accounts;
 - R\$ 247.700 billion in assets under management, comprising investment funds, managed portfolios and third-party fund quotas, 32.35% up on the same period in the previous year;
 - R\$ 86.411 billion in the exchange portfolio, borrowing and onlending, working capital, tax payment and collection and related charges, funds from the issue of securities and subordinated debt in Brazil, and other funding;
-

- R\$ 75.572 billion in technical provisions for insurance, supplementary private pension plans and savings bonds, a 17.01% improvement over the year before; and
- R\$ 8.036 billion in foreign funding, through public and private issues, subordinated debt and the securitization of future financial flows, equivalent to US\$ 4.615 billion.

2008

In 2008, Brazilian GDP increased by 5.1%, and the real depreciated by 31.9% in relation to the U.S. dollar, reaching R\$ 2.3370 per US\$ 1.00 on December 31, 2008, as compared to R\$ 1.7713 per US\$ 1.00 on December 31, 2007. The Central Bank gradually increased the base interest rate from 11.25% in December 2007 to 13.75% in December 2008.

The fiscal year of 2008 was marked by a variation in the robust expansion cycle of global growth initiated in 2004, a period of several structural changes that benefited emerging economies like Brazil's. This change occurred with the onset of the most severe crisis of the past 70 years, basically characterized by a strong deleveraging process that intensified in September and has affected several interconnected markets. The most relevant outcomes of this process were noticeable in the financial volatility, the banking system became unstable in various economies, credit constraints and reduced capital flows, changes in asset and commodity prices and higher risk aversion.

Notwithstanding an unfavorable international scenario, the Brazilian economy behaved well most of the year, with growth around 5%, a level achieved for the second consecutive year.

Special and Annual Shareholders' Meetings to be held on March 10, 2011

.10.

Household consumption and investments are still the main drivers of economic expansion, benefited by an environment of higher confidence among consumers and businessmen and by credit and income growth. Inflationary pressures deriving from a disparity between supply and demand and intensified by high commodity prices by mid-2008, resulted in monetary tightening, which decisively contributed to Brazil avoiding an acceleration of inflation as strong as that verified in several economies. Within this scenario, Brazil obtained the coveted investment grade in the first half of 2008 amid high volatility in the global markets. It is also worth mentioning a significant inflow of foreign direct investments, which reached the level of US\$ 40 billion for the first time in history.

The Net Income for the year was R\$ 7.620 billion, corresponding to R\$ 2.48 per share and annualized return on average Shareholders' Equity of 23.76%. The annualized Return on Average Total Assets stood at 1.93%, compared to 2.67% in the previous year. Consolidated Shareholders' Equity amounted to R\$ 34,257 million, while the balance of total assets amounted to R\$ 454,413 million.

Credit Operations

An increased volume of Bradesco loan operations, both in financing directly made and partnerships with market agents, and in other lines focused on Individuals, such as Payroll Deductible Loans, is based on the credit democratization strategy and on the continuous expansion and diversification of financing by means of its extensive Branches Network, Service Stations and Banco Postal as well as several alternative channels, such as Bradesco Dia&Noite ATMs, Internet Banking, Fone Fácil, Bradesco Celular and on Customer Service Center 0800 Loan.

- R\$ 213.602 billion in consolidated loan operations at year-end, including advances on exchange contracts, sureties and guarantees, credit card receivables and leasing, up 34.2% in

the period.

Special and Annual Shareholders' Meetings to be held on March 10, 2011

- R\$ 10.263 billion in the allowance for loan losses

The Bank managed, together, 20.081 million checking accounts and held 18.0% of the Brazilian Savings and Loan System - SBPE.

Liquidity and Financing

Central Bank requirements for compulsory deposits determine our minimum liquidity levels. We review our asset and liability management policies from time to time to ensure that we have sufficient liquidity available to honor withdrawals, deposits, repay other liabilities at maturity, extend loans or other forms of credit to our customers and meet our own working capital needs.

The treasury department acts as a support center for our business segments by managing our funding and liquidity positions and executing our investment objectives in accordance with our asset and liability management policies. It is also responsible for setting the rates for our different products, including exchange and interbank transactions. The treasury department covers any funding shortfall through borrowing in the interbank market. It seeks to maximize efficient use of our deposit base by investing any surpluses in liquid instruments in the interbank market.

Special and Annual Shareholders' Meetings to be held on March 10, 2011

.21.

We have used our excess liquidity to invest in Government bonds and expect to continue doing so, subject to regulatory requirements and investment considerations. Our principal sources of financing are:

- demand deposits, savings deposits and term deposits; and
- debentures, borrowing and onlending, funds from issuance of securities and subordinated debts.

- **Deposits**

Deposits are our most important source of funding. Our deposits balance over these years progressed in the following manner:

- in 2010, the balance of our deposits increased approximately 13% as compared to 2009, mainly due to the increase in time and saving deposits; and
- in 2009, the balance of our deposits increased approximately 4% as compared to 2008, mainly due to the increase in demand and savings deposits.

Deposits accounted for approximately 60% of total liabilities at December 31, 2010. Our deposits consist primarily of real-denominated, interest-bearing time and savings deposits and real-denominated, non-interest-bearing demand deposits. The increase in the balances of our savings and demand deposits from December 31, 2010 through December 31, 2009 was

due basically to the increase in our client base. At December 31, 2010, we had 23.1 million checking accounts and 41.1 million savings accounts, compared to 20.9 million checking accounts and 37.7 million savings accounts at December 31, 2009.

- **Debentures**

Positive variation recorded between 2010 and 2009 basically refers to the placement of such papers, which are used to back purchase and sale commitments that are impacted by the maintenance of the economic activity pace.

Special and Annual Shareholders' Meetings to be held on March 10, 2011

.22.

In 2009 x 2008 comparison, the positive variation observed basically reflects: a) the placement of these securities, which are used to back purchase and sale commitments; and b) the better rates of these operations in relation to those practiced for time deposits, which suffered contraction due to the return of liquidity in the market.

- **Borrowing and Onlending**

Variation in the year of 2010, as compared to 2009 balance, is mainly due to the increased volume of loans and onlending in the country, basically from Finame and BNDES operations.

The reduction in the comparative between the fiscal years of 2009 and 2008 was basically due to: a) the 25.5% negative exchange rate variation, which directly impacted borrowing and onlending denominated and/or indexed in foreign currency, which was partially offset by: b) the increase in the volume of funds from borrowing and onlending in the country, especially through Finame and BNDES operations.

- **Funds from Issuance of Securities**

The variation in the fiscal year of 2010 compared to 2009, mainly derives from: a) new issuances of Financial Bonds in the market, occurred in the 2nd quarter of 2010, the balance of which in December 2010 amounted to R\$ 7,820 million; b) the increased volumes of securities issued abroad in the amount of R\$ 1,100 million; c) the increased operations of Real Estate Exchange Bills in the amount of R\$ 777 million; and d) the greater volume of Mortgage-Backed Securities in the amount of R\$ 379 million.

In the comparison between fiscal years of 2009 and 2008, the reduction was mainly due to: a) the negative exchange rate variation of 25.5%, which directly impacted operations with MT100; b) the reduction in funds from Debentures, due to repurchase by third parties in 2nd quarter of 2009; which was offset by: c) new operations with Agribusiness Mortgage Letters.

Subordinated debt

In December 2010, Bradesco's Subordinated Debt totaled R\$ 26.315 million (R\$ 5.079 million abroad and R\$ 21.236 million in Brazil).

In 2010, there was an issuance of R\$ 2,026 million of Subordinated Debts (R\$ 193 million locally and R\$ 1,833 million abroad), being this total is eligible to compose Level II of Basel Index, due between 2016 and 2021. It is worth mentioning that only R\$ 8.051 million of the total subordinated debt are used in the calculation of the Basel Index, given the respective maturity.

Additionally, it should be pointed out that on January 13, 2011, Bradesco issued subordinated notes in the total amount of US\$ 500 million, which will be submitted to Bacen to compose Level II of Basel Index.

In December 2009, Bradesco's Subordinated Debt totaled R\$ 23,104 million (R\$ 3,779 million abroad and R\$ 19,325 million in Brazil). Overseas, Bradesco concluded its US\$ 750 million funding operation through the issuance of subordinated notes.

It is worth mentioning that only R\$ 10,951 million of the total subordinated debt are used in the calculation of the Basel Index, given the maturity of each subordinated debt operation.

In the fiscal year of 2008, Bradesco issued R\$ 1,575 million in Subordinated CDB in Brazil.

- **Sources of Additional Liquidity**

In some limited circumstances we may obtain emergency funds from the Central Bank through a transaction referred to as "redesconto." A redesconto is a loan from the Central Bank to a financial institution, that loan being guaranteed by federal government securities owned by the financial institution. The amount of federal government securities held by the financial institution as trading securities limits the amount of redesconto transactions. Banco Bradesco did not enter into redesconto transactions for liquidity purposes.

iv) Eventual restrictions to the issuer, in particular with respect to limits of indebtedness and taking on new debts, distribution of dividends, sale of assets, issuance of new securities, and sale of shareholding control

There are no restrictions imposed to Bradesco.

g) Limits for use of contracted financing

Minimum short-term liquidity limits are established by Internal Committees, Executive Board and Administrative Board. Such limits are intended to ensure a sufficient liquidity and meet the minimum expected needs. Bradesco reviews periodically such limits, on which projected cash needs are based.

h) Significant changes to each item of financial statements

There are no significant changes to items of the Organization's financial statements.

Adjusted Net Income for the year of 2010 amounted to R\$ R\$ 9,804 million, corresponding to an increase of 29.2%, or R\$ 2,218 million, over the previous year. Consequently, the Return on Average Shareholders' Equity (ROAE) reached 22.2%. The Return on Average Assets (ROAA) was 1.7% in the fiscal year of 2010.

Adjusted Net Income in 2009 was R\$ 7,586 million with a decrease of 0.5% compared to 2008, due to the negative impact of economic retraction observed in 1st quarter of 2009. The Return on Average Shareholders' Equity (ROAE) reached 20.3%. The Return on Average Assets (ROAA) was 1.6% in the fiscal year of 2009.

Below, we comment the substantial accounts that affected the results of the last three fiscal years:

□ Financial Margin

Financial margin in 2010 amounted to R\$ 33,056 million, increasing by R\$ 3,302 million in relation to 2009, or 11.1%, as a result of the following factors: a) an increase of R\$ 4,297 million in results of remunerated operations, mostly derived from the increased credit results, which had been impacted by the increase volume of operations; and offset by: b) lower result obtained from □non-interest□ margin in the amount of R\$ 995 million, derived from lower treasury gains as a result of the return of internal and external marks to normality, which provided significant gains in 2009.

In the comparison between the fiscal years of 2009 and 2008, financial margin improved by R\$ 6,611 million, which corresponds to an increase of 28.6%, driven by the following factors: a) the increase of R\$ 4,290 million in the result of interest-earning operations, basically due to the higher average business volume; and b) the increase in non-interest income of R\$ 2,321 million, basically derived from higher treasury/securities gains.

Special and Annual Shareholders' Meetings to be held on March 10, 2011

.28.

□ Provision for Loan Losses

In 2010, Provision for Loan Losses amounted to R\$ 8,703 million, decreasing by 24.2% in relation to the previous year, as a result of lower default and higher credit recovery, which increased by 57.9% in the period to R\$ 2,677 million. Credit operations increased by 23.0% in the same period, showing that Bradesco credit portfolio increased with quality.

In the comparison between the fiscal years of 2009 and 2008, Provision for Loan Losses shows a variation of R\$ 4,561 million, essentially due to the constitutions required to adjust provisioning levels in view of the weak economic performance, especially in the first six months of 2009, in addition to additional efforts in PDD resulting from rating revisions.

□ Income from Insurance, Private Pension Plans and Savings Bonds

Until December 2010, the income from Insurance, Private Pension Plans and Savings Bonds increased by 39.8% over the same period of the previous year. That increase was due to the performance of Saving Bonds, Car, Health and Life products.

It should be highlighted that, with respect to the adjusted net income for 2010 compared to the same period of 2009, the Insurance Group recorded an expansion of 16.3%, reaching in 2010 R\$ 2,904 million, derived from the following factors: (i) 18.0% increase in sales; (ii) improved financial income; and (iii) 2.6% fall in casualties.

The Insurance Group's technical provisions represented 30.6% of the insurance industry in November 2010, according to Susep and the National Supplementary Health Agency (ANS).

Special and Annual Shareholders' Meetings to be held on March 10, 2011

.29.

Book Net Income in fiscal year 2009 was R\$ 2,723 billion (R\$ 2,648 billion in 2008), with a Return on Equity of 27.1%.

Revenue in fiscal year 2009 was R\$26.3 billion, an increase of 13.8% on the prior year. Meanwhile, Net Income was 2.8% higher than in 2008, due to: a) the better financial result, despite the reduction in interest rates; b) the net effect from the payment of taxes through the program for settlement of tax debits through cash and installment payments under Law No. 11,941/09 (REFIS); c) the higher equity income; which was partially offset by:

d) the constitution of the technical provisions described above; and e) the increase of 6% in the CSLL tax rate.

In November 2009, Net Income at Bradesco Insurance Group accounted for 36.5% of net income in Brazil's entire insurance industry (Source: Insurance Superintendence - Susep). The Insurance Group's technical provisions represented 31.8% of the insurance industry in November 2009, according to Susep and the National Supplementary Health Agency (ANS).

Fee and Commission Income

In 2010, Fee and Commission Income increased by R\$ 1,756 million, as a result, especially from: (a) the good performance of credit card segment derived from the increase of card/client base, revenues from Banco Ibi, and effects of changes in equity capital of Visavale and Cielo; (b) the increase of current account revenues, derived from the expansion of operations and account holder base, which recorded a net increase of some 2.2 million new accounts in the period; (c) the increase of revenues from credit operations; (d) the increase of revenues from fund management; (e) the increase of revenues from collections and taxes;

and (f) the increase of revenues from consortium management.

Special and Annual Shareholders' Meetings to be held on March 10, 2011

.30.

In the comparison between the fiscal years of 2009 and 2008, fee and commission income presented an increase of R\$ 872 million, mainly due to the growth in credit card operations and the strong performance of underwriting operations, as well as by the larger business and client base, which expanded some 4.0% over the last 12 months.

Personnel Expenses

In the comparison of the fiscal years of 2010 and 2009, there was an increase of R\$ 1,335 million principally explained by: a) the amount of R\$ 900 million in "structural" portion related to: (i) increase of wage levels; and (ii) net staff increase of 7,574 employees; and (iii) incorporation of Banco Ibi occurred in November 2009; and b) the "non-structural" portion in the amount of R\$ 435 million, basically derived from: (i) higher expenses related to profit sharing by officers and employees (PLR); and (ii) higher expenses related to provision for labor proceedings.

In the comparison of the fiscal years of 2009 and 2008, there was an increase of R\$ 577 million principally explained by: a) the R\$ 505 million in "structural" expenses, which were basically related to higher expenses with share-based compensation and charges; and b) R\$ 72 million in "non-structural expenses", which was basically due to the build in the provision for employee profit sharing (PLR).

Administrative Expenses

The comparison between the year of 2010 and the year of 2009 shows that the 21.5% increase is basically due to: (i) the impact of incorporation of Banco Ibi occurred in November 2009 (should this effect have been excluded, administrative expenses would have increased

by 15.6%); (ii) higher costs of advertising and publicity in 2010, as in 2009 that expense recorded a significant reduction in relation to its history; (iii) increase of volume of business and services; (iv) increase of variable expenses associated with revenues (e.g., Bradesco Expresso and Banco Postal); (v) higher costs of legal advice, mainly related to credit recoveries that increased by 60% in 2010; and (vi) expansion of Customer Service Network by 10,307 outlets, including 174 branches, 368 PAB/PAE/PAA, 5,904 Bradesco Expresso, and other 3,861 other facilities totaling 54,884 customer service outlets on December 31, 2010.

Special and Annual Shareholders' Meetings to be held on March 10, 2011

.31.

In 2009, in comparison with the fiscal year of 2008, administrative expenses presented an increase of R\$ 1,186 million, mainly due to the expansion in the Customer Service Network, the higher business volume and the expansion in the client base.

□ Tax Expenses

The comparison between the year of 2010 and the year of 2009 shows that tax expenses increased by R\$ 585 million, which was basically an effect from increased expenses related to ISS/PIS/Cofins derived from increased tax revenues, especially the financial margin and revenues from services provided.

In 2009, presented an evolution of R\$ 305 million compared to the fiscal year of 2008, mainly derived from the higher expenses with PIS/Cofins taxes due to an increase of taxable revenue from the higher financial margin and fee and commission income in the period.

□ Other Operating Income and Expenses

In 2010, the increase of other operating expenses net of other operating income, in the amount of R\$ 433 million, derives mainly from higher expenses related to: (i) constitution of operating provisions, with emphasis on civil contingencies; (ii) premium amortization; and (iii) operating expenses incurred with the incorporation of Banco Ibi in November 2009.

Special and Annual Shareholders' Meetings to be held on March 10, 2011

.32.

In the comparison between the fiscal years of 2009 and 2008, the increase in operating expenses net of other operating income of R\$ 645 million basically results from the builds in operating provisions and premium amortization.

b) Variations in income from price changes, foreign exchange rates, inflation, changes in volumes and introduction of new products and services

c) Impact of inflation, variation of prices of main inputs and products, and foreign exchange and interest rates on the issuer's operating income and financial income

□ Sensitivity Analysis

Trading Portfolio is also monitored on a daily basis by sensitivity analysis, which measures the effects of market and price curves variations on our positions. In addition, a sensitivity analysis of the Organization's financial exposures (Trading and Banking Portfolios) is performed on a quarterly basis, as established by CVM Directive 475/08.

It should be pointed out that the financial exposure impacts of the Banking Portfolio (mainly interest rates and price indexes) do not necessarily represent an accounting loss for the Organization. This occurs because part of loan operations held in the Banking Portfolio is funded by demand deposits and/or savings deposits, which provides a natural hedge for eventual interest rate fluctuations, and because interest rates fluctuations do not necessarily have a material impact on the Organization's results, since the intention is to hold the loan operations until their maturity.

Tables below show the sensitivity analysis of financial exposures (Trading and Banking Portfolios)

We present below, the sensitivity analysis of the Trading Portfolio, which represents exposures that might cause material impacts on the Organization's results. It is worth mentioning that results show the impacts for each scenario for a static portfolio position. The market dynamism results in continuous changes in these positions and does not necessarily reflect the current position. In addition, as mentioned previously, the Organization has in place a continuous market risk management process that pursues, according to the market

dynamism, ways to mitigate the associated risks, according to the strategy established by the Top Management. This way, upon any signs of deterioration of a specific position, proactive measures are taken to minimize potential negative impacts and maximize the risk/return ratio for the Organization.

Sensitivity analyses were based on scenarios prepared for the relevant dates, always taking into account the market information at the time, as well as scenarios that would adversely affect our positions, as shown by the following examples:

Special and Annual Shareholders' Meetings to be held on March 10, 2011

.35.

- **2010**

Scenario 1: Based on market information (BM&F Bovespa, Anbima etc), one base point stress was applied for interest rates and 1% variation for prices. For example: for scenario applied to positions on December 31, 2010, Real/US\$ rate was R\$ 1.68. For interest scenario, 1-year fixed rate applied to positions on December 31, 2010 was 12.05% p.a.

Scenario 2: 25% stresses were determined based on the market. For example: for scenario applied to positions on December 31, 2010, Real/US\$ rate was R\$ 2.08. For interest scenario, 1-year fixed rate applied to positions on December 31, 2010 was 15.05% p.a. The fluctuations of other risk factors also represented a 25% stress in the corresponding curve or prices.

Scenario 3: 50% stresses were determined based on the market. For example: for scenario applied to positions on December 31, 2010, Real/US\$ rate was R\$ 2.49. For interest scenario, 1-year fixed rate applied to positions on December 31, 2010 was 18.06% p.a. The fluctuations of other risk factors also represented a 50% stress in the corresponding curve or prices.

- **2009**

Scenario 1: based on market information of December 31, 2009 (BM&F Bovespa, Anbima, etc), one base point stress was applied for interest rates and 1% variation for prices. For example: the Real/Dollar quotation was R\$ 1.76 and the 1-year prefixed interest rate was 10.51% p.a.

Special and Annual Shareholders' Meetings to be held on March 10, 2011

.36.

Scenario 2: 25% stresses were determined based on the market at December 31, 2009. For example: the Real/Dollar quotation was R\$ 2.18 and the 1-year prefixed interest rate was 13.13% p.a., and fluctuations of other risk factors represented a 25% stress in the corresponding curve or prices.

Scenario 3: 50% stresses were determined based on the market at December 31, 2009. For example: the Real/Dollar quotation was R\$ 2.62 and the 1-year prefixed interest rate was 15.75% p.a., and fluctuations of other risk factors represented a 50% stress in the corresponding curve or prices.

- **2008**

Scenario 1: consists of the probable scenario for risk factors and is based on market information (BM&F Bovespa, Anbima, etc), such as the future interest rate curve. For example: the Real/Dollar quotation was R\$ 2.35 and the 1-year fixed interest rate was 11.60% p.a.

Scenario 2: 25% stresses were determined based on the market at December 31, 2008 and applied on Scenario 1. For example: the Real/Dollar quotation was R\$ 2.93 and the 1-year prefixed interest rate was 14.64% p.a., and fluctuations of other risk factors represented a 25% stress in the corresponding curve or prices.

Special and Annual Shareholders' Meetings to be held on March 10, 2011

.37.

Scenario 3: 50% stresses were determined based on the market at December 31, 2008 and applied on Scenario 1. For example: the Real/Dollar quotation was R\$ 3.52 and the 1-year prefixed interest rate was 17.68% p.a., and fluctuations of other risk factors represented a 50% stress in the corresponding curve or prices.

Liquidity Risk

The Liquidity Risk is the possibility of the Organization not having enough financial funds to honor its commitments due to the mismatch between payments and deposits, taking in consideration different currencies and the settlement terms of its rights and obligations.

The Organization has a liquidity policy that establishes both the minimum levels to be considered, while taking into account stress scenarios, and to which types of financial instruments the funds should remain applied, and also establishes the operation strategy to be adopted when necessary.

Liquidity risk management process includes the daily monitoring of composition of available funds, the observance of the minimum liquidity level and the contingency plan applicable to stress conditions. Position control and monitoring is centralized.

Operational Risk

The operational risk is represented by loss derived from internal processes, people and inadequate or defective systems, and external events. This definition includes the legal risk, but excludes the Strategic and Goodwill risk.

Special and Annual Shareholders' Meetings to be held on March 10, 2011**.38.**

The Organization considers operational risk management activity to be indispensable for added value generation. The control of that risk is centralized by identification, measurement, mitigation plans and consolidated management of its operational risks at company level.

Among the operational risk mitigation plans, emphasis is given to the management of business continuity, which consists of formal plans scheduled to be adopted at crisis circumstances, to ensure business recovery and continuation and prevent or mitigate losses.

Interest Rate Sensitivity

Management of interest rate sensitivity is a key component of our asset and liability policy. Interest rate sensitivity is the relationship between market interest rates and net interest revenue due to the maturity or repricing characteristics of interest-earning assets and interest-bearing liabilities. For any given period, the pricing structure is considered balanced when an equal amount of these assets or liabilities matures or reprices in that period. Any mismatch of interest-earning assets and interest-bearing liabilities is known as a gap position. A negative gap denotes liability sensitivity and normally means that a decline in interest rates would have a negative effect on net interest income. Conversely, a positive gap denotes asset sensitivity and normally means that a decline in interest rates would have a positive effect on net interest income. These relationships can change significantly from day to day as a result of both market forces and management decisions.

Our interest rate sensitivity strategy takes into account: (a) rates of return; (b) the underlying degree of risk; and (c) liquidity requirements, including minimum regulatory banking reserves, mandatory liquidity ratios, withdrawal and maturity of deposits, capital costs and additional demand for funds.

We monitor our maturity mismatches and positions and manage them within established limits. Our Treasury committee reviews our positions at least weekly and changes our positions as market outlooks change.

10.4. The Board should comment on:

a) significant changes in accounting practices

b) significant effects of changes in accounting practices

In line with our process of compliance with international accounting standards, some regulations and their interpretations have been issued by the Accounting Decision Committee (CPC), which shall apply to financial institutions only when approved by CMN.

Accounting decisions already approved include:

- Resolution No. 3,566/08 □ Impairment (CPC 01);
-

Special and Annual Shareholders' Meetings to be held on March 10, 2011

.47.

- Resolution No. 3,604/08 □ Cash Flow Statement (CPC 03);
- Resolution No. 3,750/09 □ Disclosure on Related Parties (CPC 05); and
- Resolution No. 3,823/09 □ Provisions, Contingent Liabilities and Contingent Assets (CPC 25).

Currently it is not possible to estimate when Bacen will approve other CPC accounting decisions or whether their application will be prospective or retrospective. Therefore, it is not yet possible to quantify the accounting impacts of the application of such decisions to Bradesco financial statements.

CMN Resolution No. 3,786/09 and Bacen Circular Letters No. 3,472/09 and No. 3,516/10 established that financial and other institutions authorized to operate by Bacen, which have been incorporated as a public corporation or are required to establish an Audit Committee, shall prepare every year, starting on December 31, 2010, and publish not more than 90 days after the baseline date of December 31 their consolidated financial statements in conformity with international accounting standards (IFRS), after the international decisions issued by IASB □ International Accounting Standards Board. Bacen Circular Letter No. 3,516/10 extended the period for publication of IFRS Financial Statements related to 2010 to 120 days. As such, Bradesco is at the stage of evaluating the accounting effects of transition to IFRS, and is expected to complete that process within the period established by Bacen.

In that process, main adjustments identified in accounting practices used by Bradesco and described in the explanatory note 2 (BR GAAP), as compared to IFRS include:

Reversal of equity in the earnings of unconsolidated companies recognized in investments in affiliates	Usually those companies where the organization has participation lower than 50% of total capital stock are considered affiliates. Provision for financial
guarantees given to third parties

Financial guarantees to third parties are controlled in memorandum accounts. Fees charged for the issuance of such guarantees will be recognized on income over the period of such guarantees.

On December 28, 2007, Law No. 11,638/07 was enacted, which changes the Corporation Law with respect to accounting practices adopted in Brazil, as from the corporate year ended on December 31, 2008.

According to the new Law, the issuance of accounting regulations by CVM for public companies should comply with the international standards.

We highlight below the accounting practices changed by the new Law:

Permanent assets is now part of "Intangible" group and formally includes the rights related to immaterial goods for the company maintenance or exercised for that purpose, including goodwill acquired from consolidated/incorporated companies;

Fixed assets now includes the goods resulting from operations where there is transfer of benefits, control and risk, regardless of ownership transfer;

Deferred assets is now restricted to pre-operating expenses and incremental reorganization costs;

The parameter for evaluation of investments in affiliates by the equity method is changed, by applying that method to all affiliated where the investor has a significant influence. A significant influence is assumed when participation accounts is 20% or more of voting capital (formerly, the percentage was on total capital stock);

Creation of a new subgroup in shareholders' equity named "Equity Evaluation Adjustment," intended to record the counterpart of foreign exchange variation of corporate investments abroad, when the beneficiary's functional currency is different from the controlling company's, and the counterpart of increases or decreases of value assigned to assets and liabilities items as a result of their evaluation at market price. Because investments held by Banco Bradesco and controlled companies have substantially the same functional currency of Bradesco, this change required no adjustments;

Special and Annual Shareholders' Meetings to be held on March 10, 2011

.52.

Introduction of the concept of Adjustment to Present Value for long-term assets and liabilities and significant short-term operations. As established by the explanatory note to CVM Directive No. 469, the objective of that change is not to eliminate the presence of an expectation of future income or charge embedded in monetary assets and liabilities, but the need of obtaining values representative of the operation time;

Operations made by Bradesco and its controlled companies are already presented for their values prevailing at the time they were made, as fixed-interest asset and liability operations have been adjusted to the present value by the existence of income and expenses to appropriate, which adjust such operations to values that would be obtained at their realization if they were demand operations, as well as for credits and obligations subject to post-fixed variations and are realized for their demand value, the respective values of which are periodically adjusted by operation rates. This way, the Adjustment to Present Value for long-term assets and liabilities, as well as for short-term operations, have not required any adjustments by Bradesco and its controlled companies;

Requirement of periodic analysis to determine the level of recovery of amounts recorded in fixed, intangible and deferred assets. The management performed an analysis and amounts recorded on December 31, 2008 in such accounts had no significant adjustments;

Change in treatment of fiscal incentives, which now pass by profit and loss account, thus allowing their destination to profit reserves - tax incentive reserve excluded from the base of minimum mandatory dividends. Banco Bradesco and its controlled companies have no specific regime with any type of tax incentive, and like any other company, they have the possibility of direct part of their income tax liabilities to the acquisition of shares of companies located in regions benefiting of governmental incentives, provided that the balance outstanding in tax incentive reserve account in the shareholder's equity was constituted before the effectiveness of Law No. 11,638/07; and

Initial record of funds from third parties, which are classified in current liabilities, must evidence the net amounts received and available for use, while the incremental costs incurred in such funding should be recorded as an adjustment of current liabilities. All financial charges, such as interest, monetary and foreign exchange variations, and incremental funding costs should be appropriated to income according to the operation term and based on the concept of internal return rate.

Bradesco already defers costs related to funding operations and appropriate such values to income according to the operation term. Pursuant to Law No. 11.638/07, such costs to be appropriated are being recorded against liabilities, and were formerly recorded as deferred expenses.

c) Restrictions and emphases in the auditor's opinion

There were no restrictions or emphases in the auditor's opinion.

10.5. The Board should indicate and comment on critical accounting policies adopted by the issuer, in particular the management's accounting estimates of uncertain issues that are important for the description of financial conditions and results and require subjective or complex judgments, such as: provisions, contingencies, revenue recognition, tax credits, long-term assets, useful life of non-current assets, private pension plans, adjustments of conversion into foreign currency, costs of environmental recovery, criteria for impairment test, and financial instruments.

□ Critical Accounting Policies

Bradesco has disclosed risk factors and critical accounting policies under the best international practices of transparency and corporate governance and the financial statements prepared in accordance with US GAAP, when referring to possible political and economic conditions in domestic and international markets which can directly affect daily operations and, as a result, the Bank's financial condition.

Special and Annual Shareholders' Meeting to be held on March 10, 2011

.54.

Bradesco results are susceptible to accounting policies, assumptions and estimates. It is the Management's responsibility to adopt adequate accounting policies, in addition to make judgments and estimates that are reasonable and prudent for the preparation of financial statements.

In terms of materiality, the following items describe the accounting policies that are considered critical, as well as the areas that require a better judgment and estimate or involve a high complexity level and are likely to affect our financial conditions and the results of our operations. Accounting estimates made in such a context force us to make assumptions about uncertain matters. In each case, if we had made other estimates or if changes in estimates occurred every period, this could have a significant impact on our financial conditions or the result of our operations.

□ Allowance for loan losses

The allowance for loan losses is calculated at an amount sufficient to cover probable losses and takes into consideration CMN and Bacen rules and instructions, together with assessments carried out by the Management, in the determination of credit risk.

At the end of each period, allowance for loan losses is adjusted on the basis on an analysis of our portfolio, including the estimate of losses from credit operations and leasing and other operations with credit characteristics.

Determination of the amount of allowance for loan losses, by its nature requires us to make judgments and assumptions about our portfolios, both individually and for specific product portfolios. Upon reviewing the portfolio as a whole, several factors are likely to affect the

estimate of possible scope of losses, including the methodology adopted to evaluate historical default rates and the historical period to be considered for that evaluation. Additional factors likely to affect our determination of allowance for loan losses include:

Special and Annual Shareholders Meeting to be held on March 10, 2011

.55.

- general Brazilian economic conditions, and conditions of the relevant sector;

- previous experience with the debtor or the relevant economy sector, including the recent experience of losses;

- credit quality trends;

- value of guarantees of an operation;

- volume, composition and growth of our portfolio;

- monetary policy of the Brazilian government; and

- any delays in the receipt of information necessary to evaluate the operations or confirm the deterioration of existing credit.

We usually adopt models that help us to analyze our portfolios and determine the necessary provisions for losses. We apply statistical loss factors and other risk indicators for group of loans with similar risk characteristics to achieve an estimate of losses incurred by the portfolio and calculate the models. Although our models are frequently reviewed and improved, they are, by their nature, dependant on our judgment of information/forecasts that we receive. In addition, volatility of Brazilian economy may bring a greater uncertainty to our models than would be otherwise expected in more stable macroeconomic environment. Consequently, our allowance for loan losses may not be an indication of real future losses.

Process to determine the level of allowance for loan losses requires a high level of judgment. It is possible that others, upon considering the same information, may eventually draw reasonably different conclusions.

□ **Securities and derivatives classification**

Special and Annual Shareholders' Meeting to be held on March 10, 2011

.56.

Securities and derivatives classification comprises three categories: trading, available-for-sale, and held-to-maturity. This classification is based on the Management intent, on the date of acquisition of securities, to keep or trade such securities. Accounting treatment of securities in our possession will depend on our classification at their respective acquisition.

Possible transformations may modify our strategy with respect to a specific security, which will require a transfer among the three categories.

□ Securities and derivatives evaluation

Financial instruments recorded for the fair value in our financial statements basically include those securities classified as: trading, available-for-sale and other tradable assets, including derivatives. The fair value is defined as the value for which a position could be closed or short in a transaction with a knowledgeable party willing to negotiate without any advantages.

We usually estimate the fair value using prices quoted in the market, as available. We note that that value may be affected by the volume of traded securities, and fail to reflect the □control premiums□ derived from agreements with shareholders who maintain significant investments. However, the Management believes that quoted market prices are the best indicators of the fair value.

At fair value determination, when quoted market prices are not available, the Management makes a judgment, as the models depend on that judgment on the weight to be assigned to different factors and quality of information received. Factors used in such models include dealers' quotations, pricing models, prices of instruments with similar characteristics, and discounted cash flows. Pricing based on models also uses information on interest rates, foreign exchange rates, and option volatility, if significant and available. For example, reliable market data when estimating the impact of maintaining a strong position are generally

limited. Likewise, we use our judgment to estimate prices when there are no external parameters. If we make incorrect assumptions, or the actual model makes incorrect correlations or assumptions, the amount of income or loss recorded for a specific asset or liability will likely be inadequate. Judgment should also determine whether a fall of the fair value to below the updated cost of a security held to maturity or a security available for sale is not temporary, in a way that would allow us to recognize a devaluation of the updated cost and consider that reduction as an expense. At evaluation, is a devaluation is not temporary, the Management will decide which historical period should be considered and how serious a loss can be.

Special and Annual Shareholders Meeting to be held on March 10, 2011

.57.

Such evaluation methods may lead Bradesco to different results, should such models, assumptions or estimates be inaccurate.

Income tax

Determining the amount of our income tax is complex, and our evaluation is related to the analysis of our deferred fiscal assets and liabilities and payable income tax. In general, our evaluation requires us to estimate the future values of deferred fiscal assets and payable income tax. Our evaluation of the potential realization of a deferred fiscal asset is subjective and involves estimates and assumptions that are uncertain at their origin. Realization of deferred fiscal assets is subject to changes to future tax rates and the development of our tax planning strategies. Support to our estimates and assumptions may change over the time, as a result of unforeseen events or circumstances affecting our determination of the amount of our fiscal obligations.

We continuously monitor and evaluate the impact of new tax laws on our liabilities, as well as new events likely to affect the estimates and assumptions of our analysis of the possible realization of deferred fiscal assets.

A significant judgment is required for determining the probability of an income tax position be maintained upon an examination, even after the result of any relevant legal or administrative proceedings, based on technical merits. An additional judgment is then required to determine the amount of benefit eligible for recognition in our consolidated financial statements.

Special and Annual Shareholders Meeting to be held on March 10, 2011

.58.

□ Impairment

The book value of securities classified as available-for-sale and held-to-maturity and non-financial assets, except other assets and tax credits, are tested, at least annually, for impairment, which is recognized in the income statement for the year if the book value of an asset or its cash-generating unit exceeds its recoverable value.

A cash generating unit is the smallest identifiable group of assets that generates cash flows materially independent from other assets and groups.

□ Technical provisions for insurance

Technical provisions for insurance (reserves) are liabilities that represent the estimated amounts that will be due at a certain time in the future to our policy holders. Future benefits of policies and claims include reserves for group and individual life insurances, health insurance and casualty insurance, among others. Such benefits are based on hypotheses of mortality, disability, loss of validity, investment performance, inflation and expenses. Such hypotheses are based on our experience and are periodically reviewed to the industry standards, with the objective to ensuring the actuarial credibility. For long-term insurance agreements, when the hypotheses in a specific policy or group of policies are fulfilled, they will not be changed during the validity time of the policy. However, significant changes to experience or hypotheses may require us to make a provision for future losses expected for a certain product, and make provisions for premium shortage. Provisions for premium shortage may also be established in short-term agreements to anticipate expected future losses. Benefits and claims under future policies also include reserves for health and disability claims incurred but not reported, and life insurance. We recognize claims in the period when the service was provided to our policy holders. However, costs of claims incurred in a specific period will not be clearly recognized until we receive, process and pay such claims. We determine the liability amount through actuarial methods based on history of claim payments to determine our estimate of claim liabilities. Methods to determine such estimates and

establish the technical provisions are reviewed and updated on a regular basis. Resulting adjustments are recognized in income of the relevant period.

Special and Annual Shareholders Meeting to be held on March 10, 2011

.59.

Provisions for contingent liabilities

To estimate contingent liabilities, we make provisions taking into consideration the opinion of the legal advisors, the nature of the lawsuits, the similarity with previous processes, the complexity and positioning of courts, whenever the loss is evaluated as probable, which would cause a probable outflow of funds for the settlement of liabilities and when the amounts involved are measurable with sufficient reliability.

The contingent liabilities classified as possible losses are not recognized in the financial statements, and they must only be disclosed in the notes, when individually material, and those classified as remote do not require provision or disclosure.

We continuously monitor the legal proceedings underway to evaluate, among other things: (i) their nature and complexity; (ii) development of such proceedings; (iii) the opinion of our legal advisors; and (iv) our experience with similar litigations. Upon determining whether a loss is likely to occur and estimating its value, we also consider:

a) the probability of loss derived from claims occurred on or before the date of financial statements, which we identified after that date but before the date of publication; and

b) the need of disclosing the claims or events occurring after the date of financial statements, but before their publication.

Other assets and liabilities

Out of the net income for the year, 5% (five percent) will be allocated, before any other allocation, to the recording of legal reserve, which shall not exceed 20% (twenty percent) of the capital stock.

Legal reserve may not be recorded in the fiscal year when the balance of such reserve, added by the amount related to capital reserves addressed by Paragraph 1 of Article 182, exceeds 30% (thirty percent) of the capital stock.

- indicates its purpose in a accurate and complete manner;
- establishes the criteria to determine the annual portion of net income that will be allocated to its recording; and
- establishes the reserve's maximum limit.

Pursuant to the legislation, Article 31 of the Bylaws sets forth that the net income balance, determined after all statutory allocations, shall have the allocation proposed by the Board of Executive Officers, approved by the Board of Directors, and resolved on at Shareholders' Meeting, and 100% (one hundred percent) may be allocated to the Profit Reserves' Statutory, aiming to maintain the operating margin compatible with the development of the Company's active operations, up to the limit of 95% (ninety-five percent) of the amount of the paid up capital stock.

According to the Company's Bylaws, shareholders are entitled to interest on shareholders' equity and/or dividends, which together correspond to at least 30% of the net income for the year, adjusted in accordance with the Brazilian Corporation Law.

The interest on shareholders' equity is calculated based on shareholders' equity accounts and limited to the variation of the long-term interest rate (TJLP), subject to the existence of profits calculated before the deduction hereof, or of retained earnings and profit reserves in amounts that are equivalent to, or exceed twice the amount of such interest.

4.2.4. Management and Fiscal Council's Compensation

a. Board of Directors' proposal

Management's Compensation

For the year 2011, we propose the global amount of up to R\$250,000,000.00, for the Management's compensation, and the amount of up to R\$250,000,000.00 to support the Management's Open Complementary Pension Plans, within the Pension Plan targeted at the Employees and the Management of Bradesco Organization.

These proposals are justified by the fact that the Managers have a wide experience and vast knowledge of the Company, due to the fact that most of them have developed their career at the Organization, as well as the need of retaining their talents in an increasingly competitive market.

The Compensation Committee will permanently assess the Bank's performance and the fulfillment of objectives and budget, with a view to verifying if results justify the distribution of amounts mentioned above until the limits proposed herein.

Special and Annual Shareholders' Meeting to be held on March 10, 2011

.97.

Pursuant to letter ¶n¶ of Article 9 of the Bylaws, the global compensation will be distributed, at a meeting of the Board of Directors, to its members and to the members of the Board of Executive Officers.

Fiscal Council's Members' Compensation

Pursuant to Paragraph 3, Article 162, of Law #6,404/76, the compensation of the members of the Fiscal Council shall be determined at the Shareholders' Meeting in which they are elected and it cannot be lower, for each member in office, to 10% (ten percent) of the average compensation attributed to each Officer, without benefits, expense account and the Company's profit sharing.

At the Annual Shareholders' Meeting held on March 10, 2010, it was established a monthly amount of R\$12,000.00 to each member. For 2011, we propose the maintenance of the monthly compensation of R\$12,000.00 (twelve thousand reais) to each Sitting Member of the Fiscal Council and the Alternate Members are remunerated only when they replace the Sitting Members, in the cases of vacancy ou temporary impediments.

b. Information pursuant to item 13 of the Reference Form of CVM Rule #480, as of 12.7.2009

13. Compensation of the Management

13.1. Description of the policy or compensation practice of the board of directors, of the statutory board of executive officers, of the fiscal council, of the statutory committees and of the audit, risk, financial and compensation committees

13.1.a. Objectives of the policy or practice of compensation

The compensation practices of the Company's Senior Management aim to acknowledge the services rendered by these professionals, encouraging them to seek for solutions, targeting customer satisfaction, business growth and shareholders' return.

13.1.b. Composition of Compensation, appointing:

Special and Annual Shareholders' Meeting to be held on March 10, 2011

.98.

13.1.b.i. description of the compensation elements and objectives of each one of them

The compensation is comprised of monthly salary, intended to repay each member for their contribution to the continuity and development of the organizational activities under their responsibility, as well as occasional bonuses, in recognition of their contribution of each one of them to achieve results and Bradesco Organization's performance.

13.1.b.ii. the proportion of each component in the total compensation

The monthly compensation of the Management is 100% of fees. Occasionally, bonuses are paid according to the evaluation of the organizational results achieved.

The composition of the monthly compensation of the Members of the Audit Committee (with exception of one member that only receives compensation to participate in another Body of the Company) is 100% fees, which aims to reward the contribution of each member for acting on advising the Board of Directors in the performance of their attributions related to the follow up of the financial practices adopted in the preparation of the Company's financial statements and of its subsidiaries, as well as in the process of appointing and evaluating the effectiveness of the independent audit.

Another important factor in the definition of the compensation is that the Committee's members should have high technical qualification so as to exercise their position and at least one of them should have proven knowledge in the areas of accounting and auditing of financial institutions which qualify him to exercise his function, proving the high degree of expertise required from them, including the regulatory bodies.

It is important to mention that the compensation of each member is proportional to the days they work in the Bradesco Organization during the week.

No member of the Board of Directors and of the Board of Executive Officers receives compensation to participate in the Committees, due to the fact that they receive compensation in the referred Board of Directors and Board of Executive Officers.

Special and Annual Shareholders' Meeting to be held on March 10, 2011

.99.

13.1.b.iii. methodology for calculating and adjusting each component of the compensation

The maximum compensations for Banco Bradesco S.A.'s Management for the current year are established at the annual shareholders' meetings.

The organizational structure counts on a specific Committee that deals with matters related to the compensation of the statutory Management (Remuneration Committee, a statutory body permanently installed). This Committee's purpose is to propose to the Board of Directors compensation policies and guidelines for the Organization's Statutory Management compensation, based on the performance targets set forth by the Board of Directors.

The Board of Directors examines the recommendations of this Committee and establishes the monthly salary to be paid to each member, as well as approves the occasional payment of bonuses, according to the Organization's performance, respecting the limits established at the Annual Shareholders' Meeting.

13.1.b.iv. reasons for composition of compensation

The Organization adopts the simplified model, which is composed of monthly salary and the occasional payment of bonuses, according to the evaluation of the Organization's results and performance.

13.1.c. main performance indicators that are taken into account in determining each component of compensation

The indicators are based on individual and business area performance, the Organization's performance and results, as well as on business growth.

13.1.d. how compensation is structured to reflect the evolution of performance indicators

Special and Annual Shareholders' Meeting to be held on March 10, 2011

.100.

The model to evaluate the senior management's performance is based on objectives and targets established for the period according to the corporate strategic planning.

The budget management and plans to improve the management model are references used for the multidimensional evaluation of the professionals responsible for supporting units, and the contributions are individually evaluated, with a financial focus and market expansion.

13.1.e. how the compensation policy or practice is in line with the issuer's short, medium and long term interest

The compensation practices adopted by the Organization are in line with the interests of the Company, through the continuous maintenance of policies and guidelines carried out by the Remuneration Committee, whose analyses are primarily focused on return to shareholders.

13.1.f. existence of compensation supported by subsidiaries, controlled or direct or indirect controlling companies

Bradesco does not practice this type of compensation for the mentioned Bodies.

13.1.g. existence of any compensation or benefit related to the occurrence of certain corporate event, such as the sale of the corporate control of the issuer

Bradesco does not practice this type of compensation.
