Adjusted Net Income and Profitability**

In the second quarter of 2013, Bradesco posted adjusted net income of R\$2,978 million, up 1.2%, or R\$35 million over the previous quarter, mainly due to (i) the greater business volume that increased fee and commission income; offset by: (ii) lower financial margin income, impacted by reduced income from non-interest financial margin; and (iii) higher operating expenses.

In the year-over-year comparison, adjusted net income increased by 3.7%, or R\$209 million, in the first half of 2013, for Return on Adjusted Average Shareholders' Equity (ROAE) of 18.8%.

Shareholders' Equity stood at R\$66,028 million in June 2013, up 3.3% over the same period of 2012. The Capital Adequacy Ratio stood at 15.4%, 11.6% of which fell under Tier I Reference Shareholders' Equity.

Total Assets came to R\$896,697 million in June 2013, up 8.0% over June 2012, driven by the increase in operations and the expansion of business volume. Return on Average Assets (ROAA) came to 1.3%.

Summarized Analysis of Adjusted Income Efficiency Ratio (ER)

The “adjusted to risk” ER over the last 12 months, which reflects the impact of risk associated with the loan operations⁽²⁾ which reached 52.6% in the second quarter of 2013, remaining stable from the previous quarter, mainly due to the decrease in expenses with allowance for loan losses in the monthly comparison.

ER over the last 12 months⁽¹⁾ and quarterly ER increased by 0.3 p.p. and 1.2 p.p. in the second quarter of 2013 from the previous quarter, reaching 41.8% and 42.1%, respectively. This variation was mainly due to the reduction in non-interest financial margin, due to lower gains from the market arbitrage in the quarter.

(1) ER = (Personnel Expenses - Employee Profit Sharing + Administrative Expenses) / (Financial Margin + Fee and Commission Income + Income from Insurance + Equity in the Earnings (Losses) of Unconsolidated Companies + Other Operating Income - Other Operating Expenses). Considering the ratio between: (i) total administrative costs (Personnel Expenses + Administrative Expenses + Other Operating Expenses + Tax Expenses not related to revenue generation + Insurance Selling Expenses) and (ii) revenue net of related taxes (not considering Claims and Selling Expenses from the Insurance Group), our ER in the second quarter of 2013 would be 44.6%; and

(2) Including ALL expenses, adjusted for granted discounts, loan recovery and sale of foreclosed assets, among others.

Fee and Commission Income**

In the second quarter of 2013, fee and commission income came to R\$4,983 million, up R\$384 million, or 8.3% over the previous quarter, mainly due to the increase in business volume, highlighting the excellent performance of underwriting / financial advisory revenues in the quarter. Other sources of income that contributed to this result were: (i) card income; (ii) income from loan operations; (iii) checking account income; and (iv) fund management income.

In the year-over-year comparison, the increase of R\$1,183 million, or 14.1%, in the first half of 2013 was mainly due to: (i) the performance of the credit card segment, driven by the growth in revenue and transactions; (ii) higher income from checking accounts, which was a result of a better business volume and an increase in the checking account holder base, which posted net growth of 694 thousand active accounts in the period; (iii) higher gains from capital market operations (underwriting / financial advisory); (iv) greater income from collections; (v) greater income from fund management, whose volume of assets and portfolios under management increased by 11.4% in the period; and (vi) higher income from loan operations, due to greater volume of contracted operations and sureties and guarantees in the period.

Summarized Analysis of Adjusted Income Personnel Expenses

In the second quarter of 2013, the R\$132 million increase from the previous quarter is a result of variations in:

- structural expenses – R\$73 million increase, mainly due to the lower concentration of vacations in the second quarter of 2013; and
- non-structural expenses – R\$59 million increase, mainly due to greater expenses with provision for labor claims.

In the year-over-year comparison, the R\$325 million increase in the first half of 2013 was mainly due to:

- the R\$268 million, or 5.6% increase, in structural expenses, resulting from greater expenses with salaries, social charges and benefits, due to raise in salary levels, as per collective bargaining agreement (a 7.5% adjustment); and

Note: Structural Expenses = Salaries + Social Charges + Benefits + Pension Plans.

It is worth noting that IPCA and IGP-M inflation indexes reached 6.7% and 6.3%, respectively, in the last 12 months.

In the second quarter of 2013, the 3.6% increase in administrative expenses from the previous quarter was mainly due to the greater business and service volume in the quarter which, consequently, increased expenses with:

Press Release

Economic Scenario

In the second quarter of 2013, the different global liquidity conditions are a result of the Federal Reserve's expected decision of beginning a reduction in monetary stimulus in the coming months. However, the U.S. Central Bank has emphasized that it will maintain its accommodative monetary policy for a long time, in order to support the ongoing recovery of the North American economy, which tends to benefit the whole world in the medium run, despite its initial side effects.

With regard to the Chinese economy, a growth below that obtained in the past year is a consensus, although an abrupt slowdown is not expected. Moreover, the purpose of an intended lower rate of expansion, which was a decision of local government authorities and a response to their economic policy, is to reduce existing macroeconomic and sectorial distortions. Thus, the world's second largest economy tends to have a more sustained and qualitative growth over the coming years.

In turn, the Brazilian economy is more prepared to face the world economy's current transition phase and the challenges concerning the domestic economic policy management. This view is supported by improved macroeconomic fundamentals and institutional advances in the past years. This process has been accompanied by the increase in social indicators.

The recovery of the Brazilian economy in the past months has been mainly supported by productive investments, which tend to rise thanks to infrastructure concessions program in the second half-year. The great performance of the domestic agribusiness sector led by increased production and higher income should be pointed out. The 2013 GDP growth is expected to be higher than the past

The expectations in the medium run point to a favorable scenario to the Brazilian economy, which has one of the most complete and diversified private sectors among the emerging nations. The exploration of the pre-salt discoveries and the hosting of major sporting events constitute a series of opportunities that are only available to a select group of nations tend to improve Brazil's infrastructure, as well as increase long-term production and income.

Despite the risks to the scenario and the challenges faced by the Brazilian economy in the pursuit of higher sustainable growth in the near future, Bradesco is maintaining a positive outlook, with favorable prospects in its operational segments. The volume of credit is growing at rates that are both sustainable and risk-compatible, while delinquency has been showing signs of a decline. Thanks to the intense and ongoing upward social mobility of recent years, the scenario for the banking and insurance sectors remains highly favorable.

year and even better in 2014.
