Page 6

ü **The minority shareholders who are holders of preferred shares** with positions held up to the date of the Meetings are entitled to vote only in the item of the Form regarding the separate vote process to elect members of the Fiscal Council appointed by the shareholder(s) holder of such type of shares;

ü If the shareholder should require the adoption of the multiple voting process, it is absolutely necessary that they complete item 4 of the Form, independently from completing item 5 of the Form. In this case, if the shareholder fills “No” in the item 6 of the Form, the sum of the percentage of the votes among the candidates for the Board of Directors shall amount to 100% of the shares used.

The shareholder who decides to exercise their right to vote remotely must do so **by one of the options described below:**

I. **By delivering the Form, completed and signed, to one of Bradesco’s Branches**

This option is intended exclusively for the shareholders with shares backed by Bradesco, as the registrar of shares issued by itself:

In order to offer a greater convenience to shareholders with a position in our Record Book of Shares, the entire Bradesco's Network of Branches in Brazil is available, **during the business hours of the local bank**, to take the necessary actions for the shareholder to exercise their remote voting right.

To do so, the shareholder must take the following measures:

ü Access the Corporate Governance area of Bradesco's Investor Relations website (www.bradesco.com.br) or the website of the Brazilian Securities and Exchange Commission – CVM (<http://sistemas.cvm.gov.br/?CiaDoc>), **print the form, fill it out, initial each page and sign it.**

In this way, the shareholder may monitor the submission of their vote, via the system, until its conclusion, receiving a proof of the completion of the transaction.

The Company highlights that:

II. **Base date of Right to Bonus Stock:** it will be announced to the market after the approval of the respective process by the Central Bank of Brazil.

III. **Trading:** current shares will continue to be traded with the right to bonus and the new shares shall be available for trading after the approval of the said process by the Central Bank of Brazil and the inclusion in the position of the shareholders, which will be dealt with in a notice to the market.

Shareholders whose such data is not updated should seek a Bradesco Branch of their choice with their Individual Taxpayer's ID, their Identity Card and their proof of residence to update their registration data and receive the respective amounts to which they are entitled to.

If the proposal is approved, the "caput" of Article 6 of the Bylaws will be amended to reflect the increase of the stock capital, which will become effective with the following wording after the process is approved by the Central Bank of Brazil: "Article 6) The capital stock is R\$67,100,000,000.00 (sixty-seven billion and one hundred million reais), divided into 6,719,858,095 (six billion, seven hundred and nineteen million, eight hundred and fifty-eight thousand and ninety-five) book-entry, registered shares, with no par value, of which 3,359,929,223 (three billion, three hundred and fifty-nine million, nine hundred and twenty-nine thousand, two hundred and twenty-three) are common shares and 3,359,928,872 (three billion, three hundred and fifty-nine million, nine hundred and twenty-eight thousand, eight hundred and seventy-two) are preferred shares."

Legal and economic effects derived from the statutory amendment

The proposed amendment of the "caput" of Article 6 of the Bylaws arises from the share capital increase of Bradesco through the capitalization of existing profit reserves and subsequent issuance of shares that shall be allocated freely to the shareholders, as a bonus, at a ratio of 1 new share for every 10 shares of the same kind that they hold on the base date. The Management of Bradesco foresees that the mentioned statutory amendment **will produce:**

- **legal effects** solely by virtue of the assignment of ownership of 1 new share to each 10 shares of the same type previously held, getting preserved the ownership of all shareholders, without distinction; and
- **economic effects** arising from the increment of 10% in the total amount of interest on shareholders' equity and/or dividends paid monthly, benefiting proportionally all shareholders. Will be held the monthly amount of interest on shareholders' equity and/or dividends per share, by changing the total amount due to the greater number of shares issued and received by the shareholders due to the bonus stock.

With respect to other statutory amendments:

1. of the Paragraph Three of Article 7, of the "caput" and Paragraph One of Article 12 and of the "caput" of Articles 8, 22 and 23, due to the amendment of the term of office from one (1) year for two (2) years in the exercise of the positions of Manager and/or functions performed in Remuneration Committee or in the Ombudsman.

- **economic effects are expected** resulting from the reduction of costs (i) with publications of Minutes and (ii) obtaining of certificates required by Circular No. 3,611/2012, from the Central Bank of Brazil, issued by public and private bodies, on behalf of all the managers of the Company of annual periodicity that, from the adoption of the proposal, will

be biannually;

○ **legal effects are expected** only in relation to the adaptation of the new statutory devices (with the inclusion of paragraph four into article 7) so that the age limit to perform the position of Officer and the term of office are compatible.

2. of Article 7, due to the inclusion of a new paragraph in order to unify the age limit of the members of the Board of Executive Officers, who should continue in office until the day they turn sixty-five (65), changing, as a result, the Paragraph Two of Article 12 and Articles 18 and 19.

○ **legal and/or economic effects are not expected**, once the amendment is just to adapt the age limits currently practiced in the Company in line with the increased life expectancy, as well as the possibility of retention of executives, considering the high level of experience that they have accumulated during the career developed as part of the Bradesco Organization;

3. of Article 9, including two new items related to the manifestations of the management on the OPAs (Public Offers for the Acquisition of Shares) addressed to the shareholders and transactions that entail a change of control, consequently, renumbering the subsequent paragraphs, in line with the adaptations to the Brazilian Code of Corporate Governance regarding the principles 1.5 – Change of Control and 1.6 – Manifestations of the Management on the OPAs;

○ **immediate economic and legal effects are not expected.** However, if the Board of Directors is called to give an opinion on an eventual OPA, or operation that implies in a change of control, its opinion will be considered a relevant element in the decision making by the shareholders (legal effect); and the Board may require the hiring of technical opinions that may result in costs for the Company (economic effect).

4. of Article 10 and of item "b" of Article 24, in order to ensure that the Special and Annual Shareholders' Meetings may be conducted by any person nominated by the Chairman of the Board of Directors, or by his statutory substitute;

5. of the "caput" of Article 11, increasing the number of regular meetings of the Board of Directors, in compliance with the adaptations to the Brazilian Code of Corporate Governance in terms of principle 2.9 – Meetings of the Board of Directors;

7. of Article 14, improving the definitions of the duties of each position on the Board of Executive Officers;

8. of Article 16, informing that the Board of Directors appoint a substitute only for the CEO, in the case of a vacancy, absence or temporary impediment;

9. of Article 17, excluding from the competence of the Board of Directors to nominate officers to represent the Company in companies and/or external entities, due to the imposition of the internal standard surrounding this matter; and

10. of item III of Article 27, improving its wording.

Legal effects and/or economical are not expected due to the **1)** amendment of the Sole Paragraph of Article 1, considering the fact that it only aimed to update the corporate name of BM&FBOVESPA S.A. - Bolsa de Valores, Mercadorias e Futuros to B3 S.A. - Brasil, Bolsa, Balcão; and **2)** in the statutory changes the object of sections 4 to 9 above, due to dealing

Information on the Remuneration of the Managers and Monthly Remuneration of the Effective Members of the Fiscal Council, pursuant to Item 13 of Annex 24 of CVM Instruction No. 480, of December 7, 2009

13.1 - Description of the policy or compensation practice, including the Non-Statutory Board of Executive Officers

a) Objectives of the policy or practice of compensation

In 2012, Bradesco amended its compensation policy for managers in order to reflect the objectives established by Resolution No. 3,921/10 of the National Monetary Council (CMN), which caused, from that year on, the payment of part of the amount approved in the Annual Shareholders' Meeting as variable compensation.

Its policy aims at:

- ensuring that the compensation practice is in accordance with the law, rules and regulations that govern the matter, based on the Manager's duties, which result from the positions they hold and functions they perform; time dedicated to their functions; in competence and professional reputation, in view of their experience and qualification; and in the value of their services in the market;
- providing alignment between compensation practices for the Management and the Organization's interests, so that the decisions made are the best possible, seeking to create value for its shareholders and investors; and
- ensuring that the compensation practice is related to objectives that seek the valuation of the Organization, not encouraging behaviors that increase the risk exposure above levels

considered prudent for the strategies adopted for the short, medium and long terms.

b) **Composition of compensation, indicating:**

i. description of the compensation elements and objectives of each one of them

a) Board of Directors and Board of Executive Officers

The compensation of the members of the Board of Directors and of the Board of Executive Officers consists of Fixed Compensation, represented by Monthly Compensations fixed for the duration of their term, and Variable Compensation, based on target criteria and performance indicators, attributed according to the criteria of multiple Monthly Compensation, up to the limit authorized by the Shareholders' Meeting.

In addition, annually, a proposal is submitted to the approval of the Shareholders' Meeting to fund the Pension Plan for Managers, the amounts of which are shown in item 13.2, as post-employment benefits, which aims to ensure the commitment of managers to the present and future development of the Company's activities, that is, its operations focusing on business perpetuity and long-term value generation.

Complementary Information

Pursuant to CVM Circular Letter CVM/SEP/No. 01/2017, we are indicating in item 13.2, in the years 2017, 2016 and 2015, the amounts corresponding to social security contributions (INSS) paid by Bradesco and recognized in its results.

b) Fiscal Council

The compensation of the Effective Members of the Fiscal Council is fixed by the Shareholders' Meeting in which they are elected and they cannot be lower, for each member in office, to ten percent (10%) of the monthly compensation that, on average, is attributed to each Officer, as fixed compensation, without, under current legislation, the payment of benefits, expense account and participation in the Company's profit sharing, or any other denomination.

c) Audit Committee

The compensation of the Members of the Audit Committee is represented by fixed monthly payments for the term of his mandate, with the exception of a member which only receives remuneration as a member of the Board of Directors, and aims at rewarding the contribution of each member for acting on advising the Board of Directors in the performance of its attributions related to the follow up of the accounting practices adopted in the preparation of the Company's financial statements and of its subsidiaries, as well as in the process of appointing and evaluating the effectiveness of the independent audit.

Another important factor in the definition of the compensation is that the Committee's members must have high technical qualification so as to exercise their position and at least one of them must have proven knowledge in the areas of accounting and auditing of financial institutions which qualify him to exercise his function, proving the high degree of expertise required from them, including by the regulatory bodies.

d) Remuneration Committee

The Remuneration Committee, defined in the Bylaws, is composed by members chosen among the members of the Company's Board of Directors and also, as required by the Resolution No. 3,921/10 of CMN, by one (1) non-manager member. The members of the Board of Directors and the non-manager member, when an employee of the Bradesco Organization, are not compensated due to the position of member of the Remuneration Committee. While being a non-employee, when nominated, the member has his/her compensation set by the Board of Directors, according to the market parameters. No Manager of the Bradesco Organization is remunerated for the functions that they exercise in the Bradesco Organization committees.

e) Other Committees

Page 86

Complementary Information

The members of the other committees are remunerated only for the duties they perform in the management bodies or executive areas in which they act in Bradesco Organization. No Manager of Bradesco Organization is remunerated for duties that they perform in the referred committees.

ii. Regarding the last three fiscal years, what is the proportion of each element in the total remuneration

The Managers' compensation is comprised of Fixed Compensation, represented by Monthly Compensations established according to the duration of their term, and Variable Compensation awarded according to the criteria of multiple Monthly Compensations, based on target criteria and performance indicators, up to the limit authorized by the Shareholders' Meeting.

We highlight that the proportion/percentage of each element in the total compensation is not established, and it can be changed annually.

iii. methodology for calculating and adjusting each component of the compensation

Board of Directors and Board of Executive Officers

- **Fixed Compensation or Monthly Compensation:** monthly fixed compensations established for the period of the Manager's term.

Complementary Information

- **Variable Compensation:** amount attributed to the Managers, as performance compensation, in addition to the Fixed Compensation, based on the target criteria and performance indicator. It is important to highlight that the total Variable Compensation will be paid on a date defined by the Board of Directors, and 50% of the net value of the Variable Compensation will be allocated for the purchase of PNB shares issued by BBD Participações S.A. (PNB BBD Shares) and/or preferred shares issued by Bradesco (Bradesco preferred shares), which are filed and unavailable ("Restricted Shares"). The Restricted Shares become available in three (3) equal, annual and successive installments. The first installment will expire one year after the date of the acquisition of shares.
- **Overall amount:** includes the total compensation (fixed compensations and variable compensation).

To determine the overall amount for compensation, Bradesco Organization observes the following criteria:

1. **Bradesco Organization's Remuneration Committee:** proposes to the Board of Directors the Overall Amount for compensation (Monthly Compensation and Variable Compensation). The payment of Variable Compensation will observe the target criteria and performance indicators to be established and will be limited to Overall Amount, to be distributed to the Managers).

To define the Overall Amount for compensation (Monthly Compensations and Variable Compensation), the Remuneration Committee shall observe the following aspects:

- size and result of the company comparing to its competitors;
- domestic and international economic conditions, taking into consideration the past, present and future scenarios;
- internal and external factors that may affect the Bradesco Organization's businesses (current and potential risks); and
- Bradesco Organization's Overall performance, involving the recurrent income realized and the capacity to produce cash flows.

The Remuneration Committee will use other indicators when deem necessary and suitable. In addition, it will use studies, evaluations, surveys and other materials prepared by the technical areas, such as DEPEC – Department of Research and Economic Studies, DPOC – Department of Planning, Budget and Control, General Accounting and DCIR – Integrated Risk Control Department, besides other areas it deems appropriate.

Complementary Information

2. **Board of Directors:** the most important management Body of the Bradesco Organization, it must evaluate the Remuneration Committee proposals and resolve on them.
3. **Shareholders' Meeting:** it is incumbent on the Shareholders' Meeting to approve the Overall Amount for the compensation of the Company.

Once all the steps to determine and approve the Overall Amount for compensation are fulfilled, it is incumbent on the Board of Directors of Bradesco to establish the compensation of each one of the Managers, comprised by Monthly Compensation and, based on the fulfillment of the target criteria and indicators, Variable Compensation.

Audit Committee

The process to calculate and readjust the Audit Committee's compensation starts in the Remuneration Committee.

The Board of Directors, on its turn, evaluates the recommendations and proposals of this Committee and defines the amount of compensation for each Committee's member.

iv. reasons that justify the composition of compensation

The Organization adopts the system of "Internal Career", hiring new employees, preferably to junior positions, developing and preparing these employees to hold higher positions, when available. This way, the executive positions are filled in their majority by professionals trained at the Organization itself and, therefore, reveal a consolidated personal career, focused on the Organization's goals, in medium and long terms. In this line, Article 18 of the Bylaws expressly states that, to exercise the position of Executive Officer, the candidate must have been a staff member or a manager of Bradesco or of an associated company for more than ten (10) years (exceptionally, the Board of Directors may waive compliance with this requirement). In the same way, Article 19 of the Bylaws provides that the positions of Department Officer, Officer and Regional Officer shall be filled by people who integrate the staff members or managers of the Company or associated companies.

The system of "Internal Career" adopted by the Bradesco Organization is also reflected in the composition and functioning of the Board of Directors. In this regard, the election for the Board constitutes a "promotion" for the executive who has dedicated his/her professional life to the Company, resulting in his/her ascension to the last stage of the system of "Internal Career", therefore, representing an evolution in the career plan of the company. On the other hand, as required by Article 13 of the Internal Regulations of the Board of Directors, all the members who are or have been Officers of the Company are present daily at Bradesco, and work full time, exclusively dedicated to the Company, either by attending the meetings of the Board (in which all the strategic and relevant decisions are discussed concerning the various business areas and operations of the Organization) or advisory committees to which they belong, meeting specific and routine demands of the various businesses of Bradesco, in view of his/her experience in the activities of the Organization. These specific characteristics concerning the operation of the Board of Directors of Bradesco are reflected in the remuneration granted to its members.

Complementary Information

At the same time as the system of "Internal Career", and as a way to allow the utilization of its best professionals, the Organization promotes a constant and rotational movement, shifting employees/Managers, especially those leading areas. The Organization provides to the Manager, through the "Rotation of Duties", greater integration, experience, personal challenges and consolidation of career, being continuously monitored and evaluated for possible movements in the hierarchy.

Within this context, the Organization aims to ensure that the compensation practice complies with the law, rules and regulations that govern the matter, based on (i) the Managers responsibilities, taking into consideration the different positions they hold and the functions they perform; (ii) the time dedicated to their duties; (iii) the competence and professional reputation, considering their experience and qualification; and (iv) the value of its services in the market.

In the scope of the Board of Directors, the definition of the value of the remuneration and pension plan paid to each member also takes into consideration the following elements: (i) the exercise of the positions of Chairman and Vice-Chairman of the body; (ii) the fact that some members participate in advisory committees; and (iii) each member's different length of experience in the banking sector and in the Bradesco Organization.

In relation to the Board of Executive Officers, the value of the remuneration is scaled according to the different levels into which the Officers of Banco Bradesco are divided, which are: (i) Chief Executive Officer; (ii) Executive Vice-Presidents; (iii) Managing Officers; (iv) Deputy Officers; (v) Department Officers; (vi) Officers; and (vii) Regional Officers. There is no difference in the remuneration attributed to the Executive Vice-Presidents, the Managing Officers and the Deputy Officers, that is, all members of each of these three categories receive exactly the same values applicable to each category. However, the Department Officers, the Officers and the Regional Officers may receive different values, between themselves, even if they occupy the same position. Such differences of values are based, in accordance with the criteria suggested by the Remuneration Committee and approved by the Board of Directors, on the experience and academic background of each Officer, on the relevance and on the level of responsibility in the areas under their command or on any another differential that the Board of Directors may deem appropriate.

v. existence of non-remunerated members by the issuer and the reason for this fact

Not applicable.

Complementary Information

c) main performance indicators that are taken into consideration in determining each component of compensation

Corporate Assessment Process

The uniformity in the treatment of work areas is one of the keys for the Bradesco Organization's effectiveness, as a manner to inhibit the individualism, maintaining a good work environment favorable for teamwork.

The Organization maintains a collegiate management culture, in which all relevant decisions, business or administrative ones, are made by committees composed, primarily, by Managers.

Thus, even with the establishment of goals and objectives for all areas, individually, for purposes of compensation, prevails the Overall performance of the Organization, making no segregation of area, if it is considered as area of business or support, technical or relationship.

This overall performance, denominated in the Corporate Rule as Corporate Assessment Process takes into consideration the outcome of performance indicators, as follows:

- ROAE – Return on Equity – Adjusted;
- Overall Customer Satisfaction Index;
- Basel Index – Level 1;
- Operating Efficiency Ratio (ER);
- Social and Environmental Dimension of Market Indexes; and
- Coverage Index.

Individual assessment process

The individual performance of the Managers, as well as their corresponding areas, is accompanied by their respective superiors, according to the formal evaluation process, in compliance with the requirements of CMN Resolution No. 3,921.

For the formal assessment process, specific indicators are defined for areas and for individual assessment, according to the Managers' functions, taking into account the areas for business, controls, and other supporting areas.

For the assessment of areas, at least the following groups of indicators are considered:

- a. main activity actions: are indicators that suggest the goals and objectives of the main activities of the area;
- b. actions focused on operational efficiency: are indicators that measure the operating efficiency, in order to maximize their results with minimum use of resources;

Complementary Information

- c. actions directed to risks management: are corporate indicators that measure exposure to risk and the internal controls, properly monitored by the responsible Area (Integrated Risk Control Department – DCIR);

- d. actions directed to customer service: are indicators that assess the results/levels of satisfaction of internal and/or external customers; and

- e. actions directed to environmental aspects: are indicators that assess the degree of compliance of the objectives of the area to environmental aspects.

For individual assessment, at least the following indicators are considered:

- a. quality of the products/services: aims to evaluate the quality standards of products/services offered/rendered according to the area of the Manager assessed;

- b. commitment to strategy: aims to evaluate if its performance reflected positively with material contributions to the Strategic Planning in the period;

- c. participation in collegiate decisions: aims to evaluate the active participation in meetings and committees, with opinions that contributed to the submitted decisions;

- d. leadership team: evaluates the team management process;

- e. planning: assesses the ability to plan the activities of their area in the medium and long term;

f. overview: evaluates, mainly, the Managers' vision about future trends to meet the demands of the market; and

g. applies to the Board of Directors and its respective members, if suitable, the indicators listed above.

The performance assessment of Managers in the areas of internal control and risks management must be based on the achievement of the objectives of their own functions and not specifically in the overall performance of the Organization. The Integrated Risk Control Department – DCIR and the General Inspectorate Department – IGL are considered areas of internal control and risk management in the context of the Bradesco Organization, as well as the related areas of other companies of the Bradesco Organization.

d) **how compensation is structured to reflect the evolution of performance indicators**

Page 92

Complementary Information

It is up to the Board of Directors, after completion of all stages of definition and approval of the Overall Amount, to set the value of the compensation for each one of the Managers, in compliance with the following rules:

- i. uniformity of compensation among members of the same hierarchy (office), or differentiation as a result of the time in that position, experience, academic background or other difference that the Board of Directors deems appropriate;
- ii. part of the Overall Amount approved will be distributed in fixed equal monthly installments during the term of office of the Manager, subject to the provisions above, called Monthly Compensation; and
- iii. the remaining part of the Overall Amount may be distributed as Variable Compensation, upon proposal of the Remuneration Committee, which shall comply with established target criteria and performance indicators.

Based on the assessment and proposal of the Remuneration Committee, the Board of Directors shall define the amount of the Variable Compensation that will be paid to Managers, which will correspond to equal multiples of the Monthly Compensation that each Manager is receiving at the date of the resolution for the payment of Variable Compensation.

e) **how the compensation policy or practice is in line with the issuer's short, medium and long term interests**

In addition to the current rule, in the Bradesco Organization, to establish the Managers' Compensation, it is taken into consideration the Bradesco Organizational culture, having as main practices the "Rotation of Duties" in management positions, the adoption of the "Internal Career" system for the ascension in functional and managing positions and the decision making, primarily by collegiate bodies.

It is a practice of the Bradesco Organization to develop, continuously, its human resources, understanding that the personal and professional growth is the main motivation for its employees and managers. The "Internal Career" system is the way to allow the use of its best professionals. The staff, in all levels, including the leadership, has absolute confidence in the possibility offered, to any employee, to ascend the Bradesco Organization on its own merits, being possible for a bookkeeper to reach the position of Chief Executive Officer or Chairman of the Board of Directors, the last stage of the "Internal Career" system.

Due to this practice, consistently adopted over decades, is that the leadership positions, including the ones in the Board of Directors, are in their majority held by people who began their career at Bradesco Organization.

Besides this whole process of commitment of Managers, 50% of the net value of the Variable Compensation is for the acquisition of PNB shares issued by BBD Participações S.A. (PNB BBD Shares) and/or preferred shares issued by Bradesco (Bradesco preferred shares), which are recorded and unavailable ("Restricted Shares").

Restricted Shares become available in three (3) equal, annual and successive installments, expiring the first installment one (1) year after the date of acquisition of shares, subject to any adjustments in the event of a significant reduction of Recurring Profit Made or occurrence of negative result of the Company during the deferral period.

Complementary Information

For the establishment of the deferral related to the 50% previously described, in order to meet the provisions of Article 7 of the CMN Resolution No. 3,921/10, the Organization takes into account the rotation of duties of the mentioned Managers, as well as the collegiate decision-making process through its various committees, with the consequent dilution of possible risks arising from its decisions. Thus, it was established a single percentage of 50% of the net amount of Variable Compensation, therefore over the 40% established in the Resolution, so as to balance the percentage of the deferred Variable Compensation at levels acceptable to all Managers.

In addition, the Pension Plan of the Managers constitutes a form of ensuring their performance focused on business perpetuity and on long-term value generation for the Company.

f) **existence of compensation supported by subsidiaries, controlled or direct or indirect controllers**

Not applicable.

g) **existence of any compensation or benefit related to the occurrence of certain corporate event, such as the sale of the corporate control of the issuer**

Not applicable.

13.11 - Highest, lowest and the average individual compensation for the Board of Directors, Statutory Board of Executive Officers and Fiscal Council

Reason for not filling the table:

Bradesco's management and supervisory bodies are comprised with professionals affiliated to the Brazilian Institute of Financial Executives ("IBEF") of Rio de Janeiro. On March 2, 2010, the IBEF obtained from the 5th Federal Court of Rio de Janeiro Judicial District (lawsuit 20105101002888-5) an injunction worded as follows:

"Now, therefore, I GRANT the pleaded injunction, determining the suspension of the validity of subsection 13.11 of Attachment 24 of CVM Instruction No. 480/09, in relation to IBEF associates and, consequently, to the companies to which they are linked, prohibiting the application of any sanction in the affiliates or in the companies to which they are linked until

the subsequent decision of this Court.”

On May 17, 2013 a judgment on the merits of the referred lawsuit was handed down, through which the **aforementioned injunction was ratified** and the **request made by IBEF was upheld**, having been given to the defendant - CVM, that: *“...abstain from implementing the requirement contained in subsection 13.11 of Attachment 24 of CVM Instruction No. 480/09, as well as apply any penalty related to the noncompliance to the referred request, to IBEF associates and to the companies with which they are associated...”*.

CVM filed an appeal, which was received only in devolutive effect, and the case was sent to the Federal Regional Court of the 2nd Region, according to order made in first instance in December 2013.

The reason for not disclosing the minimum, medium and maximum compensation of the members of the companies' management and supervisory bodies is based on the preservation of individual rights to privacy and safety of the individual members of mentioned statutory bodies.

In respect to these individual rights and judicial decision referred to above, Bradesco will not disclose the information, unless judicial determination decrees otherwise.

Voting Guideline

- election, in a separate voting process, of the following candidates appointed by minority shareholders, holding preferred shares, to compose the Fiscal Council:

As there are indications of three (3) pairs of candidates running for only one (1) vacancy intended for minority shareholders holding preferred shares, the remaining shareholders may:

1. refrain or manifest themselves as contrary to the election of the three (3) pairs of candidates (effective and alternate members); and
2. vote favorably for the election of only one (1) of the three (3) pairs. In this case, they will invariably vote contrary to the election of the other two (2) pairs;
3. distribute their votes among all the pairs. In this case, the sum of the votes may not exceed 100% of their stake;

Bradesco clarifies that, if the shareholder does not indicate how they want to direct the quantities of shares to each of the pairs, or the total of their stake does not observe item 3 above, their votes will be canceled.

10.1 - General Financial and Equity Conditions

Officers should comment:

a) general financial and equity conditions

The Officers understand that Bradesco has all financial and asset conditions to ensure the compliance with obligations, guaranteeing the business expansion in the short- and long-terms.

The Officers' analysis is based on information from the last three managerial financial statements on the balance sheet date, as follows:

2017

2017 was a challenging year, but one that showed a noticeable resumption of economic activity in the country.

At Bradesco, even in an uncertain environment, we completed another chapter of achievements and important advances in our history book, the result of a balanced operational strategy, with a range of sources for the generation of business and of results, thus diversifying the risks intrinsic to the activity. Also, driven by the vocation of a pioneering spirit and determination to be at the forefront of the industry, at all times, our technological structure evolves constantly, in synergy with the advances and new forms of interaction between society and digital media and mobility, combined with the technical and professional improvement of the staff members, fundamental pillars of our Organization.

With over 75 years of professional life dedicated solely to the Bradesco Organization, with magnificent examples of endeavor, honesty and ethics, Mr. Lázaro de Mello Brandão presented his letter of resignation from the position of Chairman of the Board of Directors of Bradesco, on October 10, 2017, remaining as Chairman of the Board of the Controlling Companies of Bradesco. Originally, from Casa Bancária Almeida & Cia., a financial institution that in 1943 became Banco Brasileiro de Descontos S.A., today Banco Bradesco S.A., he conducted with great expertise, over these years, the principles and values that serve as a foundation for our Organization.

For the Organization, there are reasons for optimism regarding the Brazil of tomorrow and, in this context, we reiterate the positive prospects in relation to the growth capacity of the country. Confident in 2018, we will be looking out for business opportunities that arise in an increasingly competitive market. Thus, to exceed expectations and maintain sustainable growth, Bradesco is striving to integrate its principles in line with the strategic planning, aiming to offer increasingly diversified products and services and an extensive and well-distributed network of qualified and modern services.

The year's achievements are the result of the dedicated work of employees and other collaborators, to which we are grateful, and also to our shareholders and clients, through support, trust and preference with which they have distinguished us.

2016

2016 was a year of great events. The conclusion of the acquisition of HSBC Bank Brasil S. A. – Banco Múltiplo (HSBC Brasil), the largest in our history, allowed us to broaden our base of account holders and expand activities in strategic markets such as the Southeast, Midwest, and South. In a short period, we saw the integration of platforms, the collaboration of the workforce, and replaced the entire brand in total agreement with the outlined objectives.

Sponsoring the Rio 2016 Olympics and Paralympics in Rio de Janeiro was another demonstration of confidence in the Country's ability to deliver. The Games gave the Bradesco brand global exposure and made visible the Organization's commitment to constructive attitudes that motivate and move people, the nation's greatest asset.

In response to the challenges posed by the current economic landscape, we made increasing investments and firm business incentives. The strategic and budgetary planning was completed successfully; we improved processes targeting greater efficiency, and saw innovation on all fronts, supported by a Service Network present throughout the country. Our employees are always committed and determined to work harder and better, in line with current demands.

Committed to the Goals of Sustainable Development, we celebrated the 60th anniversary of Fundação Bradesco, the Organization's principal social project. With 40 schools, located primarily in disadvantaged regions, dedicated to the education of children and teenagers, the Foundation became a point of reference for education in the Country, and shines a light on the paths of social inclusion, providing the common good.

Brazil has the credentials to move forward and resume growth. Confident that, in 2017, we will write another chapter of achievements in our history, we reaffirm our willingness to overcome obstacles with constructive attitudes and investments, providing the best products and services to our clients, shareholders, and investors.

We would like to thank everyone for their support, preference, and above all, their confidence placed in Bradesco. We also thank our employees and other collaborators for their effort, dedication, and full commitment, which was decisive in overcoming obstacles and achieving results.

2015

2015 was a year of achievements and advances for Bradesco, which become all the more valuable taking into account the environment of uncertainties during the period, in a context of decelerated economy, decreasing GDP and persistent inflation. We have been successful and we are convinced that the financial activity is fundamental for the country to return to the path of growth.

Bradesco, since it was founded 72 years ago, has held an ongoing relationship with society, driven by the vocation of the pioneering spirit and determination to be contemporary at all times. From any angle assessed, the democratization of banking products and services has been a constant. The following are comments about our key indicators:

I) Basel Ratio

Brazilian financial institutions are subject to methodology for capital metrics and levels based on a risk-weighted asset index. The parameters of this methodology resemble the international framework for minimum capital measurements adopted for the Basel Accord. Starting in October 2013, the implementation of a new capital structure began in Brazil. The Central Bank of Brazil (Bacen), through CMN Resolution No. 4,192/13, set out the new methodology for calculating the Capital (*Plano de Referência*), superseding CMN Resolution No. 3,444/07. Since then, the Capital started being calculated based on CMN Resolution No. 4,192/13, which determined that the elaboration be made based on the "Prudential Conglomerate", as per January 2015.

The composition of our Basel Ratio is shown below:

Page 121

Complementary Information

In December 2017, the Capital stood at R\$104,673 million, against risk-weighted assets totaling R\$611,442 million. The total Basel Ratio presented an increase of 1.7 p.p. compared to the previous year, going from 15.4% in December 2016 to 17.1% in December 2017, driven by: (i) the increase in the net income of the period; (ii) the decrease in the weighted assets; and (iii) the mark-to-market effect of the securities available for sale; partly offset by: (iv) the amendment of the application of the prudential adjustments, as defined in Resolution No. 4,192/13, going from 60%, in 2016, to 80%, in 2017; and (v) the provisioning of Interest on Own Capital.

In December 2016, the Capital of the Prudential Conglomerate stood at R\$101,127 million, against risk-weighted assets totaling R\$656,189 million. The Basel Ratio reached 15.4%, the Tier I Capital ratio, 12.0%, a decrease of 0.7 p.p. compared to December 2015, mainly impacted by: (i) the effect of the consolidation of HSBC Brasil, which influenced: (a) the risk-weighted assets; (b) goodwill/ intangible assets; and (c) the other prudential adjustments, which were also impacted by the change in the implementation of the adjustment factor, as defined in the CMN Resolution No. 4,192/13, which went from 40% in January 2015, to 60% from January 2016; partly offset by: (ii) the issuance of Subordinated Bonds, authorized by the Central Bank in November 2016, to compose Tier I/ Additional Capital, in the amount of R\$5.0 billion.

II) Operating Efficiency Ratio (ER) and Operating Coverage Ratio

Page 122

Complementary Information

Operating Efficiency Ratio (ER) - disregarding the effect of the impairment of financial assets

The ER, disregarding the effect of the impairment of financial assets, in 2017, was recorded as 40,8%, showing an increase of 1.9 p.p. compared to 2016, due to: (i) the increase in operating expenses in the period, impacted by the effect of the consolidation of HSBC Brasil, as of the third quarter of 2016; (ii) the lower financial margins; partially offset by: (iii) the growth of the fee and commission income, prompted by the increase in the volume of business and services provided.

A comparison between 2016 and 2015 shows an improvement of 1.4 p.p. in the ratio, mainly due to: (i) the increase in operating expenses during the period, impacted by the effect of the consolidation of HSBC Brasil as of the third quarter of 2016; offset by: (ii) the growth of (a) the fee and commission income, prompted by the increase in the volume of business and services provided; and (b) the net interest income.

Operating Coverage Ratio

In the comparison between 2017 and 2016, the operational coverage ratio showed improvement, mainly due to the increase in revenue from services provided, coupled with ongoing efforts to control expenses, including the actions taken by the Efficiency Committee and measures applied to increase the offer of products and services to the entire customer base.

In 2016, the operating coverage ratio was recorded as 76.2%, a decrease of 3.8 p.p. compared to the previous year, mainly impacted by the increase in operating expenses due to the effect of the consolidation of HSBC Brasil as of the third quarter of 2016. Nevertheless, it should be noted that the maintenance of this high-level indicator is mainly caused by ongoing cost control efforts, including (a) the Efficiency Committee's initiatives; (b) investments in Information Technology, which totaled R\$6.595 billion in 2016; and (c) measures applied to increase the offer of products and services available to the entire client base.

III) Main loan portfolio indicators

Delinquency Ratio > 90 days⁽¹⁾

⁽¹⁾ Concept defined by the Central Bank of Brazil.

The delinquency ratio considering operations with delays over 90 days of the total portfolio, maintained the downward trend observed during 2017, as seen in the graph, with emphasis on the issues of Micro, Small and Medium Sized Enterprises and Individuals, that presented during the year, reductions in the balance of their delinquent credits, being 31.8% and 19.1%, respectively.

In 2016, the delinquency ratio over 90 days amounted to 5.5% of the credit portfolio, representing an increase of 1.4 p.p. in comparison to 2015, mainly due to the low demand for credit, as well as the intensified deceleration of economic activities, which has impacted the capacity of payments, mainly of companies.

It is important to highlight that in the fourth quarter of 2016, R\$2.0 billion loan assignments (previously written-off) were carried out without the retention of risks and benefits, which did not alter the rates of delinquency in the period, nor had a significant impact on the results.

In 2015, the delinquency ratio over 90 days amounted to 4.1% of the credit portfolio, representing an increase of 0.6 p.p. in comparison to 2014, mainly due to: (i) the slower pace of growth of the credit portfolio; and (ii) the impact of the process of deceleration of the economic activity. It is important to stress the reduction in the delinquency rate of the Large Companies segment, which partially cancelled out the effects of the increase in delinquency of Individuals and Micro, Small and Medium Sized Enterprises.

d) financing sources used for working capital and investments in non-current assets

We highlight below the main sources of working capital and investments in non-current assets for the last three financial years:

Deposits

In December 2017, the balance of our deposits increased 13.3% compared to December 2016, mainly due to new business opportunities offered to clients, principally by virtue of the interest rate oscillations occurring in the period.

In December 2016, the balance of our deposits reached R\$234.2 million, an increase of 19.6% compared to December 2015, mainly due to: (i) the larger volume of funding, partly due to the interest rate oscillations occurring in the period; (ii) the effect of HSBC Brasil's consolidation occurred as of the third quarter of 2016; and (iii) the increase of the base of account holders and of new savings accounts.

Deposits accounted for 40.4% of all main sources of funding in December 2017. The deposits consist primarily of real-denominated, interest-bearing time and savings deposits, real-denominated, non-interest-bearing demand deposits, and interbank deposits.

Regarding the balance of demand deposits, there was an increase of 2.0% or R\$662 million, in the comparison between 2017 and 2016.

Regarding the savings deposits, the 2017's balance increased by 6.4% or R\$6,244 million compared to the 2016's balance. It is worth highlighting that, Bradesco has been increasing, constantly, its base of savers, and in the last 12 months, presented a net evolution of 1.3 million new savings accounts.

The balance of the deposits showed an increase of 21.8% or R\$22,499 million between the years 2017 and 2016, to a large extent explained by the interest rate oscillations occurring in the period and investment alternatives available to clients.

Debentures

In December 2017, the balance of debentures of Bradesco reached R\$44,453 million, presenting a decrease of 48.3% in comparison to December 2016, mainly due to the compliance with Resolution No. 4,527/16, which changed the use of these securities issued by institutions linked to the conglomerate as a collateral for repo operations.

In December 2016, the balance of debentures of Bradesco reached R\$86,064 million, registering an increase of 8.8% in comparison to December 2015. This increase refers mainly to the placement of these financial instruments, which are also used as a collateral for repo operations.

Borrowing and Onlending

In the comparison between 2017 and 2016, the balance of borrowings and onlendings decreased 11.2% or R\$6,528 million. This variation is explained by the reduction: (i) in the volume of funds raised by borrowings and onlendings in the country, particularly through Finame operations; and (ii) in the volume of funds raised abroad.

In the comparison between 2016 and 2015, the balance of borrowings and onlendings decreased 17.3% or R\$12,141 million, basically due to: (i) the decrease of R\$9,961 million, or 31.0%, in borrowings and onlendings denominated and/or indexed in foreign currency, whose balance changed from R\$32,119 million in December 2015 to R\$22,158 million in December 2016, partly due to the negative exchange rate variation of 16.5% in the period; (ii) the reduction in the volume of funds raised by borrowings and onlendings in the country, particularly through Finame operations; offset by: (iii) the increase in the volume of funds raised through BNDES operations.

Funds from securities issued

In the comparison between December 2017 and 2016, the decrease of 10.5% or R\$15,796 million, in funds from securities issued was primarily due to: (i) lower volume of Financial Bills, in the amount of R\$14,905 million; and (ii) decrease in the balance of operations abroad in the amount of R\$2,737 million.

In the comparison between December 2016 and 2015, the increase of R\$41,260 million, or 37.7%, in funds from securities issued was primarily due to: (i) increased inventory of Financial Bills, from R\$71,692 million in December 2015 to R\$108,475 million in December 2016, basically due to new issuances in the period; (ii) higher volume of real state credit notes, in the amount of R\$6,733 million; and (iii) the effect of HSBC Brasil's consolidation, complete as of the third quarter of 2016.

Subordinated Debt

In December 2017, subordinated debt totaled R\$50,180 million (R\$11,638 million abroad and R\$38,542 million in Brazil), presenting a decrease of 4.6% or R\$2,431 million, in comparison with 2016, principally due to the maturities of debts which occurred in the periods.

In December 2016, subordinated debt totaled R\$52,611 million, up R\$2,328 million, or 4.6%, in comparison with 2015, mainly due to the issuing of new subordinated debts in the period.

e) financing sources for working capital and investments in non-current assets that it intends to use to cover liquidity deficits

The Officers report that as sources of financing for working capital and for investments in non-current assets used to cover liquidity shortfalls, the company may use the following resources: (i) Deposit Raising; (ii) Issuance of Debentures; (iii) Loans; (iv) Issuance of Securities; and (v) Injection of Capital by the controlling shareholders. It should be pointed out that Bradesco's Treasury Department acts as a support center for our business segments by managing the funding and liquidity positions and executing investment objectives in accordance with asset and liability management policies. It is also responsible for setting the rates for our different products, including interbank rates. The Treasury Department covers any funding shortfall through borrowing in the interbank market, investing any surpluses in liquid instruments in the interbank market.

Complementary Information

In some limited circumstances, we may obtain emergency funds from the Central Bank of Brazil through a transaction referred to as “discount.” A discount is a loan from the Central Bank of Brazil to a financial institution, that loan being guaranteed by Federal Government securities owned by the financial institution. The amount of Federal Government securities held by the financial institution as trading securities limits the amount of discount transactions. Bradesco did not enter into discount transactions for liquidity purposes.

f) indebtedness ratios and the characteristics of the debts, also describing: (i) relevant loan and financing agreements; (ii) other long-term relationships with financial institutions; (iii) level of subordination between debts; (iv) any restrictions imposed on the issuer, in particular in relation to limits for indebtedness and contracting new debts, to the distribution of dividends, disposal of assets, issue of new securities and disposal of shareholding control, as well as if the issuer is in accordance with the restrictions

The net income of the financial year of 2016 was 5.0% higher than the results presented in the previous year, basically due to: (i) the increase of 10.5% in revenue; (ii) the increase in the financial and equity results; (iii) the decrease of 0.4 p.p. in the commercialization index; (iv) the increase in the administrative efficiency index, considering the collective bargaining of the category in January 2016; partially impacted by: (v) the increase of 2.7 p.p. in the claims ratio index; (vi) the effect of R\$101.9 million arising from the review of the extended warranty operation's business plan; and (vii) the effect of the increase in the aliquot of the Social Contribution (CSLL).

Fee and Commission Income

In 2017, the fee and commission income totaled R\$30,810 million, up R\$2,786 million, or 9.9%, resulting from increase in the volume of operations, due to (a) an advance in the client segmentation process improving the ability to offer products and services on several service channels and (b) consolidation of HSBC Brasil, as of third quarter of 2016. This is a result from: (i) an increase in checking account fees, mainly due to (a) the increase in financial volume traded and (b) higher volume of transactions performed; and (ii) and increased fees arising from: (a) checking account, (b) asset management, (c) consortium management, (d) collections, (e) credit operations and (f) custody and brokerage services.

In 2016, the fee and commission income totaled R\$28,024 million, up R\$3,185 million, or 12.8%, in the annual comparison, primarily due to: (i) the increase in the volume of operations, resulting from continuous investments in technology and service channels, coupled with the growth provided by the acquisition of HSBC Brasil in the third quarter of 2016; and (ii) an advance in the client segmentation process improving the ability to offer products and services. It must be noted that the sources that have significantly contributed to this result were derived from: (i) an increase in checking account fees, mainly due to an improvement in the client segmentation process; (ii) the good performance of the card business, as a result of (a) the increase in financial volume traded; and (b) the highest volume of transactions performed; and increased fees arising from: (iii) asset management; (iv) consortium management; (v) underwriting/ financial advisory services; (vi) collections; and (vii) custody and brokerage services.

Personnel Expenses

In 2017, the personnel expenses totaled R\$19,500 million, up 10.6% or R\$1,863 million compared with 2016, mainly provided by the variations in the following expenses: (i) "structural" portion, due to the increase in expenses with payroll, social charges and benefits, impacted by (a) the effect consolidation of HSBC Brasil, as of the third quarter of 2016 and (b) higher salaries, in accordance with the 2016/2017 collective bargaining agreements; and (ii) "non-structural" portion, mainly due to higher expenses with provision for labor claims.

It is worth highlighting that, in July 2017, Bradesco launched the Special Voluntary Severance Program Scheme – PDVE, offered to employees of the Organization that meet the requirements established in the regulation of the respective program. The cut-off date for

adherence to the program ended at the end of August 2017, with the adherence of 7.4 thousand of employees, totalling R\$2.3 billion.

Page 137

Complementary Information

In 2016, the personnel expenses totaled R\$17,637 million, up 20,0% (R\$2,938 million), in comparison with the previous year, mainly due to the variations in the following expenses: (i) "structural" portion due to the increase in expenses with payroll, social charges and benefits, impacted by (a) higher salaries, in accordance with the 2015 and 2016 collective bargaining agreements; and (b) the effect of the consolidation of HSBC Brasil as of the third quarter of 2016; and (ii) "non-structural" portion, mainly due to higher expenses with (a) employee and management profit sharing; and (b) employment termination costs.

Administrative Expenses

In 2017, the administrative expenses totaled R\$20,122 million, up 5.2% or R\$988 million reflecting the increase in expenses originated from: (i) a growth in the business volume and services within the period; (ii) effect of the consolidation of HSBC Brasil as of the third quarter of 2016; and (iii) contractual adjustments. It is worth highlighting that the expenses presented during 2017, include the effects of the gains in scale and synergies originating from the integration of the activities of HSBC Brasil, occurred in October 2016.

In 2016, the administrative expenses totaled R\$19,134 million, an increase of 17.1%, (or R\$2,795 million), in the annual comparison, mainly due to an increase in expenses originated from: (i) a growth in the business volume and services within the period, impacted by the effect of the consolidation of HSBC Brasil as of the third quarter of 2016; (ii) contractual adjustments; and (iii) the effect of the actions of advertising and marketing, mainly related to the "Rio 2016 Olympic and Paralympic Games", occurred in the third quarter of 2016.

Tax Expenses

Increases in tax expenses for both the comparative period between 2017 and 2016, and the period between 2016 and 2015 reflect the rise in tax revenues, particularly in the fee and commission income.

Other Operating Revenues and Expenses

In 2017, other income net operating expenses totaled R\$7,393 million, registered a growth of 5.4% or R\$378 million, compared to the previous year, mainly due to the effect of the consolidation of HSBC Brasil as of the third quarter of 2016.

In 2016, the other net operating expenses totaled R\$7,015 million, registered a growth of R\$307 million, or 4.6%, compared to the previous year, mainly due to: (i) tax contingency expenses, net of reversal, in the first semester of 2016, in the amount of R\$485 million; (ii) the increase in civil provision expenses; and (iii) the effect of the consolidation of HSBC Brasil as of the third quarter of 2016.

10.2 - Operating and Financial Income

Officers should comment:

a) results of issuer's operations, in particular:

i) description of any major components of revenue

Below we highlight our principal operating income, which presented a decrease of R\$1,722 million or 0.7%, in the comparison between 2017 and 2016, particularly regarding: (i) lower financial income from insurance, pension plans and capitalization bonds; (ii) lower income from loan and leasing operations; (iii) lower income from operations with securities, derivatives and exchange; (iv) drop in the result from compulsory deposits; offset by the increase of incomes with: (v) retained premiums, pension plans and capitalization; and (vi) banking services fees.

Page 138

Complementary Information

In the comparison between 2016 and 2015, our principal operating income showed an increase of R\$17,248 million or 7.3%, highlighting: (i) income from insurance retained premiums, pension plans and capitalization; (ii) income from loan and leasing operations; (iii) financial income from insurance, pension plans and capitalization bonds; (iv) fee and commission income; and partly impacted by: (v) the decrease of income from operations with securities, derivatives and exchange.

Loan and Leasing Operations

In 2017, income from loan and leasing operations decreased by R\$4,118 million, or 5.9%, in the annual comparison, due to lower volume and spread of the credit operations.

Now in the comparison between 2016 and 2015, there was an evolution of 10.2%, or R\$6,401 million, due to the growth of our credit portfolio and interest rate oscillations.

We demonstrate below the opening of the products and clients (Individuals and Corporations) of our portfolio of credit operations in the expanded concept (including sureties, guarantees, letters of credit, anticipation of credit card receivables, debentures, promissory notes, co-obligation in divestitures to certificates of real estate receivables and rural credit):

Complementary Information

In December 2017, the balance of the credit portfolio for Individuals reached R\$175,469 million, an increase of 2.0% compared to the previous year. The lines that contributed most to such increase were: (i) payroll-deductible loan; (ii) real estate financing; and (iii) CDC vehicles.

In the comparison between the 2016 and 2015 balances, loan operations for Individuals were up 16.4%. The lines that contributed most to such increase were: (i) real estate financing; and (ii) credit cards.

In December 2017, operations in the Corporations section decreased 7.4% compared to the previous year, mainly due to the drop in: (i) operations abroad; (ii) working capital; and (iii) BNDES/Finame onlendings.

Credit operations for Companies, showed a growth of 5.1% in the comparison between the balances of 2016 and 2015, with emphasis on: (i) operations with credit risk - debentures; and (ii) export financing.

Income from Securities, Derivatives and Foreign Exchange Operations

In the comparison between 2017 and 2016, the decrease of R\$786 million in the income from securities, derivatives and foreign exchange operations was mainly due to: (i) a decrease in operations with (a) fixed-income securities, which includes losses with impairment of financial assets and (b) in derivative instruments; offset by: (ii) the increase in incomes related to exchange operations, mainly due to the positive exchange rate variation of 1.5% in the period.

In the comparison between the 2016 and 2015 balances, the decrease of R\$6,508 million in the income from securities, derivatives and foreign exchange operations was mainly due to: (i) a decrease in foreign exchange operations mainly due to the negative exchange rate variation of 16.5% in the period; (ii) the fall of derivative instruments, which were impacted by adjustments in the fiscal hedge and exchange rate variations of operations abroad; partly offset by: (iii) the higher volume of operations with fixed-income securities, even with the impact of the impairment of financial assets.

Financial Income from Insurance, Pension Plans and Capitalization Bonds

In 2017, the financial income from insurance, pension plans and capitalization bonds totaled R\$23,893 million, a 14.7% drop compared to 2016, basically due to the behavior of the interest rates in the period.

Complementary Information

In 2016, the financial income from insurance, pension plans and capitalization bonds totaled R\$28,020 million, up 27.9% compared to 2015, basically due to higher income from fixed-income investment funds.

Result from Compulsory Deposits

In the comparison between the 2017 and 2016 balances, the 13.7% decrease in income was due mainly to the decrease of the SELIC rate in the period, going from 13.75% in 2016 to 7.00% in 2017.

In the comparison between the 2016 and 2015 balances, the 24.2% increase in income was mainly due to the increase of R\$23,521 million in the balance of time deposits and the increase of the SELIC rate in the period, which rose from 14.25% in 2015 to 13.75% in 2016.

Income from Insurance retained Premiums, Pension Plans and Capitalization, and Banking Services Fees

Regarding the variations in income from insurance retained premiums, pension plans and capitalization and banking services fees, the related comments are included in item 10.1.h.

ii) factors that materially affected the operating results

Officers report that no factors have occurred that might significantly affect the company's operating results in the last three financial years other than those described in items 10.1.a; 10.1.h and 10.2.a.i.

b) variations in income from price changes, foreign exchange rates, inflation, changes in volumes and introduction of new products and services

Officers report that there were no significant variations in the issuer's financial income or revenues attributable to changing prices of our main inputs and products, exchange rates, inflation, altered volumes or the introduction of new products and services for the years ended December 31, 2017, 2016 and 2015.

c) impact of inflation, variation of prices of main inputs and products, and foreign exchange and interest rates on the issuer's operating income and financial income, when relevant

During the periods of high interest rates, our financial income increases because the interest rates on our interest-earning assets are higher too. At the same time, we incur higher financial expenses since interest rates on interest-bearing liabilities are also higher. Changes in volumes of our assets and liabilities that incur interest also affect our revenues and expenses. For example, an increase in our interest income attributable to higher interest rates may be impacted by a reduction in the volume of our outstanding loans.

Moreover, when the Brazilian *Real* depreciates, we incur: (i) losses on our liabilities denominated in or indexed to foreign currency, such as our long-term debt denominated in US dollar and foreign currency borrowings, in such a way that the cost in *Reais* of the relative financial expense increases; and (ii) gains in our assets denominated in and/or indexed to foreign currency, such as our securities and loan operations indexed to the US dollar, when the revenue from these assets measured in *Reais* increases. Conversely, when the Brazilian *Real* appreciates, we incur: (i) losses on our assets denominated in and/or indexed to foreign currencies; and (ii) gains on our liabilities denominated in or indexed to foreign currency.

Complementary Information

In 2017, the interest earning portion decreased 0.5% or R\$284 million due to: (i) lower results generated from the margins of (a) "Credit Intermediation", in the amount of R\$1,149 million, and (b) "Insurance", in the amount of R\$258 million; and offset by: (ii) the highest margins with "Securities/Other", in the amount of R\$1,123 million. We highlight the growth of the interest rate (CDI) going from 14.01%, in 2016, to 9.93%, in 2017, impacting the evolution of the average spread.

In 2016, the interest earning portion increased 15.1%, rising from R\$54,777 million in 2015 to R\$63,059 million in 2016. The R\$8,282 million increase in the interest earning portion income resulted mainly from the results obtained in "Credit Intermediation", in the amount of R\$7,109 million, partly due to the effect of HSBC Brasil's consolidation occurred as of the third quarter of 2016. It is important to note that the interest rate (CDI) increased from 13.25% in 2015 to 14.01% in 2016, impacting the evolution of the average spread.

10.3 - Events with Significant Effects (occurred and expected) on Financial Statements

Officers should comment on material effects that the events below have caused or are expected to cause for the issuer's financial statements and results:

a) introduction or sale of operating segment

No operational segment was introduced or sold in the period.

b) creation, acquisition or sale of equity interest

In July 2017, Bradesco Seguros SA ("Bradesco Seguros") and Swiss Re Corporate Solutions Ltd. ("Swiss Re Corso") concluded the transaction, by means of a shareholder agreement, whereby: (i) Swiss Re Corporate Solutions Brasil Seguros S/A ("Swiss Re Corporate Solutions Brazil") took over part of the P&C (Property and Casualty) insurance operations, such as, Aeronautical, Marine, Civil Liability and shipments from Bradesco Seguros ("Large Risks Insurance"), with exclusive access to Bradesco customers to explore the commercialization of Large Risks Insurance; and (ii) Bradesco Seguros held a 40% interest in Swiss Re Corporate Solutions Brasil represented by a total of 172,560,054 book entry shares, common and nominative in the amount of R\$363,103 thousand, and 60% remained with Swiss Re Corso.

The transaction was approved by the Private Insurance Superintendence (Susep), the Administrative Council for Economic Defense (Cade) and the Central Bank (Bacen).

The association includes exclusive access to the distribution network of Bradesco Seguros, comprised of more than 140 branches, more than 4,700 branches of Banco Bradesco and

approximately 40,000 registered brokers and insurance agents. As part of the transaction, approximately 120 large risk experts from Bradesco Seguros, in São Paulo and Rio de Janeiro, joined Swiss Re Corporate Solutions Brasil Seguros S/A.

The investment totals R\$490,000 thousand, recorded by Bradesco Seguros S.A., includes goodwill on the acquisition of shares in the amount of R\$126,897 thousand.

Complementary Information

In May 2017, Bradesco, as an indirect shareholder in IRB, announced to shareholders who authorized the IRB to submit: (i) request for registration as a publicly-traded company and authorization to conduct the initial public offer of IRB, in accordance with CVM Instructions No. 400/03 and No. 480/09; and (ii) request for registration of the secondary public distribution of shares issued by IRB, in accordance with CVM Instruction No. 400/03. In July 2017, Bradesco announced that the documents were filed to meet the demands made by the CVM in the context of the Public Offer of Secondary Distribution of Shares of IRB and the closure of the bookbuilding procedure of the Offer, which defined the price per share at R\$27.24. The amount of 14,040,000 shares were sold in the scope of the Base offer and subsequently the additional lot in its entirety, totaling 16,206,387 shares. Bradesco, indirectly, now holds 47,520,213 shares and a 15.23% stake in the share capital of IRB.

In October 2016, approval was granted in a Special Shareholders' Meeting for the partial spin-off of HSBC Brasil, through the absorption of portions of its equity by Bradesco's companies, enabling progress with the integration of operational and technological platforms, resulting in the replacement of the HSBC brand in its service network, becoming Bradesco. Thus, Bradesco began to operate with a unified platform (branches, ATMs, and systems), to which all clients have access. From now on, Bradesco will add to the products and services already offered to HSBC Brasil clients, a nationwide service network, a state-of-the-art technology platform, and an even more extensive portfolio of products and services.

In July 2016, Bradesco informed the market that the acquisition of 100% of the share capital of HSBC Bank Brasil S.A. – Banco Múltiplo and HSBC Serviços e Participações Ltda. (HSBC Brasil) had been completed and the amount paid to HSBC Latin America Holdings Limited was R\$16.0 billion.

As of July 1, 2016, Bradesco started consolidating the financial statements of HSBC Brasil, considering six months (from July to December) of results for this financial year and, as additional information, we present the historic series of the pro-forma financial statements of HSBC Brasil below:

c) unusual event or operations

In the period, there were no unusual events or transactions involving the issuer, other than the extraordinary events stated in items 10.1.a and 10.1.h, which caused or are expected to cause significant impacts on its results.

10.4 - Significant Changes in Accounting Practices – Reservation and Emphases in the Auditor’s Opinion

Officers should comment:

a) significant changes in accounting practices

Officers report that no significant changes were made to the accounting practices that Bradesco uses in the years ended December 31, 2017, 2016 and 2015.

b) significant effects of changes in accounting practices

Officers highlight that, although there have been no significant changes in accounting practices of Bradesco, it is noteworthy that, unlike the other publically-traded companies that are already using all of the “CPCs”, financial institutions use nine of the technical accounting standards issued by Brazil’s Accounting Standards Committee (CPC), that were approved by the National Monetary Council (CMN). The other CPC statements, interpretations and guidelines will only be applicable to financial institutions after approval by the National Monetary Council.

In 2016, there was the initial application of the CPC 33 – Benefits for Employees from Financial Institutions, according to requirements of the CMN. As we have already applied the requirements, due to this CPC having been approved previously by the CVM, there was no effect on our financial statements.

It is currently not possible to estimate when National Monetary Council will approve the other CPC accounting statements or if their adoption will be prospectively or retrospectively.

Below is a list of the nine CPC accounting statements approved by the National Monetary Council:

- Resolution No. 3,566/08 – Asset impairment (CPC 01);
- Resolution No. 3,604/08 – Statement of cash flows (CPC 03);
- Resolution No. 3,750/09 – Related party disclosures (CPC 05);
- Resolution No. 3,823/09 – Provisions, contingent liabilities and contingent assets (CPC 25);
- Resolution No. 3,973/11 – Subsequent events (CPC 24);

- Resolution No. 3,989/11 – Share-based payment (CPC 10-R1);
- Resolution No. 4,007/11 – Accounting policies, changes in accounting estimates and errors (CPC 23);
- Resolution No. 4,144/12 – Basic conceptual pronouncement (R1); and
- Resolution No. 4,424/15 – Benefits to Employees (CPC 33-R1).

c) Reservations and emphases in the auditor's report

There were no disclaimers and emphases on the independent auditors' report.

10.5 - Critical Accounting Policies

Officers should indicate and comment on the critical accounting policies adopted by the issuer, in particular, accounting estimates made by management on uncertain and relevant issues for describing the financial position and results of operations that require subjective or complex judgment, such as: provisions, contingencies, revenue recognition, tax credits, long-lived assets, useful life of non-current assets, pension plans, foreign currency translation adjustments, environmental recovery costs, criteria for asset and financial instrument impairment tests.

Bradesco has disclosed critical risk factors and accounting policies, in conformity with the best international transparency and Corporate Governance practices, in relation to possible political and economic situations in the domestic and foreign markets, which may directly impact the day-to-day of operations and, accordingly, the Bank's financial position.

Our Officers believe that Bradesco's results are subject to accounting policies, assumptions and estimates. It is Management's responsibility to adopt fair accounting practices, in addition to using judgment while carrying out reasonable and conservative estimates to be used in the preparation of financial statements.

Regarding materiality, the items below describe the accounting policies deemed as critical, as well as the areas demanding better judgment or involving a high complexity level, which may affect our financial position and the result of our operations. The accounting estimates we carry out in this context cause us to make assumptions on issues involving uncertainties. In each case, if our estimates are not confirmed, in the comparison with effective results, there may be significant impacts on our financial situation or the results of our operations.

Allowance for doubtful accounts

The allowance for doubtful accounts is calculated in an amount sufficient to cover possible losses and take into account the rules and instructions issued by National Monetary Council and Central Bank of Brazil, together with the appraisals carried out by Management upon calculation of credit risks.

At the end of each period, the allowance for doubtful accounts is adjusted based on the analysis of our portfolio, including the estimate of losses in loan and leasing operations and other operations with credit characteristics.

In view of its nature, the definition of the allowance for doubtful accounts requires us to make judgments and assumptions related to our portfolios, both on individual and product-specific portfolio bases. Whenever we reassess the portfolio as a whole, a number of factors may affect the probable losses, including which methodology we will adopt for measuring the historical delinquency rates and which historical period we will take into account to carry out such measurements. Other factors that may affect our judgment to set the amount regarding the allowance for doubtful accounts include as follows:

- Brazilian general economic conditions and relevant conditions in the sector;
- previous experience with the debtor or the relevant economy sector, including the recent experience of losses;
- credit quality trends;

Complementary Information

- values loan securities;
- volume, composition and growth of our portfolio;
- the Brazilian government's monetary policy; and
- any delays in receiving information necessary to evaluate operations or confirm existing impairment.

We use models to help the analysis of our portfolios and define the required amount of the provision for losses. We use statistical factors to show losses and other risk indicators for groups of loans with similar risk characteristics to achieve an estimate of losses incurred by the portfolio. Although our models are often reviewed and improved, by their nature, they depend on our judgments made in relation to information and/or forecasts we receive. In addition, the Brazilian economy's volatility may lead to greater uncertainty in our models than one would expect in more stable macroeconomic environments. Therefore, our provision for doubtful debt may not be indicative of actual future losses.

The process to calculate the level of provision for doubtful debt requires a high judgment level. It is possible that others, taking into account the same information, may at any time reach reasonably different conclusions.

Classification of Securities and Derivatives

Securities are classified into three categories: for trading, available for sale, and held to maturity. The classification under these categories is based on the Management's intent of keeping or selling such securities. The accounting treatment to the securities we hold is dependent on how they are classified. Changes in the economic environment may alter our strategy in relation to a particular security, which would require a transfer between categories.

Evaluation of Securities and Derivatives

Financial instruments and derivatives recorded at fair value in our financial statements basically include securities classified as: (i) for trading; (ii) available for sale; and (iii) other trading assets, including derivatives. The fair value is defined as the price that would be received for the sale of an asset or that would be paid for the transfer of a liability in a transaction not enforced among market participants on the date of measurement.

We estimate the fair value by using the market prices, as available. We note that the price may be affected by the volume of shares transacted, and may also fail to reflect the "control premiums" under share agreements with shareholders, which holds significant investments. However, the Management believes that market prices are the best indicators of fair value.

At the determination of the fair value, when market prices are not available, the Management's judgment is made, as models depend on our judgment of weight assignable to different factors and the quality of information received. The factors used in these models include quotations by distributors, pricing models, prices of instruments with similar characteristics and discounted cash flows. Model-based pricing also uses information on interest rates, foreign exchange rates and volatility of options, whenever significant and available. Such as reliable market data while estimating the impact of keeping a large position is generally limited. We use likewise our judgment for estimating prices whenever there is no external parameter. If we make inaccurate assumptions or the model itself makes inaccurate correlations or assumptions, the amount of income or loss recorded for a specific asset or liability may be incorrect. Judgment should also determines whether a reduction in the fair value below the updated cost of a held-to-maturity or an available-for-sale security is not temporary, so that it would demand the possible recognition of impairment of the updated cost and that we may record this reduction as an expense. At that evaluation, if any devaluation is not temporary, the Management will decide which historic period should be considered and how severally a loss may be provisioned for.

Complementary Information

These appraisal methods may lead Bradesco to have different results should the assumptions and estimates used fail to subsequently become real.

Tax Income and Social Contribution

The value determination of income tax and social contribution is complex, and therefore our evaluation is based on the analysis of our deferred fiscal assets and liabilities and income tax and social contribution payable. In general, the evaluation requires us to estimate the future amounts of deferred fiscal assets and income tax and social contribution payable. Evaluating the possibility of any deferred fiscal assets to be realized is subjective and involves uncertain evaluations and assumptions. Realization of deferred fiscal assets is subject to changes to future fiscal rates and the development of our tax planning strategies. Evaluations and assumptions may change over time as a result of unforeseen events or circumstances, thereby changing our initial judgment during the definition of our tax liabilities.

We continuously monitor and evaluate the impact of new tax laws on our liabilities, as well as new events likely to affect the evaluations and assumptions of our analysis of the possibility of deferred fiscal assets realization.

A significant judgment is required for the determination of the probability of a position on income tax and social contribution be sustained even after the result of any legal or administrative proceedings, on the basis of technical merits. An additional judgment is then required to determine the amount of benefit eligible to be recognized in our consolidated financial statements.

Impairment

The balances of securities classified as available-for-sale and held to maturity, in addition to non-financial assets (except for deferred tax credits), are reassessed at least on a yearly basis, to determine where there is any indication of impairment. When a loss is identified, we recognize an expense in income for the year. This occurs when the carrying amount of the asset exceeds its recoverable value.

We use a number of judgments to calculate the recoverable value, and accordingly we estimate the value of the most variable assets subject to impairment testing.

Technical provisions for insurance, pension plan and capitalization

Technical reserves are liabilities representing estimates of amounts to be due on of the future to our customers, stakeholders of pension plans, insured parties or their beneficiaries. The actuarial assumptions are based on our experience, and are periodically reviewed in relation to sector standards to assure actuarial credibility. However, significant changes in the experiences or assumptions may compel us to establish a provision for expected future losses on a product, establishing complementary provisions for premiums of insurance and contributions of pension plans. These provisions are set forth in short- or long-term

agreements to forecast expected future losses.

Page 148

Complementary Information

For insurance, future claims to be paid include provisions for group and individual life, health, contingency, liability and damage insurance. These benefits are calculated using actuarial hypotheses for mortality rates, incapacity, expiry date, investment performance, inflation, expenses, and others. For long-term insurance agreements, when the actuarial hypotheses in a specific policy or group of policies are fulfilled, they will not be changed during the validity time of the policy. Liabilities recognized for claims include provisions for incurred but not reported claims and provisions for unsettled claims. We recognize claims as they occur. However, costs of claims occurred in a specific period will not be clearly recognized until we receive, process and pay such indemnities. We determine the liability amount through actuarial methods based on history of claim payments to estimate claim liabilities. Methods to determine such estimates and establish the values of the technical provisions are periodically reviewed and updated. The resulting adjustments are recognized in income for the respective period.

For pension plans, future benefits to be paid to participants or their beneficiaries include provisions for retirement, pension and redemptions, with actuarial hypotheses that take into account factors such as survivorship, interest rates, and disability, among others.

For capitalization bonds operations, future payments to our customers include provisions for prize draws and redemptions. These are calculated over par security values and adjusted for inflation.

Accounting provisions and contingent liabilities

We established accounting provisions recorded based the opinion of legal counsel, the nature of the lawsuits, similarity with previous proceedings, complexity and positioning of the courts, whenever the loss is deemed probable, which would cause a potential outflow of funds to settle the obligation, and when amounts can be reliably measured.

Contingent liabilities classified as possible losses are not recorded as liabilities in the financial statements and must only be stated in notes, when individually relevant, whereas the liabilities classified as remote losses do not require provisions or statements.

We continuously monitor lawsuits in progress in order to evaluate, among other things: (i) the nature and complexity thereof; (ii) the development of the proceedings; (iii) the opinion of our legal advisors; and (iv) our experience with similar cases. Upon determining whether a loss is likely to occur and estimating its value, we also consider:

- a) the probability of loss derived from claims occurred on or before the date of financial statements, which were identified by us after the date of such statements but before their publication; and
- b) the need to disclose claims or events occurred after the date of financial statements, but before their publication.

b) other items omitted from the financial statements.

Below, we present the values that represent the total risk of off-balance sheet items:

The commitments of the credit values include limits for authorization of credit card, personal credit, real estate financing, *conta garantida* (guaranteed account) and overdraft. Such values consist basically in the credit operations contracted, not yet released, and limits not yet used by clients.

The guarantees offered are conditional commitments of loans issued to guarantee the performance of a client before a third party. According to these guarantees, generally, we have the right of recourse against the client to recover any amounts paid. In addition, we retain resources in cash or other guarantees of high liquidity to ensure these commitments. These operations, relate, in their vast majority, to operations of sureties and guarantees carried out with Corporate clients.

Complementary Information

The letters of credit (credits opened for imports) are undertakings issued to guarantee the performance of a customer to a third party. We issue business letters of credit to enable foreign trade transactions. These instruments are short-term commitments to pay the beneficiary of a third party under certain contractual conditions by the shipment of products. The contracts are subject to the same credit assessments applied in other credit concessions.
