

BRASKEM SA
Form 6-K
May 10, 2018

SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 6-K

**REPORT OF FOREIGN PRIVATE ISSUER PURSUANT TO RULE 13A-16
OR 15D-16 OF THE SECURITIES EXCHANGE ACT OF 1934**

For the month of May, 2018
(Commission File No. 1-14862)

BRASKEM S.A.
(Exact Name as Specified in its Charter)

N/A
(Translation of registrant's name into English)

Rua Eteno, 1561, Polo Petroquimico de Camacari
Camacari, Bahia - CEP 42810-000 Brazil
(Address of principal executive offices)

Indicate by check mark whether the registrant files or will file annual reports under cover Form 20-F or Form 40-F.

Form 20-F Form 40-F

Indicate by check mark if the registrant is submitting the Form 6-K
in paper as permitted by Regulation S-T Rule 101(b)(1).

Indicate by check mark if the registrant is submitting the Form 6-K
in paper as permitted by Regulation S-T Rule 101(b)(7).

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to
the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes No

If "Yes" is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82- _____.

Braskem reports free cash flow¹ of R\$1.8 billion in 1Q18, advancing 317% on 1Q17

1Q18 HIGHLIGHTS:

Braskem - Consolidated:

4 EBITDA amounted to US\$818 million, down 29 and 10% from 1Q17 and 4Q17, respectively, mainly due to the lower availability of products, explained by: (i) the scheduled shutdown of the cracker in Triunfo, Rio Grande do Sul; (ii) the interruption in power supply to the plants in Brazil's Northeast in March; (iii) the incident involving the chlor-alkali plant in Maceió, Alagoas; and (iv) the lower supply of propylene to the PP plants in Brazil.

4 Parent company net income came to R\$1.1 billion, corresponding to R\$1.32 per common share and class "A" preferred share down 42% from 1Q17 and up 173% from 4Q17.

4 Financial leverage measured by the ratio of net debt to EBITDA in U.S. dollar stood at 1.98x.

4 Free cash flow was R\$1.8 billion, compared to R\$423 million in 1Q17.

4 In April, the Annual Shareholders' Meeting approved the distribution of additional dividends in the amount of R\$1.5 billion, which added to the dividends of R\$1 billion distributed in December 2017, bringing total dividends for fiscal year 2017 to R\$2.5 billion, which corresponds to 61% of net income for the period.

4 Standard & Poor's and Moody's upgraded the Company's credit outlook from negative to stable in March and April, respectively. In this scenario, the Company maintained investment grade ratings at Standard & Poor's (BBB-) and Fitch Ratings (BBB-) and above Brazil's sovereign risk at the three main rating agencies.

4 The recordable and lost-time injury frequency rate, considering both Team Members and Partners per million hours worked, stood at 1.02 in the quarter, which is 42% under the industry average globally³.

Net Revenue	13,029	12,628	12,600	3%	3%
EBITDA	2,652	2,952	3,607	-10%	-26%
Net Profit (Loss)*	1,054	386	1,808	173%	-42%
	1,765		423	-	317%

Free Cash Flow

Generation**	(43)				
<i>Net Revenue (US\$ million)</i>	<i>4,018</i>	<i>3,929</i>	<i>4,009</i>	<i>2%</i>	<i>0%</i>
<i>EBITDA (US\$ million)</i>	<i>818</i>	<i>911</i>	<i>1,147</i>	<i>-10%</i>	<i>-29%</i>

* Net Profit (Loss) Attributable to Company's Shareholders

** Free Cash Flow Generation relates, according to Annex IV, to the Net Cash provided by operating activities excluding (i) the payment of the leniency agreement and (ii) the effects of reclassifications between the lines of Financial investments held for trading and Cash and Cash Equivalents; subtracted by the line of Cash used in Investing Activities.

1 Free Cash Flow, in accordance with Appendix IV, refers to: (i) Net Cash from Operating Activities less payments under the Leniency Agreement; (ii) the effects from reclassifications between the lines Financial Investments and Cash and Cash Equivalents; and (iii) less the line Cash Investment in Investing Activities.

2 In the case of the class "B" preferred shares, the amount is R\$0.55 per share.

3 The average of the industry is 1.75, in accordance with the American Fuel & Petrochemical Manufacturers (AFPM).

Petrochemical Industry 1Q18:

4 Spread of the main chemicals⁴ produced by Braskem: US\$388/ton, down 20% from 1Q17, period with positive impacts from non-structural demand events combined with product lower supply in the global market, especially for butadiene and benzene. Compared to 4Q17, spreads were 13% higher due to unscheduled shutdowns in Europe.

4 Average international spread of the resins⁵ produced by Braskem in Brazil: US\$688/ton, 5% and 8% higher than in 1Q17 and 4Q17, respectively, explained by the unscheduled shutdowns in the United States caused by the severe winter, which benefitted PE prices, and by the more-balanced global market for PP and PVC.

4 Spread for PP in the United States⁶: US\$617/ton, 8% and 1% higher than in 1Q17 and 4Q17, respectively, due to scheduled and unscheduled shutdowns in the region.

4 Spread for PP in Europe⁷: US\$471/ton, up 4% from 1Q17, due to the unscheduled shutdowns in Europe and the stronger demand due to seasonality. Compared to 4Q17, spreads fell 7%, due to higher propylene prices given the increase in oil prices in the period.

4 Spread for PE in North America⁸: US\$1,140/ton, 12% and 7% higher than in 1Q17 and 4Q17, respectively, explained by the tighter PE market in the United States, where recently inaugurated plants are still in the ramp-up phase, and by the unscheduled shutdowns due to low temperatures.

Chemicals Spread	388	344	482	13%	-20%
Resins Spread					
Brazil	688	637	657	8%	5%
United States	617	610	573	1%	8%
Europe	471	509	453	-7%	4%
Mexico	1,140	1,069	1,018	7%	12%

* Source: IHS

**Difference between PE and ethane reference prices

Compliance:

4 In keeping with its commitment to acting ethically, with integrity and transparency, the Company launched, in 2016, a comprehensive Compliance Program comprising various initiatives to improve its Compliance system. The main Compliance initiatives concluded in 1Q18 were:

§ Drafting of directives: (i) Code of Conduct for Contractors (ii) Due Diligence for Suppliers ; (iii) Disciplinary Measures;

§ Implementation of in loco audit (United States and Mexico);

§ Hiring of a Compliance Officer at Cetrel; and

§ Continuity in the anticorruption training program for all Members, members of the Compliance Committee and members of Braskem's Board of Directors.

Highlights by Segment:

⁴ Difference between the prices of key chemicals (15% ethylene, 10% propylene, 35% BTX, 10% butadiene, 5% cumene and 25% fuels, based on the capacity mix of Braskem's industrial units in Brazil) and the price of naphtha – Source: IHS.

⁵ Difference between the price of resins based on the capacity mix of Braskem's industrial units in Brazil and the price of naphtha – Source: IHS.

⁶ Difference between the U.S. polypropylene price and the U.S. propylene price.

⁷ Difference between the Europe polypropylene price and the Europe propylene price.

⁸ Difference between the U.S. polyethylene price and the U.S. ethane price.

Brazil:

4 In 1Q18, the average cracker capacity utilization rate was 90%, down 5 p.p. from 1Q17 and 4Q17, due to the events mentioned above.

4 Brazilian demand for resins (PE, PP and PVC) reached 1.3 million tons in 1Q18, growing 7% in relation to 1Q17, due to the stronger economic activity, especially in the packaging, automotive and retail industries. Compared to 4Q17, the 3% increase in demand is explained by seasonality.

4 Braskem's resin sales in the Brazilian market amounted to 886 kton in 1Q18, increasing 5% compared to 1Q17, in line with the growth of the overall market. Compared to 4Q17, sales volume in the Brazilian market decreased by 1%, explained by the lower availability of PVC following the incident involving the chlor-alkali plant in Alagoas. Braskem's market share stood at 68% in 1Q18.

4 In 1Q18, the Company exported 333 kton of resins, representing declines of 22% and 2% compared to 1Q17 and 4Q17, respectively, influenced by the stronger demand for resins in the Brazilian market and the lower availability of product .

4 In the quarter, the units in Brazil posted EBITDA of R\$1,463 million to account for 57% of the Company's consolidated EBITDA from all segments.

United States and Europe:

4 In 1Q18, the average capacity utilization rate stood at 92%, down 9 p.p. and 7 p.p. from 1Q17 and 4Q17, respectively, due to the unscheduled shutdown in the United States caused by the severe winter.

4 The segment recorded EBITDA of US\$176 million in 1Q18, or 21% of the Company's consolidated EBITDA.

4 Construction of the new PP plant in the United States reached 16% completion in 1Q18, with investments already realized of US\$212 million.

Mexico:

4 In 1Q18, the PE plants operated at an average capacity utilization of 85%, down 12 p.p. and 1 p.p, from 1Q17 and 4Q17, respectively.

4 In the quarter, PE sales to the Mexican market amounted to 146 kton, up 17% and 1% from 1Q17 and 4Q17, respectively, to account for 72% of total sales.

4 EBITDA from the Mexico unit stood at US\$165 million in 1Q18.

1. BRAZIL

3

Braskem's results in Brazil⁹ are formed by the following segments: Basic Petrochemicals, Polyolefins & Vinyls.

Financial Overview (R\$ million)

Net Revenue	9,190	9,500	9,536
COGS	(7,589)	(7,243)	(7,029)
Gross Profit	1,601	2,257	2,507
Gross Margin	17%	24%	26%-7
SG&A	(522)	(618)	(483)
Other Operating Income (Expenses)	(81)	(306)	(112)
Investment in Subsidiary and Associated Companies	0	11	12
Operating Profit	1,084	1,449	1,924
EBITDA	1,463	1,838	2,391
EBITDA Margin	16%	19%	25%-3
Net Revenue (US\$ million)	2,833	2,925	3,034
EBITDA (US\$ million)	451	566	761

O EBITDA de 2017 foi reapresentado pois o resultado operacional da Alemanha estava também sendo considerado no resultado do Brasil

2017 EBITDA was restated because the operating result from Germany was also considered in Brazil

1.1. CHEMICALS¹⁰

⁹ Braskem's result in Brazil corresponds to the sum of the results from the Chemicals, Polyolefins and Vinyls units less eliminations from the revenues and costs with transfers of products among these segments. In 2Q17, EBITDA from Brazil includes the capital gain from the divestment of quantiQ, of R\$277 million, which is not allocated to any operating segment.

¹⁰ The Chemicals segment is formed by and operates four petrochemical complexes (Camaçari, Triunfo, São Paulo and Rio de Janeiro) producing olefins, aromatics and utilities. These units have total annual ethylene production capacity of 3,952 kton, of which approximately 78% is naphtha-based, 16% is gas-based and the remainder is ethanol-based.

Of the total ethylene produced by the Chemicals Unit, approximately 80% is transferred for use by Braskem's Polyolefins and Vinyls units. Total annual propylene production capacity is 1,585 kton, of which approximately 65% on average is transferred for use by the Company's Polyolefins segment.

***Naphtha (91%), Ethane (4.5%) and Propane (4.5%)

Capacity Utilization: the lower cracker capacity utilization rate compared to 1Q17 and 4Q17 is mainly explained by the scheduled shutdown of the cracker in Triunfo, Rio Grande do Sul and the interruption of industrial activities in the Northeast due to the blackout that affected the entire region in March.

Sales Volume – Brazilian Market: the higher sales volume of key chemicals to third parties compared to 1Q17 was influenced by the stronger sales of: (i) cumene to the phenol/ketone chain, whose leading company was undergoing a maintenance shutdown in the same period last year; and (ii) butadiene for the production of rubbers for the automotive industry. Compared to 4Q17, the decline was due to the lower availability of products for sale, as a result of the lower production volume.

Sales Volume – Export Market: the decrease compared to 1Q17 and 4Q17 is explained by the lower availability of products for sale and the consequent prioritization of sales in the Brazilian market.

COGS¹¹: the increase in COGS compared to 1Q17 and 4Q17 is explained by the higher price of key feedstocks:

§ Average of the ARA naphtha price reference: accompanied the trend in the Brent oil price due to (i) the maintenance of the agreement to cut production among OPEC nations and other major producers; (ii) the lower-than-expected decline in oil stocks in the USA; and (iii) the geopolitical tensions in Iran.

§ Average of the U.S. ethane price reference: the higher exports of the product and the startup of new ethylene crackers in the USA.

SG&A Expenses¹²: corresponded to approximately 3% of the segment's net revenue in the period.

EBITDA: in 1Q18, EBITDA from the Chemicals segment represented 62% of the consolidated EBITDA from all segments in Brazil and 39% of the consolidated EBITDA from all segments.

1.2. POLYOLEFINS¹³

11 Cost of goods sold: the Chemicals segment uses naphtha, HLR (refinery gas), ethane and propane as the main feedstocks for its production of olefins and aromatics. Petrobras supplies 100% of the HLR and most of the ethane, propane and naphtha consumed by Braskem, with the remainder met by imports from various suppliers.

12 Selling, general and administrative expenses.

13 The Polyolefins segment is formed by 18 industrial plants in Brazil producing polyethylene (PE) and polypropylene (PP), which includes the production of Braskem's Green PE from renewable feedstock. The industrial operations consist of the PE and PP plants located in the petrochemical complexes of Triunfo, Camaçari, São Paulo, Paulínia and Rio de Janeiro, which have combined annual production capacity of 3,055 kton of PE, with 200 kton of Green PE and 1,850 kton of PP. In 1Q17, the UTEC business, which previously was part of the Polyolefins segment, became part of the United States and Europe segment.

*Source: IHS (Spot Price)

** PE USA (62%) and PP Asia (38%)

***Naphtha (91%), Ethane (4.5%) and Propane (4.5%)

Capacity Utilization: down in relation to other periods due to the lower supply of propylene by Petrobras due to scheduled and unscheduled shutdowns.

Brazilian Market: the estimated market for polyolefins (PE and PP) in 1Q18 reached 1,061 kton, up 9% from 1Q17. Compared to 4Q17, the estimated market for polyolefins expanded 6%, led by sales of PE to the packaging industry, especially for the consumer goods segment, reflecting the growth in consumer spending and the higher consumption of PP by the automotive industry.

Sales Volume - Brazilian Market: compared to 1Q17, sales volume in Brazil grew 10%, slightly outpacing the growth in Brazilian demand for polyolefins, with market share stable.

Sales Volume - Export Market: decrease due to the weaker demand for resins in the Brazilian market.

COGS¹⁴: influenced by higher feedstock prices and stronger sales volume.

SG&A Expenses: corresponded to 6% of the segment's net revenue in the period.

EBITDA: in 1Q18, EBITDA from the Polyolefins segment represented 38% of the consolidated EBITDA from all segments in Brazil and 24% of the consolidated EBITDA from all segments.

14 Cost of goods sold: ethylene and propylene are the main feedstocks used to make PE and PP, respectively. For PE production, 100% of the ethylene used is supplied by the Chemicals Unit, as is 65% of the propylene used to make PP, with the remainder supplied by Petrobras.

15 The Vinyls segment is formed by the industrial and commercial operations of the PVC, Chlorine and Caustic Soda units, as well as other products such as hydrogen and sodium hypochlorite. The industrial operations include three PVC plants located in the petrochemical complexes in Camaçari and Alagoas and the two chlor-alkali plants located in the same two petrochemical complexes. The Company's production capacity is 710 kta of PVC and 539 kta of caustic soda.

**Electric Energy

=(Brent(\$/bbl)/1.725)*1.75

*** $(\text{Ethylene Asia} \times 0.48) + (\text{Electric Energy}) - (\text{Caustic Soda Asia} \times 0.685)$

Capacity Utilization: down due to the incident at the chlor-alkali plant in Alagoas in January and to the blackout that affected the country's Northeast, such events generated an EBITDA reduction of approximately US\$50 million. In view of that, the scheduled shutdowns of the PVC plants planned for the second half of the year were anticipated for 1Q18.

Brazilian Market: contractions of 3% and 7% compared to 1Q17 and 4Q17, respectively, mainly due to the performance of the construction and infrastructure sectors.

Sales Volume – Brazilian Market and Exports: the contraction in the Brazilian market associated with the lower availability of Braskem's PVC affected sales volume to both the domestic and export markets.

COGS¹⁶: despite the lower sales volume, COGS was affected by the higher feedstock prices in the international market.

SG&A Expenses: corresponded to 7% of the segment's net revenue in the period.

¹⁶ Cost of goods sold: ethylene and salt are the main inputs used by the Vinyls segment to produce caustic soda, chlorine and PVC. The ethylene is 100% supplied by the Chemicals segment. In salt consumption, Braskem holds significant cost advantages over some competitors thanks to its low-cost extraction of sodium chloride (especially compared to sea salt) and low transportation costs, given its industrial unit's proximity to the salt mine.

**PP USA (72%) and PP Europe (28%)

**Propylene USA (72%) and Propylene Europe (28%)

Capacity Utilization: down compared to 1Q17 and 4Q17, due to: (i) the severe winter in North America, which led to unscheduled shutdowns in the region; and (ii) lower supply of propylene to the Schkopau plant in Europe.

Market: in the USA, higher prices compared to other regions and high levels of inventories at the start of the year led to weaker demand compared to 1Q17 and 4Q17. In Europe, the market grew in line with the region's GDP.

Sales Volume: down compared to 1Q18 and 4Q17 due to the lower availability of products for sale.

17 The segment's results are formed by six industrial units in the United States and two in Europe, with aggregate production capacity of 2,195 kta, with 1,570 kta in the United States and 625 kta in Europe.

COGS¹⁸: the increase in COGS compared to 1Q17 and 4Q17 is explained by the higher propylene price in the regions:

- USA: shortage of the product due to unscheduled shutdowns caused by the severe winter storms that affected the Gulf Coast in January.
- Europe: healthy demand and ethylene producers' preference to use gas instead of naphtha as feedstock.

SG&A Expenses: represented approximately 5% of the segment's net revenue in 1Q18.

EBITDA: in 1Q18, EBITDA from the United States and Europe segment represented 21% of the consolidated EBITDA from all segments.

*Source: IHS (Spot Price)

Capacity Utilization: down compared to 1Q17 and 4Q17 due to the lower ethane supply in the period.

Mexican Market: the estimated PE market in Mexico was 565 kton in 1Q18, up 3% from 1Q17, supported by the growth of the services sector and by the recovery of the industrial sector. Compared to 4Q17, the market advanced 8%, reflecting the pent-up demand in the previous quarter due to the expectation of lower resin prices with the startup of new PE capacities in early 2018 in the United States.

18 Cost of goods sold: the main feedstock used to make PP in the United States and Europe is propylene, which is supplied to the Company's industrial units by various local producers.

19 The segment comprises an ethane-based cracker, two high-density polyethylene (HDPE) plants and one low-density polyethylene (LDPE) plant with combined PE production capacity of 1,050 kta. This unit includes the results of Braskem Idesa SAPI and of the other subsidiaries of Braskem S.A. in Mexico.

Sales Volume - Mexican Market: the higher sales volume of PE in 1Q18 compared to 1Q17 is explained by the efforts to prioritize the local market rather than exports. Compared to 4Q17, the increase in sales did not accompany the market's growth due to higher import flows from the United States following the normalization of PE production in the region after the hurricane in 4Q17.

Export Volume: down compared to 1Q17 and 4Q17 due to the lower availability of products for sale and consequent efforts to prioritize sales to the Mexican market.

COGS²⁰: the decrease compared to 1Q17 and 4Q17 is explained by the lower sales volume, which offset the increase in the ethane price reference in the USA.

SG&A Expenses: corresponded to 7% of the segment's net revenue in 1Q18.

Other Income/Expenses, Net (OIE): In 1Q18, included income of US\$13.8 million related to the delivery-or-pay established in the ethane supply agreement.

EBITDA: EBITDA from the Mexico unit stood at US\$165 million in 1Q18.

NET REVENUE

20 Cost of goods sold: for its ethane supply, Braskem Idesa has a 20-year agreement with the subsidiary of Petróleos Mexicanos (PEMEX), whose price is based on the USG ethane price reference. For its natural gas supply, Braskem Idesa has a supply contract with prices referenced to a basket of sources of natural gas in the U.S. South, especially the Henry Hub natural gas price reference.

21 Braskem's consolidated result corresponds to the sum of the results in Brazil, United States & Europe and Mexico, less eliminations from the revenues and costs from the transfers of products among these regions.

<i>% of Net Revenue</i>	<i>5%</i>	<i>7%</i>	<i>5%</i>	<i>2 p.p.</i>	<i>0 p.p.</i>

In 1Q18, sales, general and administrative expenses increased compared to 1Q17 due to higher sales volume. Compared to 4Q17, SG&A expenses decreased due to lower expenses with consulting, audit, advertising and marketing services.

OTHER INCOME/EXPENSES, NET (OIE)

In 1Q18, the Company recorded other operating expenses of R\$72 million, down 7% from 1Q17, due to the provision for revenue related to the delivery-or-pay under the ethane supply agreement in Mexico in the amount of R\$45 million (US\$13.8 million) in 3Q17. Compared to 4Q17, operating expenses decreased 76%, since the result in the previous quarter was adversely affected by: (i) higher provisioning for lawsuits and labor claims; (ii) provisioning for the recovery of environmental damages; and (iii) write-off of fixed and intangible assets, including ongoing investment projects and maintenance shutdowns.

FREE CASH FLOW²³

In 1Q18, Braskem recorded free cash flow of R\$1,765 million, increasing R\$1,342 million compared to 1Q17 and R\$1,808 million compared to 4Q17, mainly due to the lower cash burn in the variation in operating working capital in the period, mainly due to:

§ Accounts receivable: decrease in balance due to lower sales volume

§ Inventories: lower feedstock inventories, due to the maintenance shutdown at the cracker in Triunfo, Rio Grande do Sul and to the lower volume of finished products, particularly PVC, chlor-alkali, PE and PP in the United States, which offset the higher price references

§ Suppliers: increase in the price of key feedstocks

Exclusively compared to 4Q17, the higher cash generation also is explained by: (i) the lower interest expense, since the prior quarter was adversely affected by costs linked to debt prepayments following the bond issue; and (ii) lower investments, since 4Q17 was affected by the acquisition of an interest in Cetrel in the amount of R\$608 million.

Net Cash provided by operating activities	1,801	1,330	569	35%	217%
(-) Cash used in Investing Activities	(403)	(1,330)	(275)	-70%	47%

(=) Free Cash Flow Generation	1,765	(43)	423	-	317%

VALUE LEVERS**4 New PP plant in the United States**

At the end of 1Q18, Braskem already had invested US\$212 million, related to expenditures with detailed engineering, which are 90% completed, and equipment purchases. The highlight in the quarter was the beginning of construction, which led the Company to reach 16% completion of the project. In addition, Linde Construction Manager started its management of EPC and the reactors were successfully delivered.

INDICATORS

²³ Note that the cash flow analysis above does not consider the reclassification of “cash and cash equivalents” to “financial investments” related to financial investments in Brazilian federal government bonds (Brazilian floating-rate (SELIC) government bond - LFT) and floating-rate bonds (LFs) issued by financial institutions, whose original maturities exceed three months, with high liquidity and expected realization in the short term, in accordance with Note 4 to the Quarterly Financial Statements as of March 31, 2018. In the cash flow presented in Appendix IV, this is recorded as “financial investments” (includes LFTs and LFs), with the following effects from reclassifications: (i) reduction in the balance of financial investments of R\$167 million in 1Q17; (ii) reduction in the balance of financial investments of R\$42 million in 4Q17; and (iii) increase in the balance of financial investments of R\$100 million in 1Q18.

DISCLAIMER

This release contains forward-looking statements. These forward-looking statements are not solely historical data, but rather reflect the targets and expectations of Braskem’s management. Words such as "anticipate," "wish," "expect," "foresee," "intend," "plan," "predict," "project," "aim" and similar terms seek to identify statements that necessarily involve known and unknown risks. Braskem does not undertake any liability for transactions or investment decisions based on the information contained in this document.

APPENDIX I

Consolidated Statement of Operations

APPENDIX II

Calculation of Consolidated EBITDA

(i) Represents the accrual and reversal of provisions for the impairment of long-lived assets (investments, property, plant and equipment and intangible assets) that were adjusted to form EBITDA, since there is no expectation of their financial realization and if in fact realized they would be duly recorded on the statement of operations.

(ii) Corresponds to results from equity investments in associated companies and joint ventures.

APPENDIX III
Consolidated Balance Sheet

* On the reporting date of the quarterly financial statements for the period ended March 31, 2018, Braskem was in unremedied default with the obligations typical of project finance. As a result, the entire balance of non-current liabilities, in the amount of R\$8,784 million, was reclassified to current liabilities, in accordance with CPC 26 and its corresponding accounting standard IAS 1 (Presentation of Financial Statements). In accordance with the aforementioned accounting standards, reclassification is required in situations in which the breach of certain contractual obligations entitles creditors to request the prepayment of obligations in the short term. In this context, note that none of the creditors requested said prepayment of obligations and that Braskem Idesa has been settling its debt service obligations in accordance with their original maturity schedule. Furthermore, Braskem Idesa has been negotiating approval of such breaches with its creditors in order to reclassify the entire amount reclassified from current liabilities back to non-current liabilities.

** Includes the exchange variation of financial liabilities designated as hedge accounting.
