- In **2018**, the **cost of goods sold** totaled R\$16,106 million, up 18% over 2017, due to higher raw material prices, the effect of the 18.5% appreciation of the dollar against the real in the period and higher volume. - **Gross profit** stood at R\$6,863 million in **2018**, 39% more than in 2017. In **4Q18**, gross profit totaled R\$2,052 million, up 10% over 3Q18. The gross margin moved up 3.6p.p. and 5.6p.p. over 3Q18 and 4Q17, respectively, to 33.9%, due to higher steel and iron ore prices.
- **Selling, general and administrative expenses** totaled R\$2,758 million in **2018**, up 23.6% over 2017, slightly less than the 24% growth in net revenue in the same period. **Selling expenses** increased 24.7% in 2018, while **general and administrative expenses** grew 18.8%, accounting for 2.2% of net revenue, the lowest-ever level.
- **Other operating income and expenses** came to a positive R\$2,705 million in **2018**, mainly due to the sale of the Terra Haute plant in the United States, the recognition of the exclusion of the ICMS tax from the PIS/COFINS calculation base, and the fair price marking of Usiminas shares to fair value through profit or loss.

Foreign Exchange Exposure

The net foreign exchange exposure of the consolidated balance sheet was US\$476 million as at December 31, 2018, as shown in the table below. It should be noted that the net foreign exchange exposure includes a liability of US\$1.0 billion in line item “Loans and Financing” related to the perpetual bond, which, due to its nature, will not require disbursement to settle the principal amount in the foreseeable future.

The hedge accounting adopted by CSN correlates the projected export inflow in dollars with part of the scheduled debt payments in the same currency. As a result, the exchange rate variation in the dollar-denominated debt is temporarily recorded in equity and subsequently recorded in profit or loss when revenues in dollars from exports occur.

4Q18 AND 2018

EARNINGS RELEASE

- In the fourth quarter, CSN maintained a high **share of coated products** as a percentage of total sales volume, following the strategy of adding more value to its product mix. Sales of coated products such as galvanized items and tin plates accounted for 51% of flat steel sales, 3.3 p.p. more than in 3Q18, considering all the markets in which the Company operates. It is worth noting that the share of coated products in flat steel sales in the **foreign market** increased from 60% (3Q18) to 88% in 4Q18. In 2018, sales of coated products grew 33%.

According to **ANFAVEA** (National Association of Automobile Manufacturers), **in 2018, the production of automobiles, light commercial vehicles, trucks and buses** reached 2.9 million units, an **increase of 6.73%**, compared to 2017. **Exports** showed a weaker performance, with 629,175,000 vehicles sold, a decrease of **17.86%** versus 2017. Anfavea expects vehicle production to grow 9%, to 3.14 million units, in 2019.

According to **ABRAMAT** (Construction Material Manufacturers' Association), **sales of building materials** climbed 1.2% between 2017 and 2018. The association expects sales of building materials to grow 2.0% in 2019.

According to **IBGE** (Brazilian Institute of Geography and Statistics), **home appliance production moved up 0.4%** in 2018 over 2017.

- **Net revenue** from steel operations reached R\$3,768 million in 4Q18, 9% higher than in 4Q17. This was mostly due to higher steel prices both in Brazil and abroad, as well as an increase in sales volume of coated products. In 2018, **net revenue** totaled R\$15,634 million, 21% higher than in 2017, due to increases in steel prices across the chain throughout the

year. In the domestic market, average steel prices climbed 13% in 2018 and 2% in 4Q18 against the previous year.

- In **4Q18**, the **cost of goods sold** fell 10% from 3Q18, to R\$3,057 million, due to lower sales volume. However, in **2018**, the cost of goods sold came to R\$12,613 million, up 20% over 2017, mainly due to an increase in volume and price of raw materials and general maintenance.
- **Slab production cost** reached R\$1,806/t in **4Q18**, 6% higher than in 3Q18, fueled by higher spending on maintenance and coal/coke. In **2018**, slab production cost averaged R\$1,652/t, 23% higher than in 2017, due to the appreciation of the dollar against the real and the increase in the main raw materials, especially coal, coke, iron ore and pellets.
- **Adjusted EBITDA** totaled R\$594 million in **4Q18**, down 9% from R\$652 million in 3Q18, due to the seasonal decline in sales volume, although the EBITDA margin remained flat at 15.8%. In **2018**, EBITDA amounted to R\$2,645 million, 25% higher than in 2017, due to a combination of price adjustments and the transfer of volumes to the domestic market. The EBITDA margin moved up from 16.3% in 2017 to 16.9% in 2018.
