**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, DC 20549
FORM 10-Q**

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2009

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 1-16455

RRI Energy, Inc.

(Exact Name of Registrant as Specified in Its Charter)

Delaware

(State or Other Jurisdiction of Incorporation or Organization)

76-0655566

(I.R.S. Employer Identification No.)

1000 Main Street

Houston, Texas 77002

(Address of Principal Executive Offices) (Zip Code)

(713) 497-3000

(Registrant's Telephone Number, Including Area Code)

Reliant Energy, Inc.

(Former Name, Former Address and Former Fiscal Year, if Changed Since Last Report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Edgar Filing: RRI ENERGY INC - Form 10-Q

As of April 24, 2009, the latest practicable date for determination, RRI Energy, Inc. had 350,426,995 shares of common stock outstanding and no shares of treasury stock.

FORWARD-LOOKING INFORMATION

This report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements are statements that contain projections, assumptions or estimates about the outcome of pending legal actions, our revenues, income, capital structure and other financial items, our plans and objectives for future operations or about our future economic performance, transactions and dispositions, financings or offerings and approvals related thereto. In many cases, you can identify forward-looking statements by terminology such as anticipate, estimate, believe, continue, could, intend, may, plan, potential, predict, should, will, expect, objective, projection, guidance, outlook, effort, target and other similar words. However, the absence of these words does not mean that the statements are not forward-looking.

Actual results may differ materially from those expressed or implied by the forward-looking statements as a result of many factors or events, including, but not limited to, the following:

- Demand and market prices for electricity, purchased power and fuel and emission allowances;
- Limitations on our ability to set rates at market prices;
- Legislative, regulatory and/or market developments;
- Our ability to obtain adequate fuel supply and/or transmission and distribution services;
- Interruption or breakdown of our generating equipment and processes;
- Failure of third parties to perform contractual obligations;
- Changes in environmental regulations that constrain our operations or increase our compliance costs;
- Failure by transmission system operators to communicate operating and system information properly and timely;
- Failure to meet our debt service, restrictive covenants or collateral postings;
- Ineffective hedging and other risk management activities;
- Changes in the wholesale energy market or in our evaluation of our generation assets;
- The outcome of pending or threatened lawsuits, regulatory proceedings, tax proceedings and investigations;
- Weather-related events or other events beyond our control;
- The timing and extent of changes in commodity prices or interest rates; and
- Financial market conditions and our access to capital.

Other factors that could cause our actual results to differ from our projected results are discussed or referred to in the Risk Factors section of our most recent Annual Report on Form 10-K filed with the Securities and Exchange Commission.

Each forward-looking statement speaks only as of the date of the particular statement and we undertake no obligation to update or revise any forward-looking statement, whether as a result of new information, future events or otherwise. Our filings and other important information are also available on our website at www.rrienergy.com.

Cash Payments:

Interest paid (net of amounts capitalized) for continuing operations	\$ (4,745)	\$ 309
Income taxes paid (net of income tax refunds) for continuing operations	3,762	(22,343)

See Notes to our Unaudited Consolidated Interim Financial Statements

Table of Contents

RRI ENERGY, INC. AND SUBSIDIARIES
NOTES TO UNAUDITED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

(1) Background and Basis of Presentation

(a) Background.

RRI Energy refers to RRI Energy, Inc. and we, us and our refer to RRI Energy, Inc. and its consolidated subsidiaries. Our business consists primarily of one business segment, wholesale energy. See note 13. Our consolidated interim financial statements and notes (interim financial statements) are unaudited, omit certain disclosures and should be read in conjunction with our audited consolidated financial statements and notes in our Form 10-K.

On May 1, 2009, we sold our interests in the affiliates that operate our Texas retail residential and small business (mass) and commercial, industrial and governmental/institutional (C&I) business. In connection with this sale, we changed our name to RRI Energy, Inc. from Reliant Energy, Inc. effective May 2, 2009. See note 15. Our Board of Directors has concluded its review of strategic alternatives.

(b) Basis of Presentation.

Estimates. Management makes estimates and assumptions to prepare financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) that affect:

the reported amounts of assets, liabilities and equity;

the reported amounts of revenues and expenses; and

our disclosure of contingent assets and liabilities at the date of the financial statements.

We evaluate our estimates and assumptions on an ongoing basis using historical experience and other factors, including the current economic environment, which we believe to be reasonable under the circumstances. We adjust such estimates and assumptions when facts and circumstances dictate.

Adjustments and Reclassifications. The interim financial statements reflect all normal recurring adjustments necessary, in management's opinion, to present fairly our financial position and results of operations for the reported periods. Amounts reported for interim periods, however, may not be indicative of a full year period due to seasonal fluctuations in demand for electricity and energy services, changes in commodity prices, and changes in regulations, timing of maintenance and other expenditures, dispositions, changes in interest expense and other factors.

Deconsolidation of Channelview. On August 20, 2007, four of our wholly-owned subsidiaries, RRI Energy Channelview LP (Channelview LP), RRI Energy Channelview (Texas) LLC, RRI Energy Channelview (Delaware) LLC and RRI Energy Services Channelview LLC (collectively, Channelview), filed for reorganization under Chapter 11 of the Bankruptcy Code. As Channelview is currently subject to the supervision of the bankruptcy court, we deconsolidated Channelview's financial results beginning August 20, 2007 and began reporting our investment in Channelview using the cost method. The Channelview plant was sold on July 1, 2008. See note 14 for further discussion of Channelview.

Inventory. We value fuel inventories at the lower of average cost or market. We reduce these inventories as they are used in the production of electricity or sold. During the three months ended March 31, 2009 and 2008, we recorded \$24 million and \$0, respectively, for lower of average cost or market adjustments in cost of sales.

New Accounting Pronouncement Not Yet Adopted - Interim Disclosures about Fair Value of Financial Instruments. The Financial Accounting Standards Board (FASB) issued FSP FAS 107-1 and APB 28-1, Interim Disclosures about Fair Value of Financial Instruments, which is effective for interim periods ending after June 15, 2009. The FSP amends Statement of Financial Accounting Standards (SFAS) No. 107, Disclosures about Fair Value of Financial Instruments and will require us to provide information about the fair value of our financial instruments, including methods and significant assumptions used to estimate the fair value, in interim financial statements.

Table of Contents

New Accounting Pronouncement Not Yet Adopted – Fair Value Measurements. The FASB issued FSP FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly*, which is effective for interim periods ending after June 15, 2009. The FSP provides guidance on how to determine the fair value of assets and liabilities under SFAS No. 157, *Fair Value Measurements* in the current economic environment. We do not expect this FSP to have a significant impact on our consolidated financial statements.

New Accounting Pronouncement Not Yet Adopted – Disclosures about Plan Assets. The FASB issued FSP FAS 132(R)-1, *Employer’s Disclosures about Postretirement Benefit Plan Assets*, which is effective for 2009. In addition to enhanced disclosures regarding investment policies and strategies, this FSP will require us to disclose information about fair value measurements of plan assets that would be similar to the disclosures about fair value measurements required by SFAS No. 157, *Fair Value Measurements* in our 2009 Annual Report on Form 10-K.

(2) Stock-based Compensation

Our compensation expense for our stock-based incentive plans was:

	Three Months Ended March 31,	
	2009	2008
	(in millions)	
Stock-based incentive plans compensation expense (pre-tax)	\$ 3	\$ 4

No significant stock-based compensation awards were granted during the three months ended March 31, 2009. Stock-based compensation expense represents recognition of grant date fair value of previously granted awards over the vesting period. No tax benefits related to stock-based compensation were realized during the three months ended March 31, 2009 and 2008 due to our net operating loss carryforwards.

(3) Derivative Instruments and Hedging Activities

We account for our derivative instruments and hedging activities in accordance with SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended (SFAS No. 133). Effective January 1, 2009, we adopted SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities* (SFAS No. 161).

Changes in commodity prices prior to the energy delivery period are inherent in our wholesale energy business. However, we believe the benefits of generally hedging our generation assets do not justify the costs, including collateral postings. Accordingly, we may enter selective hedges, including originated transactions, based on our assessment of (a) operational and market limitations requiring us to enter into power, fuel, capacity and emissions transactions to manage our generation assets, (b) the near term economic environment and volatile commodity markets and the benefits of hedging some of the downside risk to our earnings and cash flows and (c) market fundamentals and the opportunity to increase the return from our generation assets. For our risk management activities, we use derivative and non-derivative contracts that provide for settlement in cash or by delivery of a commodity. We use derivative instruments such as futures, forwards, swaps and options to execute our wholesale hedge strategy. We may also enter into derivatives to manage our exposure to changes in prices of emission and exchange allowances.

We account for our derivatives under one of three accounting methods (mark-to-market, accrual (under the normal purchase/normal sale exception to fair value accounting) or cash flow hedge accounting) based on facts and circumstances. The fair values of our derivative activities are determined by (a) prices actively quoted, (b) prices provided by other external sources or (c) prices based on models and other valuation methods. See note 5 for discussion on fair value measurements.

A derivative is recognized at fair value in the balance sheet whether or not it is designated as a hedge, except for derivative contracts designated as normal purchase/normal sale exceptions, which are not in our consolidated balance sheet or results of operations prior to settlement resulting in accrual accounting treatment.

Realized gains and losses on derivative contracts used for risk management purposes and not held for trading purposes are reported either on a net or gross basis based on the relevant facts and circumstances. Hedging transactions that do

not physically flow are included in the same caption as the items being hedged.

Table of Contents

A summary of our derivative activities and classification in our results of operations is:

Instrument	Primary Risk Exposure	Purpose for Holding or Issuing Instrument⁽¹⁾	Transactions that Physically Flow/Settle	Transactions that Financially Settle⁽²⁾
Power futures, forward, swap and option contracts	Price risk	Power sales to wholesale customers	Revenues	Revenues
		Power purchases related to wholesale operations	Cost of sales	Revenues
		Power purchases/sales related to legacy trading and non-core asset management positions ⁽³⁾	Revenues	Revenues
Natural gas and fuel futures, forward, swap and option contracts	Price risk	Natural gas and fuel sales related to wholesale operations	Revenues/Cost of sales	Cost of sales
		Natural gas and fuel purchases related to wholesale operations	Cost of sales	Cost of sales
		Natural gas and fuel purchases/sales related to legacy trading and non-core asset management positions ⁽³⁾	Cost of sales	Cost of sales
Emission and exchange allowances futures ⁽⁴⁾	Price risk	Purchases/sales of emission and exchange allowances	N/A ⁽⁵⁾	Revenues/Cost of sales

(1) The purpose for holding or issuing does not impact the accounting method elected for each instrument.

(2) Includes classification for mark-to-market derivatives and amounts reclassified from accumulated other

comprehensive
income
(loss) related to
cash flow
hedges.

- (3) See discussion
below regarding
trading
activities.
- (4) Includes
emission and
exchange
allowances
futures for
sulfur dioxide
(SO₂), nitrogen
oxide (NO_x)
and carbon
dioxide (CO₂).
- (5) N/A is not
applicable.

In addition to market risk, we are exposed to credit and operational risk. We have a risk control framework to manage these risks, which include: (a) measuring and monitoring these risks, (b) review and approval of new transactions relative to these risks, (c) transaction validation and (d) portfolio valuation and reporting. We use mark-to-market valuation, value-at-risk and other metrics in monitoring and measuring risk. Our risk control framework includes a variety of separate but complementary processes, which involve commercial and senior management and our Board of Directors. See note 4 for further discussion of our credit policy.

Earnings Volatility from Derivative Instruments. We procure natural gas, coal, oil, natural gas transportation and storage capacity and other energy-related commodities to support our wholesale energy business. Some types of transactions may cause us to experience volatility in our earnings due to natural gas inventory related to transportation and storage generally receiving accrual treatment while the related derivative instruments are marked to market through earnings.

Unrealized gains and losses on energy derivatives consist of both gains and losses on energy derivatives during the current reporting period for derivative assets or liabilities that have not settled as of the balance sheet date and the reversal of unrealized gains and losses from prior periods for derivative assets or liabilities that settled prior to the balance sheet date but during the current reporting period.

Cash Flow Hedges. If certain conditions are met, a derivative instrument may be designated as a cash flow hedge. Derivatives designated as cash flow hedges must have a high correlation between price movements in the derivative and the hedged item. The changes in fair value of cash flow hedges are deferred in accumulated other comprehensive income (loss), net of tax, to the extent the contracts are, or have been, effective as hedges, until the forecasted transactions affect earnings. At the time the forecasted transactions affect earnings, we reclassify the amounts in accumulated other comprehensive income (loss) into earnings. We record the ineffective portion of changes in fair value of cash flow hedges immediately into earnings. For all other derivatives, changes in fair value are recorded as unrealized gains or losses in our results of operations.

Table of Contents

If and when an acceptable level of correlation no longer exists, hedge accounting ceases and changes in fair value are recognized in our results of operations. If it becomes probable that a forecasted transaction will not occur, we immediately recognize the related deferred gains or losses in our results of operations. The associated hedging instrument is then marked to market through our results of operations for the remainder of the contract term unless a new hedging relationship is redesignated.

Over the past several years, we have substantially decreased derivatives accounted for as cash flow hedges, in favor of utilizing the mark-to-market method of accounting or the normal purchase/normal sale exception for these derivatives. During the first quarter of 2007, we de-designated our remaining cash flow hedges; therefore, as of March 31, 2009 and December 31, 2008, we do not have any designated cash flow hedges.

Presentation of Derivative Assets and Liabilities. We present our derivative assets and liabilities on a gross basis (regardless of master netting arrangements with the same counterparty). Cash collateral amounts are also presented on a gross basis.

As of March 31, 2009, our commodity derivative assets and liabilities include amounts for non-trading and trading activities as follows:

	Derivative Assets		Derivative Liabilities		Net Derivative Assets (Liabilities)
	Current	Long-Term	Current (in millions)	Long-Term	
Non-trading	\$ 126	\$ 48	\$ (222)	\$ (110)	\$ (158)
Trading	53	27	(32)	(18)	30
Total derivatives ⁽¹⁾	\$ 179	\$ 75	\$ (254)	\$ (128)	\$ (128)

(1) There were no derivatives designated as hedging instruments under SFAS No. 133 for the reporting periods presented.

We have the following derivative commodity contracts outstanding as of March 31, 2009:

Commodity	Unit	Notional Volumes	
		Current (in millions)	Long-term
Power	MWh ⁽¹⁾	(1) ⁽²⁾	(2) ⁽²⁾
Natural gas	MMBTU ⁽³⁾	30	2
Natural gas basis	MMBTU ⁽³⁾	3	2
Coal	MMBTU ⁽³⁾	109	266

- (1) MWh is megawatt hours.
- (2) Negative amounts indicate net forward sales.
- (3) MMBTU is million British thermal units.

Table of Contents

The income (loss) associated with our energy derivatives for the three months ended March 31, 2009 is:

Derivatives Not Designated as Hedging Instruments Under SFAS No. 133⁽¹⁾	Revenues	Cost of Sales
	(in millions)	
<u>Non-Trading Commodity Contracts:</u>		
Unrealized ⁽²⁾	\$ (4)	\$ (40)
Realized ⁽³⁾⁽⁴⁾⁽⁵⁾	106	(8)
Total non-trading	\$ 102	\$ (48)
<u>Trading Commodity Contracts:</u>		
Unrealized	\$	\$
Realized ⁽³⁾		19
Total trading	\$	\$ 19

(1) Interest rate swap instruments were liquidated in 2002 and the related deferred losses in accumulated other comprehensive loss are being amortized into interest expense through 2012. An immaterial amount was amortized during the three months ended March 31, 2009 and 2008, which was included in interest expense under other operations.

(2) During 2007, we de-designated our remaining cash flow hedges. During the three months ended

March 31, 2009,
previously
measured
ineffectiveness
gains
(losses) reversing
due to settlement
of the derivative
contracts was
insignificant.

- (3) Does not include realized gains or losses associated with cash month transactions, non-derivative transactions or derivative transactions that qualify for the normal purchase/normal sale exception.
- (4) Excludes settlement value of fuel contracts classified as inventory upon settlement.
- (5) Includes gains or losses from de-designated cash flow hedges reclassified from accumulated other comprehensive loss due to settlement of the derivative contracts. See note 6.

As of March 31, 2009 and December 31, 2008, we do not have any designated cash flow hedges. Amounts included in accumulated other comprehensive loss are:

March 31, 2009
Expected to be
Reclassified into
Results of

	At the End of the Period	Operations in Next 12 Months (in millions)
De-designated cash flow hedges ⁽¹⁾⁽²⁾⁽³⁾	\$ 44	\$ 15

(1) No component of the derivatives gain or loss was excluded from the assessment of effectiveness.

(2) During the three months ended March 31, 2008, previously measured ineffectiveness gains (losses) of \$(1) million and \$0 in revenues and cost of sales, respectively, reversed due to settlement of the derivative contracts.

(3) During the three months ended March 31, 2009 and 2008, \$0 was recognized in our results of operations as a result of the discontinuance of cash flow hedges because it was probable that the forecasted transaction would not occur.

Trading Activities. Prior to March 2003, we engaged in proprietary trading activities. Trading positions entered into prior to our decision to exit this business are being closed on economical terms or are being retained and settled over the contract terms. In addition, we have current transactions relating to non-core asset management, such as gas storage and transportation contracts not tied to generation assets, which are classified as trading activities. The income (loss) associated with these transactions is:

	Three Months Ended March 31,	
	2009	2008
	(in millions)	
Revenues	\$	\$
Cost of sales	11	(4)
Total ⁽¹⁾	\$ 11	\$ (4)

(1) Includes realized and unrealized gains and losses on both derivative instruments and non-derivative instruments.

Table of Contents**(4) Credit Risk**

We have a credit policy that governs the management of credit risk, including the establishment of counterparty credit limits and specific transaction approvals. Credit risk is monitored daily and the financial condition of our counterparties is reviewed periodically. We try to mitigate credit risk by entering into contracts that permit netting and allow us to terminate upon the occurrence of certain events of default. We measure credit risk as the replacement cost for our derivative positions plus amounts owed for settled transactions.

Our credit exposure is based on our derivative assets and accounts receivable from our wholesale energy counterparties, after taking into consideration netting within each contract and any master netting contracts with counterparties. We believe this represents the maximum potential loss we would incur if our counterparties failed to perform according to their contract terms. In determining the fair value of our derivative assets, we include assumptions for counterparty non-performance risk. See note 5 below and note 2(e) to our consolidated financial statements in our Form 10-K for additional information about fair value measurements. Additionally, we provide an allowance for doubtful accounts for outstanding receivable balances. As of March 31, 2009, and December 31, 2008, two investment grade counterparties (a financial institution and a power grid operator) represented 76% (\$172 million) and 61% (\$189 million), respectively, of our credit exposure. These amounts exclude activity related to contracts classified as normal purchase/normal sale and non-derivative contractual commitments that are not recorded in our consolidated balance sheets, except for any related accounts receivable. As of March 31, 2009 and December 31, 2008, we held no collateral from these counterparties. There were no other counterparties representing greater than 10% of our credit exposure.

Based on our current credit ratings, any additional collateral postings that would be required from us due to a credit downgrade would be immaterial. As of March 31, 2009 and December 31, 2008, we have posted cash margin deposits of \$126 million and \$232 million, respectively, as collateral for our derivative liabilities.

(5) Fair Value Measurements

We apply recurring fair value measurements to our financial assets and liabilities. Fair value measurements of our financial assets and liabilities are as follows:

	March 31, 2009			Total
	Level 1	Level 2	Level 3	Fair Value
	(in millions)			
Total derivative assets	\$ 81	\$ 171	\$ 2	\$ 254
Total derivative liabilities	34	193	155	382
Other assets ⁽¹⁾	28			28

(1) Includes available-for-sale and trading securities, which are actively traded and are valued based upon unadjusted quoted prices.

December 31, 2008

	Level 1	Level 2	Level 3	Reclassifications	Total
--	----------------	----------------	----------------	--------------------------	--------------

	(in millions)				Fair Value
Total derivative assets	\$ 59	\$ 177	\$ 7	\$ (3) ⁽¹⁾	\$ 240
Total derivative liabilities	17	208	121	(3) ⁽¹⁾	343
Other assets ⁽²⁾	29				29

(1) Reclassifications are required to reconcile to our consolidated balance sheet presentation.

(2) Includes available-for-sale and trading securities, which are actively traded and are valued based upon unadjusted quoted prices.

Table of Contents

The following is a reconciliation of changes in fair value of net derivative assets and liabilities classified as Level 3:

	Three Months Ended March 31,	
	2009	2008
	Net Derivatives (Level 3)	
	(in millions)	
Balance, beginning of period	\$ (114)	\$ 21
Total gains (losses) realized/unrealized:		
Included in earnings	(74) ⁽¹⁾	72 ⁽¹⁾
Purchases, issuances and settlements (net)	35	(8)
Transfers in and/or out of Level 3 (net)	(2)	(2)
Balance, end of period	\$ (153)	\$ 85
Changes in unrealized gains/losses relating to derivative assets and liabilities still held at March 31, 2009 and 2008	(68) ⁽³⁾	62 ⁽⁴⁾

- (1) Recorded in revenues and cost of sales.
- (2) Represents fair value as of December 31, 2008 and 2007, respectively.
- (3) Includes \$0 recorded in revenues and \$68 million recorded in cost of sales.
- (4) Includes \$2 million recorded in revenues and \$60 million recorded in cost of sales.

See note 2(e) to our consolidated financial statements in our Form 10-K for additional information about fair value measurements.

(6) Comprehensive Income (Loss)

The components of total comprehensive income (loss) are:

	Three Months Ended March 31,	
	2009	2008
	(in millions)	
Net income (loss)	\$ (151)	\$ 377
Other comprehensive income, net of tax:		
Reclassification of net deferred loss from cash flow hedges realized in net income/loss	5	10
Unrealized gain on available-for-sale securities	1	
Comprehensive income (loss)	\$ (145)	\$ 387

Table of Contents**(7) Debt**

Outstanding debt:

	March 31, 2009			December 31, 2008		
	Weighted Average Stated Interest Rate ⁽¹⁾	Long-term	Current	Weighted Average Stated Interest Rate ⁽¹⁾	Long-term	Current
(in millions, except interest rates)

Total facilities, bonds and notes		2,629			2,629	
<u>Other:</u>						
Adjustment to fair value of debt ⁽⁶⁾		1	13		4	13
Total other debt		1	13		4	13
Total debt ⁽⁷⁾		\$ 2,630	\$ 13		\$ 2,633	\$ 13

(1) The weighted average stated interest rates are as of March 31, 2009 or December 31, 2008.

(2) We repurchased \$45 million during the three months ended March 31, 2008 and incurred an insignificant amount of debt

extinguishment
expenses.

- (3) Excludes \$136 million classified as discontinued operations as of March 31, 2009 and December 31, 2008. See note 15.
- (4) PEDFA is the Pennsylvania Economic Development Financing Authority. These bonds were issued for our Seward plant.
- (5) Excludes \$102 million classified as discontinued operations as of March 31, 2009 and December 31, 2008. See note 15.
- (6) Debt acquired in the Orion Power acquisition was adjusted to fair value as of the acquisition date. Included in interest expense is amortization of \$3 million for valuation adjustments for debt during the three months ended

March 31, 2009
and 2008.

- (7) Excludes
\$238 million
classified as
discontinued
operations as of
March 31, 2009
and
December 31,
2008. See note
15.

Amounts borrowed and available for borrowing under our revolving credit agreements as of March 31, 2009 are:

	Total Committed Credit	Drawn Amount	Letters of Credit	Unused Amount
	(in millions)			
RRI Energy senior secured revolver due 2012	\$ 500	\$	\$ 37	\$ 463
RRI Energy letter of credit facility due 2014	250		249	1
Total	\$ 750	\$	\$ 286	\$ 464

Table of Contents**(8) Earnings (Loss) Per Share**

Reconciliations of the amounts used in the basic and diluted earnings (loss) per common share computations are:

	Three Months Ended March 31,	
	2009	2008
	(in millions)	
Income (loss) from continuing operations (basic)	\$ (106)	\$ 13
Plus: Interest expense on 5.00% convertible senior subordinated notes, net of tax	(1)	(2)
Income (loss) from continuing operations (diluted)	\$ (106)	\$ 13

(1) As we incurred a loss from continuing operations for this period, diluted loss per share is calculated the same as basic loss per share.

(2) In December 2006, we converted 99.2% of our convertible senior subordinated notes to common stock. In April 2008, nearly all of the outstanding notes were converted to common stock.

	Three Months Ended March 31,	
	2009	2008
	(shares in thousands)	
Diluted Weighted Average Shares Calculation:		
Weighted average shares outstanding (basic)	350,487	345,419
Plus: Incremental shares from assumed conversions:		

Edgar Filing: RRI ENERGY INC - Form 10-Q

Stock options	(1)	4,252
Restricted stock	(1)	543
Employee stock purchase plan	(1)	
5.00% convertible senior subordinated notes	(1)	212
Warrants	(1)	3,677
Weighted average shares outstanding assuming conversion (diluted)	350,487	354,103

(1) See note 1 above regarding diluted loss per share.

We excluded the following items from diluted earnings (loss) per common share due to the anti-dilutive effect:

	Three Months Ended March 31,	
	2009	2008
	(shares in thousands, dollars in millions)	
Shares excluded from the calculation of diluted earnings (loss) per share	446 ⁽¹⁾	N/A ⁽²⁾
Shares excluded from the calculation of diluted earnings (loss) per share because the exercise price exceeded the average market price	7,851 ⁽³⁾	2,380 ⁽³⁾
Interest expense that would be added to income if 5.00% convertible senior subordinated notes were dilutive	N/A ⁽⁴⁾	N/A ⁽²⁾

(1) Potential shares excluded consist of stock options and restricted stock.

(2) Not applicable as we included the item in the calculation of diluted earnings/loss per share.

(3) Includes stock options.

(4) Not applicable. See note (2) in

the table above.

Table of Contents**(9) Income Taxes****(a) Tax Rate Reconciliation.**

A reconciliation of the federal statutory income tax rate to the effective income tax rate for our continuing operations is:

	Three Months Ended March 31,	
	2009	2008
Federal statutory rate	(35)%	35%
Additions (reductions) resulting from:		
Federal valuation allowance	11 ⁽¹⁾	
State income taxes, net of federal income taxes	(1) ⁽²⁾	11 ⁽³⁾
Other	1	
Effective rate	(24)%	46%

(1) Of this percentage, \$16 million relates to additional valuation allowance.

(2) Of this percentage, \$6 million relates to additional valuation allowance.

(3) Of this percentage, \$1 million relates to additional valuation allowance.

(b) Tax Attributes Carryovers.

Our tax attributes carryovers are primarily not affected by the Texas retail sale to the subsidiary of NRG Energy, Inc. See note 15.

(c) Valuation Allowances.

We assess our future ability to use federal, state and foreign net operating loss carryforwards, capital loss carryforwards and other deferred tax assets using the more-likely-than-not criteria. These assessments include an evaluation of our recent history of earnings and losses, future reversals of temporary differences and identification of other sources of future taxable income, including the identification of tax planning strategies in certain situations.

Our valuation allowances for deferred tax assets are:

	Federal	State (in millions)	Capital, Foreign and Other, Net
As of December 31, 2008	\$ 49	\$ 103	\$ 14
Changes in valuation allowance	16	6	
As of March 31, 2009	\$ 65	\$ 109	\$ 14

(d) FIN 48 and Income Tax Uncertainties.

We may only recognize the tax benefit for financial reporting purposes from an uncertain tax position when it is more-likely-than-not that, based on the technical merits, the position will be sustained by taxing authorities or the courts. The recognized tax benefits are measured as the largest benefit having a greater than fifty percent likelihood of being realized upon settlement with a taxing authority. We classify accrued interest and penalties related to uncertain income tax positions in income tax expense/benefit.

Table of Contents

Our unrecognized federal and state tax benefits did not change significantly during the three months ended March 31, 2009 and 2008.

We expect to continue discussions with taxing authorities regarding tax positions related to the following, and believe it is reasonably possible some of these matters could be resolved in the next 12 months; however, we cannot estimate the range of changes that might occur:

\$177 million payment to CenterPoint during 2004 related to our residential customers;

\$351 million charge during 2005 to settle certain civil litigation and claims relating to the Western states energy crisis; and

the timing of tax deductions as a result of negotiations with respect to California-related revenue, depreciation, emission allowances and certain employee benefits.

We are in ongoing discussions with the Internal Revenue Service (IRS) regarding the timing of revenue recognition and tax deductions with respect to certain California-related items in our 2002 short taxable period return (subsequent to our separation from CenterPoint Energy, Inc.). The IRS has informed us it expects to issue a notice of denial of our administrative claim for refund involving these California-related items and we expect to institute refund litigation with respect to this claim in the U.S. District Court or U.S. Court of Federal Claims. In order to set a jurisdictional prerequisite to institute such a refund suit, we expect to make a payment of approximately \$60 million to \$65 million (which includes an asserted tax liability of \$38 million plus interest) some time during 2009. If the IRS were to ultimately prevail in this matter, there would be no impact on the effective tax rate except for interest. The payment is refundable with interest if we are successful in the litigation.

(10) Guarantees and Indemnifications

We have guaranteed some non-qualified benefits of CenterPoint's existing retirees at September 20, 2002. The estimated maximum potential amount of future payments under the guarantee is approximately \$53 million as of March 31, 2009 and no liability is recorded in our consolidated balance sheet for this item.

We also guarantee the \$500 million PEDFA bonds, which are included in our consolidated balance sheet as outstanding debt or liabilities of discontinued operations. Our guarantees are secured by the same collateral as our 6.75% senior secured notes. The guarantees require us to comply with covenants similar to those in the 6.75% senior secured notes indenture. The PEDFA bonds will become secured by certain assets of our Seward power plant if the collateral supporting both the 6.75% senior secured notes and our guarantees are released. Our maximum potential obligation under the guarantees is for payment of the principal of \$500 million and related interest charges at a fixed rate of 6.75%. See note 15.

We have guaranteed payments to a third party relating to energy sales from El Dorado Energy, LLC, a former investment. The estimated maximum potential amount of future payments under this guarantee is approximately \$21 million as of March 31, 2009 and no liability is recorded in our consolidated balance sheet for this item.

We enter into contracts that include indemnification and guarantee provisions. In general, we enter into contracts with indemnities for matters such as breaches of representations and warranties and covenants contained in the contract and/or against certain specified liabilities. Examples of these contracts include asset purchase and sales agreements, service agreements and procurement agreements.

In our debt agreements, we typically indemnify against liabilities that arise from the preparation, entry into, administration or enforcement of the agreement.

Except as otherwise noted, we are unable to estimate our maximum potential exposure under these agreements until an event triggering payment occurs. We do not expect to make any material payments under these agreements.

Table of Contents**(11) Contingencies**

We are party to many legal proceedings, some of which may involve substantial amounts. Unless otherwise noted, we cannot predict the outcome of the matters described below.

(a) Pending Natural Gas Litigation.

The following proceedings relate to alleged conduct in the natural gas markets. We have settled a number of proceedings that were pending in California and other Western states; however, some other proceedings remain pending.

We are party to 13 lawsuits, several of which are class action lawsuits, in state and federal courts in California, Kansas, Missouri, Nevada, Tennessee and Wisconsin. These lawsuits relate to alleged conduct to increase natural gas prices in violation of antitrust and similar laws. The lawsuits seek treble or punitive damages, restitution and/or expenses. The lawsuits also name a number of unaffiliated energy companies as parties.

Recent developments in these cases include:

In January 2009, we reached an agreement to settle the five California-related cases pending in federal court in Nevada. The settlement is subject to approval of the court. The charges anticipated to be incurred in connection with the settlement were expensed in the third quarter of 2008. This settlement will resolve all of the remaining California gas cases.

In January 2009, the Circuit Court of Jackson County, Missouri dismissed the case filed by the Missouri Public Service Commission for lack of standing to bring the action. An appeal was filed in February 2009.

(b) Merrill Lynch Action.

In December 2008, we terminated our \$300 million retail working capital facility agreement with Merrill Lynch in order to address any issue that might be asserted regarding the minimum adjusted retail EBITDA covenant in that facility. On December 24, 2008, Merrill Lynch filed an action in the Supreme Court of the State of New York seeking a judgment declaring that under our credit sleeve and reimbursement agreement (the agreement), we did not have the right to terminate the working capital facility without their consent and that such termination is an event of default under the agreement. On May 1, 2009, we and Merrill Lynch filed to dismiss this lawsuit and the agreement was transferred in connection with the closing of the sale of our Texas retail business. The Court granted an order dismissing the action with prejudice on May 4, 2009. See note 15.

(c) Environmental Matters.

New Source Review Matters. The United States Environmental Protection Agency (EPA) and various states are investigating compliance of coal-fueled electric generating stations with the pre-construction permitting requirements of the Clean Air Act known as New Source Review. In 2000 and 2001, we responded to the EPA's information requests related to five of our stations, and in December 2007, we received supplemental requests for two of those stations. In September 2008, we received an EPA request for information related to two additional stations. The EPA agreed to share information relating to its investigations with state environmental agencies. In January 2009, we received a Notice of Violation (NOV) from the EPA alleging that past work at our Shawville, Portland and Keystone generation facilities violated the agency's regulations regarding New Source Review. While we are continuing to review the allegations, we believe that the projects listed by the EPA were conducted in compliance with applicable regulations.

In December 2007, the New Jersey Department of Environmental Protection (NJDEP) filed suit against us in the United States District Court in Pennsylvania, alleging that New Source Review violations occurred at one of our power plants located in Pennsylvania. The suit seeks installation of best available control technologies for each pollutant, to enjoin us from operating the plant if it is not in compliance with the Clean Air Act and civil penalties. The suit also names three past owners of the plant as defendants. In March 2009, the Connecticut Department of Environmental Protection became an intervening party to the suit.

We are unable to predict the ultimate outcome of the EPA's NOV or the NJDEP's suit, but a final finding that we violated the New Source Review requirements could result in significant capital expenditures associated with the implementation of emissions reductions on an accelerated basis and possible penalties. Most of these work projects were undertaken before our ownership of those facilities. We believe we are indemnified by or have the right to seek

indemnification from the prior owners for certain losses and expenses that we may incur from activities occurring prior to our ownership.

Ash Disposal Landfill Closures. We are responsible for environmental costs related to the future closures of seven ash disposal landfills. We recorded the estimated discounted costs (\$15 million as of March 31, 2009 and December 31, 2008) associated with these environmental liabilities as part of our asset retirement obligations. See note 2(q) to our consolidated financial statements in our Form 10-K.

Table of Contents

Remediation Obligations. We are responsible for environmental costs related to site contamination investigations and remediation requirements at four power plants in New Jersey. We recorded the estimated long-term liability for the remediation costs of \$8 million as of March 31, 2009 and December 31, 2008.

Conemaugh Action. In April 2007, PennEnvironment and the Sierra Club filed a citizens' suit against us in the United States District Court, Western District of Pennsylvania to enforce provisions of the water discharge permit for the Conemaugh plant, of which we are the operator and have a 16.45% interest. PennEnvironment and the Sierra Club seek civil penalties, remediation and an injunction against further violations. We are confident that the Conemaugh plant has operated and will continue to operate in material compliance with its water discharge permit, its consent order agreement with the Pennsylvania Department of Environmental Protection, and related state and federal laws. However, if PennEnvironment and the Sierra Club are successful, we could incur additional capital expenditures associated with the implementation of discharge reductions and penalties, which we do not believe would be material.

Mandalay Notice of Violation. In November 2008, the California State Water Resources Control Board - Los Angeles Region proposed a settlement payment in the amount of \$192,000 relating to alleged violations of our wastewater discharge permit for our Mandalay plant. We are reviewing the Board's proposal and we believe that there are reasonable grounds for reduction of the amount of the settlement proposed by the Board.

Global Warming. In February 2008, the Native Village of Kivalina and the City of Kivalina filed a suit in the United States District Court for the Northern District of California against us and 23 other electric generating and oil and gas companies. The lawsuit seeks damages of up to \$400 million for the cost of relocating the village allegedly because of global warming caused by the greenhouse gas emissions of the defendants. We believe this claim lacks legal merit.

(d) Other.

Excess Mitigation Credits. From January 2002 to April 2005, CenterPoint applied excess mitigation credits (EMCs) to its monthly charges to retail energy providers. The PUCT imposed these credits to facilitate the transition to competition in Texas, which had the effect of lowering the retail energy providers' monthly charges payable to CenterPoint. CenterPoint represents that the portion of those EMCs credited to us totaled \$385 million. In its stranded cost case, CenterPoint sought recovery of all EMCs credited to all retail electric providers, including us, and the PUCT ordered that relief. On appeal, the Texas Third Court of Appeals ruled that CenterPoint's stranded cost recovery should exclude EMCs credited to us for price-to-beat customers. The case is now before the Texas Supreme Court. In November 2008, CenterPoint asked us to agree to suspend any limitations periods that might exist for possible claims against us if it is ultimately not allowed to include in its stranded cost calculation EMCs credited to us. We agreed to suspend only unexpired deadlines, if any, that may apply to a CenterPoint claim relating to EMCs credited to us. Regardless of the outcome of the Texas Supreme Court proceeding, we believe that any claim by CenterPoint that we are liable to it for any EMCs credited to us lacks legal merit and is unsupported by our Master Separation Agreement with CenterPoint. In addition, CenterPoint has publicly stated that it has no legal recourse against us for any reduction in the amount of its recoverable stranded costs should EMCs credited to us be excluded.

CenterPoint Indemnity. We have agreed to indemnify CenterPoint against certain losses relating to the lawsuits described in note 11(a) under Pending Natural Gas Litigation.

Texas Franchise Audit. The state of Texas has issued assessment orders indicating an estimated tax liability of approximately \$57 million (including interest and penalties of \$19 million) relating primarily to the sourcing of receipts for 2000 through 2005. We are contesting the audit assessments related to this issue.

Sales Tax Contingencies. Some of our sales tax computations are subject to challenge under audit. As of March 31, 2009 and December 31, 2008, we have \$13 million accrued in current and long-term liabilities relating to these contingencies.

Table of Contents

Refund Contingency Related to Transportation Rates. In September 2008, Kern River Gas Transmission Company (Kern), a natural gas pipeline company, and certain of its shippers entered into a settlement agreement to which we were a party. The agreement set Kern's transportation rates as of November 2004 at 12.5% return on equity, which resulted in a refund to us of \$30 million during the fourth quarter of 2008 (recorded as a current liability). In January 2009, FERC rejected the settlement and directed Kern to recalculate the refunds based on a rate of 11.55% return on equity. Accordingly, we expect to receive an additional approximately \$4 million in 2009. If the settlement is appealed, that amount may be subject to adjustment on resolution of the appeal.

(12) Supplemental Guarantor Information

Our wholly-owned subsidiaries are either (a) full and unconditional guarantors, jointly and severally, or (b) non-guarantors of the senior secured notes.

Table of Contents*Condensed Consolidating Statements of Operations.***Three Months Ended March 31, 2009**

	RRI Energy	Guarantors	Non-Guarantors (in millions)	Adjustments (1)	Consolidated

(14) Sale of Channelview's Plant and the Bankruptcy Filings

On August 20, 2007, Channelview filed voluntary petitions in the United States Bankruptcy Court for the District of Delaware for reorganization under Chapter 11 of the Bankruptcy Code. Channelview LP filed for bankruptcy protection to prevent the lenders from exercising their remedies, including foreclosing on the project. The bankruptcy cases have been jointly administered, with Channelview managing its business in the ordinary course as debtors-in-possession subject to the supervision of the bankruptcy court.

In June 2008, the bankruptcy court approved the sale of Channelview's plant and assignment of related contracts for \$500 million. During 2008, we recognized a \$6 million gain relating to our net investment in and receivables from Channelview and incurrence of sale-related costs (classified in gains (losses) on sales of assets and emission and exchange allowances, net). As of March 31, 2009 and December 31, 2008, our net investment in and receivables from Channelview was \$59 million classified as a current asset.

The sale was completed on July 1, 2008, at which time Channelview LP paid off its secured lenders. Channelview expects to distribute funds to us relating primarily to net proceeds from the sale, pre-petition sales of fuel to Channelview, funds from operations and funds escrowed for potential indemnification claims of approximately \$50 million to \$70 million in the aggregate through the third or fourth quarters of 2009. Of this amount, \$25 million was distributed to us during 2008 and \$0 was distributed to us during the three months ended March 31, 2009.

As a result of the bankruptcies, we deconsolidated Channelview's financial results beginning August 20, 2007, and began reporting our investment in Channelview using the cost method. We will continue to account for Channelview as a cost method investment until it emerges from bankruptcy, which is expected during the third or fourth quarters of 2009. The following table contains certain combined financial information of Channelview:

March 31, December 31,

	2009		2008
		(in millions)	
Cash	\$ 21	\$	22
Funds escrowed for potential indemnification claims	40		40
Payables to RRI Energy and its subsidiaries, net	66		66

Table of Contents**(15) Discontinued Operations*****(a) Retail Energy Segment.***

General. On February 28, 2009, we entered into several agreements related to the sale of our Texas retail business to a subsidiary (the buyer) of NRG Energy, Inc. (NRG) for \$287.5 million in cash plus the value of the net working capital. We currently estimate the net working capital to be \$65 million, and we expect to receive the majority of these proceeds by June 15, 2009. The sale closed on May 1, 2009. We estimate our net proceeds will be approximately \$300 million after certain expenses. We are required to offer a portion of the net proceeds to holders of our secured notes and PEDFA bonds. See below for further discussion. This sale also includes the rights to the Reliant Energy name. Accordingly, we changed our name to RRI Energy, Inc. on May 2, 2009. In connection with the sale, the lawsuit against our former retail affiliates related to the termination of the retail working capital facility has been dismissed. See note 11(b).

In connection with the sale transaction, we entered into a two-year sublease on our corporate office building with the buyer, with sublease rental income totaling \$17 million for those two years. We also entered a one-year transition services agreement with the buyer, which includes terms and conditions for information technology services, accounting services and human resources.

Estimated Gain on Sale. We currently estimate a pre-tax gain on this sale of approximately \$1.1 billion, which is primarily due to the net derivative liability balance of \$1.1 billion (as of March 31, 2009) included in the transaction. This amount is subject to change due to various factors, such as the fair value of the net derivatives.

Use of Proceeds and Assumptions Related to Debt, Deferred Financing Costs and Interest Expense on Discontinued Operations. As required by our debt agreements, one or more offers to purchase secured notes and PEDFA bonds at par will be made with a portion of the net proceeds. We currently estimate this amount to approximate \$238 million and have classified this in discontinued operations (in long-term liabilities as of December 31, 2008 and in current liabilities as of March 31, 2009). We have assumed that of this amount, \$136 million relates to the secured notes and \$102 million relates to the PEDFA bonds. See note 7. We have also classified as discontinued operations the related deferred financing costs and interest expense on this debt. We allocated \$4 million of related interest expense during the three months ended March 31, 2009 and 2008 to discontinued operations.

Other Retail Energy Segment Discontinued Operations. We sold our C&I contracts in the PJM (excluding Illinois) and New York areas (collectively, Northeast) in December 2008. As this was a part of our retail energy segment, we have included this activity in our discontinued operations. We have also included our Illinois C&I activity in discontinued operations as it is a part of our retail energy segment and is held-for-sale.

(b) Other Discontinued Operations.

Subsequent to the sale of our New York plants in February 2006, we continue to have (a) insignificant settlements with the independent system operator and (b) property tax and sales and use tax settlements. In addition, we periodically record amounts for contingent consideration for the 2003 sale of our European energy operations. These amounts are classified as discontinued operations in our results of operations and balance sheets, as applicable.

Table of Contents**(c) All Discontinued Operations.**

The following summarizes certain financial information of the businesses reported as discontinued operations:

	Retail Energy Segment	New York Plants	European Energy	Total
Three Months Ended March 31, 2009				
Revenues	\$ 1,515 ⁽¹⁾	\$ 2	\$	\$ 1,517
Income (loss) before income tax expense/benefit ⁽²⁾	(57)	3		(54)

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following discussion should be read in conjunction with our Form 10-K. This includes non-GAAP financial measures, which are not standardized; therefore it may not be possible to compare these financial measures with other companies' non-GAAP financial measures having the same or similar names. These non-GAAP financial measures, which are discussed further in Consolidated Results of Operations, reflect an additional way of viewing aspects of our operations that, when viewed with our GAAP results, may provide a more complete understanding of factors and trends affecting our business. Investors should review our consolidated financial statements and publicly filed reports in their entirety and not rely on any single financial measure.

Business Overview

We provide electricity and energy services to wholesale customers in the competitive wholesale energy markets in the United States through our ownership and operation of and contracting for power generation capacity. We have over 14,000 MW of power generation capacity.

Our business is capital-intensive and cyclical. Earnings are significantly impacted by spark and dark spreads and capacity prices. Our margins are driven by a number of factors, including the prices of power, natural gas, coal and fuel oil, the cost of emissions, transmission, weather and global macro-economic factors, many of which are volatile. Our ability to control these factors is limited, and in some instances, the factors are beyond our control. The factor that we have the most control over is the percentage of time that our generating assets are available to run when it is economical for them to do so (commercial capacity factor). Our key earnings drivers and various factors that affect these earnings drivers include:

Economic generation (amount of time our plants are economical to operate)

- Supply and demand fundamentals

- Spark spreads (difference between power prices and natural gas fuel costs)

- Dark spreads (difference between power prices and coal fuel costs)

- Generation asset fuel type and efficiency

Commercial capacity factor (generation as a percentage of economic generation)

- Operations excellence

- Maintenance practices

- Forced and unforced outages

Unit margin

- Supply and demand fundamentals

- Commodity prices

- Generation asset fuel type and efficiency

- Hedging strategy

Other margin

- Capacity prices and payments

- Power purchase agreements sold to others

- Ancillary services

Operating costs

- Operating efficiencies

- Maintenance practices

- Generation asset fuel type

- Forced and unforced outages

Table of Contents

We are committed to delivering superior returns from competitive wholesale markets through insights into the fundamentals of our core markets and a commitment to risk-weighted investments whose return on invested capital exceeds our weighted-average cost of capital.

We are focused on the following value-creation levers:

- Establishing and maintaining a flexible capital structure to achieve a competitive cost of capital and assure financial viability in stress scenarios;

- Achieving operating and commercial excellence through

 - investing, maintaining and operating our facilities to maximize reliability and economic value over the life of the assets; and

 - proactively monitoring environmental regulations and market conditions, and responding with a disciplined investment process that focuses on return of invested capital; and

- Maintaining a largely open position to maximize profitability from a cyclical recovery.

Nearly half of our fleet produces positive earnings across most market scenarios and has sufficient environmental controls for most regulatory scenarios. We expect that very little environmental investments will be needed for this part of the fleet. We have a mid-tier of generation assets that are profitable in today's market environment, but would require improved market conditions and more stable environmental regulations before significant environmental capital expenditures would be made. We do not expect material environmental spending in 2010 or 2011 for this mid-tier group. For the period 2012 through 2020:

 - if current market conditions persist, we would expect to spend less than \$100 million;

 - if we see a long-term market with returns similar to 2007/2008 levels, we might invest \$450 million to \$700 million, including for the recent regulation of NOx in New Jersey discussed in [Recent Events](#); and

 - if long-term market conditions at levels supporting new entrants were to occur, we might invest \$1 billion to \$1.5 billion on this mid-tier group of generation assets.

A small portion of the fleet representing less than ten percent of our MWs and producing less than five percent of our operating cash flows, faces lower levels of long-term profitability. We expect to make minimal future investments in this part of the fleet.

Given the ongoing turmoil in the financial markets, the uncertainty in the overall economic outlook and continuing compressed spark and dark spreads, and declining power demand, our focus has been and continues to be on liquidity, free cash flow and financial flexibility. We are regularly assessing the impact on our business of a wide variety of economic and commodity price scenarios. We believe we have the ability to operate through a significant downturn. See [Liquidity and Capital Resources](#).

Recent Events

In this section, we present recent and potential events that have impacted or could in the future impact our results of operations, financial condition or liquidity. In addition to the events described below, a number of other factors could affect our future results of operations, financial condition or liquidity, including changes in natural gas prices, plant availability, weather and other factors (see [Risk Factors](#) in Item 1A of our Form 10-K).

Review of Strategic Alternatives Lead to Exit of Retail Business. In October 2008, our Board of Directors initiated a process to review strategic alternatives and formed a special committee to oversee this process. In late 2008, we announced our plan to wind down the C&I portion of our retail business and sold our Northeast C&I contracts. On May 1, 2009, we sold our Texas mass and C&I retail business. The sale of the retail business achieved a number of important strategic objectives for us:

 - eliminated the need for approximately \$2.0 billion of credit support and removed capital requirements associated with contingent collateral requirements, which lowered our overall risk profile; and
 - enhanced our consolidated balance sheet and improved our liquidity position.

In connection with the sale, the lawsuit related to the termination of the retail working capital facility has been dismissed. Our Board of Directors has concluded its review of strategic alternatives. See [Liquidity and Capital](#)

Resources and notes 11(b) and 15 to our interim financial statements.

Environmental Matters. On April 20, 2009, the New Jersey Department of Environmental Protection finalized regulation requiring a two-phase reduction in NO_x emissions from combustion turbines in New Jersey. Phase I requires reductions during high electricity demand days and commences on May 19, 2009, when we must file our compliance plan. We are evaluating Phase I compliance plan alternatives, including administrative processes and/or controls for reduction of NO_x emissions. If emission controls are part of the Phase I plan, the compliance date could be extended up to May 19, 2010. Phase II requires the installation of emission controls on nearly all of our New Jersey combustion turbines by May 1, 2015. If we elect to install controls, Phase II capital expenditures could increase by up to approximately \$155 million primarily during 2013 to 2015.

For a discussion of our plans for investment to comply with other existing environmental regulations, see Business Regulation Environmental Matters in Item 1 of our Form 10-K and Liquidity and Capital Resources. For a discussion of pending and contingent matters related to environmental regulations, see note 11(c) to our interim financial statements.

Table of Contents**Consolidated Results of Operations****Three Months Ended March 31, 2009 Compared to Three Months Ended March 31, 2008**

We reported \$151 million consolidated net loss, or \$0.43 loss per share, for the three months ended March 31, 2009 compared to \$377 million consolidated net income, or \$1.07 income per diluted share, for the same period in 2008.

	Three Months Ended March 31,

Net income (loss)	\$ (151)	\$ 377	\$ (528)

(1) Relates primarily to general costs, which historically were allocated to our discontinued retail energy segment.

Wholesale Energy Segment.

In analyzing the results of our wholesale energy segment and in communications with investors, analysts, rating agencies, banks and other parties, we use the non-GAAP financial measures open energy gross margin, open wholesale gross margin and open wholesale contribution margin, which exclude the items described below, as well as our wholesale energy segment profit and loss measure, contribution margin, including wholesale hedges and unrealized gains/losses on energy derivatives. Open energy gross margin, open wholesale gross margin and open wholesale contribution margin should not be relied upon without considering the GAAP financial measures.

Wholesale Hedges. We exclude the recurring effect of certain wholesale hedges that were entered into primarily to mitigate (a) certain operational and market risks at our generation assets and (b) some of the downside risk to our earnings and cash flow. These amounts primarily relate to settlements of power and fuel hedges, long-term natural gas transportation contracts and storage contracts. The wholesale hedges described above are derived based on

methodology consistent with the calculation of open energy gross margin. We also exclude the recurring effect of certain historical wholesale hedges that were entered into in order to hedge the economics of a portion of our wholesale operations. These amounts primarily relate to settlements of forward power hedges, long-term tolling purchases, long-term natural gas transportation contracts not serving our generation assets and our legacy energy trading. We believe that it is useful to us, investors, analysts and others to show our results in the absence of hedges. The impact of these hedges on our financial results is not a function of the operating performance of our generation assets, and excluding the impact better reflects the potential operating performance of our generation assets based on prevailing market conditions.

Table of Contents

Unrealized Gains/Losses on Energy Derivatives. We use derivative instruments to manage operational or market constraints and to increase the return on our generation assets. We are required to record in our consolidated statement of operations non-cash gains/losses related to future periods based on current changes in forward commodity prices for derivative instruments receiving mark-to-market accounting treatment. We refer to these gains and losses prior to settlement, as well as ineffectiveness on cash flow hedges, as unrealized gains/losses on energy derivatives. In some cases, the underlying transactions being hedged receive accrual accounting treatment, resulting in a mismatch of accounting treatments. Since the application of mark-to-market accounting has the effect of pulling forward into current periods non-cash gains/losses relating to and reversing in future delivery periods, analysis of results of operations from one period to another can be difficult. We believe that excluding these unrealized gains/losses on energy derivatives provides a more meaningful representation of our economic performance in the reporting period and is therefore useful to us, investors, analysts and others in facilitating the analysis of our results of operations from one period to another. These gains/losses are also not a function of the operating performance of our generation assets, and excluding their impact helps isolate the operating performance of our generation assets under prevailing market conditions.

Our wholesale energy segment's contribution margin, including wholesale hedges and unrealized gains/losses on energy derivatives was \$(15) million during the three months ended March 31, 2009 compared to \$217 million in the same period of 2008. The \$232 million decrease was primarily due to (a) \$115 million decrease in open wholesale gross margin due to lower spark and dark spreads as a result of lower power prices, (b) \$74 million net change in unrealized gains/losses on energy derivatives and (c) \$40 million decrease in wholesale hedges primarily due to \$24 million loss from market valuation adjustments on inventory and \$15 million loss related to payments to reduce fixed price coal commitments for future periods. See Wholesale Energy Margins below for further explanations.

Wholesale hedges		(4)		36		(40) ⁽⁶⁾
Unrealized gains (losses) on energy derivatives		(44)		30		(74) ⁽⁷⁾
Total wholesale energy contribution margin, including wholesale hedges and unrealized gains/losses on energy derivatives ⁽⁸⁾	\$	(15)	\$	217	\$	(232)

(1) Open energy gross margin is calculated using the power sales prices received by the plants less delivered spot fuel prices. This figure excludes the effects of other margin, our wholesale hedges and unrealized gains/losses on

energy
derivatives.

- (2) Decrease primarily due to lower unit margins (lower power prices).
- (3) Other margin represents power purchase agreements, capacity payments, ancillary services revenues and selective commercial hedge strategies.
- (4) Increase primarily due to higher RPM capacity payments.
- (5) Decrease primarily due to (a) reduced selective commercial hedge activities and (b) lower capacity payments.
- (6) Decrease primarily due to (a) \$49 million decline on fuel hedges, (b) \$24 million loss on market adjustments to inventory and (c) \$15 million loss primarily related to payments to

reduce fixed price coal commitments for future periods. These decreases were partially offset by (a) \$23 million gain on a hedge of generation and (b) \$15 million increase on hedges of natural gas transportation.

- (7) Decrease primarily due to (a) \$63 million in losses from changes in prices on our energy derivatives marked to market and (b) \$11 million loss due to reversal of previously recognized unrealized gains on energy derivatives which settled during the period.
- (8) Wholesale energy segment profit and loss measure.

Interest income	\$	\$ 6	\$ (6)

Income Tax Expense (Benefit). See note 9 to our interim financial statements.

Income (Loss) from Discontinued Operations. See note 15 to our interim financial statements.

Liquidity and Capital Resources

On May 1, 2009, we sold our Texas retail business for \$287.5 million in cash plus the value of the net working capital. We currently estimate the net working capital to be \$65 million. We estimate our net proceeds will be approximately \$300 million after certain expenses. We are required to offer a portion of the net proceeds to holders of our secured notes and PEDFA bonds. The offer is currently estimated at \$238 million. See [Recent Events](#) and notes 11(b) and 15 to our interim financial statements.

As of May 1, 2009, we had total available liquidity of \$2.2 billion, comprised of unused borrowing capacity, letters of credit capacity and cash and cash equivalents. During the three months ended March 31, 2009, we generated \$199 million in operating cash flows from continuing operations, including the changes in margin deposits of \$106 million (cash inflow).

See [Historical Cash Flows](#) for further detail of our cash flows from operating activities and explanation of our \$52 million use of cash from investing activities from continuing operations for the three months ended March 31, 2009.

Based on our assessment of the near term economic environment and volatility in commodity markets, we have hedged approximately 25% of our estimated 2010 power generation (based on MWh). We expect these hedges will reduce the effect of commodity volatility on our 2010 cash flows. We continue to monitor our business and hedging to provide adequate cash flows in the event of a sustained depressed environment.

See note 9 to our interim financial statements regarding an expected income tax cash payment of approximately \$60 million to \$65 million relating to California-related matters.

See [Risk Factors](#) in Item 1A and [Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources](#) in Item 7 of our Form 10-K and note 6 to our consolidated financial statements in our Form 10-K.

Table of Contents**Credit Risk**

By extending credit to our counterparties, we are exposed to credit risk. For discussion of our credit risk policy, see note 4 to our interim financial statements.

As of March 31, 2009, our derivative assets and accounts receivable from our wholesale energy counterparties, after taking into consideration netting within each contract and any master netting contracts with counterparties, are:

Credit Rating Equivalent	Exposure Before Collateral⁽¹⁾	Credit Collateral Held	Exposure Net of Collateral (dollars in millions)	Number of Counterparties >10%⁽²⁾	Net Exposure of Counterparties >10%⁽²⁾
Investment grade	\$ 110	\$ 2	\$ 108	1 ⁽³⁾	\$ 70
Non-investment grade	3		3		
No external ratings:					
Internally rated Investment grade	107		107	1 ⁽⁴⁾	102
Internally rated Non-investment grade	7	5	2		
Total	\$ 227	\$ 7	\$ 220	2	\$ 172

(1) The table excludes amounts related to contracts classified as normal purchase/normal sale and non-derivative contractual commitments that are not recorded in our consolidated balance sheets, except for any related accounts receivable. Such contractual commitments contain credit and economic risk if a counterparty

does not perform.
Nonperformance
could have a
material adverse
impact on our
future results of
operations,
financial
condition and
cash flows.

- (2) See note 4 to our interim financial statements.
- (3) This counterparty is a financial institution.
- (4) This counterparty is a power grid operator.

Off-Balance Sheet Arrangements

As of March 31, 2009, we have no off-balance sheet arrangements.

Payments of senior secured notes	\$	\$ (45)	\$ 45
Proceeds from issuance of stock	2	5	(3)
Net cash provided by (used in) financing activities	\$ 2	\$ (40)	\$ 42

New Accounting Pronouncements, Significant Accounting Policies and Critical Accounting Estimates**New Accounting Pronouncements**

See notes 1 and 3 to our interim financial statements.

Significant Accounting Policies

See note 2 to our consolidated financial statements in our Form 10-K.

Critical Accounting Estimates

See Management's Discussion and Analysis of Financial Condition and Results of Operations Accounting Estimates New Accounting Pronouncements, Significant Accounting Policies and Critical Accounting Estimates Critical Accounting Estimates in Item 7 in our Form 10-K and note 2 to our consolidated financial statements in our Form 10-K.

Table of Contents**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK****Market Risks and Risk Management**

Our primary market risk exposure relates to fluctuations in commodity prices. See **Quantitative and Qualitative Disclosures About Market Risk** in Item 7A of our Form 10-K and note 3 to our interim financial statements.

Non-Trading Market Risks**Commodity Price Risk**

As of March 31, 2009, the fair values of the contracts related to our net non-trading derivative assets and liabilities are:

Source of Fair Value	Twelve Months Ending March		2011 (in millions)	2012	2013	2014 and thereafter	Total fair value
	31, 2010	Remainder of 2010					
Prices actively quoted (Level 1)	\$ 8	\$ 2	\$	\$	\$	\$	\$ 10
Prices provided by other external sources (Level 2)	42	(16)	(35)	(13)			(22)
Prices based on models and other valuation methods (Level 3)	(146)						(146)
Total mark-to-market non-trading derivatives	\$ (96)	\$ (14)	\$ (35)	\$ (13)	\$	\$	\$ (158)

The fair values shown in the table above are subject to significant changes due to fluctuating commodity forward market prices, volatility and credit risk. Market prices assume a functioning market with an adequate number of buyers and sellers to provide liquidity. Insufficient market liquidity could significantly affect the values that could be obtained for these contracts, as well as the costs at which these contracts could be hedged. In addition, we have committed volumes under some coal contracts through 2010 and 2011 for which the contract prices are subject to negotiation prior to the beginning of each year. For further discussion of how we arrive at these fair values, see note 2(d) to our consolidated financial statements in our Form 10-K, note 5 to our interim financial statements and

Management's Discussion and Analysis of Financial Condition and Results of Operations **New Accounting Pronouncements, Significant Accounting Policies and Critical Accounting Estimates Critical Accounting Estimates** in Item 7 of our Form 10-K.

A hypothetical 10% movement in the underlying energy prices would have the following potential loss impacts on our non-trading derivatives:

As of	Market Prices	Earnings Impact	Fair Value Impact (in millions)
March 31, 2009	10% decrease	\$ (11)	\$ (11)
December 31, 2008	10% decrease	(5)	(5)

Interest Rate Risk

As of March 31, 2009 and December 31, 2008, we have no variable rate debt outstanding. We earn interest income, for which the interest rates vary, on our cash and cash equivalents and net margin deposits. During the three months ended March 31, 2009 and twelve months ended December 31, 2008, we had no variable rate interest expense and our interest income was \$1 million and \$20 million, respectively.

If interest rates decreased by one percentage point from their March 31, 2009 and December 31, 2008 levels, the fair values of our fixed rate debt from continuing operations would have increased by \$121 million and \$111 million, respectively.

Table of Contents**Trading Market Risks**

As of March 31, 2009, the fair values of the contracts related to our legacy trading and non-core asset management positions and recorded as net derivative assets and liabilities are:

Source of Fair Value	Twelve Months Ending March 31, 2010	Remainder of 2010	2011 (in millions)	2012	2013	2014 and thereafter	Total fair value
Prices actively quoted (Level 1)	\$ 25	\$ 12	\$	\$	\$	\$	\$ 37
Prices provided by other external sources (Level 2)							
Prices based on models and other valuation methods (Level 3)	(4)	(3)					(7)
Total	\$ 21	\$ 9	\$	\$	\$	\$	\$ 30

The fair values in the above table are subject to significant changes based on fluctuating market prices and conditions. See the discussion above related to non-trading derivative assets and liabilities for further information on items that impact our portfolio of trading contracts.

Our consolidated realized and unrealized margins relating to these positions are (income (loss)):

	Three Months Ended March 31,	
	2009	2008
	(in millions)	
Realized	\$ 11	\$ 7
Unrealized		(11)
Total	\$ 11	\$ (4)

An analysis of these net derivative assets and liabilities is:

	Three Months Ended March 31,	
	2009	2008
	(in millions)	
Fair value of contracts outstanding, beginning of period	\$ 30	\$ 19
Contracts realized or settled	(12) ⁽¹⁾	(10) ⁽²⁾
Changes in fair values attributable to market price and other market changes	12	2
Fair value of contracts outstanding, end of period	\$ 30	\$ 11

(1) Amount includes realized gain of \$12 million.

(2) Amount includes realized gain of \$7 million and deferred settlements of \$3 million.

The daily value-at-risk for our legacy trading and non-core asset management positions is:

	2009 ⁽¹⁾	2008
	(in millions)	
As of March 31	\$ 3	\$ 1
Three months ended March 31:		
Average	3	1
High	4	1
Low	2	

(1) The major parameters for calculating daily value-at-risk remain the same during 2009 as disclosed in Quantitative and Qualitative Disclosures About Market Risk in Item 7A of our Form 10-K.

Table of Contents**Fair Value Measurements**

We apply recurring fair value measurements to our derivatives assets and liabilities. See note 5 to our interim financial statements. Derivative instruments classified as Level 2 primarily include over-the-counter (OTC) derivative instruments such as generic swaps and forwards. The fair value measurements of these derivative assets and liabilities are based largely on unadjusted indicative quoted prices from independent brokers in active markets. An active market is considered to have transactions with sufficient frequency and volume to provide pricing information on an ongoing basis. Derivative instruments for which fair value is calculated using quoted prices that are deemed not active or that have been extrapolated from quoted prices in active markets are classified as Level 3. For certain natural gas and power contracts, we adjust seasonal or calendar year quoted prices based on historical observations to represent fair value for each month in the season or calendar year, such that the average of all months is equal to the quoted price. A derivative instrument that has a tenor that does not span the quoted period is considered an unobservable Level 3 measurement.

We evaluate and validate the inputs we use to estimate fair value by a number of methods, including validating against market published prices and daily broker quotes obtainable from multiple pricing services. For OTC derivative instruments classified as Level 2, indicative quotes obtained from brokers in liquid markets generally represent fair value of these instruments. Adjustments to the quotes are adjustments to the bid or ask price depending on the nature of the position to appropriately reflect exit pricing and are considered a Level 3 input to the fair value measurement. In less liquid markets such as coal, in which a single broker's view of the market is used to estimate fair value, we consider such inputs to be unobservable Level 3 inputs.

Fair value for energy derivatives is further derived from credit adjustments. Derivative assets are discounted using a yield curve representative of the counterparty's probability of default. The counterparty's default probability is based on a modified version of published default rates, taking 20-year historical default rates from Standard & Poor's and Moody's and adjusting them to reflect a rolling five-year average. For derivative liabilities, fair value measurement reflects the nonperformance risk related to that liability, which is our own credit risk. We derive our nonperformance risk by applying our credit default swap spread against the respective derivative liability.

To determine the fair value for Level 3 energy derivatives where there are no market quotes or external valuation services, we rely on various modeling techniques. We use a variety of valuation models, which vary in complexity depending on the contractual terms of, and inherent risks in, the instrument being valued. We use both industry-standard models as well as internally developed proprietary valuation models that consider various assumptions such as market prices for power and fuel, price shapes, volatilities and correlations as well as other relevant factors as may be deemed appropriate. There is inherent risk in valuation modeling given the complexity and volatility of energy markets. Therefore, it is possible that results in future periods may be materially different as contracts are ultimately settled.

ITEM 4. CONTROLS AND PROCEDURES**Evaluation of Disclosure Controls and Procedures**

Our management, with the participation of our chief executive officer and chief financial officer, have evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (1934 Act)) as of March 31, 2009, the end of the period covered by this Form 10-Q. Based on this evaluation, our chief executive officer and chief financial officer concluded that, as of March 31, 2009, our disclosure controls and procedures were effective.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the 1934 Act) during the period ended March 31, 2009, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
