Forward-Looking Statements

In this Quarterly Report on Form 10-Q, the term “Bancorp” refers to Cathay General Bancorp and the term “Bank” refers to Cathay Bank. The terms “Company,” “we,” “us,” and “our” refer to Bancorp and the Bank collectively.

The statements in this report include forward-looking statements within the meaning of the applicable provisions of the Private Securities Litigation Reform Act of 1995 regarding management’s beliefs, projections, and assumptions concerning future results and events. We intend such forward-looking statements to be covered by the safe harbor provision for forward-looking statements in these provisions. All statements other than statements of historical fact are “forward-looking statements” for purposes of federal and state securities laws, including statements about anticipated future operating and financial performance, financial position and liquidity, growth opportunities and growth rates, growth plans, acquisition and divestiture opportunities, business prospects, strategic alternatives, business strategies, financial expectations, regulatory and competitive outlook, investment and expenditure plans, financing needs and availability, and other similar forecasts and statements of expectation and statements of assumptions underlying any of the foregoing. Words such as “aims,” “anticipates,” “believes,” “can,” “continue,” “could,” “estimates,” “expects,” “hopes,” “is,” “optimistic,” “plans,” “potential,” “possible,” “predicts,” “projects,” “seeks,” “shall,” “should,” “will,” and variations of these and similar expressions are intended to identify these forward-looking statements. Forward-looking statements by us are based on estimates, beliefs, projections, and assumptions of management and are not guarantees of future performance. These forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from our historical experience and our present expectations or projections. Such risks and uncertainties and other factors include, but are not limited to, adverse developments or conditions related to or arising from:

U.S. and international business and economic conditions;

possible additional provisions for loan losses and charge-offs;

credit risks of lending activities and deterioration in asset or credit quality;

extensive laws and regulations and supervision that we are subject to, including potential supervisory action by bank supervisory authorities;

increased costs of compliance and other risks associated with changes in regulation, including the implementation of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”);

higher capital requirements from the implementation of the Basel III capital standards;

compliance with the Bank Secrecy Act and other money laundering statutes and regulations;

potential goodwill impairment;

liquidity risk;

fluctuations in interest rates;

risks associated with acquisitions and the expansion of our business into new markets;

inflation and deflation;

real estate market conditions and the value of real estate collateral;

environmental liabilities;

our ability to compete with larger competitors;

our ability to retain key personnel;

successful management of reputational risk;

natural disasters and geopolitical events;

general economic or business conditions in Asia, and other regions where the Bank has operations;

failures, interruptions, or security breaches of our information systems;

our ability to adapt our systems to technological changes;

risk management processes and strategies;

adverse results in legal proceedings;

certain provisions in our charter and bylaws that may affect acquisition of the Company;

changes in accounting standards or tax laws and regulations;

market disruption and volatility;

restrictions on dividends and other distributions by laws and regulations and by our regulators and our capital structure;

issuance of preferred stock;

successfully raising additional capital, if needed, and the resulting dilution of interests of holders of our common stock; and

the soundness of other financial institutions.

These and other factors are further described in Bancorp's Annual Report on Form 10-K for the year ended December 31, 2013 (Item 1A in particular), other reports and registration statements filed with the Securities and Exchange Commission ("SEC"), and other filings it makes with the SEC from time to time. Actual results in any future period may also vary from the past results discussed in this report. Given these risks and uncertainties, readers are cautioned not to place undue reliance on any forward-looking statements, which speak to the date of this report. We have no intention and undertake no obligation to update any forward-looking statement or to publicly announce any revision of any forward-looking statement to reflect future developments or events, except as required by law.

Bancorp's filings with the SEC are available at the website maintained by the SEC at <http://www.sec.gov>, or by request directed to Cathay General Bancorp, 9650 Flair Drive, El Monte, California 91731, Attention: Investor Relations (626) 279-3286.

CATHAY GENERAL BANCORP AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

1. Business

Cathay General Bancorp (“Bancorp”) is the holding company for Cathay Bank (the “Bank” and, together, the “Company”), six limited partnerships investing in affordable housing investments in which the Bank is the sole limited partner, and GBC Venture Capital, Inc. The Bancorp also owns 100% of the common stock of five statutory business trusts created for the purpose of issuing capital securities. The Bank was founded in 1962 and offers a wide range of financial services. As of March 31, 2014, the Bank operated 21 branches in Southern California, 11 branches in Northern California, nine branches in New York State, three branches in Illinois, three branches in Washington State, two branches in Texas, one branch in Massachusetts, one branch in New Jersey, one branch in Nevada, one branch in Hong Kong, and a representative office in Shanghai and in Taipei. Deposit accounts at the Hong Kong branch are not insured by the Federal Deposit Insurance Corporation (the “FDIC”).

2. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the interim periods presented are not necessarily indicative of the results that may be expected for the year ending December 31, 2014. For further information, refer to the audited consolidated financial statements and notes included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2013.

The preparation of the condensed consolidated financial statements in accordance with GAAP requires management of the Company to make a number of estimates and assumptions relating to the reported amount of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the period. Actual results could differ from those estimates. The most significant estimates subject to change are the allowance for loan losses, goodwill impairment, and other-than-temporary impairment.

3. Recent Accounting Pronouncements

In January 2014, the FASB issued ASU 2014-01, “*Investments— Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Qualified Affordable Housing Projects.*” ASU No. 2014-01 permits a reporting entity to make an accounting policy election to account for their investments in affordable housing projects using the proportional amortization method if certain conditions are met. Under the proportional amortization method, an entity amortizes the initial cost of the investment in proportion to the amount of tax credits and other tax benefits received and recognizes the net investment performance in the income statement as a component of income tax expense or benefit. ASU 2014-01 becomes effective for interim and annual periods beginning on or after December 15, 2014. The Company is evaluating whether to adopt ASU 2014-01 or to continue to apply the equity method of accounting for investments in affordable housing projects.

In January 2014, the FASB issued ASU 2014-04, “*Receivables— Trouble Debt Restructurings by Creditors.*” ASU No. 2014-04 clarifies that upon either the creditor obtaining legal title to the residential real estate property upon completion of a foreclosure or the borrower conveying all interest in the residential real estate property to the creditor to satisfy that loan through completion of a deed in lieu of foreclosure or through a similar legal agreement, a creditor is considered to have physical possession of residential real estate property collateralizing a consumer mortgage loan. A reporting entity is required to have interim and annual disclosure of both the amount of foreclosed residential real estate property held by the creditor and the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in process of foreclosure. ASU 2014-04 becomes effective for interim and annual periods beginning on or after December 15, 2014. Adoption of ASU 2014-04 is not expected to have a significant impact on the Company’s consolidated financial statements.

In April 2014, the FASB issued ASU 2014-08, “*Presentation of Financial Statements and Property, Plant, and Equipment.*” ASU No. 2014-08 defines a discontinued operation as disposal of components of an entity that represent a strategic shift that has or will have a major effect on an entity’s operations. ASU No. 2014-08 also requires a reporting entity to present the assets and liabilities of a disposal group that includes a discontinued operation separately in the asset and liability sections, respectively, of the statement of financial position for each comparative period. ASU 2014-08 becomes effective for interim and annual periods beginning on or after December 15, 2014. Adoption of ASU 2014-08 is not expected to have a significant impact on the Company’s consolidated financial statements.

4. Earnings per Share

Basic earnings per share exclude dilution and is computed by dividing net income available to common stockholders by the weighted-average number of common shares outstanding for the period. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock and resulted in the issuance of common stock that then shared in earnings.

Outstanding stock options with anti-dilutive effect were not included in the computation of diluted earnings per share. The following table sets forth earnings per common share calculations:

(Dollars in thousands, except share and per share data)	Three months ended March 31,	
	2014	2013
Net income attributable to Cathay General Bancorp	\$31,259	\$28,847
Dividends on preferred stock and noncash charge from repayment	-	(5,184)
Net income available to common stockholders	\$31,259	\$23,663
Weighted-average shares:		
Basic weighted-average number of common shares outstanding	79,595,757	78,795,564
Dilutive effect of weighted-average outstanding common share equivalents		
Warrants	298,535	-
Options	101,698	-
Restricted stock units	43,392	19,577
Diluted weighted-average number of common shares outstanding	80,039,382	78,815,141
Average stock options and warrants with anti-dilutive effect	1,985,848	5,630,813
Earnings per common share:		
Basic	\$0.39	\$0.30
Diluted	\$0.39	\$0.30

5. Stock-Based Compensation

Under the Company's equity incentive plans, directors and eligible employees may be granted incentive or non-statutory stock options and/or restricted stock units, or awarded non-vested stock. As of March 31, 2014, the only options granted by the Company were non-statutory stock options to selected Bank officers and non-employee directors at exercise prices equal to the fair market value of a share of the Company's common stock on the date of grant. Such options have a maximum ten-year term and vest in 20% annual increments (subject to early termination in certain events) except certain options granted to the Chief Executive Officer of the Company in 2005 and 2008. If such options expire or terminate without having been exercised, any shares not purchased will again be available for future grants or awards. There were no options granted during the first quarter of 2014 or the year ended December 31, 2013.

Option compensation expense was zero for the three months ended March 31, 2014, and \$129,000 for the three months ended March 31, 2013. Stock-based compensation is recognized ratably over the requisite service period for all awards.

Edgar Filing: CATHAY GENERAL BANCORP - Form 10-Q

No stock options were exercised in the first quarter of 2014 or in the first quarter of 2013. The table below summarizes stock option activity for the periods indicated:

	Shares	Weighted-average exercise price	Weighted- average remaining contractual life (in years)	Aggregate intrinsic value (in thousands)
Balance, December 31, 2013	2,812,874	\$ 31.81	1.9	\$ 2,119
Forfeited	(438,000)	28.70		
Balance, March 31, 2014	2,374,874	\$ 32.38	2.0	\$ 1,148
Exercisable, March 31, 2014	2,374,874	\$ 32.38	2.0	\$ 1,148

At March 31, 2014, 3,073,452 shares were available under the Company's 2005 Incentive Plan for future grants.

The Company granted restricted stock units for 4,812 shares at an average closing price of \$25.55 per share on March 13, 2014, and 25,037 shares at an average closing price of \$20.68 per share in 2013. The restricted stock units granted in 2014 and 2013 are scheduled to vest two years from grant date.

The following table presents information relating to the restricted stock units as of March 31, 2014:

	Units
Balance at December 31, 2013	143,433
Granted	4,812
Balance at March 31, 2014	148,245

The compensation expense related to the restricted stock units was \$1.0 million for the three months ended March 31, 2014, compared to \$609,000 for the three months ended March 31, 2013. Unrecognized stock-based compensation expense related to restricted stock units was \$6.3 million at March 31, 2014, and is expected to be recognized over the next 2.5 years. In the first quarter of 2014, the Company granted 13,690 shares to directors of the Company and recorded compensation expenses of \$350,000.

In December 2013, the Company granted performance share units in which the number of units earned is calculated based on the relative total shareholder return ("TSR") of the Company's common stock as compared to the TSR of the KBW Regional Banking Index. In addition, the Company granted performance share units in which the number of units earned is determined by comparison to the targeted earnings per share ("EPS share") for the three years ending December 31, 2016. Performance TSR restricted stock units for 119,840 shares and performance EPS restricted stock units for 116,186 shares were granted to eight executive officers. Both the performance TSR and performance EPS share units are scheduled to vest at December 31, 2016. In the first quarter of 2014, the Company did not grant any performance share units.

The following table summarizes the tax short-fall from share-based payment arrangements:

Three months
ended March
31,

(Dollars in thousands)	2014	2013
Short-fall of tax deductions in excess of grant-date fair value	\$(1,227)	\$(69)
Benefit of tax deductions on grant-date fair value	1,227	596
Total benefit of tax deductions	\$-	\$527

11

6. Investment Securities

Investment securities were \$1.58 billion at March 31, 2014, compared to \$1.59 billion at December 31, 2013. During the first quarter of 2013, due to the ongoing discussions regarding corporate income tax rates which could have a negative impact on the after-tax yields and fair values of the Company's portfolio of municipal securities, the Company determined it may sell such securities in response to market conditions. As a result, the Company reclassified its municipal securities from securities held-to-maturity to securities available-for-sale. Concurrent with this reclassification, the Company also reclassified all other securities held-to-maturity, which together with the municipal securities had an amortized cost on the date of transfer of \$722.5 million, to securities available-for-sale. At the reclassification date, a net unrealized gain was recorded in other comprehensive income for these securities totaling \$40.5 million.

The following tables reflect the amortized cost, gross unrealized gains, gross unrealized losses, and fair value of investment securities as of March 31, 2014, and December 31, 2013:

	March 31, 2014			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
	(In thousands)			
Securities Available-for-Sale				
U.S. treasury securities	\$475,139	\$ 120	\$ -	\$475,259

The amortized cost and fair value of investment securities at March 31, 2014, by contractual maturities, are shown below. Actual maturities may differ from contractual maturities because borrowers may have the right to call or repay obligations with or without call or repayment penalties.

	Securities available-for-sale	
	Amortized cost	Fair value
	(In thousands)	
Due in one year or less	\$385,848	\$385,941
Due after one year through five years	178,382	179,513
Due after five years through ten years	100,805	98,143
Due after ten years (1)	951,979	915,300
Total	\$1,617,014	\$1,578,897

(1) Equity securities are reported in this category

Proceeds from sales of mortgage-backed securities were \$123.7 million and from repayments, maturities and calls of mortgage-backed securities were \$20.5 million during the first quarter of 2014 compared to no proceeds from sales and proceeds of \$98.4 million from repayments, maturities, and calls during the same period a year ago. Proceeds from sales of other investment securities were \$16.0 million during the first quarter of 2014 compared to \$320.2 million during the same period a year ago. Proceeds from maturities and calls of other investment securities were \$112.9 million during the first quarter of 2014 compared to \$10.1 million during the same period a year ago. Gains of \$6.0 million and losses of \$67,000 were realized on sales and calls of investment securities during the first quarter of 2014 compared to gains of \$6.3 million and no losses realized during the same period a year ago.

At March 31, 2014, all of the Company's mortgage-backed securities were rated as investment grade except for one non-agency issue. Total unrealized losses of \$49.7 million from all mortgage-backed securities resulted from increases in interest rates subsequent to the date that these securities were purchased. The Company's unrealized loss on investments in corporate bonds relates to nine issues of investments in bonds of financial institutions, all of which were investment grade at the date of acquisition and as of March 31, 2014. The unrealized losses were primarily caused by the widening of credit and liquidity spreads since the dates of acquisition. The contractual terms of those investments do not permit the issuers to settle the security at a price less than the amortized cost of the investment. The Company currently does not believe it is probable that it will be unable to collect all amounts due according to the contractual terms of the investments. Therefore, it is expected that these mortgage-backed securities and corporate bonds would not be settled at a price less than the amortized cost of the investment. Because the Company does not intend to sell and would not be required to sell these investments until a recovery of fair value, which may be maturity, it does not consider its investments in these mortgaged-backed securities and corporate bonds to be other-than-temporarily impaired at March 31, 2014.

The temporarily impaired securities represent 64.4% of the fair value of investment securities as of March 31, 2014. Unrealized losses for securities with unrealized losses for less than twelve months represent 5.2%, and securities with unrealized losses for twelve months or more represent 3.5%, of the historical cost of these securities. Unrealized losses on these securities generally resulted from increases in interest rates or spreads subsequent to the date that these securities were purchased.

At March 31, 2014, management believed the impairment was temporary and, accordingly, no impairment loss has been recognized in our condensed consolidated statements of operations. The Company expects to recover the amortized cost basis of its debt securities, and has no intent to sell and will not be required to sell available-for-sale debt securities that have declined below their cost before their anticipated recovery.

The tables below show the fair value and unrealized losses of the temporarily impaired securities in our investment securities portfolio as of March 31, 2014, and December 31, 2013:

Investment securities having a carrying value of \$853.6 million at March 31, 2014, and \$926.5 million at December 31, 2013, were pledged to secure public deposits, other borrowings, treasury tax and loan, Federal Home Loan Bank advances, securities sold under agreements to repurchase, interest rate swaps, and foreign exchange transactions.

7. Loans

Most of the Company's business activity is with Asian customers located in Southern and Northern California; New York City, New York; Houston and Dallas, Texas; Seattle, Washington; Boston, Massachusetts; Chicago, Illinois; Edison, New Jersey; Las Vegas, Nevada, and Hong Kong. The Company has no specific industry concentration, and generally its loans are secured by real property or other collateral of the borrowers. Loans are generally expected to be paid off from the operating profits of the borrowers, from refinancing by other lenders, or through sale by the borrowers of the secured collateral.

The components of loans in the condensed consolidated balance sheets as of March 31, 2014, and December 31, 2013, were as follows:

	March 31, 2014	December 31, 2013
	(In thousands)	
Type of Loans:		
Commercial loans	\$2,229,880	\$2,298,724

Commercial mortgage loans	4,192,987	4,023,051
Equity lines	172,395	171,277
Real estate construction loans	253,832	221,701
Installment and other loans	11,958	14,555
Gross loans	8,302,282	8,084,563
Less:		
Allowance for loan losses	(169,138)	(173,889)
Unamortized deferred loan fees	(12,936)	(13,487)
Total loans, net	\$8,120,208	\$7,897,187

At March 31, 2014, recorded investment in impaired loans totaled \$189.3 million and was comprised of non-accrual loans of \$70.4 million and accruing troubled debt restructured ("TDR") loans of \$118.9 million. At December 31, 2013, recorded investment in impaired loans totaled \$200.8 million and was comprised of non-accrual loans of \$83.2 million and accruing TDRs of \$117.6 million. For impaired loans, the amounts previously charged off represent 15.0% at March 31, 2014, and 23.9% at December 31, 2013, of the contractual balances for impaired loans. The following table presents the average balance and interest income recognized related to impaired loans for the periods indicated:

The determination of the amount of the allowance for credit losses for impaired loans is based on management's current judgment about the credit quality of the loan portfolio and takes into consideration known relevant internal and external factors that affect collectability when determining the appropriate level for the allowance for credit losses. The nature of the process by which the Bank determines the appropriate allowance for credit losses requires the exercise of considerable judgment. This allowance evaluation process is also applied to troubled debt restructurings since they are considered to be impaired loans.

A troubled debt restructuring is a formal modification of the terms of a loan when the lender, for economic or legal reasons related to the borrower's financial difficulties, grants a concession to the borrower. The concessions may be granted in various forms, including a change in the stated interest rate, a reduction in the loan balance or accrued interest, or an extension of the maturity date that causes significant delay in payment.

TDRs on accrual status are comprised of the loans that have, pursuant to the Bank's policy, performed under the restructured terms and have demonstrated sustained performance under the modified terms for nine months before being returned to accrual status. The sustained performance considered by management pursuant to its policy includes the periods prior to the modification if the prior performance met or exceeded the modified terms. This would include cash paid by the borrower prior to the restructure to set up interest reserves.

At March 31, 2014, accruing TDRs were \$118.9 million and non-accrual TDRs were \$37.8 million compared to accruing TDRs of \$117.6 million and non-accrual TDRs of \$38.8 million at December 31, 2013. The Company allocated specific reserves of \$7.3 million to accruing TDRs and \$1.8 million to non-accrual TDRs at March 31, 2014, and \$6.9 million to accruing TDRs and \$2.2 million to non-accrual TDRs at December 31, 2013. The following tables present TDRs that were modified during the first quarter of 2014 and 2013, their specific reserve at March 31, 2014, and charge-offs during the first quarter of 2014 and 2013:

	Three months ended March 31, 2014				March 31, 2014
	No. of Contracts	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment	Charge-offs	Specific Reserve
Commercial loans	2	\$ 8,243	\$ 8,243	\$ -	\$ 1,035
Residential mortgage loans and equity lines	2	671	671	-	36
Total	4	\$ 8,914	\$ 8,914	\$ -	\$ 1,071

	Three months ended March 31, 2013				March 31, 2013

Commercial mortgage loans	2	1,175	1,175	-	10
Residential mortgage loans and equity lines	6	1,696	1,696	-	265

Total	12	\$ 6,878	\$ 6,878	\$ -	\$ 336
--------------	----	----------	----------	------	--------

Modifications of the loan terms during the first quarter of 2014 were in the form of changes in the stated interest rate, and in payment terms to interest only from principal and interest or reduction in monthly payment amount, multiple note structure, and waiver of late charges and collection fees. The length of time for which modifications involving a reduction of the stated interest rate or changes in payment terms that were documented ranged from twelve months to three years from the modification date.

We expect that the TDR loans on accruing status as of March 31, 2014, which were all performing in accordance with their restructured terms, will continue to comply with the restructured terms because of the reduced principal or interest payments on these loans. A summary of TDRs by type of concession and by type of loan, as of March 31, 2014, and December 31, 2013, is shown below:

March 31, 2014

Ending balance	\$37,797	\$49,878

A loan is considered to be in payment default once it is 60 to 90 days contractually past due under the modified terms. The Company did not have any loans that were modified as TDRs during the previous twelve months and which subsequently defaulted as of March 31, 2014.

Under the Company's internal underwriting policy, an evaluation is performed of the probability that the borrower will be in payment default on any of its debt in the foreseeable future without the modification in order to determine whether a borrower is experiencing financial difficulty.

As of March 31, 2014, there were no commitments to lend additional funds to those borrowers whose loans have been restructured, were considered impaired, or were on non-accrual status.

As part of the on-going monitoring of the credit quality of our loan portfolio, the Company utilizes a risk grading matrix to assign a risk grade to each loan. The risk rating categories can be generally described by the following grouping for non-homogeneous loans:

Pass/Watch – These loans range from minimal credit risk to lower than average, but still acceptable, credit risk.

Special Mention – Borrower is fundamentally sound and loan is currently protected but adverse trends are apparent that, if not corrected, may affect ability to repay. Primary source of loan repayment remains viable but there is increasing reliance on collateral or guarantor support.

Substandard – These loans are inadequately protected by current sound net worth, paying capacity, or pledged collateral. Well-defined weaknesses exist that could jeopardize repayment of debt. Loss may not be imminent, but if weaknesses are not corrected, there is a good possibility of some loss.

Doubtful – The possibility of loss is extremely high, but due to identifiable and important pending events (which may strengthen the loan), a loss classification is deferred until the situation is better defined.

Loss – These loans are considered uncollectible and of such little value that to continue to carry the loan as an active asset is no longer warranted.

The following tables present loan portfolio by risk rating as of March 31, 2014, and as of December 31, 2013:

	March 31, 2014				
	Pass/Watch	Special Mention	Substandard	Doubtful	Total

Edgar Filing: CATHAY GENERAL BANCORP - Form 10-Q

Installment and other loans	14,555	-	-	-	14,555
Total gross loans	\$7,504,630	\$212,222	\$360,739	\$6,972	\$8,084,563

The allowance for loan losses and the reserve for off-balance sheet credit commitments are significant estimates that can and do change based on management's process in analyzing the loan portfolio and on management's assumptions about specific borrowers, underlying collateral, and applicable economic and environmental conditions, among other factors.

The following table presents the balance in the allowance for loan losses by portfolio segment and based on impairment method as of March 31, 2014, and as of December 31, 2013:

	Real Estate Commercial Construction Loans		Commercial Mortgage Loans	Residential Mortgage Loans and Equity Lines	Installment and Other Loans	Total
	(In thousands)					
March 31, 2014						
Loans individually evaluated for impairment						
Allowance	\$4,663	\$ 3,129	\$ 6,165	\$ 538	\$ -	\$ 14,495
Balance	\$30,013	\$ 33,859	\$ 106,913	\$ 18,526	\$ -	\$ 189,311
Loans collectively evaluated for impairment						
Allowance	\$60,119	\$ 7,497	\$ 75,161	\$ 11,839	\$ 27	\$ 154,643
Balance	\$2,199,867	\$ 219,973	\$ 4,086,074	\$ 1,595,099	\$ 11,958	\$ 8,112,971

8. Commitments and Contingencies

The Company is involved in various litigation concerning transactions entered into in the normal course of business. Management, after consultation with legal counsel, does not believe that the resolution of such litigation will have a material effect upon its consolidated financial condition, results of operations, or liquidity taken as a whole. Although the Company establishes accruals for legal proceedings when information related to the loss contingencies represented by those matters indicates both that a loss is probable and that the amount of loss can be reasonably

estimated, the Company does not have accruals for all legal proceedings where there is a risk of loss. In addition, amounts accrued may not represent the ultimate loss to the Company from the legal proceedings in question. Thus, ultimate losses may be higher or lower, and possibly significantly so, than the amounts accrued for legal loss contingencies.

In the normal course of business, the Company becomes a party to financial instruments with off-balance sheet risk to meet the financing needs of its customers. These financial instruments include commitments to extend credit in the form of loans, or through commercial or standby letters of credit, and financial guarantees. These instruments represent varying degrees of exposure to risk in excess of the amounts included in the accompanying condensed consolidated balance sheets. The contractual or notional amount of these instruments indicates a level of activity associated with a particular class of financial instrument and is not a reflection of the level of expected losses, if any.

9. Borrowed Funds

Securities Sold Under Agreements to Repurchase. Securities sold under agreements to repurchase were \$700.0 million with a weighted average rate of 3.92% at March 31, 2014, compared to \$800.0 million with a weighted average rate of 3.87% at December 31, 2013. In the first quarter of 2014, the Company prepaid securities sold under agreements to repurchase totaling \$100 million with a weighted average rate of 3.50% and incurred prepayment penalties of \$3.4 million. In 2013, the Company prepaid securities sold under agreements to repurchase totaling \$450 million with a weighted average rate of 3.79% and incurred prepayment penalties of \$22.6 million. Five floating-to-fixed rate agreements totaling \$300.0 million have initial floating rates for a period of time ranging from six months to one year, with floating rates ranging from the three-month LIBOR rate minus 200 basis points to the three-month LIBOR rate minus 340 basis points. Thereafter, the rates are fixed for the remainder of the term, with interest rates ranging from 4.78% to 5.07%. After the initial floating rate term, the counter parties have the right to terminate the transaction at par at the fixed rate reset date and quarterly thereafter. Four fixed-to-floating rate agreements totaling \$200.0 million have initial fixed rates ranging from 1.00% to 3.50% with initial fixed rate terms ranging from six months to 18 months. For the remaining term, the rates float at 8% minus the three-month LIBOR rate with a maximum rate ranging from 3.50% to 3.75% and a minimum rate of 0.0%. After the initial fixed rate term, the counter parties have the right to terminate the transaction at par at the floating rate reset date and quarterly thereafter. The table below provides summary data for the \$500 million of callable securities sold under agreements to repurchase as of March 31, 2014:

(Dollars in millions)	Fixed-to-floating		Floating-to-fixed		Total
	Float Rate		Fixed Rate		
Rate type	8% minus 3 month				
Rate index	LIBOR				
Maximum rate	3.75 %	3.50 %	3.50 %		
Minimum rate	0.0 %	0.0 %	0.0 %		
No. of agreements	1	2	1	1	4
Amount	\$50.0	\$100.0	\$50.0	\$100.0	\$200.0
Weighted average rate	3.75 %	3.50 %	3.50 %	4.78 %	5.00 %
Final maturity	2014	2014	2015	2014	2017

The table below provides summary data for non-callable fixed rate securities sold under agreements to repurchase as of March 31, 2014:

Maturity	No. of Agreements	Amount (In thousands)	Weighted Average Interest Rate
1 year to 3 years	1	\$ 50,000	2.69 %
3 years to 5 years	3	150,000	2.81 %
Total	4	\$ 200,000	2.78 %

These transactions are accounted for as collateralized financing transactions and recorded at the amounts at which the securities were sold. The Company may have to provide additional collateral for the repurchase agreements, as necessary. The underlying collateral pledged for the repurchase agreements consists of U.S. Treasury securities, U.S. government agency securities, and mortgage-backed securities with a fair value of \$808.0 million as of March 31, 2014, and \$906.1 million as of December 31, 2013.

Advances from the FHLB. Advances from the FHLB were \$636.2 million with weighted average rate of 0.30% at March 31, 2014, compared to \$521.2 million with weighted average rate of 0.17% at December 31, 2013. The following relates to the outstanding advances at March 31, 2014, and December 31, 2013:

<u>Maturity</u>	March 31, 2014		December 31, 2013		
	Amount	Weighted Average Interest Rate	Amount	Weighted Average Interest Rate	
	(In thousands)	Rate	(In thousands)	Rate	
Within 90 days	\$490,000	0.11	% \$475,000	0.06	%
1 - 3 years	100,000	1.01	% -	-	
4 - 5 years	46,200	1.24	% 46,200	1.24	%
	\$636,200	0.30	% \$521,200	0.17	%

10. Income Taxes

Income tax expense totaled \$17.9 million, or an effective tax rate of 36.4%, for the first quarter of 2014, compared to an income tax expense of \$16.9 million, or an effective tax rate of 36.9%, for the same period a year ago. The effective tax rate includes the impact of the utilization of low income housing tax credits and recognition of other tax credits for both years.

As of December 31, 2013, the Company had income tax refunds receivable of \$8.6 million. These income tax receivables are included in other assets in the accompanying condensed consolidated balance sheets.

The Company's tax returns are open for audits by the Internal Revenue Service back to 2010 and by the California Franchise Tax Board back to 2003. The Company is under audit by the California Franchise Tax Board for the years 2003 to 2007. As the Company is presently under audit by a number of tax authorities, it is reasonably possible that unrecognized tax benefits could change significantly over the next twelve months. The Company does not expect that any such changes would have a material impact on its annual effective tax rate.

11. Fair Value Measurements

The Company adopted ASC Topic 820 on January 1, 2008, and determined the fair values of our financial instruments based on the following:

Level 1 - Quoted prices in active markets for identical assets or liabilities.

Level 2 - Observable prices in active markets for similar assets or liabilities; prices for identical or similar assets or liabilities in markets that are not active; directly observable market inputs for substantially the full term of the asset and liability; market inputs that are not directly observable but are derived from or corroborated by observable market data.

Level 3 – Unobservable inputs based on the Company’s own judgment about the assumptions that a market participant would use.

The Company uses the following methodologies to measure the fair value of its financial assets and liabilities on a recurring basis:

Securities Available for Sale. For certain actively traded agency preferred stocks, mutual funds, and U.S. Treasury securities, the Company measures the fair value based on quoted market prices in active exchange markets at the reporting date, a Level 1 measurement. The Company also measures securities by using quoted market prices for similar securities or dealer quotes, a Level 2 measurement. This category generally includes U.S. Government agency securities, state and municipal securities, mortgage-backed securities (“MBS”), commercial MBS, collateralized mortgage obligations, asset-backed securities, corporate bonds and trust preferred securities.

Trading Securities. The Company measures the fair value of trading securities based on quoted market prices in active exchange markets at the reporting date, a Level 1 measurement. The Company also measures the fair value for other trading securities based on quoted market prices for similar securities or dealer quotes, a Level 2 measurement.

Warrants. The Company measures the fair value of warrants based on unobservable inputs based on assumption and management judgment, a Level 3 measurement.

Currency Option and Foreign Exchange Contracts. The Company measures the fair value of currency option and foreign exchange contracts based on dealer quotes on a recurring basis, a Level 2 measurement.

The valuation techniques for the assets and liabilities valued on a nonrecurring basis are as follows:

Impaired Loans. The Company does not record loans at fair value on a recurring basis. However, from time to time, nonrecurring fair value adjustments to collateral dependent impaired loans are recorded based on either the current appraised value of the collateral, a Level 2 measurement, or management’s judgment and estimation of value reported on older appraisals that are then adjusted based on recent market trends, a Level 3 measurement.

Goodwill. The Company first assesses qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test described in ASC Topic 350. The two-step impairment testing process, if needed, begins by assigning net assets and goodwill to the two reporting units—Commercial Lending and Retail Banking. The Company then completes “step one” of the impairment test by comparing the fair value of each reporting unit (as determined based on the discussion below) with the recorded book value (or “carrying amount”) of its net assets, with goodwill included in the computation of the carrying amount. If the fair value of a reporting unit exceeds its

carrying amount, goodwill of that reporting unit is not considered impaired, and “step two” of the impairment test is not necessary. If the carrying amount of a reporting unit exceeds its fair value, step two of the impairment test is performed to determine the amount of impairment. Step two of the impairment test compares the carrying amount of the reporting unit’s goodwill to the “implied fair value” of that goodwill. The implied fair value of goodwill is computed by assuming that all assets and liabilities of the reporting unit would be adjusted to the current fair value, with the offset as an adjustment to goodwill. This adjusted goodwill balance is the implied fair value used in step two. An impairment charge is recognized for the amount by which the carrying amount of goodwill exceeds its implied fair value. In connection with the determination of fair value, certain data and information is utilized, including earnings forecasts at the reporting unit level for the next four years. Other key assumptions include terminal values based on future growth rates and discount rates for valuing the cash flows, which have inputs for the risk-free rate, market risk premium, and adjustments to reflect inherent risk and required market returns. Because of the significance of unobservable inputs in the valuation of goodwill impairment, goodwill subject to nonrecurring fair value adjustments is classified as a Level 3 measurement.

Core Deposit Intangibles. Core deposit intangibles is initially recorded at fair value based on a valuation of the core deposits acquired and is amortized over its estimated useful life to its residual value in proportion to the economic benefits consumed. The Company assesses the recoverability of this intangible asset on a nonrecurring basis using the core deposits remaining at the assessment date and the fair value of cash flows expected to be generated from the core deposits, a Level 3 measurement.

Other Real Estate Owned. Real estate acquired in the settlement of loans is initially recorded at fair value based on the appraised value of the property on the date of transfer, less estimated costs to sell, a Level 2 measurement. From time to time, nonrecurring fair value adjustments are made to other real estate owned based on the current updated appraised value of the property, also a Level 2 measurement, or management's judgment and estimation of value reported on older appraisals that are then adjusted based on recent market trends, a Level 3 measurement.

Investments in Venture Capital. The Company periodically reviews its investments in venture capital for other-than-temporary impairment on a nonrecurring basis. Investments in venture capital were written down to their fair value based on available financial reports from venture capital partnerships and management's judgment and estimation, a Level 3 measurement.

Equity Investments. The Company records equity investments at fair value on a nonrecurring basis based on quoted market prices in active exchange markets at the reporting date, a Level 1 measurement.

The following tables present the Company's hierarchy for its assets and liabilities measured at fair value on a recurring basis as of March 31, 2014, and December 31, 2013:

March 31, 2014	Fair Value Measurements Using			Total at
	Level 1	Level 2	Level 3	Fair Value
Assets	(In thousands)

Total liabilities	\$-	\$6,140	\$ -	\$6,140

The Company measured the fair value of its warrants on a recurring basis using significant unobservable inputs. The fair value of warrants was \$28,000 at March 31, 2014, compared to \$30,000 at December 31, 2013. The fair value adjustment of warrants was included in other operating income in the first quarter of 2014.

For financial assets measured at fair value on a nonrecurring basis that were still reflected in the balance sheet at March 31, 2014, the following table provides the level of valuation assumptions used to determine each adjustment, the carrying value of the related individual assets as of March 31, 2014, and December 31, 2013, and the total losses/(gains) for the periods indicated:

	March 31, 2014			Total at Fair Value	Total Losses / (Gains) Three months ended

(1) Other real estate owned balance of \$53.0 million in the consolidated balance sheet is net of estimated disposal costs.

The significant unobservable (Level 3) inputs used in the fair value measurement of collateral for collateral-dependent impaired loans was primarily based on the appraised value of collateral adjusted by estimated sales cost and commissions. The Company generally obtains new appraisal reports every nine months. As the Company's primary objective in the event of default would be to monetize the collateral to settle the outstanding balance of the loan, less marketable collateral would receive a larger discount. During the reported periods, collateral discounts ranged from 55% in the case of accounts receivable collateral to 65% in the case of inventory collateral.

The significant unobservable inputs used in the fair value measurement of loans held for sale was primarily based on the quoted price or sale price adjusted by estimated sales cost and commissions. The significant unobservable inputs used in the fair value measurement of other real estate owned (“OREO”) was primarily based on the appraised value of OREO adjusted by estimated sales cost and commissions.

The Company applies estimated sales cost and commissions ranging from 3% to 6% to collateral value of impaired loans, quoted price, or loan sale price of loans held for sale, and appraised value of OREOs.

The significant unobservable inputs in the Black-Scholes option pricing model for the fair value of warrants are their expected life ranging from 1 to 4 years, risk-free interest rate from 0.46% to 1.35%, and stock volatility from 11.4% to 16.0%.

12. Fair Value of Financial Instruments

The following methods and assumptions were used to estimate the fair value of each class of financial instruments.

Cash and Cash Equivalents. For cash and cash equivalents, the carrying amount was assumed to be a reasonable estimate of fair value, a Level 1 measurement.

Short-term Investments. For short-term investments, the carrying amount was assumed to be a reasonable estimate of fair value, a Level 1 measurement.

Securities Purchased under Agreements to Resell. The fair value of securities purchased under agreements to resell is based on dealer quotes, a Level 2 measurement.

Securities. For securities, including securities held-to-maturity, available-for-sale, and for trading, fair values were based on quoted market prices at the reporting date. If a quoted market price was not available, fair value was estimated using quoted market prices for similar securities or dealer quotes. For certain actively traded agency preferred stocks and U.S. Treasury securities, the Company measures the fair value based on quoted market prices in active exchange markets at the reporting date, a Level 1 measurement. The Company also measures securities by using quoted market prices for similar securities or dealer quotes, a Level 2 measurement. This category generally includes U.S. Government agency securities, state and municipal securities, mortgage-backed securities (“MBS”),

commercial MBS, collateralized mortgage obligations, asset-backed securities, and corporate bonds.

Loans. Fair values were estimated for portfolios of loans with similar financial characteristics. Each loan category was further segmented into fixed and adjustable rate interest terms and by performing and non-performing categories.

The fair value of performing loans was calculated by discounting scheduled cash flows through the estimated maturity using estimated market discount rates that reflect the credit and interest rate risk inherent in the loan, a Level 3 measurement.

The fair value of impaired loans was calculated based on the net realizable fair value of the collateral or the observable market price of the most recent sale or quoted price from loans held for sale. The Company does not record loans at fair value on a recurring basis. Nonrecurring fair value adjustments to collateral dependent impaired loans are recorded based on the current appraised value of the collateral, a Level 2 measurement.

Deposit Liabilities. The fair value of demand deposits, savings accounts, and certain money market deposits was assumed to be the amount payable on demand at the reporting date. The fair value of fixed-maturity certificates of deposit was estimated using the rates currently offered for deposits with similar remaining maturities, a Level 3 measurement.

Securities Sold under Agreements to Repurchase. The fair value of securities sold under agreements to repurchase is based on dealer quotes, a Level 2 measurement.

Advances from Federal Home Loan Bank (“FHLB”). The fair value of the advances is based on quotes from the FHLB to settle the advances, a Level 2 measurement.

Other Borrowings. This category includes borrowings from other financial institutions. The fair value of other borrowings is calculated by discounting scheduled cash flows through the estimated maturity using estimated market discount rates that reflect the credit and interest rate risk, a Level 3 measurement.

Long-term Debt. The fair value of long-term debt is estimated based on the quoted market prices or dealer quotes, a Level 2 measurement.

Currency Option and Foreign Exchange Contracts. The Company measures the fair value of currency option and foreign exchange contracts based on dealer quotes, a Level 2 measurement.

Interest Rate Swaps. Fair value of interest rate swaps was derived from observable market prices for similar assets, a Level 2 measurement.

Off-Balance-Sheet Financial Instruments. The fair value of commitments to extend credit, standby letters of credit, and financial guarantees written were estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counter parties. The fair value of guarantees and letters of credit was based on fees currently charged for similar agreements or on the estimated cost to terminate them or otherwise settle the obligations with the counter parties at the reporting date. The fair value of off-balance-sheet financial instruments was based on the assumptions that a market participant would use, a Level 3 measurement.

Fair value was estimated in accordance with ASC Topic 825. Fair value estimates were made at specific points in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Bank's entire holdings of a particular financial instrument. Because no market exists for a significant portion of the Bank's financial instruments, fair value estimates were based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates were subjective in nature and involved uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

The following table presents the estimated fair value of financial instruments as of March 31, 2014, and as of December 31, 2013:

	March 31, 2014		December 31, 2013	
	Carrying	Fair Value	Carrying	Fair Value
	Amount	Fair Value	Amount	Fair Value

13. Goodwill and Goodwill Impairment

The Company's policy is to assess goodwill for impairment at the reporting unit level on an annual basis or between annual assessments if a triggering event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. Impairment is the condition that exists when the carrying amount of goodwill exceeds its implied fair value.

The Company first assesses qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test described in ASC Topic 350. The two-step impairment testing process, if needed, begins by assigning net assets and goodwill to our two reporting units—Commercial Lending and Retail Banking. The Company then completes “step one” of the impairment test by comparing the fair value of each reporting unit (as determined based on the discussion below) with the recorded book value (or “carrying amount”) of its net assets, with goodwill included in the computation of the carrying amount. If the fair value of a reporting unit exceeds its carrying amount, goodwill of that reporting unit is not considered impaired, and “step two” of the impairment test is not necessary. If the carrying amount of a reporting unit exceeds its fair value, step two of the impairment test is performed to determine the amount of impairment. Step two of the impairment test compares the carrying amount of the reporting unit's goodwill to the “implied fair value” of that goodwill. The implied fair value of goodwill is computed by assuming that all assets and liabilities of the reporting unit would be adjusted to the current fair value, with the offset as an adjustment to goodwill. This adjusted goodwill balance is the implied fair value used in step two. An impairment charge is recognized for the amount by which the carrying amount of goodwill exceeds its implied fair value.

At March 31, 2014, the Company's market capitalization was above book value and there was no triggering event that required the Company to assess goodwill for impairment as of an interim date.

14. Financial Derivatives

It is the policy of the Company not to speculate on the future direction of interest rates. However, the Company enters into financial derivatives in order to seek mitigation of exposure to interest rate risks related to our interest-earning assets and interest-bearing liabilities. We believe that these transactions, when properly structured and managed, may provide a hedge against inherent interest rate risk in the Company's assets or liabilities and against risk in specific transactions. In such instances, the Company may protect its position through the purchase or sale of interest rate futures contracts for a specific cash or interest rate risk position. Other hedge transactions may be implemented using interest rate swaps, interest rate caps, floors, financial futures, forward rate agreements, and options on futures or bonds. Prior to considering any hedging activities, we seek to analyze the costs and benefits of the hedge in comparison to other viable alternative strategies. All hedges will require an assessment of basis risk and must be approved by the Bank's Investment Committee.

The Company follows ASC Topic 815 that establishes accounting and reporting standards for financial derivatives, including certain financial derivatives embedded in other contracts, and hedging activities. It requires the recognition of all financial derivatives as assets or liabilities in the Company's consolidated balance sheet and measurement of those financial derivatives at fair value. The accounting treatment of changes in fair value is dependent upon whether or not a financial derivative is designated as a hedge and, if so, the type of hedge.

The Company enters into foreign exchange forward contracts and foreign currency option contracts with various counter parties to mitigate the risk of fluctuations in foreign currency exchange rates for foreign exchange certificates of deposit, foreign exchange contracts, or foreign currency option contracts entered into with our clients. These contracts are not designated as hedging instruments and are recorded at fair value in our condensed consolidated balance sheets. Changes in the fair value of these contracts as well as the related foreign exchange certificates of deposit, foreign exchange contracts, or foreign currency option contracts are recognized immediately in net income as a component of non-interest income. Period end gross positive fair values are recorded in other assets and gross negative fair values are recorded in other liabilities. At March 31, 2014, the notional amount of option contracts totaled \$1.2 million with a net positive fair value of \$1,000. Spot and forward contracts in the total notional amount of \$270.7 million had a positive fair value of \$5.1 million at March 31, 2014. Spot and forward contracts in the total notional amount of \$227.7 million had a negative fair value of \$3.3 million at March 31, 2014. At December 31, 2013, the notional amount of option contracts totaled \$200,000 with a net positive fair value of \$83. Spot and forward contracts in the total notional amount of \$267.6 million had a positive fair value of \$6.2 million at December 31, 2013. Spot and forward contracts in the total notional amount of \$236.3 million had a negative fair value of \$6.1 million at December 31, 2013.

15. Balance Sheet Offsetting

Certain financial instruments, including resell and repurchase agreements, securities lending arrangements and derivatives, may be eligible for offset in the consolidated balance sheet and/or subject to master netting arrangements or similar agreements. The Company's securities sold with agreement to repurchase and derivative transactions with upstream financial institution counter parties are generally executed under International Swaps and Derivative Association master agreements which include "right of set-off" provisions. In such cases there is generally a legally enforceable right to offset recognized amounts and there may be an intention to settle such amounts on a net basis. Nonetheless, the Company does not generally offset such financial instruments for financial reporting purposes.

Financial instruments that are eligible for offset in the condensed consolidated balance sheets, as of March 31, 2014, and December 31, 2013, are presented in the following table:

(In thousands)	Gross Amounts of Recognized Liabilities	Gross Amounts Offset in the Balance Sheet	Net Amounts of Liabilities Presented in the Balance Sheet	Gross Amounts Not Offset in the Statement of Financial Position		
				Financial Instruments	Collateral Posted	Net Amount
March 31, 2014						
Securities sold under agreements to repurchase	\$ 700,000	\$ -	\$ 700,000	\$-	\$(700,000)	\$ -
December 31, 2013						
Securities sold under agreements to repurchase	\$ 800,000	\$ -	\$ 800,000	\$-	\$(800,000)	\$ -

16. Stockholders' Equity

Total equity was \$1.49 billion at March 31, 2014, an increase of \$35.4 million, or 2.4%, from \$1.46 billion at December 31, 2013, primarily due to increases in net income of \$31.3 million and decreases in unrealized losses on securities available for sale of \$7.6 million offset by common stock cash dividends of \$4.0 million.

The accumulated other comprehensive loss as of March 31, 2014, was all from unrealized losses on securities available-for-sale.

Activity in accumulated other comprehensive income, net of tax, and reclassification out of accumulated other comprehensive income for the three months ended March 31, 2014, was as follows:

	Three months ended March 31, 2014			Three months ended March 31, 2013		
	Pre-tax (In thousands)	Tax expense	Net-of-tax	Pre-tax (In thousands)	Tax expense	Net-of-tax
Beginning balance, net of tax			\$ (29,729)			\$ 465
Net unrealized gains arising during the period	\$ 19,140	\$ 8,047	\$ 11,094	\$ 7,947	\$ 3,343	\$ 4,604
Reclassification adjustment for net securities gains included in net income	(5,960)	(2,506)	(3,455)	(6,292)	(2,645)	(3,647)
Net unrealized gains arising from transferring securities held-to-maturity to available-for-sale	-	-	-	38,052	15,997	22,055
Total other comprehensive income	\$ 13,180	\$ 5,541	\$ 7,639	\$ 39,707	\$ 16,695	\$ 23,012
Ending balance, net of tax			\$ (22,090)			\$ 23,477

17. Subsequent Events

On April 23, 2014, the Company repurchased \$2.0 million par value of its Junior Subordinated Notes issued through Cathay Capital Trust IV which mature on September 6, 2037, at a price of 72.25% of par. The gain on repurchase of these Junior Subordinated Notes was \$555,000.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following discussion is given based on the assumption that the reader has access to and has read the Company's Annual Report on Form 10-K for the year ended December 31, 2013.

Critical Accounting Policies

The discussion and analysis of the Company's unaudited condensed consolidated balance sheets and results of operations are based upon its unaudited condensed consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these condensed consolidated financial statements requires management to make estimates and judgments that affect the

reported amounts of assets and liabilities, revenues, and expenses, and related disclosures of contingent assets and liabilities at the date of our financial statements. Actual results may differ from these estimates under different assumptions or conditions.

Management of the Company considers the following to be critical accounting policies:

Accounting for the allowance for credit losses involves significant judgments and assumptions by management, which have a material impact on the carrying value of net loans. The judgments and assumptions used by management are based on historical experience and other factors, which are believed to be reasonable under the circumstances as described in “*Allowance for Credit Losses*” under “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies” in the Company’s Annual Report on Form 10-K for the year ended December 31, 2013.

Accounting for investment securities involves significant judgments and assumptions by management, which have a material impact on the carrying value of securities and the recognition of any “other-than-temporary” impairment to our investment securities. The judgments and assumptions used by management are described in “*Investment Securities*” under “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies” in the Company’s Annual Report on Form 10-K for the year ended December 31, 2013.

Accounting for income taxes involves significant judgments and assumptions by management, which have a material impact on the amount of taxes currently payable and the income tax expense recorded in the financial statements. The judgments and assumptions used by management are described in “*Income Taxes*” under “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies” in the Company’s Annual Report on Form 10-K for the year ended December 31, 2013.

Accounting for goodwill and goodwill impairment involves significant judgments and assumptions by management, which have a material impact on the amount of goodwill and noninterest expense recorded in the financial statements. The judgments and assumptions used by management are described in “*Goodwill and Goodwill Impairment*” under “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies” in the Company’s Annual Report on Form 10-K for the year ended December 31, 2013.

Highlights

Diluted earnings per share increased 30.0% to \$0.39 per share for the first quarter of 2014 compared to \$0.30 per share for the same quarter a year ago.

Total loans increased \$217.7 million, or 2.7%, in the first quarter of 2014, to \$8.3 billion at March 31, 2014, compared to \$8.1 billion at December 31, 2013.

Quarterly Statement of Operations Review

Net Income

Net income available to common stockholders for the quarter ended March 31, 2014, was \$31.3 million, an increase of \$7.6 million, or 32.1%, compared to a net income available to common stockholders of \$23.7 million for the same quarter a year ago. Diluted earnings per share available to common stockholders for the quarter ended March 31, 2014, was \$0.39 compared to \$0.30 for the same quarter a year ago due primarily to the elimination of dividends on preferred stock, a decrease in the cost associated with debt redemption, and an increase in net interest income.

Return on average stockholders' equity was 8.53% and return on average assets was 1.19% for the quarter ended March 31, 2014, compared to a return on average stockholders' equity of 7.20% and a return on average assets of 1.12% for the same quarter a year ago.

Financial Performance

	Three months ended March 31,	
	2014	2013
Net income (in millions)	\$31.3	\$28.8
Net income available to common stockholders (in millions)	\$31.3	\$23.7
Basic earnings per common share	\$0.39	\$0.30
Diluted earnings per common share	\$0.39	\$0.30
Return on average assets	1.19 %	1.12 %
Return on average total stockholders' equity	8.53 %	7.20 %
Efficiency ratio	49.44 %	51.71 %

Net Interest Income Before Provision for Credit Losses

Net interest income before provision for credit losses increased \$2.6 million, or 3.2%, to \$82.7 million during the first quarter of 2014 compared to \$80.1 million during the same quarter a year ago. The increase was due primarily to the decrease in interest expense from securities sold under agreements to repurchase.

The net interest margin, on a fully taxable-equivalent basis, was 3.38% for the first quarter of 2014, compared to 3.30% for the fourth quarter of 2013 and 3.35% for the first quarter of 2013. The increase in the net interest margin was due mainly to the prepayment of securities sold under agreements to repurchase during the last twelve months.

For the first quarter of 2014, the yield on average interest-earning assets was 4.14%, on a fully taxable-equivalent basis, the cost of funds on average interest-bearing liabilities was 0.99%, and the cost of interest bearing deposits was 0.65%. In comparison, for the first quarter of 2013, the yield on average interest-earning assets was 4.26%, on a fully taxable-equivalent basis, the cost of funds on average interest-bearing liabilities was 1.18%, and the cost of interest bearing deposits was 0.63%. The interest spread, defined as the difference between the yield on average interest-earning assets and the cost of funds on average interest-bearing liabilities, increased seven basis points to 3.15% for the quarter ended March 31, 2014, from 3.08% for the same quarter a year ago, primarily for the reason discussed above.

The following table sets forth information concerning average interest-earning assets, average interest-bearing liabilities, and the average yields and rates paid on those assets and liabilities for the three months ended March 31, 2014, and March 31, 2013. Average outstanding amounts included in the table are daily averages.

Interest-Earning Assets and Interest-Bearing Liabilities

(Dollars in thousands)	Three months ended March 31, 2014			2013		
	Average Balance	Interest Income/ Expense	Average Yield/ Rate (1)(2)	Average Balance	Interest Income/ Expense	Average Yield/ Rate (1)(2)

Non-interest bearing liabilities:						
Demand deposits	1,445,269			1,221,552		
Other liabilities	82,954			82,940		

Edgar Filing: CATHAY GENERAL BANCORP - Form 10-Q

Total equity	1,486,205		1,632,773	
Total liabilities and equity	\$ 10,645,980		\$ 10,464,464	
Net interest spread (4)		3.15	%	3.08 %
Net interest income (4)	\$82,658			\$80,653
Net interest margin (4)		3.38	%	3.35 %

(1) Yields and amounts of interest earned include loan fees.

Non-accrual loans are included in the average balance.

(2) Calculated by dividing net interest income by average outstanding interest-earning assets.

(3) The average yield has been adjusted to a fully taxable-equivalent basis for certain securities of states and political subdivisions and other securities held using a statutory federal income tax rate of 35%.

(4) Net interest income, net interest spread, and net interest margin on interest-earning assets have been adjusted to a fully taxable-equivalent basis using a statutory federal income tax rate of 35%.

The following table summarizes the changes in interest income and interest expense attributable to changes in volume and changes in interest rates:

Taxable-Equivalent Net Interest Income — Changes Due to Rate and Volume(1)

(Dollars in thousands)	Three months ended March 31, 2014-2013		
	Increase (Decrease) in Net Interest Income Due to:		
	Changes in Volume	Changes in Rate	Total Change
Interest-earning assets:			
Loans and leases	9,020	(5,128)	3,892
Taxable securities	(2,248)	(1,962)	(4,210)
Tax-exempt securities (2)	(1,488)	-	(1,488)
Federal Home Loan Bank stock	(131)	331	200
Deposits with other banks	(64)	305	241
Total changes in interest income	5,089	(6,454)	(1,365)
Interest-bearing liabilities:			
Interest bearing demand accounts	33	5	38
Money market accounts	159	188	347
Savings accounts	6	(6)	-
Time deposits	585	200	785
Securities sold under agreements to repurchase	(4,801)	338	(4,463)
Other borrowed funds	151	(32)	119
Long-term debt	(294)	98	(196)
Total changes in interest expense	(4,161)	791	(3,370)
Changes in net interest income	\$9,250	\$(7,245)	\$2,005

(1) Changes in interest income and interest expense attributable to changes in both volume and rate have been allocated proportionately to changes due to volume and changes due to

rate.

(2) The amount of interest earned on certain securities of states and political subdivisions and other securities

held has been adjusted to a fully taxable-equivalent basis using a statutory federal income tax rate of 35%.

Provision for Credit Losses

Provision for credit losses was zero for both the first quarter of 2014 and the first quarter of 2013. The provision for credit losses was based on the review of the adequacy of the allowance for loan losses at March 31, 2014. The provision or reversal for credit losses represents the charge against or benefit toward current earnings that is determined by management, through a credit review process, as the amount needed to establish an allowance that management believes to be sufficient to absorb credit losses inherent in the Company's loan portfolio, including unfunded commitments. The following table summarizes the charge-offs and recoveries for the periods indicated:

	Three months ended		
	March 31, 2014	December 31, 2013	March 31, 2013
	(In thousands)		
Charge-offs:			
Commercial loans	\$7,226	\$ 11,045	\$2,690
Real estate loans (1)	1,776	626	1,130
Real estate- land loans	-	-	270
Total charge-offs	9,002	11,671	4,090
Recoveries:			
Commercial loans	2,017	724	955
Construction loans- residential	16	1	46
Construction loans- other	9	27	33
Real estate loans (1)	2,577	1,749	359
Real estate- land loans	3	896	9
Total recoveries	4,622	3,397	1,402
Net charge-offs	\$4,380	\$ 8,274	\$2,688

(1) Real estate loans include commercial mortgage loans, residential mortgage loans and equity lines.

Non-Interest Income

Non-interest income, which includes revenues from depository service fees, letters of credit commissions, securities gains (losses), gains (losses) on loan sales, wire transfer fees, and other sources of fee income, was \$14.6 million for the first quarter of 2014, a decrease of \$322,000, or 2.2%, compared to \$14.9 million for the first quarter of 2013. The decrease in non-interest income in the first quarter of 2014 was primarily due to decreases of \$438,000 in gains on sale of loans and of \$332,000 in gains on sale of securities partially offset by an increase of \$304,000 in commissions from wealth management.

Non-Interest Expense

Non-interest expense decreased \$1.0 million, or 2.2%, to \$48.1 million in the first quarter of 2014 compared to \$49.1 million in the same quarter a year ago. The efficiency ratio was 49.44% in the first quarter of 2014 compared to 51.71% for the same quarter a year ago.

Prepayment penalties decreased \$2.2 million to \$3.4 million in the first quarter of 2014 compared to \$5.6 million in the same quarter a year ago. The Company prepaid \$100.0 million of securities sold under agreements to repurchase in the first quarter of 2014 compared to \$100.0 million in the same quarter a year ago. Amortization of core deposit premium decreased \$1.2 million to \$172,000 in the first quarter of 2014 compared to \$1.4 million in the same quarter a year ago as a result of the full amortization of the core deposit premium from the General Bank acquisition. Other professional services expenses decreased \$661,000 due to the completion of core system conversion in 2013. Offsetting the above decreases were a \$1.0 million increase in litigation expense, a \$741,000 increase in operations of affordable housing investments primarily due to new investments, a \$598,000 increase in salaries and employee benefits primarily due to higher bonus accruals and amortization of long term incentive compensation awards, and a \$416,000 increase in FDIC and state assessments.

Income Taxes

The effective tax rate for the first quarter of 2014 was 36.4% compared to 36.9% for the first quarter of 2013. The effective tax rate includes the impact of the utilization of low income housing tax credits.

Balance Sheet Review

Assets

Total assets were \$11.29 billion at March 31, 2014, an increase of \$301.9 million, or 2.7%, from \$11.0 billion at December 31, 2013, primarily due to a \$217.7 million increase in loans and a \$103.4 million increase in short-term investments.

Investment Securities

Investment securities represented 14.0% of total assets at March 31, 2014, compared with 14.4% of total assets at December 31, 2013. The carrying value of investment securities at March 31, 2014, was \$1.58 billion compared with \$1.59 billion at December 31, 2013. Securities available-for-sale are carried at fair value and had a net unrealized loss, net of tax, of \$22.1 million at March 31, 2014, compared with a net unrealized loss, net of tax, of \$29.7 million at December 31, 2013. During the first quarter of 2013, due to the ongoing discussions regarding corporate income tax rates which could have a negative impact on the after-tax yields and fair values of the Company's portfolio of municipal securities, the Company determined it may sell such securities in response to market conditions. As a result, the Company reclassified its municipal securities from securities held-to-maturity to securities available-for-sale. Concurrent with this reclassification, the Company also reclassified all other securities held-to-maturity, which together with the municipal securities had an amortized cost on the date of transfer of \$722.5 million, to securities available-for-sale. At the reclassification date, a net unrealized gain was recorded in other comprehensive income for these securities totaling \$40.5 million.

The following tables reflect the amortized cost, gross unrealized gains, gross unrealized losses, and fair value of investment securities as of March 31, 2014, and December 31, 2013:

	March 31, 2014			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
	(In thousands)			
Securities Available-for-Sale				
U.S. treasury securities	\$475,139	\$ 120	\$ -	\$475,259

Total investment securities	\$1,637,965	\$ 18,511	\$ 69,808	\$1,586,668

For additional information, see Note 6 to the Company's condensed consolidated financial statements presented elsewhere in this report.

Investment securities having a carrying value of \$853.6 million at March 31, 2014, and \$926.5 million at December 31, 2013, were pledged to secure public deposits, other borrowings, treasury tax and loan, Federal Home Loan Bank advances, securities sold under agreements to repurchase, interest rate swaps, and foreign exchange transactions.

Loans

Gross loans were \$8.30 billion at March 31, 2014, an increase of \$217.7 million, or 2.7%, from \$8.08 billion at December 31, 2013, primarily due to increases of \$169.9 million, or 4.2%, in commercial mortgage loans, \$86.0 million, or 6.3%, in residential mortgage loans, and \$32.1 million, or 14.5%, in real estate construction loans, offset by a decrease of \$68.8 million, or 3.0%, in commercial loans. The following table sets forth the classification of loans by type, mix, and percentage change as of the dates indicated:

Type of Loans	March 31, 2014	% of Gross Loans	December 31, 2013	% of Gross Loans	% Change
	(Dollars in thousands)				
Commercial loans	\$2,229,880	26.9 %	\$2,298,724	28.50 %	-3.0 %
Residential mortgage loans	1,441,230	17.4	1,355,255	16.8	6.3
Commercial mortgage loans	4,192,987	50.5	4,023,051	49.8	4.2
Equity lines	172,395	2.1	171,277	2.2	0.7
Real estate construction loans	253,832	3.0	221,701	2.5	14.5
Installment and other loans	11,958	0.1	14,555	0.2	(17.8)
Gross loans	\$8,302,282	100 %	\$8,084,563	100 %	2.7 %
Allowance for loan losses	(169,138)		(173,889)		(2.7)
Unamortized deferred loan fees	(12,936)		(13,487)		(4.1)
Total loans, net	\$8,120,208		\$7,897,187		2.8 %

Non-performing Assets

Non-performing assets include loans past due 90 days or more and still accruing interest, non-accrual loans, and other real estate owned (“OREO”). The Company’s policy is to place loans on non-accrual status if interest and/or principal is past due 90 days or more, or in cases where management deems the full collection of principal and interest unlikely. After a loan is placed on non-accrual status, any previously accrued but unpaid interest is reversed and charged against current income and subsequent payments received are generally first applied towards the outstanding principal balance of the loan. Depending on the circumstances, management may elect to continue the accrual of interest on certain past due loans if partial payment is received and/or the loan is well collateralized and in the process of collection. The loan is generally returned to accrual status when the borrower has brought the past due principal and interest payments current and, in the opinion of management, the borrower has demonstrated the ability to make future payments of principal and interest as scheduled.

Management reviews the loan portfolio regularly for problem loans. During the ordinary course of business, management becomes aware of borrowers that may not be able to meet the contractual requirements of the loan

agreements. Such loans are placed under closer supervision with consideration given to placing the loans on non-accrual status, the need for an additional allowance for loan losses, and (if appropriate) partial or full charge-off.

The ratio of non-performing assets to total assets was 1.0% at March 31, 2014, compared to 1.3% at December 31, 2013. Total non-performing assets decreased \$20.9 million, or 15.3%, to \$116.2 million at March 31, 2014, compared to \$137.2 million at December 31, 2013, primarily due to a \$12.8 million, or 15.4%, decrease in non-accrual loans and a \$8.1 million, or 15.3%, decrease in OREO.

As a percentage of gross loans plus OREO, our non-performing assets decreased to 1.39% at March 31, 2014, from 1.69% at December 31, 2013. The non-performing portfolio loan coverage ratio, defined as the allowance for credit losses to non-performing loans, increased to 239.4% at March 31, 2014, from 208.2% at December 31, 2013.

The following table presents the changes in non-performing assets and troubled debt restructurings (TDRs) at March 31, 2014, compared to December 31, 2013, and to March 31, 2013:

(Dollars in thousands)	March 31, 2014	December 31, 2013	% Change	March 31, 2013	% Change
Non-performing assets					
Accruing loans past due 90 days or more	\$974	\$982	(1)	\$800	22
Non-accrual loans:

Total gross loans outstanding, at period-end	\$8,302,282	\$8,084,563	3	\$7,364,340	13
Allowance for loan losses to non-performing loans, at period-end	237.01	% 206.60	%	176.70	%
Allowance for loan losses to gross loans, at period-end	2.04	% 2.15	%	2.43	%
Allowance for credit losses to gross loans, at period-end	2.06	% 2.17	%	2.47	%

Non-accrual Loans

At March 31, 2014, total non-accrual loans were \$70.4 million, an decrease of \$29.9 million, or 29.8%, from \$100.3 million at March 31, 2013, and a decrease of \$12.8 million, or 15.4%, from \$83.2 million at December 31, 2013. The allowance for the collateral-dependent loans is calculated based on the difference between the outstanding loan balance and the value of the collateral as determined by recent appraisals, sales contracts, or other available market price information. The allowance for collateral-dependent loans varies from loan to loan based on the collateral coverage of the loan at the time of designation as non-performing. We continue to monitor the collateral coverage, based on recent appraisals, of these loans on a quarterly basis and adjust the allowance accordingly. Non-accrual loans

also include those troubled debt restructurings that do not qualify for accrual status.

The following tables present the type of properties securing the non-accrual portfolio loans and the type of businesses the borrowers engaged in as of the dates indicated:

	March 31, 2014		December 31, 2013	
	Real Estate (1)	Commercial	Real Estate (1)	Commercial
Type of Collateral				
Single/multi-family residence	\$ 15,624	\$ 3,039	\$ 22,370	\$ 2,030

Total	\$56,583	\$ 13,805	\$61,951	\$ 21,232

(1) Real estate includes commercial mortgage loans, real estate construction loans, residential mortgage loans and equity lines.

Other Real Estate Owned

At March 31, 2014, OREO totaled \$44.9 million, which decreased \$8.1 million, or 15.3%, compared to \$53.0 million at December 31, 2013.

Impaired Loans

A loan is considered impaired when it is probable that a creditor will be unable to collect all amounts due according to the contractual terms of the loan agreement based on current circumstances and events. The assessment for impairment occurs when and while such loans are on non-accrual as a result of delinquency status of over 90 days or receipt of information indicating that full collection of principal is doubtful, or when the loan has been restructured in a troubled debt restructuring. Those loans with a balance less than our defined selection criteria, generally a loan amount less than \$500,000 (less than \$100,000 for quarters before June 30, 2012), are treated as a homogeneous portfolio. If loans meeting the defined criteria are not collateral dependent, we measure the impairment based on the present value of the expected future cash flows discounted at the loan's effective interest rate. If loans meeting the defined criteria are collateral dependent, we measure the impairment by using the loan's observable market price or the fair value of the collateral. We obtain an appraisal to determine the amount of impairment at the date that the loan becomes impaired. The appraisals are based on "as is" or bulk sale valuations. To ensure that appraised values remain current, we generally obtain an updated appraisal every six months from qualified independent appraisers. Furthermore, if the most current appraisal is dated more than three months prior to the effective date of the impairment test, we validate the most current value with third party market data appropriate to the location and property type of the collateral. If the third party market data indicates that the value of our collateral has declined since the most recent valuation date, we adjust downward the value of the property to reflect current market conditions. If the fair value of the collateral, less cost to sell, is less than the recorded amount of the loan, we then recognize impairment by creating or adjusting an existing valuation allowance with a corresponding charge to the provision for loan losses. If an impaired loan is expected to be collected through liquidation of the collateral, the amount of impairment, excluding disposal costs, which range between 3% to 6% of the fair value, depending on the size of the impaired loan, is charged off against the allowance for loan losses. Non-accrual impaired loans, including TDRs, are not returned to accrual status unless the unpaid interest has been brought current and full repayment of the recorded

balance is expected or if the borrower has made six consecutive monthly payments of the scheduled amounts due, and TDRs are reviewed for continued impairment until they are no longer reported as TDRs.

At March 31, 2014, recorded investment in impaired loans totaled \$189.3 million and was comprised of non-accrual loans of \$70.4 million and accruing TDRs of \$118.9 million. At December 31, 2013, recorded investment in impaired loans totaled \$200.8 million and was comprised of non-accrual loans of \$83.2 million and accruing TDRs of \$117.6 million. For impaired loans, the amounts previously charged off represent 15.0% at March 31, 2014, and 23.9% at December 31, 2013, of the contractual balances for impaired loans. As of March 31, 2014, \$56.6 million, or 80.4%, of the \$70.4 million of non-accrual loans that were secured by real estate compared to \$62.0 million, or 74.5%, of the \$83.2 million of non-accrual loans that were secured by real estate at December 31, 2013. In light of changing property values in the current economic fluctuation affecting the real estate markets, the Bank has obtained current appraisals, sales contracts, or other available market price information which provide updated factors in evaluating potential loss.

At March 31, 2014, \$14.5 million of the \$169.1 million allowance for loan losses was allocated for impaired loans and \$154.6 million was allocated to the general allowance. At December 31, 2013, \$13.3 million of the \$173.9 million allowance for loan losses was allocated for impaired loans and \$160.6 million was allocated to the general allowance.

The allowance for credit losses to non-accrual loans increased to 242.8% at March 31, 2014, from 210.7% at December 31, 2013, primarily due to decreases in non-accrual loans. Non-accrual loans also include those TDRs that do not qualify for accrual status.

The following table presents impaired loans and the related allowance as of the dates indicated:

	Impaired Loans March 31, 2014			December 31, 2013

Loan Interest Reserves

In accordance with customary banking practice, construction loans and land development loans are originated where interest on the loan is disbursed from pre-established interest reserves included in the total original loan commitment. Our construction and land development loans generally include optional renewal terms after the maturity of the initial loan term. New appraisals are obtained prior to extension or renewal of these loans in part to determine the appropriate interest reserve to be established for the new loan term. Loans with interest reserves are underwritten to the same criteria, including loan to value and, if applicable, pro forma debt service coverage ratios, as loans without interest reserves. Construction loans with interest reserves are monitored on a periodic basis to gauge progress towards completion. Interest reserves are frozen if it is determined that additional draws would result in a loan to value ratio that exceeds policy maximums based on collateral property type. Our policy limits in this regard are consistent with supervisory limits and range from 65% in the case of land to 85% in the case of one to four family residential construction projects.

As of March 31, 2014, construction loans of \$187.9 million were disbursed with pre-established interest reserves of \$21.2 million compared to \$160.8 million of such loans disbursed with pre-established interest reserves of \$20.0

million at December 31, 2013. The balance for construction loans with interest reserves which have been extended was \$26.6 million with pre-established interest reserves of \$2.1 million at March 31, 2014, compared to \$20.5 million with pre-established interest reserves of \$1.8 million at December 31, 2013. Land loans of \$26.8 million were disbursed with pre-established interest reserves of \$2.3 million at March 31, 2014, compared to \$32.8 million land loans disbursed with pre-established interest reserves of \$3.0 million at December 31, 2013. The balance for land loans with interest reserves which have been extended was zero at March 31, 2014, compared to \$1.7 million land loans with pre-established interest reserves of \$53,000 at December 31, 2013.

At March 31, 2014, the Bank had no loans on non-accrual status with available interest reserves. At March 31, 2014, \$3.3 million of non-accrual residential construction loans, \$24.7 million of non-accrual non-residential construction loans, and \$32,000 of non-accrual land loans had been originated with pre-established interest reserves. At December 31, 2013, the Bank had no loans on non-accrual status with available interest reserves. At December 31, 2013, \$3.3 million of non-accrual residential construction loans, \$25.3 million of non-accrual non-residential construction loans, and \$32,000 of non-accrual land loans had been originated with pre-established interest reserves. While loans with interest reserves are typically expected to be repaid in full according to the original contractual terms, some loans require one or more extensions beyond the original maturity. Typically, these extensions are required due to construction delays, delays in sales or lease of property, or some combination of these two factors.

Loan Concentration

Most of the Company's business activities are with customers located in the predominantly Asian areas of Southern and Northern California; New York City, New York; Dallas and Houston, Texas; Seattle, Washington; Boston, Massachusetts; Chicago, Illinois; Edison, New Jersey; Las Vegas, Nevada, and Hong Kong. The Company has no specific industry concentration, and generally its loans are collateralized with real property or other pledged collateral of the borrowers. Loans are generally expected to be paid off from the operating profits of the borrowers, refinancing by another lender, or through sale by the borrowers of the collateral. There were no loan concentrations to multiple borrowers in similar activities which exceeded 10% of total loans as of March 31, 2014, or as of December 31, 2013.

The federal banking regulatory agencies issued final guidance on December 6, 2006, regarding risk management practices for financial institutions with high or increasing concentrations of commercial real estate ("CRE") loans on their balance sheets. The regulatory guidance reiterates the need for sound internal risk management practices for those institutions that have experienced rapid growth in CRE lending, have notable exposure to specific types of CRE, or are approaching or exceeding the supervisory criteria used to evaluate the CRE concentration risk, but the guidance is not to be construed as a limit for CRE exposure. The supervisory criteria are: (1) total reported loans for construction, land development, and other land represent 100% of the institution's total risk-based capital, and (2) both total CRE loans represent 300% or more of the institution's total risk-based capital and the institution's CRE loan portfolio has increased 50% or more within the last thirty-nine months. Total loans for construction, land development, and other land represented 24% of the Bank's total risk-based capital as of March 31, 2014, and 23% as of December 31, 2013. Total CRE loans represented 253% of total risk-based capital as of March 31, 2014, and 249% as of December 31, 2013 and were below the Bank's internal limit for CRE loans of 300% of total capital at both dates.

Allowance for Credit Losses

The Bank maintains the allowance for credit losses at a level that is considered adequate to absorb the estimated and known risks in the loan portfolio and off-balance sheet unfunded credit commitments. Allowance for credit losses is comprised of the allowance for loan losses and the reserve for off-balance sheet unfunded credit commitments. With

this risk management objective, the Bank's management has an established monitoring system that is designed to identify impaired and potential problem loans, and to permit periodic evaluation of impairment and the adequacy level of the allowance for credit losses in a timely manner.

In addition, the Bank's Board of Directors has established a written credit policy that includes a credit review and control system which it believes should be effective in ensuring that the Bank maintains an adequate allowance for credit losses. The Board of Directors provides oversight for the allowance evaluation process, including quarterly evaluations, and determines whether the allowance is adequate to absorb losses in the credit portfolio. The determination of the amount of the allowance for credit losses and the provision for credit losses is based on management's current judgment about the credit quality of the loan portfolio and takes into consideration known relevant internal and external factors that affect collectability when determining the appropriate level for the allowance for credit losses. The nature of the process by which the Bank determines the appropriate allowance for credit losses requires the exercise of considerable judgment. Additions to the allowance for credit losses are made by charges to the provision for credit losses. While management utilizes its best judgment based on the information available, the ultimate adequacy of the allowance is dependent upon a variety of factors beyond the Bank's control, including the performance of the Bank's loan portfolio, the economy, changes in interest rates, and the view of the regulatory authorities toward loan classifications. Identified credit exposures that are determined to be uncollectible are charged against the allowance for credit losses. Recoveries of previously charged off amounts, if any, are credited to the allowance for credit losses. A weakening of the economy or other factors that adversely affect asset quality could result in an increase in the number of delinquencies, bankruptcies, or defaults, and a higher level of non-performing assets, net charge-offs, and provision for credit losses in future periods.

The allowance for loan losses was \$169.2 million and the allowance for off-balance sheet unfunded credit commitments was \$1.7 million at March 31, 2014, which represented the amount believed by management to be sufficient to absorb credit losses inherent in the loan portfolio, including unfunded commitments. The allowance for credit losses, which is the sum of the allowances for loan losses and for off-balance sheet unfunded credit commitments, was \$170.9 million at March 31, 2014, compared to \$175.3 million at December 31, 2013, a decrease of \$4.4 million, or 2.5%. The allowance for credit losses represented 2.06% of period-end gross loans and 239.4% of non-performing loans at March 31, 2014. The comparable ratios were 2.17% of period-end gross loans and 208.2% of non-performing loans at December 31, 2013.

The following table sets forth information relating to the allowance for loan losses, charge-offs, recoveries, and the reserve for off-balance sheet credit commitments for the periods indicated:

	For the three months ended		
	March 31, 2014	March 31, 2013	December 31, 2013

Our allowance for loan losses consists of the following:

- Specific allowance: For impaired loans, we provide specific allowances for loans that are not collateral dependent based on an evaluation of the present value of the expected future cash flows discounted at the loan's effective interest rate and for loans that are collateral dependent based on the fair value of the underlying collateral determined by the most recent valuation information received, which may be adjusted based on factors such as

changes in market conditions from the time of valuation. If the measure of the impaired loan is less than the recorded investment in the loan, the deficiency will be charged off against the allowance for loan losses or, alternatively, a specific allocation will be established.

General allowance: The unclassified portfolio is segmented on a group basis. Segmentation is determined by loan type and common risk characteristics. The non-impaired loans are grouped into 23 segments: two commercial segments, ten commercial real estate segments, three residential construction segments, three non-residential construction segments, one SBA segment, one installment loans segment, one residential mortgage segment, one equity lines of credit segment, and one overdrafts segment. The allowance is provided for each segmented group based on the group's historical loan loss experience aggregated based on loan risk classifications which takes into account the current financial condition of the borrowers and guarantors, the prevailing value of the underlying collateral if collateral dependent, charge-off history, management's knowledge of the portfolio, general economic conditions, environmental factors including the trends in delinquency and non-accrual, and other significant factors, such as the national and local economy, volume and composition of the portfolio, strength of management and loan staff, underwriting standards, and concentration of credit. In addition, management reviews reports on past-due loans to ensure appropriate classification.

The table set forth below reflects management's allocation of the allowance for loan losses by loan category and the ratio of each loan category to the total average loans as of the dates indicated:

(Dollars in thousands)	March 31, 2014			December 31, 2013		
	Amount	Percentage of Loans in Each Category to Average Gross Loans		Amount	Percentage of Loans in Each Category to Average Gross Loans	
Type of Loan:						
Commercial loans	\$64,782	27.7	%	\$65,103	28.2	%
Residential mortgage loans (1)	12,377	19.2		12,005	18.6	
Commercial mortgage loans	81,326	50.0		84,753	50.7	
Real estate construction loans	10,626	2.9		11,999	2.3	
Installment and other loans	27	0.2		29	0.2	
Total	\$169,138	100	%	\$173,889	100	%

(1)
Residential mortgage loans includes equity lines.

The allowance allocated to commercial loans was \$64.8 million at March 31, 2014, compared to \$65.1 million at December 31, 2013. The decrease is due primarily to decreases in commercial loans from \$2.3 billion at December 31, 2013, to \$2.2 billion at March 31, 2014.

The allowance allocated to commercial mortgage loans decreased from \$84.8 million at December 31, 2013, to \$81.3 million at March 31, 2014, which was due primarily to decreases in loss experience from commercial mortgage loans and to the net recoveries of \$0.9 million during the first quarter of 2014. The overall allowance for total commercial mortgage loans was 1.9% at March 31, 2014, and 2.1% at December 31, 2013.

The allowance allocated for construction loans decreased to \$10.6 million, or 4.2%, of construction loans at March 31, 2014, compared to \$12.0 million, or 5.4%, of construction loans at December 31, 2013, primarily due to decreases in loss experience from construction loans which are evaluated on a collective basis.

Deposits

Total deposits were \$8.23 billion at March 31, 2014, an increase of \$251.3 million, or 3.1%, from \$7.98 billion at December 31, 2013, primarily due to a \$145.1 million, or 15.6%, increase in time deposits under \$100,000, a \$50.8 million, or 1.6%, increase in time deposits of \$100,000 or more, a \$46.9 million, or 3.3%, increase in non-interest bearing demand deposits, and a \$24.4 million, or 4.9%, increase in saving deposits, offset by a \$24.9 million, or 1.9%, decrease in money market deposits.

The following table displays the deposit mix as of the dates indicated:

	March 31, 2014	% of Total	December 31, 2013	% of Total
Deposits				
(Dollars in thousands)				
Non-interest-bearing demand deposits	\$ 1,488,720	18.1 %	\$ 1,441,858	18.1 %
NOW deposits	692,925	8.4	683,873	8.6
Money market deposits	1,261,419	15.3	1,286,338	16.1
Savings deposits	523,950	6.4	499,520	6.2
Time deposits under \$100,000	1,076,329	13.1	931,204	11.7
Time deposits of \$100,000 or more	3,189,282	38.7	3,138,512	39.3
Total deposits	\$ 8,232,625	100.0%	\$ 7,981,305	100.0%

Borrowings

Borrowings include federal funds purchased, securities sold under agreements to repurchase, funds obtained as advances from the Federal Home Loan Bank (“FHLB”) of San Francisco, and borrowings from other financial institutions.

Securities sold under agreements to repurchase were \$700.0 million with a weighted average rate of 3.92% at March 31, 2014, compared to \$800.0 million with a weighted average rate of 3.87% at December 31, 2013. In the first quarter of 2014, the Company prepaid securities sold under agreements to repurchase totaling \$100 million with a weighted average rate of 3.50% and incurred prepayment penalties of \$3.4 million. In 2013, the Company prepaid securities sold under agreements to repurchase totaling \$450 million with a weighted average rate of 3.79% and incurred prepayment penalties of \$22.6 million. Five floating-to-fixed rate agreements totaling \$300.0 million have initial floating rates for a period of time ranging from six months to one year, with floating rates ranging from the three-month LIBOR rate minus 200 basis points to the three-month LIBOR rate minus 340 basis points. Thereafter, the rates are fixed for the remainder of the term, with interest rates ranging from 4.78% to 5.07%. After the initial floating rate term, the counter parties have the right to terminate the transaction at par at the fixed rate reset date and quarterly thereafter. Four fixed-to-floating rate agreements totaling \$200.0 million have initial fixed rates ranging from 1.00% to 3.50% with initial fixed rate terms ranging from six months to 18 months. For the remaining term, the rates float at 8% minus the three-month LIBOR rate with a maximum rate ranging from 3.50% to 3.75% and a minimum rate of 0.0%. After the initial fixed rate term, the counter parties have the right to terminate the transaction at par at the floating rate reset date and quarterly thereafter. The table below provides summary data for the \$500 million of callable securities sold under agreements to repurchase as of March 31, 2014:

(Dollars in millions)	Fixed-to-floating	Floating-to-fixed	Total
Rate type	Float Rate	Fixed Rate	
Rate index			

	8% minus 3 month LIBOR					
Maximum rate	3.75 %	3.50 %	3.50 %			
Minimum rate	0.0 %	0.0 %	0.0 %			
No. of agreements	1	2	1	1	4	9
Amount	\$50.0	\$100.0	\$50.0	\$100.0	\$200.0	\$500.0
Weighted average rate	3.75 %	3.50 %	3.50 %	4.78 %	5.00 %	4.38 %
Final maturity	2014	2014	2015	2014	2017	

The table below provides summary data for non-callable fixed rate securities sold under agreements to repurchase as of March 31, 2014:

Maturity	No. of Agreements	Amount (In thousands)	Weighted Average Interest Rate	
1 year to 3 years	1	\$ 50,000	2.69	%
3 years to 5 years	3	150,000	2.81	%
Total	4	\$ 200,000	2.78	%

These transactions are accounted for as collateralized financing transactions and recorded at the amounts at which the securities were sold. The Company may have to provide additional collateral for the repurchase agreements, as necessary. The underlying collateral pledged for the repurchase agreements consists of U.S. Treasury securities, U.S. government agency securities, and mortgage-backed securities with a fair value of \$808.0 million as of March 31, 2014, and \$906.1 million as of December 31, 2013.

Advances from the FHLB were \$636.2 million with weighted average rate of 0.30% at March 31, 2014, compared to \$521.2 million with weighted average rate of 0.17% at December 31, 2013. The following relates to the outstanding advances at March 31, 2014, and December 31, 2013:

Maturity	March 31, 2014		December 31, 2013		
	Amount (In thousands)	Weighted Average Interest Rate	Amount (In thousands)	Weighted Average Interest Rate	
Within 90 days	\$490,000	0.11	% \$475,000	0.06	%
1 - 3 years	100,000	1.01	% -	-	
4 - 5 years	46,200	1.24	% 46,200	1.24	%
	\$636,200	0.30	% \$521,200	0.17	%

Long-term Debt

Long-term debt was \$121.1 million at March 31, 2014, compared to \$121.1 million at December 31, 2013. Long-term debt is comprised of Junior Subordinated Notes, which qualifies as Tier I capital for regulatory purposes, issued in connection with our various pooled trust preferred securities offerings.

Off-Balance-Sheet Arrangements and Contractual Obligations

The following table summarizes the Company's contractual obligations to make future payments as of March 31, 2014. Payments for deposits and borrowings do not include interest. Payments related to leases are based on actual payments specified in the underlying contracts.

	Payment Due by Period				Total
	1 year or less	More than 1 year but less than 3 years	3 years or more but less than 5 years	5 years or more	
	(In thousands)				
Contractual obligations:					
Deposits with stated maturity dates	\$3,560,858	\$457,579	\$247,163	\$11	\$4,265,611
Securities sold under agreements to repurchase (1)	300,000	200,000	-	-	500,000
Securities sold under agreements to repurchase (2)	-	50,000	150,000	-	200,000
Advances from the Federal Home Loan Bank	490,000	100,000	46,200	-	636,200
Other borrowings	-	-	-	19,025	19,025
Long-term debt	-	-	-	121,136	121,136
Operating leases	5,826	7,741	3,858	3,276	20,701
Total contractual obligations and other commitments	\$4,306,685	\$665,320	\$647,221	\$143,448	\$5,762,674

(1) These repurchase agreements have a final maturity of 5-years, 7-years and 10-years from origination date but are callable on a quarterly basis after six months, one year, or 18 months for

the 7-year
term and one
year for the
5-year and
10-year
terms.

(2) These
repurchase
agreements
are
non-callable.

In the normal course of business, we enter into various transactions, which, in accordance with U.S. generally accepted accounting principles, are not included in our consolidated balance sheets. We enter into these transactions to meet the financing needs of our customers. These transactions include commitments to extend credit and standby letters of credit, which involve, to varying degrees, elements of credit risk and interest rate risk in excess of the amounts recognized in the condensed consolidated balance sheets.

Loan Commitments. We enter into contractual commitments to extend credit, normally with fixed expiration dates or termination clauses, at specified rates and for specific purposes. Substantially all of our commitments to extend credit are contingent upon customers maintaining specific credit standards at the time of loan funding. We minimize our exposure to loss under these commitments by subjecting them to credit approval and monitoring procedures. Management assesses the credit risk associated with certain commitments to extend credit in determining the level of the allowance for credit losses.

Standby Letters of Credit. Standby letters of credit are written conditional commitments issued by us to secure the obligations of a customer to a third party. In the event the customer does not perform in accordance with the terms of an agreement with the third party, we would be required to fund the commitment. The maximum potential amount of future payments we could be required to make is represented by the contractual amount of the commitment. If the commitment is funded, we would be entitled to seek reimbursement from the customer. Our policies generally require that standby letter of credit arrangements contain security and debt covenants similar to those contained in loan agreements.

Capital Resources

Total equity was \$1.49 billion at March 31, 2014, an increase of \$35.4 million, or 2.4%, from \$1.46 billion at December 31, 2013, primarily due to increases in net income of \$31.3 million and decreases in unrealized losses on securities available for sale of \$7.6 million offset by common stock cash dividends of \$4.0 million.

The following table summarizes changes in total equity for the three months ended March 31, 2014:

(In thousands)	Three months ended March 31, 2014
Net income	\$31,259
Stock issued to directors	350
Proceeds from shares issued through the Dividend Reinvestment Plan	386
Net tax short-fall from stock-based compensation expense	(1,227)
Share-based compensation	1,003
Other comprehensive income	7,639
Cash dividends paid to common stockholders	(3,980)
Net increase in total equity	\$35,430

Capital Adequacy Review

Management seeks to maintain the Company's capital at a level sufficient to support future growth, protect depositors and stockholders, and comply with various regulatory requirements.

Both the Bancorp's and the Bank's regulatory capital continued to exceed the regulatory minimum requirements as of March 31, 2014. In addition, the capital ratios of the Bank place it in the "well capitalized" category which is defined as institutions with a Tier 1 risk-based capital ratio equal to or greater than 6.0%, total risk-based capital ratio equal to or greater than 10.0%, and Tier 1 leverage capital ratio equal to or greater than 5.0%.

Edgar Filing: CATHAY GENERAL BANCORP - Form 10-Q

The following table presents Bancorp's and the Bank's capital and leverage ratios as of March 31, 2014, and December 31, 2013:

(Dollars in thousands)	Cathay General Bancorp				Cathay Bank

Total average assets (1)	\$10,366,258		\$10,328,952		\$10,364,053		\$10,320,368	

(1) The quarterly total average assets reflect all debt securities at amortized cost, equity security with readily determinable fair values at the lower of cost or fair value, and equity securities

without
readily
determinable
fair values at
historical
cost.

In July 2013, the federal bank regulatory agencies adopted final regulations which revised their risk-based and leverage capital requirements for banking organizations to meet requirements of the Dodd-Frank Act and to implement international agreements reached by the Basel Committee on Banking Supervision that were intended to improve both the quality and quantity of banking organizations' capital ("Basel III"). Although many of the rules contained in these final regulations are applicable only to large, internationally active banks, some of them will apply on a phased in basis to all banking organizations, including the Company and the Bank.

The following are among the new requirements that will be phased in beginning January 1, 2015:

- An increase in the minimum Tier 1 capital ratio from 4.00% to 6.00% of risk-weighted assets.
- A new category and a required 4.50% of risk-weighted assets ratio is established for "common equity Tier 1" as a subset of Tier 1 capital limited to common equity.
- A minimum non-risk-based leverage ratio is set at 4.00% eliminating a 3.00% exception for higher rated banks.
- Changes in the permitted composition of Tier 1 capital to exclude trust preferred securities, mortgage servicing rights and certain deferred tax assets and include unrealized gains and losses on available for sale debt and equity securities.
- A new additional capital conservation buffer of 2.5% of risk weighted assets over each of the required capital ratios that will be phased in from 2016 to 2019 must be met to avoid limitations in the ability of the Bank to pay dividends, repurchase shares or pay discretionary bonuses.
- The risk-weights of certain assets for purposes of calculating the risk-based capital ratios are changed for high volatility commercial real estate acquisition, development and construction loans, certain past due non-residential mortgage loans and certain mortgage-backed and other securities exposures.
- An additional "countercyclical capital buffer" is required for larger and more complex institutions.

Management believes that, as of March 31, 2014, Bancorp and the Bank would meet all capital adequacy requirements under the Basel III rules on a fully phased-in basis as if such requirements were currently in effect.

Dividend Policy

Holders of common stock are entitled to dividends as and when declared by our Board of Directors out of funds legally available for the payment of dividends. Although we have historically paid cash dividends on our common stock, we are not required to do so. The amount of future dividends will depend on our earnings, financial condition, capital requirements and other factors, and will be determined by our Board of Directors. As discussed in “*Regulatory Matters*” below, we are subject to Federal Reserve supervisory policies, including informing and consulting with the Federal Reserve Bank of San Francisco sufficiently in advance of any planned capital actions (i.e. increased dividend payments or stock redemptions) and we have notified the Federal Reserve Bank of San Francisco that our Board of Directors expects to increase the common stock dividend to \$.07 per share during the second quarter. There can be no assurance that our regulators will not object to any capital actions. The terms of our Junior Subordinated Notes also limit our ability to pay dividends.

The Company declared cash dividends of \$.05 per share on 79,595,528 shares outstanding on March 3, 2014, for distribution to holders of our common stock on March 13, 2014. Total cash dividends of \$4.0 million were paid during the first quarter of 2014.

Country Risk Exposures

The Company’s total assets were \$11.3 billion and total foreign country risk net exposures were \$923.7 million at March 31, 2014. Total foreign country risk net exposures at March 31, 2014, were comprised primarily of \$372.7 million from Hong Kong, \$181.3 million from England, \$143.7 million from China, \$44.2 million from France, \$39.6 million from Switzerland, \$30.1 million from Australia, \$28.8 million from Korea, \$21.2 million from Taiwan, \$19.4 million from Japan, \$17.1 million from the Philippines, \$14.1 million from Canada, and \$9.5 million from Singapore. Risk is determined based on location of the borrowers, issuers, and counter parties.

All foreign country risk net exposures were to non-sovereign counter parties except \$9.2 million due from the Hong Kong Monetary Authority at March 31, 2014.

Unfunded loan exposures were \$79.3 million at March 31, 2014, and were comprised primarily of \$43.9 million unfunded loans to borrowers of Hong Kong residence, \$22.2 million unfunded loans to two financial institution in

China, \$5.6 million unfunded loans to borrowers of Taiwan residence, \$4.3 million unfunded loans to borrowers of China residence, and \$2.7 million unfunded loans to borrowers of Philippines residence.

Financial Derivatives

It is the policy of the Company not to speculate on the future direction of interest rates. However, the Company enters into financial derivatives in order to seek mitigation of exposure to interest rate risks related to our interest-earning assets and interest-bearing liabilities. We believe that these transactions, when properly structured and managed, may provide a hedge against inherent interest rate risk in the Company's assets or liabilities and against risk in specific transactions. In such instances, the Company may protect its position through the purchase or sale of interest rate futures contracts for a specific cash or interest rate risk position. Other hedge transactions may be implemented using interest rate swaps, interest rate caps, floors, financial futures, forward rate agreements, and options on futures or bonds. Prior to considering any hedging activities, we seek to analyze the costs and benefits of the hedge in comparison to other viable alternative strategies. All hedges will require an assessment of basis risk and must be approved by the Bank's Investment Committee.

The Company follows ASC Topic 815 which established accounting and reporting standards for financial derivatives, including certain financial derivatives embedded in other contracts, and hedging activities. It requires the recognition of all financial derivatives as assets or liabilities in the Company's condensed consolidated balance sheets and measurement of those financial derivatives at fair value. The accounting treatment of changes in fair value is dependent upon whether or not a financial derivative is designated as a hedge and, if so, the type of hedge.

The Company enters into foreign exchange forward contracts and foreign currency option contracts with various counter parties to mitigate the risk of fluctuations in foreign currency exchange rates for foreign exchange certificates of deposit, foreign exchange contracts, or foreign currency option contracts entered into with our clients. These contracts are not designated as hedging instruments and are recorded at fair value in our condensed consolidated balance sheets. Changes in the fair value of these contracts as well as the related foreign exchange certificates of deposit, foreign exchange contracts, or foreign currency option contracts are recognized immediately in net income as a component of non-interest income. Period end gross positive fair values are recorded in other assets and gross negative fair values are recorded in other liabilities. At March 31, 2014, the notional amount of option contracts totaled \$1.2 million with a net positive fair value of \$1,000. Spot and forward contracts in the total notional amount of \$270.7 million had a positive fair value of \$5.1 million at March 31, 2014. Spot and forward contracts in the total notional amount of \$227.7 million had a negative fair value of \$3.3 million at March 31, 2014. At December 31, 2013, the notional amount of option contracts totaled \$200,000 with a net positive fair value of \$83. Spot and forward contracts in the total notional amount of \$267.6 million had a positive fair value of \$6.2 million at December 31, 2013. Spot and forward contracts in the total notional amount of \$236.3 million had a negative fair value of \$6.1 million at December 31, 2013.

Liquidity

Liquidity is our ability to maintain sufficient cash flow to meet maturing financial obligations and customer credit needs, and to take advantage of investment opportunities as they are presented in the marketplace. Our principal sources of liquidity are growth in deposits, proceeds from the maturity or sale of securities and other financial instruments, repayments from securities and loans, federal funds purchased, securities sold under agreements to repurchase, and advances from the FHLB. At March 31, 2014, our liquidity ratio (defined as net cash plus short-term and marketable securities to net deposits and short-term liabilities) was 16.5% compared to 15.3% at December 31, 2013.

The Bank is a shareholder of the FHLB of San Francisco, enabling it to have access to lower cost FHLB financing when necessary. As of March 31, 2014, the Bank had an approved credit line with the FHLB totaling \$3.46 billion. Advances from the FHLB were \$636.2 million at March 31, 2014. The Bank expects to be able to access this source of funding, if required, in the near term. The Bank has pledged a portion of its commercial loans to the Federal Reserve Bank's Discount Window under the Borrower-in-Custody program to secure these borrowings. At March 31, 2014, the borrowing capacity under the Borrower-in-Custody program was \$92.7 million.

Liquidity can also be provided through the sale of liquid assets, which consist of federal funds sold, securities sold under agreements to repurchase, and unpledged investment securities. At March 31, 2014, investment securities and trading securities totaled \$1.58 billion, with \$853.6 million pledged as collateral for borrowings and other commitments. The remaining \$725.3 million was available as additional liquidity or to be pledged as collateral for additional borrowings.

Approximately 83.5% of the Company's time deposits mature within one year or less as of March 31, 2014. Management anticipates that there may be some outflow of these deposits upon maturity due to the keen competition in the Bank's marketplace. However, based on our historical run-off experience, we expect that the outflow will be minimal and can be replenished through our normal growth in deposits. Management believes the above-mentioned sources will provide adequate liquidity to the Bank to meet its daily operating needs.

The business activities of Bancorp consist primarily of the operation of the Bank and limited activities in other investments. Under the memorandum of understanding Bancorp entered into with the Federal Reserve Bank of San Francisco ("FRB SF"), which was terminated effective April 5, 2013, we agreed that we would not, without the FRB SF's prior written approval, receive any dividends or any other form of payment or distribution representing a reduction of capital from the Bank. The Bank paid dividends to Bancorp totaling \$138.0 million during 2013. The Bank did not pay dividends to Bancorp in the first quarter of 2014.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We use a net interest income simulation model to measure the extent of the differences in the behavior of the lending and funding rates to changing interest rates, so as to project future earnings or market values under alternative interest rate scenarios. Interest rate risk arises primarily through the Company's traditional business activities of extending loans and accepting deposits. Many factors, including economic and financial conditions, movements in interest rates, and consumer preferences affect the spread between interest earned on assets and interest paid on liabilities. The net interest income simulation model is designed to measure the volatility of net interest income and net portfolio value, defined as net present value of assets and liabilities, under immediate rising or falling interest rate scenarios in 100 basis point increments.

Although the modeling is very helpful in managing interest rate risk, it does require significant assumptions for the projection of loan prepayment rates on mortgage related assets, loan volumes and pricing, and deposit and borrowing volume and pricing, that might prove inaccurate. Because these assumptions are inherently uncertain, the model cannot precisely estimate net interest income, or precisely predict the effect of higher or lower interest rates on net interest income. Actual results will differ from simulated results due to the timing, magnitude, and frequency of interest rate changes, the differences between actual experience and the assumed volume, changes in market conditions, and management strategies, among other factors. The Company monitors its interest rate sensitivity and attempts to reduce the risk of a significant decrease in net interest income caused by a change in interest rates.

We have established a tolerance level in our policy to define and limit net interest income volatility to a change of plus or minus 15% when the hypothetical rate change is plus or minus 200 basis points. When the net interest rate simulation projects that our tolerance level will be met or exceeded, we seek corrective action after considering, among other things, market conditions, customer reaction, and the estimated impact on profitability. The Company's simulation model also projects the net economic value of our portfolio of assets and liabilities. We have established a tolerance level in our policy to value the net economic value of our portfolio of assets and liabilities to a change of plus or minus 15% when the hypothetical rate change is plus or minus 200 basis points.

The table below shows the estimated impact of changes in interest rate on net interest income and market value of equity as of March 31, 2014:

	Net Interest Income	Market Value of Equity
Change in Interest Rate (Basis Points)	Volatility (1)	Volatility (2)
+200	11.1	(6.7)
+100	5.7	(2.9)
-100	(1.0)	0.0
-200	(1.6)	1.6

(1) The percentage change in this column represents net interest income of the Company for 12 months in a stable interest rate environment versus the net interest

income in the various rate scenarios.
(2) The percentage change in this column represents net portfolio value of the Company in a stable interest rate environment versus the net portfolio value in the various rate scenarios.

ITEM 4. CONTROLS AND PROCEDURES.

The Company's principal executive officer and principal financial officer have evaluated the effectiveness of the Company's "disclosure controls and procedures," as such term is defined in Rule 13a-15(e) or 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), as of the end of the period covered by this quarterly report. Based upon their evaluation, the principal executive officer and principal financial officer have concluded that the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in the reports filed or submitted by it under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and include controls and procedures designed to ensure that information required to be disclosed by the Company in such reports is accumulated and communicated to the Company's management, including its principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

There has not been any change in our internal control over financial reporting that occurred during the first fiscal quarter of 2014 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II - OTHER INFORMATION**ITEM 1. LEGAL PROCEEDINGS.**

Bancorp's wholly-owned subsidiary, Cathay Bank, is a party to ordinary routine litigation from time to time incidental to various aspects of its operations. Management does not believe that any such litigation is expected to have a material adverse impact on the Company's consolidated financial condition or results of operations.

ITEM 1A. RISK FACTORS.

There is no material change in the risk factors as previously disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2013, in response to Item 1A in Part I of Form 10-K.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.**ISSUER PURCHASES OF EQUITY SECURITIES**

Period	(a) Total Number of Shares (or Units) Purchased	(b) Average Price Paid per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs
Month #1 (January 1, 2014 - January 31, 2014)	0	\$0	0	622,500
Month #2 (February 1, 2014 - February 28, 2014)	0	\$0	0	622,500
Month #3 (March 1, 2014 - 0 March 31, 2014)	0	\$0	0	622,500
Total	0	\$0	0	622,500

For a discussion of limitations on the payment of dividends, see “*Dividend Policy*,” and “*Liquidity*” under Part I—Item 2—“Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

ITEM 3. DEFAULTS UPON SENIOR SECURITIES.

Not applicable.

ITEM 4. MINE SAFETY DISCLOSURES.

Not applicable.

ITEM 5. OTHER INFORMATION.

None.

ITEM 6. EXHIBITS.
