### CAUTION REGARDING FORWARD-LOOKING STATEMENTS

This report contains certain forward-looking statements within the meaning of the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934, as amended. Forward-looking statements include statements regarding the goals, beliefs, plans or current expectations of First Trust Advisors L.P. ("First Trust" or the "Advisor") and/or Stonebridge Advisors LLC ("Stonebridge" or the "Sub-Advisor") and their respective representatives, taking into account the information currently available to them. Forward-looking statements include all statements that do not relate solely to current or historical fact. For example, forward-looking statements include the use of words such as "anticipate," "estimate," "intend," "expect," "believe," "plan," "may," "should," "would" or other words that convey uncertainty of future events or outcomes.

Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of First Trust Intermediate Duration Preferred & Income Fund (the "Fund") to be

## Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSRS

materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. When evaluating the information included in this report, you are cautioned not to place undue reliance on these forward-looking statements, which reflect the judgment of the Advisor and its representatives only as of the date hereof. We undertake no obligation to publicly revise or update these forward-looking statements to reflect events and circumstances that arise after the date hereof.

### PERFORMANCE AND RISK DISCLOSURE

There is no assurance that the Fund will achieve its investment objectives. The Fund is subject to market risk, which is the possibility that the market values of securities owned by the Fund will decline and that the value of the Fund shares may therefore be less than what you paid for them. Accordingly, you can lose money by investing in the Fund. See "Risk Considerations" in the Additional Information section of this report for a discussion of certain other risks of investing in the Fund.

Performance data quoted represents past performance, which is no guarantee of future results, and current performance may be lower or higher than the figures shown. For the most recent month-end performance figures, please visit <http://www.ftportfolios.com> or speak with your financial advisor. Investment returns, net asset value and common share price will fluctuate and Fund shares, when sold, may be worth more or less than their original cost.

### HOW TO READ THIS REPORT

This report contains information that may help you evaluate your investment in the Fund. It includes details about the Fund and presents data and analysis that provide insight into the Fund's performance and investment approach.

By reading the portfolio commentary by the portfolio management team of the Fund, you may obtain an understanding of how the market environment affected the Fund's performance. The statistical information that follows may help you understand the Fund's performance compared to that of relevant market benchmarks.

It is important to keep in mind that the opinions expressed by personnel of the Sub-Advisor are just that: informed opinions. They should not be considered to be promises or advice. The opinions, like the statistics, cover the period through the date on the cover of this report. The material risks of investing in the Fund are spelled out in the prospectus, the statement of additional information, this report and other Fund regulatory filings.

FIRST TRUST INTERMEDIATE DURATION PREFERRED & INCOME FUND (FPF)  
SEMI-ANNUAL LETTER FROM THE CHAIRMAN AND CEO  
APRIL 30, 2015

Dear Shareholders:

Thank you for your investment in First Trust Intermediate Duration Preferred & Income Fund.

First Trust Advisors L.P. ("First Trust") is pleased to provide you with the

## Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSRS

semi-annual report which contains detailed information about your investment for the six months ended April 30, 2015, including a market overview and a performance analysis for the period. We encourage you to read this report and discuss it with your financial advisor.

U.S. markets, fueled by accelerating growth and an accommodating Federal Reserve, enjoyed a prosperous year in 2014. However, for the six months covered by this report, some economic and global factors, including the continued conflict in the Middle East and a sharp decline in oil prices, created volatility in the U.S. and global markets. Another factor that has impacted markets is the fact that many economists are predicting the Federal Reserve will begin to raise interest rates this year.

As I have written previously, First Trust believes investors should maintain perspective about the markets and have realistic expectations about their investments. Markets will always go up and down, but we believe that having a long-term investment horizon and being invested in quality products can help you reach your goals.

Thank you for giving First Trust the opportunity to be a part of your investment plan. We value the relationship and will continue to focus on our disciplined investment approach and long-term perspective to help investors reach their financial goals.

Sincerely,

/s/ James A. Bowen

James A. Bowen  
Chairman of the Board of Trustees  
Chief Executive Officer of First Trust Advisors L.P.

Blended Index(4)	4.00%	7.87%	5.86%

- (1) Most recent distribution paid or declared through 4/30/2015. Subject to change in the future.
- (2) Distribution rates are calculated by annualizing the most recent distribution paid or declared through the report date and then dividing by Common Share price or NAV, as applicable, as of 4/30/15. Subject to change in the future.
- (3) Total return is based on the combination of reinvested dividend, capital gain and return of capital distributions, if any, at prices obtained by the Dividend Reinvestment Plan and changes in NAV per share for NAV returns and changes in Common Share price for market value returns. Total returns do not reflect sales load and are not annualized for periods less than one year. Past performance is not indicative of future results.
- (4) The blended index consists of the following: BofA Merrill Lynch Fixed Rate Preferred Securities Index (50%) and BofA Merrill Lynch U.S. Capital Securities Index (50%). The Blended Index was added to reflect the diverse allocation of institutional preferred and hybrid securities in the Fund's portfolio. The indexes do not charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown. Indexes are unmanaged and an investor cannot invest directly in an index.

COMMENTARY

MARKET RECAP

The preferred and hybrid markets experienced strong performance during the six months ended April 30, 2015. This performance was driven by increasingly accommodative policy amongst central banks around the world, and supported by global interest rates that remain near historic lows. The Federal Reserve continues to be the largest driver of volatility, followed by concerns of slowing growth around the world, geopolitical risks, and commodity prices. These macroeconomic concerns have been mitigated by quantitative easing around the world by central banks and increasing investor demand for yield in conjunction with improving credit fundamentals and market technicals within the preferred and hybrid space. The retail preferred securities market, as measured by the BofA Merrill Lynch Fixed Rate Preferred Securities Index ("POP1"), earned a total return of 4.47% during the period while the institutional market, as measured by the BofA Merrill Lynch U.S. Capital Securities Index ("COCS"), earned 3.54%.

The preferred and hybrid markets continue to experience strong market technicals and fundamentals within financials - the predominant issuers of preferreds. Low rates, particularly in Europe, have caused increased European investor participation in U.S. dollar ("USD") deals, driven by absolute yield differentials and a strengthening U.S. dollar. Short-term volatility arose from long-awaited issuance during the quarter, but the market was able to efficiently digest the supply. New issuance has been met with very strong demand as buyers have been mostly long-term investors in search of yield and attractive structures - many of which offer a component of rate protection. Overall, the focus will remain on the Federal Reserve; however, the slow but growing U.S. economy, stable to improving corporate credit fundamentals and limited supply

## Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSRS

continue to be supportive of the preferred and hybrid markets.

### PERFORMANCE ANALYSIS

For the six-month period ending April 30, 2015, the total return on FPF's market price was 10.25% and the total return on net asset value ("NAV") was 5.25%. Both the market price and NAV returns outperformed that of the blended index, a 50% weighting in both the POP1 and COCS, which had a total return for the period of 4.00%.

While the market price outperformance was attributable to the discount on the Fund being reduced from approximately 10.2% to 5.9% during the period, the primary reason for the Fund's NAV outperformance of the blended index was the use of leverage, which was close to 31% on April 30, 2015. Leverage added approximately 1.22% to the total return over the six-month period. The Fund uses leverage because its managers believe that, over time, leverage can enhance total return for common shareholders. However, the use of leverage can also increase the volatility of the NAV and therefore the share price.

The effective duration on the portfolio as of April 30, 2015 was 4.11 years without leverage and 6.00 years with leverage, while the blended index's duration was 5.32 years. The Fund's relatively low duration is due to a combination of a continued overweight in variable-rate securities and other lower duration securities, along with a hedge executed in January 2015 to fix approximately 25% of the leverage for 10 years. This conservative strategy hindered the Fund's relative performance during the period as longer duration securities continue to be the best performers. However, security selection offset this potential underperformance.

FIRST TRUST INTERMEDIATE DURATION PREFERRED & INCOME FUND (FPF)  
SEMI-ANNUAL REPORT  
APRIL 30, 2015 (UNAUDITED)

### MARKET AND FUND OUTLOOK

Historically low interest rates globally, relatively attractive yields on preferreds and hybrids, and positive issuer credit fundamentals should continue to support the preferred and hybrid market in 2015, in our opinion.

Long-term bond yields in developed economies are at historically low levels due to accommodative central bank actions and tepid global economic activity. Foreign demand for relatively attractive U.S. Treasuries has kept long-term bond yields low, which has increased the attractiveness of USD preferred and hybrid securities. Yield spreads of preferred and hybrid securities relative to both U.S. Treasuries and other credit spread products remain wider than historical averages, which should help drive positive performance in the asset class. Additionally, while preferred and hybrid credit spreads in general have tightened due to the improvement and stabilization of issuers' credit quality, we believe that credit spreads have room to tighten further as fundamentals continue to improve.

## Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSRS

Although current market conditions are favorable for preferreds and hybrids, we have chosen to take a conservative stance as it relates to potential interest rate risk by increasing exposure to less interest rate sensitive securities. We currently favor structures with good rate protection and high current yields, such as 10 year non-call fixed-to-floats with high reset rates. Fixed-rate securities with high current yields, in which we believe the issuer could refinance at a substantially lower cost of capital and that have attractive yield-to-calls (varies depending on the call date), are also attractive. We also like legacy tier 1 capital securities issued by banks that are likely to be called in the next few years that are trading at discounts or have attractive yields. With the potential for rate volatility, we believe it is prudent to maintain durations shorter than the blended index, particularly if we can do so while distributing dividend income comparable to the blended index yield.

(a) All or a portion of this security serves as collateral on the outstanding

Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSRS

loan.

- (b) Perpetual maturity.
- (c) Fixed-to-floating or fixed-to-variable rate security. The interest rate shown reflects the fixed rate in effect at April 30, 2015. At a predetermined date, the fixed rate will change to a floating rate or a variable rate.
- (d) Floating rate security. The interest rate shown reflects the rate in effect at April 30, 2015.
- (e) Pursuant to procedures adopted by the Fund's Board of Trustees, this security has been determined to be illiquid by Stonebridge Advisors LLC (the "Sub-Advisor").
- (f) This security, sold within the terms of a private placement memorandum, is exempt from registration upon resale under Rule 144A under the Securities Act of 1933, as amended (the "1933 Act"), and may be resold in transactions exempt from registration, normally to qualified institutional buyers (see Note 2C - Restricted Securities in the Notes to Financial Statements).
- (g) This security, sold within the terms of a private placement memorandum, is exempt from registration upon resale under Rule 144A under the 1933 Act, as amended, and may be resold in transactions exempt from registration, normally to qualified institutional buyers. Pursuant to procedures adopted by the Fund's Board of Trustees, this security has been determined to be liquid by the Sub-Advisor. Although market instability can result in periods of increased overall market illiquidity, liquidity for each security is determined based on security specific factors and assumptions, which require subjective judgment. At April 30, 2015, securities noted as such are valued at \$522,060,751 or 35.20% of net assets.
- (h) Aggregate cost for financial reporting purposes, which approximates the aggregate cost for federal income tax purposes. As of April 30, 2015, the aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost was \$71,404,386 and the aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost over value was \$17,699,294.

-----

INTEREST RATE SWAP AGREEMENTS:

COUNTERPARTY	FLOATING RATE	EXPIRATION DATE	NOTIONAL AMOUNT	FIXED RATE
Bank of Nova Scotia	1 month LIBOR	1/23/25	\$ 165,000,000	1.78

- (1) The Fund pays the fixed rate and receives the floating rate. The floating rate on April 30, 2015 was 0.18%.

NOTES TO FINANCIAL STATEMENTS  
-----

FIRST TRUST INTERMEDIATE DURATION PREFERRED & INCOME FUND (FPF)  
APRIL 30, 2015 (UNAUDITED)

1. ORGANIZATION

First Trust Intermediate Duration Preferred & Income Fund (the "Fund") is a non-diversified, closed-end management investment company organized as a Massachusetts business trust on February 4, 2013, and is registered with the Securities and Exchange Commission under the Investment Company Act of 1940, as amended (the "1940 Act"). The Fund trades under the ticker symbol "FPF" on the New York Stock Exchange ("NYSE").

The primary investment objective is to seek a high level of current income. The Fund has a secondary objective of capital appreciation. The Fund seeks to achieve its objectives by investing, under normal market conditions, at least 80% of its managed assets in preferred securities and other income producing securities issued by U.S. and non-U.S. companies, including traditional preferred securities, hybrid preferred securities that have investment and economic characteristics of both preferred securities and debt securities, floating rate and fixed-to-floating rate preferred securities, debt securities, convertible securities and contingent convertible securities. There can be no assurance that the Fund will achieve its investment objectives. The Fund seeks to maintain, under normal market conditions, a duration of between three and eight years. The Fund may not be appropriate for all investors.

2. SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of the financial statements. The preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP") requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

A. PORTFOLIO VALUATION:

The Fund's net asset value ("NAV") is determined daily as of the close of regular trading on the New York Stock Exchange ("NYSE"), normally 4:00 p.m. Eastern time, on each day the NYSE is open for trading. If the NYSE closes early on a valuation day, the NAV is determined as of that time. Domestic debt securities and foreign securities are priced using data reflecting the earlier closing of the principal markets for those securities. The Fund's NAV is calculated by dividing the value of all assets of the Fund (including accrued interest and dividends), less all liabilities (including accrued expenses and dividends declared but unpaid, and any borrowings of the Fund), by the total number of shares outstanding.

## Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSRS

The Fund's investments are valued daily at market value or, in the absence of market value with respect to any portfolio securities, at fair value. Market value prices represent last sale or official closing prices from a national or foreign exchange (i.e., a regulated market) and are primarily obtained from third-party pricing services. Fair value prices represent any prices not considered market value prices and are either obtained from a third-party pricing service or are determined by the Pricing Committee of the Fund's investment advisor, First Trust Advisors L.P. ("First Trust" or the "Advisor"), in accordance with valuation procedures adopted by the Fund's Board of Trustees, and in accordance with provisions of the 1940 Act. Investments valued by the Advisor's Pricing Committee are footnoted as such in the footnotes to the Portfolio of Investments. The Fund's investments are valued as follows:

Preferred stocks and other equity securities listed on any national or foreign exchange (excluding the NASDAQ(R) National Market LLC ("NASDAQ") and the London Stock Exchange Alternative Investment Market ("AIM")), are valued at the last sale price on the exchange on which they are principally traded or, for NASDAQ and AIM securities, the official closing price. Securities traded on one or more than one securities exchange are valued at the last sale price or official closing price, as applicable, at the close of the securities exchange representing the principal market for such securities.

Corporate bonds, notes and other debt securities are fair valued on the basis of valuations provided by dealers who make markets in such securities or by an independent pricing service approved by the Fund's Board of Trustees, which may use the following valuation inputs when available:

- 1) benchmark yields;
- 2) reported trades;
- 3) broker/dealer quotes;
- 4) issuer spreads;
- 5) benchmark securities;
- 6) bids and offers; and
- 7) reference data including market research publications.

Securities traded in an over-the-counter market are fair valued at the mean of their most recent bid and asked price, if available, and otherwise at their closing bid price.

Page 19

-----  
NOTES TO FINANCIAL STATEMENTS (CONTINUED)  
-----

FIRST TRUST INTERMEDIATE DURATION PREFERRED & INCOME FUND (FPF)  
APRIL 30, 2015 (UNAUDITED)

## Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSRS

Exchange-traded options and futures contracts are valued at the closing price in the market where such contracts are principally traded. If no closing price is available, exchange-traded options and futures contracts are fair valued at the mean of the most recent bid and asked price, if available, and otherwise at their closing bid price. Over-the-counter options contracts are fair valued at the mean of the most recent bid and asked price, if available, and otherwise at their closing bid price.

Swaps are fair valued utilizing quotations provided by a third party pricing service or, if the pricing service does not provide a value, by quotes provided by the selling dealer or financial institution.

Certain securities may not be able to be priced by pre-established pricing methods. Such securities may be valued by the Fund's Board of Trustees or its delegate, the Advisor's Pricing Committee, at fair value. These securities generally include, but are not limited to, restricted securities (securities which may not be publicly sold without registration under the Securities Act of 1933) for which a pricing service is unable to provide a market price; securities whose trading has been formally suspended; a security whose market price is not available from a pre-established pricing source; a security with respect to which an event has occurred that is likely to materially affect the value of the security after the market has closed but before the calculation of the Fund's NAV or make it difficult or impossible to obtain a reliable market quotation; and a security whose price, as provided by the pricing service, does not reflect the security's fair value.

As a general principle, the current fair value of a security would appear to be the amount which the owner might reasonably expect to receive for the security upon its current sale. When fair value prices are used, generally they will differ from market quotations or official closing prices on the applicable exchanges. A variety of factors may be considered in determining the fair value of such securities, including, but not limited to, the following:

- 1) the type of security;
- 2) the size of the holding;
- 3) the initial cost of the security;
- 4) transactions in comparable securities;
- 5) price quotes from dealers and/or pricing services;
- 6) relationships among various securities;
- 7) information obtained by contacting the issuer, analysts, or the appropriate stock exchange;
- 8) an analysis of the issuer's financial statements; and
- 9) the existence of merger proposals or tender offers that might affect the value of the security.

If the securities in question are foreign securities, the following additional information may be considered:

- 1) the value of similar foreign securities traded on other foreign markets;
- 2) ADR trading of similar securities;
- 3) closed-end fund trading of similar securities;

- 4) foreign currency exchange activity;
- 5) the trading prices of financial products that are tied to baskets of foreign securities;
- 6) factors relating to the event that precipitated the pricing problem;
- 7) whether the event is likely to recur; and
- 8) whether the effects of the event are isolated or whether they affect entire markets, countries or regions.

The Fund is subject to fair value accounting standards that define fair value, establish the framework for measuring fair value and provide a three-level hierarchy for fair valuation based upon the inputs to the valuation as of the measurement date. The three levels of the fair value hierarchy are as follows:

- o Level 1 - Level 1 inputs are quoted prices in active markets for identical investments. An active market is a market in which transactions for the investment occur with sufficient frequency and volume to provide pricing information on an ongoing basis.
- o Level 2 - Level 2 inputs are observable inputs, either directly or indirectly, and include the following:
  - o Quoted prices for similar investments in active markets.
  - o Quoted prices for identical or similar investments in markets that are non-active. A non-active market is a market where there are few transactions for the investment, the prices are not current, or price quotations vary substantially either over time or among market makers, or in which little information is released publicly.
  - o Inputs other than quoted prices that are observable for the investment (for example, interest rates and yield curves observable at commonly quoted intervals, volatilities, prepayment speeds, loss severities, credit risks, and default rates).
  - o Inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- o Level 3 - Level 3 inputs are unobservable inputs. Unobservable inputs may reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the investment.

Page 20

-----

FIRST TRUST INTERMEDIATE DURATION PREFERRED & INCOME FUND (FPF)  
APRIL 30, 2015 (UNAUDITED)

## Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSRS

The inputs or methodologies used for valuing investments are not necessarily an indication of the risk associated with investing in those investments. A summary of the inputs used to value the Fund's investments as of April 30, 2015, is included with the Fund's Portfolio of Investments.

### B. SECURITIES TRANSACTIONS AND INVESTMENT INCOME:

Securities transactions are recorded as of the trade date. Realized gains and losses from securities transactions are recorded on the identified cost basis. Dividend income is recorded on the ex-dividend date. Interest income, if any, is recorded on the accrual basis, including the amortization of premiums and accretion of discounts. Amortization of premiums and the accretion of discounts are recorded using the effective interest method.

The Fund may hold the securities of real estate investments trusts ("REITs"). Distributions from such investments may include income, capital gains and return of capital. The actual character of amounts received during the year is not known until after the REITs' fiscal year end. The Fund records the character of distributions received from the REITs during the year based on estimates available. The characterization of distributions received by the Fund may be subsequently revised based on information received from the REITs after their tax reporting periods conclude.

### C. RESTRICTED SECURITIES:

The Fund invests in restricted securities, which are securities that may not be offered for public sale without first being registered under the 1933 Act. Prior to registration, restricted securities may only be resold in transactions exempt from registration under Rule 144A under the 1933 Act, normally to qualified institutional buyers. As of April 30, 2015, the Fund held restricted securities as shown in the following table that Stonebridge Advisors LLC ("Stonebridge" or the "Sub-Advisor") has deemed illiquid pursuant to procedures adopted by the Fund's Board of Trustees. Although market instability can result in periods of increased overall market illiquidity, liquidity for each security is determined based on security-specific factors and assumptions, which require subjective judgment. The Fund does not have the right to demand that such securities be registered. These securities are valued according to the valuation procedures as stated in the Portfolio Valuation note (Note 2A) and are not expressed as a discount to the carrying value of a comparable unrestricted security. There are no unrestricted securities with the same maturity dates and yields for these issuers.

SECURITY	ACQUISITION DATE	PAR AMOUNT/ SHARES	CURRENT PRICE	CARRYING COST

				\$ 93,488,024
				=====

### D. FUTURES CONTRACTS:

The Fund purchases or sells (i.e., is long or short) futures contracts to hedge against changes in interest rates (interest rate risk). Futures contracts are agreements between the Fund and a counterparty to buy or sell a specific quantity of an underlying instrument at a specified price and at a specified date. Depending on the terms of the contract, futures contracts are settled either through physical delivery of the underlying instrument on the settlement date or by payment of a cash settlement amount on the settlement date. Open futures contracts can also be closed out prior to settlement by entering into an offsetting transaction in a matching futures contract. If the Fund is not able to enter into an offsetting transaction, the Fund will continue to be required to maintain margin deposits on the futures contract. When the contract is closed or expires, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed or expired. This gain or loss is included in "Net realized gain (loss) on futures contracts" on the Statement of Operations.

Page 21

-----  
NOTES TO FINANCIAL STATEMENTS (CONTINUED)  
-----

FIRST TRUST INTERMEDIATE DURATION PREFERRED & INCOME FUND (FPF)  
APRIL 30, 2015 (UNAUDITED)

Upon entering into a futures contract, the Fund must deposit funds, called margin, with its custodian in the name of the clearing broker equal to a specified percentage of the current value of the contract. Open futures contracts are marked to market daily. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in value of the contract. Such receipts or payments are known as variation margin and are included in "Variation margin payable or variation margin receivable" on the Statement of Assets and Liabilities.

If market conditions change unexpectedly, the Fund may not achieve the anticipated benefits of the futures contract and may realize a loss. The use of futures contracts involves the risk of imperfect correlation in movements in the price of the futures contracts, interest rates and the underlying instruments. The Fund did not hold any futures contracts as of April 30, 2015.

### E. OPTION CONTRACTS:

The Fund may purchase or write put and call options on futures contracts and enter into closing transactions with respect to such options to terminate an existing position. A futures option gives the holder the right, in return for

## Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSRS

the premium paid, to assume a long position (call) or short position (put) in a futures contract at a specified exercise price prior to the expiration of the option. Upon exercise of a call option, the holder acquires a long position in the futures contract and the writer is assigned the opposite short position. In the case of a put option, the opposite is true. Prior to exercise or expiration, a futures option may be closed out by an offsetting purchase or sale of a futures option of the same series.

The Fund may use options on futures contracts in connection with hedging strategies. Generally, these strategies would be applied under the same market and market sector conditions in which the Fund uses put and call options on securities or indices. The purchase of put options on futures contracts is analogous to the purchase of puts on securities or indices so as to hedge the Fund's securities holdings against the risk of declining market prices. The writing of a call option or the purchasing of a put option on a futures contract constitutes a partial hedge against declining prices of securities which are deliverable upon exercise of the futures contract. If the price at expiration of a written call option is below the exercise price, the Fund will retain the full amount of the option premium, which provides a partial hedge against any decline that may have occurred in the Fund's holdings of securities. If the price when the option is exercised is above the exercise price, however, the Fund will incur a loss, which may be offset, in whole or in part, by the increase in the value of the securities held by the Fund that were being hedged. Writing a put option or purchasing a call option on a futures contract serves as a partial hedge against an increase in the value of the securities the Fund intends to acquire.

As with investments in futures contracts, the Fund is required to deposit and maintain margin with respect to put and call options on futures contracts written by them. Such margin deposits will vary depending on the nature of the underlying futures contract (and the related initial margin requirements), the current market value of the option, and other futures positions held by the Fund. The Fund will earmark or set aside in a segregated account at such Fund's custodian, liquid assets, such as cash, U.S. government securities or other high-grade liquid debt obligations equal in value to the amount due on the underlying obligation. Such segregated assets will be marked-to-market daily, and additional assets will be earmarked or placed in the segregated account whenever the total value of the earmarked or segregated assets falls below the amount due on the underlying obligation.

The risks associated with the use of options on futures contracts include the risk that the Fund may close out its position as a writer of an option only if a liquid secondary market exists for such options, which cannot be assured. The Fund's successful use of options on futures contracts depends on the Sub-Advisor's ability to correctly predict the movement in prices of futures contracts and the underlying instruments, which may prove to be incorrect. In addition, there may be imperfect correlation between the instruments being hedged and the futures contract subject to the option. Certain characteristics of the futures market might increase the risk that movements in the prices of futures contracts or options on futures contracts might not correlate perfectly with movements in the prices of the investments being hedged. For example, all participants in the futures and options on futures contracts markets are subject to daily variation margin calls and might be compelled to liquidate futures or options on futures contracts positions whose prices are moving unfavorably to avoid being subject to further calls. These liquidations could increase the price volatility of the instruments and distort the normal price relationship between the futures or options and the investments being hedged. Also, because of initial margin deposit requirements, there might be increased participation by speculators in the futures markets. This participation also might cause temporary price distortions. In addition, activities of large traders in both the futures and securities markets involving arbitrage, "program trading," and other investment strategies might result in temporary price distortions.

Over-the-counter options have the risk of the potential inability of counterparties to meet the terms of their contracts. The Fund's maximum equity price risk for purchased options is limited to the premium initially paid. In addition, certain risks may arise upon entering into option contracts including the risk that an illiquid secondary market will limit the Fund's ability to close out an option contract prior to the expiration date and that a change in the value of the option contract may not correlate exactly with changes in the value of the securities hedged. The Fund did not hold any options as of April 30, 2015.

Page 22

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

---

FIRST TRUST INTERMEDIATE DURATION PREFERRED & INCOME FUND (FPF)  
APRIL 30, 2015 (UNAUDITED)

F. SWAP AGREEMENTS:

The Fund may enter into interest rate swap agreements. A swap is a financial instrument that typically involves the exchange of cash flows between two parties ("Counterparties") on specified dates (settlement dates) where the cash flows are based on agreed upon prices, rates, etc. Swap agreements are individually negotiated and involve the risk of the potential inability of the Counterparties to meet the terms of the agreement. In connection with these agreements, cash and securities may be identified as collateral in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default under the swap agreement or bankruptcy/insolvency of a party to the swap agreement. In the event of a default by the Counterparty, the Fund will seek withdrawal of this collateral and may incur certain costs exercising its right with respect to the collateral. If a Counterparty becomes bankrupt or otherwise fails to perform its obligations due to financial difficulties, the Fund may experience significant delays in obtaining any recovery in a bankruptcy or other reorganization proceeding. The Fund may obtain only limited recovery or may obtain no recovery in such circumstances.

Swap agreements may increase or decrease the overall volatility of the investments of the Fund. The performance of swap agreements may be affected by a change in the specific interest rate, security, currency, or other factors that determine the amounts of payments due to and from the Fund. The Fund's maximum equity price risk to meet its future payments under swap agreements outstanding at April 30, 2015 is equal to the total notional amount as shown on the Portfolio of Investments. The notional amount represents the U.S. dollar value of the contract as of the day of the opening transaction or contract reset. When the Fund enters into a swap agreement, any premium paid is included in "Swap contracts, at value" on the Statement of Assets and Liabilities.

The Fund held interest rate swap agreements at April 30, 2015. An interest rate swap agreement involves the Fund's agreement to exchange a stream of interest payments for another party's stream of cash flows. Interest rate swaps do not involve the delivery of securities or other underlying assets or principal. Accordingly, the risk of loss with respect to interest rate swaps is limited to

## Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSRS

the net amount of interest payments that the Fund is contractually obligated to make.

### G. DIVIDENDS AND DISTRIBUTIONS TO SHAREHOLDERS:

Dividends from net investment income, if any, are declared and paid monthly, or as the Board of Trustees may determine from time to time. Distributions of net realized capital gains earned by the Fund, if any, will be distributed at least annually.

Distributions from income and capital gains are determined in accordance with income tax regulations, which may differ from U.S. GAAP. Certain capital accounts in the financial statements are periodically adjusted for permanent differences in order to reflect their tax character. These permanent differences are primarily due to the varying treatment of income and gain/loss on portfolio securities held by the Fund and have no impact on net assets or NAV per share. Temporary differences, which arise from recognizing certain items of income, expense and gain/loss in different periods for financial statement and tax purposes, will reverse at some time in the future.

The tax character of distributions paid during the fiscal period ended October 31, 2014, was as follows:

Distributions paid from:

Ordinary income.....	\$	116,023,916
Capital gain.....		--
Return of capital.....		--

As of October 31, 2014, the components of distributable earnings on a tax basis were as follows:

Undistributed ordinary income.....	\$	16,595,849
Undistributed capital gains.....		--
-----		
Total undistributed earnings.....		16,595,849
Accumulated capital and other losses.....		(7,788,956)
Net unrealized appreciation (depreciation).....		26,262,909
-----		
Total accumulated earnings (losses).....		35,069,802
Other.....		--
Paid-in capital.....		1,447,419,864
-----		
Net Assets.....	\$	1,482,489,666
=====		

### H. INCOME TAXES:

The Fund intends to continue to qualify as a regulated investment company by complying with the requirements under Subchapter M of the Internal Revenue Code of 1986, as amended, which includes distributing substantially all of its net investment income and net realized gains to shareholders. Accordingly, no provision has been made for federal or state income taxes. However, due to the timing and amount of distributions, the Fund may be subject to an excise tax of 4% of the amount by which approximately 98% of the Fund's taxable income exceeds the distributions from such taxable income for the calendar year.

FIRST TRUST INTERMEDIATE DURATION PREFERRED & INCOME FUND (FPF)  
APRIL 30, 2015 (UNAUDITED)

The Fund intends to utilize provisions of the federal income tax laws, which allow it to carry a realized capital loss forward indefinitely following the year of the loss and offset such loss against any future realized capital gains. The Fund is subject to certain limitations under U.S. tax rules on the use of capital loss carryforwards and net unrealized built-in losses. These limitations apply when there has been a 50% change in ownership. At October 31, 2014, the Fund had capital loss carryforwards for federal income tax purposes of \$7,788,956.

The Fund is subject to accounting standards that establish a minimum threshold for recognizing, and a system for measuring, the benefits of a tax position taken or expected to be taken in a tax return. The taxable years ended 2014 and 2013 remain open to federal and state audit. As of April 30, 2015, management has evaluated the application of these standards to the Fund, and has determined that no provision for income tax is required in the Fund's financial statements for uncertain tax positions.

I. EXPENSES:

The Fund will pay all expenses directly related to its operations.

J. ORGANIZATION AND OFFERING COSTS:

Organization costs consisted of costs incurred to establish the Fund and enable it to legally conduct business. These costs included filing fees, listing fees, legal services pertaining to the organization of the business and audit fees relating to the initial registration and auditing the initial statement of assets and liabilities, among other fees. Offering costs consisted of legal fees pertaining to the Fund's shares offered for sale, registration fees, underwriting fees, and printing of the initial prospectus, among other fees. First Trust and the Sub-Advisor paid all organization expenses. The Fund's Common Share offering costs of \$1,704,000 were recorded as a reduction of the proceeds from the sale of Common Shares during the period ended October 31, 2013. During the six months ended April 30, 2015, it was determined that actual offering costs were less than the estimated offering costs by \$109,603. Therefore, paid-in capital was increased by that amount in the current fiscal year, as reflected in the offering costs line item on the Statements of Changes in Net Assets.

3. INVESTMENT ADVISORY FEE, AFFILIATED TRANSACTIONS AND OTHER FEE ARRANGEMENTS

First Trust, the investment advisor to the Fund, is a limited partnership with one limited partner, Grace Partners of DuPage L.P., and one general partner, The Charger Corporation. The Charger Corporation is an Illinois corporation controlled by James A. Bowen, Chief Executive Officer of First Trust. First Trust is responsible for the selection and ongoing monitoring of the securities in the Fund's portfolio, managing the Fund's business affairs and providing certain administrative services necessary for the management of the Fund. For these services, First Trust is entitled to a monthly fee calculated at an annual rate of 0.85% of the Fund's average daily net assets. First Trust also provides fund reporting services to the Fund for a flat annual fee in the amount of \$9,250.

## Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSRS

Stonebridge, a majority-owned affiliate of First Trust, serves as the Fund's sub-advisor and manages the Fund's portfolio subject to First Trust's supervision. The Sub-Advisor receives a monthly portfolio management fee calculated at an annual rate of 0.425% of average daily net assets that is paid by First Trust out of its investment advisory fee.

Brown Brothers Harriman & Co. ("BBH") serves as the Fund's administrator, fund accountant and custodian in accordance with certain fee arrangements. As administrator and fund accountant, BBH is responsible for providing certain administrative and accounting services to the Fund, including maintaining the Fund's books of account, records of the Fund's securities transactions, and certain other books and records. As custodian, BBH is responsible for custody of the Fund's assets.

Computershare serves as the Fund's transfer agent in accordance with certain fee arrangements. As transfer agent, Computershare is responsible for maintaining shareholder records for the Fund.

Each Trustee who is not an officer or employee of First Trust, any sub-advisor or any of their affiliates ("Independent Trustees") is paid a fixed annual retainer that is allocated pro rata among each fund in the First Trust Fund Complex based on net assets. Each Independent Trustee is also paid an annual per fund fee that varies based on whether the fund is a closed-end or other actively managed fund, or is an index fund.

Additionally, the Lead Independent Trustee and the Chairmen of the Audit Committee, Nominating and Governance Committee and Valuation Committee are paid additional annual fees to serve in such capacities, with such compensation allocated pro rata among each fund in the First Trust Fund Complex based on net assets. Trustees are reimbursed for travel and out-of-pocket expenses in connection with all meetings. The Lead Independent Trustee and Committee Chairmen rotate every three years. The officers and "Interested" Trustee receive no compensation from the Fund for acting in such capacities.

#### 4. PURCHASES AND SALES OF SECURITIES

For the period ended April 30, 2015, the cost of purchases and proceeds from sales of investment securities, excluding short-term investments, for the Fund was \$509,366,587 and \$514,267,394, respectively.

APRIL 30, 2015 (UNAUDITED)

#### 5. DERIVATIVES TRANSACTIONS

The following table presents the types of derivatives held by the Fund at April 30, 2015, the primary underlying risk exposure and the location of these instruments as presented on the Statement of Assets and Liabilities.

Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSRS

DERIVATIVE INSTRUMENTS	RISK EXPOSURE	ASSET DERIVATIVES		STATEMENT OF LIABILITIES
		STATEMENT OF ASSETS AND LIABILITIES	LOCATION	
Interest Rate Swap Agreement	Interest Rate Risk	Swap contracts, at value	\$ 2,299,570	Swap contract

The following table presents the amount of net realized gain (loss) and change in net unrealized appreciation (depreciation) recognized for the six months ended April 30, 2015, on derivative instruments as well as the primary underlying risk exposure associated with each instrument.

STATEMENT OF OPERATIONS LOCATION	INTEREST RATE RISK
Net realized gain (loss) on futures contracts.....	\$ (3,287,852)
Net realized gain (loss) on swap contracts.....	(666,254)
Net change in unrealized appreciation (depreciation) on futures contracts...	2,416,563
Net change in unrealized appreciation (depreciation) on swap contracts.....	2,299,570

For the six months ended April 30, 2015, the amount of notional values of futures contracts opened and closed were \$0 and \$54,498,126, respectively.

The Fund does not have the right to offset financial assets and financial liabilities related to futures contracts and swap contracts on the Statement of Assets and Liabilities.

The average volume of interest rate swaps was \$165,000,000 for the six months ended April 30, 2015.

6. BORROWINGS

The Fund entered into a credit agreement with Bank of America Merrill Lynch that had a maximum commitment amount of \$725,000,000. The borrowing rate under the facility was equal to the 1-month LIBOR plus 70 basis points. In addition, under the facility, the Fund paid a commitment fee of 0.25% on the undrawn amount of such facility on any day that the loan balance was less than 20% of the total commitment amount. The line of credit terminated on November 26, 2014. Effective November 26, 2014, the Fund entered into a credit agreement with The Bank of Nova Scotia that has a maximum commitment amount of \$725,000,000. The borrowing rate under the facility is equal to the 1-month LIBOR plus 75 basis points. In addition, under the facility, the Fund pays a commitment fee of 0.15% on the undrawn amount of such facility on any date that the loan balance is less than 50% of the total commitment amount. The average amount outstanding between November 1, 2014 and April 30, 2015 was \$665,067,688 with a weighted average interest rate of 0.91%. As of April 30, 2015, the Fund had outstanding borrowings of \$665,000,000 under this committed facility agreement. The high and low annual interest rates for the six months ended April 30, 2015, were 0.93% and 0.85%, respectively. The interest rate at April 30, 2015, was 0.93%.

7. INDEMNIFICATION

The Fund has a variety of indemnification obligations under contracts with its service providers. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

#### 8. SUBSEQUENT EVENTS

Management has evaluated the impact of all subsequent events on the Fund through the date the financial statements were issued, and has determined that there was the following subsequent event:

On May 20, 2015, the Fund declared a distribution of \$0.1625 per share to Common Shareholders of record on June 3, 2015, payable June 15, 2015.

Page 25

#### ADDITIONAL INFORMATION

---

FIRST TRUST INTERMEDIATE DURATION PREFERRED & INCOME FUND (FPF)  
APRIL 30, 2015 (UNAUDITED)

#### DIVIDEND REINVESTMENT PLAN

If your Common Shares are registered directly with the Fund or if you hold your Common Shares with a brokerage firm that participates in the Fund's Dividend Reinvestment Plan (the "Plan"), unless you elect, by written notice to the Fund, to receive cash distributions, all dividends, including any capital gain distributions, on your Common Shares will be automatically reinvested by Computershare Trust Company, N.A. (the "Plan Agent"), in additional Common Shares under the Plan. If you elect to receive cash distributions, you will receive all distributions in cash paid by check mailed directly to you by the Plan Agent, as the dividend paying agent.

If you decide to participate in the Plan, the number of Common Shares you will receive will be determined as follows:

- (1) If Common Shares are trading at or above net asset value ("NAV") at the time of valuation, the Fund will issue new shares at a price equal to the greater of (i) NAV per Common Share on that date or (ii) 95% of the market price on that date.
- (2) If Common Shares are trading below NAV at the time of valuation, the Plan Agent will receive the dividend or distribution in cash and will purchase Common Shares in the open market, on the NYSE or elsewhere, for the participants' accounts. It is possible that the market price for the Common Shares may increase before the Plan Agent has completed its purchases. Therefore, the average purchase price per share paid by the Plan Agent may exceed the market price at the time of valuation, resulting in the purchase of fewer shares than if the dividend or distribution had been paid in Common Shares issued by the Fund. The Plan Agent will use all dividends and distributions received in cash to purchase Common Shares in the open

## Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSRS

market within 30 days of the valuation date except where temporary curtailment or suspension of purchases is necessary to comply with federal securities laws. Interest will not be paid on any uninvested cash payments.

You may elect to opt-out of or withdraw from the Plan at any time by giving written notice to the Plan Agent, or by telephone at (866) 340-1104, in accordance with such reasonable requirements as the Plan Agent and the Fund may agree upon. If you withdraw or the Plan is terminated, you will receive a certificate for each whole share in your account under the Plan, and you will receive a cash payment for any fraction of a share in your account. If you wish, the Plan Agent will sell your shares and send you the proceeds, minus brokerage commissions.

The Plan Agent maintains all Common Shareholders' accounts in the Plan and gives written confirmation of all transactions in the accounts, including information you may need for tax records. Common Shares in your account will be held by the Plan Agent in non-certificated form. The Plan Agent will forward to each participant any proxy solicitation material and will vote any shares so held only in accordance with proxies returned to the Fund. Any proxy you receive will include all Common Shares you have received under the Plan.

There is no brokerage charge for reinvestment of your dividends or distributions in Common Shares. However, all participants will pay a pro rata share of brokerage commissions incurred by the Plan Agent when it makes open market purchases.

Automatically reinvesting dividends and distributions does not mean that you do not have to pay income taxes due upon receiving dividends and distributions. Capital gains and income are realized although cash is not received by you. Consult your financial advisor for more information.

If you hold your Common Shares with a brokerage firm that does not participate in the Plan, you will not be able to participate in the Plan and any dividend reinvestment may be effected on different terms than those described above.

The Fund reserves the right to amend or terminate the Plan if in the judgment of the Board of Trustees the change is warranted. There is no direct service charge to participants in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants. Additional information about the Plan may be obtained by writing Computershare Inc., P.O. Box 30170, College Station, TX 77842-3170.

### PROXY VOTING POLICIES AND PROCEDURES

A description of the policies and procedures that the Fund uses to determine how to vote proxies and information on how the Fund voted proxies relating to portfolio investments during the most recent 12-month period ended June 30 is available (1) without charge, upon request, by calling (800) 988-5891; (2) on the Fund's website located at <http://www.ftportfolios.com>; and (3) on the Securities and Exchange Commission's ("SEC") website located at <http://www.sec.gov>.

### PORTFOLIO HOLDINGS

The Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. The Fund's Forms N-Q are available (1) by calling (800) 988-5891; (2) on the Fund's website located at <http://www.ftportfolios.com>; (3) on the SEC's website at <http://www.sec.gov>; and (4) for review and copying at the SEC's Public Reference Room ("PRR") in Washington, DC. Information regarding the operation of the PRR may be obtained by calling (800) SEC-0330.

FIRST TRUST INTERMEDIATE DURATION PREFERRED & INCOME FUND (FPF)  
APRIL 30, 2015 (UNAUDITED)

SUBMISSION OF MATTERS TO A VOTE OF SHAREHOLDERS

The Joint Annual Meeting of Shareholders of the Common Shares of Macquarie/First Trust Global Infrastructure/Utilities Dividend & Income Fund, First Trust Energy Income and Growth Fund, First Trust Enhanced Equity Income Fund, First Trust/Aberdeen Global Opportunity Income Fund, First Trust Mortgage Income Fund, First Trust Strategic High Income Fund II, First Trust/Aberdeen Emerging Opportunity Fund, First Trust Specialty Finance and Financial Opportunities Fund, First Trust Dividend and Income Fund, First Trust High Income Long/Short Fund, First Trust Energy Infrastructure Fund, First Trust MLP and Energy Income Fund, First Trust Intermediate Duration Preferred & Income Fund and First Trust New Opportunities MLP & Energy Fund was held on April 20, 2015 (the "Annual Meeting"). At the Annual Meeting, Richard E. Erickson and Thomas R. Kadlec were elected by the Common Shareholders of the First Trust Intermediate Duration Preferred & Income Fund as the Class II Trustees for a three-year term expiring at the Fund's annual meeting of shareholders in 2018. The number of votes cast in favor of Mr. Erickson was 49,860,570, the number of votes against was 1,162,273 and the number of broker non-votes was 9,681,346. The number of votes cast in favor of Mr. Kadlec was 49,843,976, the number of votes against was 1,178,867 and the number of broker non-votes was 9,681,346. James A. Bowen, Robert F. Keith and Niel B. Nielson are the other current and continuing Trustees.

RISK CONSIDERATIONS

Risks are inherent in all investing. The following summarizes some, but not all, of the risks that should be considered for the Fund. For additional information about the risks associated with investing in the Fund, please see the Fund's prospectus and statement of additional information, as well as other Fund regulatory filings.

**INVESTMENT AND MARKET RISK:** An investment in the Fund's common shares ("Common Shares") is subject to investment risk, including the possible loss of the entire principal invested. Common Shares at any point in time may be worth less than the original investment, even after taking into account the reinvestment of Fund dividends and distributions. The Fund utilizes leverage, which magnifies investment risk.

**PREFERRED/HYBRID PREFERRED AND DEBT SECURITIES RISK:** Preferred/hybrid preferred and debt securities in which the Fund invests are subject to various risks, including credit risk, interest rate risk, call/prepayment risk and reinvestment risk, as described below. In addition, preferred and hybrid preferred securities are subject to certain other risks, including deferral and omission risk, subordination risk, limited voting rights risk and special redemption rights risk.

## Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSRS

**CREDIT AND BELOW INVESTMENT GRADE SECURITIES RISK:** The Fund is subject to credit risk, which is the risk that an issuer of a security may be unable or unwilling to make dividend, interest and principal payments when due and the related risk that the value of a security may decline because of concerns about the issuer's ability or willingness to make such payments. Credit risk may be heightened for the Fund because it invests in below investment grade securities, which involve greater risks than investment grade securities, including the possibility of dividend or interest deferral, default or bankruptcy.

**LEVERAGE RISK:** The use of leverage by the Fund can magnify the effect of any losses. If the income and gains from the securities and investments purchased with leverage proceeds do not cover the cost of leverage, the return to the Common Shares will be less than if leverage had not been used. Moreover, leverage involves risks and special considerations for holders of Common Shares including the likelihood of greater volatility of net asset value and market price of the Common Shares than a comparable portfolio without leverage, and the risk that fluctuations in interest rates on reverse repurchase agreements, borrowings and short-term debt or in the dividend rates on any preferred shares of the Fund that the Fund may pay will reduce the return to the holders of Common Shares or will result in fluctuations in the dividends paid on the Common Shares. There is no assurance that a leveraging strategy will be successful. Although the Fund seeks to maintain a duration, under normal market circumstances, excluding the effects of leverage, of between three and eight years, if the effect of the Fund's use of leverage was included in calculating duration, it could result in a longer duration for the Fund.

**CALL/PREPAYMENT AND REINVESTMENT RISK:** If an issuer of a security exercises an option to redeem its issue at par or prepay principal earlier than scheduled, the Fund may be forced to reinvest in lower yielding securities. A decline in income could affect the Common Shares' market price or the overall return of the Fund.

**DURATION RISK:** The Fund seeks to maintain, under normal market conditions, a duration, excluding the effects of leverage, of between three and eight years. Various techniques may be used to shorten or lengthen the Fund's duration. Securities with longer durations tend to be more sensitive to interest rate (or yield) changes than securities with shorter durations. The duration of a security will be expected to change over time with changes in market factors and time to maturity.

**RISKS OF CONCENTRATION IN THE FINANCIALS SECTOR:** Because the Fund invests 25% or more of its managed assets in the financials sector, it will be more susceptible to adverse economic or regulatory occurrences affecting this sector, such as changes in interest rates, loan concentration and competition.

Page 27

-----  
ADDITIONAL INFORMATION (CONTINUED)  
-----

FIRST TRUST INTERMEDIATE DURATION PREFERRED & INCOME FUND (FPF)  
APRIL 30, 2015 (UNAUDITED)

**INTEREST RATE RISK:** The Fund is subject to interest rate risk, which is the risk that the preferred and debt securities in which the Fund invests will decline in

## Edgar Filing: First Trust Intermediate Duration Preferred & Income Fund - Form N-CSRS

value because of rising market interest rates.

**FLOATING RATE AND FIXED-TO-FLOATING RATE SECURITIES RISK:** The market value of floating rate and fixed-to-floating rate securities may fall in a declining interest rate environment and may also fall in a rising interest rate environment if there is a lag between the rise in interest rates and the interest rate reset. A secondary risk associated with declining interest rates is the risk that income earned by the Fund on floating rate and fixed-to-floating rate securities may decline due to lower coupon payments on floating-rate securities.

**CONVERTIBLE SECURITIES/CONTINGENT CONVERTIBLE SECURITIES RISK:** The market value of convertible securities tends to decline as interest rates increase and, conversely, tends to increase as interest rates decline. In addition, because of the conversion feature, the market value of convertible securities tends to vary with fluctuations in the market value of the underlying common stock. Contingent convertible securities provide for mandatory conversion into common stock of the issuer under certain circumstances. Since the common stock of the issuer may not pay a dividend, investors in these instruments could experience a reduced income rate, potentially to zero; and conversion would deepen the subordination of the investor, hence worsening standing in a bankruptcy. In addition, some such instruments have a set stock conversion rate that would cause a reduction in value of the security if the price of the stock is below the conversion price on the conversion date.

**FOREIGN (NON-U.S.) SECURITIES RISK:** Investing in securities of non-U.S. issuers may involve certain risks not typically associated with investing in securities of U.S. issuers. These risks include: (i) there may be less publicly available information about non-U.S. issuers or markets due to less rigorous disclosure or accounting standards or regulatory practices; (ii) non-U.S. markets may be smaller, less liquid and more volatile than the U.S. market; (iii) potential adverse effects of fluctuations in currency exchange rates or controls on the value of the Fund's investments; (iv) the economies of non U.S. countries may grow at slower rates than expected or may experience a downturn or recession; (v) the impact of economic, political, social or diplomatic events; (vi) certain non-U.S. countries may impose restrictions on the ability of non U.S. issuers to make payments of principal and interest to investors located in the United States due to blockage of non-U.S. currency exchanges or otherwise; and (vii) withholding and other non-U.S. taxes may decrease the Fund's return.

**ILLIQUID AND RESTRICTED SECURITIES RISK:** The Fund may invest up to 25% of its Managed Assets in illiquid securities and may also invest, without limit, in unregistered or otherwise restricted securities. Investment of the Fund's assets in illiquid and restricted securities may restrict the Fund's ability to take advantage of market opportunities. Illiquid and restricted securities may be difficult to dispose of at a fair price at the times when the Fund believes it is desirable to do so. The market price of illiquid and restricted securities generally is more volatile than that of more liquid securities, which may adversely affect the price that the Fund pays for or recovers upon the sale of such securities. Illiquid and restricted securities are also more difficult to value, especially in challenging markets. The risks associated with illiquid and restricted securities may be particularly acute in situations in which the Fund's operations require cash and could result in the Fund borrowing to meet its short-term needs or incurring losses on the sale of illiquid or restricted securities.
