GLAXOSMITHKLINE PLC Form 6-K June 18, 2008

# FORM 6-K

### SECURITIES AND EXCHANGE COMMISSION Washington D.C. 20549

**Report of Foreign Issuer** 

# Pursuant to Rule 13a-16 or 15d-16 of the Securities Exchange Act of 1934

For period ending June 18, 2008

# GlaxoSmithKline plc

(Name of registrant)

# **980 Great West Road, Brentford, Middlesex, TW8 9GS** (Address of principal executive offices)

Indicate by check mark whether the registrant files or will file annual reports under cover Form 20-F or Form 40-F

Form 20-F x Form 40-F

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes No x

GlaxoSmithKline plc (the 'Company') announces that in accordance with the authority granted by shareholders at the Company's Annual General Meeting on 21 May 2008 it purchased 3,010,000 of its Ordinary shares of 25 pence each ('shares') on 18 June 2008 at a price of 1,093.38 pence per share.

The shares will be cancelled.

Following the cancellation of these shares, the Company holds 474,194,158 of its shares in Treasury, representing 8.93% of the total voting rights in the Company.

The Company has 5,311,952,963 shares in issue (excluding Treasury shares). This number represents the total voting rights in the Company and may be used by shareholders as the denominator for the calculations by which they can determine if they are required to notify their interest in, or a change to their interest in the Company under the Financial Services Authority's Disclosure and Transparency Rules.

This announcement does not constitute, or form part of, an offer or any solicitation of an offer to purchase or subscribe for securities in any jurisdiction and is in conformity with the Financial Services Authority's Disclosure and Transparency Rules.

### SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorised.

#### Table of Contents SI FINANCIAL GROUP, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS SEPTEMBER 30, 2013 AND 2012 AND DECEMBER 31, 2012

#### NOTE 1. NATURE OF BUSINESS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

#### Nature of Business

SI Financial Group, Inc. (the "Company") is the holding company for Savings Institute Bank and Trust Company (the "Bank"). Established in 1842, the Bank is a community-oriented financial institution headquartered in Willimantic, Connecticut. The Bank provides a variety of financial services to individuals, businesses and municipalities through its twenty-six offices in eastern Connecticut and Rhode Island. Its primary products include savings, checking and certificate of deposit accounts, residential and commercial mortgage loans, commercial business loans and consumer loans. In addition, wealth management services, which include trust, financial planning, life insurance and investment services, are offered to individuals and businesses through the Bank's offices. The Company does not conduct any material business other than owning all of the stock of the Bank and making payments on the subordinated debentures held by the Company.

On September 6, 2013, the Company acquired Newport Bancorp, Inc. ("Newport"), the holding company for Newport Federal Savings Bank. The acquisition added six full-service banking offices located in eastern Connecticut and Rhode Island. See Note 10 - Acquisition of Newport Bancorp, Inc. for additional details.

#### Principles of Consolidation

The accompanying consolidated financial statements include the accounts of the Company, its wholly-owned subsidiary, the Bank, and the Bank's wholly-owned subsidiaries, 803 Financial Corp., SI Mortgage Company and SI Realty Company, Inc. All significant intercompany accounts and transactions have been eliminated.

#### Basis of Financial Statement Presentation

The interim consolidated financial statements and related notes have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") for interim financial information, with the instructions to Form 10-Q and Rule 10.01 of Regulation S-X of the Securities and Exchange Commission ("SEC") and general practices within the banking industry. Accordingly, certain information and footnote disclosures required by GAAP for complete financial statements have been omitted. Information in the accompanying interim consolidated financial statements and notes to the financial statements of the Company as of September 30, 2013 and for the three and nine months ended September 30, 2013 and 2012 is unaudited. These unaudited interim consolidated financial statements and related notes should be read in conjunction with the audited financial statements of the Company and the accompanying notes for the year ended December 31, 2012 contained in the Company's Form 10-K.

In the opinion of management, the accompanying unaudited interim consolidated financial statements reflect all of the adjustments, consisting only of normal and recurring adjustments, necessary for a fair presentation of the financial condition, results of operations and cash flows as of and for the period covered herein. The results of operations for the three and nine months ended September 30, 2013 are not necessarily indicative of the operating results for the year ending December 31, 2013 or for any other period.

In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosures of contingent assets and liabilities, as of the date of the balance sheets and reported amounts of revenues and expenses for the periods presented. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term

relate to the determination of the allowance for loan losses, other-than-temporary impairment ("OTTI") of securities, deferred income taxes and the impairment of long-lived assets.

#### <u>Table of Contents</u> SI FINANCIAL GROUP, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS SEPTEMBER 30, 2013 AND 2012 AND DECEMBER 31, 2012

#### Reclassifications

Certain amounts in the Company's 2012 consolidated financial statements have been reclassified to conform to the 2013 presentation. Such reclassifications had no effect on net income.

#### Loans Receivable

Loans receivable are stated at current unpaid principal balances, net of the allowance for loan losses and deferred loan origination fees and costs. Management has the ability and intent to hold its loans receivable for the foreseeable future or until maturity or pay-off.

A loan is impaired when, based on current information and events, it is probable the Company will be unable to collect all contractual principal and interest payments due in accordance with the terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value and the probability of collecting scheduled principal and interest payments when due. Impairment is measured on a loan by loan basis for residential and commercial mortgage loans and commercial business loans by either the present value of expected future cash flows discounted at the loan's effective interest rate or, as a practical expedient, at the loan's observable market price or the fair value of the collateral if the loan is collateral dependent. Large groups of smaller balance homogeneous loans are collectively evaluated for impairment. Accordingly, the Company does not typically identify individual consumer loans for impairment disclosures, unless such loans are subject to a troubled debt restructuring ("TDR") agreement.

The Company periodically may agree to modify the contractual terms of loans. When a loan is modified and concessions have been made to the original contractual terms, such as reductions of interest rates or deferral of interest or principal payments due to the borrower's financial condition, the modification is considered a TDR.

Management considers all nonaccrual loans, with the exception of certain consumer loans, to be impaired. Also, all TDRs are initially classified as impaired. In most cases, loan payments less than 90 days past due are considered minor collection delays and the related loans are generally not considered impaired.

#### Allowance for Loan Losses

The allowance for loan losses, a material estimate which could change significantly in the near-term, is established through a provision for loan losses charged to earnings to account for losses that are inherent in the loan portfolio and estimated to occur, and is maintained at a level that management considers adequate to absorb losses in the loan portfolio. Loan losses are charged against the allowance for loan losses when management believes that the uncollectibility of the principal loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance for loan losses when received. In the determination of the allowance for loan losses, management may obtain independent appraisals for significant properties, if necessary.

Management's judgment in determining the adequacy of the allowance is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available. The allowance for loan losses is evaluated on a monthly basis by management and is based on the evaluation of the known and inherent risk characteristics and size and composition of the loan portfolio, the assessment of current economic and real estate market conditions, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral, historical loan loss experience, the level of nonperforming loans, delinquencies, classified assets and loan charge-offs and evaluations of loans and other relevant factors.

The allowance for loan losses consists of the following key elements:

Specific allowance for identified impaired loans. For loans that are identified as impaired, an allowance is established when the present value of expected cash flows (or observable market price of the loan or fair

#### <u>Table of Contents</u> SI FINANCIAL GROUP, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS SEPTEMBER 30, 2013 AND 2012 AND DECEMBER 31, 2012

value of the collateral if the loan is collateral dependent) of the impaired loan is lower than the carrying value of that loan.

General valuation allowance. The general component represents a valuation allowance on the remainder of the loan portfolio, after excluding impaired loans. For this portion of the allowance, loans are segregated by category and assigned an allowance percentage based on historical loan loss experience adjusted for qualitative factors stratified by the following loan segments: residential one- to four-family, multi-family and commercial real estate, construction, commercial business and consumer. Management uses a rolling average of historical losses based on the time frame appropriate to capture relevant loss data for each loan segment. This historical loss factor is adjusted for the following qualitative factors: levels/trends in delinquencies, classified loans and nonaccrual loans; level of loan charge-offs; trends in volume, nature and terms of loans; existence and effect of/or changes in the level of credit concentrations; effects of changes in risk selection, underwriting standards and other changes in lending policies, procedures and practices; experience/ability and depth of lending management and staff, national and local economic trends and conditions and impact on value of underlying collateral for collateral dependent loans.

The qualitative factors are determined based on the following various risk characteristics for each loan segment. Risk characteristics relevant to each portfolio segment are as follows:

Residential – One- to Four-Family – The Bank primarily originates conventional loans with loan-to-value ratios less than 95% and generally originates loans with loan-to-value ratios in excess of 80% only when secured by first liens on owner-occupied one- to four-family residences. Loans with loan-to-value ratios in excess of 80% generally require private mortgage insurance or additional collateral. All loans in this segment are collateralized by owner-occupied residential real estate and repayment is dependent on the credit quality of the individual borrower. The overall health of the economy, including unemployment rates and housing prices, will have an effect on the credit quality of this segment.

Multi-family and Commercial – Loans in this segment are originated for the purpose of acquiring, developing, improving or refinancing multi-family and commercial real estate where the property is the primary collateral securing the loan, and the income generated from the property is the primary repayment source. The underlying cash flows generated by the properties are adversely impacted by a downturn in the economy as evidenced by increased vacancy rates, which in turn, will have an effect on the credit quality in this segment. Payments on loans secured by income-producing properties often depend on the successful operation and management of the properties. Management continually monitors the cash flows of these loans.

Construction – This segment includes loans to individuals, and to a lesser extent builders, to finance the construction of residential dwellings. The Bank also originates construction loans for commercial development projects. Upon the completion of construction, the loan generally converts to a permanent mortgage loan. Credit risk is affected by cost overruns, time to sell at an adequate price and market conditions.

Commercial Business – Loans in this segment are made to businesses and are generally secured by assets of the business. Repayment is expected from the cash flows of the business. A weakened economy and reduced viability of the industry in which the customer operates will have a negative impact on the credit quality in this segment. To a lesser but increasing extent, the Bank provides financing for investors in the time share industry, which are secured by

consumer receivables, and finances capital improvements for condominium associations, which are secured by the assigned rights to levy special assessments to condominium owners.

#### Table of Contents SI FINANCIAL GROUP, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS SEPTEMBER 30, 2013 AND 2012 AND DECEMBER 31, 2012

Consumer – Loans in this segment primarily include home equity lines of credit (representing both first and second liens) and indirect automobile loans and, to a lesser extent, loans secured by marketable securities, passbook or certificate accounts, motorcycles, automobiles and recreational vehicles, as well as unsecured loans. Consumer loan collections depend on the borrower's continuing financial stability, and therefore, are more likely to be adversely affected by job loss, divorce, illness or personal bankruptcy.

In computing the allowance for loan losses, we do not assign a general valuation allowance to the Small Business Administration ("SBA") and United States Department of Agriculture ("USDA") loans that we purchase as such loans are fully guaranteed. These loans are included in commercial business loans. See Note 4 for details.

The majority of the Company's loans are collateralized by real estate located in eastern Connecticut and Rhode Island. To a lesser extent, certain commercial real estate loans are secured by collateral located outside of our primary market area. Accordingly, the collateral value of a substantial portion of the Company's loan portfolio and real estate acquired through foreclosure is susceptible to changes in local market conditions.

Although management believes that it uses the best information available to establish the allowance for loan losses, future adjustments to the allowance for loan losses may be necessary and the Company's results of operations could be adversely affected if circumstances differ substantially from the assumptions used in making the determinations. Furthermore, while management believes it has established the allowance for loan losses in conformity with GAAP, the regulatory agencies, in reviewing the loan portfolio, may request us to increase our allowance for loan losses based on judgments different from ours. In addition, because future events affecting borrowers and collateral cannot be predicted with certainty, the existing allowance for loan losses may not be adequate or increases may be necessary should the quality of any loans deteriorate as a result of the factors discussed above. Any material increase in the allowance for loan losses would adversely affect the Company's financial condition and results of operations.

### Interest and Fees on Loans

Interest on loans is accrued and included in net interest income based on contractual rates applied to principal amounts outstanding. Accrual of interest is discontinued when loan payments are 90 days or more past due, based on contractual terms, or when, in the judgment of management, collectibility of the loan or loan interest becomes uncertain. Subsequent recognition of income occurs only to the extent payment is received subject to management's assessment of the collectibility of the remaining interest and principal. A nonaccrual loan is restored to accrual status when it is no longer delinquent and collectibility of interest and principal is no longer in doubt and the borrower has made regular payments in accordance with the terms of the loan over a period of at least six months. Interest collected on nonaccrual loans is recognized only to the extent cash payments are received, and may be recorded as a reduction to principal if the collectibility of the principal balance of the loan is unlikely.

Loan origination fees and direct loan origination costs are deferred, and the net amount is recognized as an adjustment of the related loan's yield utilizing the interest method over the contractual life of the loan.

#### **Common Share Repurchases**

The Company is chartered in the state of Maryland. Maryland law does not provide for treasury shares, rather shares repurchased by the Company constitute authorized but unissued shares. GAAP states that accounting for treasury stock shall conform to state law. Therefore, the cost of shares repurchased by the Company has been allocated to common stock and retained earnings balances.

Recent Accounting Pronouncements

Disclosures about Offsetting Assets and Liabilities – In December 2011, the Financial Accounting Standards Board ("FASB") amended its standard related to disclosure requirements for offsetting assets and liabilities. Under this

#### Table of Contents SI FINANCIAL GROUP, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS SEPTEMBER 30, 2013 AND 2012 AND DECEMBER 31, 2012

amendment, an entity is required to disclose both gross and net information about both instruments and transactions eligible for offset in the statement of financial position and instruments and transactions subject to an agreement similar to a master netting arrangement. This scope includes derivatives, sale and repurchase agreements and reverse sale and repurchase agreements, and securities borrowing and securities lending arrangements. The amendments in this update were effective for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. The adoption of this amendment had no impact on the Company's consolidated financial statements.

Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities - In January 2013, the FASB issued amendments to clarify that the scope of Disclosures about Offsetting Assets and Liabilities applies to derivatives accounted for in accordance with Derivatives and Hedging, including bifurcated embedded derivatives, repurchase agreements, reverse repurchase agreements, securities borrowing and securities lending transactions that are either offset in accordance with applicable guidance or subject to an enforceable master netting arrangement or similar agreement. The amendments in this update were effective for fiscal years beginning on or after January 1, 2013, and interim periods within those annual periods. The adoption of this amendment had no impact on the Company's consolidated financial statements.

Comprehensive Income - Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income - In February 2012, the FASB issued an amendment to improve the transparency of reporting these reclassifications by requiring an organization to 1) present the effects on the line items of net income of significant amounts reclassified out of accumulated other comprehensive income and 2) cross-reference to other disclosures currently required under GAAP for other reclassification items to be reclassified directly to net income in their entirety in the same reporting period. The amendments were effective for reporting periods beginning after December 15, 2012. The adoption of this amendment did not have a material impact on the Company's consolidated financial statements. See Consolidated Statements of Comprehensive Income (Loss).

### NOTE 2. EARNINGS (LOSS) PER SHARE

Basic earnings (loss) per share is calculated by dividing the net income (loss) available to common shareholders by the weighted average number of common shares outstanding during the period. Unvested restricted shares are considered outstanding in the computation of basic earnings (loss) per share since the shares participate in dividends and the rights to the dividends are non-forfeitable. Diluted earnings (loss) per share is computed in a manner similar to basic earnings (loss) per share except that the weighted average number of common shares outstanding is increased to include the incremental common shares (as computed using the treasury stock method) that would have been outstanding if all potentially dilutive common stock equivalents were issued during the period. The Company's common stock equivalents relate solely to stock options. Repurchased common shares and unallocated common shares held by the Bank's ESOP are not deemed outstanding for earnings (loss) per share calculations.

Anti-dilutive shares are common stock equivalents with weighted average exercise prices in excess of the weighted average market value for the periods presented, and are not considered in diluted earnings (loss) per share calculations. The Company had anti-dilutive common shares outstanding of 534,492 and 595,761 for the three and nine months ended September 30, 2013, respectively, and 173,138 and 215,987 for the three and nine months ended September 30, 2012, respectively. For the three and nine months ended September 30, 2012, all common stock equivalents were anti-dilutive and were not included in the computation

of loss per share because it would result in a reduction in the net loss per share.

#### <u>Table of Contents</u> SI FINANCIAL GROUP, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS SEPTEMBER 30, 2013 AND 2012 AND DECEMBER 31, 2012

The computation of earnings (loss) per share is as follows:

|   | Three Months   | Ended September    | Nine Months Ended |           |  |
|---|----------------|--------------------|-------------------|-----------|--|
|   | 30,            |                    | September 30      | ,         |  |
|   | 2013           | 2012               | 2013              | 2012      |  |

<sup>(1)</sup> Net of OTTI write-downs recognized in earnings.

<sup>(2)</sup> Agency securities refer to debt obligations issued or guaranteed by government corporations or

government-sponsored enterprises ("GSEs"). Non-agency securities, or private-label securities, are the sole obligation of their issuer and are not guaranteed by one of the GSEs or the U.S. Government.

At September 30, 2013, certain agency-residential mortgage-backed securities were pledged to secure a \$15.0 million repurchase agreement assumed in the merger with Newport. These pledged securities have a carrying value of \$15.9 million and fair value of \$16.3 million at September 30, 2013. In addition, the Company has \$4.0 million in cash pledged as collateral to secure this agreement at September 30, 2013. The repurchase agreement has a rate of 2.58% and matures in November 2013.

<sup>(2)</sup> Agency securities refer to debt obligations issued or guaranteed by government corporations or government-sponsored enterprises ("GSEs"). Non-agency securities, or private-label securities, are the sole obligation of their issuer and are not guaranteed by one of the GSEs or the U.S. Government.

The amortized cost and fair value of debt securities by contractual maturities at September 30, 2013 are presented below. Actual maturities of mortgage-backed securities ("MBS") may differ from contractual maturities because the mortgages underlying the securities may be called or repaid without any penalties. Because MBSs are not due at a single maturity date, they are not included in the maturity categories in the following maturity summary.

|                             | Amortized      | Fair      |

For debt securities with OTTI losses, the Company estimated the portion of loss attributable to credit using a discounted cash flow model in accordance with applicable guidance. Significant inputs for the non-agency mortgage-backed securities included the estimated cash flows of the underlying collateral based on key assumptions, such as default rate, loss severity and prepayment rate. Assumptions used can vary widely from loan to loan, and are influenced by such factors as loan interest rate, geographical location of the borrower, borrower characteristics and collateral type. Significant inputs for the collateralized debt obligations included estimated cash flows and prospective

deferrals, defaults and recoveries based on the underlying seniority status and subordination structure of the pooled trust preferred debt tranche at the time of measurement. Prospective deferral, default and recovery estimates affecting projected cash flows were based on an analysis of the underlying financial condition of the individual issuers, with consideration of the account's capital adequacy, credit quality, lending concentrations and other factors. All cash flow estimates were based on the securities' tranche structure and contractual rate and maturity terms. The Company utilized the services of an independent third-party

#### Table of Contents SI FINANCIAL GROUP, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS SEPTEMBER 30, 2013 AND 2012 AND DECEMBER 31, 2012

valuation firm to obtain information about the structure in order to determine how the underlying collateral cash flows will be distributed to each security issued from the structure. The present value of the expected cash flows was compared to the Company's holdings to determine the credit-related impairment loss, if any. To the extent that continued changes in interest rates, credit movements and other factors that influence fair value of investments occur, the Company may be required to record impairment charges for OTTI in future periods.

At September 30, 2013, thirty-three debt securities with gross unrealized losses had aggregate depreciation of approximately 3.01% of the Company's amortized cost basis. The majority of the unrealized losses related to the Company's agency mortgage-backed securities. Impairment charges recognized on investments deemed other-than-temporarily impaired were \$0 and \$8,000 for the three and nine months ended September 30, 2013, respectively compared to \$87,000 and \$123,000 of net impairment losses recognized by the Company for the three and nine months ended September 30, 2012, respectively. The following summarizes, by security type, the basis for management's determination during the preparation of the financial statements of whether the applicable investments within the Company's securities portfolio were other-than-temporarily impaired at September 30, 2013.

U.S. Government and Agency Obligations. The unrealized losses on the Company's U.S. Government and agency obligations related primarily to a widening of the rate spread to comparable treasury securities. Because the decline in market value is attributable to changes in interest rates and not credit quality, and because the Company does not intend to sell these securities and it is not more likely than not that the Company will be required to sell the securities before their anticipated recovery, which may be at maturity, the Company did not consider these securities to be other-than-temporarily impaired at September 30, 2013.

Mortgage-backed Securities - Agency - Residential. The unrealized losses on the Company's agency-residential mortgage-backed securities were caused by increases in the rate spread to comparable treasury securities. The Company does not expect these securities to settle at a price less than the amortized cost basis of the investments. Because the Company does not intend to sell the investments and it is not more likely than not that the Company will be required to sell the investments before the recovery of their amortized cost basis, which may be at maturity, the Company did not consider these investments to be other-than-temporarily impaired at September 30, 2013.

Collateralized Debt Obligations. The unrealized losses on the Company's collateralized debt obligations relate to investments in pooled trust preferred securities ("PTPS"). The PTPS market has stabilized at depressed market values as a result of market saturation. Transactions for PTPS have been limited and have occurred primarily as a result of distressed or forced liquidation sales. The securities were widely held by hedge funds and European banks and used to offset interest rate exposure tied to LIBOR. As the positions have unwound, an excess supply of these securities has saturated the market.

Management evaluated current credit ratings, credit support and stress testing for future defaults related to the Company's PTPS. Management also reviewed analytics provided by the trustee and independent OTTI reviews and associated cash flow analyses performed by an independent third party. The unrealized losses on the Company's PTPS investments were caused by a lack of liquidity, credit downgrades and decreasing credit support. The increased number of bank and insurance company failures has decreased the level of credit support for these investments. A number of lower tranches have foregone payments or have received payment in kind through increased principal allocations. However, the number of deferring securities has been decreasing and a number of reinstatements have occurred recently. Based on the existing credit profile of the remainder of the Company's PTPS investments,

management does not believe that these investments will suffer from any further credit-related losses. Because the Company does not intend to sell the investments and it is not more likely than not that the Company will be required to sell the investments before recovery of their amortized cost basis, which may be at maturity, the Company did not record additional impairment losses at September 30, 2013.

#### <u>Table of Contents</u> SI FINANCIAL GROUP, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS SEPTEMBER 30, 2013 AND 2012 AND DECEMBER 31, 2012

The following table details the Company's collateralized debt obligations that are rated below investment grade at September 30, 2013:

Credit Quality Information

The Company utilizes an eight-grade internal loan rating system for all loans in the portfolio, with the exception of its purchased SBA and USDA commercial business loans that are fully guaranteed by the U.S. government, as follows: o Pass (Ratings 1-4): Loans in these categories are considered low to average risk.

O Special Mention (Rating 5): Loans in this category are starting to show signs of potential weakness and are being closely monitored by management.

o Substandard (Rating 6): Generally, a loan is considered substandard if it is inadequately protected by the current net worth and paying capacity of the obligors and/or the collateral pledged. There is a distinct possibility that the

Company will sustain some loss if the weakness is not corrected.

## <u>Table of Contents</u> SI FINANCIAL GROUP, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS SEPTEMBER 30, 2013 AND 2012 AND DECEMBER 31, 2012

Doubtful (Rating 7): Loans classified as doubtful have all the weaknesses inherent in those classified substandard o with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, highly questionable and improbable.

O Loss (Rating 8): Loans in this category are considered uncollectible and of such little value that their continuance as assets is not warranted.

Management periodically reviews the ratings described above and the Company's internal audit function reviews components of the credit files, including the assigned risk ratings, of certain commercial loans as part of its loan review.

The following tables present the Company's loans by risk rating at September 30, 2013 and December 31, 2012:

| September 30, 2013              | Not Rated  | Pass      | Special<br>Mention | Substandard | Doubtful | Loss | Total       |

## Troubled Debt Restructurings

A modified loan is considered a TDR when two conditions are met: 1) the borrower is experiencing documented financial difficulty and 2) concessions are made by the Company that would not otherwise be considered for a borrower with similar risk characteristics. The most common types of modifications include below market interest rate reductions, deferrals of principal and maturity extensions. Modified terms are dependent upon the financial position and needs of the individual borrower. If the modification agreement is violated, the loan is handled by the Company's Collections Department for resolution, which may result in foreclosure. The Company's determination of whether a loan modification is a TDR considers the individual facts and circumstances surrounding each modification.

The Company's nonaccrual policy is followed for TDRs. If the loan was current prior to modification, nonaccrual status would not be required. If the loan was on nonaccrual prior to modification or if the payment amount significantly increases, the loan will remain on nonaccrual for a period of at least six months. Loans qualify for return to accrual status once the borrower has demonstrated the willingness and the ability to perform in accordance with the restructured terms of the loan agreement for a period of not less than six consecutive months.

All TDRs are initially reported as impaired. Impaired classification may be removed after the year of restructure if the borrower demonstrates compliance with the modified terms and the restructuring agreement specifies an interest rate equal to that which would be provided to a borrower with similar risk characteristics at the time of restructuring.

## <u>Table of Contents</u> SI FINANCIAL GROUP, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS SEPTEMBER 30, 2013 AND 2012 AND DECEMBER 31, 2012

The following tables provide information on loans modified as TDRs during the three and nine months ended September 30, 2013 and 2012.

## NOTE 5. PREMISES AND EQUIPMENT

Premises and equipment at September 30, 2013 and December 31, 2012 are summarized as follows:

|   | September 30, 2013<br>(In Thousands) | December 31, 2012 |
|---|--------------------------------------|-------------------|
| Land                                      | \$4,311                              | \$2,098           |
| Buildings                                 | 11,370                               | 7,052             |
| Leasehold improvements                    | 10,754                               | 7,563             |
| Furniture and equipment                   | 12,431                               | 10,867            |
| Construction in process                   | 51                                   | 84                |
|   | 38,917                               | 27,664            |
| Accumulated depreciation and amortization | (17,462)                             | (16,448)          |
| Premises and equipment, net               | \$21,455                             | \$11,216          |

At September 30, 2013 and December 31, 2012, construction in process related to design and site costs associated with a new branch location. At December 31, 2012, the Company had an outstanding commitment for the purchase of land totaling \$450,000, which was purchased during the quarter ended March 31, 2013.

## NOTE 6. OTHER COMPREHENSIVE INCOME (LOSS)

Accounting principles generally require that recognized revenue, expenses, gains and losses be included in net income (loss). Although certain changes in assets and liabilities are reported as a separate component of shareholders' equity on the balance sheet, such items, along with net income (loss) are components of comprehensive income (loss).

Components of other comprehensive loss and related tax effects are as follows:

|  | Nine Months Ended September 30, 2013 |      |         |   |            |   |
|--|--------------------------------------|------|---------|---|------------|---|

## NOTE 7. REGULATORY CAPITAL

The Bank is subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory, and possibly additional discretionary, actions by regulators that, if undertaken, could have a direct material effect on the Company's consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of the Bank's assets, liabilities and certain off-balance sheet items, as calculated under regulatory accounting practices. The Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Bank to maintain minimum amounts and ratios (set forth in the table below) of total and Tier I capital (as defined in the regulations) to risk-weighted assets (as defined) and of Tier I capital (as defined) to total assets (as defined). As of September 30, 2013 and December 31, 2012, the Bank met the conditions to be classified as "well capitalized" under the regulatory framework for prompt corrective action. There are no conditions or events since then that management believes have changed the Bank's regulatory category. As a savings and loan holding company regulated by the Federal Reserve Board (the "FRB"), the Company is not currently subject to any separate regulatory capital requirements. The Dodd-Frank Act, however, requires the FRB to promulgate consolidated capital requirements for depository institution holding companies that are no less stringent, quantitatively in terms of components of capital, than those applicable to institutions themselves. There is a five-year transition period before the capital requirements will apply to savings and loan holding companies.

## Table of Contents SI FINANCIAL GROUP, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS SEPTEMBER 30, 2013 AND 2012 AND DECEMBER 31, 2012

The Bank's actual capital amounts and ratios as of September 30, 2013 and December 31, 2012 were as follows:

#### NOTE 8. FAIR VALUE OF ASSETS AND LIABILITIES

#### Fair Value Hierarchy

The Company groups its assets and liabilities in three levels based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. Transfers between levels are recognized at the end of a reporting period, if applicable.

Valuation is based on quoted prices in active markets for identical assets or liabilities. Level 1 assets and Level liabilities generally include debt and equity securities that are traded in an active exchange market. Valuations

1: are obtained from readily available pricing sources for market transactions involving identical assets or liabilities.

Level 2: Valuation is based on observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level Valuation is based on unobservable inputs that are supported by little or no market activity and that are

3: significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using unobservable inputs to pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant

management judgment or estimation.

## Table of Contents SI FINANCIAL GROUP, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS SEPTEMBER 30, 2013 AND 2012 AND DECEMBER 31, 2012

#### Determination of Fair Value

The Company uses fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. The fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is best determined based upon quoted market prices. However, in many instances, there are no quoted market prices for the Company's various financial instruments. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. Accordingly, the fair value estimates may not be realized in an immediate settlement of the instrument.

The following methods and assumptions were used by the Company in estimating fair value measurement and disclosures of its financial instruments:

Cash and cash equivalents. The carrying amounts of cash and cash equivalents approximate the fair values based on the short-term nature of the assets.

Securities available for sale. Included in the available for sale category are both debt and equity securities. The securities measured at fair value in Level 1 are based on quoted market prices in an active exchange market. Securities measured at fair value in Level 2 are based on pricing models that consider standard input factors such as observable market data, benchmark yields, interest rate volatilities, broker/dealer quotes, credit spreads and new issue data. The Company utilizes a nationally-recognized, third-party pricing service to estimate fair value measurements for the majority of its portfolio. The pricing service evaluates each asset class based on relevant market information considering observable data, but these prices do not represent binding quotes. The fair value prices on all investments are reviewed for reasonableness by management. Securities measured at fair value in Level 3 include collateralized debt obligations that are backed by trust preferred securities issued by banks, thrifts and insurance companies. Management determined that an orderly and active market for these securities and similar securities did not exist based on a significant reduction in trading volume and widening spreads relative to historical levels. The Company estimates future cash flows discounted using a rate management believes is representative of current market conditions. Factors in determining the discount rate include the current level of deferrals and/or defaults, changes in credit rating and the financial condition of the debtors within the underlying securities, broker quotes for securities with similar structure and credit risk, interest rate movements and pricing for new issuances.

Federal Home Loan Bank stock. The carrying value of Federal Home Loan Bank ("FHLB") stock approximates fair value based on the redemption provisions of the FHLB.

Loans held for sale. The fair value of loans held for sale is estimated using quoted market prices.

Loans receivable. For valuation purposes, the loan portfolio was segregated into significant categories, including residential mortgage, commercial real estate, commercial business and consumer loans. These categories were further segregated, where appropriate, into components based on significant financial characteristics such as type of interest rate (fixed or adjustable). Fair values were estimated for each component using assumptions developed by management and a valuation model provided by a third party specialist. The fair values of residential mortgage, commercial real estate, commercial business and consumer loans were estimated by discounting the anticipated cash flows from the respective portfolios. Estimates of the timing and amount of these cash flows considered factors such

as future loan prepayments. The discount rates reflected current market rates for loans with similar terms to borrowers of similar credit quality. The fair value of home equity lines of credit was based on the outstanding loan

## Table of Contents SI FINANCIAL GROUP, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS SEPTEMBER 30, 2013 AND 2012 AND DECEMBER 31, 2012

balances. Fair values for nonperforming loans are estimated using discounted cash flow analyses or underlying collateral values, where applicable.

Accrued interest receivable. The carrying amount of accrued interest approximates fair value.

Deposits. The fair value of demand deposits, negotiable orders of withdrawal, regular savings, certain money market deposits and mortgagors' and investors' escrow accounts is the amount payable on demand at the reporting date. The fair value of certificates of deposit and other time deposits is estimated using a discounted cash flow calculation that applies interest rates currently being offered for deposits of similar remaining maturities to a schedule of aggregated expected maturities on such deposits.

Federal Home Loan Bank advances. The fair value of the advances is estimated using a discounted cash flow ealculation that applies current FHLB interest rates for advances of similar maturity to a schedule of maturities of such advances.

Junior subordinated debt owed to unconsolidated trust. Rates currently available for debt with similar terms and remaining maturities are used to estimate fair value of existing debt.

Repurchase Agreement. The fair value of the Company's repurchase agreement is estimated using a discounted cash flow analysis based on current rates in the market for similar types of borrowing arrangements.

Interest rate swap agreements. The fair values of the Company's interest rate swaps are obtained from a third-party pricing service and are determined using a discounted cash flow analysis on the expected cash flows of the derivative. The pricing analysis is based on observable inputs for the contractual term of the derivative, including the period to maturity and interest rate curves.

Forward loan sale commitments and derivative loan commitments. Forward loan sale commitments and derivative loan commitments are based on the fair values of the underlying mortgage loans, including the servicing rights for derivative loan commitments, and the probability of such commitments being exercised. Significant management judgment and estimation is required in determining these fair value measurements.

Off-balance sheet instruments. Fair values for off-balance sheet lending commitments are based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standings.

## <u>Table of Contents</u> SI FINANCIAL GROUP, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS SEPTEMBER 30, 2013 AND 2012 AND DECEMBER 31, 2012

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The following tables present assets and liabilities measured at fair value on a recurring basis as of September 30, 2013 and December 31, 2012. The Company had no significant transfers into or out of Levels 1, 2 or 3 during the nine months ended September 30, 2013.

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

The Company may also be required, from time to time, to measure certain other financial assets on a nonrecurring basis in accordance with generally accepted accounting principles. These adjustments to fair value usually result from the application of lower-of-cost-or-market accounting or write-downs of individual assets. The following table summarizes the fair value hierarchy used to determine each adjustment and the carrying value of the related individual assets at September 30, 2013 and December 31, 2012. There were no liabilities measured at fair value on a nonrecurring basis at September 30, 2013 and December 31, 2012.

|                         | At September 30, 2013 |         | At December |         |         |         |
|-------------------------|-----------------------|---------|-------------|---------|---------|---------|
|                         | Level 1               | Level 2 | Level 3     | Level 1 | Level 2 | Level 3 |
|                         | (In Thousands)        |         |             |         |         |         |
| Impaired loans          | \$—                   | \$—     | \$1,243     | \$—     | \$—     | \$1,616 |

The Company measures the impairment of loans that are collateral dependent based on the fair value of the collateral (Level 3). The fair value of collateral used by the Company represents the amount expected to be received from the sale of the property, net of selling costs, as determined by an independent, licensed or certified appraiser using observable market data. This data includes information such as selling price of similar properties, expected future cash flows or earnings of the subject property based on current market expectations, and relevant legal, physical and economic factors. The appraised values of collateral are adjusted as necessary by management based on observable inputs for specific properties. Losses applicable to write-downs of impaired loans are based on the appraised market

value of the underlying collateral, assuming foreclosure of these loans is imminent, and are charged against the allowance for loan losses.

## Table of Contents SI FINANCIAL GROUP, INC. NOTES TO CONSOLIDATED FINANCIAL STATEMENTS SEPTEMBER 30, 2013 AND 2012 AND DECEMBER 31, 2012

The amount of other real estate owned represents the carrying value of the collateral based on the appraised value of the underlying collateral less estimated selling costs. The loss on foreclosed assets represents adjustments in the valuation recorded during the time period indicated and not for losses incurred on sales.

Summary of Fair Values of Financial Instruments

The estimated fair values, and related carrying or notional amounts, of the Company's financial instruments are presented in the following table. Certain financial instruments and all nonfinancial instruments are exempt from disclosure requirements. Accordingly, the aggregate fair value amounts presented do not represent the underlying value of the Company.

Management uses its best judgment in estimating the fair value of the Company's financial instruments; however, there are inherent weaknesses in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates presented herein are not necessarily indicative of the amounts the Company could have realized in a sales transaction at September 30, 2013 and December 31, 2012. The estimated fair value amounts at September 30, 2013 and December 31, 2012. The estimated fair value amounts at September 30, 2013 and December 31, 2012 have been measured as of each respective date, and have not been re-evaluated or updated for purposes of the consolidated financial statements subsequent to those respective dates. As such, the estimated fair values of these financial instruments subsequent to the respective reporting dates may be different than the amounts reported at each period-end. The information presented should not be interpreted as an estimate of the fair value of the entire Company since a fair value calculation is only required for a limited portion of the Company's assets. Due to the wide range of valuation techniques and the degree of subjectivity used in making the estimate, comparisons between the Company's disclosures and those of other banks may not be meaningful.
