(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended December 31, 2017

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 001-35628

PERFORMANT FINANCIAL CORPORATION
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

20-0484934
(I.R.S. Employer
Identification No.)

333 North Canyons Parkway, Livermore, CA 94551
(Address of principal executive offices) (Zip Code)
Registrant's telephone number, including area code: (925) 960-4800

Securities registered pursuant to Section 12(b) of the Act:

Title of each class: _____ Name of each exchange on which registered:
Common Stock, par value \$.0001 per share NASDAQ Global Select Market

Securities registered pursuant to Section 12(g) of the Act:

Common Stock, par value \$.0001 per share
(Title of class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (section 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Edgar Filing: Performant Financial Corp - Form 10-K

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

As of June 30, 2017 (the last business day of the registrant's most recently completed second quarter), the aggregate market value of the common stock held by non-affiliates of the registrant was \$54,592,098. Shares of common stock beneficially held by each officer and director and by each person who owns 10% or more of the outstanding common stock have been excluded in that such persons may be deemed to be affiliates. This determination of affiliate status is not necessarily a conclusive determination for other purposes.

As of March 13, 2018, 51,360,328 shares of the registrant's common stock were outstanding.

Documents Incorporated By Reference

All or a portion of Items 10 through 14 in Part III of this Form 10-K are incorporated by reference to the Registrant's definitive proxy statement on Schedule 14A, which will be filed within 120 days after the close of the fiscal year covered by this report on Form 10-K, or if the Registrant's Schedule 14A is not filed within such period, will be included in an amendment to this Report on Form 10-K which will be filed within such 120 day period.

Cautionary Statement Regarding Forward-Looking Information

This Annual Report on Form 10-K contains, in addition to historical information, certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact contained in this Annual Report on Form 10-K, including statements regarding our future results of operations and financial position, strategy and plans, and our expectations for future operations, are forward-looking statements. The words “believe,” “may,” “estimate,” “continue,” “anticipate,” “design,” “intend,” “expect” and similar expressions are intended to identify forward-looking statements. We have based these forward-looking statements largely on our current expectations and projections about future events and trends that we believe may affect our financial condition, results of operations, strategy, short-term and long-term business operations and objectives, and financial needs. Forward-looking statements include, but are not limited to, statements about:

- our opportunities and expectations for growth in the student lending, healthcare and other markets;
- anticipated trends and challenges in our business and competition in the markets in which we operate;
- our client relationships and future growth opportunities;
- the adaptability of our technology platform to new markets and processes;
- our ability to invest in and utilize our data and analytics capabilities to expand our capabilities;
- our growth strategy of expanding in our existing markets and considering strategic alliances or acquisitions;
- our ability to meet our liquidity and working capital needs;
- maintaining, protecting and enhancing our intellectual property;
- our expectations regarding future expenses;
- expected future financial performance; and
- our ability to comply with and adapt to industry regulations and compliance demands.

These statements reflect current views with respect to future events and are based on assumptions and subject to risks and uncertainties. There are a variety of factors could cause actual results to differ materially from the anticipated results or expectations expressed in our forward-looking statements. These risks and uncertainties include, but are not limited to, those risks discussed in Item 1A of this report. Given these uncertainties, you should not place undue reliance on these forward-looking statements.

Forward-looking statements contained in this report present management’s views only as of the date of this report. We undertake no obligation to publicly update forward-looking statements, whether as a result of new information, future events or otherwise. You are advised, however, to consult any further disclosures we make on related subjects in our quarterly reports on Form 10-Q and current reports on Form 8-K filed with the Securities and Exchange Commission.

ITEM 1. Business

Overview

We provide technology-enabled audit, recovery, customer care, and related analytics services in the United States. Our services help identify improper payments, and in some markets, restructure and recover delinquent or defaulted assets and improper payments for both government and private clients in a broad range of markets. Our clients typically operate in complex and regulated environments and outsource their audit and recovery needs in order to reduce losses on billions of dollars of defaulted student loans, improper healthcare payments and delinquent state tax and federal treasury and other receivables. We also provide complex customer care services for clients across our various markets. We generally provide our services on an outsourced basis, where we handle many or all aspects of our clients’ audit and recovery processes.

We believe we have a leading position in our markets based on our technology-enabled services platform, long-standing client relationships and the large volume of claims or funds we have audited and recovered for our clients. Our clients in the student loan recovery market include 7 of the 27 active guaranty agencies, which are state or non-profit agencies that administer and rehabilitate student loans issued under the former federally-governed student loan program and these relationships average more than 10 years in length. As of September 30, 2017, guaranty agencies, or GAs, held approximately \$30.0 billion of defaulted government-supported student loans. In the healthcare market, we have been a Medicare Recovery Audit Contractor, or RAC, in the United States for the Centers for

Edgar Filing: Performant Financial Corp - Form 10-K

Medicare and Medicaid Services, or CMS, since 2009, with responsibility for identifying improper Parts A and B Medicare payments in the Northeastern United States. On October 26,

1

Table of Contents

2016, CMS awarded new RAC contracts and we received RAC contracts for audit Regions 1 and 5. The RAC contract award for Region 1 allows us to continue our audit of payments under Medicare's Part A and Part B for all provider types other than Durable Medical Equipment, Prosthetics, Orthotics, and Supplies (DMEPOS) and home health and hospice within an 11 state region in the Northeast and Midwest. The Region 5 RAC contract provides for the post-payment review of DMEPOS and home health and hospice claims nationally on an exclusive basis. On October 5, 2017, Performant was also awarded the Medicare Secondary Payer Commercial Repayment Center (CRC) contract by the CMS. Under this agreement, we are responsible for identifying and recovering payments in situations where Medicare should not be the primary payer of healthcare claims because a beneficiary has other forms of insurance coverage, such as through an employer group health plan or certain other payers.

We believe that our business platform is easily adaptable to new markets and processes. Over the past several years, we have successfully extended our platform into additional markets with significant recovery opportunities. For example, we utilized the same basic platform previously used primarily for student loan recovery activities to enter the state tax, federal treasury receivables and healthcare recovery markets. We continue to enhance our platform through investment in new data and analytics capabilities, which we believe will enable us to provide additional services such as services relating to the detection of fraud, waste and abuse. We endeavor to automate and optimize what traditionally have been manually intensive processes in order to drive higher workforce productivity. In 2017, we generated in excess of \$104,000 of revenue per employee, based on the average number of employees during the year. Our revenue model is generally success-based as we earn fees based on a percentage of the aggregate correct audits, and/or amount of funds that we enable our clients to recover. Our services do not require any significant upfront investments by our clients and we offer our clients the opportunity to recover significant funds otherwise lost. Because our model is based upon the success of our efforts, our business objectives are aligned with those of our clients and we are generally not reliant on their spending budgets. Furthermore, our business model does not require significant capital as we do not purchase loans or obligations.

For the year ended December 31, 2017, we generated approximately \$132.0 million in revenues, \$12.7 million in net loss, \$9.2 million in adjusted EBITDA and \$7.5 million in adjusted net loss. See "Management's Discussion and Analysis of Financial Condition and Results of Operations - Adjusted EBITDA and Adjusted Net Income" in Item 7 below for a definition of adjusted EBITDA and adjusted net income and reconciliations of adjusted EBITDA and adjusted net income to net income determined in accordance with generally accepted accounting principles.

We commenced our operations in 1976 under the corporate name Diversified Collection Services, Inc., or DCS. We were incorporated in Delaware on October 8, 2003 under the name DCS Holdings, Inc. and subsequently changed our name to Performant Financial Corporation. Our website address is www.performantcorp.com.

Our Markets

We operate in markets characterized by strong growth, a complex regulatory environment and a significant amount of delinquent, defaulted or improperly paid assets.

Student Lending

Government-supported student loans are authorized under Title IV of the Higher Education Act of 1965. Historically, there have been two distribution channels for student loans: (i) the Federal Direct Student Loan Program, or FDSLSP, which represents loans made and managed directly by the Department of Education; and (ii) the Federal Family Education Loan Program, or FFELP, which represents loans made by private institutions and currently backed by any of the 27 Guaranty Agencies, or GAs.

In July 2010, the government-supported student loan sector underwent a structural change with the passage of the Student Aid and Fiscal Responsibility Act, or SAFRA. This legislation transitioned all new government-supported student loan originations to the FDSLSP, and away from originations made by private institutions within the FFELP that had previously utilized the GAs to guarantee, manage and service loans. The GAs are non-profit 501(c)(3) public benefit corporations operating under contract with the U.S. Secretary of Education, pursuant to the Higher Education Act of 1965, as amended, solely for the purpose of guaranteeing and managing student loans originated by lenders participating in the FFELP. Consequently, while the original distribution channels for student loans have been consolidated into one channel, the Department of Education, this does not impact the volume of government-supported student loan origination, which is a key driver of the volume of defaulted student loan

inventory. In addition, despite this transition of all new loan originations to the FDSLPL, GAs will continue to manage a significant amount of defaulted student loans for some period of time, due to their large outstanding portfolios of loans originated prior to July 2010. The outstanding portfolios of defaulted FFELP loans will, therefore, require recovery for the foreseeable future.

Table of Contents

The Department of Education estimates that the balance of defaulted loans was approximately \$70.7 billion in the FDSLPL and approximately \$32.2 billion in the FFELP as of September 30, 2017. These programs collectively guaranteed approximately \$1.2 trillion of federal government-supported student loans according to the Congressional Budget Office as of September 30, 2017. Given the operational and logistical complexity involved in managing the recovery of defaulted student loans, the GAs and the Department of Education generally choose to outsource these services to third parties.

Healthcare

The healthcare industry represents a significant portion of the U.S. GDP. According to CMS, U.S. healthcare spending reached \$3.3 trillion in 2016 and is forecast to grow at a 5.5% compound annual growth rate through 2025. In particular, CMS indicates that federal government-related healthcare spending for 2016 totaled approximately \$1.2 trillion. This federal government-related spending included approximately \$678.6 billion for Medicare, which provides a range of healthcare coverage primarily to elderly and disabled Americans, and \$565.5 billion for Medicaid, which provides federal matching funds for states to finance healthcare for individuals at or below the public assistance level.

Medicare was initially established as part of the Social Security Act of 1965 and consists of four parts: Part A covers hospital and other inpatient stays; Part B covers hospital outpatient, physician and other services; Part C is known as Medicare Advantage, under which beneficiaries receive benefits through private health plans; and Part D is the Medicare outpatient prescription drug benefit.

Of the \$678.6 billion of Medicare spending in 2016, the Department of Health and Human Services estimated that approximately \$36.2 billion, or approximately 9.5%, was improper, and that Medicare is the federal program with the largest amount of improper payments. Medicare improper payments generally involve incorrect coding, procedures performed which were not medically necessary, and incomplete documentation or claims submitted based on outdated fee schedules, among other issues.

In accordance with the Medicare Prescription Drug, Improvement, and Modernization Act of 2003, a demonstration program was conducted from March 2005 to March 2008 in six states to determine if recovery audit contractors could be effectively used to identify improper payments for claims paid under Medicare Part A and Part B. Due to the success of this demonstration, under The Tax Relief and Health Care Act of 2006, the U.S. Congress authorized the expansion of the recovery audit program nationwide. CMS relies on third-party contractors to execute the recovery audit program to analyze millions of Medicare claims annually for improper payments to healthcare providers. The program was implemented by designating one prime contractor in each of the four major regions in the United States: West, Midwest, South, and Northeast. Contracts with recovery audit contractors, or RACs, were initially awarded in 2009. These contracts effectively expired in 2016 and new contracts were awarded in October 2016.

In addition to government-related healthcare spending, significant growth in spending is expected in the private healthcare market. According to CMS' National Health Expenditures Projections, the private healthcare market accounted for approximately \$961 billion in spending in 2013 and private expenditures are projected to grow more than 5.7% annually through 2023.

Other Markets

State Tax Market

As state governments struggle with revenue generation and face significant budget deficits, many states have focused on recovery of delinquent state taxes. According to the Center on Budget and Policy Priorities, an independent think tank, 31 U.S. states faced projected budget shortfalls totaling \$46.1 billion in 2017 and 2018. The economic recession beginning in 2008 led to lower income and sales taxes from both individuals and corporations, reducing overall tax revenues and leading to large budget deficits at the state government level. Although there has been some improvement (from \$55 billion in 2013 to \$46.1 billion in 2017 and 2018), the budget deficits continue to be a challenge for these states. While many states have received federal aid, most have cut services and increased taxes to help close the budget shortfall and have evaluated outsourcing at least some aspect of delinquent tax recovery.

Federal Agency Market

The federal agency market consists of government debt subrogated to the Department of the Treasury by numerous different federal agencies, comprising a mix of commercial and individual obligations and a diverse range of

receivables. These debts are managed by the Bureau of the Fiscal Service (formerly the Department of Financial Management Service), or FS, a bureau of the Department of the Treasury. Since 1996, the FS has recovered more than \$63 billion in delinquent federal and

Table of Contents

state debt. For the fiscal year ended September 30, 2013, federal agency recoveries in this market totaled more than \$7 billion, an increase of more than \$13 million over 2012. A significant portion of these collections are processed by private collection firms on behalf of the FS.

Federal Tax Market

We also provide recovery services to the Internal Revenue Service, or IRS. In September 2016, IRS announced its plans to begin private collection of certain federal tax debts starting in the spring of 2017 and named us as one of four companies to perform these recovery services. The new program, authorized under a federal law, calls for the use of private companies to recover, on the government's behalf, outstanding inactive tax receivables. Although work under this contract began in April 2017, the placement volumes were very low given the IRS objective of a methodical contract start. As we head into 2018, we do expect to receive more substantial placements of federal tax receivables from the IRS.

Our Competitive Strengths

We believe that our business is difficult to replicate, as it incorporates a combination of several important and differentiated elements, including:

Scalable and flexible technology-enabled services platform. We have a technology platform that is highly flexible, intuitive and easy to use for our audit, recovery and claims specialists. Our platform is easily configurable and deployable across multiple markets and processes. For example, we have successfully extended our platform from the student loan market to the state and federal tax, federal treasury receivables and the healthcare recovery markets, each having its own industry complexities and specific regulations.

Advanced, technology-enabled workflow processes. Our technology-enabled workflow processes, developed over many years of operational experience in recovery services, disaggregate otherwise complex recovery processes into a series of simple, efficient and consistent steps that are easily configurable and applicable to different types of recovery-related applications. We believe our workflow software is highly intuitive and helps our audit, recovery and claims specialists manage each step of the recovery process, while automating a series of otherwise manually-intensive and document-intensive steps in the recovery process. We believe our streamlined workflow technology drives higher efficiencies in our operations, as illustrated by our ability to generate in excess of \$104,607 of revenues per employee during 2017, based on the average number of employees during the year. We believe our streamlined workflow technology also improves recovery results relative to more labor-intensive outsourcing models.

Strong data and analytics capabilities. Our data and analytics capabilities allow us to achieve strong audit results and recovery rates for our clients. We have a proprietary data management and analysis platform which we use throughout our business. In some of our businesses, we have collected recovery-related data for over two decades, which we combine with large volumes of client and third-party data to effectively analyze our clients' delinquent or defaulted assets and improper payments. We have also developed a number of analytical models for claims auditing, and analytics tools that we use to score our clients' recovery inventory, determine the optimal recovery process and allocation of resources, and achieve higher levels of recovery results for our clients. In addition, we utilize analytics tools to continuously measure and test our recovery workflow processes to drive refinements and further enhance the quality and effectiveness of our capabilities.

Long-standing client relationships. We believe our long-standing focus on achieving superior recovery performance for our clients and the significant value our clients derive from this focus have helped us achieve long-tenured client relationships, strong contract retention and better access to new clients and future growth opportunities. We have business relationships with seven GAs in the student loan market and these relationships average more than 10 years in length. With respect to the Department of Education, we are the only vendor partner to have participated in consecutive Department of Education collection contracts continuously since the inception of the defaulted student loan recovery program in the early 1990's. In the healthcare market, we have a relationship with CMS that exceeds ten

Edgar Filing: Performant Financial Corp - Form 10-K

years. In October 2016 we were awarded two contracts out of the second recovery audit program procurement process, including for a region consisting of 11 states in the Northeast and Midwest and the national DMEPOS and home health contract. In October 2017, we were awarded a national exclusive Medicare Secondary Payer Commercial Repayment Center (CRC) contract by CMS.

• Extensive domain expertise in complex and regulated markets. We have extensive experience and domain expertise in providing recovery services for government and private institutions that generally operate in complex

4

Table of Contents

and regulated markets. We have demonstrated our ability to develop domain expertise in new markets such as healthcare and state tax and federal Treasury receivables. We believe we have the necessary organizational experience to understand and adapt to evolving public policy and how it shapes the regulatory environment and objectives of our clients. We believe this helps us identify and anticipate growth opportunities. For example, we successfully identified government healthcare as a potential growth opportunity that has thus far led to the award of five contracts to us by CMS. Together with our flexible technology platform, we have the ability to adapt our business strategy, to allocate resources and to respond to changes in our regulatory environment to capitalize on new growth opportunities.

Proven and experienced management team. Our management team has significant industry experience and has demonstrated strong execution capabilities. Our senior management team, led by Lisa Im, has been with us for an average of approximately 16 years. This team has successfully grown our revenue base and service

- offerings beyond the original student loan market into healthcare and delinquent state and federal tax and private financial institutions receivables. Our management team's industry experience, combined with deep and specialized understanding of complex and highly regulated industries, has enabled us to maintain long-standing client relationships and strong financial results.

Our Growth Strategy

Key elements of our growth strategy include the following:

Expand our student loan recovery volume. The balance of defaulted government-supported student loans was approximately \$102.9 billion as of September 30, 2017. While we have long-standing relationships with some of the largest participants in the government-supported student loan market, we believe there are significant opportunities within this growing market to increase the volume of student loans placed with us by existing and new clients. For example, as a result of our relationships with four of the five largest GAs, we believe we are well-positioned to benefit as a result of any consolidation of smaller GAs over the coming years. After a lengthy award and subsequent protest process for the award of new contracts by the Department of Education, in January 2018, we were selected as one of two recovery contractors for the Department of Education. We believe that our overall experience of more than 25 years in the federal guaranteed student loan market will be critical in providing effective service to the Department of Education under this new contract. Protests have been filed by certain of the unsuccessful bidders of the procurement of the new contracts from the Department of Education, and at this time, we cannot speculate on the outcome of any such protest or when work will begin under our new contract award.

Expand our recovery services in the healthcare market. According to CMS, Medicare spending totaled approximately \$678.6 billion in 2016 and is expected to increase to \$1.3 trillion in 2025. In the private healthcare market, spending totaled \$1.1 trillion in 2016 and is expected to grow to \$1.8 trillion by 2025, according to CMS' National Health Expenditures Projections. As these large markets continue to grow, we expect the need for audit and recovery services to increase in the public and private healthcare markets. In October 2016, we were awarded new RAC contracts for Region 1 which consists of 11 states in the Northeast and Midwest, and Region 5, which covers claims for durable medical equipment, prosthetics and orthotics and home health and hospice payment claims across the U.S. In October 2017, we were awarded the national exclusive Medicare Secondary Payer CRC contract by CMS. We have also entered into numerous private insurance payer contracts and are pursuing additional opportunities to provide audit, recovery and analytics services in the private healthcare market. In addition, we intend to pursue opportunities to find and eliminate losses prior to payment for healthcare services, including the detection of fraud, waste and abuse in the public and private healthcare markets.

Expand customer care, and recovery services in other markets. We intend to expand our customer care, and recovery services in other markets, including the private healthcare recovery market, state and federal tax and federal treasury receivables. We intend to capitalize on our extensive experience and domain expertise and our highly-flexible technology platform to seek opportunities in these additional markets.

•

Pursue strategic alliances and acquisitions. We intend to selectively consider opportunities to grow through strategic alliances or acquisitions that are complementary to our business. These opportunities may enhance our existing capabilities, enable us to enter new markets, expand our product offerings and allow us to diversify our revenues.

5

Table of Contents

Our Platform

Our data management, analytics, and technology-enabled services platform is proprietary and based on over two decades of experience in auditing and recovering large amounts of funds on behalf of our clients across several markets. The components of our platform include our data management expertise, analytics capabilities and technology-based workflow processes. Our platform integrates these components to allow us to achieve optimized outcomes for our clients in the form of increased efficiency and productivity and high recovery rates. Our platform and workflow processes are also intuitive and easy to use for our recovery and claims specialists and allow us to increase our employee retention and productivity.

The components of our platform include the following:

Data Management Expertise

Our platform manages and stores large amounts of data throughout the workflow process. This includes both proprietary data we have compiled over two decades, as well as third-party data which we can integrate efficiently and in real-time to reduce errors, reduce cycle time processing and, ultimately, improve audit finding and recovery rates. The strength of our data management expertise augments our analytics capabilities and provides our recovery and claims specialists with powerful workflow processes.

Data Analytics Capabilities

Our data analytics capabilities efficiently screen and allocate massive volumes of inventory. For example, in our student loan business, we utilize our proprietary algorithms to assist us in determining the most efficient recovery process and the optimal allocation of recovery specialist resources for each loan. In the healthcare market, we analyze millions of healthcare claims to find potential correlations between claims data and improper payments, which enhance our finding rates. Across all of our current markets, we utilize our proprietary analytics tools to continuously and rigorously test our workflow processes in real-time to drive greater process efficiency and improvement in recovery rates.

Furthermore, we believe our analytics capabilities will extend our potential markets, permitting us to pursue significant new business opportunities. For example, we have expanded the use of our data analytics capabilities in the healthcare sector to offer a variety of services from post- and pre-payment audit of healthcare claims in both the public and private healthcare sector, to detection of fraud, waste and abuse of healthcare claims, to coordination of benefits and pharmacy fraud detection.

Workflow Processes

Over many years, we have developed and refined our workflow processes, which we believe drive higher efficiency and productivity and reduce our reliance on labor-intensive methods relative to more traditional outsourcing models. Our patented technology that supports our proprietary workflows to disaggregate otherwise complex processes into a series of simple, efficient and consistent steps that are easily configurable and applicable to different types of applications. Our workflow processes integrate a broad range of functions that encompass each stage of a workflow process.

Table of Contents

The following recovery diagram illustrates how the various components of our platform work together to solve a typical recovery client workflow:

7

Table of Contents

Our Services

We use our technology-enabled services platform to provide recovery and analytics services in a broad range of markets for the identification and recovery of student loans, improper healthcare payments and delinquent state and federal tax and federal treasury receivables. The table below summarizes our recovery services and related analytics capabilities and the markets we serve.

| Recovery Services | Healthcare | Other Markets | Analytics Capabilities |
|--|--|---|--|
| <p>Student Loans</p> <ul style="list-style-type: none"> • Provide recovery services to clients in Federal guaranteed student loan program and private institutions • Identify and track defaulted borrowers across our clients' portfolios of student loans • Utilize our proprietary technology, our history of borrower data and our analytics capabilities to rehabilitate and recover past due student loans • Earn contingent, success-based fees calculated as a percentage of funds that we enable our clients to recover | <ul style="list-style-type: none"> • Provide audit and recovery services to identify improper healthcare payments for public and private healthcare clients • Identify improper payments typically resulting from incorrect coding, procedures that were not medically necessary, incomplete documentation or claims submitted based on outdated fee schedules • Earn contingent, success-based fees based on a percentage of claim amounts recovered | <ul style="list-style-type: none"> • Provide tax recovery services to state and municipal agencies and the IRS • Recover government debt for numerous different federal agencies under a contract with the Treasury • Enable financial institutions to proactively manage loan portfolios and reduce the incidence of defaulted loan assets • Earn contingent, success-based fees calculated as a percentage of the amounts recovered, fees based on dedicated headcount and hosted technology licensing fees | <ul style="list-style-type: none"> • We use our enhanced data analytics capabilities, which we refer to as Performant Insight, to offer a variety of services from post- and pre-payment audit of healthcare claims to detection of fraud, waste and abuse of healthcare claims, to coordination of benefits and pharmacy fraud detection |

Recovery Services
Student Loans

We provide recovery services primarily to the government-supported student loan industry, and our current clients include several of the largest GAs, the Department of Education, as well as private financial institutions. We use our proprietary technology to identify, track and communicate with defaulted borrowers on behalf of our clients to implement suitable recovery programs for the repayment of outstanding student loan balances.

Our clients contract with us to provide recovery services for large pools of student loans generally representing a portion of the total outstanding defaulted balances they manage, which they provide to us as “placements” on a periodic basis. Generally, the volume of placements that we receive from our clients is influenced by our performance under our contracts and our ability to recover funds from defaulted student loans, as measured against the performance of competitors who may service a similar pool of defaulted loans for the same client. To the extent we perform well under our existing contracts and differentiate our services from those of our competitors, we may receive a relatively greater number of student loan placements under these contracts and may improve our ability to obtain future contracts from these clients and other potential clients.

We use algorithms derived from over two decades of experience with defaulted student loans to make reasonably accurate estimates of the recovery outcomes likely to be derived from a placement of defaulted student loans.

Edgar Filing: Performant Financial Corp - Form 10-K

The Department of Education has historically been our largest or one of our largest clients, accounting for 15.5%, 23.8%, and 27.2% of our revenues in 2016, 2015 and 2014, respectively. In 2017, revenues from the Department of Education fell to 4% of our revenues as a result of the expiration of our prior contract. In January 2018, we were selected as one of two recovery contractors for the Department of Education. We believe that our overall experience of more than 25 years in federal guaranteed student loan market will be critical in providing effective service to the Department of Education under this new contract. Protests have been filed by certain of the unsuccessful bidders of the procurement of the new contracts from the Department of Education, and at this time, we cannot speculate on the outcome of any such protest or when work will begin under our new contract award.

Table of Contents

We also restructure and recover student loans issued directly by banks to students outside of federal lending programs. These types of loans typically supplement government-supported student loans to meet any shortfall in supply of student loan needs that cannot be met by grants or federal loans. Unlike government-supported student loans, private student loans do not have capped interest rates and, accordingly, involve higher instances of default relative to federally-backed student loans. Additionally, with the burgeoning personal loan industry (such as SoFi), we believe there is more opportunity for us to expand services into this private sector.

Healthcare

We provide audit and recovery services related to improper payments in the healthcare market. In October 2016 we were awarded two new RAC contracts by CMS. One new award covers Parts A and B Medicare payments in a region consisting of 11 states in the Northeast and Midwest. The second award involves post-payment review of DMEPOS and home health and hospice claims across the U.S. In addition, in October 2017 we were awarded the national exclusive Medicare Secondary Payer CRC contract by CMS. In addition, we have entered into numerous private insurance payer contracts and are pursuing additional opportunities to provide audit, recovery and analytic services in the private healthcare market.

Under our RAC contracts with CMS, we utilize our technology-enabled services platform to screen Medicare claims against several criteria, including coding procedures and medical necessity standards, to determine whether a claim should be further investigated for recoupment or adjustment by CMS. We conduct automated and, where appropriate, detailed medical necessity reviews. If we determine that the likelihood of finding a potential improper payment warrants further investigation, we request and review healthcare provider medical records related to the claim, utilizing experts in Medicare coding and registered nurses. We interact and communicate with healthcare providers and other administrative entities, and ultimately submit the claim to CMS for correction.

In the private healthcare market, we utilize our technology-enabled services platform to provide audit, recovery and analytical services for private healthcare payors. Our experience from our existing RAC contract has helped establish our presence in the private healthcare market by providing us the opportunity to provide audit and recovery services for several national commercial health plans. Our audit and analytics capabilities have allowed us not only to expand our services with these initial private healthcare clients, but also gain entry into other related private healthcare opportunities.

Other Markets

We also provide recovery services to several federal, state and municipal tax authorities, the Department of the Treasury and a number of financial institutions.

In September 2016 the Internal Revenue Service, or IRS, announced its plans to begin private collection of certain federal tax debts starting in the spring of 2017 and named us as one of four companies to perform these recovery services. The new program, authorized under a federal law, calls for the use of private companies to recover, on the government's behalf, outstanding inactive tax receivables. Although work under this contract began in April 2017, the placement volumes were very low reflecting the IRS's objective of a methodical contract start. As we head into 2018, we do expect to receive more substantial placements of federal tax receivables from the IRS.

For state and municipal tax authorities, we analyze a portfolio of delinquent tax and other receivables placed with us, develop a recovery plan and execute a recovery process designed to maximize the recovery of funds. In some instances, we have also run state tax amnesty programs, which provide one-time relief for delinquent tax obligations, and other debtor management services for our clients. We currently have relationships with numerous state and municipal governments. Delinquent obligations are placed with us by our clients and we utilize a process that is similar to the student loan recovery process for recovering these obligations.

For the Department of the Treasury, we recover government debt subrogated to it by numerous different federal agencies. The placements we are provided represent a mix of commercial and individual obligations. We are one of four contractors for the most recent Treasury contract.

We also provide risk management advisory services that enable these clients to proactively manage loan portfolios and reduce the incidence of defaulted loan assets over time. Our experience suggests that proactive default prevention practices produce significant net yield and earnings gains for our clients. We deliver these services in two forms. First, we contact and consult with borrowers to implement a repayment program, including payment through automatic

debit arrangements, prior to the beginning of the repayment period in order to increase the likelihood that payments begin on time. Second, we offer a service that involves contacting delinquent borrowers in an effort to cure the delinquency prior to the loan entering default.

Table of Contents

Analytics Capabilities

For several years, we have leveraged our data analytics tools to help filter, identify audit claims and recover delinquent and defaulted assets and improper payments as part of our core services platform. Through our data analytics capabilities, which we refer to as Performant Insight, we are able to review, aggregate, and synthesize very large volumes of structured and unstructured data, at high speeds, from the initial intake of disparate data sources, to the warehousing of the data, to the analysis and reporting of the data. We believe we have built a differentiated, next-generation “end-to-end” data processing solution that will maximize value for current and future customers. Performant Insight provides numerous benefits for our audit and recovery services platform. Performant Insight has not only enhanced our existing recovery services under our RAC contracts and other private healthcare contracts by analyzing significantly higher volumes of healthcare claims at faster rates and reducing our cycle time to review and assess healthcare claims, but has also enabled us to develop improved and more sophisticated business intelligence rules that can be applied to our audit processes. We believe our analytics capabilities will extend our potential markets, permitting us to pursue significant new business opportunities. We have expanded the use of our data analytics capabilities in the healthcare sector to offer a variety of services from post and pre-payment audit of healthcare claims in both the public and private healthcare sector, to detection of fraud, waste and abuse of healthcare claims, to coordination of benefits and pharmacy fraud detection.

Our Clients

We provide our services across a broad range of government and private clients in several markets.

Guaranty Agencies

We restructure and recover defaulted student loans issued by private lenders and backed by GAs under the FFELP. With the transition from FFELP to FDSL, GA volume is expected to decline over the next few years. However, the total student loan volume under the Title IV program is expected to continue to increase in the foreseeable future. When a borrower stops making regular payments on a FFELP loan, the GA is obligated to reimburse the lender approximately 97% of the loan’s principal and accrued interest. GAs then seek to recover and restructure these obligations. The GAs with which we contract generally structure one to three-year initial term contracts with multiple renewal periods, and historically the fees that we receive are generally similar to the fees we receive from the Department of Education contract. For some GA clients, we provide services through MSAs, under which we manage a GA’s entire portfolio of defaulted student loans and, for certain clients, engage subcontractors to provide a portion of the recovery services associated with a GA’s student loan portfolio.

We have a relationship with seven active GAs in the U.S. and these relationships average more than 10 years in length. On June 15, 2017, we received a termination notice from one of our significant GA clients, Great Lakes Higher Education Guaranty Corporation (Great Lakes). The termination of this contract was based on Great Lakes’ decision to bundle its student loan servicing work, a service that we currently do not provide, along with its student loan recovery work to a single third party vendor. In September 2017, we entered into a contract with Navient, who is now servicing the Great Lakes portfolio, to act as a recovery subcontractor on the Great Lakes’ portfolio. Under this arrangement, we expect to start recovery services for approximately 25% of the Great Lakes portfolio, and we believe we will have the opportunity to increase this percentage based on our performance. This contract also provides us with the right to service a small portion of an additional portfolio managed by Navient. This contract has no set term, and Navient has the right to terminate the contract at will.

CMS

Our relationship with CMS extends beyond ten years in duration. Under our first RAC contract with CMS, which was awarded in 2009 and expired in 2016, we were responsible for identifying and facilitating the recovery of improper Part A and Part B Medicare payments in the Northeast region of the United States. This RAC contract accounted for approximately 2.3% of our revenues for the year ended December 31, 2017. In October 2016, we were awarded two new RAC contracts. We received the contract to audit improper payments for claims made under Medicare Parts A and B in Region 1, which consists of Connecticut, Michigan, Indiana, Maine, Massachusetts, New Hampshire, New York, Ohio, Kentucky, Rhode Island and Vermont, and the contract for Region 5, which involves post-payment review of claims related to DMEPOS and home health and hospice across the U.S. The fees that we receive for identifying improper payments from CMS under these contracts are entirely contingency-based, and the

contingency-fee percentage depends on the methods of recovery, and, in some cases, the type of improper payment that we identify. Our activity on the new RAC contracts is limited at this time to 0.5% of claims; however, CMS has indicated that there is opportunity to increase the audit percentage based on provider error rates. Additionally, in October 2017 we were awarded the national exclusive Medicare Secondary Payer CRC contract by CMS.

Table of Contents

Department of Education

We have provided student loan recovery services to the Department of Education for approximately 25 years until our most recent contract expired in April 2015. The Department of Education has historically been our largest or one of our largest clients, accounting for 15.5%, 23.8%, and 27.2% of our revenues in 2016, 2015 and 2014, respectively. In 2017, revenues from the Department of Education fell to 4% of our revenues as a result of the expiration of our prior contract. In January 2018, we were selected as one of two recovery contractors for the Department of Education. We believe that our overall experience of more than 25 years in federal guaranteed student loan market will be critical in providing effective service to the Department of Education under this new contract. Protests have been filed by certain of the unsuccessful bidders of the procurement of the new contracts from the Department of Education, and at this time, we cannot speculate on the outcome of any such protest or when work will begin under our new contract award.

U.S. Department of the Treasury

We have assisted the Department of the Treasury for 20 years in the recovery of delinquent receivables owed to a number of different federal agencies. The debt obligations we help to recover on behalf of the Department of the Treasury include commercial and individual debt obligations. We are one of the six firms servicing the current Department of the Treasury contract. Similar to our other recovery contracts, our fees under this contract are contingency-based. We view this as an important strategic relationship, as it provides us valuable insight into other business opportunities within the federal government.

State Tax and Municipal Agencies

We provide outsourced recovery services for individuals' delinquent state tax and other municipal obligations on a hosted model and under MSAs. We currently have relationships with ten state and municipal governments.

Private Lenders

We provide recovery services for private student loans, which supplement federally guaranteed loans, and home mortgages to private lenders. Additionally, with the burgeoning personal loan industry (such as SoFi), we believe there is more opportunity for us to expand services into this private sector.

Internal Revenue Service

In September 2016 the Internal Revenue Service, or IRS, announced it plans to begin private collection of certain federal tax debts starting in 2017 and awarded us a contract to perform these recovery services. The new program, authorized under a federal law enacted by Congress, enables us, along with three other contractors to collect, on the government's behalf, outstanding inactive tax receivables. Our ability to recover these receivables will be limited to accounts where taxpayers owe money, but the IRS is no longer actively working their accounts. Although work under this contract began in April 2017, the placement volumes were very low given the IRS objective of a methodical contract start. As we head into 2018, we do expect to receive more substantial placements of federal tax receivables from the IRS.

Sales and Marketing

Our new business opportunities have historically been driven largely by referrals and natural extensions of our existing client relationships, as well as a targeted outreach by our sales team and senior management. Our sales cycles are often lengthy, and demand high levels of attention from our senior management. At any point in time, we are typically focused on a limited number of potentially significant new business opportunities. As a result, to date, we have operated with a small staff of experienced individuals with responsibility for developing new sales, relying heavily upon our executive staff, including an appropriate sales and marketing team covering various markets.

Technology Operations

Our technology center is based in Livermore, California, with a redundant capacity in our Grants Pass, Oregon office. Additionally, Performant Insight, our data analytics business, is supported by staff in Sunrise, Florida. We have designed our infrastructure for scalability and redundancy, which allows us to continue to operate in the event of an outage at either datacenter. We maintain an information systems environment with advanced network security intrusion detection and prevention with 24x7 monitoring and security incident response capabilities. We utilize encryption technologies to protect sensitive data on our systems, all data during transmission and all data on redundancy or backup media. We also maintain a

Table of Contents

comprehensive enterprise wide information security program based on industry standards such as NIST 800-53, PCI/DSS and HiTRUST.

Competition

We face significant competition in all aspects of our business.

In recovery services for delinquent and defaulted assets, we face competition from a number of companies. Holders of these delinquent and defaulted assets typically engage several firms simultaneously to provide recovery services on different portions of their portfolios. The number of recovery firms engaged varies by client. Initially, we compete to be one of the retained firms in a competitive bidding process and, if we are successful, we then face continuing competition from the client's other retained firms based on the client's benchmarking of the recovery performance of its several vendors. Some clients will allocate additional placements to those recovery vendors producing the highest recovery rates. We believe that we primarily compete on the basis of recovery rate performance, as well as maintenance of high standards of recovery practices and data security capabilities. We believe that we compete favorably with respect to these factors as evidenced by our long-standing relationships with our clients in these markets. Pricing is not usually a major competitive factor as all recovery services vendors in these markets typically receive the same contingency-based fee rate.

In the audit and recovery of improper healthcare payments, we face competition in the bidding process for commercial healthcare contracts, and the RAC contracts awarded by CMS. However, based on our structured, highly professional and effective recovery process within the healthcare market, we believe there are contracts for which we are uniquely qualified. This qualification allows us to compete more effectively for contracts such as the Medicare Secondary Payer Commercial Repayment Center (CRC) contract, which we were awarded in October 2017. In the most recent RAC bidding process, the identified competitive factors were demonstrated experience in effective recovery services in the healthcare market, sufficient capacity to address claims volumes, maintenance of high standards of recovery practices, financial capability to perform under the RAC contract and recovery fee rates. In the commercial healthcare space, those same factors are generally applicable. Our competition in the private healthcare arena includes the other RAC service providers, Health Management Systems, Inc. and Cotiviti, LLC, and a variety of healthcare consulting and healthcare information services companies. Many of these companies have greater financial, technological and other resources than we do.

Government Regulation

The nature of our business requires that we adhere to a complex array of federal and state laws and regulations. These include the Health Insurance Portability and Accountability Act, or HIPAA, the Fair Debt Collection Practices Act, or FDCPA, the Fair Credit Reporting Act, or FCRA, the rules and regulations established by the Consumer Financial Protection Bureau, or CFPB, and related state laws. We are also governed by a variety of state laws that regulate the collection, use, disclosure and protection of personal information. We have implemented and maintain physical, technical and administrative safeguards intended to protect all personal data and we have processes in place to assist us in complying with applicable laws and regulations regarding the protection of this data. Our compliance efforts include training of personnel and monitoring our systems and personnel.

HIPAA and Related State Laws

Our Medicare recovery business subjects us to compliance with HIPAA and various related state laws that contain substantial restrictions and requirements with respect to the use and disclosure of an individual's protected health information. HIPAA prohibits us from using or disclosing an individual's protected health information unless the use or disclosure is authorized by the individual or is specifically required or permitted under HIPAA. Under HIPAA, we must establish administrative, physical and technical safeguards to protect the confidentiality, integrity and availability of electronic protected health information maintained or transmitted by us or by others on our behalf. We are required to notify affected individuals and government authorities of data security breaches involving unsecured protected health information. The Department of Health and Human Services Office of Civil Rights enforces HIPAA privacy violations; CMS enforces HIPAA security violations and the Department of Justice enforces criminal violations of HIPAA. We are subject to statutory penalties for violations of HIPAA.

Most states have enacted patient confidentiality laws that protect against the unauthorized disclosure of confidential medical information, and many states have adopted or are considering further legislation in this area, including

privacy safeguards, security standards and data security breach notification requirements. These state laws, if more stringent than HIPAA requirements, are not preempted by the federal requirements, and we must comply with them even though they may be subject to different interpretations by various courts and other governmental authorities. In addition, numerous other state laws govern the collection, dissemination, use, access to and confidentiality of individually identifiable health and healthcare provider information.

Table of Contents

Our compliance efforts include the encryption of protected health information that we hold and the development of procedures to detect, investigate and provide appropriate notification if protected health information is compromised. Our employees and contractors receive initial and periodic supplemental training and are tested to ensure compliance. As part of our certification and accreditation process, we must undergo audits by federal agencies as noted below. CMS regularly audits us for, among other items, compliance with their security standards.

Privacy Act of 1974

The Privacy Act of 1974 governs the collection, use, storage, destruction and disclosure of personal information about individuals by a government agency and extends to government contractors who have access to agency records performing services for government agencies. The Privacy Act requires maintenance of a code of conduct for employees with access to the agency records addressing the obligations under the Privacy Act, training of employees and discipline procedures for noncompliance. The Privacy Act also requires adopting and maintaining appropriate administrative, technical and physical safeguards to insure the security and confidentiality of records and to protect against any anticipated threats or hazards to their security or integrity.

As a contractor to federal government agencies we are required to comply with the Privacy Act of 1974. Our compliance effort includes initial and ongoing training of employees and contractors in their obligations under the Privacy Act. In addition we have implemented and maintain physical, technical and administrative safeguards and processes intended to protect all personal data consistent with or exceeding our obligations under the Privacy Act.

Certification, Accreditation and Security

Business services that collect, store, transmit or process information for United States government agencies and organizations are required to undergo a rigorous certification and accreditation process to ensure that they operate at an acceptable level of security risk. As a government contractor, we currently have Authority to Operate, or ATO, licenses from both the Department of Education and CMS.

We maintain a comprehensive enterprise-wide information security program based on industry standards such as NIST 800-53, PCI/DSS and HiTRUST. In addition, we hold SSAE – SOC 1 Type II certification, which provides assurance to auditors of third parties that we maintain the necessary controls and procedures to effectively manage third party data. We undergo an independent audit by our government agency clients on the award of the contract and periodically thereafter. We also conduct periodic self-assessments.

Our regulatory compliance group is charged with the responsibility of ensuring our regulatory compliance and security. All our facilities have security perimeter controls with segregated access by security clearance level. The information systems environment maintains advanced network security intrusion detection and prevention with 24x7 monitoring and security incident response capabilities. We utilize encryption technologies to protect sensitive data on our systems, all data during transmission and all data on redundancy or backup media. Employees undergo background and security checks appropriate to their position. This can include security clearances by the Federal Bureau of Investigation. We also maintain compliant disaster recovery and business continuity plans, annually conduct two table top disaster exercises, conduct routine security risk assessments and maintain a continuous improvement process as part of our security risk mitigation and management activity.

FDCPA and Related State Laws

The FDCPA regulates persons who regularly collect or attempt to collect, directly or indirectly, consumer debts owed or asserted to be owed to another person. Certain of our debt recovery and loan restructuring activities may be subject to the FDCPA. The FDCPA establishes specific guidelines and procedures that debt recovery firms must follow in communicating with consumer debtors, including the time, place and manner of such communications. Further, it prohibits harassment or abuse by debt recovery firms, including the threat of violence or criminal prosecution, obscene language or repeated telephone calls made with the intent to abuse or harass. The FDCPA also places restrictions on communications with individuals other than consumer debtors in connection with the collection of any consumer debt and sets forth specific procedures to be followed when communicating with such third parties for purposes of obtaining location information about the consumer. In addition, the FDCPA contains various notice and disclosure requirements and prohibits unfair or misleading representations by debt recovery firms. Finally, the FDCPA imposes certain limitations on lawsuits to collect debts against consumers.

Edgar Filing: Performant Financial Corp - Form 10-K

Prior to the adoption of amendments to the FDCPA as part of the Dodd-Frank Act, no federal agency had the authority to issue interpretative regulations for the FDCPA. As a result, judicial determinations and non-binding interpretative positions issued by the Federal Trade Commission under the FDCPA created compliance difficulties for the consumer debt collections

13

Table of Contents

industry. With the adoption of the amendments to the FDCPA as part of the Dodd-Frank Act in 2011, however, as well as specific statutory authority to issue implementing regulations for the FDCPA, primary jurisdiction for the FDCPA was transferred to the Consumer Financial Protection Bureau, or CFPB. Subsequently, the CFPB has indicated that it may issue proposed regulations under the FDCPA.

Debt recovery activities are also regulated at the state level. Most states have laws regulating debt recovery activities in ways that are similar to, and in some cases more stringent than, the FDCPA. In addition, some states require debt recovery firms to be licensed.

Our compliance efforts include written procedures for compliance with the FDCPA and related state laws, employee training and monitoring, auditing client calls, periodic review, testing and retraining of employees, and procedures for responding to client complaints. In all states where we operate, we believe that we currently hold all required state licenses or are exempt from licensing. Violations of the FDCPA may be enforced by the U.S. Federal Trade Commission, or FTC, or by a private action by an individual or class. Violations of the FDCPA are deemed to be an unfair or deceptive act under the Federal Trade Commission Act, which can be punished by fines for each violation. Class action damages can total up to one percent of the net worth of the entity violating the statute. Attorney fees and costs are also recoverable. In the ordinary course of business, we are sued for alleged violations of the FDCPA and comparable state laws, although the amounts involved in the disposition or settlement of any such claims have not been significant.

TCPA

The Telephone Consumer Protection Act, or TCPA, regulates the initiation of calls (which includes text messages) to residential or cellular telephones, including the use of automatic telephone dialing systems as well as artificial or prerecorded voices. The TCPA requires callers to obtain prior express consent or, in some cases, prior express written consent from individuals before placing restricted calls. Our compliance efforts include confirming a consumer has provided prior express consent consistent with the requirements of the law. Violations of the TCPA may be enforced by the U.S. Federal Communications Commission, or FCC, or by a private action by an individual or class. Violations of the TCPA can be punished by recovery of damages or penalties up to \$1,500 per violation for willful violations. Attorney fees and costs are also recoverable. In the ordinary course of business we are sued for alleged violations of the TCPA and comparable state laws, although the amounts involved in the disposition or settlement of any such claims have not been significant.

FCRA

We are also subject to the Fair Credit Reporting Act, or FCRA, which regulates consumer credit reporting and which may impose liability on us to the extent that the adverse credit information reported on a consumer to a credit bureau is false or inaccurate. State law, to the extent it is not preempted by the FCRA, may also impose restrictions or liability on us with respect to reporting adverse credit information. Our compliance efforts include initial and ongoing training of employees working with consumer credit reports and the monitoring of usage. Violations of FCRA, which are deemed to be unfair or deceptive acts under the Federal Trade Commission Act, are enforced by the FTC or by a private action by an individual or class. Civil actions by consumers may seek damages per violation, with punitive damages, attorney's fees and costs also recoverable. Under the Federal Trade Commission Act, penalties for engaging in unfair or deceptive acts can be punished by fines for each violation.

CFPB

The CFPB was created as part of the Dodd-Frank Act in 2011, with primary implementing and interpretative authority for many federal consumer protection laws, for example the FDCPA, transferred to the CFPB. Among other things, the CFPB was given the authority to issue interpretive regulations for the FDCPA.

In addition to its authority in regard to federal consumer protection laws, the CFPB was also provided direct jurisdiction over certain consumer financial service providers. In October of 2012, the CFPB issued a rule asserting direct jurisdiction over large consumer debt collectors, which includes debt collectors with annual assets of more than \$10 million. In accordance with the calculations included in this rule, we are subject to direct jurisdiction of the CFPB and in the future may be directly examined and supervised by the CFPB. In that regard, the CFPB has also released examination guidance that its examiners will use when reviewing compliance by debt collectors subject to its direct supervision.

Edgar Filing: Performant Financial Corp - Form 10-K

The CFPB focuses on service providers involved in collecting debt related to any consumer financial product from committing unfair, deceptive, or abusive acts or practices, or UDAAPs, in violation of the Dodd-Frank Act. UDAAPs include actions that are unfair and likely to cause substantial injury to consumers, deceptive actions that mislead or likely to mislead a consumer and abusive acts that interfere with the ability of a consumer to understand a term or condition of a consumer financial product or takes unreasonable advantage of a consumer's lack of understanding of a consumer financial product.

Table of Contents

Although abusive acts or practices may also be unfair or deceptive, each of these prohibitions are separate and distinct, and are governed by separate legal standards. Original creditors and other covered persons and service providers involved in collecting debt related to any consumer financial product or service are subject to the prohibition against UDAAPs. The CFPB has indicated that it will continue to review closely the practices of those engaged in the collection of consumer debts for potential UDAAPs in violation of the Dodd-Frank Act.

State Law Compliance and Security Breach Response

Many states impose an obligation on any entity that holds personally identifiable information or health information to adopt appropriate security to protect such data against unauthorized access, misuse, destruction, or modification. Many states have enacted laws requiring holders of personal information to take certain actions in response to data breach incidents, such as providing prompt notification of the breach to affected individuals and government authorities. In many cases, these laws are limited to electronic data, but states are increasingly enacting or considering stricter and broader requirements. Massachusetts has enacted a regulation that requires any entity that holds, transmits or collects certain personal information about its residents to adopt a written data security plan meeting the requirements set forth in the statute. We have implemented and maintained physical, technical and administrative safeguards intended to protect all personal data and have processes in place to assist us in complying with applicable laws and regulations regarding the protection of this data and properly responding to any security incidents. We have adopted a system security plan and security breach incident response plans to address our compliance with these laws.

Intellectual Property

Our intellectual property is a significant component of our business, including, most notably, the intellectual property underlying our proprietary technology-enabled services platform through which we provide our defaulted asset recovery and other services. To protect our intellectual property, we rely on a combination of intellectual property rights, including patents, trade secrets, trademarks and copyrights. We also utilize customary confidentiality and other contractual protections, including employee and third-party confidentiality and invention assignment agreements. As of December 31, 2017, we had two U.S. patents, both covering aspects of the workflow management systems and methods incorporated into our technology-enabled services platform. These patents will expire in September 2024. We routinely assess appropriate occasions for seeking additional patent protection for those aspects of our platform and other technologies that we believe may provide competitive advantages to our business. We also rely on certain unpatented proprietary expertise and other know-how, licensed and acquired third-party technologies, and continuous improvements and other developments of our various technologies, all intended to maintain our leadership position in the industry.

As of December 31, 2017, we had five trademarks registered with the U.S. Patent and Trademark office: DCS, Performant Recovery, Performant Technologies, Discovery Analytics, and Performant Insight.

We have registered copyrights covering various copyrighted material relevant to our business. We also have unregistered copyrights in many components of our software systems. We may not be able to use these unregistered copyrights to prevent misappropriation of such content by unauthorized parties in the future; however, we rely on our extensive information technology security measures and contractual arrangements with employees and third-party contractors to minimize the opportunities for any such misuse of this content.

We are not subject to any material intellectual property claims alleging that we infringe, misappropriate or otherwise violate the intellectual property rights of any third party, nor have we asserted any material intellectual property infringement claim against any third party.

Employees

As of December 31, 2017, we had approximately 1,260 full-time employees. None of our employees is a member of a labor union and we consider our employee relations to be good.

Available Information

The SEC maintains an Internet site at <http://www.sec.gov> that contains our Annual Report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports, if any, or other filings filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, or the Exchange Act, proxy and information statements. All reports that we file with the SEC may be read and copied at the SEC's Public Reference Room at

Table of Contents

100 F Street, N.E., Washington, DC, 20549. Information about the operation of the Public Reference Room can be obtained by calling the SEC at 1-800-SEC-0330.

ITEM 1A. Risk Factors

Our business, financial condition, results of operations and liquidity are subject to various risks and uncertainties, including those described below, and as a result, the trading price of our common stock could decline.

Risks Related to Our Business

Revenues generated from our three largest clients represented 63% of our revenues in 2017 and 55% of our revenues in 2016 and our relationships with one of these clients, Great Lakes Higher Education Guaranty Corporation, has been terminated. Any termination of or deterioration in our relationship with any of our other significant clients would result in a further decline in our revenues.

We have derived a substantial majority of our revenues from a limited number of clients, including the Department of Education, and several Guaranty Agencies. Revenues from our three largest clients represented 63% of our revenues for the year ended December 31, 2017 and 55% of our revenues for the year ended December 31, 2016. The Department of Education was responsible for approximately 4% and 16% of our revenues for the years ended December 31, 2017 and December 31, 2016, respectively but has historically been one of our largest clients, accounting for 15.5%, 23.8%, and 27.2% of our revenues in 2016, 2015 and 2014, respectively. Although the Department of Education announced in January 2018 that we were selected as one of two recovery contractors under its award for new student loan recovery contracts, protests have been filed by the unsuccessful bidders, and at this time, we cannot speculate on the outcome of any such protest or when work will begin under our new contract award. We have had relationships with numerous GAs in the U.S. including Great Lakes Higher Education Guaranty Corporation (Great Lakes) and Pennsylvania Higher Education Assistance Authority, which were responsible for 33% and 21%, respectively, of our revenues for the year ended December 31, 2017. On June 15, 2017, we received a 30-day termination notice, with respect to our contract with Great Lakes Higher Education Guaranty Corporation. The termination of this contract was based on Great Lakes' decision to bundle its student loan servicing work, a service that we currently do not provide, along with its student loan recovery work, with a single third party vendor. While we subsequently obtained a subcontract under Navient, the new provider of servicing and defaulted portfolio management to Great Lakes, this contract has no set term, and Navient has the right to terminate the contract at will. If our new contract award from the Department of Education is jeopardized by the ongoing protest process, we will become even more dependent on our business relationships with our remaining GA clients. All of our contracts with our significant clients are subject to periodic renewal and re-bidding processes and if we lose one of these clients or if the terms of our relationships with any of these clients become less favorable to us, our revenues would decline, which would harm our business, financial condition and results of operations.

Many of our contracts with our clients for the recovery of student loans and other receivables are not exclusive and do not commit our clients to provide specified volumes of business. In addition, the terms of these contracts may be changed unilaterally and on short notice by our clients. As a consequence, there is no assurance that we will be able to maintain our revenues and operating results.

Substantially all of our existing contracts for the recovery or audit of student loans and other receivables, which represented approximately 92% of our revenues for the years ended December 31, 2017 and 2016, enable our clients to unilaterally terminate their contractual relationship with us at any time without penalty, potentially leading to loss of business or renegotiation of terms. These include our contracts with Great Lakes Higher Education Guaranty Corporation and Pennsylvania Higher Education Assistance Authority, which were responsible for 33% and 21%, respectively, of our revenues for the year ended December 31, 2017. As stated above, in June 2017, Great Lakes Higher Education Guaranty Corporation gave us notice of the termination of our contract. Further, most of our contracts in these markets allow our clients to unilaterally change the volume of loans and other receivables that are placed with us or the payment terms at any given time. In addition, most of our contracts are not exclusive, with our clients retaining multiple service providers with whom we must compete for placements of loans or other obligations. Therefore, despite our contractual relationships with our clients, our contracts do not provide assurance that we will generate a minimum amount of revenues or that we will receive a specific volume of placements.

Our revenues and operating results would be negatively affected if our student loan and receivables clients, which include our three largest clients in 2017 and five largest clients in 2016, reduce the volume of student loan placements provided to us, modify the terms of service, including the success fees we are able to earn upon recovery of defaulted student loans, or any of these clients establish more favorable relationships with our competitors. For example, effective July 1, 2015, the

Table of Contents

Department of Education implemented a fixed fee of \$1,710 payable for each loan that is rehabilitated in place of a recovery fee that historically had been based on a percentage of the balance of the rehabilitated loan.

The Department of Education has historically been one of our largest clients and responsible for a significant portion of our revenues. If we are unable to maintain our new contract award as a result of protests filed by unsuccessful bidders, our revenues and results of operations may be significantly harmed.

Historically, the Department of Education has been one of our largest clients and our relationship with the Department of Education has been responsible for a significant portion of our annual revenues. Our revenues from the Department of Education were \$4.8 million in 2017, \$21.9 million in 2016 and \$37.9 million in 2015, representing approximately 4%, 16% and 24% of our revenues, respectively. Further, we expect the Department of Education to become increasingly important within the student loan market because all federally-supported student loans have been originated by the Department of Education since 2010, meaning that there will be no further growth in student loans held by the GAs. Although the Department of Education announced in January 2018 that we were selected as one of two recovery contractors under its award for new student loan recovery contracts, protests from the unsuccessful bidders have been filed, and at this time the outcome of any such protest is unknown. If we are unable to maintain our new contract award with the Department of Education as a result of these protests, our opportunities for growth in the student loan market may be significantly limited, which would have a material adverse effect on our revenues and results of operations.

Limitations on the scope of audit and recovery services we can provide under our new RAC contract will have a material impact on our revenues and these limitations may continue under the newly awarded RAC contracts for a period of time.

Our ability to make claims under the first RAC contract was limited during each of the last three years by restrictions imposed on the scope of our audit activities and by contract transition rules announced by CMS that involved periodic suspension of audit activities. These limitations had a material adverse effect on our revenues and operating results. Our revenues from CMS during the year ended December 31, 2017 were \$1.4 million compared to \$5.7 million during the year ended December 31, 2016 and \$12.5 million for the year ended December 31, 2015. While we were awarded two new RAC contracts, we are uncertain about the scope of permitted audit and if the scope of audit is not increased, our revenues and the value of the new RAC contracts will continue to be constrained.

Our ability to derive revenues under our new RAC contracts will depend in part on the number and types of potentially improper claims that we are allowed to pursue by CMS, and our results of operations may be harmed if the scope of claims that we are allowed to pursue and be compensated for is limited.

Under CMS's Medicare recovery audit program, RAC contractors have not been permitted to seek the recovery of an improper claim unless that particular type of claim has been pre-approved by CMS to ensure compliance with applicable Medicare payment policies, as well as national and local coverage determinations. As work under the first RAC contract progressed, CMS placed increasing restrictions on the scope of audits permitted by RAC contractors and has not indicated that those restrictions will be relaxed when work commences under the newly awarded RAC contracts. Accordingly, the long-term growth of the revenues we derive under our two newly awarded RAC contracts will also depend in significant part on the scope of potentially improper claims that we are allowed to pursue.

In particular, in September 2013, CMS implemented rules that prevent RAC contractors from being able to review and audit (i) whether inpatient care delivered to patients with hospital stays lasting less than two midnights was medically necessary and therefore deserving of the higher reimbursement levels under Medicare Part A or (ii) whether inpatient treatment was medically necessary for admissions spanning more than two midnights. In connection with these restrictions, hospitals cannot bill CMS for outpatient services on hospital stays lasting less than two midnights during such period. Fees associated with recoveries initiated by us based upon improper claims for inpatient reimbursement of these short stays had represented a substantial portion of the revenues we have earned under our RAC contract. The continued suspension of this type of review activity has had and may continue to have a material adverse effect on our future healthcare revenues and operating results, depending on a variety of factors including, among other things, CMS's evaluation of provider compliance with the new rules, the rules ultimately adopted by CMS with respect to medical necessity reviews of Medicare reimbursement claims associated with short stay inpatient admissions and, more generally, the scope of improper claims that CMS allows us to pursue and our ability to successfully identify

improper claims within the permitted scope.

We may not be able to manage our potential growth effectively and our results of operations could be negatively affected.

Our newly awarded RAC contracts, Medicare Secondary Payer CRC contract, and Department of Education contract provide the potential opportunity to restore the growth in both our healthcare and student loan businesses. However, our focus on

17

Table of Contents

growth and the expansion of our business may place additional demands on our management, operations and financial resources and will require us to incur additional expenses. We cannot be sure that we will be able to manage our performance under any significant new contracts effectively. In order to successfully perform under any significant new contracts, our expenses will increase to recruit, train and manage additional qualified employees and subcontractors and to expand and enhance our administrative infrastructure and continue to improve our management, financial and information systems and controls. If we cannot manage our growth effectively, our expenses may increase and our results of operations could be negatively affected.

We face significant competition in connection with obtaining, retaining and performing under our client contracts, and an inability to compete effectively in the future could harm our relationships with our clients, which would impact our ability to maintain our revenues and operating results.

We operate in very competitive markets. In providing our services to the student loan and other receivables markets, we face competition from many other companies. Initially, we compete with these companies to be one of typically several firms engaged to provide recovery services to a particular client and, if we are successful in being engaged, we then face continuing competition from the client's other retained firms based on the client's benchmarking of the recovery rates of its several vendors. In addition, those recovery vendors who produce the highest recovery rates from a client often will be allocated additional placements and in some cases additional success fees. Accordingly, maintaining high levels of recovery performance, and doing so in a cost-effective manner, are important factors in our ability to maintain and grow our revenues and net income and the failure to achieve these objectives could harm our business, financial condition and results of operations. Some of our current and potential competitors in the markets in which we operate may have greater financial, marketing, technological or other resources than we do. The ability of any of our competitors and potential competitors to adopt new and effective technology to better serve our markets may allow them to gain market strength. Increasing levels of competition in the future may result in lower recovery fees, lower volumes of contracted recovery services or higher costs for resources. Any inability to compete effectively in the markets that we serve could adversely affect our business, financial condition and results of operations.

The U.S. federal government accounts for a significant portion of our revenues, and any loss of business from, or change in our relationship with, the U.S. federal government would result in a significant decrease in our revenues and operating results.

We have historically derived and are likely to continue to derive a significant portion of our revenues from the U.S. federal government. For the year ended December 31, 2017, revenues under contracts with the U.S. federal government accounted for approximately 11% of our total revenues. The continuation and exercise of renewal options on government contracts and any new government contracts are, among other things, contingent upon the availability of adequate funding for the applicable federal government agency. Changes in federal government spending could directly affect our financial performance.

For example, the Bipartisan Budget Act of 2013 reduced the compensation paid to GAs for the rehabilitation of student loans, effective July 1, 2014. This "revenue enhancement" measure reduced from 18.5% to 16.0% of the outstanding loan balance, the amount that GAs can charge borrowers when a rehabilitated loan is sold by the GA and eliminated entirely the GAs retention of 18.5% of the outstanding loan balance as a fee for rehabilitation services. The reduction in compensation the GAs receive resulted in a decrease of approximately 25% in the contingency fee percentage that we receive from the GAs for assisting in the rehabilitation of defaulted student loans. The loss of business from the U.S. federal government, or significant policy changes or financial pressures within the agencies of the U.S. federal government that we serve would result in a significant decrease in our revenues, which would adversely affect our business, financial condition and results of operations.

Future legislative or regulatory changes affecting the markets in which we operate could impair our business and operations.

The two principal markets in which we provide our recovery services, government-supported student loans and the Medicare program, are a subject of significant legislative and regulatory focus and we cannot anticipate how future changes in government policy may affect our business and operations. For example, Student Aid and Fiscal Responsibility Act, or SAFRA significantly changed the structure of the government-supported student loan market by assigning responsibility for all new government-supported student loan originations to the Department of

Education, rather than originations by private institutions and backed by one of 30 government-supported GAs. This legislation, and any future changes in the legislation and regulations that govern these markets, may require us to adapt our business to the new circumstances and we may be unable to do so in a manner that does not adversely affect our business and operations.

Table of Contents

The reduction in the number of government-supported student loans originated by our GA clients may result in a lower amount of student loans that we are able to rehabilitate, and may result in the consolidation among the GAs, either of which would decrease our revenues.

As a result of SAFRA, which terminated the ability of the GAs to originate government-supported student loans, the overall number of defaulted student loans that we are able to service on behalf of our GA clients has begun to decline. Further, we are seeing a larger amount of defaulted student loans within our GA client portfolios that have previously been rehabilitated, which, according to current regulations, prevents us from rehabilitating any such student loan for a second time. This overall reduction in the number of defaulted student loans in our GA client portfolios, and the larger percentage of defaulted student loans that have been previously rehabilitated, may result in a decreased revenues from our GA clients, which could negatively impact our business, financial condition and results of operations.

Further, some have speculated that there may be consolidation among the remaining GAs. This speculation has heightened as a result of the reduction of fees that the GAs will receive for rehabilitating student loans as a result of the Bipartisan Budget Act of 2013. If GAs that are our clients are combined with GAs with whom we do not have a relationship, we could suffer a loss of business. Two of our GA clients were each responsible for more than 10% of our total revenues in the year ended December 31, 2017: Great Lakes Higher Education Guaranty Corporation and Pennsylvania Higher Education Assistance Authority were responsible for 33% and 21%, respectively, of revenues for the year ended December 31, 2017. The consolidation of our GA clients with others and the failure to provide recovery services to the consolidated entity could decrease our revenues, which could negatively impact our business, financial condition and results of operations.

Our results of operations may fluctuate on a quarterly or annual basis and cause volatility in the price of our stock. Our revenues and operating results could vary significantly from period-to-period and may fail to match our past performance because of a variety of factors, some of which are outside of our control. Any of these factors could cause the price of our common stock to fluctuate. Factors that could contribute to the variability of our operating results include:

- the amount of defaulted student loans and other receivables that our clients place with us for recovery;
- the timing of placements of student loans and other receivables which are entirely in the discretion of our clients;
 - the schedules of government agencies for awarding contracts, including the result of the pending protests against the Department of Education's contract award to us;
- our ability to successfully identify improper Medicare claims and the number and type of potentially improper claims that CMS authorizes us to pursue under our RAC contacts;
- the loss or gain of significant clients or changes in the contingency fee rates or other significant terms of our business arrangements with our significant clients;
- technological and operational issues that may affect our clients and regulatory changes in the markets we service; and
- general industry and macroeconomic conditions.

Downturns in domestic or global economic conditions and other macroeconomic factors could harm our business and results of operations.

Various macroeconomic factors influence our business and results of operations. These include the volume of student loan originations in the United States, together with tuition costs and student enrollment rates, the default rate of student loan borrowers, which is impacted by domestic and global economic conditions, rates of unemployment and similar factors, and the growth in Medicare expenditures resulting from changes in healthcare costs. For example, during the global financial crisis beginning in 2008, the market for securitized student loan portfolios was disrupted, resulting in delays in the ability of some GA clients to resell rehabilitated student loans and, as a result, delays our ability to recognize revenues from these rehabilitated loans. Changes in the overall economy could lead to a reduction in overall recovery rates by our clients, which in turn could adversely affect our business, financial condition and results of operations.

Our indebtedness could adversely affect our business and financial condition and reduce the funds available to us for other purposes, and our failure to comply with the covenants contained in our credit agreement could result in an event of default that could adversely affect our results of operations.

Our ability to make scheduled payments and to fund our other liquidity needs depends on our financial and operating performance, which is subject to prevailing economic and competitive conditions and to certain financial, business and other

19

Table of Contents

factors beyond our control. We cannot make assurances that we will maintain a level of cash flows from operating activities sufficient to permit us to pay the principal and interest on our indebtedness and to fund our other liquidity needs. If our cash flows and capital resources are insufficient to fund our debt service obligations and allow us to maintain compliance with the covenants under our credit agreement or to fund our other liquidity needs, we may be forced to reduce or delay capital expenditures, sell assets or operations, seek additional capital or restructure or refinance our indebtedness. We cannot ensure that we would be able to take any of these actions, that these actions would be successful and permit us to meet our scheduled debt service obligations or that these actions would be permitted under the terms of our existing or future debt agreements, including our credit agreement. If we cannot make scheduled payments on our debt, we will be in default and, as a result, our debt holders could declare all outstanding principal and interest to be due and payable, the lenders under our credit agreement could terminate their commitments to lend us money and foreclose against the assets securing our borrowings and we could be forced into bankruptcy or liquidation.

Our debt agreement contains, and any agreements to refinance our debt likely will contain, certain financial and restrictive covenants that limit our ability to incur additional debt, including to finance future operations or other capital needs, and to engage in other activities that we may believe are in our long-term best interests, including to dispose of or acquire assets. Our failure to comply with these covenants may result in an event of default, which, if not cured or waived, could accelerate the maturity of our indebtedness or result in modifications to our credit terms. If our indebtedness is accelerated, we may not have sufficient cash resources to satisfy our debt obligations and we may not be able to continue our operations as planned.

A failure of our operating systems or technology infrastructure, or those of our third-party vendors and subcontractors, could disrupt the operation of our business.

A failure of our operating systems or technology infrastructure, or those of our third-party vendors and subcontractors, could disrupt our operations. Our operating systems and technology infrastructure are susceptible to damage or interruption from various causes, including acts of God and other natural disasters, power losses, computer systems failures, Internet and telecommunications or data network failures, operator error, computer viruses, losses of and corruption of data and similar events. The occurrence of any of these events could result in interruptions, delays or cessations in service to our clients, reduce the attractiveness of our recovery services to current or potential clients and adversely impact our financial condition and results of operations. While we have backup systems in many of our operating facilities, an extended outage of utility or network services may harm our ability to operate our business. Further, the situations we plan for and the amount of insurance coverage we maintain for losses as result of failures of our operating systems and infrastructure may not be adequate in any particular case.

If our security measures are breached or fail and unauthorized access is obtained to our clients' confidential data, our services may be perceived as insecure, the attractiveness of our recovery services to current or potential clients may be reduced, and we may incur significant liabilities.

Our recovery services involve the storage and transmission of confidential information relating to our clients and their customers, including health, financial, credit, payment and other personal or confidential information. Although our data security procedures are designed to protect against unauthorized access to confidential information, our computer systems, software and networks may be vulnerable to unauthorized access and disclosure of our clients' confidential information. Further, we may not effectively adapt our security measures to evolving security risks, address the security and privacy concerns of existing or potential clients as they change over time, or be compliant with federal, state, and local laws and regulations with respect to securing confidential information. Unauthorized access to confidential information relating to our clients and their customers could lead to reputational damage which could deter our clients and potential clients from selecting our recovery services, or result in termination of contracts with those clients affected by any such breach, regulatory action, and claims against us.

In the event of any unauthorized access to personal or other confidential information, we may be required to expend significant resources to investigate and remediate vulnerabilities in our security procedures, and we may be subject to fines, penalties, litigation costs, and financial losses that are either not insured against or not fully covered through any insurance maintained by us. If one or more of such failures in our security and privacy measures were to occur, our business, financial condition and results of operations could suffer.

Table of Contents

Our business may be harmed if we lose members of our management team or other key employees.

We are highly dependent on members of our management team and other key employees and our future success depends in part on our ability to retain these people. Our inability to continue to attract and retain members of our management team and other key employees could adversely affect our business, financial condition and results of operations.

The growth of our healthcare business will require us to hire and retain employees with specialized skills and failure to do so could harm our ability to grow our business.

The growth of our healthcare business will depend in part on our ability to recruit, train and manage additional qualified employees. Our healthcare-related operations require us to hire registered nurses and experts in Medicare coding. Finding, attracting and retaining employees with these skills is a critical component of providing our healthcare-related recovery and audit services, and our inability to staff these operations appropriately represents a risk to our healthcare service offering and associated revenues. An inability to hire qualified personnel, particularly to serve our healthcare clients, may restrain the growth of our business.

We rely on subcontractors to provide services to our clients and the failure of subcontractors to perform as expected could harm our business operations and our relationships with our clients.

We engage subcontractors to provide certain services to our clients. These subcontractors participate to varying degrees in our recovery activities with regards to all of the services we provide. While we believe that we perform appropriate due diligence before we hire subcontractors, our subcontractors may not provide adequate service or otherwise comply with the terms set forth in their agreements. In the event a subcontractor provides deficient performance to one or more of our clients, any such client may reduce the volume of services we are providing under an existing contract or may terminate the relevant contract entirely and we may face claims for breach of contract.

Any such disruption in our relations with our clients as a result of services provided by any of our subcontractors could adversely affect our revenues and operating results.

If our software vendors or utility and network providers fail to deliver or perform as expected our business operations could be adversely affected.

Our recovery services depend in part on third-party providers, including software vendors and utility and network providers. Our ability to service our clients depends on these third-party providers meeting our expectations and contractual obligations in a timely and effective manner. Our business could be materially and adversely affected, and we might incur significant additional liabilities, if the services provided by these third-party providers do not meet our expectations or if they terminate or refuse to renew their relationships with us on similar contractual terms.

We are subject to extensive regulations regarding the use and disclosure of confidential personal information and failure to comply with these regulations could cause us to incur liabilities and expenses.

We are subject to a wide array of federal and state laws and regulations regarding the use and disclosure of confidential personal information and security. For example, the federal Health Insurance Portability and Accountability Act of 1996, as amended, or HIPAA, and related state laws subject us to substantial restrictions and requirements with respect to the use and disclosure of the personal health information that we obtain in connection with our audit and recovery services under our contract with CMS and we must establish administrative, physical and technical safeguards to protect the confidentiality of this information. Similar protections extend to the type of personal financial and other information we acquire from our student loan, state tax and federal receivables clients.

We are required to notify affected individuals and government agencies of data security breaches involving protected health and certain personally identifiable information. These laws and regulations also require that we develop, implement and maintain written, comprehensive information security programs containing safeguards that are appropriate to protect personally identifiable information or health information against unauthorized access, misuse, destruction or modification. Federal law generally does not preempt state law in the area of protection of personal information, and as a result we must also comply with state laws and regulations. Regulation of privacy, data use and security requires that we incur significant expenses, which could increase in the future as a result of additional regulations, all of which adversely affects our results of operations. Failure to comply with these laws and regulations can result in penalties and in some cases expose us to civil lawsuits.

Table of Contents

Our student loan recovery business is subject to extensive regulation and consumer protection laws and our failure to comply with these regulations and laws may subject us to liability and result in significant costs.

Our student loan recovery business is subject to regulation and oversight by various state and federal agencies, particularly in the area of consumer protection. The Fair Debt Collection Practices Act, or FDCPA, and related state laws provide specific guidelines that we must follow in communicating with holders of student loans and regulates the manner in which we can recover defaulted student loans. Some state attorney generals have been active in this area of consumer protection regulation. We are subject, and may be subject in the future, to inquiries and audits from state and federal regulators, as well as frequent litigation from private plaintiffs regarding compliance under the FDCPA and related state regulations. We are also subject to the Fair Credit Reporting Act, or FCRA, which regulates consumer credit reporting and may impose liability on us to the extent adverse credit information reported to a credit bureau is false or inaccurate. Our compliance with the FDCPA, FCRA and other federal and state regulations that affect our student loan recovery business may result in significant costs, including litigation costs. We may also become subject to regulations promulgated by the United States Consumer Financial Protection Bureau, or CFPB, which was established in July 2011 as part of the Dodd-Frank Act to, among other things, establish regulations regarding consumer financial protection laws. In addition, the CFPB has investigatory and enforcement authority with respect to whether persons are engaged in unlawful acts or practices in connection with the collection of consumer debts.

Litigation may result in substantial costs of defense, damages or settlement, any of which could subject us to significant costs and expenses.

We are party to lawsuits in the normal course of business, particularly in connection with our student loan recovery services. For example, we are regularly subject to claims that we have violated the guidelines and procedures that must be followed under federal and state laws in communicating with consumer debtors. In addition, we expect to incur additional expenses in connection with the ongoing protests filed by the unsuccessful bidders in the new contract awards from the Department of Education. We may not ultimately prevail or otherwise be able to satisfactorily resolve any pending or future litigation, which may result in substantial costs of defense, damages or settlement. In the future, we may be required to alter our business practices or pay substantial damages or settlement costs as a result of litigation proceedings, which could adversely affect our business operations and results of operations.

We typically face a long period to implement a new contract which may cause us to incur expenses before we receive revenues from new client relationships.

If we are successful in obtaining an engagement with a new client or a new contract with an existing client, we typically have a subsequent long implementation period in which the services are planned in detail and we integrate our technology, processes and resources with the client's operations. If we enter into a contract with a new client, we typically will not receive revenues until implementation is completed and work under the contract actually begins. Our clients may also experience delays in obtaining approvals or delays associated with technology or system implementations, such as the delays experienced with the implementation of our first RAC contract with CMS due to an appeal by competitors who were unsuccessful in bidding on the contract. Because we generally begin to hire new employees to provide services to a new client once a contract is signed, we may incur significant expenses associated with these additional hires before we receive corresponding revenues under any such new contract. If we are not successful in maintaining contractual commitments after the expenses we incur during our typically long implementation cycle, our results of operations could be adversely affected.

If we are unable to adequately protect our proprietary technology, our competitive position could be harmed or we could be required to incur significant costs to enforce our rights.

The success of our business depends in part upon our proprietary technology platform. We rely on a combination of copyright, patent, trademark, and trade secret laws, as well as on confidentiality procedures and non-compete agreements, to establish and protect our proprietary technology rights. The steps we have taken to deter misappropriation of our proprietary technology may be insufficient to protect our proprietary information. In particular, we may not be able to protect our trade secrets, know how and other proprietary information adequately. Although we use reasonable efforts to protect this proprietary information and technology, our employees, consultants and other parties may unintentionally or willfully disclose our information or technology to competitors. Enforcing a

claim that a third party illegally obtained and is using any of our proprietary information or technology is expensive and time consuming, and the outcome is unpredictable. We rely, in part, on non disclosure, confidentiality and invention assignment agreements with our employees, consultants and other parties to protect our trade secrets, know how and other intellectual property and proprietary information. These agreements may not be self executing, or they may be breached and we may not have adequate remedies for such breach. Moreover, third parties may independently develop similar or equivalent proprietary information or otherwise gain access to our trade secrets, know how

Table of Contents

and other proprietary information. Any infringement, misappropriation or other violation of our patents, trademarks, copyrights, trade secrets, or other intellectual property rights could adversely affect any competitive advantage we currently derive or may derive from our proprietary technology platform and we may incur significant costs associated with litigation that may be necessary to enforce our intellectual property rights.

Claims by others that we infringe their intellectual property could force us to incur significant costs or revise the way we conduct our business.

Our competitors protect their proprietary rights by means of patents, trade secrets, copyrights, trademarks and other intellectual property. Any party asserting that we infringe, misappropriate or violate their intellectual property rights may force us to defend ourselves, and potentially our clients, against the alleged claim. These claims and any resulting lawsuit, if successful, could be time-consuming and expensive to defend, subject us to significant liability for damages or invalidation of our proprietary rights, prevent us from operating all or a portion of our business or force us to redesign our services or technology platform or cause an interruption or cessation of our business operations, any of which could adversely affect our business and operating results. In addition, any litigation relating to the infringement of intellectual property rights could harm our relationships with current and prospective clients. The risk of such claims and lawsuits could increase if we increase the size and scope of our services in our existing markets or expand into new markets.

We may make acquisitions that prove unsuccessful, strain or divert our resources and harm our results of operations and stock price.

We may consider acquisitions of other companies in our industry or in new markets. We may not be able to successfully complete any such acquisition and, if completed, any such acquisition may fail to achieve the intended financial results. We may not be able to successfully integrate any acquired businesses with our own and we may be unable to maintain our standards, controls and policies. Further, acquisitions may place additional constraints on our resources by diverting the attention of our management from other business concerns. Moreover, any acquisition may result in a potentially dilutive issuance of equity securities, the incurrence of additional debt and amortization of expenses related to intangible assets, all of which could adversely affect our results of operations and stock price. The price of our common stock could be volatile, and you may not be able to sell your shares at or above the public offering price.

Since our initial public offering in August 2012, the price of our common stock, as reported by NASDAQ Global Select Market, has ranged from a low sales price of \$1.50 on March 16, 2017 to a high sales price of \$14.09 on March 4, 2013. The trading price of our common stock may be significantly affected by various factors, including: quarterly fluctuations in our operating results; the financial projections we may provide to the public, any changes in those projections or our failure to meet those projections; changes in investors' and analysts' perception of the business risks and conditions of our business; our ability to meet the earnings estimates and other performance expectations of financial analysts or investors; unfavorable commentary or downgrades of our stock by equity research analysts; changes in our capital structure, such as future issuances of debt or equity securities; our success or failure to obtain new contract awards; lawsuits threatened or filed against us; strategic actions by us or our competitors, such as acquisitions or restructurings; new legislation or regulatory actions; changes in our relationship with any of our significant clients; fluctuations in the stock prices of our peer companies or in stock markets in general; and general economic conditions.

Our significant stockholders have the ability to influence significant corporate activities and our significant stockholders' interests may not coincide with yours.

Parthenon Capital Partners and Invesco Ltd. beneficially owned approximately 26.4% and 19.8% of our common stock, respectively, as of December 31, 2017. As a result of their ownership, Parthenon Capital Partners and Invesco Ltd. have the ability to influence the outcome of matters submitted to a vote of stockholders and, through our board of directors, the ability to influence decision making with respect to our business direction and policies.

Parthenon Capital Partners and Invesco Ltd. may have interests different from our other stockholders' interests, and may vote in a manner adverse to those interests. Matters over which Parthenon Capital Partners and Invesco Ltd. can, directly or indirectly, exercise influence include:

-

mergers and other business combination transactions, including proposed transactions that would result in our stockholders receiving a premium price for their shares;
• other acquisitions or dispositions of businesses or assets;
• incurrence of indebtedness and the issuance of equity securities;

23

Table of Contents

repurchase of stock and payment of dividends; and
the issuance of shares to management under our equity incentive plans.

In addition, Parthenon Capital Partners has a contractual right to designate a number of directors proportionate to its stock ownership. Further, under our amended and restated certificate of incorporation, Parthenon Capital Partners does not have any obligation to present to us, and Parthenon Capital Partners may separately pursue, corporate opportunities of which it becomes aware, even if those opportunities are ones that we would have pursued if granted the opportunity.

Anti-takeover provisions contained in our certificate of incorporation and bylaws could impair a takeover attempt that our stockholders may find beneficial.

Our amended and restated certificate of incorporation and amended and restated bylaws contain provisions that could have the effect of rendering more difficult or discouraging an acquisition deemed undesirable by our board of directors. Our corporate governance documents include the following provisions: establishing a classified board of directors so that not all members of our board are elected at one time; providing that directors may be removed by stockholders only for cause; authorizing blank check preferred stock, which could be issued with voting, liquidation, dividend and other rights superior to our common stock; limiting the ability of our stockholders to call and bring business before special meetings and to take action by written consent in lieu of a meeting; limiting our ability to engage in certain business combinations with any "interested stockholder," other than Parthenon Capital Partners, for a three-year period following the time that the stockholder became an interested stockholder; requiring advance notice of stockholder proposals for business to be conducted at meetings of our stockholders and for nominations of candidates for election to our board of directors; requiring a super majority vote for certain amendments to our amended and restated certificate of incorporation and amended and restated bylaws; and limiting the determination of the number of directors on our board of directors and the filling of vacancies or newly created seats on the board, to our board of directors then in office. These provisions, alone or together, could have the effect of delaying or deterring a change in control, could limit the opportunity for our stockholders to receive a premium for their shares of our common stock, and could also affect the price that some investors are willing to pay for our common stock.

ITEM 1B. Unresolved Staff Comments

None.

ITEM 2. Properties

Facilities

As of December 31, 2017, we operated seven separate office locations throughout the United States. The largest of these facilities is in Livermore, California and serves as our corporate headquarters, as well as a data center and production location. Our Livermore facility is comprised of approximately 50,000 square feet of space and has a lease expiration of November 2022. We also lease production centers in California, Oregon, Florida and Texas and own a production/data center in Oregon.

We believe that our facilities are adequate for current operations and that additional space will be available as required. However, if the Department of Education contract volumes are substantially larger than the prior contracts due to the limited number of vendors, we may need to open another location to accommodate those employees. See note (5) to our consolidated financial statements included elsewhere in this Annual Report on Form 10-K for information regarding our lease obligations.

ITEM 3. Legal Proceedings

We are involved in various legal proceedings that arise from our normal business operations. These actions generally derive from our student loan recovery services, and generally assert claims for violations of the Fair Debt Collection Practices Act or similar federal and state consumer credit laws. While litigation is inherently unpredictable, we believe that none of these legal proceedings, individually or collectively, will have a material adverse effect on our financial condition or our results of operations.

ITEM 4. Mine Safety Disclosures

Not applicable.

PART II

ITEM 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market For Our Common Equity

The table below sets forth, for the periods indicated below, the high and low sales prices per share of our common stock as reported by NASDAQ.

| 2016 | High | Low |
|----------------|------|------|
| First Quarter | 1.95 | 1.51 |
| Second Quarter | 1.95 | 1.51 |
| Third Quarter | 3.46 | 1.51 |
| Fourth Quarter | 4.07 | 1.94 |
| 2017 | | |
| First Quarter | 2.94 | 1.50 |
| Second Quarter | 3.00 | 1.54 |
| Third Quarter | 2.32 | 1.60 |
| Fourth Quarter | 1.99 | 1.52 |

On March 13, 2018, the closing price as reported by NASDAQ of our common stock was \$2.96 per share.

Stockholders

As of December 31, 2017, we had approximately 18 holders of record of our common stock.

Dividends

Our board of directors does not currently intend to pay regular dividends on our common stock. Our credit agreement contains a covenant prohibiting the payment of cash dividends.

Securities Authorized for Issuance Under Equity Compensation Plans

Information regarding the securities authorized for issuance under our equity compensation plans can be found under Item 12 of this Annual Report on Form 10-K.

Issuer Purchases of Equity Securities

None.

ITEM 6. Selected Financial Data

The selected consolidated balance sheet data as of December 31, 2017 and 2016, and the selected consolidated statements of operations data for each year ended December 31, 2017, 2016 and 2015, have been derived from our audited consolidated financial statements which are included elsewhere in this annual report. The selected consolidated balance sheet data as of December 31, 2015, 2014 and 2013, and the selected consolidated statements of operations data for the years ended December 31, 2014 and 2013 have been derived from our audited consolidated financial statements not included in this annual report. Historical results are not necessarily indicative of future results. You should read the following selected consolidated historical financial data below in conjunction with the section titled “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and the consolidated financial statements, related notes, and other financial information included in this Annual Report on Form 10-K. The selected consolidated financial data in this section is not intended to replace the consolidated financial statements and is qualified in its entirety by the consolidated financial statements and related notes and schedule included in this Annual Report on Form 10-K.

ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

We provide technology-enabled audit, recovery, customer care, and related analytics services in the United States. Our services help identify improper payments, and in some markets, restructure and recover delinquent or defaulted assets and improper payments for both government and private clients in a broad range of markets. Our clients typically operate in complex and regulated environments and outsource their audit and recovery needs in order to reduce losses on billions of dollars of defaulted student loans, improper healthcare payments and delinquent state tax and federal treasury and other receivables. We also provide complex customer care services for clients across our various markets. We generally provide our services on an outsourced basis, where we handle many or all aspects of our clients' audit and recovery processes.

Our revenue model is generally success-based as we earn fees on the aggregate correct audits and/or amount of funds that we enable our clients to recover. Our services do not require any significant upfront investments by our clients and offer

Table of Contents

our clients the opportunity to recover significant funds otherwise lost. Because our model is based upon the success of our efforts, our business objectives are aligned with those of our clients and we are generally not reliant on their spending budgets. Furthermore, our business model does not require significant capital as we do not purchase loans or obligations.

Sources of Revenues

We derive our revenues from services for clients in a variety of different markets. These markets include our two largest markets, student lending and healthcare, as well as our other markets which include but are not limited to delinquent state and federal taxes and federal treasury and other receivables.

Student Lending

We derive the majority of our revenues from the recovery of student loans. These revenues are contract-based and consist primarily of contingency fees based on a specified percentage of the amount we enable our clients to recover. Our contingency fee percentage for a particular recovery depends on the type of recovery facilitated. Our clients in the student loan recovery market mainly consist of several of the largest guaranty agencies, or GAs. In addition, we have a long history of also providing recovery services to the Department of Education. On January 11, 2018, the Department of Education awarded us one of two new contracts for student loan recovery services. Certain other vendors who did not receive contract awards from the Department of Education, have filed protests with the Court of Federal Claims regarding the Department of Education's award of these contracts. The outcome of these protests is pending.

We believe the size and the composition of our student loan inventory at any point provides us with a significant degree of revenue visibility for our student loan revenues. Based on data compiled from over two decades of experience with the recovery of defaulted student loans, at the time we receive a placement of student loans, we are able to make a reasonably accurate estimate of the recovery outcomes likely to be derived from such placement and the revenues we are likely able to generate based on the anticipated recovery outcomes.

Our key metric in evaluating our student lending business is Placement Volume. Our Placement Volume represents the dollar volume of defaulted student loans first placed with us during the specified period by public and private clients for recovery. Placement Volume allows us to measure and track trends in the amount of inventory our clients in the student lending market are placing with us during any period. The revenues associated with the recovery of a portion of these loans may be recognized in subsequent accounting periods, which assists management in estimating future revenues and in allocating resources necessary to address current Placement Volumes.

| Total Student Lending Placement Volume | \$2,770,779 | \$3,173,922 | \$5,314,644 |

Table of Contents

There are five potential outcomes to the student loan recovery process from which we generate revenues. These outcomes include: full repayment, recurring payments, rehabilitation, loan restructuring and wage garnishment. Of these five potential outcomes, our ability to rehabilitate defaulted student loans is the most significant component of our revenues in this market. Generally, a loan is considered successfully rehabilitated after the student loan borrower has made nine consecutive qualifying monthly payments and our client has notified us that it is recalling the loan. Once we have structured and implemented a repayment program for a defaulted borrower, we (i) earn a percentage of each periodic payment collected up to and including the final periodic payment prior to the loan being considered “rehabilitated” by our clients, and (ii) if the loan is “rehabilitated,” then we are paid a one-time percentage of the total amount of the remaining unpaid balance or in the case of our work for the Department of Education, a fixed fee of \$1,710 for each rehabilitated loan. The fees we are paid vary by recovery outcome as well as by contract. For non-government-supported student loans we are generally only paid contingency fees on two outcomes: full repayment or recurring repayments. The table below describes our typical fee structure for each of these five outcomes.

Student Loan Recovery Outcomes

| Full Repayment | Recurring Payments | Rehabilitation | Loan Restructuring | Wage Garnishment |
|---|---|--|---|---|
| <ul style="list-style-type: none"> • Repayment in full of the loan | <ul style="list-style-type: none"> • Regular structured payments, typically according to a renegotiated payment plan | <ul style="list-style-type: none"> • After a defaulted borrower has made nine consecutive recurring payments, the loan is eligible for rehabilitation | <ul style="list-style-type: none"> • Restructure and consolidate a number of outstanding loans into a single loan, typically with one monthly payment and an extended maturity | <ul style="list-style-type: none"> • If we are unable to obtain voluntary repayment, payments may be obtained through wage garnishment after certain administrative requirements are met |
| <ul style="list-style-type: none"> • We are paid a percentage of the full payment that is made | <ul style="list-style-type: none"> • We are paid a percentage of each payment | <ul style="list-style-type: none"> • We are paid based on a percentage of the overall value of the rehabilitated loan or for the Department of Education, a fixed fee | <ul style="list-style-type: none"> • We are paid based on a percentage of overall value of the restructured loan | <ul style="list-style-type: none"> • We are paid a percentage of each payment |

In October 2014, the Department of Education announced a change in the structure for the payment of fees to recovery contractors upon rehabilitation of student loans under the existing recovery contract. The new fee structure provides for a fixed fee of \$1,710 for each loan that is rehabilitated. Previously, the fee had been based on a percentage of the principal amount of the rehabilitated loan. The change to the fee structure became effective for student loans that were rehabilitated on or following July 1, 2015.

Further, the Bipartisan Budget Act of 2013, which was signed into law by President Obama on December 26, 2013, reduced the compensation paid to GAs for the rehabilitation of student loans, effective July 1, 2014. This “revenue enhancement” measure reduced the amount that GAs can charge borrowers when a rehabilitated loan is sold by the GA from 18.5% to 16.0% of the outstanding loan balance, and eliminated entirely the GAs retention of 18.5% of the outstanding loan balance as a fee for rehabilitation services. The reduction in compensation the GAs receive resulted in a decrease in the contingency fee percentage that we receive from the GAs for assisting in the rehabilitation of defaulted student loans.

As a result of the fee reductions from the Department of Education and the GAs discussed above, our revenues from student lending in 2015 were approximately 14% lower than in 2014. Our revenues from student lending were approximately 8% lower in 2016 compared to 2015 as a result of the expiration of our contract with the Department of Education in April 2015 and because the revenues associated with placements received prior to such contract expiration have been trailing off as we have worked through this inventory. Revenues from the Department of Education fell by approximately 78% and 42% in 2017 and 2016 compared to the prior year, respectively, although this decrease was partially offset by an approximately 2% and 7% increase in revenues from GAs and other student lending clients in the same respective periods.

Healthcare

We derive revenues from both commercial and government clients in the healthcare market. Revenues earned under these contracts are driven by auditing, identifying, and sometimes recovering improperly paid claims through both automated and manual review of such claims. We are paid contingency fees by our clients based on a percentage of the dollar amount of

Table of Contents

claims recovered by CMS as a result of our efforts. The revenues we recognize are net of our estimate of claims that will be overturned by appeal following payment by the provider.

On October 5, 2017, we announced that we were awarded the Medicare Secondary Payer CRC contract by CMS. Under this agreement, we are responsible for identifying and recovering payments in situations where Medicare should not be the primary payer of healthcare claims because a beneficiary has other forms of insurance coverage, such as through an employer group health plan or certain other payers.

On October 26, 2016, CMS awarded new RAC contracts and we received RAC contracts for audit Regions 1 and 5. The RAC contract award for Region 1 allows us to continue our audit of payments under Medicare's Part A and Part B for all provider types other than DMEPOS and home health and hospice within an 11 state region in the Northeast and Midwest. The Region 5 RAC contract provides for the post-payment review of DMEPOS and home health and hospice claims nationally. While audit and recovery activity under the new contracts commenced in April 2017, the scope of audit permitted by CMS under the new RAC contracts has been limited to 0.5% of claims. In connection with the wind down of our first RAC contract, CMS adopted a series of contract transition procedures and other restrictions, beginning in 2013, that limited the types of claims we are permitted to audit and our ability to request medical records for audit and CMS suspended our ability to perform any audit services for certain periods of time, thus materially adversely affecting our revenues under that contract. In May 2016, CMS announced that the recovery audit contractors would not be able to request documents from providers for audit after May 16, 2016 and would not be able to submit claims for improper payments after July 29, 2016, effectively terminating additional revenue generating activity under our first RAC contract. Revenues for the year ended December 31, 2017 from our first RAC contract were \$0.7 million, compared with \$5.7 million for 2016 and \$12.5 million in 2015. We do not expect to recognize significant revenues from the newly awarded RAC contracts until the percentage of claims we are able to audit increases from the current 0.5% of the claims.

We accrue an estimated liability for appeals based on the amount of commissions received which are subject to appeal and which we estimate are probable of being returned to providers following successful appeal. The \$18.5 million balance as of December 31, 2017, represents our best estimate of the probable amount that we may be required to refund related to appeals of claims for which commissions were previously collected. The term of our first Medicare Recovery Audit Contract with CMS, for Region A, expired on January 31, 2018. During the term of this contract, we accrued an estimated liability for fees we may be required to return in connection with successful appeals by providers. Our estimates for this appeals liability are based on our historical experience with the Medicare RAC appeal process. As the term of the original contract expired, CMS issued a letter to us on January 2, 2018, stating that Performant will no longer be obligated to support the appeals process or maintain an appeal reserve after the January 31, 2018 contract termination date. In addition to the estimated liability for appeals, we also maintained a separate Net payable to client liability for appeals decisions which had been decided, but not yet refunded to CMS. On January 31, 2018, CMS issued to us their final Letter of Demand which reconciled all outstanding payables to CMS for the old Region A contract. Accordingly, during the first quarter 2018, we expect to release approximately \$21.5 million of the estimated liability for appeals and the Net payable to client balances. This will increase first quarter 2018 revenue by an amount equal to the total liability released. In conjunction with the release, we also expect to derecognize approximately \$7.1 million of prepaid expenses and other current assets reflecting accrued receivables associated with amounts due from subcontractors for decided and yet-to-be decided appeals. We will maintain a smaller estimated liability for appeals as we continue to assess the remaining estimated liability for refunds and appeals overturned prior to the expiration of the contract term.

In connection with the award of our first RAC contract, we outsourced certain aspects of our healthcare recovery process to three different subcontractors. Two of these subcontractors provided a specific service to us in connection with our claims recovery process, with the third subcontractor, whose services were terminated in December 2016, formerly providing all of the audit and recovery services for claims within a portion of our region. We recognize all of the revenues generated by the claims recovered through our subcontractor relationships, and we recognize the fees that we pay to these subcontractors in our expenses.

For our commercial healthcare business, our business strategy is focused on utilizing our technology-enabled services platform to provide audit, recovery and analytical services for private healthcare payors. We have entered into

contracts with several private payors, although these contracts are in the early stage of implementation. Revenues from our commercial healthcare clients were \$8.5 million for 2017 compared to \$5.7 million in 2016.

Other

We also derive revenues from the recovery of delinquent state and federal taxes, and federal treasury and other receivables, default aversion services for certain clients including financial institutions and the licensing of hosted technology solutions to certain clients. For our hosted technology services, we license our system and integrate our technology into our

Table of Contents

clients' operations, for which we are paid a licensing fee. Our revenues for these services include contingency fees, fees based on dedicated headcount to our clients and hosted technology licensing fees.

Costs and Expenses

We generally report two categories of operating expenses: salaries and benefits and other operating expense. Salaries and benefits expenses consist primarily of salaries and performance incentives paid and benefits provided to our employees. Other operating expense includes expenses related to our use of subcontractors, other production related expenses, including costs associated with data processing, retrieval of medical records, printing and mailing services, amortization and other outside services, as well as general corporate and administrative expenses.

Factors Affecting Our Operating Results

Our results of operations are influenced by a number of factors, including allocation of placement volume, claim recovery volume, contingency fees, regulatory matters, client retention and macroeconomic factors.

Allocation of Placement Volume

Our clients have the right to unilaterally set and increase or reduce the volume of defaulted student loans or other receivables that we service at any given time. In addition, many of our recovery contracts for student loans and other receivables are not exclusive, with our clients retaining multiple service providers to service portions of their portfolios. Accordingly, the number of delinquent student loans or other receivables that are placed with us may vary from time to time, which may have a significant effect on the amount and timing of our revenues. We believe the major factors that influence the number of placements we receive from our clients in the student loan market include our performance under our existing contracts and our ability to perform well against competitors for a particular client. To the extent that we perform well under our existing contracts and differentiate our services from those of our competitors, we may receive a relatively greater number of placements under these existing contracts and may improve our ability to obtain future contracts from these clients and other potential clients. Further, delays in placement volume, as well as acceleration of placement volume, from any of our large clients may cause our revenues and operating results to vary from quarter to quarter.

Typically we are able to anticipate with reasonable accuracy the timing and volume of placements of defaulted student loans and other receivables based on historical patterns and regular communication with our clients. Occasionally, however, placements are delayed due to factors outside of our control.

Contingency Fees

Our revenues consist primarily of contract-based contingency fees. The contingency fee percentages that we earn are set by our clients or agreed upon during the bid process, and may change from time to time either under the terms of existing contracts or pursuant to the terms of contract renewals. For example, the Department of Education changed its fee structure to a fixed recovery fee of \$1,710 for each rehabilitated loan, effective as of July 1, 2015. The fixed recovery fee is payable for each loan that is rehabilitated and replaced a recovery fee structure that historically had been based on a percentage of the balance of the rehabilitated loan.

Regulatory Matters

Each of the markets which we serve is highly regulated. Accordingly, changes in regulations that affect the types of loans, receivables and claims that we are able to service or the manner in which any such delinquent loans, receivables and claims can be recovered will affect our revenues and results of operations. For example, the passage of the Student Aid and Fiscal Responsibility Act, or SAFRA, in 2010 had the effect of transferring the origination of all government-supported student loans to the Department of Education, thereby ending all student loan originations guaranteed by the GAs. Loans guaranteed by the GAs represented approximately 70% of government-supported student loans originated in 2009. While the GAs will continue to service existing outstanding student loans for years to come, this legislation means that there will be no further growth in student loans held by GAs. Further, we are seeing a larger amount of defaulted student loans in our GA client portfolios that have been previously rehabilitated and by regulation are not subject to rehabilitation for a second time. In addition, our entry into the healthcare market was facilitated by passage of the Tax Relief and Health Care Act of 2006, which mandated CMS to contract with private firms to audit Medicare claims in an effort to increase the recovery of improper Medicare payments. Any changes to the regulations that affect the student loan industry or the recovery of defaulted student loans or the

Medicare program generally or the audit and recovery of Medicare claims could have a significant impact on our revenues and results of operations.

Table of Contents

Client Retention

Our revenues from the student loan market depend on our ability to maintain our contracts with some of the largest providers of student loans. Revenues from our three largest clients in the student loan market represented 63% of our revenues for the year ended December 31, 2017 and 55% of our revenues for the year ended December 31, 2016. The Department of Education was responsible for approximately 4% and 16% of our revenues for the years ended December 31, 2017 and December 31, 2016, respectively. Although the Department of Education announced in January 2018 that we were selected as one of two contractors under its award for new student loan recovery contracts, certain of the unsuccessful bidders have filed protests, and at this time, we cannot speculate on the outcome of such protests or when work will begin under our new contract award. Our contracts with our other large clients entitle them to unilaterally terminate their contractual relationship with us at any time without penalty. On June 15, 2017, we received a 30-day termination notice, with respect to our contract with Great Lakes Higher Education Guaranty Corporation (Great Lakes). The termination of this contract was based on Great Lakes' decision to bundle its student loan servicing work, a service that we currently do not provide, along with its student loan recovery work to a single third party vendor. While we subsequently obtained subcontract under Navient, the new provider of servicing and defaulted portfolio management to Great Lakes, this contract has no set term, and Navient has the right to terminate the contract at will. If we lose one of our other significant clients, including if one of our significant clients is consolidated by an entity that does not use our services, if the terms of compensation for our services change or if there is a reduction in the level of placements provided by any of these clients, our revenues could decline.

Macroeconomic Factors

Certain macroeconomic factors influence our business and results of operations. These include the increasing volume of student loan originations in the U.S. as a result of increased tuition costs and student enrollment, the default rate of student loan borrowers, the growth in Medicare expenditures resulting from increasing healthcare costs, as well as the fiscal budget tightening of federal, state and local governments as a result of general economic weakness and lower tax revenues.

Critical Accounting Policies

Our consolidated financial statements are prepared in accordance with generally accepted accounting principles in the United States, or GAAP. The preparation of these consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, costs and expenses and related disclosures. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances. In many instances, we could have reasonably used different accounting estimates, and in other instances changes in the accounting estimates are reasonably likely to occur from period-to-period. Accordingly, actual results could differ significantly from the estimates made by our management. To the extent that there are material differences between these estimates and actual results, our future financial statement presentation, financial condition, results of operations and cash flows will be affected. We believe that the accounting policies discussed below are critical to understanding our historical and future performance, as these policies relate to the more significant areas involving management's judgments and estimates.

Revenue Recognition

The majority of our contracts are contingency fee based. We recognize revenues on these contingency fee based contracts when third-party payors remit payments to our clients or remit payments to us on behalf of our clients, and, consequently, the contingency is deemed to have been satisfied. Under our RAC contracts with CMS, we recognize revenues when the healthcare provider has paid CMS for a claim or has agreed to an offset against other claims by the provider. Healthcare providers have the right to appeal a claim and may pursue additional level of appeals if the initial appeal is found in favor of CMS. We accrue an estimated liability for appeals at the time revenue is recognized based on our estimate of the amount of revenue probable of being returned to CMS following successful appeal based on historical data and other trends relating to such appeals. In addition, if our estimate of liability for appeals with respect to revenues recognized during a prior period changes, we increase or decrease the estimated liability for appeals in the current period.

This estimated liability for appeals is an offset to revenues on our income statement. Resolution of appeals can take a very long time and there is a significant backlog in the system for resolving appeals, as over the course of our existing

RAC contract, healthcare providers have increased their pursuit of appeals beyond the first and second levels of appeal to the third level of appeal, where cases are heard by administrative law judges, or ALJs. In our experience, decisions at the third level of appeal are the least favorable as ALJs exercise greater discretion and there is less predictability in the ALJ decisions as compared to appeals at the first or second levels. This increase of ALJ appeals and backlog of claims at the third level of appeal is the primary reason our total estimated liability for appeals (consisting of the estimated liability for appeals plus the contra-accounts-receivable estimated allowance for appeals) has remained at a consistent level despite decreasing revenue from CMS. The balance of the estimated liability for appeals was \$18.5 million as of December 31, 2017. The decrease from December 31, 2016 was primarily due to ALJ appeals decisions in provider favor. In addition to the \$18.5 million related to the RAC contract

Table of Contents

with CMS, the Company has accrued \$0.3 million of additional estimated liability for appeals related to other healthcare contracts. The total accrued liability for appeals was therefore \$18.8 million as of December 31, 2017. The \$18.8 million balance as of December 31, 2017, represents our best estimate of the probable amount of losses related to appeals of claims for which commissions were previously collected. To the extent that required payments by us related to successful appeals exceed the amount accrued, revenues in the applicable period would be reduced by the amount of the excess.

In May 2014, the Financial Accounting Standards Board (FASB) issued an ASU that amends the FASB ASC by creating a new Topic 606, Revenue from Contracts with Customers. The new guidance supersedes the revenue recognition requirements in Topic 605, Revenue Recognition, and most industry-specific guidance on revenue recognition throughout the Industry Topics of the Codification. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. To achieve that core principle, an entity should apply a five step model for recognizing and measuring revenue from contracts with customers. In addition, an entity should disclose sufficient qualitative and quantitative information to enable users of financial statements to understand the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. The new revenue recognition guidance, including subsequent amendments, is effective for annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period.

As of the date of this filing, we have completed our contract review and policy drafting. Based on our review, we believe the timing of revenue recognition will not materially change from current practice and the impact of adopting the new guidance is not material to our results of operations. We do not anticipate that our internal control framework will materially change as a result of the new guidance, but rather that existing internal controls will be modified and augmented as necessary. We will adopt Topic 606 as of January 1, 2018 using the full retrospective method. We will provide additional information about the impact of this new guidance, including enhanced disclosure requirements, in future filings.

Results of Operations

Year Ended December 31, 2017 compared to the Year Ended December 31, 2016

The following table represents our historical operating results for the periods presented:

| | Year Ended December 31, | | | |
|--|-------------------------|------------|-----------|----------|
| | 2017 | 2016 | \$ Change | % Change |
| | (in thousands) | | | |
| Consolidated Statements of Operations Data: | | | | |
| Revenues | \$132,049 | \$141,360 | \$(9,311) | (7)% |
| Operating expenses: | | | | |
| Salaries and benefits | 82,191 | 78,863 | 3,328 | 4% |
| Other operating expense | 55,863 | 54,985 | 878 | 2% |
| Impairment of goodwill and intangible assets | 1,081 | 15,438 | (14,357) | (93)% |
| Total operating expenses | 139,135 | 149,286 | (10,151) | (7)% |
| Loss from operations | (7,086) | (7,926) | (840) | (11)% |
| Interest expense | (6,972) | (7,897) | (925) | (12)% |
| Interest income | 4 | — | 4 | —% |
| Loss before benefit from income taxes | (14,054) | (15,823) | (1,769) | (11)% |
| Benefit from income taxes | (1,325) | (4,370) | (3,045) | (70)% |
| Net Loss | \$(12,729) | \$(11,453) | \$1,276 | 11% |

Revenues

Total revenues were \$132.0 million for the year ended December 31, 2017, a decrease of \$9.3 million or 7%, compared to total revenues of \$141.4 million for the year ended December 31, 2016. The decrease is due to a decline in revenues in both our student lending and healthcare markets.

Table of Contents

Student lending revenues were \$94.3 million for the year ended December 31, 2017, representing a decrease of \$15.3 million, or 14%, compared to the year ended December 31, 2016. This decrease was primarily a result of the expiration of the Department of Education contract in April 2015 and subsequent wind down, partially offset by an increase in revenue as a result of an increase in the number of borrowers that are participating in the rehabilitation programs with our Guaranty Agency clients.

Healthcare revenues were \$10.0 million for the year ended December 31, 2017, representing a decrease of \$1.4 million, or 12%, compared to the year ended December 31, 2016. This decrease was due primarily to the wind down of our first RAC contract during 2017, offset by an approximately \$2.9 million increase in revenues from commercial healthcare customers.

Salaries and Benefits

Salaries and benefits expense was \$82.2 million for the year ended December 31, 2017, an increase of \$3.3 million, or 4%, compared to salaries and benefits expense of \$78.9 million for the year ended December 31, 2016. The increase in salaries and benefits expense was primarily due to increased headcount during 2017 in anticipation of ramp up of activity related to new clients and contracts.

Other Operating Expense

Other operating expense was \$55.9 million for the year ended December 31, 2017, an increase of \$0.9 million, or 2%, compared to other operating expense of \$55.0 million for the year ended December 31, 2016. The increase in other operating expenses was primarily due to higher third party collection fees.

Impairment of Goodwill and Intangible Assets

Impairment of goodwill and intangible assets was \$1.1 million for the year ended December 31, 2017, a decrease of \$14.4 million, compared to impairment of goodwill and intangible assets of \$15.4 million for the year ended December 31, 2016. The impairment of goodwill and intangible assets of \$1.1 million that was recognized in 2017 relates to the write-off of goodwill and intangible assets in one of our subsidiaries, Performant Europe Ltd., due to the Company's decision to wind down activity in this business in 2017. In 2016, we wrote off of \$15.4 million related to the Department of Education customer relationship intangible after the Department of Education announced in December 2016 that we would not be a recipient of the new contract awards.

Loss from Operations

As a result of the factors described above, loss from operations was \$7.1 million for the year ended December 31, 2017, compared to loss from operations of \$7.9 million for the year ended December 31, 2016, representing a decrease of \$0.8 million, or 11%.

Interest Expense

Interest expense was \$7.0 million for the year ended December 31, 2017 compared to \$7.9 million for the year ended December 31, 2016, representing a decrease of 12%. Interest expense decreased due to repayments of principal under our prior credit agreement resulting in a lower outstanding balance in 2017.

Income Taxes

The income tax benefit was \$1.3 million for the year ended December 31, 2017 compared to an income tax benefit of \$4.4 million for the year ended December 31, 2016. Our effective income tax rate decreased to 9% for the year ended December 31, 2017 from 28% for the year ended December 31, 2016. The decrease in the effective tax rate is primarily due to a loss from operations in 2017 for which the tax benefit is not recognized due to the valuation allowance and the accrued state income tax expense related to income from operations that is taxed in separate state jurisdictions.

Net Loss

As a result of the factors described above, net loss was \$12.7 million for the year ended December 31, 2017, which represents an increase of \$1.3 million compared to net loss of \$11.5 million for the year ended December 31, 2016.

Table of Contents

Year Ended December 31, 2016 compared to the Year Ended December 31, 2015

The following table presents our historical operating results for the periods presented:

| | Year Ended December 31, | | | |
|--|-------------------------|-----------|------------|----------|
| | 2016 | 2015 | \$ Change | % Change |
| | (in thousands) | | | |
| Consolidated Statements of Operations Data: | | | | |
| Revenues | \$141,360 | \$159,381 | \$(18,021) | (11)% |
| Operating expenses: | | | | |
| Salaries and benefits | 78,863 | 88,077 | (9,214) | (10)% |
| Other operating expense | 54,985 | 64,360 | (9,375) | (15)% |
| Impairment of goodwill and intangible assets | 15,438 | 236 | 15,202 | 6,442% |
| Total operating expenses | 149,286 | 152,673 | (3,387) | (2)% |
| Income (loss) from operations | (7,926) | 6,708 | (14,634) | (218)% |
| Interest expense | (7,897) | (8,889) | (992) | (11)% |
| Loss before benefit from income taxes | (15,823) | (2,181) | 13,642 | 625% |
| Benefit from income taxes | (4,370) | (386) | 3,984 | 1,032% |
| Net Loss | (11,453) | (1,795) | 9,658 | 538% |

Revenues

Total revenues were \$141.4 million for the year ended December 31, 2016, a decrease of \$18.0 million or 11%, compared to total revenues of \$159.4 million for the year ended December 31, 2015. The decrease is due to a decline in revenues in both our student lending and healthcare markets.

Student lending revenues were \$109.6 million for the year ended December 31, 2016, representing a decrease of \$9.8 million, or 8%, compared to the year ended December 31, 2015. This decrease was primarily a result of the reduction of revenues from the Department of Education due to the lack of placements of new student loans following the expiration of our contract in April 2015. This decrease was partially offset by an increase in revenue as a result of an increase in the number of borrowers that are participating in the rehabilitation programs with our Guaranty Agency clients.

Healthcare revenues were \$11.4 million for the year ended December 31, 2016, representing a decrease of \$8.5 million, or 43%, compared to the year ended December 31, 2015. This decrease was due primarily to reduced levels of permitted healthcare audit and recovery activities under our first CMS RAC contract during 2016 and an approximately \$1.8 million reduction in revenues from commercial healthcare customers.

Salaries and Benefits

Salaries and benefits expense was \$78.9 million for the year ended December 31, 2016, a decrease of \$9.2 million, or 10%, compared to salaries and benefits expense of \$88.1 million for the year ended December 31, 2015. The decrease in salaries and benefits expense was primarily due to a reduction in employee headcount during 2016 undertaken as a result of reduced business volumes.

Other Operating Expense

Other operating expense was \$55.0 million for the year ended December 31, 2016, a decrease of \$9.4 million, or 15%, compared to other operating expense of \$64.4 million for the year ended December 31, 2015. The decrease in other operating expenses was primarily due to lower communication and postage expenses and lower outside services and collections costs resulting from the wind-down of our Department of Education contract and our first RAC contract, and approximately \$3.3 million in transaction expenses associated with a proposed acquisition that did not occur in 2015.

Impairment of Goodwill and Intangible Assets

Impairment of customer relationship was \$15.4 million for the year ended December 31, 2016, an increase of \$15.2 million, compared to impairment of customer relationship of \$0.2 million for the year ended December 31, 2015. The increase in the impairment of customer relationship was due to the write off of \$15.4 million related to the Department of Education

Table of Contents

customer relationship intangible in 2016 after the Department of Education announced in December 2016 that we would not be a recipient of the new contract awards.

Income (Loss) from Operations

As a result of the factors described above, loss from operations was \$7.9 million for the year ended December 31, 2016, compared to income from operations of \$6.7 million for the year ended December 31, 2015, representing a decrease of \$14.6 million, or 218%.

Interest Expense

Interest expense was \$7.9 million for the year ended December 31, 2016 compared to \$8.9 million for the year ended December 31, 2015, representing a decrease of 11%. Interest expense decreased due to repayments of principal under our credit agreement, resulting in a lower outstanding balance during 2016.

Income Taxes

The income tax benefit was \$4.4 million for the year ended December 31, 2016 compared to an income tax benefit of \$0.4 million for the year ended December 31, 2015. Our effective income tax rate increased to 28% for the year ended December 31, 2016 from 18% for the year ended December 31, 2015. The increase in the effective tax rate is primarily due to the increase in the 2016 net loss, as the net loss in 2015 was closer to breakeven, and the impact of permanent differences and state taxes was therefore reduced on a percentage basis by the larger loss in 2016, offset by the recorded valuation allowance in 2016.

Net Loss

As a result of the factors described above, net loss was \$11.5 million for the year ended December 31, 2016, which represents an increase of \$9.7 million compared to net loss of \$1.8 million for the year ended December 31, 2015.

Liquidity and Capital Resources

Our principal sources of liquidity are cash on hand and cash flows from operations. Cash and cash equivalents, which excludes restricted cash, totaled \$21.7 million as of December 31, 2017. Due to our operating cash flows and our existing cash and cash equivalents and our ability to restructure both our variable and fixed expenses, we believe that we have the ability to meet our working capital and capital expenditure needs for the foreseeable future.

The \$11.3 million decrease in the balance of our cash and cash equivalents at December 31, 2017 compared with December 31, 2016 was primarily due to the principal repayments of \$11.2 million on our long-term debt in 2017. The following table presents information regarding our cash flows for the years ended December 31, 2017, 2016 and 2015:

| | Year Ended December 31, | | |
|---|-------------------------|-----------|-----------|
| | 2017 | 2016 | 2015 |
| | (in thousands) | | |
| Net cash provided by operating activities | \$2,974 | \$17,784 | \$16,171 |
| Net cash used in investing activities | (7,259) | (7,866) | (6,627) |
| Net cash used in financing activities | (12,677) | (40,637) | (18,691) |

Cash flows from operating activities

Operating activities provided \$3.0 million of cash during the year ended December 31, 2017, representing a decrease of \$14.8 million, compared to cash provided by operating activities of \$17.8 million for the year ended December 31, 2016. The decrease included a net loss of \$12.7 million in 2017 and was partially offset by various working capital fluctuations such as an increase in our income tax receivable of \$4.8 million, an increase in trade receivables of \$1.0 million and a decrease in other current liabilities of \$1.1 million.

Operating activities provided \$17.8 million of cash during the year ended December 31, 2016, representing an increase of \$1.6 million, compared to cash provided by operating activities of \$16.2 million for the year ended December 31, 2015. Our net loss of \$11.5 million in 2016 includes \$15.4 million of non-cash customer-relationship impairment expense. Taking account of this non-cash expense, operating activities during 2016 provided cash at a level similar to 2015. Additional operating cash

Table of Contents

was provided by a reduction in trade receivables of \$6.5 million. These items were partially offset by various working capital fluctuations such as an increase in our income tax receivable of \$2.0 million and a decrease in net payable to client of \$1.3 million.

Operating activities provided \$16.2 million of cash during the year ended December 31, 2015, representing a decrease of \$11.7 million, compared to cash provided by operating activities of \$27.9 million for the year ended December 31, 2014, primarily due to a reduction of net income from \$9.4 million to a net loss of \$1.8 million in 2015, an increase in net payable to client of \$2.3 million, collection of trade receivables of \$2.9 million and an increase in our income tax receivables and payables of \$5.3 million and a decrease in other prepaid expenses. These items were partially offset by various working capital fluctuations such as an increase in the estimated liability for appeals of \$0.5 million associated with our RAC contract with CMS and a decrease in accrued salaries and benefits.

Cash flows from investing activities

Investing activities resulted in cash outflow of \$7.3 million during the year ended December 31, 2017 and was primarily for capital expenditures related to information technology, hardware, data storage and security enhancements to our operating software.

Investing activities resulted in cash outflow of \$7.9 million during the year ended December 31, 2016 and was primarily for capital expenditures related to information technology, data storage, hardware, telecommunication systems and security enhancements to our proprietary software.

Investing activities resulted in cash outflow of \$6.6 million during the year ended December 31, 2015. The primary uses of cash associated with investing activities were \$7.9 million for capital expenditures related to information technology, data storage, hardware, furniture and equipment and security enhancements to our proprietary software, which was offset by proceeds from a sale of land for \$1.3 million.

Cash flows from financing activities

Cash used in financing activities of \$12.7 million during the year ended December 31, 2017 was primarily due to the repayment of principal on outstanding debt and other contractual obligations of \$55.5 million, additional borrowings on notes payable of \$44.0 million, and \$0.9 million in debt issuance costs for amendments to our credit agreement.

Cash used in financing activities of \$40.6 million during the year ended December 31, 2016 was primarily due to the repayment of principal on outstanding debt and other contractual obligations of \$39.1 million, and \$1.2 million in debt issuance costs for amendments to our credit agreement.

Cash used in financing activities of \$18.7 million during the year ended December 31, 2015 was primarily due to the repayment of principal on outstanding debt and other contractual obligations of \$18.7 million.

Restricted Cash

As of December 31, 2017, restricted cash included in current assets on our consolidated balance sheet was \$1.8 million. In November 2017, the Company deposited \$1.8 million in restricted cash as collateral for new letters of credit issued to replace letters of credit terminated under our prior credit agreement.

Estimated liability for appeals and Net payable to client

At December 31, 2017, there were balances of \$18.8 million and \$12.8 million for the estimated liability for appeals and the net payable to client, respectively, representing obligations that we expect to pay in the near term, although it is difficult to predict the precise timing of the associated cash outflows as they are dependent on the processing and resolution of audit appeals. The term of our first Medicare Recovery Audit Contract with CMS, for Region A, expired on January 31, 2018. During the term of that contract, we accrued an estimated liability for appeals for fees that is associated with appeals for cases that are successfully appealed by the providers. Our estimates for this appeals liability are based on our historical experience with the Medicare RAC appeal process. As the term of the original contract expired, on January 2, 2018, CMS issued a letter to us stating that we will no longer be obligated to support the appeals process or maintain an appeal reserve after the January 31, 2018 contract termination date. In addition to the estimated liability for appeals, we also maintained a separate net payable to client liability for appeals decisions which had been decided, but not yet refunded to CMS. On January 31, 2018, CMS issued to us their final Letter of Demand which reconciled all outstanding payables to CMS for the old Region A contract. Accordingly, during the first quarter 2018, we expect to release approximately \$21.5 million of the estimated liability for appeals and the net payable to client balances. This will increase first quarter 2018 revenue by an amount equal to the total liability

released. In conjunction with the release, we also expect to derecognize approximately \$7.1 million of prepaid

Table of Contents

expenses and other current assets reflecting accrued receivables associated with amounts due from subcontractors for decided and yet-to-be decided appeals. We will leave a smaller estimated liability for appeals as we continue to assess the remaining estimated liability for refunds and appeals overturned prior to the expiration of the contract term.

Long-term Debt

On August 7, 2017, we, through our wholly-owned subsidiary Performant Business Services, Inc. (the “Borrower”), entered into a new credit agreement with ECMC Group, Inc. (the “New Credit Agreement”). The New Credit Agreement provides for a term loan facility in the initial amount of \$44 million (the “Initial Term Loan”) and for up to \$15 million of additional term loans (“Additional Term Loans”; and together with the Initial Term Loan, the “Loans”) which Additional Term Loans may be drawn until the second anniversary of the funding of the Initial Term Loans, subject to the satisfaction of customary conditions. On August 11, 2017, the Initial Term Loan was advanced (the “Closing Date”) and the proceeds were applied to repay all outstanding amounts under our prior credit agreement. On September 29, 2017, we entered into Amendment No. 1 to the New Credit Agreement to extend the initial interest payment due date to December 31, 2017.

The Loans will mature on the third anniversary of the Closing Date, however we will have the option to extend the maturity of the Loans for two additional one year periods, subject to the satisfaction of customary conditions. The Loans will bear interest at the one-month LIBOR rate (subject to a 1% per annum floor) plus a margin which may vary from 5.5% per annum to 10.0% per annum based on our total debt to EBITDA ratio. The Initial Term Loans will initially bear interest at LIBOR plus 7.0% per annum. We will be required to pay 5% of the original principal balance of the Loans annually in quarterly installments and to offer to make mandatory prepayments of the Loans with a percentage of our excess cash flow which may vary between 75% and 0% depending on our total debt to EBITDA ratio. In addition to mandatory prepayments for excess cash flow, we will also be required to offer to prepay the Loans with the net cash proceeds of certain asset dispositions and with the issuance of debt not otherwise permitted under the New Credit Agreement. Except in connection with a change of control and the payment of a 1% premium, we will not be permitted to voluntarily prepay the Loans until after the first anniversary of the Closing Date. We will be permitted to prepay the Loans during the second year after the Closing Date if accompanied by a prepayment premium of 1%. Thereafter, we will be permitted to prepay the Loans without any prepayment premium.

The New Credit Agreement contains certain restrictive financial covenants which became effective on the Closing Date. Such covenants, will require, among other things, that we meet a minimum fixed charge coverage ratio of 0.5 to 1.0 through December 31, 2019, 1.0 to 1.0 through June 30, 2020 (or until December 31, 2020 if the maturity date of the Loans is extended until the fourth anniversary of the Closing Date), 1.25 to 1.0 through June 30, 2021 if the maturity date of the Loans is extended until the fourth anniversary of the Closing Date and 1.25 to 1.0 through June 30, 2022 if the maturity date of the Loans is extended until the fifth anniversary of the Closing Date. In addition, we will be required to maintain a maximum total debt to EBITDA ratio of 6.00 to 1.00. The New Credit Agreement also contains covenants that will restrict our and our subsidiaries’ ability to incur certain types or amounts of indebtedness, incur liens on certain assets, make material changes in corporate structure or the nature of its business, dispose of material assets, engage in a change in control transaction, make certain foreign investments, enter into certain restrictive agreements, or engage in certain transactions with affiliates.

The obligations under the New Credit Agreement are secured by substantially all of our United States domestic subsidiaries’ assets and are guaranteed by the Company and its United States domestic subsidiaries, other than the Borrower.

As a result of our entry into our New Credit Agreement, and the repayment of all amounts owed under our prior credit agreement, we wrote off debt issuance costs related to our prior credit agreement of approximately \$1.0 million in August 2017.

In consideration for, and concurrently with, the extension of the Initial Term Loan in accordance with the terms of the New Credit Agreement, we issued a warrant to the lender to purchase up to an aggregate of 3,863,326 shares of the Company’s common stock (representing approximately up to 7.5% of our diluted common stock as calculated using the “treasury stock” method as defined under GAAP for the most recent fiscal quarter) with an exercise price of \$1.92 per share. Upon our election to borrow any of the Additional Term Loans, we will be required to issue additional warrants at the same exercise price to purchase up to an aggregate of 77,267 additional shares of common stock

(which represents approximately 0.15% of our diluted common stock calculated using the “treasury stock” method as defined under GAAP for the most recent fiscal quarter) for each \$1,000,000 of such Additional Term Loans.

The New Credit Agreement also requires us to meet certain financial covenants, including maintaining a total debt to EBITDA ratio and a fixed charge coverage ratio, as such terms are defined in our credit agreement. These financial covenants are tested at the end of each quarter as applicable. The table below further describes these financial covenants, as well as our current status under these covenants as of December 31, 2017.

Table of Contents

| Financial Covenant | Covenant Requirement | Actual Ratio at December 31, 2017 |
|--|----------------------|-----------------------------------|
| Total debt to EBITDA ratio (maximum) ⁽¹⁾ | 6.0 | 3.45 |
| Fixed charge coverage ratio (minimum) ⁽²⁾ | 0.5 to 1.0 | 0.8 |

(1) The total debt to EBITDA ratio will apply to computation periods through August 11, 2020.

(2) The fixed charge coverage ratio of 0.5 to 1.0 is in effect through December 31, 2019, 1.0 to 1.0 will be in effect through June 30, 2020 (or until December 31, 2020 if the maturity date of the Loans is extended until the fourth anniversary of the Closing Date), 1.25 to 1.0 will be in effect through June 30, 2021 if the maturity date of the Loans is extended until the fourth anniversary of the Closing Date and 1.25 to 1.0 will be in effect through June 30, 2022 if the maturity date of the Loans is extended until the fifth anniversary of the Closing Date.

Contractual Obligations

The following summarizes our contractual obligations as of December 31, 2017:

| Contractual Obligations | Payments Due by Period | | | | |
|-----------------------------|------------------------|------------------|-----------|-----------|-------------------|
| | Total | Less Than 1 Year | 1-3 Years | 3-5 Years | More Than 5 Years |
| Long-Term Debt Obligations | \$44,000 | \$2,200 | \$41,800 | \$— | \$— |
| Interest Payments | 8,881 | 3,551 | 5,330 | — | — |
| Operating Lease Obligations | 14,652 | 2,564 | 6,056 | 3,842 | 2,190 |
| Purchase Obligations | 7,050 | 6,272 | 778 | — | — |
| Total | \$74,583 | \$14,587 | \$53,964 | \$3,842 | \$2,190 |

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements.

Adjusted EBITDA and Adjusted Net Income

To provide investors with additional information regarding our financial results, we have disclosed in the table below and within this report adjusted EBITDA and adjusted net income, both of which are non-GAAP financial measures.

We have provided a reconciliation below of adjusted EBITDA to net income and adjusted net income to net income, the most directly comparable GAAP financial measure to these non-GAAP financial measures.

We have included adjusted EBITDA and adjusted net income in this report because they are key measures used by our management and board of directors to understand and evaluate our core operating performance and trends and to prepare and approve our annual budget. Accordingly, we believe that adjusted EBITDA and adjusted net income provide useful information to investors and analysts in understanding and evaluating our operating results in the same manner as our management and board of directors.

Our use of adjusted EBITDA and adjusted net income has limitations as an analytical tool, and you should not consider it in isolation or as a substitute for analysis of our results as reported under GAAP. Some of these limitations are:

although depreciation and amortization are non-cash charges, the assets being depreciated and amortized may have to be replaced in the future, and adjusted EBITDA does not reflect cash capital expenditure requirements for such replacements or for new capital expenditure requirements;

adjusted EBITDA does not reflect interest expense on our indebtedness;

adjusted EBITDA does not reflect changes in, or cash requirements for, our working capital needs;

adjusted EBITDA does not reflect tax payments;

adjusted EBITDA and adjusted net income do not reflect the potentially dilutive impact of equity-based compensation;

Table of Contents

adjusted EBITDA and adjusted net income do not reflect the impact of certain non-operating expenses resulting from matters we do not consider to be indicative of our core operating performance; and other companies may calculate adjusted EBITDA and adjusted net income differently than we do, which reduces its usefulness as a comparative measure.

Because of these limitations, you should consider adjusted EBITDA and adjusted net income alongside other financial performance measures, including net income and our other GAAP results.

The following tables present a reconciliation of adjusted EBITDA and adjusted net income for the years ended December 31, 2017, 2016 and 2015 to actual net income for these periods:

| | Year Ended December 31, | | |
|---|-------------------------|------------|-----------|
| | 2017 | 2016 | 2015 |
| | (in thousands) | | |
| Reconciliation of Adjusted EBITDA: | | | |
| Net loss | \$(12,729) | \$(11,453) | \$(1,795) |

(4) Represents restructuring costs and severance and termination expenses incurred in connection with termination of employees and consultants.

(5) Represents tax adjustments assuming a marginal tax rate of 40%.

(6) Represents gain on the sale of land in San Angelo, TX in 2015.

(7) Represents goodwill and intangible assets impairment charges related to our Performant Europe Ltd. subsidiary in 2017, and in 2016 impairment of our Department of Education customer relationship related to the announcement that we would not receive a new contract award during the first round of awards which Performant successfully protested.

Recent Accounting Pronouncements

See "Recent Accounting Pronouncements" in Note 1(u) of the Consolidated Financial Statements included in Part IV - Item 15 of this report.

ITEM 7A. Quantitative and Qualitative Disclosures about Market Risk

We do not hold or issue financial instruments for trading purposes. We conduct all of our business in U.S. currency and therefore do not have any direct foreign currency risk. We do have exposure to changes in interest rates with respect to the borrowings under our senior secured credit facility, which bear interest at a variable rate based on LIBOR. For example, if the interest rate on our borrowings increased 100 basis points (1%) from the credit facility floor of 1.0%, our annual interest expense would increase by approximately \$0.4 million.

While we currently hold our excess cash in an operating account, in the future we may invest all or a portion of our excess cash in short-term investments, including money market accounts, where returns may reflect current interest rates. As a result, market interest rate changes impact our interest expense and interest income. This impact will depend on variables such as the magnitude of interest rate changes and the level of our borrowings under our credit facility or excess cash balances.

ITEM 8. Financial Statements and Supplementary Data

Our consolidated financial statements and notes thereto and the report of KPMG LLP are set forth in the Index to Financial Statements under Item 15, Exhibits, Financial Statement Schedules, and is incorporated herein by reference.

ITEM 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

ITEM 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We maintain a system of disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Company's reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to management, including our Chief Executive Officer and the Chief Accounting Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

Management, with the participation of our Chief Executive Officer and our Chief Accounting Officer, has evaluated the effectiveness of our disclosure controls and procedures, as defined in Rule 13a-15(e) under the Exchange Act, as of the fiscal year covered by this Annual Report on Form 10-K. Based on that evaluation, our Chief Executive Officer and Chief Accounting Officer concluded that our disclosure controls and procedures were functioning effectively at the reasonable assurance level as of December 31, 2017.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of our consolidated financial statements for external purposes in accordance with United States Generally Accepted Accounting Principles ("US GAAP"). Under the supervision of, and with the participation of

Table of Contents

our Chief Executive Officer and Chief Accounting Officer, management assessed the effectiveness of internal control over financial reporting as of December 31, 2017. The criteria established in “Internal Control Integrated Framework” issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”) were updated in May 2013, when COSO issued an updated framework (the "2013 COSO Framework"). Management based its assessment on the criteria established in the 2013 COSO Framework. Based on this evaluation, management concluded that its internal control over financial reporting was effective as of December 31, 2017.

Changes in Internal Control over Financial Reporting

There was no change in our internal control over financial reporting during the year ended December 31, 2017, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting, other than those noted above.

ITEM 9B. Other Information

None.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Performant Financial Corporation:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of Performant Financial Corporation and subsidiaries (the Company) as of December 31, 2017 and 2016, the related consolidated statements of operations, comprehensive income (loss), changes in stockholders' equity, and cash flows for each of the years in the three year period ended December 31, 2017, and the related notes and financial statement Schedule II (collectively, the consolidated financial statements). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2017 and 2016, and the results of its operations and its cash flows for each of the years in the three year period ended December 31, 2017, in conformity with U.S. generally accepted accounting principles.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ KPMG LLP

We have served as the Company's auditor since 2002.

PERFORMANT FINANCIAL CORPORATION AND SUBSIDIARIES

Notes To Consolidated Financial Statements

For the Years Ended December 31, 2017, 2016 and 2015

1. Summary of Significant Accounting Policies

(a) Organization and Nature of Business

Performant Financial Corporation (the Company) is a leading provider of technology-enabled recovery and analytics services in the United States. The Company's services help identify, restructure and recover delinquent or defaulted assets and improper payments for both government and private clients in a broad range of markets. Company clients typically operate in complex and regulated environments and outsource their recovery needs in order to reduce losses on billions of dollars of defaulted student loans, improper healthcare payments and delinquent state tax and federal treasury receivables. The Company generally provides our services on an outsourced basis, where we handle many or all aspects of the clients' recovery processes.

The Company's consolidated financial statements include the operations of Performant Financial Corporation (PFC), its wholly owned subsidiary Performant Business Services, Inc., and its wholly owned subsidiaries Performant Recovery, Inc. (Recovery), Performant Technologies, Inc., and Performant Europe Ltd. Effective August 13, 2012, we changed the name of our wholly owned subsidiary from DCS Business Services, Inc. (DCSBS) to Performant Business Services, Inc., and DCSBS' wholly owned subsidiaries from Diversified Collection Services, Inc. (DCS), and Vista Financial, Inc. (VFI), to Performant Recovery, Inc., and Performant Technologies, Inc., respectively. PFC is a Delaware corporation headquartered in California and was formed in 2003. Performant Business Services, Inc. is a Nevada corporation founded in 1997. Recovery is a California corporation founded in 1976. Performant Technologies, Inc. is a California corporation that was formed in 2004.

The Company is managed and operated as one business, with a single management team that reports to the Chief Executive Officer.

(b) Principles of Consolidation

The accompanying consolidated financial statements have been prepared in accordance with U.S. Generally Accepted Accounting Principles, or U.S. GAAP. The Company consolidates entities in which it has controlling financial interest, and as of December 31, 2017, all of the Company's subsidiaries are 100% owned. All significant intercompany balances and transactions have been eliminated in consolidation. Certain prior year amounts have been reclassified for consistency with the current period presentation.

(c) Use of Estimates in the Preparation of Consolidated Financial Statements

The preparation of the consolidated financial statements in conformity with U.S. GAAP, requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities, primarily accounts receivable, intangible assets, goodwill, estimated liability for appeals, other liabilities, deferred income taxes and income tax expense, and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting periods. Our actual results could differ from those estimates.

(d) Cash and Cash Equivalents

Cash and cash equivalents include demand deposits and highly liquid debt instruments with original maturities of three months or less when purchased. These investments can include money market funds that invest in highly liquid U.S. government and agency obligations, certificates of deposit, bankers' acceptances, and commercial paper. The Company collects monies on behalf of its clients. Cash is often held on behalf of the clients in various trust accounts and is subsequently remitted to the clients based on contractual agreements. Cash held in these trust accounts for contracting agencies is not included in the Company's assets (Note 11(a)).

(e) Restricted Cash

At December 31, 2017 and 2016, restricted cash included in current assets on our consolidated balance sheet was \$1.8 million and \$7.5 million, respectively. In May 2017, the Company paid \$7.5 million to the lenders and deposited \$6.0 million into a segregated deposit account in connection with the Eighth Amendment to our Prior Credit Agreement (as

Table of Contents

defined below). On August 3, 2017, all of this \$6.0 million of restricted cash was paid to the administrative agent for the benefit of the lenders under our Prior Credit Agreement. In November 2017, the Company deposited \$1.8 million in restricted cash as collateral for new letters of credit issued to replace letters of credit terminated under our prior credit agreement.

(f) Hosted Service Installation and Implementation Deliverables

In 2008, the Company entered into a long-term contract to provide hosted services to a client beginning in March 2009. The Company determined that certain installation and implementation deliverables were not separate units of accounting within the contract, and should be combined for revenue recognition purposes with the hosted service deliverable. Accordingly, revenue for these contract elements is being taken ratably from the commencement of hosted services in March 2009 through the contract period of March 2018. Additionally, the Company deferred the direct incremental costs associated with the installation and implementation deliverables, with the costs being expensed ratably from the March 2009 commencement of services through March 2018.

(g) Property, Equipment, and Leasehold Improvements

Property, equipment, and leasehold improvements are stated at cost, net of accumulated depreciation. Furniture and equipment are depreciated using the straight-line method over estimated useful lives ranging from 7 to 5 years. Buildings are depreciated using the straight-line method over 31.5 years. Leasehold improvements are amortized using the straight-line method over the shorter of the estimated life of the asset or the remaining term of the lease. Computer software and computer hardware are depreciated using the straight-line method over 3 years and 5 years, respectively.

Maintenance and repairs are charged to expense as incurred. Improvements that extend the useful lives of assets are capitalized.

When property is sold or retired, the cost and the related accumulated depreciation are removed from the consolidated balance sheet and any gain or loss from the transaction is included in the consolidated statements of operations.

(h) Goodwill and Other Intangible Assets

Goodwill represents the excess of purchase price and related costs over the fair value assigned to the net assets of businesses acquired. Goodwill is not amortized, but instead is reviewed for impairment at least annually. Impairment is the condition that exists when the carrying amount of goodwill is not recoverable and its carrying amount exceeds its fair value. The Company performs its assessment of whether it is more likely than not that goodwill fair value is less than its carrying amount in November of each year to allow the Company additional time to evaluate its assessment prior to reporting its results.

During the second quarter of 2017, the Company decided to wind down the activity of Performant Europe Ltd. Based on this decision, the Company concluded that the fair value of Performant Europe Ltd. was more likely than not less than its carrying amount. Accordingly, the goodwill balance related to the healthcare audit acquisition was \$0.9 million, and we recognized a goodwill impairment loss of this amount as of June 30, 2017.

The Company performed a qualitative assessment of whether it is more likely than not that goodwill fair value is less than its carrying amount as of November 30, 2017, and concluded that there was no need to perform an impairment test. The Company performed a qualitative assessment of whether it is more likely than not that goodwill fair value is less than its carrying amount as of November 30, 2016, and concluded that there was no need to perform an impairment test. In December 2016, the Department of Education awarded contracts for student loan recovery services to seven contractors, and we were not selected to receive one of these contract awards. Based on this event, the Company performed a Step 1 impairment assessment as of December 31, 2016 and concluded that it was not necessary to perform a Step 2 impairment assessment.

Identifiable intangible assets consist of customer contracts and related relationships, a perpetual license, and covenants not to compete. Customer contracts and related relationships are amortized over their estimated useful life of 4 to 20 years. The perpetual license is amortized over its estimated useful life of 5 years.

(i) Impairment of Long-Lived Assets

Long-lived assets are evaluated for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets or intangibles may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of the assets to future undiscounted net cash flows expected to be generated

Table of Contents

by the assets. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets.

(j) System Developments

The Company follows the provisions of Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Subtopic 350-40, Internal-Use Software, which specifies that costs incurred during the application stage of development should be capitalized. All other costs are expensed as incurred. During 2017, 2016 and 2015, costs of \$5.1 million, \$6.9 million and \$7.0 million respectively, were capitalized for projects in the application stage of development, with depreciation expense of \$6.7 million, \$5.8 million and \$4.8 million respectively, for completed projects.

(k) Debt Issuance Costs

Debt issuance costs represent loan and legal fees paid in connection with the issuance of long-term debt. Debt issuance costs are deducted from current and non-current notes payable and are amortized to interest expense in accordance with key terms of the notes as amended.

(l) Revenues, Accounts Receivable, and Estimated Liability for Appeals

Revenue is recognized upon the collection of defaulted loan and debt payments. Loan rehabilitation revenue is recognized when the rehabilitated loans are sold (funded) by clients. Incentive revenue is recognized upon receipt of official notification of incentive award from customers. Under the Company's RAC contract with CMS, the Company recognizes revenues when the healthcare provider has paid CMS for a given claim or has agreed to an offset against other claims by the provider. Providers have the right to appeal a claim and may pursue additional appeals if the initial appeal is found in favor of CMS. The Company accrues an estimated liability for appeals at the time revenue is recognized based on the Company's estimate of the amount of revenue probable of being refunded to CMS following successful appeal. In addition, if the Company's estimate of the liability for appeals with respect to revenues recognized during a prior period changes, the Company increases or decreases current period accruals based on such change in estimated liability. At December 31, 2017, a total of \$18.5 million was presented as an allowance against revenue, representing the Company's estimate of claims that may be overturned. In addition to the \$18.5 million related to the RAC contract with CMS, the Company has accrued \$0.3 million of additional estimated liability for appeals related to other healthcare contracts. The total accrued liability for appeals of \$18.8 million has therefore been presented in the caption estimated liability for appeals at December 31, 2017. Similarly, at December 31, 2016, the total appeals-related liability was \$19.3 million, comprised of an estimated liability for appeals of \$19.0 million. The \$18.8 million balance at December 31, 2017 and the \$19.3 million balance as of December 31, 2016, represents the Company's best estimate of the probable amount of losses related to appeals of claims for which commissions were previously collected. To the extent that required payments by the Company exceed the amount accrued, revenues in the applicable period would be reduced by the amount of the excess.

For the year ended December 31, 2017, the Company had 2 clients whose individual revenues exceeded 10% of the Company's total revenues. The dollar amount and percent of total revenue of each of the 2 clients is summarized in the table below (in thousands):

| Rank | 2017 Revenue | Percent of total revenue |
|------|--------------|--------------------------|
| 1 | \$43,189 | 32.7% |
| 2 | 27,367 | 20.7% |

For the year ended December 31, 2016, the Company had 3 clients whose individual revenues exceeded 10% of the Company's total revenues. The dollar amount and percent of total revenue of each of the 3 clients is summarized in the table below (in thousands):

| Rank | 2016 Revenue | Percent of total revenue |
|------|--------------|--------------------------|
| 1 | \$33,243 | 23.5% |
| 2 | 23,196 | 16.4% |
| 3 | 21,949 | 15.5% |

Table of Contents

For the year ended December 31, 2015, the Company had 3 clients whose individual revenues exceeded 10% of the Company's total revenues. The dollar amount and percent of total revenue of each of the 3 clients is summarized in the table below (in thousands):

| Rank | 2015 Revenue | Percent of total revenue |
|------|--------------|--------------------------|
| 1 | \$37,878 | 23.8% |
| 2 | 31,709 | 19.9% |
| 3 | 17,696 | 11.1% |

Revenue from the largest three customers was 63%, 55% and 55% of total revenue in 2017, 2016 and 2015, respectively. Accounts receivable due from these three customers were 31%, 57% and 54% of total trade receivables at December 31, 2017, 2016 and 2015, respectively. Trade accounts receivable are recorded at the invoiced amount and do not bear interest. Amounts collected on trade accounts receivable are included in net cash provided by operating activities in the consolidated statements of cash flows. The Company determines the allowance for doubtful accounts by specific identification. Account balances are charged off against the allowance after all means of collection have been exhausted and the potential for recovery is considered remote. The allowance for doubtful accounts was \$35 thousand and \$0.2 million for December 31, 2017 and December 31, 2016, respectively.

(m) Net Payable to Client

The Company nets outstanding accounts receivable invoices from an audit and recovery contract against payables for overturned audits. The overturned audits are netted against current fees due on the invoice to the client when they are processed by the client's system. The "Net payable to client" balance of \$12.8 million and \$13.1 million represents the excess of payables for overturned audits at December 31, 2017 and 2016, respectively. The Company expects that the net payable-to-client balance will be paid to the client within the next twelve months.

(n) Prepaid Expenses and Other Current Assets

At December 31, 2017, prepaid expenses and other current assets includes \$5.6 million of amounts estimated to become due from subcontractors. The Company employs subcontractors to audit claims as part of an audit & recovery contract, and to the extent that audits by these subcontractors are overturned on appeal, the fees associated with such claims are contractually refundable to the Company. At December 31, 2017, the receivable associated with estimated future overturns of subcontractor audits was \$5.6 million. In addition, at December 31, 2017, Prepaid expenses and other current assets includes a net receivable of \$3.7 million for subcontractor fees for already overturned audits refundable to the Company once the Company refunds its fees to the client as prime contractor. By comparison, at December 31, 2016, the receivable associated with the estimated future overturns of subcontractor audits was \$5.7 million, and the receivable for subcontractor fees for already overturned audits refundable to the Company once the Company refunds its fees to the client as prime contractor was \$3.7 million.

(o) Legal Expenses

The Company recognizes legal fees related to litigation as they are incurred.

(p) Comprehensive Income (Loss)

The Company has a single component of comprehensive income (loss) on the Consolidated Statements of Comprehensive Income (Loss) related to foreign currency translation adjustments for its subsidiary Performant Europe Ltd. for the years ended December 31, 2017, 2016 and 2015.

(q) Fair Value of Financial Instruments

The Company's financial instruments include cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities, short-term debt and long-term debt. The carrying values of cash and cash equivalents, accounts receivable, accounts payable, and accrued liabilities approximate their fair values based on or due to their short-term maturities. The carrying values of short-term debt and long-term debt approximate fair value, in which their variable interest rates approximate market rates.

Table of Contents

(r) Income Taxes

The Company accounts for income taxes under the asset-and-liability method. Deferred income tax assets and liabilities are recognized for future tax consequences attributable to differences between the carrying value of assets and liabilities for financial reporting purposes and for taxation purposes. Deferred income tax assets and liabilities are measured using the enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect of a change in tax rates on deferred income tax assets and liabilities is recognized in income in the period that includes the enactment date. Valuation allowances are established when necessary to reduce deferred tax assets to the amount expected to be realized.

The Company recognizes the effect of income tax positions only if those positions are more likely than not of being sustained. Recognized income tax positions are measured at the largest amount that is greater than 50% likely of being realized. Changes in recognition or measurement are reflected in the period in which the change in judgment occurs. Interest expense and penalties related to unrecognized tax benefits are recorded in income tax expense.

(s) Stock Options

The Company accounts for its employee stock-based compensation awards in accordance with FASB ASC Topic 718, Compensation – Stock Compensation. FASB ASC Topic 718 requires that all employee stock-based compensation is recognized as a cost in the financial statements and that for equity-classified awards, such cost is measured at the grant date fair value of the award. The Company estimates grant date fair value using the Black-Scholes-Merton option-pricing model.

FASB ASC Topic 718 also requires that excess tax benefits recognized in equity related to stock option exercises are reflected as financing cash inflows. The Company recognized an income tax benefit resulting from the exercise of stock options in 2017, 2016 and 2015 of \$0.0 million, \$0.1 million and \$0.02 million, respectively.

(t) Earnings per Share

For the years ended December 31, 2017, 2016, and 2015, basic earnings per share is calculated by dividing net income available to common shareholders by the sum of the weighted average number of common shares outstanding during the year. Diluted earnings per share is calculated by dividing net income available to common shareholders by the weighted average number of common shares and dilutive common shares equivalents outstanding during the period. The Company's common share equivalents consist of stock options, restricted stock units, and performance stock units.

The following table reconciles the basic to diluted weighted average shares outstanding using the treasury stock method (shares in thousands):

| | Years Ended December 31, | | |
|---|-----------------------------|--------|--------|
| | 2017 | 2016 | 2015 |
| Weighted average shares outstanding – basic | 50,688 | 50,038 | 49,415 |
| Dilutive effect of stock options | — | — | — |
| Weighted average shares outstanding – diluted | 50,688 | 50,038 | 49,415 |

The following table shows the number of shares of Common Stock subject to options and restricted stock awards that were outstanding for the years ended December 31, 2017, 2016 and 2015, which were not included in the net income per diluted share calculation because to do so would have been anti-dilutive:

| | Years Ended December 31, | | |
|------------------|--------------------------|-----------|-----------|
| | 2017 | 2016 | 2015 |
| Number of shares | 4,604,218 | 3,996,701 | 4,430,292 |

Number of shares includes 3,713,116, 3,360,384 and 3,812,516 options to purchase shares at exercise prices greater than the average market price of the common stock for the year ended December 31, 2017, 2016 and 2015, respectively, and excludes 891,102, 636,317 and 617,776 options to purchase shares for the year ended December 31, 2017, 2016 and 2015, respectively, because the effect of including them was anti-dilutive.

Table of Contents

(u) New Accounting Pronouncements

Recently Adopted Accounting Pronouncements

In November 2015, the FASB issued Accounting Standards Update (ASU) 2015-17, "Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes" (ASU 2015-17), which simplifies the reporting requirements of deferred taxes by requiring all organizations to classify all deferred tax assets and liabilities, along with any related valuation allowance, as noncurrent. The guidance is effective for public companies with annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. We adopted ASU 2015-17 during our first quarter of 2017 on a prospective basis.

During the first quarter 2017, the Company adopted ASU 2016-09, "Improvements to Employee Share-Based Payment Accounting" (ASU 2016-09) on a prospective basis. As a result of the adoption, the Company recognized \$324 thousand of income tax expense for the twelve months ended December 31, 2017. These tax benefits, or shortfalls, were historically recorded in equity. In addition, cash flows related to excess tax benefits, or shortfalls, are now classified as an operating activity. Cash paid on employees' behalf related to shares withheld for tax purposes is classified as a financing activity, consistent with prior year's presentation.

In November 2016, the FASB issued ASU 2016-18, "Restricted Cash" which clarifies guidance on the classification and presentation of restricted cash in the statement of cash flows. The standard states that restricted cash should be included within cash and cash equivalents on the statement of cash flows. This new guidance is effective for annual reporting periods, and interim periods within those years, beginning after December 15, 2017, and early adoption is permitted. We have adopted this guidance early and have included restricted cash within cash and cash equivalents on our consolidated statements of cash flows.

Recently Issued Accounting Pronouncements

In May 2014, the FASB issued an ASU that amends the FASB ASC by creating a new Topic 606, "Revenue from Contracts with Customers". The new guidance supersedes the revenue recognition requirements in Topic 605, "Revenue Recognition", and most industry-specific guidance on revenue recognition throughout the Industry Topics of the Codification. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. To achieve that core principle, an entity should apply a five step model for recognizing and measuring revenue from contracts with customers. In addition, an entity should disclose sufficient qualitative and quantitative information to enable users of financial statements to understand the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. The new revenue recognition guidance, including subsequent amendments, is effective for annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period. As of the date of this filing, we have completed our contract review and policy drafting. Based on our review, we believe the timing of revenue recognition will not materially change from current practice and the impact of adopting the new guidance is not material to the results of operations. The Company does not anticipate that our internal control framework will materially change, but rather that existing internal controls will be modified and augmented as necessary. We will adopt Topic 606 as of January 1, 2018 using the full retrospective method. We will provide additional information about the impact of this new guidance, including enhanced disclosure requirements, in future filings.

In February 2016, the FASB issued ASU 2016-02, "Leases", which, for operating leases, requires a lessee to recognize a right-of-use asset and a lease liability, initially measured at the present value of the lease payments, in its balance sheet. The standard also requires a lessee to recognize a single lease cost, calculated so that the cost of the lease is allocated over the lease term, on a generally straight-line basis. This new guidance is effective for annual reporting periods beginning after December 15, 2018 with early adoption permitted. We have not adopted this guidance early and are currently evaluating the effect on our consolidated financial statements.

In August 2016, the FASB issued ASU 2016-15, "Statement of Cash Flows: Classification of Certain Cash Receipts and Cash Payments" which provides guidance on the presentation of certain cash receipts and cash payments in the statement of cash flows in order to reduce diversity in existing practice. This new guidance is effective for annual reporting periods, and interim periods within those years, beginning after December 15, 2017, and early adoption is

permitted. This new standard requires retrospective adoption, with a provision for impracticability. We have not adopted this guidance early and are currently evaluating the effect on our consolidated financial statements. In January 2017, the FASB issued ASU 2017-04, "Simplifying the Test for Goodwill Impairment" to simplify the goodwill impairment testing process. The new standard eliminates Step 2 of the goodwill impairment test. If a

F-13

Table of Contents

company determines in Step 1 of the goodwill impairment test that the carrying value of goodwill is less than the fair value, an impairment in that amount should be recorded to the income statement, rather than proceeding to Step 2. This new guidance is effective for annual reporting periods, and interim periods with goodwill impairment tests within those years, beginning after December 15, 2019, and early adoption is permitted for testing periods after January 1, 2017. We have not adopted this guidance early and are currently evaluating the effect on our consolidated financial statements.

2. Property, Equipment, and Leasehold Improvements

Property, equipment, and leasehold improvements consist of the following at December 31, 2017 and 2016 (in thousands):

| | December 31, 2017 | December 31, 2016 |
|---|----------------------|----------------------|
| Land | \$ 1,122 | \$ 1,122 |
| Building and leasehold improvements | 6,410 | 6,203 |
| Furniture and equipment | 5,763 | 5,656 |
| Computer hardware and software | 72,044 | 67,861 |
| | 85,339 | 80,842 |
| Less accumulated depreciation and amortization | (64,395) | (57,107) |
| Property, equipment and leasehold improvements, net | \$ 20,944 | \$ 23,735 |

Depreciation and amortization expense of property, equipment and leasehold improvements was \$10.0 million, \$9.6 million and \$9.3 million for the years ended December 31, 2017, 2016 and 2015, respectively. During 2015, the Company sold land in Texas for \$1.3 million in cash for a gain of \$0.6 million.

3. Identifiable Intangible Assets

Identifiable intangible assets consist of the following at December 31, 2017 and 2016 (in thousands):

| December 31, 2017 | Gross Amounts | Accumulated Amortization | Net |
|--|------------------|-----------------------------|----------|
| Amortizable intangibles: | | | |
| Customer contracts and related relationships | \$ 22,128 | \$ (17,264) | \$ 4,864 |
| Perpetual license | 3,250 | (3,250) | — |
| Total intangible assets | \$ 25,378 | \$ (20,514) | \$ 4,864 |

| December 31, 2016 | Gross Amounts | Accumulated Amortization | Net |
|--|------------------|-----------------------------|----------|
| Amortizable intangibles: | | | |
| Customer contracts and related relationships | \$ 22,381 | \$ (16,560) | \$ 5,821 |
| Perpetual license | 3,313 | (3,239) | 74 |
| Total intangible assets | \$ 25,694 | \$ (19,799) | \$ 5,895 |

For the years ended December 31, 2017, 2016 and 2015, amortization expense related to intangible assets amounted to \$0.9 million, \$3.7 million and \$3.8 million, respectively. For the year ended December 31, 2017, an impairment expense of \$0.1 million was recognized to account for the impairment charge in Performant Europe Ltd. due to the Company's decision to wind down this subsidiary. For the year ended December 31, 2016, an impairment expense of \$15.4 million was recognized relating to the Department of Education customer relationship and has been presented as a separate caption in the consolidated statements of operations. For the year ended December 31, 2015, an impairment expense of \$0.2 million was recognized to account for the loss of a client.

Table of Contents

The estimated aggregate amortization expense for each of the five following fiscal years is as follows (in thousands):

| Year Ending December 31, | Amount |
|--------------------------|----------|
| 2018 | \$ 811 |
| 2019 | 811 |
| 2020 | 811 |
| 2021 | 811 |
| 2022 | 811 |
| Thereafter | 809 |
| Total | \$ 4,864 |

4. Credit Agreement

On March 19, 2012, we, through our wholly owned subsidiary, entered into a \$147.5 million credit agreement, as amended and restated, with Madison Capital Funding LLC as administrative agent, ING Capital LLC as syndication agent, and other lenders party thereto (as amended, the "Prior Credit Agreement"). The senior credit facility consists of (i) a \$57.0 million Term A loan that matures in March 2017, (ii) a \$79.5 million Term B loan that matures in June 2018, and (iii) a \$11.0 million revolving credit facility that expired and fully paid in March 2017. On June 28, 2012, we amended the credit agreement to increase the amount of our borrowings under our Term B loan by \$19.5 million. On November 4, 2014, February 19, 2016, July 26, 2016, October 27, 2016, and March 22, 2017, the Prior Credit Agreement was further amended to, among other things, modify a number of existing covenants and add new covenants requiring the Company to maintain a minimum cash balance, comply with an interest coverage ratio and achieve minimum EBITDA levels. On May 3, 2017, we further amended the credit agreement (the "Eighth Amendment") to extend the maturity date of the Term B loan to June 19, 2018. As a result of this extension, regularly scheduled quarterly amortization payments of \$247,500 were also extended through March 31, 2018, with the remaining outstanding principal amount due on the June 19, 2018 maturity date. Interest on the Term B loan charged under the credit agreement was also increased by 3.00% per annum, however the amount of such increased interest was payable in kind. Pursuant to the Eighth Amendment, the quarterly and annual financial reporting covenants were also modified to require that the Company's financial statements not contain a qualification, if required by GAAP, with respect to our ability to continue as a going concern.

On August 7, 2017, we, through our wholly-owned subsidiary Performant Business Services, Inc. (the "Borrower"), entered into a new credit agreement with ECMC Group, Inc. (the "New Credit Agreement"). The New Credit Agreement provides for a term loan facility in the initial amount of \$44 million (the "Initial Term Loan") and for up to \$15 million of additional term loans ("Additional Term Loans"; and together with the Initial Term Loan, the "Loans") which Additional Term Loans may be drawn until the second anniversary of the funding of the Initial Term Loans, subject to the satisfaction of customary conditions. On August 11, 2017, the Initial Term Loan was advanced (the "Closing Date") and the proceeds were applied to repay all outstanding amounts under the Prior Credit Agreement. On September 29, 2017, we entered into Amendment No. 1 to the New Credit Agreement to extend the initial interest payment due date to December 31, 2017.

The Loans will mature on the third anniversary of the Closing Date, however we will have the option to extend the maturity of the Loans for two additional one year periods, subject to the satisfaction of customary conditions. The Loans will bear interest at the one-month LIBOR rate (subject to a 1% per annum floor) plus a margin which may vary from 5.5% per annum to 10.0% per annum based on our total debt to EBITDA ratio. The Initial Term Loans will initially bear interest at LIBOR plus 7.0% per annum. Our annual interest rate at December 31, 2017 was 8.6%. We will be required to pay 5% of the original principal balance of the Loans annually in quarterly installments beginning March 31, 2018, and to offer to make mandatory prepayments of the Loans with a percentage of our excess cash flow which may vary between 75% and 0% depending on our total debt to EBITDA ratio. In addition to mandatory prepayments for excess cash flow, we will also be required to offer to prepay the Loans with the net cash proceeds of certain asset dispositions and with the issuance of debt not otherwise permitted under the New Credit Agreement.

Except in connection with a change of control and the payment of a 1% premium, we will not be permitted to voluntarily prepay the Loans until after the first anniversary of the Closing Date. We will be permitted to prepay the Loans during the second year after the Closing Date if accompanied by a prepayment premium of 1%. Thereafter, we

will be permitted to prepay the Loans without any prepayment premium.

The New Credit Agreement contains certain restrictive financial covenants which became effective on the Closing Date. Such covenants require, among other things, that we meet a minimum fixed charge coverage ratio of 0.5 to 1.0 through

F-15

Table of Contents

December 31, 2019, 1.0 to 1.0 through June 30, 2020 (or until December 31, 2020 if the maturity date of the Loans is extended until the fourth anniversary of the Closing Date), 1.25 to 1.0 through June 30, 2021 if the maturity date of the Loans is extended until the fourth anniversary of the Closing Date and 1.25 to 1.0 through June 30, 2022 if the maturity date of the Loans is extended until the fifth anniversary of the Closing Date. In addition, we will be required to maintain, a maximum total debt to EBITDA ratio of 6.00 to 1.00. The New Credit Agreement also contains covenants that will restrict the Company and its subsidiaries' ability to incur certain types or amounts of indebtedness, incur liens on certain assets, make material changes in corporate structure or the nature of its business, dispose of material assets, engage in a change in control transaction, make certain foreign investments, enter into certain restrictive agreements, or engage in certain transactions with affiliates.

The obligations under the New Credit Agreement are secured by substantially all of our United States domestic subsidiaries' assets and are guaranteed by the Company and its United States domestic subsidiaries, other than the Borrower.

As a result of our entry into our New Credit Agreement, and the repayment of all amounts owed under the Prior Credit Agreement, we wrote off debt issuance costs related to the Prior Credit Agreement of approximately \$1.0 million in August 2017.

Scheduled payments under the Agreement for the next five years and thereafter are as follows (in thousands):

| Year Ending December 31, Amount | |
|---------------------------------|----------|
| 2018 | \$2,200 |
| 2019 | 2,200 |
| 2020 | 39,600 |
| 2021 | — |
| Total | \$44,000 |

In consideration for, and concurrently with, the extension of the Initial Term Loan in accordance with the terms of the New Credit Agreement, we issued a warrant to the lender to purchase up to an aggregate of 3,863,326 shares of the Company's common stock (representing approximately up to 7.5% of our diluted common stock as calculated using the "treasury stock" method as defined under GAAP for the most recent fiscal quarter) with an exercise price of \$1.92 per share. Upon our election to borrow any of the Additional Term Loans, we will be required to issue additional warrants at the same exercise price to purchase up to an aggregate of 77,267 additional shares of common stock (which represents approximately 0.15% of our diluted common stock calculated using the "treasury stock" method as defined under GAAP for the most recent fiscal quarter) for each \$1,000,000 of such Additional Term Loans.

The Company has accounted for this warrant as an equity instrument since the Warrant is indexed to the Company's common shares and meets the criteria for classification in shareholders' equity. The relative fair value of the Warrant on the date of issuance was approximately \$3.3 million and is treated as a discount to the debt. This amount will be amortized to interest expense under the effective interest method over the life of the Term Loan, which is a period of 36 months. The Company estimated the value of the Warrant using the Black-Scholes model. The key assumptions used to value the Warrant are as follows:

| | |
|---------------------------------|--------|
| Exercise price | \$1.92 |
| Share price on date of issuance | \$1.85 |
| Volatility | 50.0 % |
| Risk-free interest rate | 1.83 % |
| Expected dividend yield | — % |
| Contractual term (in years) | 5 |

In addition, at the closing of the Term Loan, the Company paid transaction costs of \$0.6 million, which were recorded as a discount on the debt and will be amortized to interest expense using the effective interest method over the life of the initial Term Loan, which is a period of 36 months.

Table of Contents

Outstanding debt obligations are as follows (in thousands):

| | December 31, 2017 |
|--|----------------------|
| Principal amount | \$ 44,000 |
| Less: unamortized discount and debt issuance costs | (3,416) |
| Loan payable less unamortized discount and debt issuance costs | 40,584 |
| Less: current maturities | (2,029) |
| Long-term loan payable, net of current maturities | \$ 38,555 |

5. Commitments and Contingencies

We have entered into various non-cancelable operating lease agreements for certain of our office facilities and equipment with original lease periods expiring between 2017 and 2025. Certain of these arrangements have free rent periods and /or escalating rent payment provisions, and we recognize rent expense under such arrangements on a straight-line basis. In October 2017, we renewed our lease agreements for office space for approximately 50,000 square feet in Livermore, California. In December 2017, we entered two new lease agreements for office space for approximately 26,000 square feet in San Angelo, Texas and 32,000 square feet in Sunrise, Florida.

Future minimum rental commitments under non-cancelable leases as of December 31, 2017 are as follows (in thousands):

| Year Ending December 31, | Amount |
|--------------------------|----------|
| 2018 | \$2,564 |
| 2019 | 3,046 |
| 2020 | 3,010 |
| 2021 | 2,132 |
| 2022 | 1,710 |
| Thereafter | 2,190 |
| Total | \$14,652 |

Lease expense was \$2.7 million, \$2.8 million and \$3.0 million for the years ended December 31, 2017, 2016 and 2015, respectively.

6. Capital Stock

Since August 15, 2012, the authorized Common Stock has been 500,000,000 shares and the authorized preferred stock has been 50,000,000 shares.

7. Stock-based Compensation

(a) Stock Options

Under the terms of the Performant Financial Corporation 2007 Stock Option Plan, incentive and nonqualified stock options may be granted for up to 4,000,000 shares of the Company's authorized but unissued Common Stock. Options granted under the Performant Financial Corporation 2007 Stock Option Plan generally vest over a five-year period. Performant Financial Corporation 2007 Stock Option Plan was terminated on the completion of its initial public offering in August 2012. No shares of our common stock are available under our 2007 Stock Option Plan other than for satisfying exercises of stock options granted under this plan prior to termination.

The terms of the Performant Financial Corporation 2012 Stock Incentive Plan provide for the granting of incentive stock options within the meaning of Section 422 of the Code to employees and the granting of nonstatutory stock options, restricted stock, stock appreciation rights, stock unit awards and cash-based awards to employees, non-employee directors and consultants. The Company has reserved 10,550,000 shares of common stock under the 2012 Plan. Options granted under the Performant Financial Corporation 2012 Stock Incentive Plan generally vest over periods of four or five-years.

Table of Contents

The exercise price of incentive stock options shall generally not be less than 100% of the fair market value of the Common Stock subject to the option on the date that the option is granted. The exercise price of nonqualified stock options shall generally not be less than 85% of the fair market value of the Common Stock subject to the option on the date that the option is granted. Options issued under the Plans have a maximum term of 10 years and vest over schedules determined by the board of directors. Options issued under the Plans generally provide for immediate vesting of unvested shares in the event of a sale of the Company.

Total stock-based compensation expense charged as salaries and benefits expense in the consolidated statements of operations was \$3.7 million, \$4.7 million and \$5.0 million for the years ended December 31, 2017, 2016, and 2015, respectively. The following table sets forth a summary of our stock option activity for the year ended December 31:

| | Outstanding Options | Weighted average exercise price per share | Weighted average remaining contractual life (Years) | Aggregate Intrinsic Value (in thousands) |
|---|---------------------|---|---|--|
| Outstanding at December 31, 2014 | 4,023,383 | \$ 7.18 | 6.41 | |
| Granted | 294,500 | 3.57 | | |
| Forfeited | (171,625) | 8.25 | | |
| Exercised | (29,135) | 1.62 | | |
| Outstanding at December 31, 2015 | 4,117,123 | 6.92 | 5.64 | |
| Granted | 115,000 | 1.74 | | |
| Forfeited | (327,327) | 8.26 | | |
| Exercised | (398,267) | 0.85 | | |
| Outstanding at December 31, 2016 | 3,506,529 | 7.32 | 5.04 | |
| Granted | — | — | | |
| Forfeited | (260,175) | 5.40 | | |
| Exercised | (310,156) | 0.50 | | |
| Outstanding December 31, 2017 | 2,936,198 | \$ 8.21 | 4.48 | \$ 360 |
| Vested, exercisable, and expected to vest ⁽¹⁾ at December 31, 2017 | 2,929,438 | \$ 8.22 | 4.47 | \$ 360 |
| Exercisable at December 31, 2017 | 2,796,568 | \$ 8.38 | 4.34 | \$ 360 |

(1) Options expected to vest reflect an estimated forfeiture rate.

There were no stock options granted during the year ended December 31, 2017. The weighted-average grant-date exercise price of stock options granted during the years ended December 31, 2016 and 2015 was \$1.74 and \$3.57, respectively, per share. The aggregate intrinsic value of our stock options (the amount by which the market price of the stock on the date of exercise exceeded the exercise price of the option) exercised during the years ended December 31, 2017, 2016 and 2015, was \$0.4 million, \$0.4 million and \$0.1 million, respectively. At December 31, 2017, 2016, and 2015, there was \$0.3 million, \$2.0 million and \$4.7 million, respectively, of unrecognized stock-based compensation expense related to non-vested stock-based compensation arrangements, which the Company expects to recognize over a weighted-average period of 0.93 years as stock-based compensation expense. Net cash proceeds from the exercise of stock options were \$0.2 million, \$0.3 million and \$0.04 million during 2017, 2016 and 2015, respectively. For the years ended December 31, 2017, 2016 and 2015, we realized a \$0.0 million, \$0.1 million and \$0.02 million tax benefit from the exercise of stock options, respectively.

The fair value of each option grant was estimated using the Black-Scholes option pricing model. Expected volatilities are calculated based on the historical volatility data of comparable peer companies over a term comparable to the expected term of the options issued. The expected term of the award is determined based on the average of the vesting term and the contractual term. Management monitors share option exercise and employee termination patterns to estimate forfeiture rates within the valuation model.

We estimated the fair value of options granted using a Black-Scholes option pricing model with the following assumptions:

F-18

Table of Contents

| | For the Years Ended December 31, | | |
|--|----------------------------------|--------|--------|
| | 2017 | 2016 | 2015 |
| Expected volatility | —% | 51.5% | 48.6% |
| Expected dividends | —% | —% | —% |
| Expected term (years) | 0.0 | 6.1 | 6.1 |
| Risk-free interest rate | —% | 1.4% | 1.7% |
| Weighted-average estimated fair value of options granted during the year | \$— | \$0.86 | \$1.71 |

Valuation and Amortization Method – The Company estimates the fair value of stock options granted using the Black-Scholes-Merton option pricing model. The fair value is then amortized on a straight line basis over the requisite service periods of the awards, which is generally the vesting period. Stock options typically have a ten year life from the grant date and vesting periods of four to five years. The fair value of the Company's common stock is based on the market price of the stock on the date of grant.

Expected Term – The Company's expected term represents the period that the Company's stock-based awards are expected to be outstanding. For awards granted subject only to service vesting requirements, the Company utilizes the simplified method under the provisions of FASB ASC 718-10-S99-1 (Staff Accounting Bulletin No. 107) for estimating the expected term of the stock-based award.

Expected Volatility – Because there is insufficient history of the Company's stock price returns, the Company lacks sufficient historical volatility data for its equity awards. Accordingly, the Company calculates the expected volatility using a composite made up of comparable peer companies and as of December 31, 2017 an approximate 88% company weighting over a term comparable to the expected term of the options issued which would have been used had grants been made.

Expected Dividend – The Company has never paid dividends on its common shares and currently does not intend to do so. Accordingly, the dividend yield percentage is zero for all periods.

Risk-Free Interest Rate – The risk-free interest rate used in the Black Scholes valuation method is based on the U.S. Treasury constant maturity interest rate whose term is consistent with the expected life of our stock options.

(b) Restricted Stock Units

The following table summarizes restricted stock unit activity for the year ended December 31:

| | Number of Awards | Weighted average grant date fair value |
|---|------------------|--|
| Outstanding at December 31, 2015 | 1,229,274 | \$ 4.67 |
| Granted | 1,470,154 | 1.74 |
| Forfeited | (133,950) | 4.20 |
| Vested and converted to shares, net of units withheld for taxes | (505,238) | 4.31 |
| Outstanding at December 31, 2016 | 2,060,240 | \$ 2.70 |
| Granted | 1,701,252 | 2.32 |
| Forfeited | (417,725) | 2.93 |
| Vested and converted to shares, net of units withheld for taxes | (540,673) | 2.75 |
| Units withheld for taxes | (211,507) | \$ 2.75 |
| Outstanding at December 31, 2017 | 2,591,587 | \$ 2.39 |
| Expected to vest at December 31, 2017 | 2,462,007 | \$ 2.39 |

Share-based compensation cost for restricted stock units (RSUs) is measured based on the closing fair market value of the Company's common stock on the date of grant. The Company recognizes share-based compensation cost over the award's requisite service period on a straight-line basis for time-based RSUs and on a graded basis for RSUs that are contingent on the achievement of performance conditions. The Company recognizes a benefit (shortfall) from share-based compensation in the Consolidated Statements of Changes in Stockholders' Equity.

Table of Contents

The majority of RSUs that vested in 2017 and 2016 were net-share settled such that the Company withheld shares with value equivalent to the employees' minimum statutory obligation for the applicable income and other employment taxes, and remitted the cash to the appropriate taxing authorities. The total shares withheld were approximately 212,000 shares for 2017 and approximately 148,000 shares for 2016, and were based on the value of the RSUs on their respective vesting dates as determined by the Company's closing stock price. These net-share settlements had the effect of share repurchases by the Company as they reduced the number of shares that would have otherwise been issued as a result of the vesting and did not represent an expense to the Company.

At December 31, 2017 and 2016, there was \$4.3 million and \$3.7 million of compensation expense yet to be recognized related to non-vested restricted stock units. The unrecognized expense as of December 31, 2017 is expected to be recognized over the remaining weighted-average vested period of 2.68 years. 752,180 and 505,238 of the restricted stock units vested during the years ended December 31, 2017 and 2016, respectively. Restricted stock units granted under the Performant Financial Corporation 2012 Stock Incentive Plan generally vest over periods between one and four years.

8. Employee Benefit Plan

The Company has a 401(k) Salary Deferral Plan (the Plan) covering all full-time employees who have met certain service requirements. Employees may contribute a portion of their salary up to the maximum limit established by the Internal Revenue Code for such plans. Employer contributions are discretionary. No matching contributions were made during 2017, 2016 and 2015.

9. Income Taxes

The Company's income tax expense (benefit) consists of the following (in thousands):

| | 2017 | 2016 | 2015 |
|---------------|-----------|-----------|-----------|
| Current: | | | |
| Federal | \$(5,427) | \$3,835 | \$1,393 |
| State | 369 | (1,293) | 1,164 |
| | (5,058) | 2,542 | 2,557 |
| Deferred: | | | |
| Federal | \$2,643 | \$(5,379) | \$(2,578) |
| State | 1,090 | (1,533) | (365) |
| | 3,733 | (6,912) | (2,943) |
| Total benefit | \$(1,325) | \$(4,370) | \$(386) |

The reconciliation between the amount computed by applying the U.S. federal statutory rate of 34% to income before taxes and the Company's tax provision for 2017, 2016, and 2015 is as follows:

| | 2017 | 2016 | 2015 |
|--|-------|-------|-------|
| Federal income at the statutory rate | 34 % | 34 % | 35 % |
| State income tax, net of federal benefit | (8)% | 11 % | (26)% |
| Permanent differences | 1 % | (1)% | (9)% |
| Work Opportunity Credit | 2 % | 1 % | 9 % |
| Return to provision true-up | (1)% | (1)% | 4 % |
| Valuation Allowance | (13)% | (18)% | — % |
| Rate change on deferreds | (6)% | — % | — % |
| Other | — % | 2 % | 4 % |
| | 9 % | 28 % | 17 % |

Table of Contents

The following table summarized the components of the Company's deferred tax assets and liabilities as of December 31, 2017 and 2016 (in thousands):

| | 2017 | 2016 |
|--|---------|----------|
| Deferred tax assets | | |
| Bad debt reserve | \$ 11 | \$92 |
| Vacation accrual | 510 | 557 |
| Workers Compensation | 241 | 308 |
| Nonqualified stock options | 3,917 | 4,893 |
| Debt issuance costs | 27 | 279 |
| Acquisition costs | 23 | 66 |
| State tax deferral | 384 | 843 |
| Deferred revenue | 15 | 104 |
| State tax credits | 452 | 298 |
| Net operating loss | 453 | 217 |
| Estimated liability for appeals | 3,956 | 5,585 |
| Other | 448 | 146 |
| Total deferred tax assets | 10,437 | 13,388 |
| Valuation allowance | (5,772) | (3,857) |
| Total deferred tax assets net of valuation allowance | 4,665 | 9,531 |
| Deferred tax liabilities: | | |
| Identifiable intangible assets | (733) | (1,299) |
| Fixed assets | (3,430) | (4,009) |
| Other | (34) | (22) |
| Total deferred tax liabilities | (4,197) | (5,330) |
| Net deferred tax assets (liabilities) | \$468 | \$4,201 |

As of December 31, 2017, the Company recorded a valuation allowance against deferred tax assets that are not more likely than not realizable based upon the assessment of all positive and negative evidence. The total amount of the valuation allowance at December 31, 2017 is \$5.8 million, which is an increase of \$1.9 million from the amount recorded as of December 31, 2016.

On December 22, 2017, President Trump signed into law the “Tax Cuts and Jobs Act” (TCJA) that significantly reforms the Internal Revenue Code of 1986, as amended. The TCJA, among other things, includes changes to U.S. federal tax rates, imposes significant additional limitations on the deductibility of interest, allows for the expensing of capital expenditures, and puts into effect the migration from a “worldwide” system of taxation to a territorial system. We do not expect tax reform to have a material impact to our financial statements. Our net deferred tax assets and liabilities have been revalued at the newly enacted U.S. corporate rate, and the provisional impact was recognized in our tax expense in 2017. We are continuing to evaluate the impact this tax reform legislation may have on our business.

In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the reversal of deferred tax liabilities (including the impact of available carryback and carryforward periods), projected future taxable income and tax-planning strategies in making this assessment.

Based upon the Company’s cumulative three year loss position and projections for future taxable income over the periods in which the deferred tax assets are deductible, management believes it is more likely than not that the Company will be unable to realize the benefits of these deductible differences. The amount of the deferred tax asset considered realizable, however, could change in the near term if estimates of future taxable income during the carryforward period change.

The Company has state tax credits of \$0.5 million, which will expire in 2024. The Company has state net operating loss carryforwards of \$0.4 million which expire in 2020 and a federal net operating loss carryforward of \$0.1 million which will expire in 2037. The Company has \$0.3 million of federal tax credit carryforwards which will expire in

2037.

F-21

Table of Contents

The following table reconciles the Company's unrecognized tax benefits as of December 31, 2017 from its unrecognized tax benefits as of December 31, 2015 (in thousands):

| | |
|--|---------|
| Unrecognized tax benefits balance at December 31, 2015 | \$895 |
| Increase related to prior year tax positions | 311 |
| Decrease related to prior year tax positions | (43) |
| Increase related to current year tax positions | — |
| Settlements | — |
| Lapse of statute of limitations | (176) |
| Unrecognized tax benefits balance at December 31, 2016 | 987 |
| Increase related to prior year tax positions | 362 |
| Decrease related to prior year tax positions | — |
| Increase related to current year tax positions | — |
| Settlements | — |
| Lapse of statute of limitations | (267) |
| Unrecognized tax benefits balance at December 31, 2017 | \$1,082 |

At December 31, 2017 and 2016, we had approximately \$1.1 million and \$1.0 million of unrecognized tax benefits, respectively. We do not expect any significant change in unrecognized tax benefits during the next twelve months.

The Company records interest expense and penalties related to unrecognized tax benefits in income tax expense. The amount of accrued interest was not material at December 31, 2017 and 2016, respectively. No penalties were recognized in 2016 or accrued at December 31, 2017, and 2016 respectively. Unrecognized tax benefits of approximately \$1.1 million which, if recognized, would favorably affect the Company's effective income tax rate.

We file income tax returns with the U.S. federal government and various state jurisdictions. We operate in a number of state and local jurisdictions, most of which have never audited our records. Accordingly, we are subject to state and local income tax examinations based upon the various statutes of limitations in each jurisdiction. For tax years before 2014, the Company is no longer subject to Federal and certain other state tax examinations. We are currently being examined by the Franchise Tax Board of California for tax years 2011 through 2014.

10. Related Party Transactions

The Company did not have any material related party transactions for the years ending December 31, 2017, 2016 and 2015.

11. Other Commitments and Contingencies

(a) Trust Funds

The Company collects principal and interest payments and collection costs on defaulted loans for various contracting agencies. Cash collections for some of the Company's customers are held in trust in bank accounts controlled by the Company. The Company remits trust funds to the contracting agencies on a regular basis. The amount of cash held in trust and the related liability are separated from and not included in the Company's assets and liabilities. Cash held in trust for customers totaled \$0.7 million and \$1.4 million at December 31, 2017 and 2016, respectively.

(b) Litigation

The Company, during the ordinary course of its operations, has been named in various legal suits and claims, several of which are still pending. In the opinion of management and the Company's legal counsel, such legal actions will not have a material effect on the Company's financial position or results of operations or cash flows.

12. Subsequent Events

The term of our first Medicare Recovery Audit Contract with CMS, for Region A, expired on January 31, 2018. During that contract, we accrued an estimated liability for appeals for fees that are associated with appeals for cases that are successfully appealed by the providers. Our estimates for this appeals liability are based on our historical experience with the Medicare RAC appeal process. As the term of the original contract expired, CMS issued a letter to us on January 2,

Table of Contents

2018, stating that Performant will no longer be obligated to support the appeals process or maintain an appeal reserve after the January 31, 2018 contract termination date. In addition to the estimated liability for appeals, we also maintained a separate Net payable to client liability for appeals decisions which had been decided, but not yet refunded to CMS. On January 31, 2018, CMS issued to us their final Letter of Demand which reconciled all outstanding payables to CMS for the old Region A contract. Accordingly, during the first quarter 2018, we expect to release approximately \$21.5 million of the estimated liability for appeals and the Net payable to client balances. This will increase first quarter 2018 revenue by an amount equal to the total liability released. In conjunction with the release, we also expect to derecognize approximately \$7.1 million of prepaid expenses and other current assets reflecting accrued receivables associated with amounts due from subcontractors for decided and yet-to-be decided appeals. We will leave a smaller estimated liability for appeals as we continue to assess the remaining estimated liability for refunds and appeals overturned prior to the expiration of the contract term. The remaining amount represents management's best estimate of the remaining estimated liability for appeals for fees associated with appeals for cases that have been successfully appealed by providers prior to January 31, 2018, or the term expiration of the Region A contract.

We have evaluated subsequent events through the date these consolidated financial statements were issued and there are no other events that have occurred that would require adjustments or disclosures to our consolidated financial statements.
