Intercontinental Exchange, Inc. and Subsidiaries

Notes to Consolidated Financial Statements

(Unaudited)

1. Description of Business

Intercontinental Exchange, Inc. (the "Company" or "ICE") is a leading global operator of exchanges and clearing houses. The Company currently operates 11 global exchanges and five central clearing houses. The Company was previously known as IntercontinentalExchange Group, Inc. and changed its name to Intercontinental Exchange, Inc. on June 2, 2014. The Company was organized on March 6, 2013 as a direct, wholly-owned subsidiary of Intercontinental Exchange Holdings, Inc. (formerly known as IntercontinentalExchange, Inc.) for the purpose of effecting the acquisition of NYSE Holdings LLC (formerly known as NYSE Euronext Holdings LLC) ("NYSE"), which occurred on November 13, 2013 (Note 3). Upon the completion of the acquisition, Intercontinental Exchange Holdings, Inc. and NYSE each became wholly-owned subsidiaries of the Company.

The Company, through its subsidiaries, operates regulated global markets and clearing houses, including derivatives and equities exchanges, over-the counter markets and derivatives clearing houses, and is a provider of market data, technology, benchmark administration and post-trade services. The Company's global marketplaces serve a broad array of markets for energy, environmental and agricultural commodities, interest rates, credit derivatives, equity derivatives, metals and currency derivatives contracts, as well as equity and equity options securities.

On June 24, 2014, the Company sold 65.8 million shares of common stock of its wholly-owned subsidiary Euronext N.V. ("Euronext"), representing 94% of Euronext's outstanding shares, in three transactions. The transactions include the Company's sale of 42.2 million shares of Euronext common stock in an initial public offering ("IPO") at €20 per share, 23.4 million shares of Euronext common stock to a group of European institutional investors at €19.20 per share, and 0.2 million shares of Euronext common stock to eligible Euronext employees at €16 per share. These transactions generated an aggregate €1.4 billion (\$1.9 billion) of net cash proceeds for the Company. The net cash proceeds received included cash of \$220 million distributed from Euronext as part of the separation of Euronext from the Company. Euronext is comprised of the continental European-based exchanges acquired by the Company as part of the NYSE acquisition, including the London, Paris, Amsterdam, Brussels and Lisbon exchanges. Also, during the three months ended September 30, 2014, the Company sold its entire interest in three companies that comprised the former NYSE Technologies (NYFIX, Metabit and Wombat). Due to the sales a controlling interest in Euronext and the three companies comprising NYSE Technologies, the Company de-consolidated the assets and liabilities of Euronext (as of the IPO date) and NYSE Technologies (as of the sales dates) and included the financial results of these entities in discontinued operations in the accompanying unaudited consolidated financial statements. As of September 30, 2014, the Company continues to own 4.2 million shares of Euronext common stock, representing 6% of the outstanding shares of Euronext. See Note 13 for further information regarding the IPO of Euronext and the sales of the three NYSE Technologies businesses.

2. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared by the Company in accordance with U.S. generally accepted accounting principles ("U.S. GAAP") pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC") regarding interim financial reporting. Accordingly, the unaudited consolidated financial statements do not include all of the information and footnotes required by U.S. GAAP for complete financial statements and should be read in conjunction with the Company's audited consolidated financial statements and related notes thereto for the year ended December 31, 2013. The accompanying unaudited consolidated financial statements reflect all adjustments that are, in the opinion of the Company's management, necessary for a fair presentation of results for the interim periods presented. These adjustments are of a normal recurring nature. Preparing financial statements requires management to make estimates and assumptions that affect the amounts that are reported in the consolidated financial statements and accompanying disclosures. Although these estimates are based on management's best knowledge of current events and actions that the Company may undertake in the future, actual results may be different from these estimates. The results of operations for the nine and three months ended September 30, 2014 are not necessarily indicative of the results to be expected for any future period or the full fiscal

year.

The accompanying unaudited consolidated financial statements include the accounts of the Company and its wholly-owned and controlled subsidiaries. All intercompany balances and transactions between the Company and its wholly-owned and controlled subsidiaries have been eliminated in consolidation. As discussed in Note 3, the Company completed the acquisition of Singapore Mercantile Exchange Pte. Ltd. ("SMX") during the nine months ended September 30, 2014 and has included the financial results of SMX in the consolidated financial statements effective from the acquisition date. As discussed in Note 13, the Company completed the IPO of Euronext on June 24, 2014, the sale of Wombat on July 23, 2014 and the sale of NYFIX and Metabit on September 19, 2014, and has included the financial results of these companies through these dates in discontinued operations in the consolidated financial statements.

8

For those consolidated subsidiaries in which the Company's ownership is less than 100% and for which the Company has control over the assets and liabilities and the management of the entity, the outside stockholders' interests are shown as non-controlling interests.

Segment Information

The Company previously operated as a single reportable business segment as of December 31, 2013. As of March 31, 2014, the Company reported two business segments, the ICE segment and the Euronext segment, which was reflective of how the Company's chief operating decision maker reviewed and operated the Company's business. Following the IPO and de-consolidation of Euronext in June 2014, the Company reverted to one operating segment, which is reflective of how the Company's chief operating decision maker reviews and operates the business as of June 30, 2014 and September 30, 2014.

Recently Adopted and New Accounting Pronouncements

In April 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2014-08, Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360): Reporting Discontinued Operations and Disclosures of Disposals of Components of Entity, which changes the criteria for reporting discontinued operations while enhancing disclosure requirements. This amendment clarifies the financial reporting of discontinued operations. The guidance defines a discontinued operation as a disposal of a component or group of components that is disposed of or is classified as held for sale and represents a strategic shift that has a major effect on an entity's operations and financial results. This amendment will be effective in the first quarter of 2015 and early adoption is permitted. The Company does not expect to adopt this amendment early, and the adoption is not expected to have a material effect on the Company's consolidated financial statements.

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606), which amended revenue recognition guidance. The amendment's core principle is that a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. This amendment will be effective for interim and annual periods beginning after December 15, 2016 and early adoption is not permitted. The Company is currently in the process of evaluating the impact of adoption of this amendment but it currently does not expect the adoption to have a material effect on the Company's consolidated financial statements.

3. Acquisitions

NYSE Acquisition

On November 13, 2013, the Company acquired 100% of NYSE for a combination of cash and stock. The total purchase price was \$11.1 billion, comprised of cash consideration of \$2.7 billion and 42.4 million shares of the Company's common stock. The fair value of the shares issued was \$8.4 billion based on the closing share price of the Company's common stock of \$197.80 per share on November 12, 2013.

Under purchase accounting, the total purchase price was allocated to NYSE's preliminary net tangible and identifiable intangible assets based on the estimated fair values of those assets as of November 13, 2013, as set forth below. The excess of the purchase price over the preliminary net tangible and identifiable intangible assets was recorded as goodwill. Goodwill represents potential revenue synergies related to clearing and new product development, expense synergies related to technology and clearing, and opportunities to enter new markets. The preliminary purchase price allocation is as follows (in millions):

Property and equipment	\$637
Goodwill	7,362
Identifiable intangible assets	8,516
Other assets and liabilities, net	198
Deferred tax liabilities on identifiable intangible assets	(2,768)
Short-term and long-term debt	(2,529)
Non-controlling interests	(327)
Total preliminary purchase price allocation	\$11,089

In performing the preliminary purchase price allocation, the Company considered, among other factors, the intended future use of acquired assets, analysis of historical financial performance and estimates of future performance of NYSE's business. The preliminary allocation of the purchase price will be finalized upon the completion of the remaining analysis of the acquired assets and liabilities. During the nine months ended September 30, 2014, the Company adjusted the preliminary purchase price allocation based on updated fair value analyses of the NYSE tangible and intangible assets and liabilities. The fair value adjustments reflected in the tables above and below, primarily result in an increase in the customer relationships intangible assets of \$60 million, an increase in the

deferred tax liabilities on identifiable intangible assets of \$34 million, an increase in other assets and liabilities, net, of \$39 million, and a corresponding decrease to goodwill of \$60 million. The income statement impact for 2013 relating to these fair value adjustments is not material to the consolidated financial statements. The Company has not yet obtained all of the information related to the fair value of the acquired assets and liabilities related to the acquisition to finalize the purchase price allocation. The primary areas of the preliminary purchase price allocation that are not yet finalized relate to the valuation of acquired income tax assets and liabilities and the valuation of these items will be finalized during the fourth quarter of 2014.

The following table sets forth the components of the preliminary intangible assets and the net book value as of September 30, 2014 (in millions, except years):

Preliminary Intangible Assets	Preliminary Acquisition-Date Fair Value	Foreign Currency Translation	De-Consolidation of Euronext and NYSE Technologies (Note 13)	Accumulated Amortization	Net Book Value	Useful Life
Exchange registrations and licenses	\$ 6,960	\$ 15	\$(1,258)	\$ —	\$5,717	Indefinite
Customer relationships	1,128	2	(165)	(48)	917	17-25 years
Trade names	315	—	(30)	(4)	281	1 year to Indefinite
Developed technology	113	—	(19)	(30)	64	3 years
Total	\$ 8,516	\$ 17	\$(1,472)	\$(82)	\$6,979	

The Company incurred \$82 million and \$36 million in NYSE employee termination costs related to continuing operations during the nine and three months ended September 30, 2014, respectively, with such costs included in acquisition-related transaction and integration costs. NYSE had net income of \$342 million and \$64 million from continuing operations during the nine and three months ended September 30, 2014, respectively, which includes the employee termination costs discussed above, but is net of the discontinued operations of Euronext, NYFIX, Metabit and Wombat discussed in Note 13.

The financial information in the table below summarizes the combined results of operations of the Company and NYSE, on a pro forma basis, as though the companies had been combined as of January 1, 2013. The pro forma financial information is presented for informational purposes only and is not indicative of the actual results of operations that would have been achieved if the acquisition had taken place at the beginning of the periods presented. Such pro forma financial information is based on the historical financial statements of the Company and NYSE and includes the results of Euronext and the NYSE Technology companies as discontinued operations. This pro forma financial information is based on estimates and assumptions that have been made solely for purposes of developing such pro forma information, including, without limitation, the preliminary purchase accounting adjustments. The pro forma financial information does not reflect any synergies or operating cost reductions that may be achieved from the combined operations. The pro forma financial information combines the historical results for the Company and NYSE for nine and three months ended September 30, 2013 in the following table (in millions, except per share amounts):

	Nine Months Ended September 30, 2013	Three Months Ended September 30, 2013
Total revenues, less transaction-based expenses	\$2,287	\$722
Operating income	\$1,091	\$334
Income from continuing operations	\$776	\$282
Income from discontinued operations, net of tax	\$134	\$35
Net income attributable to the Company	\$910	\$317

Edgar Filing: Intercontinental Exchange, Inc. - Form 10-Q

Basic earnings per common share:		
Continuing operations	\$6.75	\$2.46
Discontinued operations	1.17	0.30
Basic earnings per share	\$7.92	\$2.76
Diluted earnings per common share:		
Continuing operations	\$6.71	\$2.44
Discontinued operations	1.16	0.30
Diluted earnings per share	\$7.87	\$2.74

SMX Acquisition

On February 3, 2014, the Company acquired 100% of the outstanding common stock of Singapore Mercantile Exchange Pte. Ltd. ("SMX"). The acquisition included Singapore Mercantile Exchange Clearing Corporation Pte. Ltd. ("SMXCC"), a wholly-owned

subsidiary of SMX which was the clearing house for all SMX trades. SMX operated futures markets in Singapore across metals, currencies, energy and agricultural commodities, and SMXCC cleared the contracts executed on SMX. SMX and SMXCC retain licenses to operate as an approved exchange and an approved clearing house, regulated by the Monetary Authority of Singapore. These licenses provided the Company with exchange and clearing licenses in Asia. The exchange and clearing infrastructures are expected to transition to the ICE trading and clearing platforms in the first quarter of 2015. As a result, a period of business transition is currently underway and the exchange and clearing house have been temporarily closed.

The SMX purchase price was allocated to the net tangible and identifiable intangible assets based on the fair value of those assets as of February 3, 2014. The net tangible and identifiable intangible assets acquired were \$45 million, inclusive of intangible assets of \$31 million for exchange registrations and licenses, which have been assigned an indefinite life. The excess of the purchase price over the net tangible and identifiable intangible assets was \$105 million and was recorded as goodwill. SMX and SMXCC have been renamed ICE Futures Singapore and ICE Clear Singapore, respectively.

SuperDerivatives Acquisition

On September 5, 2014, the Company entered into a definitive agreement to acquire 100% of the outstanding common stock of SuperDerivatives Inc. ("SuperDerivatives"), a leading provider of risk management analytics, financial market data and valuation services. The acquisition closed on October 7, 2014. The acquisition is intended to accelerate the Company's multi-asset class clearing, risk management and market data strategy. The Company paid \$350 million in cash to acquire SuperDerivatives.

Founded in 2000, SuperDerivatives provides risk management analytics and systems across all asset classes, including interest rates, foreign exchange, credit, equities, energy and commodities to customers including banks, asset managers, corporations, central banks, auditors and brokers. Key risk management and data products and services include independent valuation services, market data for mark-to-market, multi-asset derivatives front office and risk systems and a multi-asset over-the-counter execution platform. SuperDerivatives' DGX front-end data system is a web-based platform that delivers analytics, data, news and chat with video in a cost-efficient manner.

Pending Holland Clearing House Acquisition

On September 10, 2014, the Company entered into a definitive agreement to acquire 75% of the outstanding common stock of Holland Clearing House N.V. ("HCH"), a continental European clearing house, to support the Company's comprehensive clearing strategy for financial products. ABN AMRO Clearing Bank N.V. will retain the remaining 25% minority interest in HCH. Completion of the transaction is subject to regulatory approval and other customary closing conditions. The transaction is expected to close in the fourth quarter of 2014.

HCH is a continental European derivatives clearing house based in Amsterdam and is the primary clearing house for The Order Machine ("TOM"), a multi-lateral trading facility for equity options. HCH is regulated and supervised in the Netherlands by the Authority For the Financial Markets and the Dutch Central Bank.

4. Short-Term and Long-Term Restricted Cash and Investments

The Company classifies all cash and cash equivalents that are not available for general use by the Company, either due to regulatory requirements or through restrictions in specific agreements, as restricted in the accompanying consolidated balance sheets. In connection with ICE Clear U.S.'s election to be subject to Subpart C of the Commodity Futures Trading Commission's ("CFTC") regulation (which accordingly, permits recognition as a Qualified Central Counter Party ("QCCP")), the Company contributed \$50 million to ICE Clear U.S.'s guaranty fund on January 1, 2014 (Note 9), with such amount being reflected as long-term restricted cash in the accompanying consolidated balance sheet as of September 30, 2014. The Company also had net increases in restricted cash and investments during the nine months ended September 30, 2014 due to increases in the regulatory capital of ICE Clear Europe and Liffe due to additional costs incurred at both of these companies due to growth of these businesses.

5. Goodwill and Other Intangible Assets

The following is a summary of the activity in the goodwill balance for the nine months ended September 30, 2014 (in millions):

Edgar Filing: Intercontinental Exchange, Inc. - Form 10-Q

Goodwill balance at December 31, 2013	\$9,501	
Acquisition	105	
Foreign currency translation	(66)
De-consolidation of Euronext and NYSE Technologies and reclassification of goodwill relating to discontinued operations (Note 13)	(1,008)
Other activity, net	(61)
Goodwill balance at September 30, 2014	\$8,471	

11

The following is a summary of the activity in the other intangible assets balance for the nine months ended September 30, 2014 (in millions):

Other intangible assets balance at December 31, 2013	\$9,404	
Acquisition	39	
Foreign currency translation	(152)
De-consolidation of Euronext and NYSE Technologies and reclassification of other intangible assets relating to discontinued operations (Note 13)	(1,472)
Other activity, net	55	
Amortization of other intangible assets	(120)
Other intangible assets balance at September 30, 2014	\$7,754	

The Company completed the SMX acquisition (Note 3) and purchased certain patent rights during the nine months ended September 30, 2014. The foreign currency translation adjustments in the tables above result from a portion of the Company's goodwill and other intangible assets related to the Company's United Kingdom, European, Singapore and Canadian subsidiaries, some of whose functional currencies are not the U.S. dollar. The other activity, net in the tables above results from adjustments to the fair value of the net tangible and identifiable intangible assets and liabilities relating to the NYSE acquisition, with a corresponding adjustment to goodwill (Note 3). The Company did not recognize any impairment losses on goodwill or other intangible assets during the nine and three months ended September 30, 2014 and 2013.

6. Debt

The Company's total debt, including short-term and long-term debt, consisted of the following as of September 30, 2014 and December 31, 2013 (in millions):

	As of September 30, 2014	As of December 31, 2013
Debt:		
Commercial Paper	\$690	\$1,080
NYSE EUR Notes (5.375% senior unsecured notes due June 30, 2015)	1,199	—
2011 Credit Facilities - Term Loan Facility	—	55
Short-term debt	1,889	1,135
2018 Senior Notes (2.5% senior unsecured notes due October 15, 2018)	600	599
2023 Senior Notes (4.0% senior unsecured notes due October 15, 2023)	794	794
NYSE EUR Notes (5.375% senior unsecured notes due June 30, 2015)	—	1,353
NYSE USD Notes (2.0% senior unsecured notes due October 5, 2017)	853	854
2011 Credit Facilities - Term Loan Facility	—	323
Long term debt	2,247	3,923
Total debt	\$4,136	\$5,058
2014 Credit Facility		

On April 3, 2014, the Company, as parent borrower, and its subsidiary ICE Europe Parent Limited, as subsidiary borrower, entered into a \$3.0 billion senior unsecured revolving credit facility (the "2014 Credit Facility") pursuant to a credit agreement dated as of April 3, 2014 with Wells Fargo Bank, National Association ("Wells Fargo"), as administrative agent, issuing lender and swing line lender, Bank of America, N.A., as syndication agent, and the lenders party thereto. The 2014 Credit Facility includes an option for the Company to propose an increase in the aggregate amount by up to \$1.0 billion, subject to the consent of the lenders funding the increase and certain other conditions.

The 2014 Credit Facility matures on April 3, 2019. Amounts borrowed under the 2014 Credit Facility may be prepaid at any time without premium or penalty. The 2014 Credit Facility provides for a \$3.0 billion multi-currency revolving facility, with sub-limits for non-dollar borrowings, swing line borrowings and letters of credit. No amounts were outstanding under the 2014 Credit Facility as of September 30, 2014. Of the \$3.0 billion that is available for

borrowing under the 2014 Credit Facility, \$690 million is required to back-stop the amount outstanding under the Company's commercial paper program as of September 30, 2014 and \$303 million is reserved for the Company's clearing houses, both as discussed below. The amount required to back stop the commercial paper program will fluctuate as the Company increases or decreases its commercial paper borrowings. The remaining \$2.0 billion as of September 30, 2014 is available to the Company to use for working capital and general corporate purposes, and any portion of the revolving credit

facility no longer necessary in the future to be reserved for the foregoing purposes will be available to the Company to use for working capital and general corporate purposes.

Borrowings under the 2014 Credit Facility will bear interest on the principal amount outstanding at either (a) LIBOR plus an applicable margin rate or (b) a “base rate” plus an applicable margin rate; provided, however, that all loans denominated in a foreign currency will bear interest at LIBOR plus an applicable margin rate. The “base rate” equals the higher of (i) Wells Fargo’s prime rate, (ii) the federal funds rate plus 0.50%, or (iii) the one month LIBOR rate plus 1.00%. The applicable margin rate is based upon the Company’s public long term debt ratings and ranges from 0.875% to 1.5% on LIBOR borrowings and from 0.00% to 0.50% on base rate borrowings.

The 2014 Credit Facility includes an unutilized revolving credit commitment fee that is equal to the unused maximum revolver amount, multiplied by an applicable commitment fee rate and is payable in arrears on a quarterly basis. The applicable commitment fee rate ranges from 0.080% to 0.200% and is determined based on the Company’s long term debt rating. As of September 30, 2014, the applicable commitment fee rate was 0.125% based on the Company’s current long term debt ratings.

Of the amounts available under the 2014 Credit Facility: (i) \$150 million of such amounts has been reserved to provide liquidity or required financial resources for the clearing operations of ICE Clear Europe, (ii) \$100 million of such amounts has been reserved to provide liquidity or required financial resources for the clearing operations of ICE Clear Credit, (iii) \$50 million of such amounts has been reserved to provide liquidity or required financial resources for the clearing operations of ICE Clear U.S., and (iv) \$3 million of such amounts has been reserved to provide liquidity or required financial resources for the clearing operations of ICE Clear Canada. From time to time, the Company may agree to provide additional liquidity to its subsidiaries to meet regulatory capital requirements, general corporate purposes or short term liquidity needs.

The 2014 Credit Facility contains customary representations and warranties, covenants and events of default, including a leverage ratio, as well as limitations on liens on the Company’s assets, indebtedness of non-obligor subsidiaries, the sale of all or substantially all of the Company’s assets, and other matters.

Revolving Facility and Term Loan Facility (2011 Credit Facilities)

In November 2011, the Company entered into senior unsecured credit facilities in the aggregate amount of \$2.6 billion (the “2011 Credit Facilities”). The 2011 Credit Facilities consisted of (i) an aggregate \$500 million five-year senior unsecured term loan facility (the “Term Loan Facility”) and (ii) an aggregate \$2.1 billion five-year senior unsecured multicurrency revolving credit facility (the “Revolving Facility”). In connection with the Company entering into the 2014 Credit Facility on April 3, 2014, the 2011 Credit Facilities were terminated and the \$367 million outstanding under the Term Loan Facility (which had a stated interest rate of 2.0275%) was repaid through the issuance of new commercial paper, as discussed below. No amounts were outstanding under the Revolving Facility when it was terminated on April 3, 2014.

364 Day Facility

In July 2013, the Company entered into a \$600 million 364 day senior unsecured revolving credit facility (the “364 Day Facility”). The 364 Day Facility was available for working capital and general corporate purposes. In connection with the Company entering into the 2014 Credit Facility, the 364 Day Facility was terminated on April 3, 2014, at which time no amounts were outstanding under the 364 Day Facility.

Commercial Paper Program

In December 2013, the Company entered into a U.S. dollar commercial paper program (the “Commercial Paper Program”). The Commercial Paper Program is currently backed by the borrowing capacity available under the 2014 Credit Facility, equal to the amount of the commercial paper that is issued and outstanding at any given point in time. The effective interest rate of commercial paper issuances does not materially differ from short term interest rates (such as USD LIBOR). The fluctuation of these rates due to market conditions may therefore impact the interest expense incurred by the Company.

Commercial paper notes of \$690 million with original maturities ranging from 1 to 59 days were outstanding as of September 30, 2014 under the Commercial Paper Program. As of September 30, 2014, the weighted average interest rate on the \$690 million outstanding under the Commercial Paper Program was 0.29% per annum, with a weighted average maturity of 19 days.

The Company used net proceeds from \$367 million in commercial paper issued under the Commercial Paper Program on April 1, 2014 to repay the \$367 million that was outstanding under the Term Loan Facility upon termination of the Term Loan Facility as discussed above. The Company also issued commercial paper during the three months ended September 30, 2014 and used the proceeds to repurchase its common stock (Note 7). The Company repaid a portion of the amounts outstanding under the Commercial Paper Program during the nine months ended September 30, 2014 using a combination of the cash proceeds received from the Euronext IPO (Note 13) and cash flows from operations. Subsequent to September 30, 2014, the Company used the net proceeds from

\$350 million in commercial paper issued under the Commercial Paper Program on October 1, 2014 to fund the acquisition of SuperDerivatives, which closed on October 7, 2014 (Note 3).

Senior Notes and NYSE Notes

In October 2013, the Company issued \$600 million aggregate principal amount of 2.50% senior unsecured fixed rate notes due October 2018 (the "2018 Senior Notes") and \$800 million aggregate principal amount of 4.00% senior unsecured fixed rate notes due October 2023 (the "2023 Senior Notes", together with the 2018 Senior Notes, the "Senior Notes"). In connection with the acquisition of NYSE, one of the Company's subsidiaries assumed the outstanding NYSE debt instruments, which included \$850 million of 2.0% senior unsecured fixed rate notes due in October 2017 (the "NYSE USD Notes") and €920 million (\$1.2 billion) of 5.375% senior unsecured fixed rate notes due in June 2015 (the "NYSE EUR Notes", and together with the NYSE USD Notes, the "NYSE Notes").

Upon closing of the Euronext IPO, the Company received €1.4 billion (\$1.9 billion) in net cash proceeds. The Company elected to set aside sufficient euro-denominated cash from the proceeds to effectively pre-fund the maturity of the NYSE EUR Notes and the related final interest coupon payment, both due on June 30, 2015. In connection with this, in July 2014, the Company placed €969 million (\$1.2 billion) of the cash proceeds from the Euronext IPO in term deposits at various banks with a maturity date of June 25, 2015 to cover the €920 million (\$1.2 billion) principal and the €49 million (\$62 million) final interest coupon payment due on June 30, 2015. These deposits are classified as short-term investments in the accompanying consolidated balance sheet as of September 30, 2014. The balance of the cash proceeds received in connection with the Euronext IPO were converted to U.S. dollars and used to repay outstanding commercial paper as discussed above.

7. Equity

The Company currently sponsors employee and director stock option and restricted stock plans. Stock options and restricted stock are granted at the discretion of the compensation committee of the board of directors. All stock options and restricted stock awards are granted at an exercise price equal to the fair value of the common stock on the date of grant. The grant date fair value is based on the closing stock price on the date of grant. The fair value of the stock options and restricted stock on the date of grant is recognized as expense over the vesting period, net of estimated forfeitures. The non-cash compensation expenses recognized in the Company's consolidated statements of income for stock options and restricted stock were \$59 million and \$42 million for the nine months ended September 30, 2014 and 2013, respectively, and were \$22 million and \$12 million for the three months ended September 30, 2014 and 2013, respectively.

Stock Option Plans

The following is a summary of stock options for the nine months ended September 30, 2014:

	Number of Options	Weighted Average Exercise Price per Option
Outstanding at December 31, 2013	872,347	\$ 97.92
Granted	154,202	206.87
Exercised	(227,703)	45.38
Outstanding at September 30, 2014	798,846	134.54

Details of stock options outstanding as of September 30, 2014 are as follows:

	Number of Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (Years)	Aggregate Intrinsic Value (In millions)
Vested or expected to vest	798,846	\$ 134.54	6.2	\$50
Exercisable	571,248	\$ 115.99	5.2	\$45

The total intrinsic value of stock options exercised during the nine months ended September 30, 2014 and 2013 were \$35 million and \$17 million, respectively, and were \$12 million and \$3 million during the three months ended September 30, 2014 and 2013, respectively. As of September 30, 2014, there were \$8 million in total unrecognized

compensation costs related to stock options. These costs are expected to be recognized over a weighted average period of 1.9 years as the stock options vest.

The Company uses the Black-Scholes option pricing model for purposes of valuing stock option awards. During the nine months ended September 30, 2014 and 2013, the Company used the weighted-average assumptions in the table below to compute the value of all options for shares of common stock granted to employees:

14

Assumptions	Nine Months Ended September 30,			
	2014		2013	
Risk-free interest rate	1.23	%	0.53	%
Expected life in years	5.0		4.0	
Expected volatility	27	%	37	%
Expected dividend yield	1.26	%	0	%
Estimated weighted-average fair value of options granted per share	\$45.23		\$38.41	

The risk-free interest rate is based on the zero-coupon U.S. Treasury yield curve in effect at the time of grant. The expected life computation is derived from historical exercise patterns and anticipated future patterns. Expected volatilities are based on historical volatility of the Company's stock. Expected dividend yields were 0% prior to the November 13, 2013 acquisition of NYSE since the Company did not pay (and had not contemplated paying) a dividend prior to the acquisition of NYSE. The Company's new dividend policy will impact the expected dividend yield on all stock options granted post-acquisition.

Restricted Stock Plans

In February 2014, the Company reserved a maximum of 351,310 restricted shares for potential issuance as performance-based restricted shares to certain Company employees. The number of shares that will ultimately be granted under the performance awards will be based on the Company's actual financial performance as compared to financial performance targets set by the Company's board of directors and compensation committee for the year ending December 31, 2014. These restricted shares are also subject to a market condition that could reduce the number of shares that are ultimately granted. The reduction would occur if the Company's 2014 total shareholder return falls below the 2014 return of the S&P 500 Index and the Company achieves an above "target" financial performance level threshold. If the Company's 2014 total shareholder return were to fall below the 2014 return of the S&P 500 Index, the reduction would be either 10% or 20% of the number of shares granted, depending on the difference in the aforementioned returns (the "market condition").

The grant date of this award was February 27, 2014, which was the date when the Company and the employees reached a mutual understanding of award terms. February 27, 2014 is also the service inception date as that is the date when the requisite service period began. The maximum compensation expense to be recognized under these performance-based restricted shares is \$71 million if the maximum financial performance target is met and all 351,310 shares vest. The compensation expense to be recognized under these performance-based restricted shares will be \$35 million if the target financial performance is met, which would result in 175,655 shares vesting. The Company will recognize expense on an accelerated basis over the three-year vesting period based on the Company's quarterly assessment of the probable 2014 actual financial performance as compared to the 2014 financial performance targets. If the market condition is not achieved, compensation cost will not be affected since the grant date fair value of the award gave consideration to the probability of market condition achievement.

As of September 30, 2014, the Company determined that it is probable that the financial performance level will be below target for 2014. Based on this assessment, the Company recorded non-cash compensation expense of \$11 million and \$4 million for the nine and three months ended September 30, 2014, respectively, related to these shares and the remaining \$18 million in non-cash compensation expense will be recorded on an accelerated basis over the remaining vesting period, including \$4 million of which will be recorded during the three months ended December 31, 2014.

The following is a summary of the non-vested restricted shares for the nine months ended September 30, 2014:

	Number of Restricted Stock Shares	Weighted Average Grant-Date Fair Value per Share
Non-vested at December 31, 2013	1,234,552	\$ 147.00
Granted	690,736	204.51
Vested	(544,769)	136.98
Forfeited	(44,631)	152.39
Non-vested at September 30, 2014	1,335,888	180.64

Restricted stock shares granted in the table above include both time-based and performance-based grants. Performance-based shares have been adjusted to reflect the actual shares to be issued based on the achievement of past performance targets. Non-vested performance-based restricted shares granted are presented in the table above at the maximum number of restricted shares that would vest if the maximum performance targets are met. As of September 30, 2014, there were \$109 million in total unrecognized compensation costs related to the time-based restricted stock and the performance-based restricted stock. These costs are expected to be recognized over a weighted-average period of 2.1 years as the restricted stock vests. These unrecognized compensation costs assume that a below target performance level will be met on the performance-based restricted shares granted in February 2014, as

discussed above. During the nine months ended September 30, 2014 and 2013, the total fair value of restricted stock vested under all restricted stock plans was \$114 million and \$60 million, respectively.

Stock Repurchase Program

In March 2014, the Company entered into a trading plan under Rule 10b5-1 of the Securities Exchange Act of 1934 permitting open market repurchases of the Company's common stock. The trading plan contemplated purchases of stock based on certain triggers described in the trading plan. During the nine and three months ended September 30, 2014, the Company repurchased 2.3 million shares of its common stock in an open trading window or under the Rule 10b5-1 trading plan at an aggregate cost of \$448 million, which was paid for through cash on hand and the issuance of commercial paper. In September 2014, the Company entered into a new Rule 10b5-1 trading plan. As of September 30, 2014, the Company has board approval for another \$601 million for stock repurchases under the Company's stock repurchase programs, with no fixed expiration dates. The Company repurchased 319,500 shares of its common stock on the open market through the Company's Rule 10b5-1 trading plan at an aggregate cost of \$64 million during the month of October 2014, through cash on hand. The shares repurchased are held as treasury stock. The Company expects to fund any remaining share repurchases with a combination of cash on hand, future cash flows and by borrowing under the Company's credit facilities and the Commercial Paper Program. The timing and extent of any future repurchases that are not pursuant to the Rule 10b5-1 trading plan adopted in September 2014 are at the discretion of the Company's management and will depend upon market conditions, amount authorized by the Company's board of directors, the Company's stock price, the Company's target debt ratio and corporate debt rating, and the Company's strategic growth initiatives at that time. The Company may discontinue the stock repurchases at any time or may enter into a new Rule 10b5-1 trading plan in the future. In addition, the Company's board of directors may increase or decrease the amount of capacity the Company has for repurchases from time to time.

8. Income Taxes from Continuing Operations

The Company's effective tax rate from continuing operations was 29% and 27% for the nine months ended September 30, 2014 and 2013, respectively, and 29% and 25% for the three months ended September 30, 2014 and 2013, respectively. The effective tax rates for the nine and three months ended September 30, 2014 and 2013 are lower than the federal statutory rate primarily due to favorable foreign tax rate differentials, partially offset by state income taxes. Favorable foreign income tax rate differentials result primarily from lower tax rates in the United Kingdom, the Netherlands and various other lower tax jurisdictions. The effective tax rates for the nine and three months ended September 30, 2014 are higher than the effective tax rates for the comparable periods in 2013 primarily due to lower foreign income mix and lack of research and development tax credits in the current year periods and favorable income tax rate reductions in the United Kingdom in the prior year periods. The Company's unrecognized tax benefit at September 30, 2014 no longer includes \$104 million in unrecognized tax benefits disposed of in connection with the sales of Euronext, NYFIX, Metabit and Wombat (Note 13).

The Company's non-U.S. subsidiaries had \$2.1 billion in cumulative undistributed earnings as of September 30, 2014. This amount represents the post-income tax earnings under U.S. GAAP adjusted for previously taxed income. The earnings from the Company's non-U.S. subsidiaries are considered to be indefinitely reinvested. Accordingly, no provision for U.S. federal and state income taxes has been made in the accompanying consolidated financial statements. Further, a determination of the unrecognized deferred tax liability is not practicable. Any future distribution by way of dividend of these non-U.S. earnings may subject the Company to both U.S. federal and state income taxes, as adjusted for non-U.S. tax credits, and withholding taxes payable to various non-U.S. countries.

9. Clearing Organizations

The Company currently operates five regulated central counterparty clearing houses for the settlement and clearance of derivative contracts. The five central counterparty clearing houses include ICE Clear Europe, ICE Clear U.S., ICE Clear Canada, ICE Clear Credit and The Clearing Corporation ("TCC"), and are referred to herein collectively as the "ICE Clearing Houses". ICE Clear Singapore is not yet operational due to the transition to ICE technology that is underway, as discussed in Note 3.

Each of the ICE Clearing Houses requires all clearing members to maintain cash on deposit or pledge certain assets, which may include government obligations, letters of credit, gold or emission allowances to guarantee performance on

the clearing members' open positions. Such amounts in total are known as "original margin." The ICE Clearing Houses may make intraday original margin calls in circumstances where market conditions require additional protection. The daily profits and losses from and to the ICE Clearing Houses in respect of marking to market open contracts is known as "variation margin". The ICE Clearing Houses mark all outstanding contracts to market, and therefore pay and collect variation margin, at least once daily, and in some cases multiple times throughout the day. Marking-to-market allows the ICE Clearing Houses to identify any clearing members that may be unable to satisfy the financial obligations resulting from changes in the prices of their open contracts before those financial obligations become exceptionally large and jeopardize the ability of the ICE Clearing Houses to ensure financial performance of clearing members' open positions.

Each of the ICE Clearing Houses requires that each clearing member make deposits into a fund known as a guaranty fund (“Guaranty Fund”), which is maintained by the relevant ICE Clearing House. These amounts serve to secure the obligations of a clearing member to the ICE Clearing House to which it has made the Guaranty Fund deposit and may be used to cover losses sustained by the respective ICE Clearing House in the event of a default of a clearing member. Each of the ICE Clearing Houses has equal and offsetting claims to and from their respective clearing members on opposite sides of each cleared contract. This arrangement allows the ICE Clearing Houses to serve as the central financial counterparty on every cleared contract. Each ICE Clearing House bears financial counterparty credit risk in the event that market movements create conditions that lead to its clearing members failing to meet their financial obligations to that ICE Clearing House. Accordingly, the ICE Clearing Houses account for this central counterparty guarantee as a performance guarantee. Given that each contract is margined and marked or settled on at least a daily basis for each clearing member, the ICE Clearing Houses’ maximum estimated exposure for this guarantee, excluding the effects of original and variation margin requirements and mandatory deposits to the applicable Guaranty Fund by clearing members, is \$61.7 billion as of September 30, 2014, which represents the maximum estimated value by the ICE Clearing Houses of a hypothetical one day movement in pricing of the underlying unsettled contracts. This amount is based on calculations determined using proprietary risk management software that simulates gains and losses based on historical market prices, volatility and other factors present at that point in time for those particular unsettled contracts. Future actual market price volatility could result in the exposure being significantly different than the amount estimated by the ICE Clearing Houses. The net notional value of unsettled contracts was \$2.7 trillion as of September 30, 2014. The Company performed calculations to determine the fair value of its counterparty performance guarantee taking into consideration factors such as daily settlement of contracts, margining requirements, other elements of the Company’s risk management program, historical evidence of default payments, and estimated probability of potential default payouts by the ICE Clearing Houses. Based on these analyses, the estimated counterparty performance guaranty liability was determined to be nominal and no liability was recorded as of September 30, 2014 and December 31, 2013.

The ICE Clearing Houses seek to reduce their exposure through a risk management program that includes initial and ongoing financial standards for clearing member admission and continued membership, original and variation margin requirements, and mandatory deposits to the Guaranty Fund. The amounts that the clearing members are required to maintain in the original margin and Guaranty Fund accounts are determined by standardized parameters established by the margin or risk committees, risk management departments and the boards of directors of each of the ICE Clearing Houses and may fluctuate over time. As of September 30, 2014 and December 31, 2013, the ICE Clearing Houses have received or have been pledged \$73.8 billion and \$68.2 billion, respectively, in cash and non-cash collateral in original margin and Guaranty Fund deposits to cover price movements of underlying contracts. The ICE Clearing Houses also have powers of assessment that provide the ability to collect additional funds from their clearing members to cover a defaulting member’s remaining obligations up to the limits established under the respective rules of each ICE Clearing House.

Should a particular clearing member fail to deposit original margin, or to make a variation margin payment, when and as required, the relevant ICE Clearing House may liquidate or hedge the clearing member’s open positions and use the clearing member’s margin and Guaranty Fund deposits to make up the amount owed. In the event that those deposits are not sufficient to pay the amount owed in full, the ICE Clearing Houses may utilize the respective Guaranty Fund deposits of their respective clearing members on a pro-rata basis for that purpose. The Company has contributed \$128 million, \$50 million and \$50 million to the ICE Clear Europe, ICE Clear Credit and ICE Clear U.S. Guaranty Funds, respectively, as of September 30, 2014, and such amounts are at risk and could be used in the event of a clearing member default where the amount of the defaulting clearing member’s original margin and Guaranty Fund deposits are insufficient. The \$228 million combined contributions as of September 30, 2014 are included in long-term restricted cash in the accompanying consolidated balance sheet and includes \$50 million contributed to ICE Clear U.S. on January 1, 2014 (Note 4).

As of September 30, 2014, original margin and Guaranty Fund cash deposits are as follows for the ICE Clearing Houses (in millions):

ICE Clear U.S.	ICE Clear Europe	ICE Clear Canada	ICE Clear Credit	TCC	Total
-------------------	---------------------	---------------------	---------------------	-----	-------

Edgar Filing: Intercontinental Exchange, Inc. - Form 10-Q

Original margin	\$3,877	\$22,067	\$59	\$14,884	\$—	\$40,887
Guaranty Fund	289	3,189	11	2,149	2	5,640
Total	\$4,166	\$25,256	\$70	\$17,033	\$2	\$46,527

As of December 31, 2013, original margin and Guaranty Fund cash deposits are as follows for the ICE Clearing Houses (in millions):

17

Edgar Filing: Intercontinental Exchange, Inc. - Form 10-Q

	ICE Clear U.S.	ICE Clear Europe	ICE Clear Canada	ICE Clear Credit	TCC	Total
Original margin	\$1,642	\$22,007	\$61	\$13,274	\$—	\$36,984
Guaranty Fund	242	2,542	11	2,434	3	5,232
Total	\$1,884	\$24,549	\$72	\$15,708	\$3	\$42,216

The Company has recorded these cash deposits in the accompanying consolidated balance sheets as current assets with corresponding current liabilities to the clearing members of the relevant ICE Clearing House. All cash, securities and letters of credit are available only to meet the financial obligations of that clearing member to the relevant ICE Clearing House. ICE Clear U.S., ICE Clear Europe, ICE Clear Canada, ICE Clear Credit and TCC are separate legal entities and are not subject to the liabilities of the other ICE Clearing Houses or the obligations of the members of the other ICE Clearing Houses. The amount of these cash deposits may fluctuate due to the types of margin collateral choices available to clearing members and the change in the amount of deposits required. As a result, these assets and corresponding liabilities may vary significantly over time.

Of the \$17.0 billion of ICE Clear Credit cash deposits as of September 30, 2014, \$12.9 billion represent funds invested under reverse repurchase agreements with several counterparty banks, which are all large commercial financial institutions. Under these arrangements, ICE Clear Credit purchases U.S. Treasury securities and other U.S. securities and the various counterparties agree to repurchase the instruments the following business day at a set price, plus interest. The remaining \$4.1 billion in ICE Clear Credit cash deposits represent primarily euro cash in demand deposit accounts at large, highly rated financial institutions.

Of the \$25.3 billion of ICE Clear Europe cash deposits as of September 30, 2014, \$20.7 billion represent funds invested under reverse repurchase agreements through two third party investment and custody agents, with several different counterparty banks, some of which are also our clearing members and are large commercial financial institutions, and \$4.1 billion represent funds invested directly in sovereign debt. Under these arrangements, ICE Clear Europe primarily purchases U.S. Treasury securities and certain sovereign debt obligations from the seven largest industrialized nations, and the various counterparties agree to repurchase the instruments on the set repurchase date at the set repurchase price, plus interest. The carrying value of these securities approximates their fair value due to the short-term nature of the instruments and repurchase agreements. The remaining cash deposits at the ICE Clearing Houses are held in demand deposit accounts at large, highly rated financial institutions and directly in U.S. Treasury securities with original maturities of less than 12 months.

In addition to the cash deposits for original margin and the Guaranty Fund, the ICE Clearing Houses have also received other assets from clearing members, which may include government obligations, letters of credit, gold or emission allowances to mitigate its credit risk. These assets are not reflected in the accompanying consolidated balance sheets as the risks and rewards of these assets remain with the clearing members. These assets are held in safekeeping and any interest and gain or loss accrues to the clearing member. For certain non-cash deposits, the ICE Clearing Houses may impose discount or "haircut" rates to ensure adequate collateral levels to account for fluctuations in the market value of these deposits. As of September 30, 2014 and December 31, 2013, the assets pledged by the clearing members as original margin and Guaranty Fund deposits for each of the ICE Clearing Houses are detailed below (in millions):

	As of September 30, 2014					As of December 31, 2013				
	ICE Clear U.S.	ICE Clear Europe	ICE Clear Canada	ICE Clear Credit	TCC	ICE Clear U.S.	ICE Clear Europe	ICE Clear Canada	ICE Clear Credit	TCC
Original margin:										
Government securities at face value	\$7,175	\$17,047	\$ 124	\$2,004	\$—	\$5,011	\$15,670	\$ 93	\$2,620	\$—
Letters of credit	—	—	4	—	—	—	1,386	4	—	—
Gold	—	92	—	—	—	—	92	—	—	—
Total	\$7,175	\$17,139	\$ 128	\$2,004	\$—	\$5,011	\$17,148	\$ 97	\$2,620	\$—
Guaranty Fund:										

Government securities at face value	\$ 186	\$ 348	\$ 14	\$ 325	\$ 1	\$ 267	\$ 268	\$ 19	\$ 516	\$ 1
-------------------------------------	--------	--------	-------	--------	------	--------	--------	-------	--------	------

10. Commitments and Contingencies

Legal Proceedings

The Company is subject to legal proceedings and claims, like the ones described below, that arise in the ordinary course of business. Typically, the Company does not believe that the resolution of these ordinary course matters, including those described below, will have a material adverse effect on the Company's consolidated financial condition, results of operations, or liquidity. It is possible, however, that future results of operations for any particular quarterly or annual period could be materially and adversely affected by any developments relating to the legal proceedings and claims.

In April 2014, the first of four purported class action lawsuits was filed in the U.S. District Court for the Southern District of New York (the "Southern District") by the City of Providence, Rhode Island, against more than 40 defendants, including "Exchange Defendants", "Brokerage Defendants" and "HFT (High Frequency Trading) Defendants" (the "City of Providence lawsuit"). New York Stock Exchange LLC and NYSE Arca, Inc., two of the Company's subsidiaries, were among the named Exchange Defendants. On July 2, 2014, the court ordered the cases consolidated for all purposes, and appointed lead plaintiffs. On September 3, 2014, the lead plaintiffs filed an amended complaint asserting claims against only a subset of the original Exchange Defendants, including New York Stock Exchange LLC and NYSE Arca, Inc., and also asserting claims against Barclays PLC ("Barclays"), a subsidiary of which operates an alternative trading system known as Barclays LX. The lead plaintiffs are suing on behalf of a class of "all public investors" who bought or sold stock from April 18, 2009 to the present on the U.S.-based equity exchanges operated by the remaining Exchange Defendants or on Barclays LX. The amended complaint asserts violations by all remaining Exchange Defendants of Sections 10(b) and 6(b) of the Securities Exchange Act of 1934, and seeks unspecified compensatory damages against all defendants, jointly and severally, as well as various forms of equitable relief. The defendants filed a motion on November 3, 2014 to dismiss the amended complaint.

On October 2, 2014, Barclays filed a motion before the United States Judicial Panel on Multidistrict Litigation requesting that a separate lawsuit filed against Barclays in the U.S. District Court for the Central District of California be transferred to the Southern District judge handling the City of Providence lawsuit for consolidated or coordinated pre-trial proceedings. The transfer motion and the motion to dismiss remain pending and depending on the Panel's ruling on the transfer motion, the scope of this litigation could be expanded.

In May 2014, three purported class action lawsuits were filed in the Southern District by Harold Lanier against the securities exchanges that are participants in each of the three national market system data distribution plans - the Consolidated Tape Association/Consolidated Quotation Plan, the Nasdaq UTP Plan, and the Options Price Reporting Authority (the "Plans") - which are established under the Securities Exchange Act of 1934 and regulated by the SEC. On August 15, 2014, Lanier filed amended complaints in each of the three lawsuits but did not alter the named defendants. New York Stock Exchange LLC, NYSE Arca, Inc. and NYSE MKT LLC, which are subsidiaries of the Company, are among the defendants named in one or more of the suits. Lanier is claiming to sue on behalf of himself and all other similarly situated subscribers to the market data disseminated by the Plans. Lanier's allegations include that the exchange participants in the Plans breached agreements with subscribers by disseminating market data in a discriminatory manner in that other "preferred" customers allegedly received their data faster than the proposed class. The complaints seek, among other relief, unspecified compensatory damages, restitution of the putative class's subscription fees paid to the defendants, disgorgement of the fees paid by the so-called preferred customers, and injunctive and declaratory relief. On September 29, 2014, the defendants moved to dismiss the amended complaint, and the motion remains pending. A range of possible loss related to the cases above cannot be reasonably estimated at this time.

One of the Company's subsidiaries, NYSE Brazil Holdings, B.V. ("NYSE BV"), is a party to a pending arbitration proceeding initiated by an arbitration demand dated June 4, 2014 in Brazil, filed by ATG Americas Trading Group, S.A. ("ATG") and ATS Brasil S.A. ("ATS"). NYSE BV and ATG own 20% and 80%, respectively, of the equity in ATS, a company with a prospective cash equity trading platform in Brazil, which is not yet operational. ATG and ATS allege NYSE BV breached certain obligations and assert damages of at least 100 million Brazilian Reals (\$41 million based on the Brazilian Real/U.S. dollar exchange rate of 0.4100 as of September 30, 2014). NYSE BV has served ATG and ATS with a responsive statement which denies liability in connection with the claims, and the Company is defending the proceeding.

Tax Audits

The Company is engaged in ongoing discussions and audits with taxing authorities on various tax matters, the resolutions of which are uncertain. Currently, there are matters that may lead to assessments involving the Company or one of its subsidiaries, some of which may not be resolved for several years. Based on currently available information, the Company believes it has adequately provided for any assessments that could result from those proceedings where it is more likely than not that the Company will be assessed. The Company continuously reviews its positions as these matters progress.

Redeemable Non-controlling Interest

Prior to the Company's acquisition of NYSE, NYSE completed the sale of a significant equity interest in NYSE Amex Options, one of its two U.S. options exchanges, to seven external investors. Under the terms of the sale, the external investors have the option to require the Company to repurchase a portion of its equity interest on an annual basis over the course of five years, which began in 2011. Since the likelihood of the Company acquiring the non-controlling interest in the future is probable, the full redemption fair value has been recorded as mezzanine equity and the related balance as "redeemable non-controlling interest" in the accompanying consolidated balance sheet.

In July 2014, the Company repurchased half of the 32% interest held by the seven external investors in NYSE Amex Options for \$129 million in cash. After the repurchase, the Company owns 84% of NYSE Amex Options and the remaining 16% of the

outstanding shares of NYSE Amex Options, currently valued at \$126 million, can be put back to the Company by the external investors in 2015 and these shares are recorded as redeemable non-controlling interest as of September 30, 2014.

11. Pension and Other Benefit Programs

In connection with the Company's acquisition of NYSE on November 13, 2013 (Note 3), the Company assumed NYSE's pension plans covering its U.S. and certain European operations, as well as other benefit plans. Following the Euronext IPO in June 2014, there are no longer any NYSE European operations covered by the pension or benefit plans (Note 13). The following table provides the components of net periodic expense (benefit) associated with the pension plans, the supplemental executive retirement ("SERP") plans and the post-retirement benefit plans for the nine and three months ended September 30, 2014 in the accompanying consolidated statements of income (in millions):

	Nine Months Ended September 30, 2014			Three Months Ended September 30, 2014		
	Pension Plans	SERP Plans	Post-retirement Benefit Plans	Pension Plans	SERP Plans	Post-retirement Benefit Plans
Service costs	\$—	\$—	\$ —	\$—	\$—	\$ —
Interest costs	27	3	6	9	1	2
Estimated return on plan assets	(36)	—	—	(12)	—	—
Net periodic expense (benefit)	\$(9)	\$3	\$ 6	\$(3)	\$1	\$ 2

During the nine and three months ended September 30, 2014, the Company contributed \$51 million and \$43 million, respectively, to its pensions plans. Based on current actuarial assumptions, the Company does not anticipate any additional funding to its pension plans during the fourth quarter of 2014. During the fourth quarter of 2014, lump sums will be offered to certain terminated vested participants as part of a de-risking strategy in the pension plans. Any settlement charge resulting from this program is expected to be recognized in the fourth quarter of 2014.

12. Fair Value Measurements

The Company's financial instruments consist primarily of cash and cash equivalents, short-term and long-term restricted cash and investments, short-term and long-term investments, customer accounts receivable, margin deposits and guaranty funds, cost and equity method investments, short-term and long-term debt and other short-term assets and liabilities. The fair value of the Company's financial instruments are measured based on a three-level hierarchy:

• Level 1 inputs — quoted prices for identical assets or liabilities in active markets.

• Level 2 inputs — observable inputs other than Level 1 inputs such as quoted prices for similar assets and liabilities in active markets or inputs other than quoted prices that are directly observable.

• Level 3 inputs — unobservable inputs supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

In general, the Company uses Level 1 inputs to determine fair value. The Level 1 assets consist of U.S. Treasury securities, equity and other securities listed in active markets, and investments in publicly traded mutual funds held for the purpose of providing future payments of the SERP plans and the supplemental executive savings plan. The fair value of each of these assets are based on quoted prices. If quoted prices are not available to determine fair value, the Company uses other inputs that are observable either directly or indirectly. Level 2 assets consist of foreign exchange derivative contracts not designated as hedging instruments. Such values are based on published currency rates. As of September 30, 2014, the fair values of the Company's \$1.40 billion Senior Notes and \$2.05 billion NYSE Notes are \$1.44 billion and \$2.07 billion, respectively. The fair values of these fixed rate notes were estimated using quoted market prices for these instruments. The fair value of the Company's other short-term and long-term debt approximates the carrying value since the rates of interest on the debt approximate market rates as of September 30, 2014. All other financial instruments are determined to approximate carrying value due to the short period of time to their maturities. Financial assets and liabilities recorded in the accompanying consolidated balance sheets as of September 30, 2014 and December 31, 2013 are classified in their entirety based on the lowest level of input that is significant to the asset or liability's fair value measurement. Financial instruments measured at fair value on a recurring basis as of September 30, 2014 and December 31, 2013 are as follows (in millions):

	As of September 30, 2014			As of December 31, 2013		
	Level 1	Level 2	Total	Level 1	Level 2	Total
Assets at fair value:						
Long-term investments in equity securities	\$496	\$—	\$496	\$324	\$—	\$324
U.S. Treasury securities	374	—	374	100	—	100
Mutual Funds	24	—	24	33	—	33
Foreign exchange derivative contracts	—	—	—	—	4	4
Total assets at fair value	\$894	\$—	\$894	\$457	\$4	\$461

The long-term investments in equity securities as of September 30, 2014 represents the Company's 12% investment in Cetip, S.A. ("Cetip") and the Company's 6% stake in Euronext (Note 13), recorded at their fair values using quoted market prices. The long-term investment in equity securities as of December 31, 2013 represents the Cetip investment only. The Company's investment in Cetip, which is recorded as an available-for-sale, long-term investment and was recorded in and is held in Brazilian reais, was valued at \$393 million as of September 30, 2014, including an unrealized gain of \$68 million. The Company's investment in Euronext which is recorded as an available-for-sale, long-term investment and was recorded in and is held in euros, was valued at \$103 million as of September 30, 2014, including an unrealized loss of \$11 million. Changes in the fair values of the Cetip and Euronext investments are reflected in accumulated other comprehensive income and do not impact earnings until realized, except to the extent that unrealized losses are deemed to be other than temporary.

The mutual funds represent equity and fixed income mutual funds held for the purpose of providing future payments to the supplemental executive retirement plan and supplemental executive savings plan. As of September 30, 2014, the Company was holding \$374 million in U.S. Treasury securities, all of which had maturities of less than one year from the date of purchase. Of these securities, \$159 million were recorded as cash and cash equivalents, \$87 million were recorded as short-term restricted cash and investments and \$128 million were recorded as long-term restricted cash and investments in the accompanying consolidated balance sheet as of September 30, 2014 (all of the U.S. Treasury securities recorded as cash have original maturities of less than 90 days). As of December 31, 2013, the Company was holding \$100 million in U.S. Treasury securities, all of which had maturities of less than one year from the date of purchase. Of these securities, \$37 million were recorded as short-term investments and \$63 million were recorded as short-term restricted cash and investments in the accompanying consolidated balance sheet as of December 31, 2013. The Company accounted for the U.S. Treasury securities using the available-for-sale method.

The Company did not use Level 3 inputs to determine the fair value of assets or liabilities measured at fair value on a recurring basis as of September 30, 2014 or December 31, 2013. The Company measures certain assets, such as intangible assets and cost and equity method investments, at fair value on a non-recurring basis. These assets are recognized at fair value if they are deemed to be impaired. As of September 30, 2014 and December 31, 2013, none of these assets were required to be recorded at fair value since no impairment indicators were present. Cost and equity method investments were \$24 million and \$177 million as of September 30, 2014 and December 31, 2013, respectively. The decrease in the cost and equity investments relate to investments in LCH.Clearnet and Euroclear owned by Euronext that were de-recognized as part of the de-consolidation of Euronext (Note 13).

13. Discontinued Operations

On June 24, 2014, the Company sold an aggregate 65.8 million shares of common stock of Euronext, representing 94% of all outstanding shares, in three transactions (Note 1). These transactions generated an aggregate €1.4 billion (\$1.9 billion) of net cash proceeds for the Company. The net cash proceeds received includes cash of \$220 million distributed from Euronext as part of the separation of Euronext from the Company. Due to the sale of a controlling interest in Euronext, the Company de-consolidated the assets and liabilities of Euronext as of the IPO date. As of September 30, 2014, the Company owns 4.2 million shares of Euronext common stock, representing 6% of all outstanding shares, which are subject to a 180-day lockup period from the IPO date that prohibits the sale of these shares without the prior written consent of a majority of the joint global coordinators that underwrote the IPO.

On June 18, 2014, the Company signed a definitive agreement with SR Labs for the sale of Wombat, a unit of NYSE Technologies, and the transaction closed on July 23, 2014. On June 23, 2014, the Company signed a definitive agreement with ULLINK for the combined sale of NYFIX and Metabit, the remaining businesses of NYSE

Technologies, and the transaction closed on September 19, 2014. These agreements complete the Company's previously announced intention to divest non-core NYSE Technologies assets.

The Company has reflected the results of Euronext, NYFIX, Metabit and Wombat as discontinued operations in the accompanying consolidated statements of income for the nine months and three months ended September 30, 2014 and the accompanying consolidated statement of cash flows for the nine months ended September 30, 2014. No comparable data for the prior year periods is presented as the Company did not complete the acquisition of NYSE until November 2013.

The results below include external advisory costs and professional services costs related to the Euronext IPO and sales of NYFIX, Metabit and Wombat of \$51 million and \$2 million for the nine and three months ended September 30, 2014, respectively, which have been included with acquisition-related transaction and integration costs below from discontinued operations. The results below include deal-related compensation and severance costs related to the Euronext IPO and sales of NYFIX, Metabit and Wombat of \$42 million and \$5 million for the nine and three months ended September 30, 2014, respectively, which have been included with acquisition-related transaction and integration costs below from discontinued operations. None of the Company's interest expense has been allocated to the results of the discontinued operations.

The Company used the cash proceeds from the Euronext IPO to repay debt (Note 6). The Company expects to use the net cash proceeds from the sales of NYFIX, Metabit and Wombat to repay debt, invest in growth initiatives, pursue strategic investments and return capital to shareholders via dividends and share repurchases. Results of discontinued operations were as follows for the nine and three months ended September 30, 2014 (in millions):

	Nine Months Ended September 30, 2014	Three Months Ended September 30, 2014
Total revenues, less transaction-based expenses	\$347	\$18
Operating expenses:		
Compensation and benefits	105	5
Technology and communication	31	4
Professional services	31	1
Rent and occupancy	12	—
Acquisition-related transaction and integration costs	103	7
Selling, general, administrative	16	1
Depreciation and amortization	16	—
Total operating expenses	314	18
Operating income	33	—
Other income, net	5	—
Income tax expense	27	10
Income (loss) from discontinued operations, net of tax	\$11	\$(10)

The total assets and total liabilities of Euronext removed from the Company's consolidated balance sheet as of the June 24, 2014 de-consolidation were \$2.9 billion and \$1.1 billion, respectively, including \$2.3 billion in goodwill and other intangible assets. The \$1.8 billion in Euronext net assets removed in the de-consolidation is net of the 6% investment in Euronext held by the Company, valued at \$103 million in the accompanying consolidated balance sheet as of September 30, 2014 (Note 12). The total assets and total liabilities of Wombat, NYFIX and Metabit removed from the Company's consolidated balance sheet as of the July 23, 2014 and September 19, 2014 de-consolidations were \$199 million and \$31 million, respectively, including \$145 million in goodwill and other intangible assets. There was no gain or loss recognized on the Euronext IPO and related de-consolidation, or on the sale of the NYSE Technologies companies, as any differences in the carrying value of these net assets was adjusted in the NYSE purchase price allocation (Note 3). The results above are inclusive of \$6 million in net gains included in other income, net, which were reclassified from other comprehensive income for Euronext currency translation adjustments and the discontinuance of the Company's net investment hedge.

14. Condensed Consolidating Financial Statements

In connection with the Company's acquisition of NYSE on November 13, 2013 (Note 3), ICE, Intercontinental Exchange Holdings, Inc. and NYSE established various guarantees to protect against structural subordination of each entities' existing indebtedness. Each of Intercontinental Exchange Holdings, Inc. and NYSE are wholly-owned subsidiaries of ICE, and each fully and unconditionally guaranteed, on an unsecured and unsubordinated basis, the payment of principal, premium, if any, and interest of ICE's Senior Notes and, following its establishment, the Commercial Paper Program. Similarly, ICE and Intercontinental Exchange Holdings, Inc. each fully and

unconditionally guaranteed, on an unsecured and unsubordinated basis, the payment of principal, premium, if any, and interest of the NYSE Notes. Finally, ICE and NYSE each fully and unconditionally guaranteed, on an unsecured and unsubordinated basis, the payment of principal, premium, if any, and interest of the 2011 Credit Facilities and the 364 Day Facility. All of the guarantees are joint and several with all other guarantees and indebtedness. ICE's guarantees, as a standalone entity, will remain in place until each applicable debt obligation has been satisfied.

As discussed in Note 6, the Company entered into the 2014 Credit Facility and terminated the 2011 Credit Facilities and the 364 Day Facility on April 3, 2014. Upon the termination of the 2011 Credit Facilities and the 364 Day Facility, Intercontinental

Exchange Holdings, Inc.'s guarantees were no longer required and therefore Intercontinental Exchange Holdings, Inc.'s guarantees were automatically released in accordance with their terms on April 3, 2014. In connection with the Company's entry into the 2014 Credit Facility, NYSE agreed to guarantee the 2014 Credit Facility as a subsidiary guarantor.

For as long as NYSE remains a guarantor of the 2014 Credit Facility, it will remain a guarantor of the Senior Notes and the Commercial Paper Program. The Company expects that NYSE's guarantee of the 2014 Credit Facility, the Senior Notes and the Commercial Paper Program will be released when the NYSE Notes have been repaid, as the 2014 Credit Facility provides that NYSE's guarantee will be released in accordance with their terms if certain conditions are satisfied, including compliance with the covenant limiting the amount of indebtedness of non-obligor subsidiaries and an investment-grade credit rating.

The following consolidating financial information sets forth, under the equity method of accounting, the condensed consolidating statements of income and comprehensive income, the condensed consolidating balance sheets, and the condensed consolidating statements of cash flows for (i) ICE (Parent); (ii) NYSE; (iii) the subsidiary non-guarantors; (iv) elimination entries necessary to consolidate each of ICE and NYSE with the non-guarantor subsidiaries; and (v) the Company on a consolidated basis. As discussed in Note 1, ICE was formed on March 6, 2013 for purposes of effecting the acquisition of NYSE. Therefore, the condensed consolidating statements for periods prior thereto reflect how these statements would have been presented had the Company been established for all periods presented. The condensed consolidating financial statements only include activity related to NYSE for the period subsequent to November 13, 2013, the closing date of the NYSE acquisition, for the condensed consolidating statements of income, comprehensive income and cash flows. The condensed consolidating financial information has been retrospectively restated to reflect Intercontinental Exchange Holdings, Inc. no longer being a guarantor of the Senior Notes. The condensed consolidating financial information should be read in conjunction with the accompanying consolidated financial statements.

Diluted weighted average common shares outstanding	115	73	114	74
Basic weighted average common shares outstanding	115	73	114	73
Effect of dilutive securities - stock options and restricted stock	—	—	—	1
Diluted weighted average common shares outstanding	115	73	114	74

Basic earnings per common share is calculated using the weighted average common shares outstanding during the period. The weighted average common shares outstanding during the nine months ended September 30, 2014 increased from the prior period primarily due to the 42.4 million shares of the Company's common stock issued to NYSE stockholders in connection with the acquisition on November 13, 2013. Common equivalent shares from stock options and restricted stock awards, using the treasury stock method, are also included in the diluted per share calculations unless the effect of their inclusion would be antidilutive. During the nine months ended September 30, 2014 and 2013, 157,000 and 8,000 outstanding stock options, respectively, were not included in the computation of diluted earnings per common share, because to do so would have had an antidilutive effect because the outstanding stock option exercise prices were greater than the average market price of the common shares during the relevant periods. Certain figures in the table above may not recalculate due to rounding.

16. Subsequent Events

The Company has evaluated subsequent events and determined that no events or transactions met the definition of a subsequent event for purposes of recognition or disclosure in the accompanying consolidated financial statements except those events disclosed in Notes 3, 6 and 7.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Quarterly Report on Form 10-Q, including the sections entitled "Notes to Consolidated Financial Statements", "Legal Proceedings" and "Management's Discussion and Analysis of Financial Condition and Results of Operations", contains "forward-looking statements" as defined in the Private Securities Litigation Reform Act of 1995 that are based on our present beliefs and assumptions and on information currently available to us. You can identify forward-looking statements by terminology such as "may," "will," "should," "could," "would," "targets," "goal," "expect," "intend," "plan," "anticipate," "believe," "estimate," "predict," "potential," "continue," or the negative of these terms or other comparable terminology. These statements relate to future events or our future financial performance and involve known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance or achievements to differ materially from those expressed or implied by these forward-looking statements. These risks and other factors include those set forth in Item 1(A) under the caption "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2013.

Forward-looking statements and other risks and factors that may affect our performance include, but are not limited to: our business environment and trends in our industry; general economic conditions and conditions in global financial markets; volatility in commodity prices, equity prices, and price volatility of financial benchmarks and instruments such as interest rates, credit spreads, equity indexes and foreign exchange rates; changes in domestic and foreign laws, regulations, rules or government policy with respect to financial markets, or our business generally, including changes, increased regulatory scrutiny or enforcement actions; increasing competition and consolidation in our industry; our ability to identify and effectively pursue acquisitions and strategic alliances and successfully integrate the companies we acquire; our ability to realize the anticipated synergies and benefits of the NYSE acquisition within the expected time frame, and integrate NYSE's operations with our business; the success of our clearing houses and our ability to minimize the risks associated with operating multiple clearing houses in multiple jurisdictions; technological developments, including ensuring that the technology we utilize is not vulnerable to security risks; the accuracy of our cost estimates and expectations; our belief that cash flows from operations will be sufficient to service our current levels of debt and fund our working capital needs and capital expenditures for the foreseeable future; our ability, on a timely and cost-effective basis, to offer additional products and services, leverage our risk management capabilities and enhance our technology; maintaining existing market participants and attracting new ones; protecting our intellectual property rights; not violating the intellectual property rights of others; our ability to identify trends and adjust our business to respond to such trends; potential adverse adverse results of litigation and regulatory actions and proceedings; and our belief in our electronic platform and disaster recovery system technologies. We caution you not to place undue reliance on these forward-looking statements as they speak only as of the date on which such statements were made, and we undertake no obligation to update any forward-looking statement or to reflect the occurrence of an unanticipated event. New factors emerge from time to time, and it is not possible for management to predict all factors that may affect our business and prospects. Further, management cannot assess the impact of each factor on the business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements.

In this Quarterly Report on Form 10-Q, unless otherwise indicated, the terms "Intercontinental Exchange", "ICE", "we", "us", "our", "our company" and "our business" refer to Intercontinental Exchange, Inc., together with its consolidated subsidiaries. Due to rounding, figures may not sum exactly.

Overview

We are a leading global operator of regulated exchanges and clearing houses for financial and commodity markets. Through our subsidiaries, we currently operate 11 global exchanges and five central clearing houses. We operate global marketplaces for trading and clearing a broad array of securities and derivatives contracts across major asset classes, including interest rates, equity derivatives, credit derivatives, bonds, currency, and commodities. We are also a global markets operator and provider of securities listing, trading, market data products, benchmark, and technology services.

Recent Developments

NYSE Acquisition and Related Transactions

On November 13, 2013, we completed our acquisition of 100% of NYSE for \$11.1 billion, comprised of cash consideration of \$2.7 billion and 42.4 million shares of our common stock, and their results are included in our consolidated results effective from the acquisition date. Refer to note 3 to our consolidated financial statements and related notes, which are included elsewhere in this Quarterly Report on Form 10-Q, for more information on this acquisition.

Initial Public Offering of Euronext

On June 24, 2014, we sold 65.8 million shares of common stock of Euronext, representing 94% of all outstanding shares, in three transactions. The transactions included our sale of 42.2 million shares of Euronext common stock in an initial public offering, or IPO, at €20 per share, 23.4 million shares of Euronext common stock to a group of European institutional investors at €19.20 per share

and 0.2 million shares of Euronext common stock to eligible Euronext employees at €16 per share. These transactions generated an aggregate €1.4 billion (\$1.9 billion) of net cash proceeds. The net cash proceeds received included cash of \$220 million distributed from Euronext as part of the separation of Euronext from our remaining businesses. Euronext is comprised of the European-based exchanges acquired by us as part of the NYSE acquisition completed in November 2013. Due to the sale of a controlling interest in Euronext, we de-consolidated the assets and liabilities of Euronext as of the IPO date and included the financial results of Euronext in discontinued operations in the consolidated financial statements. See "- Discontinued Operations" below. As of September 30, 2014, we own 4.2 million shares of Euronext common stock, representing 6% of all outstanding shares, which are subject to a 180-day lockup period from the IPO date that prohibits the sale of these shares without the prior written consent of the joint global coordinators that underwrote the IPO. We used the cash proceeds from the sale of Euronext shares to repay debt. See "- Debt" below. Also, refer to note 13 to our consolidated financial statements and related notes, which are included elsewhere in this Quarterly Report on Form 10-Q, for more information on the IPO of Euronext and the presentation of the results as discontinued operations.

In connection with the separation of Euronext from ICE, Euronext and ICE entered into a series of services agreements and related agreements, or SLAs, to ensure that Euronext and ICE (including Liffe) have continuity in operating their respective businesses through the separation. The majority of the SLAs are in place through the end of 2014 and provide for, among other things, Euronext operational support and transition services to be provided to Liffe until its transition to ICE Futures Europe and the ICE platform is completed at the end of 2014.

NYSE Technologies Divestitures

NYSE operated a commercial technology business, NYSE Technologies, which offered transaction, data and infrastructure services, and managed solutions for market participants. On June 18, 2014, we signed a definitive agreement with SR Labs for the sale of Wombat, a unit of NYSE Technologies, and the transaction closed on July 23, 2014. On June 23, 2014, we signed a definitive agreement with ULLINK for the combined sale of NYFIX and Metabit, both businesses of NYSE Technologies, and the transaction closed on September 19, 2014. These agreements complete our previously announced intention to divest non-core NYSE Technologies assets.

The results of NYFIX, Metabit and Wombat are reflected as discontinued operations in the consolidated financial statements. See "- Discontinued Operations" below. We expect to use the net cash proceeds from the sales to repay debt, invest in growth initiatives, pursue strategic investments and return capital to shareholders via dividends and share repurchases. See "- Debt" below. Also, refer to note 13 to our consolidated financial statements and related notes, which are included elsewhere in this Quarterly Report on Form 10-Q, for more information on the sales and the presentation of the results as discontinued operations.

Liffe transition to ICE Futures Europe

We have successfully transitioned many of the Liffe soft commodity and interest rate futures and options contracts to ICE Futures Europe. These products are now listed on ICE Futures Europe via the ICE trading platform, which also lists the ICE Futures U.S. soft commodity futures and options contracts. The remaining Liffe products, including equity derivatives futures and options contracts, are expected to transition to ICE Futures Europe by the end of November 2014.

The clearing transition of the Liffe products to ICE Clear Europe was completed in July 2013, and all Liffe commodity, interest rate and equity derivatives contracts will continue to be cleared at ICE Clear Europe. The transition of Liffe U.S. to ICE's futures markets was completed in June 2014.

The ICE trading platform features leading-edge technology and functionality, including trading applications such as the WebICE front end, ICE mobile, ICE Chat and ICE Options Analytics. The transition of Liffe contracts to the ICE platform provides for the retention of a pro-rata, allocation-based matching algorithm for the Liffe interest rate futures markets and enhanced wash trade prevention protections, including ICE's self-trade prevention functionality. The ICE platform also features improved pre-trade risk management technology, interval price limit circuit breakers and sophisticated messaging policies to maintain efficient, orderly and reliable markets.

SMX Acquisition

On February 3, 2014, we acquired 100% of the outstanding common stock of Singapore Mercantile Exchange Pte. Ltd., or SMX. The acquisition included Singapore Mercantile Exchange Clearing Corporation Pte. Ltd., or SMXCC, a wholly-owned subsidiary of SMX which was the clearing house for all SMX trades. SMX operated futures markets in

Singapore across metals, currencies, energy and agricultural commodities, and SMXCC cleared the contracts executed on SMX. SMX and SMXCC retain licenses to operate as an approved exchange and an approved clearing house, regulated by the Monetary Authority of Singapore. These licenses provided us with exchange and clearing licenses in Asia. The exchange and clearing infrastructures are expected to transition to the ICE trading and clearing platforms in the first quarter of 2015. As a result, a period of business transition is currently underway and the exchange and clearing house have been temporarily closed. SMX and SMXCC have been renamed ICE Futures Singapore and

ICE Clear Singapore, respectively. Refer to note 3 to our consolidated financial statements and related notes, which are included elsewhere in this Quarterly Report on Form 10-Q, for more information on this acquisition.

SuperDerivatives Acquisition

On September 5, 2014, we entered into a definitive agreement to acquire 100% of the outstanding common stock of SuperDerivatives, Inc., or SuperDerivatives, a leading provider of risk management analytics, financial market data and valuation services. The acquisition closed on October 7, 2014. The acquisition is intended to accelerate our multi-asset class clearing, risk management and market data strategy. We paid \$350 million in cash to acquire SuperDerivatives.

Founded in 2000, SuperDerivatives provides risk management analytics and systems across all asset classes, including interest rates, foreign exchange, credit, equities, energy and commodities to customers including banks, asset managers, corporations, central banks, auditors and brokers. Key risk management and data products and services include independent valuation services, market data for mark-to-market, multi-asset derivatives front office and risk systems and a multi-asset over-the-counter execution platform. SuperDerivatives' DGX front-end data system is a web-based platform that delivers analytics, data, news and chat with video in a cost-efficient manner.

Pending Holland Clearing House Acquisition

On September 10, 2014, we entered into a definitive agreement to acquire 75% of the outstanding common stock of Holland Clearing House N.V., or HCH, a continental European clearing house, to support our comprehensive clearing strategy for financial products. ABN AMRO Clearing Bank N.V. will retain the remaining 25% minority interest in HCH. Completion of the transaction is subject to regulatory approval and other customary closing conditions. The transaction is expected to close in the fourth quarter of 2014.

HCH is a continental European derivatives clearing house based in Amsterdam and is the clearing house for The Order Machine, or TOM, a multi-lateral trading facility for equity options. HCH is regulated and supervised in the Netherlands by the Authority For the Financial Markets and the Dutch Central Bank.

ICE Benchmark Administration - LIBOR and ISDAFIX

In September 2012, the Wheatley Review, an independent UK-based review of the setting and usage of the London Interbank Offered Rate, or LIBOR, identified the need for a new independent administrator for LIBOR. Following a selection process by the Hogg Tendering Advisory Committee, which was an independent committee established to recommend a new administrator for LIBOR, ICE Benchmark Administration, or IBA, a wholly-owned subsidiary of ICE, was recommended as the administrator for LIBOR in July 2013. In February 2014, IBA was authorized by the U.K.'s Financial Conduct Authority to commence administration of LIBOR as an independent and regulated benchmark administrator. Since authorization, IBA has been working with global industry associations, stakeholders and regulators to transition LIBOR and improve the integrity and transparency of the benchmark. IBA has established a robust oversight and governance framework, in addition to developing surveillance technology and analytical tools to operate the benchmark setting process.

On April 30, 2014, IBA was appointed as the new administrator of ISDAFIX by the International Swaps and Derivatives Association, or ISDA, and formally commenced its role as the administrator on August 1, 2014. The ISDAFIX benchmark represents the average mid-market swap rate for four major currencies: Euro (EUR), British pound (GBP), Swiss franc (CHF) and U.S. dollar (USD), at selected maturities on a daily basis. Market participants use the rate to price and settle swap contracts and as a reference rate for floating rate bonds.

The initial IBA calculation methodology continues the polled submission model, where contributing banks submit mid-point prices to the administrator. The assumption of administration by IBA is the first step towards migrating to a new market-based methodology of tradable quotes. This move will be made possible by the introduction of electronic markets for interest rate swaps and is designed to align the ISDAFIX benchmark with the principles for financial benchmarks published by the International Organization of Securities Commissions, or IOSCO, in 2013, which were subsequently endorsed by the G20 and by the Financial Stability Board.

IBA has entered into agreements with ISDA in relation to the transfer, administration and calculation of the ISDAFIX benchmark in various currencies and the licensing of related intellectual property to IBA. IBA's responsibilities for ISDAFIX will include governance of all ISDAFIX administrative processes including oversight and decisions of methodology, systems and controls relating to the benchmark. IBA aims to transition the EUR, GBP and USD ISDAFIX benchmarks to a tradable quote methodology in the fourth quarter of 2014 and first quarter of 2015. Similar

to the risks associated with moving LIBOR to IBA, there are risks associated with the transition and operation of the ISDAFIX benchmark, including operational risks and reputational harm.

Regulation Update

Our markets are primarily subject to the jurisdiction of regulatory agencies in the United States, Europe, Singapore and Canada. In 2009, during the Pittsburgh summit, the G20 nations came to a mutual agreement on global financial market reform. Since that

agreement, various domestic and foreign governments have undertaken reviews of the existing legal framework governing financial markets and have either passed new laws and regulations, or are in the process of debating and/or enacting new laws and regulations that apply to our business and to our customers' business.

The European Union, or EU, has adopted legislation on over-the counter, or OTC, and exchange-traded derivatives, clearing houses and trade repositories commonly known as the European Market Infrastructure Regulation, or EMIR. EMIR requires, among other things, all derivatives trades to be reported to trade repositories, clearing of standardized OTC derivative contracts and more stringent prudential, operational and business requirements for clearing houses. EMIR also requires clearing houses to require enough margin to cover an exchange traded derivatives (futures) position for two days, an increase over the present margining methodology. The increased margin requirements for market participants could make trading of cleared derivative contracts in Europe more expensive for market participants, which may cause clients to prefer our clearing operations that are based in other jurisdictions and require us to restructure certain aspects of our business. ICE Clear Europe is in the process of being authorized as a recognized EMIR Central Counterparty, or CCP.

Under EMIR, foreign domiciled CCPs must be recognized by the European Securities and Markets Authority, or ESMA, to conduct business in Europe. ICE Clear U.S., ICE Clear Credit and ICE Clear Canada have made applications to ESMA to become recognized as EMIR third country CCPs and ESMA has deemed those applications complete. However, ESMA's recognition of ICE Clear U.S., ICE Clear Credit and ICE Clear Canada as third country CCPs is dependent upon an equivalence decision by the European Commission that each clearing house's home country regulatory framework is equivalent to the regulatory framework of the EU. In its September 1, 2013 recommendation on CCP equivalence to the European Commission, ESMA advised the European Commission that the U.S.'s regulatory system for CCPs is not equivalent to the European regulatory system. The European Commission and the U.S. Commodity Futures Trading Commission, or CFTC, remain in active dialog regarding the issue of equivalence and a final decision is anticipated in the fourth quarter of 2014. Failure by the European Commission to find the United States or Canada equivalent would result in higher capital charges for European clearing firms accessing U.S. or Canadian CCPs and could cause those clearing firms to exit the U.S. and/or Canadian markets. The EU has adopted the Markets in Financial Instruments Directive II, or MiFID II, which is designed to increase European regulation of trading in financial instruments. MiFID II will require derivatives that are sufficiently liquid to be traded on a multilateral trading facility or an organized trading facility. The legislation also institutes a position limit regime for commodity derivatives, which will be set by the national regulators pursuant to a methodology established by ESMA. The agreement also includes an access provision for non-discriminatory access to execution and clearing venues. The specific conditions for this are expected to be established at the rule making stage by ESMA during 2014. In addition, the legislation requires non-discriminatory access to benchmarks (a benchmark is an index or other measure used to determine the value of a financial instrument, for example, LIBOR or the FTSE) used in the EU. Non-discriminatory access is expected to take effect between 2017 and 2019 based on current implementation timelines that have been provided.

In November 2013, the CFTC proposed new rules placing position limits on 28 energy, metals and agricultural contracts. ICE Futures U.S. has spot month position limits for its energy, agricultural, metals and certain financial products and also has single month and all month limits for certain agricultural, metals and financial contracts. If finalized, the new rules will place federal all month and spot month limits on these 28 contracts, and the limits will be aggregated across all U.S. exchanges and the OTC swaps markets. Key contracts included in the rule will be the Henry Hub natural gas contract and the ICE WTI crude oil contract. The new rules propose that financially settled contracts will maintain a position limit five times the limit for physically settled futures contracts.

The Securities and Exchange Commission, or SEC, is reviewing the structure of equity markets through developing data driven research and testing certain hypotheses through the use of pilot programs. In August 2014, the National Securities Exchanges and FINRA submitted a pilot proposal that the SEC will publish for public comment and the Chair of the SEC has advocated for market structure changes with a near-term focus on transparency of activity occurring on dark trading centers. The SEC has also announced its intentions of moving forward with remaining swap rules, including swap data reporting, by the end of 2014. The SEC is also expected to approve final rules adopting Regulation System Compliance and Integrity, or Regulation SCI, which will impose new requirements on exchanges and other market participants with regard to the security and robustness of their systems.

For additional information regarding the regulations and regulatory environment affecting our business, see Item 1 “Business - Regulation” and Item 1(A) “Risk Factors” included in our Annual Report on Form 10-K for the year ended December 31, 2013, or our 2013 Form 10-K, as filed with the SEC on February 14, 2014.

Consolidated Financial Highlights

The following summarizes our results and significant changes in our consolidated financial performance for the periods presented (in millions, except percentages and per share amounts):

35

Edgar Filing: Intercontinental Exchange, Inc. - Form 10-Q

	Nine Months Ended September 30,				Three Months Ended September 30,			
	2014	2013	Change		2014	2013	Change	
Total revenues, less transaction-based expenses	\$2,292	\$1,062	116	%	\$745	\$338	121	%
Total operating expenses	\$1,244	\$435	186	%	\$415	\$136	206	%
Adjusted operating expenses ⁽¹⁾	\$1,146	\$397	189	%	\$377	\$131	189	%

Adjusted diluted earnings per share attributable to ICE common shareholders ⁽¹⁾	\$6.62	\$6.19	7	%	\$2.06	\$1.97	5	%
Cash flows from operating activities of continuing operations	\$922	\$562	64	%				

⁽¹⁾ The adjusted numbers in the table above are calculated by excluding items that are not reflective of our core business performance, net of taxes, as applicable. See “- Non-U.S. GAAP Financial Measures” below.

Total revenues, less transaction-based expenses, increased \$1.23 billion and \$407 million for the nine and three months ended September 30, 2014, respectively, from the comparable periods in 2013, primarily due to \$1.28 billion and \$403 million in revenues, less transaction-based expenses, recognized relating to the inclusion of NYSE for the nine and three months ended September 30, 2014 (subsequent to its acquisition on November 13, 2013). The NYSE increases for the nine months ended September 30, 2014 were partially offset by decreases in certain energy futures and options transaction and clearing revenues compared to the prior year period. See “- Consolidated Revenues” below. Total revenues, less transaction-based expenses, exclude Euronext and NYSE Technologies revenues which are included in income from discontinued operations discussed below.

Total operating expenses increased \$739 million and \$245 million for the nine and three months ended September 30, 2014, respectively, from the comparable periods in 2013 (excluding the acquisition-related transaction and integration costs), primarily due to \$696 million and \$220 million in expenses recognized relating to the inclusion of NYSE for the nine and three months ended September 30, 2014, respectively. Acquisition-related transaction and integration costs increased \$70 million and \$34 million for the nine and three months ended September 30, 2014, respectively, from the comparable periods in 2013, to \$102 million and \$40 million for the nine and three months ended September 30, 2014, respectively, primarily related to our integration of NYSE. See “- Operating Expenses” below. Total operating expenses exclude Euronext and NYSE Technologies operating expenses which are included in income from discontinued operations discussed below.

Other expense, net, increased for the nine and three months ended September 30, 2014, from the comparable periods in 2013, primarily due to an increase in our interest expense resulting from an increase in our total debt outstanding, partially offset by an increase in dividend income received relating to our investment in Cetip. See “- Non-Operating Income (Expenses)” below.

Income from discontinued operations, net of tax, for the nine months and three months ended September 30, 2014 includes the results of Euronext and NYSE Technologies. See “- Discontinued Operations” below.

Variability in Quarterly Comparisons

The business environments in which we operate directly affect our results of operations. Our results have been and will continue to be affected by many factors, including the level of trading activity in our markets, which during any period is significantly influenced by general market conditions; price volatility; competition; market share and the pace of industry consolidation; broad trends in the brokerage and finance industry; price levels and price volatility; the number and financial health of companies listed on our cash markets; geopolitical events; weather and disasters; real and perceived supply and demand imbalances; availability of capital;

changing technology in the financial services industry; and, legislative and regulatory changes among other factors. In particular, in recent years, the business environment has been characterized by increasing competition among global markets for trading volumes and listings; the globalization of exchanges, customers and competitors; market participants' demand for speed, capacity and reliability, which requires continuing investment in technology; and, increasing competition for market data revenues. Price volatility increases the need to hedge risk and creates demand between market participants for the exchange of risk. Market liquidity is one of the primary market attributes for attracting and maintaining customers and is an important indicator of a market's strength. The maintenance and growth of our revenues could also be impacted if we face increased pressure on pricing. Changes in these and other factors could cause our revenues to fluctuate from period to period and these fluctuations may affect the reliability of period to period comparisons of our revenues and operating results. For additional information regarding the factors that affect our results of operations, see Item 1(A) "Risk Factors" included in our 2013 Form 10-K as filed with the SEC on February 14, 2014.

Segment Reporting

We previously operated as a single reportable business segment as of December 31, 2013, the ICE segment. As of March 31, 2014, we operated as two business segments, the ICE segment and the Euronext segment, which was reflective of how our chief operating decision maker reviewed and operated the business. Following the IPO and de-consolidation of Euronext in June 2014, we reverted to one business segment as this is reflective of how our chief operating decision maker reviewed and operated the business as of June 30, 2014 and September 30, 2014.

Consolidated Revenues

Total revenues, less transaction-based expenses, exclude Euronext and NYSE Technologies revenues, which are included in income from discontinued operations. See "- Discontinued Operations" below. The following table presents our consolidated revenues, less transaction-based expenses, from continuing operations (in millions, except for percentages):

	Nine Months Ended September 30,			Three Months Ended September 30,		
	2014	2013	Change	2014	2013	Change
Revenues:

Total revenues, less transaction-based expenses	\$2,292	\$1,062	116 %	\$745	\$338	121 %

Transaction and Clearing Fees, net

Our transaction and clearing fees are reported on a net basis, except for the transaction-based expenses discussed below, and consist of fees collected from our derivatives trading and clearing and, subsequent to our acquisition of NYSE on November 13, 2013, from our U.S. cash trading and U.S. equity options businesses. In our derivatives markets, we earn transaction and clearing fees from both counterparties to each contract that is traded and/or cleared. Revenues for per-contract fees are driven by the number of trades executed and fees charged per contract. The amount of our per-contract transaction and clearing fees will depend upon many factors, including, but not limited to, market conditions, transaction and clearing volume, pricing and new product introductions.

Following our acquisition of NYSE, we recognize transaction and clearing fee revenues from executing trades of derivatives contracts and clearing charges on Liffe. The principal types of derivative contracts traded and cleared in these markets are futures and options on interest rate, agriculture and equity derivatives. Trading volume in European interest rate products is primarily driven by volatility resulting from economic data and changes in expectations for the level and term structure of short-term interest rates, and trading in equity derivatives, including indexes and single stock futures, is primarily driven by volatility and other economic factors impacting the equity markets.

We receive transaction fee revenues from U.S. cash trading. Cash trading consists of transaction charges for executing trades in our cash equities markets, including NYSE, NYSE Arca and NYSE MKT, as well as options contracts traded on NYSE Arca and NYSE Amex Options. In addition, we receive routing fees related to orders in our markets which are routed to other market centers for execution.

Our U.S. cash markets pay fees to the SEC pursuant to Section 31 of the Exchange Act of 1934. These Section 31 fees are designed to recover the government's costs of supervising and regulating the securities markets and securities professionals. We, in turn, collect activity assessment fees, which are included in transaction and clearing fees in our consolidated statements of income, from member organizations clearing or settling trades on the U.S. securities exchanges and recognize these amounts when invoiced. The activity assessment fees are designed so that they are equal to the Section 31 fees (the Section 31 fees are included in transaction-based expenses in our consolidated statements of income). As a result, activity assessment fees and Section 31 fees do not have an impact on our net income. Activity assessment fees received are included in cash at the time of receipt and, as required by law, the amount due to the SEC is remitted semi-annually and recorded as an accrued liability until paid. As of September 30, 2014, the accrued liability related to the un-remitted SEC Section 31 fees was \$29 million, and was included in other current liabilities in our consolidated balance sheet.

Energy futures and options volumes and related revenues have generally declined for the nine months ended September 30, 2014, and to a lesser extent, for the three months ended September 30, 2014, from the comparable periods in 2013. The energy contracts include Gasoil and North American natural gas, and for the year to date period comparison, Brent crude and other oil futures and options contracts. Energy volumes declined on multi-year lows for intraday price volatility across the markets for global oil and North American natural gas, among others. In addition, moderate commodity demand due to muted economic growth, regulatory uncertainty and strong natural gas supply reduced the demand for trading and hedging.

Natural gas futures and options volumes declined 26% and 19% for the nine and three months ended September 30, 2014, respectively, from the comparable periods in 2013, while corresponding revenues decreased 9% and 1% for the nine and three months ended September 30, 2014, respectively, from the comparable periods in 2013. The relatively lower decrease in revenues, compared to the volume decrease, was driven by growth in our European natural gas volumes year over year, which has a higher rate per contract, as compared to the North American natural gas contract, whose volume decreased significantly year over year.

In our derivatives markets, our benchmark Brent crude futures contract is relied upon by a broad range of global market participants, including oil producing nations and multinational companies, to price and hedge their crude oil production and consumption. Brent futures and options volumes declined 3% and increased 8% for the nine and three months ended September 30, 2014, respectively, from the comparable periods in 2013. Based on traded volume in our Brent and WTI crude futures contracts, we had 55% market share of the global crude futures contracts trading for both the nine months ended September 30, 2014 and 2013 and 55% and 54% market share of the global crude futures contracts trading for the three months ended September 30, 2014 and 2013, respectively. Gasoil (a key refined oil products benchmark in Europe and Asia) volume declined 21% and 22% for the nine and three months ended September 30, 2014, respectively, from the comparable periods in 2013.

Power futures and options volumes decreased 13% and 12% for the nine and three months ended September 30, 2014, respectively, from the comparable periods in 2013, while corresponding revenues increased 2% and 8% for the nine and three months ended September 30, 2014, respectively, from the comparable periods in 2013. The increase in revenues, compared to the volume decreases, were driven by growth in our European power volumes year over year, which has a higher rate per contract, as compared to the North American power contract, whose volume decreased significantly year over year. In April 2014, the power contract size convention was amended to convert from smaller megawatt hours contracts to a large fixed megawatt contract, and the prior year comparisons have been restated to

reflect the conversion.

Credit default swap, or CDS, trade execution revenues at Creditex and ICE Swap Trade were \$50 million and \$52 million for the nine months ended September 30, 2014 and 2013, respectively, and \$15 million and \$16 million for the three months ended September 30, 2014 and 2013, respectively. The notional value of the underlying CDS traded was \$793 billion and \$702 billion for the nine months ended September 30, 2014 and 2013, respectively, and \$230 billion and \$221 billion for the three months ended September 30, 2014 and 2013, respectively.

Total CDS clearing revenues at ICE Clear Credit and ICE Clear Europe were \$72 million and \$60 million for the nine months ended September 30, 2014 and 2013, respectively, and \$23 million and \$22 million for the three months ended September 30, 2014 and 2013, respectively. During the nine months ended September 30, 2014 and 2013, ICE Clear Credit and ICE Clear Europe cleared

\$9.6 trillion and \$8.2 trillion respectively, of CDS notional value and during the three months ended September 30, 2014 and 2013, cleared \$3.1 trillion and \$2.5 trillion, respectively, of CDS notional value. CDS clearing activity by investment funds, asset managers, and other buy side market participants has continued to increase due to regulatory mandates, the expansion of products made available for clearing and the benefits derived from portfolio margining. Our transaction and clearing fees are presented net of rebates. We recorded rebates of \$480 million and \$295 million for the nine months ended September 30, 2014 and 2013, respectively, and \$146 million and \$92 million for the three months ended September 30, 2014 and 2013, respectively. We offer rebates in certain of our markets, including Liffe derivatives markets following the NYSE acquisition, primarily to support market liquidity and trading volume by providing qualified participants in those markets a discount to the applicable rate. Such rebates are calculated based on volumes traded. The increase in the rebates is due primarily to the rebates relating to the addition of Liffe derivatives markets following the acquisition, an increase in the number of participants in the rebate programs offered on various contracts and an increase in the number of rebate programs offered during the first nine months of 2014.

Selected Operating Data

The following table presents trading activity in our futures and options markets by commodity type based on the total number of contracts traded, as well as futures and options rate per contract (in millions, except for percentages and rate per contract amounts):

	Nine Months Ended September 30,			Three Months Ended September 30,			
	2014	2013	Change	2014	2013	Change	
Number of contracts traded:							
Natural gas futures and options	167	226	(26)%	50	62	(19)%	
Brent crude futures and options	125	130	(3)	47	43	8	
Gasoil futures and options	40	51	(21)	13	16	(22)	
Other oil futures and options	50	49	3	18	17	5	
Power futures and options ⁽¹⁾	21	24	(13)	6	7	(12)	
Emissions and other energy futures and options	8	8	—	2	2	7	
Sugar futures and options	31	28	9	9	9	—	
Other agricultural and metals futures and options	33	24	39	10	7	46	
Interest rates futures and options	336	—	n/a	89	—	n/a	
Other financial futures and options	188	29	524	56	10	518	
Total	999	569	76 %	300	173	74 %	
Rate per contract:							
Energy futures and options rate per contract	\$1.33	\$1.21	10 %	\$1.35	\$1.24	9 %	
Agricultural and metals futures and options rate per contract ⁽²⁾	\$2.39	\$2.56	(7)%	\$2.52	\$2.49	1 %	
Interest rates and other financial futures and options rate per contract ⁽²⁾	\$0.59	\$0.99	(41)%	\$0.62	\$1.01	(38)%	

⁽¹⁾ The North American monthly mini-sized power futures and options contracts included in the table above (and in the open interest table below) have been adjusted for all periods presented to be sized in megawatts, which resulted in a larger post-conversion contract size for each futures and options contract, a lower actual volume of contracts traded and included in open interest, and a higher rate per contract.

⁽²⁾ Subsequent to our acquisition of NYSE on November 13, 2013, agricultural and metals and interest rates and other financial futures and options rates per contract include Liffe agricultural, metals, interest rates, U.S. equity derivatives and equity indexes products.

Open interest is the aggregate number of contracts (long or short) that clearing members hold either for their own account or on behalf of their clients. As of September 30, 2014, aggregate open interest of \$1.6 trillion in notional

value of CDS were held at ICE Clear Credit and ICE Clear Europe, compared to \$1.5 trillion as of September 30, 2013. The following table presents our quarter-end open interest for our futures and options contracts (in millions, except for percentages).

	As of September 30,		
	2014	2013	Change
Open interest — in millions of contracts:			
Natural gas futures and options	20	27	(25)%

Gasoil futures and options	1	1	(12)
Other oil futures and options	5	4	9
Power futures and options	8	8	(8)
Emissions and other energy futures and options	2	2	10
Sugar futures and options	1	1	8
Other agricultural and metals futures and options	2	1	55
Interest rates futures and options	18	—	n/a
Other financial futures and options	16	1	3,369
Total	76	48	60 %

The following table presents selected U.S. cash and U.S. equity options trading data for the nine and three months ended September 30, 2014, subsequent to our acquisition of NYSE. All trading volume below is presented as net daily trading volume and is single counted.

	Nine Months Ended September 30, 2014	Three Months Ended September 30, 2014	
U.S. cash products (shares in millions):			
NYSE listed (tape A) issues:			
Handled volume	1,016	953	
Matched volume	993	934	
Total NYSE listed consolidated volume	3,268	3,022	
Share of total matched consolidated volume	30	% 31	%
NYSE Arca, NYSE MKT and regional listed (tape B) issues:			
Handled volume	235	220	
Matched volume	222	208	
Total NYSE Arca, NYSE MKT and regional listed consolidated volume	1,015	919	
Share of total matched consolidated volume	22	% 23	%
Nasdaq listed (tape C) issues:			
Handled volume	200	186	
Matched volume	184	173	
Total Nasdaq listed consolidated volume	1,964	1,761	
Share of total matched consolidated volume	9	% 10	%
Total U.S. cash volume handled	1,451	1,359	
Total U.S. cash market share matched	22	% 23	%
U.S. equity options (contracts in thousands):			
NYSE equity options	3,585	3,450	
Total U.S. equity options volume	15,001	14,738	
NYSE share of total U.S. equity options	24	% 23	%
Revenue capture or rate per contract:			
U.S. cash products revenue capture (per 100 shares)	\$0.048	\$0.050	
U.S. equity options rate per contract	\$0.160	\$0.160	

Handled volume represents the total number of shares of equity securities, ETFs and crossing session activity internally matched on our exchanges or routed to and executed on an external market center. Matched volume represents the total number of shares of equity securities, ETFs and crossing session activity executed on our exchanges.

Market Data Fees

We generate revenues from the dissemination of our market data to a variety of users. In our derivatives markets, market data fees primarily relate to subscription fees charged for user and license access from data vendors and from the end users, view only market data access, direct access services, terminal access, daily indexes and end of day reports. We charge the end user directly for real-time and historical futures prices and other futures market data in certain of our markets, including our interest rates markets. In our cash products, we earn market data fees relating to our cash trading and related market data services. We collect these market data fees principally for consortium-based data products and, to a lesser extent, for NYSE proprietary data products. During the nine and three months ended September 30, 2014, we recognized market data fee revenues from NYSE derivatives market data services and U.S. cash trading market data services of \$179 million and \$62 million, respectively.

Listing Fees

Following the NYSE acquisition, we recognize listing fee revenues in our cash equity markets from two types of fees applicable to companies listed on our U.S. securities exchanges - listing fees and annual fees.

Original listing fees are recognized as revenue on a straight-line basis over estimated service periods of nine years for the NYSE equity market and five years for NYSE Arca and NYSE MKT. Other corporate action listing fees are recognized as revenue on a straight-line basis over estimated service periods of six years for the NYSE cash equity market and three years for NYSE Arca and NYSE MKT. Unamortized balances are recorded as deferred revenue in our consolidated balance sheet. The unamortized deferred revenue balance as of September 30, 2014 for the listing fees was \$44 million relating to listing fees incurred and billed and not yet recognized as revenue subsequent to the November 13, 2013 acquisition through September 30, 2014.

Annual fees are charged based on the number of outstanding shares of listed U.S. companies at the end of the prior year. Non-U.S. companies pay fees based on the number of shares issued or held in the United States. Annual fees are recognized as revenue on a pro rata basis over the calendar year. The unamortized deferred revenue balance as of September 30, 2014 for the annual listing fees was \$83 million, which will be recognized as revenue during the fourth quarter of 2014.

Other Revenues

Prior to our acquisition of NYSE, other revenues consisted of various fees and services provided to our customers, including connectivity fees, ICE Chat and ICE Options Analytics subscription fees, ICE Endex membership fees, agricultural grading and certification fees, regulatory penalties and fines, interest income on certain clearing margin deposits and Liffe clearing services fees (Liffe clearing services fees are now recorded in transaction and clearing revenues). Following the NYSE acquisition, other revenues also include technology services revenues, fees for trading licenses, facilities, regulation, listed company services, designated market maker services, and for non-transaction related clearance and settlement activities in our European markets. We recognized \$285 million and \$92 million in other revenues from NYSE for the nine and three months ended September 30, 2014, respectively.

Transaction-Based Expenses

See “- Consolidated Revenues - Transaction and Clearing Fees, net” above, for information on the Section 31 fees that are included in transaction-based expenses. We incur liquidity payments made to cash trading customers and routing charges made to other exchanges that are included in transaction-based expenses. We incur routing charges when we do not have the best bid or offer in the market for a security that a customer is trying to buy or sell on one of our U.S. securities exchanges. In that case, we route the customer’s order to the external market center that displays the best bid or offer. The external market center charges us a fee per share (denominated in tenths of a cent per share) for routing to its system. Additionally, we include costs incurred due to erroneous trade execution within routing as transaction-based expenses. Furthermore, NYSE Arca incurs clearance, brokerage and related transaction expenses and per trade service fees paid to exchanges for trade execution.

Operating Expenses

Total operating expenses exclude Euronext and NYSE Technologies operating expenses, which are included in income from discontinued operations. See "- Discontinued Operations" below. The following table presents our consolidated operating expenses from continuing operations (in millions, except for percentages):

	Nine Months Ended			Three Months Ended		
	September 30,		Change	September 30,		Change
	2014	2013		2014	2013	
Compensation and benefits	\$448	\$193	133 %	\$144	\$60	142 %
Technology and communication	136	36	277 %	46	13	255 %
Professional services	161	23	604 %	52	7	610 %
Rent and occupancy	61	23	169 %	19	5	277 %
Acquisition-related transaction and integration costs	102	32	212 %	40	6	555 %
Selling, general and administrative	92	28	226 %	31	10	198 %
Depreciation and amortization	244	100	144 %	83	35	140 %
Total operating expenses	\$1,244	\$435	186 %	\$415	\$136	206 %

Compensation and benefits expenses

Compensation and benefits expenses increased for the nine and three months ended September 30, 2014, from the comparable periods in 2013, primarily due to increases in our employee headcount. Our employee headcount increased primarily relating to the NYSE acquisition. Headcount increased from 1,121 employees as of September 30, 2013 to 2,754 employees as of September 30, 2014 and, excluding the NYSE employees, increased to 1,333 employees as of September 30, 2014. In addition to the NYSE employees, headcount increases were primarily due to other acquisitions and internal hiring for clearing, technology, compliance operations and relating to transitioning corporate functions to our Atlanta headquarters as a result of the NYSE integration.

As of September 30, 2014, we had 1,421 NYSE employees, compared to 3,099 NYSE employees as of December 31, 2013. The decrease in the NYSE employees from December 31, 2013 to September 30, 2014 is primarily related to the reduction in the Euronext employees following the IPO on June 24, 2014 (there were 1,049 Euronext employees as of December 31, 2013) and due to employee terminations relating to the integration during the nine months ended September 30, 2014. We recognized \$242 million and \$73 million in compensation and benefits expenses relating to NYSE during the nine and three months ended September 30, 2014, respectively.

Non-cash compensation expenses recognized in our consolidated financial statements for employee stock options and restricted stock were \$59 million and \$42 million for the nine months ended September 30, 2014 and 2013, respectively, and \$22 million and \$12 million for the three months ended September 30, 2014 and 2013, respectively, with the increases primarily relating to a greater number of employees receiving non-cash awards due to the headcount increases discussed above. During the three months ended September 30, 2014 and 2013, we reduced our compensation accruals for our employee cash bonus and performance-based restricted shares below the target levels based on our expected 2014 financial performance as compared to our budget and financial performance targets as set by our board of directors.

We incurred employee termination costs of \$3 million and \$4 million for the nine months ended September 30, 2014 and 2013, respectively, and \$2 million and \$1 million for the three months ended September 30, 2014 and 2013, respectively. In addition, we recorded \$82 million and \$36 million in NYSE employee termination costs during the nine and three months ended September 30, 2014, respectively, with such costs included in the acquisition-related transaction and integration costs discussed below.

Compensation and benefits expenses for the nine months ended September 30, 2014 are net of certain state research and development tax credits that are eligible for the first time to be applied against state income tax withholding liabilities. Compensation and benefits expenses for the nine months ended September 30, 2014 was reduced by \$6 million in tax credits representing \$2 million of credits generated in 2012 and \$4 million of credits generated in 2013. No tax credits are reflected in the three months ended September 30, 2014. The Federal tax law does not currently provide for research and development credits in 2014. The states allow the credit only when a company has a Federal research and development credit, and the Federal extender bill to allow for 2014 research and development

credits has not been enacted.

Technology and Communication Expenses

Technology and communication expenses increased for the nine and three months ended September 30, 2014, from the comparable periods in 2013, primarily due to the inclusion of NYSE expenses following our acquisition. We recognized \$98 million

42

and \$33 million in technology and communication expenses relating to NYSE during the nine and three months ended September 30, 2014, respectively.

Professional Services Expenses

Professional services expenses increased for the nine and three months ended September 30, 2014, from the comparable periods in 2013, primarily due to the inclusion of NYSE expenses following our acquisition, due to costs incurred at SMX as we transition their exchange and clearing infrastructures to our trading and clearing platforms, and professional fees incurred for EMIR. See "- Recent Developments" above. We recognized \$126 million and \$40 million in professional services expenses relating to NYSE during the nine and three months ended September 30, 2014, respectively.

Rent and Occupancy Expenses

Rent and occupancy expenses increased for the nine and three months ended September 30, 2014, from the comparable periods in 2013, primarily due to the inclusion of NYSE expenses following our acquisition, partially offset by \$7 million in duplicate rent expenses and lease termination costs relating to the consolidation of multiple New York office locations that occurred during the nine months ended September 30, 2013. We recognized \$44 million and \$14 million in rent and occupancy expenses relating to NYSE during the nine and three months ended September 30, 2014, respectively.

Acquisition-Related Transaction and Integration Costs

We incurred \$102 million and \$40 million in acquisition-related transaction and integration costs during the nine and three months ended September 30, 2014, respectively, primarily relating to our acquisitions of NYSE and SMX and the integration of NYSE. Of this amount, \$96 million and \$38 million related to NYSE integration costs incurred during the nine and three months ended September 30, 2014, respectively, primarily for employee termination costs and professional services costs incurred relating to the integration. We incurred \$32 million and \$6 million in acquisition-related transaction costs during the nine and three months ended September 30, 2013 primarily relating to our pending acquisition of NYSE and the acquisition of ICE Endex.

Selling, General and Administrative Expenses

Selling, general and administrative expenses increased for the nine and three months ended September 30, 2014, from the comparable periods in 2013, primarily due to the inclusion of NYSE expenses following our acquisition, an accrual made in anticipation of the outcome of certain regulatory proceedings, and increases in certain expenses related to taxes other than income taxes, travel and entertaining and insurance. We recognized \$52 million and \$14 million in selling, general and administrative expenses relating to NYSE during the nine and three months ended September 30, 2014, respectively.

Depreciation and Amortization Expenses

We recorded amortization expenses on the intangible assets acquired as part of our acquisitions, as well as on the Russell licensing agreement intangible assets, of \$113 million and \$50 million for the nine months ended September 30, 2014 and 2013, respectively, and \$38 million and \$17 million for the three months ended September 30, 2014 and 2013, respectively. Amortization expenses increased for the nine and three months ended September 30, 2014, from the comparable periods in 2013, primarily due to additional amortization expenses recorded on the intangible assets associated with our acquisition of NYSE. We recognized \$65 million and \$22 million in amortization expenses on the NYSE intangible assets during the nine and three months ended September 30, 2014, respectively.

We recorded depreciation expenses on our fixed assets of \$131 million and \$50 million for the nine months ended September 30, 2014 and 2013, respectively, and \$45 million and \$18 million for the three months ended September 30, 2014 and 2013, respectively. We recognized \$69 million and \$24 million in depreciation expenses relating to the NYSE fixed assets during the nine and three months ended September 30, 2014, respectively.

Depreciation expenses also increased primarily due to additional depreciation expenses recorded on increased fixed asset additions and capitalized internally developed software, including additions relating to the NYSE integration and real estate expenditures during 2014 relating to the Atlanta and New York headquarters. See "- Cash Flow - Investing Activities" below.

Non-Operating Income (Expenses)

The following tables present our consolidated non-operating income (expenses) (in millions, except for percentages):

	Nine Months			Three Months		
	Ended September 30,			Ended September 30,		
	2014	2013	Change	2014	2013	Change
Other income (expense):						
Interest expense	\$(73)	\$(29)	148 %	\$(22)	\$(9)	125 %
Other income, net	20	3	520	5	—	1,752
Total other expense, net	\$(53)	\$(26)	100 %	\$(17)	\$(9)	72 %
Net income attributable to non-controlling interest	\$(29)	\$(10)	189 %	\$(7)	\$(4)	98 %

The increase in interest expense for the nine and three months ended September 30, 2014, from the comparable periods in 2013, is primarily due to an increase in the overall amount of debt outstanding during the last year, primarily relating to debt incurred for and from the NYSE acquisition. See “- Debt” below.

We recognized interest income of \$4 million and \$2 million for the nine months ended September 30, 2014 and 2013, respectively, and \$4 million and \$1 million for the three months ended September 30, 2014 and 2013, respectively.

Interest income is recorded in other income and the increase relates to an increase in our short-term investments during the three months ended September 30, 2014. The €969 million (\$1.2 billion) in short-term investments as of September 30, 2014 represented euro-denominated term deposit investments at various banks with a maturity date of June 25, 2015 to cover the maturity of the NYSE EUR Notes on June 30, 2015. See “- Debt” below.

We incurred foreign currency transaction losses of \$2 million and \$3 million for the nine months ended September 30, 2014 and 2013, respectively, and \$2 million and \$1 million for the three months ended September 30, 2014 and 2013, respectively. Foreign currency gains and losses are recorded in other income (expense) and relate to the settlement of foreign currency assets, liabilities and payables that occur through our foreign operations that are received in non-functional currencies due to the increase or decrease in the period-end foreign currency exchange rates between periods.

We recognized dividend income received relating to our Cetip investment in other income, which was \$20 million and \$7 million for the nine months ended September 30, 2014 and 2013, respectively, and \$4 million and \$1 million for the three months ended September 30, 2014 and 2013, respectively. We also incurred \$3 million in settlement expenses for various legal matters during the nine months ended September 30, 2013, which were recorded as other expense.

For consolidated subsidiaries in which our ownership is less than 100%, and for which we have control over the assets, liabilities and management of the entity, the outside stockholders’ interests are shown as non-controlling interests. The increase in the net income attributable to non-controlling interest during the nine and three months ended September 30, 2014, from the comparable periods in 2013, is primarily due to the increase in the CDS clearing revenues during the current year periods relating to the minority interest in our CDS clearing subsidiaries and due to net income during the nine and three months ended September 30, 2014 relating to the NYSE AMEX Options minority ownership interest we acquired following our acquisition of NYSE.

Income Tax Provision

Consolidated income tax expense from continuing operations was \$284 million and \$161 million for the nine months ended September 30, 2014 and 2013, respectively, and \$90 million and \$48 million for the three months ended September 30, 2014 and 2013, respectively. The change in consolidated income tax expense between periods is primarily due to the change in our pre-tax income. Our effective tax rate from continuing operations was 29% and 27% for the nine months ended September 30, 2014 and 2013, respectively, and 29% and 25% for three months ended September 30, 2014 and 2013, respectively. The effective tax rates for the nine and three months ended September 30, 2014 and 2013 are lower than the federal statutory rate primarily due to favorable foreign tax rate differentials, partially offset by state income taxes. Favorable foreign income tax rate differentials result primarily from lower tax rates in the United Kingdom, the Netherlands and various other lower tax jurisdictions. The effective tax rates for the

nine and three months ended September 30, 2014 are higher than the effective tax rates for the comparable periods in 2013 primarily due to lower foreign income mix and lack of research and development tax credits in the current year periods and favorable income tax rate reductions in the United Kingdom in the prior year periods.

Discontinued Operations

We have reflected the results of Euronext, NYFIX, Metabit and Wombat as discontinued operations in the consolidated financial statements. See "- Recent Developments" above. No comparable data for the prior year periods is presented as we did not complete the acquisition of NYSE until November 2013.

The total assets and total liabilities of Euronext removed from our consolidated balance sheet as of the June 24, 2014 de-consolidation was \$2.9 billion and \$1.1 billion, respectively, including \$2.3 billion in goodwill and other intangibles assets. The \$1.8 billion in Euronext net assets removed in the de-consolidation is net of the remaining 6% investment in Euronext held by us, valued at \$103 million in the consolidated balance sheet as of September 30, 2014. The total assets and total liabilities of NYFIX, Metabit and Wombat removed from our consolidated balance sheet after the sales of those businesses during the third quarter of 2014 were \$199 million and \$31 million, respectively, including \$145 million in goodwill and other intangibles assets. There was no gain or loss recognized on the Euronext IPO and de-consolidation and on the sales of the NYSE Technologies companies as any differences in the carrying value of these net assets was adjusted in the NYSE purchase price allocation.

The following table presents our income (loss) from discontinued operations, net of tax, for the nine and three months ended September 30, 2014 (in millions):

	Nine Months Ended September 30, 2014	Three Months Ended September 30, 2014
Revenues:

Quarterly Results of Operations

We believe the following quarterly unaudited consolidated statements of income data has been prepared on substantially the same basis as our audited consolidated financial statements and includes all adjustments, consisting only of normal recurring adjustments, necessary for the fair presentation of our consolidated results of operations for the quarters presented. The historical results for any quarter do not necessarily indicate the results expected for any future period. The following table sets forth quarterly

(1) We acquired NYSE on November 13, 2013 and have included their financial results in our results of operations for all periods subsequent to the acquisition date.

(2) The consolidated statements of income data for Euronext, NYFIX, Metabit and Wombat for the quarters subsequent to the acquisition of NYSE, through their disposition, are included in income from discontinued operations, net of tax. See “- Discontinued Operations” above.

(3) Other expense, net for the three months ended December 31, 2013 includes a \$190 million impairment loss on our Cetip investment and a \$51 million expense relating to the early payoff of outstanding debt.

Liquidity and Capital Resources

We have financed our operations, growth and cash needs primarily through income from operations and borrowings under our various debt facilities. Our principal capital requirements have been to fund capital expenditures, working capital, strategic acquisitions and investments, stock repurchases and the continued development of our electronic trading and clearing platforms. We believe that our cash on hand and cash flows from operations will be sufficient to repay our outstanding debt as it matures. In the future, we may need to incur additional debt or issue additional equity securities, which we may be unable to do or to do on favorable terms. We used the cash proceeds from the Euronext IPO to repay debt and we used the net cash proceeds from the sales of NYFIX,

Metabit and Wombat to repay debt, invest in growth initiatives, pursue strategic investments and return capital to shareholders via dividends and share repurchases. See “- Recent Developments” above and “- Debt” and “- Future Capital Requirements” below.

Upon maturity of old issuances of commercial paper and to the extent old issuances are not repaid by cash on hand, we are exposed to the rollover risk of not being able to issue new commercial paper. In order to mitigate the rollover risk, we maintain an undrawn backstop bank revolving credit facility for an aggregate amount equaling at any time the amount issued under our commercial paper program. In case we would not be able to issue new commercial paper, we could draw on the backstop revolving facility, which would result in higher interest expense. See “- Debt” below. Consolidated cash and cash equivalents were \$638 million and \$961 million as of September 30, 2014 and December 31, 2013, respectively, and short-term investments were \$1.2 billion and \$74 million as of September 30, 2014 and December 31, 2013, respectively. We had \$496 million and \$324 million in long-term investments as of September 30, 2014 and December 31, 2013, respectively, and \$544 million and \$438 million in short-term and long-term restricted cash and investments as of September 30, 2014 and December 31, 2013, respectively. The €969 million (\$1.2 billion) in short-term investments as of September 30, 2014 represented euro-denominated term deposit investments at various banks with a maturity date of June 25, 2015 to cover the maturity of the NYSE EUR Notes on June 30, 2015. See “- Debt” below. The increase in the long-term investments is due to an increase in our Cetip investment's fair value and the 6% ownership in Euronext as of September 30, 2014. See “- Recent Developments” above. The restricted cash and investments increase primarily related to a contribution to the ICE Clear U.S. guaranty fund as of January 1, 2014 in connection with ICE Clear U.S.'s recognition as a third party QCCP, and increases in the regulatory capital of ICE Clear Europe and Liffe due to additional costs incurred at both of these companies due to growth of these businesses.

As of September 30, 2014, the amount of unrestricted cash held by our non-U.S. subsidiaries was \$384 million. While we consider our non-U.S. earnings to be indefinitely reinvested overseas, if these cash balances are needed for our operations in the United States, any repatriation by way of dividend may be subject to both U.S. federal and state income taxes, as adjusted for any non-U.S. tax credits. However, we do not have any current needs or foreseeable plans to repatriate cash by way of dividends from our non-U.S. subsidiaries.

In March 2014, we entered into a trading plan under Rule 10b5-1 of the Securities Exchange Act of 1934 permitting open market repurchases of our common stock. The trading plan contemplated purchases of stock based on certain triggers described in the trading plan. During the nine and three months ended September 30, 2014, we repurchased 2.3 million shares of our common stock in an open trading window or under the Rule 10b5-1 trading plan at an aggregate cost of \$448 million, which was paid for through cash on hand and the issuance of commercial paper. In September 2014, we entered into a new Rule 10b5-1 trading plan. As of September 30, 2014, we have board approval for another \$601 million for stock repurchases under our stock repurchase programs, with no fixed expiration dates. We repurchased 319,500 shares of our common stock on the open market through our Rule 10b5-1 trading plan at an aggregate cost of \$64 million during the month of October 2014, through cash on hand.

We expect to fund any remaining share repurchases with a combination of cash on hand, future cash flows and by borrowing under our credit facilities and our commercial paper program discussed below. The timing and extent of any future repurchases that are not pursuant to the Rule 10b5-1 trading plan adopted in September 2014 are at the discretion of our management and will depend upon market conditions, amount authorized by our board of directors, our stock price, our target debt ratio and corporate debt rating, and our strategic growth initiatives at that time. We may discontinue the stock repurchases at any time or may enter into a new Rule 10b5-1 trading plan in the future. In addition, our board of directors may increase or decrease the amount of capacity we have for repurchases from time to time.

Cash Flow

The following tables present the major components of net increases (decreases) in cash and cash equivalents (in millions):

	Nine Months Ended September 30,	
	2014	2013
Net cash provided by (used in):		
Operating activities from continuing operations	\$922	\$562
Investing activities from continuing operations	489	(259)
Financing activities from continuing operations	(1,618) (376)
Discontinued operations	(114) —
Effect of exchange rate changes	(2) (2)
Net decrease in cash and cash equivalents	\$(323) \$(75)

Operating Activities

Net cash provided by operating activities from continuing operations primarily consists of net income adjusted for certain non-cash items, including depreciation and amortization and the effects of changes in working capital. Fluctuations in net cash provided by operating activities from continuing operations are primarily attributable to increases and decreases in our net income between periods and, to a lesser extent, due to fluctuations in working capital. The \$360 million increase in net cash provided by operating activities from continuing operations for the nine months ended September 30, 2014, from the comparable period in 2013, is primarily due to the \$271 million increase in our net income from continuing operations and due to the \$85 million increase in our deferred revenue balance from the prior year period. Our net income increased primarily due to the \$342 million in net income relating to NYSE during the nine months ended September 30, 2014. The NYSE annual listing fees were billed in January 2014 and are recognized as revenue during the fiscal year 2014. The deferred revenue increase is primarily relating to the NYSE billings for annual listing fees, net of the amount recognized in earnings through September 30, 2014, as well as \$23 million in cash received related to original listing fees and recorded as deferred revenue for the nine months ended September 30, 2014. See "- Consolidated Revenues" above.

Investing Activities

Consolidated net cash provided by (used in) investing activities from continuing operations for the nine months ended September 30, 2014 and 2013 primarily relates to the cash proceeds from the IPO and sale of Euronext and the sales of the NYSE Technologies businesses, cash paid for acquisitions, purchases of available-for-sale investments, increases in the restricted cash and investment balances and capital expenditures and capitalized software development costs.

We received net cash proceeds from the IPO and sale of Euronext shares and the sales of the NYSE Technologies businesses of \$2.2 billion for the nine months ended September 30, 2014. See "-Recent Developments" above. We paid cash for acquisitions, net of cash acquired, of \$150 million and \$49 million, respectively, for the nine months ended September 30, 2014 and 2013, primarily relating to the SMX and ICE Endex acquisitions.

We had \$1.3 billion of purchases of available-for-sale investments during the nine months ended September 30, 2014, of which €969 million (\$1.2 billion) represented euro-denominated term deposit investments at various banks with a maturity date of June 25, 2015 to cover the maturity of the NYSE EUR Notes on June 30, 2015. For regulatory purposes, we purchased short-term available-for-sale investments of \$37 million during the nine months ended September 30, 2013.

We had net increases in restricted cash and investments of \$105 million and \$69 million for the nine months ended September 30, 2014 and 2013, respectively. The restricted cash increase in 2014 primarily related to a contribution to the ICE Clear U.S. guaranty fund as of January 1, 2014 in connection with ICE Clear U.S.'s recognition as a third party QCCP, and increases in the regulatory capital of ICE Clear Europe and Liffe due to additional costs incurred at both of these companies due to growth of these businesses. The restricted cash increase in 2013 primarily relating to increases in the regulatory capital of ICE Futures Europe, ICE Clear Europe and ICE Futures U.S. due to adjustments to the regulatory capital calculations to no longer allow for certain deductions in the calculations of the six months of operating expenditures.

We had capital expenditures of \$105 million and \$76 million for the nine months ended September 30, 2014 and 2013, respectively, and we had capitalized software development expenditures of \$56 million and \$28 million for the nine months ended September 30, 2014 and 2013, respectively. The capital expenditures primarily relate to hardware purchases to continue the development and expansion of our electronic platforms and clearing houses and leasehold improvements associated with the new and renovated office space in Atlanta and New York. The capital expenditures in 2013 also relate to the building we purchased in Atlanta for \$39 million to serve as our Atlanta headquarters, with relocation from our existing leased building scheduled to be completed by November 2014.

Financing Activities

Consolidated net cash used in financing activities from continuing operations for the nine months ended September 30, 2014 primarily relates to \$768 million in net repayments of our debt facilities and commercial paper, \$448 million in repurchases of common stock, \$225 million in dividend and dividend equivalent payments to our shareholders, \$129 million in purchases of subsidiary shares from non-controlling interest and \$39 million in cash payments related to treasury shares received for restricted stock tax payments and stock options exercises.

Consolidated net cash used in financing activities for the nine months ended September 30, 2013 primarily relates to \$342 million in repayments under our debt facilities and \$24 million in cash payments related to treasury shares received for restricted stock tax payments and stock options exercises. See “- Debt” below for a discussion of the debt facilities and commercial paper.

Discontinued Operations

Consolidated net cash provided by (used in) operating activities, investing activities and financing activities from discontinued operating was \$51 million, (\$504 million) and \$339 million, respectively, for the nine months ended September 30, 2014. The \$504 million in net cash used in investing activities primarily relates to \$220 million of cash distributed from Euronext to us as part of the separation of Euronext from our remaining businesses and \$262 million in cash retained by Euronext and removed from our balance sheet in the de-consolidation. The \$339 million in net cash provided by financing activities relates to cash proceeds received from the issuance of debt by Euronext just prior to the IPO.

Debt

Our total debt, including short-term and long-term debt, consisted of the following as of September 30, 2014 and December 31, 2013 (in millions):

	As of September 30, 2014	As of December 31, 2013
Debt:		
Commercial Paper	\$690	\$1,080
NYSE EUR Notes (5.375% senior unsecured notes due June 30, 2015)	1,199	—
2011 Credit Facilities - Term Loan Facility	—	55
Short-term debt	1,889	1,135
2018 Senior Notes (2.5% senior unsecured notes due October 15, 2018)	600	599
2023 Senior Notes (4.0% senior unsecured notes due October 15, 2023)	794	794
NYSE EUR Notes (5.375% senior unsecured notes due June 30, 2015)	—	1,353
NYSE USD Notes (2.0% senior unsecured notes due October 5, 2017)	853	854
2011 Credit Facilities - Term Loan Facility	—	323
Long-term debt	2,247	3,923
Total debt	\$4,136	\$5,058

2014 Credit Facility

On April 3, 2014, we, as parent borrower, and our subsidiary ICE Europe Parent Limited, as subsidiary borrower, entered into a \$3.0 billion senior unsecured revolving credit facility, or the 2014 Credit Facility, pursuant to a credit agreement dated as of April 3, 2014 with Wells Fargo Bank, National Association, or Wells Fargo, as administrative agent, issuing lender and swing line lender, Bank of America, N.A., as syndication agent, and the lenders party thereto. The 2014 Credit Facility includes an option for us to propose an increase in the aggregate amount by up to \$1.0 billion, subject to the consent of the lenders funding the increase and certain other conditions.

The 2014 Credit Facility matures on April 3, 2019. Amounts borrowed under the 2014 Credit Facility may be prepaid at any time without premium or penalty. The 2014 Credit Facility provides for a \$3.0 billion multi-currency revolving facility, with sub-limits for non-dollar borrowings, swing line borrowings and letters of credit. No amounts were outstanding under the 2014 Credit Facility as of September 30, 2014. Of the \$3.0 billion that is available for borrowing under the 2014 Credit Facility, \$690 million is required to back-stop the amount outstanding under the Commercial Paper Program as of September 30, 2014 and \$303 million is reserved for our clearing houses, both as discussed below. The amount required to back stop the commercial paper program will fluctuate as we increase or decrease our commercial paper borrowings. The remaining \$2.0 billion as of September 30, 2014 is available to us to

use for working capital and general corporate purposes, and any portion of the revolving credit facility no longer necessary in the future to be reserved for the foregoing purposes will be available to us to use for working capital and general corporate purposes.

Borrowings under the 2014 Credit Facility will bear interest on the principal amount outstanding at either (a) LIBOR plus an applicable margin rate or (b) a “base rate” plus an applicable margin rate; provided, however, that all loans denominated in a foreign

currency will bear interest at LIBOR plus an applicable margin rate. The “base rate” equals the higher of (i) Wells Fargo’s prime rate, (ii) the federal funds rate plus 0.50%, or (iii) the one month LIBOR rate plus 1.00%. The applicable margin rate is based upon our public long term debt ratings and ranges from 0.875% to 1.50% on LIBOR borrowings and from 0.00% to 0.50% on base rate borrowings.

The 2014 Credit Facility includes an unutilized revolving credit commitment fee that is equal to the unused maximum revolver amount, multiplied by an applicable commitment fee rate and is payable in arrears on a quarterly basis. The applicable commitment fee rate ranges from 0.080% to 0.200% and is based on the Company's long-term debt rating. As of September 30, 2014, the applicable commitment fee rate was 0.125% based on our current long term debt ratings.

Of the amounts available under the 2014 Credit Facility: (i) \$150 million of such amounts has been reserved to provide liquidity or required financial resources for the clearing operations of ICE Clear Europe, (ii) \$100 million of such amounts has been reserved to provide liquidity or required financial resources for the clearing operations of ICE Clear Credit, (iii) \$50 million of such amounts has been reserved to provide liquidity or required financial resources for the clearing operations of ICE Clear U.S., and (iv) \$3 million of such amounts has been reserved to provide liquidity or required financial resources for the clearing operations of ICE Clear Canada. From time to time, we may agree to provide additional liquidity to our subsidiaries to meet regulatory capital requirements, general corporate purposes or short term liquidity needs.

The 2014 Credit Facility contains customary representations and warranties, covenants and events of default, including a leverage ratio, as well as limitations on liens on our assets, indebtedness of non-obligor subsidiaries, the sale of all or substantially all of our assets, and other matters.

Revolving Facility and Term Loan Facility (2011 Credit Facilities)

In November 2011, we entered into senior unsecured credit facilities in the aggregate amount of \$2.6 billion, or the 2011 Credit Facilities. The 2011 Credit Facilities consisted of (i) an aggregate \$500 million five-year senior unsecured term loan facility, or the Term Loan Facility, and (ii) an aggregate \$2.1 billion five-year senior unsecured multicurrency revolving credit facility, or the Revolving Facility. In connection with our entering into the 2014 Credit Facility on April 3, 2014, the 2011 Credit Facilities were terminated and the \$367 million outstanding under the Term Loan Facility (which had a stated interest rate of 2.0275%) was repaid through the issuance of new commercial paper, as discussed below. No amounts were outstanding under the Revolving Facility when it was terminated on April 3, 2014.

364 Day Facility

In July 2013, we entered into a \$600 million 364 day senior unsecured revolving credit facility, or the 364 Day Facility. The 364 Day Facility was available for working capital and general corporate purposes. In connection with our entering into the 2014 Credit Facility, the 364 Day Facility was terminated on April 3, 2014, at which time no amounts were outstanding under the 364 Day Facility.

Commercial Paper Program

In December 2013, we entered into a U.S. dollar commercial paper program, or the Commercial Paper Program. The Commercial Paper Program is currently backed by the borrowing capacity available under the 2014 Credit Facility, equal to the amount of the commercial paper that is issued and outstanding at any given point in time. The effective interest rate of commercial paper issuances does not materially differ from short term interest rates (such as USD LIBOR). The fluctuation of these rates due to market conditions may therefore impact the interest expense incurred by us.

Commercial paper notes of \$690 million with original maturities ranging from 1 to 59 days were outstanding as of September 30, 2014 under the Commercial Paper Program. As of September 30, 2014, the weighted average interest rate on the \$690 million outstanding under the Commercial Paper Program was 0.29% per annum, with a weighted average maturity of 19 days.

We used net proceeds from \$367 million in commercial paper issued under the Commercial Paper Program on April 1, 2014 to repay the \$367 million that was outstanding under the Term Loan Facility upon termination of the Term Loan Facility as discussed above. We also issued commercial paper during the three months ended September 30, 2014 and used the proceeds to repurchase our common stock. We repaid a portion of the amounts outstanding under the Commercial Paper Program during the nine months ended September 30, 2014 using a combination of the cash

proceeds received from the Euronext IPO and cash flows from operations. Subsequent to September 30, 2014, we used the net proceeds from \$350 million in commercial paper issued under the Commercial Paper Program on October 1, 2014 to fund the acquisition of SuperDerivatives, which closed on October 7, 2014. See "- Recent Developments" and "- Liquidity and Capital Resources" above.

Senior Notes and NYSE Notes

In October 2013, we issued \$600 million aggregate principal amount of 2.50% senior unsecured fixed rate notes due October 2018, or the 2018 Senior Notes, and \$800 million aggregate principal amount of 4.00% senior unsecured fixed rate notes due October 2023, or the 2023 Senior Notes, together with the 2018 Senior Notes, the Senior Notes. In connection with the acquisition of NYSE,

one of our subsidiaries assumed the outstanding NYSE debt instruments, which included \$850 million of 2.0% senior unsecured fixed rate notes due in October 2017, or the NYSE USD Notes, and €920 million (\$1.2 billion) of 5.375% senior unsecured fixed rate notes due in June 2015, or the NYSE EUR Notes, and together with the NYSE USD Notes, the NYSE Notes.

Upon closing of the Euronext IPO, we received €1.4 billion (\$1.9 billion) in net cash proceeds. We elected to set aside sufficient euro-denominated cash from the proceeds to effectively pre-fund the maturity of the NYSE EUR Notes and the related final interest coupon payment, both due on June 30, 2015. To accomplish this pre-funding, in July 2014 we placed €969 million (\$1.2 billion) of the cash proceeds from the Euronext IPO in term deposits at various banks with a maturity date of June 25, 2015 to cover the €920 million (\$1.2 billion) principal and the €49M (\$62 million) final interest coupon payment due on June 30, 2015. These deposits are recorded as short-term investments in our consolidated balance sheet as of September 30, 2014. The balance of the cash proceeds received in connection with the Euronext IPO were converted to U.S. dollars and used to repay outstanding commercial paper as discussed above.

Future Capital Requirements

Our future capital requirements will depend on many factors, including the rate of our trading and clearing volume growth, strategic plans and acquisitions, required technology and clearing initiatives, regulatory requirements, the timing and introduction of new products and enhancements to existing products, the geographic mix of our business, and the continuing market acceptance of our electronic trading and clearing platforms. We currently expect to make aggregate operational capital expenditures and to incur capitalized software development costs ranging between \$165 million and \$175 million for the year ended December 31, 2014, which we believe will support the enhancement of our technology and the continued expansion of our businesses. In addition, we currently expect between \$75 million to \$85 million in capital expenditures during 2014, on leasehold improvement expenditures, primarily associated with our headquarters in Atlanta and in New York.

Our board of directors has adopted a quarterly dividend declaration policy providing that the declaration of any dividends will be determined quarterly by the board or audit committee of the board of directors taking into account such factors as our evolving business model, prevailing business conditions and our financial results and capital requirements, without a predetermined annual net income payout ratio. During the nine months and three months ended September 30, 2014, we paid a quarterly dividend of \$1.95 per share and \$0.65 per share, respectively, of our common stock for an aggregate payout of \$225 million and \$74 million, respectively, which includes the payment of dividend equivalents. On November 4, 2014, we announced a \$0.65 per share dividend for the fourth quarter of 2014 with the dividend payable on December 31, 2014 to shareholders of record as of December 16, 2014 (the ex-dividend date will be December 12, 2014).

As of September 30, 2014, we had \$4.1 billion in outstanding debt. See “- Debt” above. We currently have \$3.0 billion available for borrowing under our 2014 Credit Facility. The Commercial Paper Program is backed by the borrowing capacity available under the 2014 Credit Facility, with the amount under the 2014 Credit Facility reserved equal to the amount of the commercial paper that is issued and outstanding. After factoring in the \$690 million currently required to backstop the Commercial Paper Program and the \$303 million reserved for our clearing houses as discussed above, \$2.0 billion of our 2014 Credit Facility is currently available for general corporate purposes.

The 2014 Credit Facility and the Commercial Paper Program are currently the only significant agreements or arrangements that we have with third parties for liquidity and capital resources. In the event of any strategic acquisitions, mergers or investments, or if we are required to raise capital for any reason or desire to return capital to our stockholders, we may incur additional debt, issue additional equity to raise the necessary funds, repurchase additional shares of our common stock or pay a dividend. However, we cannot provide assurance that such financing or transactions will be available or successful, or that the terms of such financing or transactions will be favorable to us. We have used and intend to use the cash proceeds from the Euronext IPO to repay debt. We expect to use the net cash proceeds from the sales of NYFIX, Metabit and Wombat to invest in growth initiatives, pursue strategic investments, return capital to shareholders via dividends and share repurchases and repay debt. See “- Recent Developments” above.

Prior to our acquisition, NYSE completed the sale of a significant equity interest in NYSE Amex Options, one of its two U.S. options exchanges, to seven external investors. Under the terms of the sale, the external investors have the option to require us to repurchase a portion of its equity interest on an annual basis over the course of five years,

which began in 2011. Since the likelihood of us acquiring the non-controlling interest in the future is probable, the full redemption fair value has been recorded as mezzanine equity and classified the related balance as “redeemable non-controlling interest” in our consolidated balance sheet. We currently own 84% of NYSE Amex Options and the remaining 16% of the outstanding shares of NYSE Amex Options, currently valued at \$126 million, can be put back to us by the external investors in 2015 and these shares are recorded as redeemable non-controlling interest as of September 30, 2014.

When EMIR becomes effective, which is currently anticipated at the end of the fourth quarter of 2014, the Bank of England's capital requirements for ICE Clear Europe will be superseded by the EMIR capital requirements. We expect to be required to increase our liquid regulatory capital requirements under EMIR by \$136 million. This increase will be satisfied by additional restricted cash and we expect to fund the increase with cash on hand.

Non-U.S. GAAP Financial Measures

We use non-U.S. GAAP measures internally to evaluate our performance and in making financial and operational decisions. When viewed in conjunction with our U.S. GAAP results and the accompanying reconciliation, we believe that our presentation of these measures provides investors with greater transparency and a greater understanding of factors affecting our financial condition and results of operations than U.S. GAAP measures alone. In addition, we believe the presentation of these measures is useful to investors for period-to-period comparison of results because the items described below are not reflective of our core business performance. These financial measures are not in accordance with, or an alternative to, U.S. GAAP financial measures and may be different from non-U.S. GAAP measures used by other companies. We use these adjusted results because we believe they more clearly highlight trends in our business that may not otherwise be apparent when relying solely on U.S. GAAP financial measures, since these measures eliminate from our results specific financial items that have less bearing on our core operating performance. We strongly recommend that investors review the U.S. GAAP financial measures included in this Quarterly Report on Form 10-Q, including our consolidated financial statements and the notes thereto.

Adjusted total operating expenses, adjusted operating income, adjusted operating margin, adjusted income from continuing operations, adjusted net income attributable to ICE and adjusted earnings per share for the periods presented below are calculated by adding to them or subtracting from them the adjustments described below, which are not reflective of our core business performance, and their related income tax effect (in millions, except per share amounts):

Edgar Filing: Intercontinental Exchange, Inc. - Form 10-Q

	Nine Months Ended September 30,		Three Months Ended September 30,		
	2014	2013	2014	2013

Adjusted diluted earnings per share	\$6.62	\$6.19	\$2.06	\$1.97
Diluted weighted average common shares outstanding	115	73	114	74

We include acquisition-related transaction costs as part of our core business expenses, except for those that are directly related to the announcement, closing, financing or termination of a transaction. However, we are including all of the acquisition-related transaction and integration costs relating to our acquisition of NYSE as non-U.S. GAAP adjustments given the size of the acquisition. During the nine and three months ended September 30, 2014 and 2013, in addition to the NYSE acquisition-related transaction and integration costs, we also include as adjustments the banker success fees relating to the acquisition of SMX during the nine months ended September 30, 2014 and ICE Endex during the nine months ended September 30, 2013, and duplicate rent expenses and lease

termination costs we incurred as we consolidated multiple New York office locations during the nine months ended September 30, 2013. For additional information on these items, see “- Operating Expenses” above.

Contractual Obligations and Commercial Commitments

Following the IPO and de-consolidation of Euronext in June 2014, we have \$55 million in reduced annual operating lease obligations as of September 30, 2014 as these lease obligations went with Euronext. Also, as of September 30, 2014, we have \$4.6 billion in short-term and long-term debt and interest obligations, compared to \$5.6 billion as of December 31, 2013, with the decrease primarily relating to the termination and payoff of the amount outstanding under the Revolving Facility and a reduction of the amount outstanding under the Commercial Paper Program primarily through repayments with a portion of the cash proceeds from the Euronext IPO. See “- Debt” below. Other than these two items, as of September 30, 2014, there were no significant changes to our contractual obligations and commercial commitments from those disclosed in the section “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in our 2013 Form 10-K.

Off-Balance Sheet Arrangements

We do not have any relationships with unconsolidated entities or financial partnerships, often referred to as structured finance or special purpose entities, which have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes.

New and Recently Adopted Accounting Pronouncements

Refer to note 2 to our consolidated financial statements and related notes, which are included elsewhere in this Quarterly Report on Form 10-Q, for information on the new and recently adopted accounting pronouncements that are applicable to us.

Critical Accounting Policies and Estimates

In the third quarter of 2014, there were no significant changes to our critical accounting policies and estimates from those disclosed in the section “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in our 2013 Form 10-K.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

As a result of our operating and financing activities, we are exposed to market risks such as interest rate risk, foreign currency exchange rate risk and credit risk. We have implemented policies and procedures designed to measure, manage, monitor and report risk exposures, which are regularly reviewed by the appropriate management and supervisory bodies.

Interest Rate Risk

We have exposure to market risk for changes in interest rates relating to our cash and cash equivalents, short-term and long-term investments, short-term and long-term restricted cash and investments, and indebtedness. As of September 30, 2014 and December 31, 2013, our cash and cash equivalents, short-term and long-term investments and short-term and long-term restricted cash and investments were \$2.9 billion and \$1.8 billion, respectively, of which \$1.9 billion and \$819 million, respectively, were denominated in Brazilian reais, pounds sterling, euros or Canadian dollars. Of the \$1.9 billion as of September 30, 2014, €969 million (\$1.2 billion) represents euro-denominated cash that was placed in term deposits at various banks with a maturity date of June 25, 2015 to cover the maturity of the NYSE EURO Notes on June 30, 2015. See Item 2 “Management’s Discussion and Analysis of Financial Condition and Results of Operations - Debt” included elsewhere in this Quarterly Report on Form 10-Q. Our investment in Cetip, which is recorded as an available-for-sale, long-term investment and was recorded in and is held in Brazilian reais, was valued at \$393 million as of September 30, 2014, including an unrealized gain of \$68 million. Our investment in Euronext, which is recorded as an available-for-sale, long-term investment and was recorded in and is held in euros, was valued at \$103 million as of September 30, 2014, including an unrealized loss of \$11 million. Changes in the fair value of the Cetip and Euronext investments are reflected in accumulated other comprehensive income and do not impact earnings, except to the extent that unrealized losses are deemed to be other than temporary. The remaining investments are denominated in U.S. dollars. We do not use our investment portfolio for trading or other speculative purposes. A hypothetical decrease in long-term interest rates to zero basis points would decrease annual pre-tax earnings by \$3 million as of September 30, 2014, assuming no change in the amount or composition of our cash and cash equivalents,

short-term and long-term investments and short-term and long-term restricted cash and investments.

As of September 30, 2014, we had \$4.1 billion in outstanding debt, of which \$1.4 billion relates to the Senior Notes and \$2.1 billion relates to the NYSE Notes, both of which bear interest at fixed interest rates. The remaining amount outstanding of \$690 million relates to the Commercial Paper Program, which bears interest at fluctuating rates and, therefore, subjects us to interest rate risk. A hypothetical 100 basis point increase in long-term interest rates relating to the amounts outstanding under the Commercial Paper Program as of September 30, 2014 would decrease annual pre-tax earnings by \$7 million, assuming no change in the volume or

composition of our outstanding indebtedness and no hedging activity. The interest rates on our Commercial Paper Program are currently reset on a daily, weekly or monthly basis. See Item 2 “Management’s Discussion and Analysis of Financial Condition and Results of Operations - Debt” included elsewhere in this Quarterly Report on Form 10-Q.

Foreign Currency Exchange Rate Risk

As an international business, we are subject to foreign currency exchange rate risk. We may experience gains or losses from foreign currency transactions in the future given that a significant part of our assets, liabilities, revenues and expenses are recorded in euros or pounds sterling. Certain assets, liabilities, revenues and expenses of foreign subsidiaries are denominated in the local functional currency of such subsidiaries.

Our exposure to foreign denominated earnings for the nine and three months ended September 30, 2014 is presented by primary foreign currency in the following table (in millions, except average exchange rates and percentages):

	Nine Months Ended September 30, 2014		Three Months Ended September 30, 2014		
	Euro	Pound Sterling	Euro	Pound Sterling	
Average exchange rate to the U.S. dollar in the current year periods	\$ 1.3567	\$ 1.6694	\$ 1.3276	\$ 1.6712	
Average exchange rate to the U.S. dollar in the same periods one year before	\$ 1.3176	\$ 1.5466	\$ 1.3242	\$ 1.5492	
Foreign denominated percentage of:					
Revenues, less transaction-based expenses	5	% 15	% 4	% 15	%
Operating expenses	1	% 14	% 1	% 12	%
Operating income	9	% 17	% 8	% 19	%
Impact of the currency fluctuations ⁽¹⁾ on:					
Revenues, less transaction-based expenses	\$ 3	\$ 26	\$ —	\$ 8	
Operating expenses	\$ —	\$ 13	\$ —	\$ 3	
Operating income	\$ 3	\$ 13	\$ —	\$ 5	

⁽¹⁾ Represents the impact of currency fluctuation for the nine and three months ended September 30, 2014 compared to the same periods in the prior year.

NYSE, which we acquired in November 2013, has a significant part of its assets, liabilities, revenues and expenses recorded in euros or pounds sterling. For the nine and three months ended September 30, 2014, 20% and 19% of our consolidated revenues, less transaction-based expenses, were denominated in euros or pounds sterling, respectively, and 15% and 13% of our consolidated expenses were denominated in euros or pounds sterling, respectively. These percentages do not include the Euronext revenues and expenses, as they are included in discontinued operations. As the euro or pound sterling exchange rate changes, the U.S. equivalent of revenues and expenses denominated in foreign currencies changes accordingly.

We have foreign currency transaction risk related to the settlement of foreign currency denominated assets, liabilities and payables that occur through our operations, which are received in or paid in pounds sterling or euros, due to the increase or decrease in the foreign currency exchange rates between periods. We had foreign currency transaction losses of \$2 million and \$3 million for the nine months ended September 30, 2014 and 2013, respectively, and \$2 million and \$1 million for the three months ended September 30, 2014 and 2013, respectively, primarily attributable to the fluctuations of the pound sterling and euro relative to the U.S. dollar, which strengthened. A 10% adverse change in the underlying foreign currency exchange rates as of September 30, 2014 would result in a foreign currency transaction loss of \$11 million, assuming no change in the composition of the foreign currency denominated assets, liabilities and payables and assuming no hedging activity.

We entered into foreign currency hedging transactions during the nine months and three months ended September 30, 2014 and 2013 as economic hedges to hedge a portion of our foreign currency transaction exposure and may enter into additional hedging transactions in the future to help mitigate our foreign exchange risk exposure.

We have foreign currency translation risk equal to our net investment in our foreign subsidiaries. The financial statements of these subsidiaries are translated into U.S. dollars using a current rate of exchange, with gains or losses

included in the cumulative translation adjustment account, a component of equity. Our exposure to the net investment in foreign currencies is presented by primary foreign currencies in the table below (in millions):

55

	As of September 30, 2014	
	Position in euros	Position in pounds sterling
Assets	€1,527	£4,323
of which goodwill represents	349	1,404
Liabilities	1,015	541
of which borrowings represent	962	—
Net currency position before hedging activities	€512	£3,782
Impact of hedging activities	24	—
Net currency position	€536	£3,782
Impact on consolidated equity of a 10% decrease in foreign currency exchange rates	\$68	\$614

As of September 30, 2014, we had €24 million (\$30 million) of euro/U.S. dollar foreign exchange hedging contracts outstanding. These contracts matured in October 2014 and had no fair value as of September 30, 2014. The NYSE EUR Notes of €920 million (\$1.2 billion) no longer constitute a partial hedge of NYSE's net euro investment in foreign entities following the IPO of Euronext. The transaction gain or loss from the revaluation of the NYSE EUR Notes on the U.S. dollar balance sheet of NYSE Holdings LLC will be offset by the transaction gain or loss from the cash held in euros to repay the notes upon their maturity in June 2015, as discussed above.

As of September 30, 2014 and December 31, 2013, the portion of our equity attributable to accumulated other comprehensive income from foreign currency translation was \$183 million and \$377 million, respectively. As of September 30, 2014, we had net exposure of euro and pounds sterling of €536 million (\$680 million) and £3.8 billion (\$6.1 billion), respectively. Based on these September 30, 2014 net currency positions, a hypothetical 10% decrease of euro against U.S. dollar would negatively impact our equity by \$68 million and a hypothetical 10% decrease of pound sterling against U.S. dollar would negatively impact our equity by \$614 million. For the nine months ended September 30, 2014, currency exchange rate differences had a negative impact of \$194 million on our consolidated equity.

Credit Risk

We are exposed to credit risk in our operations in the event of a counterparty default. We limit our exposure to credit risk by rigorously selecting the counterparties with which we make our investments and execute agreements. Credit risk is monitored by using exposure limits depending on ratings assigned by rating agencies as well as the nature and maturity of transactions. Our investment objective is to invest in securities that preserve principal while maximizing yields, without significantly increasing risk. We seek to substantially mitigate credit risk associated with investments by ensuring that these financial assets are placed with governments, well-capitalized financial institutions and other creditworthy counterparties.

An ongoing review is performed to evaluate changes in the status of counterparties. In addition to the intrinsic creditworthiness of counterparties, our policies require diversification of counterparties (banks, financial institutions, bond issuers and funds) so as to avoid a concentration of risk.

Our clearing houses hold material amounts of clearing member cash deposits which are invested primarily to provide security of capital, but also which may generate interest income for our clearing members. Refer to note 9 to our consolidated financial statements and related notes, which are included elsewhere in this Quarterly Report on Form 10-Q, for more information on the clearing houses cash deposits, which were \$46.5 billion as of September 30, 2014. For a summary of the risks associated with this investment activity and how these risks are mitigated, see Part II, Item 7(A) "Quantitative and Qualitative Disclosures About Market Risk" of our Annual Report on Form 10-K for the fiscal year ended December 31, 2013.

Impact of Inflation

We have not been adversely affected by inflation as technological advances and competition have generally caused prices for the hardware and software that we use for our electronic platforms to remain constant or to decline. In the event of inflation, we believe that we will be able to pass on any price increases to our participants, as the prices that we charge are not governed by long-term contracts.

ITEM 4. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures. As of the end of the period covered by this report, an evaluation was carried out by our management, with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based upon that

56

evaluation, our Chief Executive Officer and Chief Financial Officer concluded that these disclosure controls and procedures were effective as of the end of the period covered by this report.

During the quarter ended December 31, 2013, we acquired NYSE and are in the process of integrating the acquired business into our overall internal control over financial reporting process. As a result, we are excluding the acquired NYSE business from the assessment of internal control over financial reporting in accordance with the SEC's general guidance that an assessment of a recently acquired business may be omitted from our scope for 12 months following the acquisition.

(b) Changes in Internal Controls over Financial Reporting. There were no changes in our internal controls over financial reporting that occurred during our most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting. As a result, no corrective actions were taken.

PART II. Other Information

ITEM 1. LEGAL PROCEEDINGS

We are subject to legal proceedings and claims, like the ones described below, that arise in the ordinary course of business. Typically, we do not believe that the resolution of these ordinary course matters, including those described below, will have a material adverse effect on our consolidated financial condition, results of operations, or liquidity. It is possible, however, that future results of operations for any particular quarterly or annual period could be materially and adversely affected by any developments relating to the legal proceedings and claims.

In April 2014, the first of four purported class action lawsuits was filed in the U.S. District Court for the Southern District of New York (the "Southern District") by the City of Providence, Rhode Island, against more than 40 defendants, including "Exchange Defendants", "Brokerage Defendants" and "HFT (High Frequency Trading) Defendants" (the "City of Providence lawsuit"). New York Stock Exchange LLC and NYSE Arca, Inc., two of our subsidiaries, were among the named Exchange Defendants. On July 2, 2014, the court ordered the cases consolidated for all purposes, and appointed lead plaintiffs. On September 3, 2014, the lead plaintiffs filed an amended complaint asserting claims against only a subset of the original Exchange Defendants, including New York Stock Exchange LLC and NYSE Arca, Inc., and also asserting claims against Barclays PLC ("Barclays"), a subsidiary of which operates an alternative trading system known as Barclays LX. The lead plaintiffs are suing on behalf of a class of "all public investors" who bought or sold stock from April 18, 2009 to the present on the U.S.-based equity exchanges operated by the remaining Exchange Defendants or on Barclays LX. The amended complaint asserts violations by all remaining Exchange Defendants of Sections 10(b) and 6(b) of the Securities Exchange Act of 1934, and seeks unspecified compensatory damages against all defendants, jointly and severally, as well as various forms of equitable relief. The defendants filed a motion on November 3, 2014 to dismiss the amended complaint.

On October 2, 2014, Barclays filed a motion before the United States Judicial Panel on Multidistrict Litigation requesting that a separate lawsuit filed against Barclays in the U.S. District Court for the Central District of California be transferred to the Southern District judge handling the City of Providence lawsuit for consolidated or coordinated pre-trial proceedings. The transfer motion and the motion to dismiss remain pending and depending on the Panel's ruling on the transfer motion, the scope of this litigation could be expanded.

In May 2014, three purported class action lawsuits were filed in the Southern District by Harold Lanier against the securities exchanges that are participants in each of the three national market system data distribution plans - the Consolidated Tape Association/Consolidated Quotation Plan, the Nasdaq UTP Plan, and the Options Price Reporting Authority (the "Plans") - which are established under the Securities Exchange Act of 1934 and regulated by the SEC. On August 15, 2014, Lanier filed amended complaints in each of the three lawsuits but did not alter the named defendants. New York Stock Exchange LLC, NYSE Arca, Inc. and NYSE MKT LLC, which are our subsidiaries, are among the defendants named in one or more of the suits. Lanier is claiming to sue on behalf of himself and all other similarly situated subscribers to the market data disseminated by the Plans. Lanier's allegations include that the exchange participants in the Plans breached agreements with subscribers by disseminating market data in a discriminatory manner in that other "preferred" customers allegedly received their data faster than the proposed class. The complaints seek, among other relief, unspecified compensatory damages, restitution of the putative class's subscription fees paid to the defendants, disgorgement of the fees paid by the so-called preferred customers, and

injunctive and declaratory relief. On September 29, 2014, the defendants moved to dismiss the amended complaint, and the motion remains pending. A range of possible loss related to the cases above cannot be reasonably estimated at this time.

One of our subsidiaries, NYSE Brazil Holdings, B.V. ("NYSE BV"), is a party to a pending arbitration proceeding initiated by an arbitration demand dated June 4, 2014 in Brazil, filed by ATG Americas Trading Group, S.A. ("ATG") and ATS Brasil S.A. ("ATS"). NYSE BV and ATG own 20% and 80%, respectively, of the equity in ATS, a company with a prospective cash equity trading platform in Brazil, which is not yet operational. ATG and ATS allege NYSE BV breached certain obligations and assert damages of at least 100 million Brazilian Reais (\$41 million based on the Brazilian Real/U.S. dollar exchange rate of 0.4100 as of September 30,

2014). NYSE BV has served ATG and ATS with a responsive statement which denies liability in connection with the claims, and we are defending the proceeding.

ITEM 1(A). RISK FACTORS

In the third quarter of 2014, there were no significant new risk factors from those disclosed in Part 1, Item 1A, “Risk Factors” in our 2013 Form 10-K. In addition to the other information set forth in this Quarterly Report, including the Regulatory Update Section of Item 2 - Management's Discussion and Analysis of Financial Condition and Results of Operations, you should carefully consider the factors discussed under “Risk Factors” in our 2013 Form 10-K. These risks could materially and adversely affect our business, financial condition and results of operations. The risks and uncertainties in our Form 10-K are not the only ones facing us. Additional risks and uncertainties not presently known to us or that we currently believe to be immaterial may also adversely affect our business.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Stock Repurchases

The table below sets forth the information with respect to purchases made by or on behalf of Intercontinental Exchange, Inc. or any “affiliated purchaser” (as defined in Rule 10b-18(a)(3) under the Securities Exchange Act of 1934) of our common stock during the three months ended September 30, 2014.

Period (2014)	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs(1)	Approximate dollar value of shares that may yet be purchased under the plans or programs (in millions)(1)
July 1 - July 31	1,793,484	\$195.13	1,793,484	\$700
August 1 - August 31	—	—	1,793,484	700
September 1 - September 30	523,200	188.56	2,316,684	601
Total	2,316,684	193.64	2,613,684	601

In March 2014, we entered into a Rule 10b5-1 trading plan under the Securities Exchange Act of 1934 permitting open market repurchases of our common stock based on certain triggers described in the trading plan. During the three months ended September 30, 2014, we repurchased 2.3 million shares of our common stock on the open market or through the Rule 10b5-1 trading plan at an aggregate cost of \$448 million through cash on hand and the issuance of commercial paper. In July 2014, our board of directors approved an additional \$600 million under our share repurchase authorization, which brought the total authorization after the July purchases to \$700 million. As of September 30, 2014, the remaining authorization permits repurchases of up to \$601 million of our common (1) stock with no fixed expiration date. In September 2014, we entered into a new Rule 10b5-1 trading plan and we expect to fund remaining share repurchases with a combination of cash on hand, future cash flows and by borrowing under our existing credit facilities and our commercial paper program. The timing and extent of any future repurchases that are not pursuant to the Rule 10b5-1 trading plan adopted in September 2014 are at the discretion of our management and will depend upon market conditions, amount authorized by our board of directors, our stock price, our target debt ratio and corporate debt rating, and our strategic growth initiatives at that time. The stock repurchases may be discontinued at any time or we may enter into a new Rule 10b5-1 trading plan. Our board of directors may increase or decrease the amount of capacity we have for repurchases from time to time.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

ITEM 5. OTHER INFORMATION
