PART I

ITEM 1: BUSINESS

(dollars in thousands)

GENERAL

Diebold, Incorporated (collectively with its subsidiaries, the Company) was incorporated under the laws of the state of Ohio in August 1876, succeeding a proprietorship established in 1859.

The Company is a global leader in providing financial self-service (FSS) delivery, integrated services and software, and security systems to primarily the financial, commercial, retail and other markets. Founded in 1859, the Company currently has approximately 16,000 employees with business in more than 90 countries worldwide. The Company unveiled its multi-year turnaround strategy, Diebold 2.0, at the Investment Community Conference in November 2013. The objective of Diebold 2.0 is to transform the Company into a world-class, services-led and software enabled company, supported by innovative hardware, that automates the way people connect with their money. The turnaround strategy will follow a “Crawl, Walk, Run” approach, which includes stabilizing the core business operations in the “Crawl” phase and building the foundation for future growth in the “Walk” and “Run” phases. The company is nearing the completion of the “Crawl” phase and expects to transition to “Walk” in the second half of 2015. Four core pillars provide the Company a clear path toward reaching this multi-year objective:

• Reduce its cost structure and improve its near-term delivery and execution.

• Generate increased free cash flow in order to fund the investments necessary to drive profitable growth, while preserving the ability to return value to shareholders in the form of reliable dividends and, as appropriate, share repurchases.

• Attract and retain the talent necessary to drive innovation and the focused execution of the transformation strategy.

• Return the Company to a sustainable, profitable growth trajectory.

The Company sees opportunities to leverage its capabilities in services, software and innovation to meet the needs of its rapidly evolving markets. The Company has sharpened its focus on executing its core strategies in FSS and electronic security. This includes making the appropriate investments to deliver growth within these areas, especially in research, development and engineering. In addition, the Company remains committed to a disciplined risk assessment process, focused on proactively identifying and mitigating potential risks to the Company's continued success.

SERVICE AND PRODUCT SOLUTIONS

The Company has two core lines of business: FSS and Security Solutions, which the Company integrates based on its customers' needs. Financial information for the service and product solutions can be found in note 20 to the consolidated financial statements, which is contained in Item 8 of this annual report on Form 10-K.

Financial Self-Service

One popular example of a self-service solution is the automated teller machine (ATM). The Company offers an integrated line of self-service technologies and services, including comprehensive ATM outsourcing, ATM security, deposit automation, recycling and payment terminals and software. The Company also offers advanced functionality terminals capable of supporting two-way video technology to support bank branch automation. The Company is a leading global supplier of ATMs and related services and holds the leading market position in many countries around the world.

Self-Service Support and Managed Services

From analysis and consulting to monitoring and repair, the Company provides value and support to its customers every step of the way. Services include installation and ongoing maintenance of our products, OpteView® remote services, availability management, branch automation and distribution channel consulting. Additionally, service

revenue includes services and parts the Company provides on a billed-work basis that are not covered by warranty or service contract. The Company also provides outsourced and managed services including remote monitoring, troubleshooting for self-service customers, transaction processing, currency management, maintenance services and full support via person-to-person or online communication.

Self-Service Products

The Company offers a wide variety of self-service solutions. Self-service products include a full range of teller automation terminals as well as ATMs capable of cash dispensing and a number of more advanced functionalities, including check and cash deposit automation, recycling and two-way video.

Table of Contents

Self-Service Software

The Company offers software solutions consisting of multiple applications that process events and transactions. These solutions are delivered on the appropriate platform, allowing the Company to meet customer requirements while adding new functionality in a cost-effective manner.

Security Solutions

From the safes and vaults that the Company first manufactured in 1859 to the full range of electronic security offerings it provides today, the Company's integrated security solutions utilize advanced products and an extensive services portfolio for its customers' unique needs. The Company provides its customers with the latest technological advances to better protect their assets, improve their workflow and increase their return on investment. The Company also provides internet banking, online payment and mobile banking security solutions aimed at preventing various types of fraud, such as phishing, pharming, and key logging. All of these solutions are backed with experienced sales, installation and service teams. The Company is a leader in providing physical and electronic security systems as well as assisted transactions, providing total security systems solutions to financial, commercial, retail, and other markets.

Electronic Security Products

The Company provides a broad range of electronic security products including camera and video surveillance equipment, alarms, access control systems and biometric technologies.

Monitoring and Services

The Company provides security monitoring solutions, including remote monitoring and diagnostics, fire detection, intrusion protection, managed access control, energy management, remote video management and storage, logical security and web-based solutions like SecureStat®.

Physical Security and Facility Products

The Company provides security solutions, facility products, pneumatic tube systems for drive-up lanes, vaults, safes, depositories, bullet-resistive items and undercounter equipment.

Managed Services

The Company provides end-to-end managed services, which includes outsourcing solutions, with a single point of contact to help customers maximize their self-service channel by incorporating new technology, meeting compliance and regulatory mandates, protecting their institutions and reducing costs, all while ensuring a high level of service for their customers. Each unique solution may include hardware, services, software or a combination of these components. The Company provides value to its customers by offering a comprehensive array of hardware-agnostic managed services and support. The Company's service organization provides strategic analysis and planning of new systems, systems integration, architectural engineering, consulting and project management that encompass all facets of a successful FSS implementation. The Company also provides design, installation, maintenance and monitoring of electronic security systems to financial, commercial, retail and other customers.

Brazil Other

The Company offers election, lottery and information technology solutions to the government in Brazil. The Company provides elections and lottery equipment, personal computer equipment, networking, tabulation and diagnostic software development, training, support and maintenance.

OPERATIONS

The principal raw materials used by the Company in its manufacturing operations are steel, plastics, and electronic parts and components, which are purchased from various major suppliers. These materials and components are generally available in ample quantities.

The Company's operating results and the amount and timing of revenue are affected by numerous factors including production schedules, customer priorities, sales volume and sales mix. During the past several years, the Company has changed the focus of its self-service business to that of a total solutions provider.

The Company carries working capital mainly related to trade receivables and inventories. Inventories generally are only manufactured or purchased as orders are received from customers. The Company's normal and customary payment terms generally range from 30 to 90 days from date of invoice. The Company generally does not offer extended payment terms. The Company also provides financing arrangements to customers that are largely classified and accounted for as sales-type leases. As of December 31, 2014, the Company's net investment in finance lease receivables was \$158,302.

Table of Contents

SEGMENTS AND FINANCIAL INFORMATION ABOUT GEOGRAPHIC AREAS

The Company's operations are comprised of five geographic segments: North America (NA), Asia Pacific (AP), Europe, Middle East and Africa (EMEA), Latin America (LA) and Brazil. The five geographic segments sell and service FSS and security systems around the globe, as well as elections, lottery and information technology solutions in Brazil, through wholly-owned subsidiaries, joint ventures and independent distributors in most major countries.

Sales to customers outside the United States in relation to total consolidated net sales were \$1,712,723 or 56.1 percent in 2014, \$1,493,386 or 52.3 percent in 2013 and \$1,458,019 or 48.7 percent in 2012.

Property, plant and equipment, at cost, located in the United States totaled \$445,683, \$413,315 and \$468,575 as of December 31, 2014, 2013 and 2012, respectively, and property, plant and equipment, at cost, located outside the United States totaled \$167,211, \$185,779 and \$193,335 as of December 31, 2014, 2013 and 2012, respectively.

In January 2015, the Company announced the realignment of its Brazil and LA businesses to drive greater efficiency and further improve customer service. Beginning with the first quarter of 2015, the Company will report combined results from its LA and Brazil operations under one single reportable operating segment and reclassify comparative periods for consistency.

Additional financial information regarding the Company's international operations is included in note 20 to the consolidated financial statements, which is contained in Item 8 of this annual report on Form 10-K. The Company's non-U.S. operations are subject to normal international business risks not generally applicable to domestic business. These risks include currency fluctuation, new and different legal and regulatory requirements in local jurisdictions, political and economic changes and disruptions, tariffs or other barriers, potentially adverse tax consequences and difficulties in staffing and managing foreign operations.

PRODUCT BACKLOG

The Company's product backlog was approximately \$704,259 and \$725,811 as of December 31, 2014 and 2013, respectively. The backlog includes orders estimated or projected to be shipped or installed within 12 months. Although the Company believes the orders included in the backlog are firm, some orders may be canceled by customers without penalty, and the Company may elect to permit cancellation of orders without penalty where management believes it is in the Company's best interests to do so. Historically, the Company has not experienced significant cancellations within its product backlog. Additionally, over 50 percent of the Company's revenues are derived from its service business, for which backlog information is not measured. Therefore, the Company does not believe that its product backlog, as of any particular date, is necessarily indicative of revenues for any future period.

COMPETITION

As described in more detail below, the Company participates in many highly competitive high tech businesses in the hardware, software and services space, with a mixture of local, regional and/or global competitors in our markets. In addition, the competitive environment for these types of solutions is evolving as the Company's customers are transforming their businesses utilizing innovative technology. Therefore, the Company's product and service solutions must also provide cutting-edge capabilities to meet the customers emerging needs and compete with new innovators. The Company distinguishes itself by providing unique value with a wide range of innovative solutions to meet customers' needs.

The Company believes, based upon outside independent industry surveys, that it is a leading service provider for and manufacturer of FSS systems in the United States and internationally. The Company maintains a global service infrastructure that allows it to provide unparalleled services and support to satisfy its customers' needs. Many of the Company's customers are beginning to transform their branches, or are planning to do so, to improve the customer experience through the utilization of mobile solutions and other client-facing technologies. As the trend towards

branch automation continues to build more momentum, the traditional lines of “behind the counter” and “in front of the counter” are starting to blur, which is allowing for more entrants into the market. As customer requirements evolve, separate markets will converge to fulfill new customer demand. The Company expects that this will increase the complexity and competitive nature of the business.

The Company’s competitors in the FSS market segment include global and multi-regional manufacturers and service providers of FSS systems, such as Nautilus Hyosung, NCR, Wincor-Nixdorf, GRG Banking Equipment, Glory Global Solutions, Oki Data and Triton Systems to a number of primarily local and regional manufacturers and service providers including, but not limited to, Fujitsu and Hitachi-Omron in AP; Hantle/GenMega in NA; KEBA in EMEA; and Perto in LA. In addition, the Company faces competition in many markets from numerous independent ATM deployers.

Table of Contents

In the self-service software market, the Company, in addition to the key hardware players highlighted above, competes with several smaller, niche software companies like KAL and Phoenix Interactive. In the managed services and outsourcing solutions market, apart from its traditional FSS competitors, the Company competes with a number of large technology competitors such as Fiserv, IBM and HP.

In the security service and product markets, the Company competes with national, regional and local security companies. Of these competitors, some compete in only one or two product lines, while others sell a broad spectrum of security services and products. The unavailability of comparative sales information and the large variety of individual services and products make it difficult to give reasonable estimates of the Company's competitive ranking in or share of the security market within the financial services, commercial, retail and government sectors. However, the Company is a very well positioned security service and solution provider to global, national, regional and local financial, commercial and industrial customers. The Company also has a strong position in NA and in global markets as a premier security service provider that offers a full portfolio of security monitoring and managed services, as well as a full spectrum of systems integration and enterprise level capabilities.

The Company provides elections systems, product solutions and support to the Brazilian government. Competition in this market segment is based upon technology pre-qualification demonstrations to the Brazilian government.

RESEARCH, DEVELOPMENT AND ENGINEERING

Customer demand for FSS and security technologies is growing. In order to meet this demand, the Company is focused on delivering innovation to its customers by continuing to invest in technology solutions that enable customers to reduce costs and improve efficiency. Expenditures for research, development and engineering initiatives were \$93,617, \$92,315 and \$85,881 in 2014, 2013 and 2012, respectively. Over the past twelve months, the Company announced a number of new innovative solutions, such as the responsive banking concept, the ActivEdge™ secure card reader and the world's greenest ATM, as well as launched a new ATM product platform.

PATENTS, TRADEMARKS, LICENSES

The Company owns patents, trademarks and licenses relating to certain products in the United States and internationally. While the Company regards these as items of importance, it does not deem its business as a whole, or any industry segment, to be materially dependent upon any one item or group of items.

ENVIRONMENTAL

Compliance with federal, state and local environmental protection laws during 2014 had no material effect upon the Company's business, financial condition or results of operations.

EMPLOYEES

At December 31, 2014, the Company employed approximately 16,000 associates globally. The Company's service staff is one of the financial industry's largest, with professionals in more than 600 locations and businesses in more than 90 countries worldwide.

EXECUTIVE OFFICERS

Refer to Part III, Item 10 of this annual report on Form 10-K for information on the Company's executive officers, which is incorporated herein by reference.

AVAILABLE INFORMATION

The Company uses its Investor Relations web site, www.diebold.com/investors, as a channel for routine distribution of important information, including stock information, news releases, investor presentations and financial information. The Company posts filings as soon as reasonably practicable after they are electronically filed with, or furnished to, the U.S. Securities and Exchange Commission (SEC), including its annual, quarterly, and current reports on

Forms 10-K, 10-Q, and 8-K; its proxy statements; and any amendments to those reports or statements. All such postings and filings are available on the Company's Investor Relations web site free of charge. In addition, this web site allows investors and other interested persons to sign up to automatically receive e-mail alerts when the Company posts news releases and financial information on its web site. Investors and other interested persons can also follow the Company on Twitter at <http://twitter.com/dieboldinc>. The SEC also maintains a web site, www.sec.gov, that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC. The content on any web site referred to in this annual report on Form 10-K is not incorporated by reference into this annual report unless expressly noted.

Table of Contents

ITEM 1A: RISK FACTORS

(dollars in thousands)

The following are certain risk factors that could affect our business, financial condition, operating results and cash flows. These risk factors should be considered in connection with evaluating the forward-looking statements contained in this annual report on Form 10-K because they could cause actual results to differ materially from those expressed in any forward-looking statement. The risk factors highlighted below are not the only ones we face. If any of these events actually occur, our business, financial condition, operating results or cash flows could be negatively affected.

We caution the reader to keep these risk factors in mind and refrain from attributing undue certainty to any forward-looking statements, which speak only as of the date of this annual report on Form 10-K.

Demand for and supply of our services and products may be adversely affected by numerous factors, some of which we cannot predict or control. This could adversely affect our operating results.

Numerous factors may affect the demand for and supply of our services and products, including:

- changes in the market acceptance of our services and products;
- customer and competitor consolidation;
- changes in customer preferences;
- declines in general economic conditions;
- changes in environmental regulations that would limit our ability to service and sell products in specific markets;
- macro-economic factors affecting banks, credit unions and other financial institutions may lead to cost-cutting efforts by customers, which could cause us to lose current or potential customers or achieve less revenue per customer; and
- availability of purchased products.

If any of these factors occur, the demand for and supply of our services and products could suffer, and which could adversely affect our results of operations.

Increased energy and raw material costs could reduce our income.

Energy prices, particularly petroleum prices, are cost drivers for our business. In recent years, the price of petroleum has been highly volatile, particularly due to the unstable political conditions in the Middle East and increasing international demand from emerging markets. Price increases in fuel and electricity costs, such as those increases that may occur from climate change legislation or other environmental mandates, may continue to increase our cost of operations. Any increase in the costs of energy would also increase our transportation costs.

The primary raw materials in our FSS, security, election and lottery systems product solutions are steel, plastics and electronic parts and components. The majority of our raw materials are purchased from various local, regional and global suppliers pursuant to supply contracts. However, the price of these materials can fluctuate under these contracts in tandem with the pricing of raw materials.

Although we attempt to pass on higher energy and raw material costs to our customers, it is often not possible given the competitive markets in which we operate.

Our business may be affected by general economic conditions, cyclicity and uncertainty and could be adversely affected during economic downturns.

Demand for our services and products is affected by general economic conditions and the business conditions of the industries in which we sell our services and products. The business of most of our customers, particularly our financial institution customers, is, to varying degrees, cyclical and has historically experienced periodic downturns. Under difficult economic conditions, customers may seek to reduce discretionary spending by forgoing purchases of our

services and products. This risk is magnified for capital goods purchases such as ATMs and physical security products. In addition, downturns in our customers' industries, even during periods of strong general economic conditions, could adversely affect the demand for our services and products, and our sales and operating results.

In particular, continuing economic difficulties in the global markets have led to an economic recession in many of the markets in which we operate. As a result of these difficulties and other factors, including new or increased regulatory burdens, financial institutions have failed and may continue to fail, resulting in a loss of current or potential customers, or deferred or canceled orders, including orders previously placed. Any customer deferrals or cancellations could materially affect our sales and operating results.

Table of Contents

Additionally, the unstable political conditions in the Middle East or the sovereign debt concerns of certain countries could lead to further financial, economic and political instability, and this could lead to an additional deterioration in general economic conditions.

We may be unable to achieve, or may be delayed in achieving, our cost-cutting initiatives, and this may adversely affect our operating results and cash flow.

We have launched a number of cost-cutting initiatives, including as part of Diebold 2.0 and other restructuring initiatives, to improve operating efficiencies and reduce operating costs. Although we have achieved a substantial amount of annual cost savings associated with these cost-cutting initiatives, we may be unable to sustain the cost savings that we have achieved. In addition, if we are unable to achieve, or have any unexpected delays in achieving, additional cost savings, our results of operations and cash flow may be adversely affected. Even if we meet our goals as a result of these initiatives, we may not receive the expected financial benefits of these initiatives.

We face competition that could adversely affect our sales and financial condition.

All phases of our business are highly competitive. Some of our products are in direct competition with similar or alternative products provided by our competitors. We encounter competition in price, delivery, service, performance, product innovation, product recognition and quality.

Because of the potential for consolidation in any market, our competitors may become larger, which could make them more efficient and permit them to be more price-competitive. Increased size could also permit them to operate in wider geographic areas and enhance their abilities in other areas such as research and development and customer service. As a result, this could also reduce our profitability.

We expect that our competitors will continue to develop and introduce new and enhanced services and products. This could cause a decline in market acceptance of our services and products. In addition, our competitors could cause a reduction in the prices for some of our services and products as a result of intensified price competition. Also, we may be unable to effectively anticipate and react to new entrants in the marketplace competing with our services and products.

Competitive pressures can also result in the loss of major customers. An inability to compete successfully could have an adverse effect on our operating results, financial condition and cash flows in any given period.

Additional tax expense or additional tax exposures could affect our future profitability.

We are subject to income taxes in both the United States and various non-U.S. jurisdictions, and our domestic and international tax liabilities are dependent upon the distribution of income among these different jurisdictions. If we change our intention to repatriate cash and cash equivalents and short-term investments residing in international tax jurisdictions, there could be further negative impact on foreign and domestic taxes. Our tax expense includes estimates of additional tax that may be incurred for tax exposures and reflects various estimates and assumptions, including assessments of future earnings of the Company that could affect the valuation of our net deferred tax assets. Our future results could be adversely affected by changes in the effective tax rate as a result of a change in the mix of earnings in countries with differing statutory tax rates, changes in the overall profitability of the Company, changes in tax legislation, changes in the valuation of deferred tax assets and liabilities, the results of audits and examinations of previously filed tax returns and continuing assessments of our income tax exposures.

Additionally, our future results could be adversely affected by the results of indirect tax audits and examinations, and continuing assessments of our indirect tax exposures. For example, in August 2012, one of our Brazilian subsidiaries was notified of a tax assessment of approximately R\$270,000, including penalties and interest, regarding certain Brazilian federal indirect taxes for 2008 and 2009. The assessment alleges improper importation of certain components into the country's free trade zone that would nullify certain indirect tax incentives. Although we received

a favorable administrative level decision, the matter remains subject to ongoing administrative proceedings and appeals that could negatively impact the recent administrative level decision, and could also negatively impact Brazilian federal indirect taxes in other years that remain open under statute. It is reasonably possible that we could be required to pay taxes, penalties and interest related to this matter or other open years, which could be material to our consolidated financial statements.

Table of Contents

In international markets, we compete with local service providers that may have competitive advantages. In a number of international markets, especially those in AP and LA, we face substantial competition from local service providers that offer competing services and products. Some of these companies may have a dominant market share in their territories and may be owned by local stakeholders. This could give them a competitive advantage. Local providers of competing services and products may also have a substantial advantage in attracting customers in their country due to more established branding in that country, greater knowledge with respect to the tastes and preferences of customers residing in that country and/or their focus on a single market. As a U.S. based multi-national corporation, we must ensure our compliance with both U.S. and foreign regulatory requirements.

Because our operations are conducted worldwide, they are affected by risks of doing business abroad. We generate a significant percentage of revenue from operations conducted outside the United States. Revenue from international operations amounted to approximately 56.1 percent in 2014, 52.3 percent in 2013 and 48.7 percent in 2012 of total revenue during these respective years.

Accordingly, international operations are subject to the risks of doing business abroad, including, among other things, the following:

- fluctuations in currency exchange rates, particularly in China (renminbi), Brazil (real) and EMEA (euro);
- transportation delays and interruptions;
- political and economic instability and disruptions;
- the failure of foreign governments to abide by international agreements and treaties;
- restrictions on the transfer of funds;
- the imposition of duties and tariffs;
- import and export controls;
- changes in governmental policies and regulatory environments;
- ensuring our compliance with U.S. laws and regulations, including the Foreign Corrupt Practices Act (FCPA);
- labor unrest and current and changing regulatory environments;
- the uncertainty of product acceptance by different cultures;
- the risks of divergent business expectations or cultural incompatibility inherent in establishing joint ventures with foreign partners;
- difficulties in staffing and managing multi-national operations;
- limitations on the ability to enforce legal rights and remedies;
- reduced protection for intellectual property rights in some countries; and
- potentially adverse tax consequences, including repatriation of profits.

Any of these events could have an adverse effect on our international operations by reducing the demand for our services and products or decreasing the prices at which we can sell our services and products, thereby adversely affecting our financial condition or operating results. We may not be able to continue to operate in compliance with applicable customs, currency exchange control regulations, transfer pricing regulations or any other laws or regulations to which we may be subject. In addition, these laws or regulations may be modified in the future, and we may not be able to operate in compliance with those modifications.

Additionally, there are ongoing concerns regarding the short- and long-term stability of the euro and its ability to serve as a single currency for a variety of individual countries. These concerns could lead individual countries to revert, or threaten to revert, to their former local currencies, which could lead to the dissolution of the euro. Should this occur, the assets we hold in a country that re-introduces its local currency could be significantly devalued. Furthermore, the dissolution of the euro could cause significant volatility and disruption to the global economy, which could impact our financial results. Finally, if it were necessary for us to conduct our business in additional currencies, we would be subjected to additional earnings volatility as amounts in these currencies are translated into U.S. dollars.

We may be exposed to liabilities under the Foreign Corrupt Practices Act, which could have a material adverse effect on our business.

We are subject to compliance with various laws and regulations, including the FCPA and similar worldwide anti-bribery laws, which generally prohibit companies and their intermediaries from engaging in bribery or making other improper payments to foreign officials for the purpose of obtaining or retaining business or gaining an unfair business advantage. The FCPA also requires proper record keeping and characterization of such payments in our reports filed with the SEC.

Our employees and agents are required to comply with these laws. We operate in many parts of the world that have experienced governmental and commercial corruption to some degree, and strict compliance with anti-bribery laws may conflict with local customs and practices. Foreign companies, including some that may compete with us, may not be subject to the FCPA and may

Table of Contents

follow local customs and practices. Accordingly, such companies may be more likely to engage in activities prohibited by the FCPA, which could have a significant adverse impact on our ability to compete for business in such countries.

Despite our commitment to legal compliance and corporate ethics, we cannot ensure that our policies and procedures will always protect us from intentional, reckless or negligent acts committed by our employees or agents. Violations of these laws, or allegations of such violations, could disrupt our business and result in financial penalties, debarment from government contracts and other consequences that may have a material adverse effect on our business, financial condition or results of operations.

In addition, our business opportunities in select geographies have been or may be adversely affected by the settlement of previously-disclosed FCPA matter with the U.S. government in late 2013. Some countries in which we do business may also initiate their own reviews and impose penalties, including prohibition of our participating in or curtailment of business operations in those jurisdictions. We could also face third-party claims in connection with this matter or as a result of the outcome of the current or any future government reviews. Our disclosure, internal review and any current or future governmental review of this matter could, individually or in the aggregate, have a material adverse effect on our reputation and our ability to obtain new business or retain existing business from our current clients and potential clients, to attract and retain employees and to access the capital markets.

We may expand operations into international markets in which we may have limited experience or rely on business partners.

We continually look to expand our services and products into international markets. We have currently developed, through joint ventures, strategic investments, subsidiaries and branch offices, service and product offerings in more than 90 countries outside of the United States. As we expand into new international markets, we will have only limited experience in marketing and operating services and products in such markets. In other instances, we may rely on the efforts and abilities of foreign business partners in such markets. Certain international markets may be slower than domestic markets in adopting our services and products, and our operations in international markets may not develop at a rate that supports our level of investment. Further, violations of laws by our foreign business partners, or allegations of such violations, could disrupt our business and result in financial penalties and other consequences that may have a material adverse effect on our business, financial condition or results of operations.

An inability to effectively manage acquisitions, divestitures and other significant transactions successfully could harm our operating results, business and prospects.

As part of our business strategy, we frequently engage in discussions with third parties regarding possible investments, acquisitions, strategic alliances, joint ventures, divestitures and outsourcing arrangements, and we enter into agreements relating to such transactions in order to further our business objectives. In order to pursue this strategy successfully, we must identify suitable candidates, successfully complete transactions, some of which may be large and complex, and manage post-closing issues such as the integration of acquired companies or employees. Integration and other risks of these transactions can be more pronounced in larger and more complicated transactions, or if multiple transactions are pursued simultaneously. If we fail to identify and successfully complete transactions that further our strategic objectives, we may be required to expend resources to develop products and technology internally. This may put us at a competitive disadvantage, and we may be adversely affected by negative market perceptions any of which may have a material adverse effect on our revenue, gross margin and profitability.

Integration issues are complex, time-consuming and expensive and, without proper planning and implementation, could significantly disrupt our business. The challenges involved in integration include:

- combining service and product offerings and entering into new markets in which we are not experienced;

convincing customers and distributors that the transaction will not diminish client service standards or business focus, preventing customers and distributors from deferring purchasing decisions or switching to other suppliers or service providers(which could result in additional obligations to address customer uncertainty), and coordinating service, sales, marketing and distribution efforts;

• consolidating and rationalizing corporate information technology infrastructure, which may include multiple legacy systems from various acquisitions and integrating software code;

• minimizing the diversion of management attention from ongoing business concerns;

• persuading employees that business cultures are compatible, maintaining employee morale and retaining key employees, integrating employees into our Company, correctly estimating employee benefit costs and implementing restructuring programs;

• coordinating and combining administrative, service, manufacturing, research and development and other operations, subsidiaries, facilities and relationships with third parties in accordance with local laws and other obligations while maintaining adequate standards, controls and procedures; and

• achieving savings from supply chain and administration integration.

Table of Contents

We evaluate and enter into these types of transactions on an ongoing basis. We may not fully realize all of the anticipated benefits of any transaction, and the time frame for achieving benefits of a transaction may depend partially upon the actions of employees, suppliers or other third parties. In addition, the pricing and other terms of our contracts for these transactions require us to make estimates and assumptions at the time we enter into these contracts, and, during the course of our due diligence, we may not identify all of the factors necessary to estimate costs accurately. Any increased or unexpected costs, unanticipated delays or failure to achieve contractual obligations could make these agreements less profitable or unprofitable.

Managing these types of transactions requires varying levels of management resources, which may divert our attention from other business operations. These transactions could result in significant costs and expenses and charges to earnings, including those related to severance pay, early retirement costs, employee benefit costs, asset impairment charges, charges from the elimination of duplicative facilities and contracts, in-process research and development charges, inventory adjustments, assumed litigation regulatory compliance and other liabilities, legal, accounting and financial advisory fees and required payments to executive officers and key employees under retention plans. Moreover, we could incur additional depreciation and amortization expense over the useful lives of certain assets acquired in connection with these transactions, and, to the extent that the value of goodwill or intangible assets with indefinite lives acquired in connection with a transaction becomes impaired, we may be required to incur additional material charges relating to the impairment of those assets. In order to complete an acquisition, we may issue common stock, potentially creating dilution for existing shareholders, or borrow funds, which could affect our financial condition and potentially our credit ratings. Any prior or future downgrades in our credit rating associated with a transaction could adversely affect our ability to borrow and result in more restrictive borrowing terms. In addition, our effective tax rate on an ongoing basis is uncertain, and such transactions could impact our effective tax rate. We also may experience risks relating to the challenges and costs of closing a transaction and the risk that an announced transaction may not close. As a result, any completed, pending or future transactions may contribute to financial results that differ from the investment community's expectations.

We have a significant amount of long-term assets, including goodwill and other intangible assets, and any future impairment charges could adversely impact our results of operations.

We review long-lived assets, including property, plant and equipment and identifiable amortizing intangible assets, for impairment whenever changes in circumstances or events may indicate that the carrying amounts are not recoverable. If the fair value is less than the carrying amount of the asset, a loss is recognized for the difference. Factors which may cause an impairment of long-lived assets include significant changes in the manner of use of these assets, negative industry or market trends, a significant underperformance relative to historical or projected future operating results, or a likely sale or disposal of the asset before the end of its estimated useful life.

As of December 31, 2014, we had \$171,974 of goodwill. We assess all existing goodwill at least annually for impairment on a reporting unit basis. The Company's five reporting units are defined as Domestic and Canada, Brazil, LA, AP and EMEA. The techniques used in our qualitative and quantitative assessment and goodwill impairment tests incorporate a number of estimates and assumptions that are subject to change; although we believe these estimates and assumptions are reasonable and reflect market conditions forecast at the assessment date. Any changes to these assumptions and estimates due to market conditions or otherwise may lead to an outcome where impairment charges would be required in future periods.

System security risks and systems integration issues could disrupt our internal operations or services provided to customers, and any such disruption could adversely affect revenue, increase costs, and harm our reputation and stock price.

Experienced computer programmers and hackers may be able to penetrate our network security and misappropriate our own confidential information or that of our customers, corrupt data, create system disruptions or cause shutdowns. A network security breach could be particularly harmful if it remained undetected for an extended period of time.

Groups of hackers may also act in a coordinated manner to launch distributed denial of service attacks, or other coordinated attacks, that may cause service outages or other interruptions. We could incur significant expenses in addressing problems created by network security breaches, such as the expenses of deploying additional personnel, enhancing or implementing new protection measures, training employees or hiring consultants. Further, such corrective measures may later prove inadequate. Moreover, actual or perceived security vulnerabilities in our services and products could cause significant reputational harm, causing us to lose existing or potential customers. Reputational damage could also result in diminished investor confidence. Actual or perceived vulnerabilities may also lead to claims against us. Although our license agreements typically contain provisions that eliminate or limit our exposure to such liability, there is no assurance these provisions will withstand legal challenges. We could also incur significant expenses in connection with customers' system failures.

In addition, sophisticated hardware and operating system software and applications that we produce or procure from third parties may contain defects in design or manufacture, including "bugs" and other problems that could unexpectedly interfere with the operation of the system. The costs to eliminate or alleviate security problems, viruses and bugs could be significant, and the efforts

Table of Contents

to address these problems could result in interruptions, delays or cessation of service that could impede sales, manufacturing, distribution or other critical functions.

Portions of our information technology infrastructure also may experience interruptions, delays or cessations of service or produce errors in connection with systems integration or migration work that takes place from time to time. We may not be successful in implementing new systems, and transitioning data and other aspects of the process could be expensive, time consuming, disruptive and resource-intensive. Such disruptions could adversely impact the ability to fulfill orders and interrupt other processes and, in addition, could adversely impact our ability to maintain effective internal control over financial reporting. Delayed sales, lower margins, lost customers or diminished investor confidence resulting from these disruptions could adversely affect financial results, stock price and reputation.

An inability to attract, retain and motivate key employees could harm current and future operations. In order to be successful, we must attract, retain and motivate executives and other key employees, including those in managerial, professional, administrative, technical, sales, marketing and information technology support positions. We also must keep employees focused on our strategies and goals. Hiring and retaining qualified executives, engineers and qualified sales representatives are critical to our future, and competition for experienced employees in these areas can be intense. The failure to hire or loss of key employees could have a significant impact on our operations.

We may not be able to generate sufficient cash flows to fund our operations and make adequate capital investments, or to pay dividends.

Our cash flows from operations depend primarily on sales and service margins. To develop new service and product technologies, support future growth, achieve operating efficiencies and maintain service and product quality, we must make significant capital investments in manufacturing technology, facilities and capital equipment, research and development, and service and product technology. In addition to cash provided from operations, we have from time to time utilized external sources of financing. Despite our Diebold 2.0 strategy, depending upon general market conditions or other factors, we may not be able to generate sufficient cash flows to fund our operations and make adequate capital investments, or to continue to pay dividends, either in whole or in part. In addition, any tightening of the credit markets may limit our ability to obtain alternative sources of cash to fund our operations.

New service and product developments may be unsuccessful.

We are constantly looking to develop new services and products that complement or leverage the underlying design or process technology of our traditional service and product offerings. We make significant investments in service and product technologies and anticipate expending significant resources for new software-led services and product development over the next several years. There can be no assurance that our service and product development efforts will be successful, that we will be able to cost effectively develop or manufacture these new services and products, that we will be able to successfully market these services and products or that margins generated from sales of these services and products will recover costs of development efforts.

An adverse determination that our services, products or manufacturing processes infringe the intellectual property rights of others could have a materially adverse effect on our business, operating results or financial condition.

As is common in any high technology industry, others have asserted from time to time, and may assert in the future, that our services, products or manufacturing processes infringe their intellectual property rights. A court determination that our services, products or manufacturing processes infringe the intellectual property rights of others could result in significant liability and/or require us to make material changes to our services, products and/or manufacturing processes. We are unable to predict the outcome of assertions of infringement made against us. Any of the foregoing could have a materially adverse effect on our business, operating results or financial condition.

Table of Contents

Changes in laws or regulations or the manner of their interpretation or enforcement could adversely impact our financial performance and restrict our ability to operate our business or execute our strategies.

New laws or regulations, or changes in existing laws or regulations or the manner of their interpretation or enforcement, could increase our cost of doing business and restrict our ability to operate our business or execute our strategies. This includes, among other things, the possible taxation under U.S. law of certain income from foreign operations, compliance costs and enforcement under the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act), and costs associated with complying with the Patient Protection and Affordable Care Act of 2010 and the regulations promulgated thereunder. For example, under Section 1502 of the Dodd-Frank Act, the SEC has adopted additional disclosure requirements related to the source of certain “conflict minerals” for issuers for which such “conflict minerals” are necessary to the functionality or product manufactured, or contracted to be manufactured, by that issuer. The metals covered by the rules include tin, tantalum, tungsten and gold, commonly referred to as “3TG.” Our suppliers may use some or all of these materials in their production processes. The SEC's rules require us to perform supply chain due diligence on every member of our supply chain, including the mine owner and operator. Global supply chains can have multiple layers, thus the costs of complying with these requirements could be substantial. These requirements may also reduce the number of suppliers who provide conflict free metals, and may affect our ability to obtain products in sufficient quantities or at competitive prices. Compliance costs and the unavailability of raw materials could have a material adverse effect on our results of operations. As another example, the customs authority in Thailand has unilaterally changed its position with respect to its obligations under the World Trade Organization’s International Technology Agreement (ITA), which provides duty-free treatment for the importation of ATMs into Thailand from other member countries that have signed the ITA, which includes imports from the United States.

Anti-takeover provisions could make it more difficult for a third party to acquire us.

Certain provisions of our charter documents, including provisions limiting the ability of shareholders to raise matters at a meeting of shareholders without giving advance notice and permitting cumulative voting, may make it more difficult for a third party to gain control of our Board of Directors and may have the effect of delaying or preventing changes in our control or management. This could have an adverse effect on the market price of our common stock. Additionally, Ohio corporate law provides that certain notice and informational filings and special shareholder meeting and voting procedures must be followed prior to consummation of a proposed “control share acquisition,” as defined in the Ohio Revised Code. Assuming compliance with the prescribed notice and information filings, a proposed control share acquisition may be made only if, at a special meeting of shareholders, the acquisition is approved by both a majority of our voting power represented at the meeting and a majority of the voting power remaining after excluding the combined voting power of the “interested shares,” as defined in the Ohio Revised Code. The application of these provisions of the Ohio Revised Code also could have the effect of delaying or preventing a change of control.

Any actions or other governmental investigations or proceedings related to or arising from the matters that resulted in our previous settlements could result in substantial costs to defend enforcement or other related actions that could have a materially adverse effect on our business, operating results or financial condition.

The Company had previously reached an agreement in 2009 with the staff of the SEC to settle civil charges stemming from the staff's enforcement inquiry and an agreement with the staff of the SEC and Department of Justice to settle the FCPA review in 2013. We could incur substantial additional costs to defend and resolve third-party litigation or other governmental actions, investigations or proceedings arising out of, or related to, the completed investigations or these settlements. The diversion of resources to address issues arising out of any such third-party or governmental actions may harm our business, operating results and financial condition in the future.

Our ability to maintain effective internal control over financial reporting may be insufficient to allow us to accurately report our financial results or prevent fraud, and this could cause our financial statements to become materially

misleading and adversely affect the trading price of our common stock.

We require effective internal control over financial reporting in order to provide reasonable assurance with respect to our financial reports and to effectively prevent fraud. Internal control over financial reporting may not prevent or detect misstatements because of its inherent limitations, including the possibility of human error, the circumvention or overriding of controls, or fraud. Therefore, even effective internal controls can provide only reasonable assurance with respect to the preparation and fair presentation of financial statements. If we cannot provide reasonable assurance with respect to our financial statements and effectively prevent fraud, our financial statements could become materially misleading, which could adversely affect the trading price of our common stock.

Management identified previous control deficiencies during 2013 and 2012 that were disclosed as material weaknesses. These material weaknesses have been remediated as of December 31, 2014. See Item 9A. Controls and Procedures in this annual report on Form 10-K for additional details.

Table of Contents

If we are not able to maintain the adequacy of our internal control over financial reporting, including any failure to implement required new or improved controls, or if we experience difficulties in their implementation, our business, financial condition and operating results could be harmed. Any material weakness could affect investor confidence in the accuracy and completeness of our financial statements. As a result, our ability to obtain any additional financing, or additional financing on favorable terms, could be materially and adversely affected. This, in turn, could materially and adversely affect our business, financial condition and the market value of our securities and require us to incur additional costs to improve our internal control systems and procedures. In addition, perceptions of our Company among customers, lenders, investors, securities analysts and others could also be adversely affected.

We can give no assurances that any additional material weaknesses will not arise in the future due to our failure to implement and maintain adequate internal control over financial reporting. In addition, although we have been successful historically in strengthening our controls and procedures, those controls and procedures may not be adequate to prevent or identify irregularities or ensure the fair presentation of our financial statements included in our periodic reports filed with the SEC.

Low investment performance by our domestic pension plan assets may result in an increase to our net pension liability and expense, which may require us to fund a portion of our pension obligations and divert funds from other potential uses.

We sponsor several defined benefit pension plans that cover certain eligible employees. Our pension expense and required contributions to our pension plans are directly affected by the value of plan assets, the projected rate of return on plan assets, the actual rate of return on plan assets and the actuarial assumptions we use to measure the defined benefit pension plan obligations.

A significant market downturn could occur in future periods resulting in a decline in the funded status of our pension plans and actual asset returns to be below the assumed rate of return used to determine pension expense. If return on plan assets in future periods perform below expectations, future pension expense will increase. Further, as a result of global economic instability in recent years, our pension plan investment portfolio has been volatile.

We establish the discount rate used to determine the present value of the projected and accumulated benefit obligations at the end of each year based upon the available market rates for high quality, fixed income investments. We match the projected cash flows of our pension plans against those generated by high-quality corporate bonds. The yield of the resulting bond portfolio provides a basis for the selected discount rate. An increase in the discount rate would reduce the future pension expense and, conversely, a decrease in the discount rate would increase the future pension expense.

Based on current guidelines, assumptions and estimates, including investment returns and interest rates, we plan to make contributions of \$18,648 to our pension plans in 2015. Changes in the current assumptions and estimates could result in contributions in years beyond 2015 that are greater than the projected 2015 contributions required. We cannot predict whether changing market or economic conditions, regulatory changes or other factors will further increase our pension expenses or funding obligations, diverting funds we would otherwise apply to other uses.

Our businesses are subject to inherent risks, some for which we maintain third-party insurance and some for which we self-insure. We may incur losses and be subject to liability claims that could have a material adverse effect on our financial condition, results of operations or cash flows.

We maintain insurance policies that provide limited coverage for some, but not all, of the potential risks and liabilities associated with our businesses. The policies are subject to deductibles and exclusions that result in our retention of a level of risk on a self-insurance basis. For some risks, we may not obtain insurance if we believe the cost of available insurance is excessive relative to the risks presented. As a result of market conditions, premiums and deductibles for

certain insurance policies can increase substantially, and in some instances, certain insurance may become unavailable or available only for reduced amounts of coverage. As a result, we may not be able to renew our existing insurance policies or procure other desirable insurance on commercially reasonable terms, if at all. Even where insurance coverage applies, insurers may contest their obligations to make payments. Our financial condition, results of operations and cash flows could be materially and adversely affected by losses and liabilities from un-insured or under-insured events, as well as by delays in the payment of insurance proceeds, or the failure by insurers to make payments. We also may incur costs and liabilities resulting from claims for damages to property or injury to persons arising from our operations.

Our assumptions used to determine our self-insurance liability could be wrong and materially impact our business. We evaluate our self-insurance liability based on historical claims experience, demographic factors, severity factors and other actuarial assumptions. However, if future occurrences and claims differ from these assumptions and historical trends, our business, financial results and financial condition could be materially impacted by claims and other expenses.

Table of Contents

ITEM 1B: UNRESOLVED STAFF COMMENTS

None.

ITEM 2: PROPERTIES

The Company's corporate offices are located in North Canton, Ohio. Within NA, the Company leases manufacturing facilities in Greensboro, North Carolina and has selling, service and administrative offices throughout the United States and Canada. AP owns and operates manufacturing facilities in China and India and selling, service and administrative offices in the following locations: Australia, China, Hong Kong, India, Indonesia, Malaysia, Philippines, Taiwan, Thailand, Singapore and Vietnam. EMEA owns or leases and operates manufacturing facilities in Belgium and Hungary and has selling, service and administrative offices in the following locations: Austria, Denmark, Belgium, France, Germany, Hungary, Italy, Kazakhstan, Luxembourg, Morocco, Namibia, Netherlands, Poland, Portugal, Russia, South Africa, Spain, Switzerland, Turkey, Uganda, the United Arab Emirates and the United Kingdom. LA has selling, service and administrative offices in the following locations: Barbados, Belize, Bolivia, Chile, Colombia, Costa Rica, Dominican Republic, Ecuador, El Salvador, Guatemala, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, Paraguay, Peru, Uruguay and Venezuela. Brazil owns and operates manufacturing facilities and has selling, service and administrative offices throughout the country. The Company leases a majority of the selling, service and administrative offices under operating lease agreements.

The Company considers that its properties are generally in good condition, are well maintained, and are generally suitable and adequate to carry on the Company's business.

Table of Contents

ITEM 3: LEGAL PROCEEDINGS

(dollars in thousands)

At December 31, 2014, the Company was a party to several lawsuits that were incurred in the normal course of business, none of which individually or in the aggregate is considered material by management in relation to the Company's financial position or results of operations. In addition, the Company has indemnification obligations with certain former employees and costs associated with these indemnifications are expensed as incurred. In management's opinion, the Company's consolidated financial statements would not be materially affected by the outcome of those legal proceedings, commitments, or asserted claims.

In addition to the routine legal proceedings noted above, the Company was a party to the legal proceedings described below at

December 31, 2014:

Indirect Tax Contingencies

The Company accrues non income-tax liabilities for indirect tax matters when management believes that a loss is probable and the amounts can be reasonably estimated, while contingent gains are recognized only when realized. In the event any losses are sustained in excess of accruals, they are charged against income. In evaluating indirect tax matters, management takes into consideration factors such as historical experience with matters of similar nature, specific facts and circumstances, and the likelihood of prevailing. Management evaluates and updates accruals as matters progress over time. It is reasonably possible that some of the matters for which accruals have not been established could be decided unfavorably to the Company and could require recognizing future expenditures. Also, statutes of limitations could expire without the Company paying the taxes for matters for which accruals have been established, which could result in the recognition of future gains upon reversal of these accruals at that time.

At December 31, 2014, the Company was a party to several routine indirect tax claims from various taxing authorities globally that were incurred in the normal course of business, none of which individually or in the aggregate is considered material by management in relation to the Company's financial position or results of operations. In management's opinion, the consolidated financial statements would not be materially affected by the outcome of these indirect tax claims and/or proceedings or asserted claims.

In addition to these routine indirect tax matters, the Company was a party to the proceedings described below:

In August 2012, one of the Company's Brazilian subsidiaries was notified of a tax assessment of approximately R\$270,000, including penalties and interest, regarding certain Brazilian federal indirect taxes (Industrialized Products Tax, Import Tax, Programa de Integração Social and Contribution to Social Security Financing) for 2008 and 2009. The assessment alleges improper importation of certain components into Brazil's free trade zone that would nullify certain indirect tax incentives. On September 10, 2012, the Company filed its administrative defenses with the tax authorities. This proceeding is currently pending an administrative level decision, which could negatively impact Brazilian federal indirect taxes in other years that remain open under statute. It is reasonably possible that the Company could be required to pay taxes, penalties and interest related to this matter, which could be material to the Company's consolidated financial statements.

In response to an order by the administrative court, the tax inspector provided further analysis with respect to the initial assessment in December 2013, which has now been accepted by the initial administrative court, that indicates a potential exposure that is significantly lower than the initial tax assessment received in August 2012. However, this matter remains subject to ongoing administrative proceedings and appeals. Accordingly, the Company cannot provide any assurance that its exposure pursuant to the initial assessment will be lowered significantly or at all. The Company continues to defend itself in the administrative proceedings.

In connection with the Brazilian indirect tax assessment, in May 2013, the SEC requested that the Company retain certain documents and produce certain records relating to the assessment, to which the Company complied. However, in September 2014, the Company was notified by the SEC that it had closed its inquiry relating to the assessment.

In addition, the Company is challenging customs rulings in Thailand seeking to retroactively collect customs duties on previous imports of ATMs. Management believes that the customs authority's attempt to retroactively assess customs duties is in contravention of World Trade Organization agreements and, accordingly, is challenging the rulings. The matters are currently in the appeals process and management continues to believe that the Company has a valid legal position in these appeals. Accordingly, the Company has not accrued any amount for this contingency; however, the Company cannot provide any assurance that it will not ultimately be subject to a retroactive assessment.

Table of Contents

At December 31, 2014 and 2013, the Company had an accrual of approximately \$12,500 and \$20,750, respectively, related to the Brazilian indirect tax matter disclosed above. The reduction in the accrual is due to the expiration of the statute of limitations related to years subject to audit and foreign currency fluctuations.

A loss contingency is reasonably possible if it has a more than remote but less than probable chance of occurring. Although management believes the Company has valid defenses with respect to its indirect tax positions, it is reasonably possible that a loss could occur in excess of the estimated accrual, for which the Company estimated the aggregate risk at December 31, 2014 to be up to approximately \$229,700 for its material indirect tax matters, of which approximately \$175,600 and \$26,000, respectively, relates to the Brazilian indirect tax matter and Thailand customs matter disclosed above. The aggregate risk related to indirect taxes is adjusted as the applicable statutes of limitations expire.

Legal Contingencies

At December 31, 2014, the Company was a party to several lawsuits that were incurred in the normal course of business, none of which individually or in the aggregate is considered material by management in relation to the Company's financial position or results of operations. In addition, the Company has indemnification obligations with certain former employees, and costs associated with these indemnifications are expensed as incurred. In management's opinion, the Company's consolidated financial statements would not be materially affected by the outcome of these legal proceedings, commitments or asserted claims.

ITEM 4: MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5: MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

The common shares of the Company are listed on the New York Stock Exchange with a symbol of "DBD." The price ranges of common shares of the Company for the periods indicated below are as follows:

	2014		2013		2012	
	High	Low	High	Low	High	Low
1st Quarter	\$40.78	\$32.05	\$33.30	\$27.59	\$40.38	\$29.21
2nd Quarter	\$41.45	\$36.20	\$33.95	\$28.26	\$42.93	\$35.03
3rd Quarter	\$40.90	\$35.00	\$35.40	\$27.89	\$38.49	\$31.48
4th Quarter	\$38.67	\$32.31	\$34.44	\$28.88	\$34.33	\$27.66
Full Year	\$41.45	\$32.05	\$35.40	\$27.59	\$42.93	\$27.66

There were 62,419 shareholders of the Company at December 31, 2014, which includes an estimated number of shareholders who have shares held in their accounts by banks, brokers, and trustees for benefit plans and the agent for the dividend reinvestment plan.

On the basis of amounts paid and declared quarterly, the annualized dividends per share were \$1.15, \$1.15 and \$1.14 in 2014, 2013 and 2012, respectively.

Information concerning the Company's share repurchases made during the fourth quarter of 2014:

Period	Total Number of Shares Purchased (1)	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans	Maximum Number of Shares that May Yet Be Purchased Under the Plans (2)
October	1,834	\$35.01	—	2,426,177
November	114	28.99	—	2,426,177
December	174	38.65	—	2,426,177
Total	2,122	\$34.99	—	

(1) All shares were surrendered or deemed surrendered to the Company in connection with the Company's stock-based compensation plans.

(2) The total number of shares repurchased as part of the publicly announced share repurchase plan was 13,450,772 as of December 31, 2014. The plan was approved by the Board of Directors in April 1997. The Company may purchase shares from time to time in open market purchases or privately negotiated transactions. The Company may make all or part of the purchases pursuant to accelerated share repurchases or Rule 10b5-1 plans. The plan has no expiration date. The following table provides a summary of Board of Director approvals to repurchase the Company's outstanding common shares:

	Total Number of Shares Approved for Repurchase
1997	2,000,000
2004	2,000,000
2005	6,000,000
2007	2,000,000

2011	1,876,949
2012	2,000,000
	15,876,949

ITEM 7: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

OVERVIEW

Management's discussion and analysis should be read in conjunction with the consolidated financial statements and accompanying notes that appear elsewhere in this annual report on Form 10-K.

Introduction

Diebold, Incorporated and its subsidiaries (collectively, the Company) is a global leader in providing financial self-service (FSS) delivery, integrated services and software, and security systems to primarily the financial, commercial, retail and other markets. Founded in 1859, the Company currently has approximately 16,000 employees with business in more than 90 countries worldwide. The Company unveiled its multi-year turnaround strategy, Diebold 2.0, at the Investment Community Conference in November 2013. The objective of Diebold 2.0 is to transform the Company into a world-class, services-led and software enabled company, supported by innovative hardware, that automates the way people connect with their money. The turnaround strategy will follow a "Crawl, Walk, Run" approach, which includes stabilizing the core business operations in the "Crawl" phase and building the foundation for future growth in the "Walk" and "Run" phases. The company is nearing the completion of the "Crawl" phase and expects to transition to "Walk" in the second half of 2015. Four core pillars provide the Company a clear path toward reaching this multi-year objective:

• Reduce its cost structure and improve its near-term delivery and execution.

• Generate increased free cash flow in order to fund the investments necessary to drive profitable growth, while preserving the ability to return value to shareholders in the form of reliable dividends and, as appropriate, share repurchases.

• Attract and retain the talent necessary to drive innovation and the focused execution of the transformation strategy.

• Return the Company to a sustainable, profitable growth trajectory.

The Company sees opportunities to leverage its capabilities in services, software and innovation to meet the needs of its rapidly evolving markets. The Company has sharpened its focus on executing its core strategies in FSS and electronic security. This includes making the appropriate investments to deliver growth within these areas, especially in research, development and engineering. In addition, the Company remains committed to a disciplined risk assessment process, focused on proactively identifying and mitigating potential risks to the Company's continued success.

Net income (loss) attributable to Diebold, Incorporated for the year ended December 31, 2014 was \$114,417, or \$1.76 per share, an increase of \$296,022, or \$4.61 per share from the year ended December 31, 2013. Total revenue for the year ended December 31, 2014 was \$3,051,053, an increase of \$193,562 from the year ended December 31, 2013.

The year ended December 31, 2014 included a \$13,709 pre-tax gain from the sale of the Company's Diebold Eras, Incorporated (Eras) subsidiary. Cryptera A/S (Cryptera) was acquired for a purchase price of approximately \$13,000 and is included in the Europe, Middle East and Africa (EMEA) segment within the Company's consolidated financial statements from July 1, 2014, the date of acquisition. Pre-tax restructuring charges of \$11,872 related to the Company's multi-year realignment plan were also included in the year ended December 31, 2014.

The year ended December 31, 2013 included a \$67,593 pre-tax non-cash pension charge related to the voluntary early retirement program, a \$70,000 pre-tax goodwill impairment charge, \$57,015 of pre-tax restructuring charges related to the Company's multi-year realignment plan, including \$31,282 related to the voluntary early retirement program, \$28,000 of additional pre-tax losses related to the settlement of the global Foreign Corrupt Practices Act (FCPA) investigation, a \$17,245 pre-tax net charge related to settlement of the securities class action, and \$9,300 of pre-tax executive severance. Internationally, improvement was driven by higher FSS sales in AP and EMEA combined with security sales growth in Brazil, mainly due to the GAS Tecnologia (GAS) acquisition in Brazil. These increases were partially offset by a reduction in election systems and lottery sales in Brazil as well as a decline in FSS volume for LA. Additionally, the 2013 results were significantly impacted by a higher tax rate, which is a result of tax expense related to the repatriation of previously undistributed earnings and the establishment of a valuation allowance on certain Brazil deferred tax assets.

Diebold 2.0 - Turnaround Strategy

Diebold 2.0 is built on four core pillars: cost, cash, talent and growth. Underpinned by the four core pillars, the turnaround strategy encompasses eight specific actions to achieve top-tier performance and generate sustainable, profitable growth.

Eight-Point Program:

1. Establish a Competitive Cost Structure

Reducing the Company's fixed cost envelope and driving operational rigor is fundamental. The multi-year transformation plan launched in 2013 will drive efficiency while reducing general and administrative costs and the cost of goods sold. As a result of the Company's transformation efforts, gross margin improved over 300 basis points compared to the prior year. In December 2014, the Company announced the extension of its cost savings plan into 2016 and 2017.

2. Drive Sustainable Improvement in Cash Flow

The Company is committed to improving cash generation in order to increase shareholder value and fuel the investments necessary to grow the business. An emphasis on working capital improvements and cash generation extends beyond the finance organization into our operations across all regions. For 2014, we were able to exceed our expectations for the year, generating approximately \$125,000 in free cash flow, which is up approximately 40 percent year-over-year.

3. Improve Sales Effectiveness

The Company's sales teams must enhance skills, tools and coverage to reach more prospects more effectively. For example, the global deployment of Salesforce.com will enhance the ability to plan, forecast and allocate resources more productively. In 2014, we were able to implement Salesforce.com across our regions and ended the year with total product backlog up approximately 3 percent on a constant currency basis.

4. Increase Speed and Agility

Streamlining the management structure will drive greater accountability, accelerate decision-making and facilitate the transition to a global business. Change is being viewed as an enabler of progress throughout the organization. Product development has been accelerated, as evidenced by the number of innovative solutions we were able to bring to market in 2014, such as our responsive banking concept and ActivEdge™ secure card reader.

5. Instill a Winning Culture Grounded in Execution

The message being driven to every member of the organization: The Company is not merely to participate in a market, but to succeed, and win through a culture built upon accountability and execution. As an example, the Company has taken steps to better align targets and employee compensation with Company performance. Under this structure, Diebold has recruited top leadership talent to the organization, which will help drive the transformation going forward.

6. Collaborate With Customers and Partners to Drive Innovative Solutions

The Company must accelerate new ideas through teamwork with capable partners and collaboration with customers. For example, the Company rolled out a number of innovative solutions over the past 12 months, which include the ActivEdge™ secure card reader, the responsive banking concept and the world's greenest automated teller machine (ATM), as well as launched its new ATM product platform.

7. Further Leverage Services and Software

The Company expects the size and importance of its software stack to increase, and our expertise in services and system integration to be a key differentiator in the market. The objective is to further expand the percentage of sales

derived from services and software, which is expected to exceed 60 percent during the transformation. For 2014, services and software comprised approximately 55 percent of the Company's total revenue and we were able to expand our value-added services footprint with notable wins across the globe.

8. Generate Long-Term, Profitable Growth

The seven actions defined above are designed to put the Company on a sustainable, profitable growth trajectory. A commitment to operational rigor, improved analytics and data-driven decision-making is expected to position the Company to benefit from secular trends in outsourcing and mobility, expand its electronic security business and drive both organic and inorganic growth.

As part of the transformation, the Company engaged Accenture LLP (Accenture) to provide finance and accounting, human resources and procurement business process outsourcing services. The Company's multi-year outsourcing agreement with Accenture focuses on creating one global delivery model that enhances the quality, controls and efficiency of the Company's integrated global business processes. The Company plans to utilize Accenture's industry leading practices, technologies and global

(dollars in thousands, except per share amounts)

delivery network to establish more synchronized operational controls, improve operational transparency, lower spending and reduce costs.

Solutions

The Company leverages its strong base of maintenance and advanced services to deliver comprehensive managed services. Banks are continuously being challenged to reduce costs while increasing operational efficiencies. Through outsourced services, banks entrust the management of their ATM and security operations to the Company, allowing their staffs to focus on core competencies. Furthermore, the Company's managed services offering provides banks and credit unions with the leading-edge technology they need to stay competitive in the marketplace. As a leader in outsourcing services, the Company is poised to capitalize on the secular outsourcing trends in the marketplace.

Another demand driver in the global ATM marketplace is branch automation. The concept is to help financial institutions reduce their costs by migrating routine transactions, typically done inside the branch, to lower-cost automated channels, including the ATM, as well as adding convenience and additional security for the banks' customers. One area of branch automation that continues to gain traction is deposit automation. Among the largest U.S. national banks, there has been extensive deployment of deposit automation-enabled terminals. Today, approximately 30 percent of ATMs globally are configured for automated deposits.

Another solution the Company offers as part of its branch automation efforts is Concierge Video Services™, most recently launched in North America. The solution provides consumers with on-demand access to bank call center representatives right at the ATM for sales or bank account maintenance support. In addition to delivering a personal touch outside of regular business hours, Concierge Video Services™ ultimately assists financial institutions by maximizing operational efficiencies, improving the consumer experience and enhancing the overall consumer relationship.

Mobile integration is another emerging trend in the FSS space, as consumers look for multiple ways to interact with their financial institutions. In July 2013, Diebold introduced its cardless Mobile Cash Access solution, which allows consumers to stage a transaction with their mobile device and complete it at the ATM without the need for a card. This capability provides consumers with a more convenient and secure option, while giving financial institutions the opportunity to offer their own branded mobile wallet solution.

A new technology that enhances security for customers is Diebold's ActivEdge™ secure card reader. This is the ATM industry's first complete anti-skimming card reader that prevents all known forms of skimming, the most prevalent type of ATM crime, as well as other forms of ATM fraud. ActivEdge™ can help financial institutions avoid skimming-related fraud losses which, according to the ATM Industry Association, total more than \$2 billion annually worldwide. ActivEdge™ requires users to insert cards into the reader via the long edge, instead of the traditional short edge. We believe by shifting a card's angle 90 degrees, ActivEdge™ prevents modern skimming devices from reading the card's full magnetic strip, eliminating the devices' ability to steal card data.

Another opportunity for a successful managed services approach relates to security challenges and the systems to address them, which have grown increasingly complex. This has created a strong business case among financial institutions and commercial customers for managed services, particularly in the areas of monitoring, services and

software management. Today, the Company is focusing its expertise on the financial and commercial sectors, with a dedicated effort to secure large, complex and technologically demanding projects. The Company has customer-focused teams that possess high levels of logical and enterprise security expertise that are required in this business. The Company is also leveraging best practices and some of the best talent to continue building upon its security managed service business.

As it relates to security, the Company introduced a new online security management tool in North America, called SecureStat[®], that streamlines how customers manage their security operations. At the core of the solution is a personalized dashboard that utilizes customizable, distinct widgets to provide a snapshot of a user's entire security platform, including locations, security systems and devices. In addition, SecureStat[®] can unify security services and disparate systems, while providing a single interface for real-time administration of security operations across an enterprise. SecureStat[®] is a great example of the software-driven platforms the Company is investing in to strengthen its services offering and differentiate itself in the marketplace.

Moving forward, the Company intends to create shareholder value by leveraging the opportunities it sees within the area of branch automation, growing its services, outsourcing and software capabilities, further building out its electronic security business and

AND RESULTS OF OPERATIONS as of December 31, 2014
DIEBOLD, INCORPORATED AND SUBSIDIARIES
(unaudited)
(dollars in thousands, except per share amounts)

taking advantage of key commercial trends around the world. Many opportunities lie ahead, and the Company will continue to invest in developing new services, software and security solutions that align with the needs of its core markets.

Multi-Year Transformation Plan

The Company is committed to its multi-year transformation plan aimed at establishing a competitive cost structure throughout the organization. The Company has identified targeted savings of \$200,000 that are expected to be fully realized by the end of 2017 and plans to reinvest a portion of the savings, approximately 50 percent, to drive long-term growth. Areas of reinvestment include: research and development of innovative new customer solutions; improving and updating the Company's information technology systems and infrastructure; transforming the general and administrative back-office functions; and strengthening sales coverage and marketing, processes and tools. In addition, some of the savings should offset price erosion, wage inflation in emerging markets and volatile commodity prices in the Company's core business. Given these factors, the Company anticipates that approximately 50 percent of the savings will positively impact operating profit. In addition to the cost savings impact, the Company expects that the plan will enhance its competitive position by focusing on globalizing the Company's service organization, creating a unified center-led global organization for research and development as well as transforming the Company's general and administrative cost structure. Restructuring charges associated with the multi-year realignment plan were \$11,872 and \$57,015 for 2014 and 2013, respectively, primarily related to severance costs of employees due to the Company's business process outsourcing initiative with Accenture.

Business Drivers

The business drivers of the Company's future performance include, but are not limited to:

- timing of self-service equipment upgrades and/or replacement cycles, including deposit automation in mature markets such as the United States;
- demand for products and solutions related to bank branch transformation opportunities;
- demand for services, including outsourcing and managed services;
- demand for security products and services for the financial and commercial sectors; and
- high levels of deployment growth for new self-service products in emerging markets, such as AP.

RESULTS OF OPERATIONS

2014 comparison with 2013

Net Sales

The following table represents information regarding our net sales for the years ended December 31:

	2014	2013	\$ Change	% Change
Total financial self-service	\$2,197,854	\$2,166,569	\$31,285	1.4
Total security	628,043	618,889	9,154	1.5
Total financial self-service & security	2,825,897	2,785,458	40,439	1.5
Brazil other	225,156	72,033	153,123	—
Total net sales	\$3,051,053	\$2,857,491	\$193,562	6.8

The increase in FSS sales included a net unfavorable currency impact of \$53,181 or 2.6 percent, of which 43 percent related to the Brazilian real. The following segment results include the impact of foreign currency. NA FSS sales decreased \$17,247 or 2.0 percent primarily from lower volume within the U.S. national bank business partially offset by improvement between years in the U.S. regional bank space and Canada. AP FSS sales increased \$19,671 or 4.3 percent primarily due to growth in India, China and the Philippines partially offset by a decline in Indonesia due to a large order in the prior year. EMEA FSS sales increased \$59,571 or 16.5 percent with the main drivers being growth in Western Europe, higher volume in Africa and the acquisition of Cryptera. LA FSS sales were flat compared to the prior year as a decline in Colombia coupled with a decrease in Venezuela resulting from the currency control policy of the Venezuelan government were offset by higher volume in Mexico and a net gain in the rest of the region. Brazil FSS sales decreased \$29,491 or 10.9 percent due to lower product sales volume.

Security sales increased due to growth in the electronic security business, which was partially offset by a decline in the physical security business. From a regional perspective, the increase in total security sales resulted primarily from growth in NA.

Brazil other increased due to lottery sales volume combined with the favorable impact of deliveries of information technology (IT) equipment to the education ministry primarily in the first quarter of 2014, which are not expected to recur in 2015, offset in part by a decrease in election systems sales.

Gross Profit

The following table represents information regarding our gross profit for the years ended December 31:

	2014	2013	\$ Change	% Change
Gross profit - services	\$490,259	\$414,381	\$75,878	18.3
Gross profit - products	289,091	225,975	63,116	27.9
Total gross profit	\$779,350	\$640,356	\$138,994	21.7
Gross margin - services	29.9	% 25.3	%	
Gross margin - products	20.5	% 18.5	%	
Total gross margin	25.5	% 22.4	%	

The increase in service gross margin was primarily driven by NA, which benefited from lower employee-related expense associated with restructuring initiatives implemented as part of the Company's service transformation efforts, including the ongoing benefit from its pension freeze and voluntary early retirement program. Total service gross margin in 2014 compared to the prior year was also favorably impacted by margin improvement in Brazil. Total service gross profit in 2014 and 2013 included restructuring charges of \$1,398 and \$27,107, respectively.

The increase in product gross margin resulted from margin improvements in each international region. LA was a strong contributor as the Company benefited from certain contractual provisions in Venezuela that settled in the year ended December 31, 2014.

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS as of December 31, 2014
DIEBOLD, INCORPORATED AND SUBSIDIARIES
(unaudited)
(dollars in thousands, except per share amounts)

EMEA was also a contributor largely due to higher volume. Total product gross profit in 2014 included a non-routine benefit of \$5,821 and 2013 included non-routine expense of \$819, both of which were related to Brazil indirect tax.

Operating Expenses

The following table represents information regarding our operating expenses for the years ended December 31:

	2014	2013	\$ Change	% Change
Selling and administrative expense	\$515,551	\$596,694	\$(81,143)	(13.6)
Research, development and engineering expense	93,617	92,315	1,302	1.4
Impairment of assets	2,123	72,017	(69,894)	(97.1)
Gain on sale of assets, net	(12,888)	(2,410)	(10,478)	—
Total operating expenses	\$598,403	\$758,616	\$(160,213)	(21.1)

The decrease in selling and administrative expense resulted primarily from lower non-routine expense and restructuring charges, savings realized from the Company's continued focus on cost structure and favorable currency impact, partially offset by the reinvestment of the Company's savings into transformation initiatives. Non-routine expenses of \$9,166 and \$128,739 were included in 2014 and 2013, respectively. The primary components of the 2013 non-routine expense were a \$67,593 non-cash pension charge, additional losses of \$28,000 related to the settlement of the FCPA investigation, \$17,245 related to the settlement of the securities class action lawsuit and executive severance costs of \$9,300. Selling and administrative expense also included \$9,859 and \$22,561 of restructuring charges in 2014 and 2013, respectively. Restructuring charges in 2014 and 2013 related to the Company's multi-year realignment plan. Excluding non-routine expenses and restructuring charges, selling and administrative expense increased \$51,132, which is nearly flat as a percentage of net sales in 2014 compared to the prior year. The increase in selling and administrative expense primarily relates to approximately \$21,000 of incremental commission expense and \$30,000 of investments related to our back office transformation.

Research, development and engineering expense as a percent of net sales in 2014 and 2013 were relatively flat. The Company increased investment in 2014 related to development efforts to support the Company's innovation in future products, which was offset by restructuring charges of \$6,091 incurred in 2013.

The Company performed an other-than-annual assessment for its Brazil reporting unit in the third quarter of 2013 based on a two-step impairment test and concluded that the goodwill within the Brazil reporting unit was partially impaired. The Company recorded a \$70,000 pre-tax, non-cash goodwill impairment charge in the third quarter of 2013 due to deteriorating macro-economic outlook, structural changes to an auction-based purchasing environment and new competitors entering the market.

During the second quarter of 2014, the Company divested Eras within the NA segment, resulting in a gain on sale of assets of \$13,709. During the first quarter of 2013, the Company recognized a gain on assets of \$2,191 resulting from the sale of certain U.S. manufacturing operations to a long-time supplier.

Operating Profit (Loss)

Edgar Filing: DIEBOLD INC - Form 10-K

The following table represents information regarding our operating profit (loss) for the years ended December 31:

	2014	2013	\$ Change	% Change
Operating profit (loss)	\$180,947	\$(118,260)) \$299,207	—
Operating profit (loss) margin	5.9	% (4.1)%	

The increase in operating profit (loss) resulted from a reduction in operating expense mainly due to lower non-routine and restructuring charges. Operating profit also improved in total margin and higher product sales, offset in part by higher spend partially attributable to reinvestment of the Company's savings into transformation strategies.

Table of Contents

AND RESULTS OF OPERATIONS as of December 31, 2014
DIEBOLD, INCORPORATED AND SUBSIDIARIES
(unaudited)
(dollars in thousands, except per share amounts)

Other (Expense) Income

The following table represents information regarding our other (expense) income for the years ended December 31:

	2014	2013	\$ Change	% Change
Investment income	\$34,501	\$27,603	\$6,898	25.0
Interest expense	(31,420)	(29,234)	(2,186)	7.5
Foreign exchange (loss) gain, net	(11,791)	172	(11,963)	—
Miscellaneous, net	(1,648)	(88)	(1,560)	—
Other (expense) income	\$(10,358)	\$(1,547)	\$(8,811)	—

The increase in investment income compared to the prior year was driven by Brazil due to leasing portfolio growth. The foreign exchange loss for 2014 and the foreign exchange gain in 2013 included losses of \$12,101 and \$1,584, respectively, related to the devaluation of the Venezuelan currency.

Net Income (Loss)

The following table represents information regarding our net income (loss) for the years ended December 31:

	2014	2013	\$ Change	% Change
Net income (loss)	\$117,019	\$(176,522)	\$293,541	—
Percent of net sales	3.8	% (6.2)	%	
Effective tax rate	31.4	% (47.3)	%	

The increase in net income was driven by higher operating profit related mainly to significantly lower non-routine and restructuring expense, an improvement in service margin and higher product sales. These benefits were offset in part by higher spend partially attributable to reinvestment of the Company's savings into transformation initiatives and unfavorable other (expense) income in 2014 resulting from foreign exchange loss due to the devaluation of the Venezuelan currency.

The negative tax rate for 2013 is a result of tax expense of approximately \$55,000 related to the repatriation of previously undistributed earnings and the establishment of a valuation allowance of approximately \$39,200 on deferred tax assets in the Company's Brazilian manufacturing facility. The 2013 tax rate was also negatively impacted by the partially non-deductible Brazil goodwill impairment and the FCPA penalty charge.

Segment Revenue and Operating Profit Summary

The following tables represent information regarding our revenue and operating profit by reporting segment for the years ended December 31:

North America:	2014	2013	\$ Change	% Change
Revenue	\$1,407,707	\$1,415,050	\$(7,343)	(0.5)
Segment operating profit	\$277,168	\$252,737	\$24,431	9.7
Segment operating profit margin	19.7	% 17.9	%	

NA revenue decreased due to lower FSS sales resulting from decreased volume in the U.S. national bank sector partially due to the impact of a large non-recurring project in the prior year, offset in part by improvement between

years in the U.S. regional bank business and Canada. NA revenue also declined due to lower physical security sales between years offset by higher electronic security revenue. Operating profit increased despite the net sales decline due to an improvement in service margin primarily driven by lower employee-related expense resulting from restructuring initiatives in addition to the ongoing benefit from the Company's pension freeze and voluntary early retirement program.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS as of December 31, 2014
DIEBOLD, INCORPORATED AND SUBSIDIARIES
(unaudited)
(dollars in thousands, except per share amounts)

Asia Pacific:	2014	2013	\$ Change	% Change
Revenue	\$500,285	\$479,129	\$21,156	4.4
Segment operating profit	\$66,394	\$62,760	\$3,634	5.8
Segment operating profit margin	13.3	% 13.1	%	

AP revenue in 2014 included net unfavorable currency impact of \$14,129. Including the impact of foreign currency, revenue in 2014 compared to 2013 increased mainly from growth in India, China and the Philippines partially offset by a decrease in Indonesia because of a large order in 2013. Operating profit increased due to higher volume and improved margin performance in the region partially offset by higher operating expense.

Europe, Middle East and Africa:	2014	2013	\$ Change	% Change
Revenue	\$421,141	\$362,167	\$58,974	16.3
Segment operating profit	\$61,574	\$44,507	\$17,067	38.3
Segment operating profit margin	14.6	% 12.3	%	

EMEA revenue increased primarily from higher sales volume in Western Europe and Africa. The acquisition of Cryptera in the third quarter of 2014 resulted in incremental revenue and operating profit of \$14,925 and \$1,232, respectively. The overall volume increase led to product gross margin expansion driving the improvement in operating profit compared to the prior year.

Latin America:	2014	2013	\$ Change	% Change
Revenue	\$239,409	\$241,770	\$(2,361)	(1.0)
Segment operating profit	\$40,285	\$35,218	\$5,067	14.4
Segment operating profit margin	16.8	% 14.6	%	

LA revenue decreased due to a decline in sales concentrated mainly in Colombia and Venezuela, partially offset by FSS growth in Mexico and a net overall improvement in the rest of the region. The Venezuela decrease resulted principally from the adverse impact of currency control policy measures instituted by the Venezuelan government, offset by certain contractual provisions in Venezuelan contracts. Operating profit in 2014 compared to 2013 increased mainly due to the benefit from certain contractual provisions in Venezuela that settled in the year ended December 31, 2014. Service margin was flat year over year despite a lower of cost or market adjustment of \$4,073 in 2014 as a result of the Venezuelan currency devaluation.

Brazil:	2014	2013	\$ Change	% Change
Revenue	\$482,511	\$359,375	\$123,136	34.3
Segment operating profit	\$28,452	\$6,321	\$22,131	—
Segment operating profit margin	5.9	% 1.8	%	

Brazil revenue increased in 2014 compared to 2013, including a net unfavorable currency impact of \$29,093. The constant currency revenue improvement related to lottery sales volume and deliveries of IT equipment to the education ministry in the first quarter of 2014 partially offset by a decrease in FSS volume and elections systems

sales. Operating profit increased as a result of the higher product sales volume and a gain in service margin offset by an increase in operating expenses.

Refer to note 20 to the consolidated financial statements, which is contained in Item 8 of this annual report on Form 10-K, for further details of segment revenue and operating profit.

(unaudited)
(dollars in thousands, except per share amounts)

2013 comparison with 2012

Net Sales

The following table represents information regarding our net sales for the years ended December 31:

	2013	2012	\$ Change	% Change
Total financial self-service	\$2,166,569	\$2,269,197	\$(102,628)	(4.5)
Total security	618,889	623,637	(4,748)	(0.8)
Brazil other	72,033	98,859	(26,826)	(27.1)
Total net sales	\$2,857,491	\$2,991,693	\$(134,202)	(4.5)

The decrease in FSS sales included a net unfavorable currency impact of \$36,869 or 1.6 percent, of which approximately 73 percent related to the Brazilian real. The following segment highlights include the impact of foreign currency. NA FSS sales decreased \$167,104 or 15.9 percent due primarily to lower volume within the U.S. regional bank business partially offset by growth in the national bank sector. A significant portion of the decline was associated with the expiration of the ADA compliance deadline in 2012. The product volume decrease in regional bank business caused a corresponding reduction in the service business specific to installation and professional services sales. AP increased \$56,544 or 14.1 percent due to higher volume in India and China. EMEA increased \$36,125 or 11.1 percent mainly from higher volume in Western Europe and the Middle East primarily in the emerging market of Turkey due in part to the Altus acquisition partially offset by a net decrease in the remainder of the region. Brazil decreased \$20,754 or 7.1 percent, including \$26,969 in unfavorable currency impact. LA declined \$7,440 or 3.7 percent mainly due to volume deterioration in Mexico, partially offset by an increase in Colombia.

Security sales decreased from declines in the LA, NA and AP regions. LA decreased \$8,869 or 15.2 percent largely due declines in Chile. NA experienced a reduction of \$8,378 or 1.6 percent. AP decreased \$4,960 or 19.7 percent as the company executed on its decision in 2013 to exit the security business in Australia. These reductions were partially offset by Brazil increasing from the prior year due to the GAS acquisition.

The decrease in Brazil other sales resulted from lower volume in lottery and election systems driven by cyclical purchasing decisions within the country offset by growth in the IT equipment business.

Gross Profit

The following table represents information regarding our gross profit for the years ended December 31:

	2013	2012	\$ Change	% Change
Gross profit - services	\$414,381	\$410,848	\$3,533	0.9
Gross profit - products	225,975	318,772	(92,797)	(29.1)
Total gross profit	\$640,356	\$729,620	\$(89,264)	(12.2)
Gross margin - services	25.3	% 25.3	%	
Gross margin - products	18.5	% 23.4	%	
Total gross margin	22.4	% 24.4	%	

Total service gross margin remained at 25.3 percent in 2013. NA service gross margin increased due to improvements resulting from lower employee related expense associated with restructuring initiatives and a decrease in insurance

and vehicle related expense in the U.S. maintenance business. In addition, NA benefited from stronger performance in the enterprise security business. These benefits were partially offset by lower FSS product volume within the U.S. regional business related to the expiration of the ADA compliance deadline in 2012, which negatively impacted services utilization specific to professional service and installation. Total service gross margin also benefited from higher volume and improved margins in EMEA and AP, partially offset by a margin decrease in Brazil. Total service gross profit in 2013 and 2012 included restructuring charges of \$27,107 and \$6,226, respectively.

The decrease in total product gross margin was driven by NA, which had significantly lower volume, particularly in the U.S. regional bank business, due to the expiration of the ADA compliance deadline in 2012. In addition, the decline in U.S regional

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS as of December 31, 2014
DIEBOLD, INCORPORATED AND SUBSIDIARIES
(unaudited)
(dollars in thousands, except per share amounts)

bank business coupled with an increase in U.S. national bank sales created a customer mix shift that contributed to the product margin deterioration. Total product gross margin was also negatively influenced by unfavorable customer mix and continued pricing pressure in AP while there was a partially offsetting improvement in EMEA mainly due to favorable manufacturing performance resulting primarily from beneficial currency impact on material purchase prices. Total product gross profit included restructuring charges of \$1,256 in 2013 compared to a net restructuring accrual benefit of \$1,849 in 2012.

Operating Expenses

The following table represents information regarding our operating expenses for the years ended December 31:

	2013	2012	\$ Change	% Change
Selling and administrative expense	\$596,694	\$527,729	\$68,965	13.1
Research, development and engineering expense	92,315	85,881	6,434	7.5
Impairment of assets	72,017	15,783	56,234	—
Gain on sale of assets, net	(2,410)	(1,202)	1,208	—
Total operating expenses	\$758,616	\$628,191	\$130,425	20.8

The increase in selling and administrative expense resulted from higher non-routine expense and restructuring charges, partially offset by lower compensation and commission related expense, savings realized from the Company's continued focus on cost structure and favorable currency impact of \$6,240. Non-routine expenses of \$128,739 and \$41,542 were included in 2013 and 2012, respectively. The primary components of the 2013 non-routine expense were a \$67,593 non-cash pension charge, additional losses of \$28,000 related to the settlement of the FCPA investigation, \$17,245 related to the settlement of the securities class action and executive severance costs of \$9,300. The majority of the 2012 non-routine expense pertained to \$21,907 in early pension buy-out payments made to certain deferred terminated vested participants and estimated losses of \$16,750 related to the FCPA investigation. Selling and administrative expense also included \$22,561 and \$9,037 of restructuring charges in 2013 and 2012, respectively. Restructuring charges in 2013 related to the Company's multi-year realignment plan, including \$31,282 related to the voluntary early retirement program. The 2012 restructuring charges related to the Company's global realignment and global shared services plans.

Research, development and engineering expense as a percent of net sales in 2013 and 2012 were 3.2 percent and 2.9 percent, respectively. The spend increase between years resulted from higher restructuring charges and higher expense related to software development in 2013. Research, development and engineering expense included restructuring charges of \$6,091 and \$1,827 in 2013 and 2012, respectively.

During the third quarter of 2013, the Company performed an other-than-annual assessment for its Brazil reporting unit based on a two-step impairment test as a result of a reduced earnings outlook for the Brazil business unit due to deteriorating macro-economic outlook, structural changes to an auction-based purchasing environment and new competitors entering the market. The Company concluded that the goodwill within the Brazil reporting unit was partially impaired and recorded a \$70,000 pre-tax, non-cash goodwill impairment charge. During the second quarter of 2012, the Company impaired previously capitalized software and software-related costs of \$6,701 due to changes in

the global enterprise resource planning (ERP) system implementation plan related to configuration and design. In the third quarter of 2012, the Company recorded an impairment of \$7,930 related to its 50 percent ownership in Shanghai Diebold King Safe Company, Ltd.

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS as of December 31, 2014
DIEBOLD, INCORPORATED AND SUBSIDIARIES
(unaudited)
(dollars in thousands, except per share amounts)

Operating (Loss) Profit

The following table represents information regarding our operating profit (loss) for the years ended December 31:

	2013	2012	\$ Change	% Change
Operating (loss) profit	\$(118,260)	\$101,429	\$(219,689)	—
Operating (loss) profit margin	(4.1)%	3.4 %	%	

The decline in operating (loss) profit was influenced primarily by lower volume and a shift in customer mix within NA and significant increases in impairment, non-routine expenses and restructuring charges, partially offset by lower operational spend in NA and an overall improvement in service margin.

Other (Expense) Income

The following table represents information regarding our other (expense) income for the years ended December 31:

	2013	2012	\$ Change	% Change
Investment income	\$27,603	\$37,593	\$(9,990)	(26.6)
Interest expense	(29,234)	(30,330)	(1,096)	(3.6)
Foreign exchange gain, net	172	2,654	(2,482)	(93.5)
Miscellaneous, net	(88)	(451)	(363)	(80.5)
Other (expense) income	\$(1,547)	\$9,466	\$(11,013)	—

The decline in investment income was primarily driven by Brazil due to a decrease in total investments, lower interest rates and unfavorable currency impact. Foreign exchange gain, net, in 2013 included a \$1,584 devaluation of the Venezuelan balance sheet.

(Loss) Income from Continuing Operations

The following table represents information regarding our income from continuing operations, net of tax for the years ended December 31:

	2013	2012	\$ Change	% Change
(Loss) income from continuing operations, net of tax	\$(176,522)	\$82,670	\$(259,192)	—
Percent of net sales	(6.2)%	2.8 %	%	
Effective tax rate	(47.3)%	25.5 %	%	

The decrease in (loss) income from continuing operations, net of tax was driven by reduced operating profit mostly related to the decrease in sales volume and the significant increases in impairment, non-routine expenses and restructuring charges, unfavorable movement in other (expense) income and higher taxes. These decreases were partially offset by lower operational spend and an improvement in service margin.

The negative tax rate for 2013 is a result of tax expense of approximately \$55,000 related to the repatriation of previously undistributed earnings and the establishment of a valuation allowance of approximately \$39,200 on deferred tax assets in the Company's Brazilian manufacturing facility. The 2013 tax rate was also negatively impacted by the partially non-deductible Brazil goodwill impairment and the FCPA penalty charge.

Segment Revenue and Operating Profit Summary

The following tables represent information regarding our revenue and operating profit by reporting segment for the years ended December 31:

North America:	2013	2012	\$ Change	% Change
Revenue	\$1,415,050	\$1,590,532	\$(175,482)	(11.0)
Segment operating profit	\$252,737	\$294,996	\$(42,259)	(14.3)
Segment operating profit margin	17.9	% 18.5	%	

The decrease in revenue and operating profit was driven by lower FSS product volume in the U.S. regional bank business associated with the expiration of the ADA compliance deadline in 2012. The product volume decrease in regional bank business caused a corresponding reduction in the service business specific to installation and professional services. These detriments were partially offset by lower compensation and commission related expense, savings realized from the Company's continued focus on cost structure, and margin improvement in the U.S. maintenance business resulting from restructuring initiatives and growth in the national bank business.

Asia Pacific:	2013	2012	\$ Change	% Change
Revenue	\$479,129	\$427,542	\$51,587	12.1
Segment operating profit	\$62,760	\$62,414	\$346	0.6
Segment operating profit margin	13.1	% 14.6	%	

Revenue growth resulted from higher product and service sales primarily within India and China. Operating profit remained neutral to prior year as higher service gross profit resulting from the increased sales and improved service margin performance was offset by a reduction in product gross profit and higher operating expense. Total product gross profit was negatively impacted by unfavorable customer mix and continued pricing pressure in the region.

Europe, Middle East and Africa:	2013	2012	\$ Change	% Change
Revenue	\$362,167	\$325,489	\$36,678	11.3
Segment operating profit	\$44,507	\$28,659	\$15,848	55.3
Segment operating profit margin	12.3	% 8.8	%	

Revenue increased from growth in Western Europe and the Middle East due in part to the Altus acquisition in Turkey, partially offset by a net decline in the rest of EMEA. The increase in operating profit resulted from higher product and service sales complemented by improved margins especially on the product side mainly due to favorable manufacturing performance resulting primarily from beneficial currency impact on material purchase prices. These favorable influences on operating profit were partially offset by higher selling and administrative expense.

Latin America:	2013	2012	\$ Change	% Change
Revenue	\$241,770	\$258,079	\$(16,309)	(6.3)
Segment operating profit	\$35,218	\$44,472	\$(9,254)	(20.8)
Segment operating profit margin	14.6	% 17.2	%	

Revenue declined as lower product sales, primarily due to decreased volume in Mexico and Venezuela, was partially offset by higher sales in the service business. Operating profit was negatively impacted by the net revenue decrease coupled with an overall gross margin decline and higher operating expense.

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS as of December 31, 2014
DIEBOLD, INCORPORATED AND SUBSIDIARIES
(unaudited)
(dollars in thousands, except per share amounts)

Brazil:	2013	2012	\$ Change	% Change
Revenue	\$359,375	\$390,051	\$(30,676)	(7.9)
Segment operating profit	\$6,321	\$3,304	\$3,017	91.3
Segment operating profit margin	1.8	% 0.8	%	

The decrease in revenue included a net unfavorable currency impact of \$36,722. Excluding the negative currency impact, revenue increased from security revenue due to the GAS acquisition and higher IT equipment and FSS sales, partially offset by lower lottery and election systems sales. Operating profit increased as the benefit of lower operating expense outweighed the unfavorable impact of the total revenue decline between years.

Refer to note 20 to the consolidated financial statements, which is contained in Item 8 of this annual report on Form 10-K, for further details of segment revenue and operating profit.

LIQUIDITY AND CAPITAL RESOURCES

Capital resources are obtained from income retained in the business, borrowings under the Company's senior notes, committed and uncommitted credit facilities, long-term industrial revenue bonds and operating and capital leasing arrangements. Management expects that the Company's capital resources will be sufficient to finance planned working capital needs, research and development activities, investments in facilities or equipment, pension contributions, the payment of dividends on the Company's common shares and any repurchases of the Company's common shares for at least the next 12 months. At December 31, 2014, \$438,136 or 95.5 percent of the Company's cash and cash equivalents and short-term investments reside in international tax jurisdictions. Repatriation of these funds could be negatively impacted by potential payments for foreign and domestic taxes, excluding \$88,388 that is available for repatriation with no additional tax expense because the Company has already provided for such taxes. Part of the Company's growth strategy is to pursue strategic acquisitions. The Company has made acquisitions in the past and intends to make acquisitions in the future. The Company intends to finance any future acquisitions with either cash and short-term investments, cash provided from operations, borrowings under available credit facilities, proceeds from debt or equity offerings and/or the issuance of common shares.

The Company's global liquidity as of December 31, 2014 and 2013 was as follows:

	2014	2013
Cash and cash equivalents	\$322,017	\$230,709
Additional cash availability from		
Short-term uncommitted lines of credit	115,192	63,747
Five-year credit facility	280,000	261,000
Short-term investments	136,653	242,988
Total global liquidity	\$853,862	\$798,444

The following table summarizes the results of our consolidated statement of cash flows for the years ended December 31:

Net cash flow provided by (used in)	2014	2013	2012
Operating activities	\$186,906	\$124,224	\$135,508
Investing activities	13,799	(52,719)	(72,831)
Financing activities	(81,154)	(204,449)	(36,227)

Edgar Filing: DIEBOLD INC - Form 10-K

Effect of exchange rate changes on cash and cash equivalents	(28,243)	(5,139)	8,422
Net increase (decrease) in cash and cash equivalents	\$91,308		\$(138,083)	\$34,872

Net cash provided by operating activities was \$186,906 for the year ended December 31, 2014 compared to \$124,224 for the year ended December 31, 2013, an increase of \$62,682. Cash flows from operating activities are generated primarily from net income and managing the components of working capital. Cash flows from operating activities during the year ended December 31, 2014 compared to the year ended December 31, 2013 were positively impacted by a \$293,541 increase in net income, primarily related

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS as of December 31, 2014
DIEBOLD, INCORPORATED AND SUBSIDIARIES
(unaudited)
(dollars in thousands, except per share amounts)

to the FCPA, securities litigation action, and voluntary employee retirement program, which were recorded in 2013. Cash flows from operating activities are also impacted by changes in the components of our working capital, which vary based on normal activities with our customers and vendors. As compared to the year ended December 31, 2013, cash flow during the corresponding period in 2014 was adversely impacted by an increase in our change in trade receivables of \$30,698, which results in part to growth in our revenue. Trade receivables as of December 31, 2013, were down \$41,134 compared to December 31, 2012, as a result of strong cash collections in the fourth quarter of 2013. The cash flow effect of the change in inventories corresponds with the change in accounts payable. This change is a result of our investment in inventory to support planned customer demand. The cash flow impact associated with deferred revenue largely represents prepayments received on service contracts and product sales. Finance lease receivables increased in the year ended December 31, 2014 primarily due to increases in customer financing arrangements mostly in Brazil.

Net cash provided by investing activities was \$13,799 for the year ended December 31, 2014 compared to net cash used in investing activities of \$52,719 for the year ended 2013. The \$66,518 change mostly related to a \$105,719 increase in net investment activity primarily in Brazil to fund our finance leasing arrangement with the Brazilian education ministry, an increase of \$10,905 in proceeds from the sale of assets primarily related to the sale of Eras in the second quarter of 2014 which was partially offset by a decrease of \$11,749 relating to cash payments for the Cryptera acquisition. Capital expenditures increased \$26,006 to \$61,453 for the year ended December 31, 2014 from \$35,447 for the year ended December 31, 2013 as a result of additional capital reinvestment related to the Company's transformation strategy.

Net cash used in financing activities was \$81,154 for the year ended December 31, 2014 compared to the net cash used in financing activities of \$204,449 for the year ended 2013, an increase of \$123,295. The increase was primarily due to a \$109,477 change in debt repayments and borrowing year over year and \$14,755 reduction in distributions to noncontrolling interest holders.

Effect of exchange rate changes on cash and cash equivalents was negatively impacted by \$6,051 in the first quarter of 2014 related to the currency devaluation in Venezuela for the year ended December 31, 2014.

Benefit Plans The Company expects to contribute \$18,648 to its pension plans during the year ending December 31, 2015. Beyond 2015, minimum statutory funding requirements for the Company's U.S. pension plans may become more significant. The actual amounts required to be contributed are dependent upon, among other things, interest rates, underlying asset returns and the impact of legislative or regulatory actions related to pension funding obligations. The Company has adopted a pension investment policy designed to achieve an adequate funded status based on expected benefit payouts and to establish an asset allocation that will meet or exceed the return assumption while maintaining a prudent level of risk. The plan's target asset allocation adjusts based on the plan's funded status. As the funded status improves or declines, the debt security target allocation will increase and decrease, respectively. Management monitors assumptions used for our actuarial projections as well as any funding requirements for the plans.

Payments due under the Company's other post-retirement benefit plans are not required to be funded in advance. Payments are made as medical costs are incurred by covered retirees, and are principally dependent upon the future cost of retiree medical benefits under these plans. The Company expects the other post-retirement benefit plan payments to be approximately \$1,533 in 2015 (refer to note 13 to the consolidated financial statements, which is contained in Item 8 of this annual report on Form 10-K, for further discussion of the Company's pension and other post-retirement benefit plans).

Dividends The Company paid dividends of \$74,946, \$73,997 and \$72,830 in the years ended December 31, 2014, 2013 and 2012, respectively. Annualized dividends per share were \$1.15, \$1.15 and \$1.14 for the years ended December 31, 2014, 2013 and 2012, respectively. The first quarterly dividend of 2015 represents an annualized dividend of \$1.15 per share.

AND RESULTS OF OPERATIONS as of December 31, 2014
DIEBOLD, INCORPORATED AND SUBSIDIARIES
(unaudited)
(dollars in thousands, except per share amounts)

Contractual Obligations The following table summarizes the Company's approximate obligations and commitments to make future payments under contractual obligations as of December 31, 2014:

	Total	Payment due by period			
		Less than 1 year	1-3 years	3-5 years	More than 5 years
Minimum operating lease obligations	\$ 149,283	\$44,790	\$57,587	\$30,268	\$16,638
Debt	505,369	25,575	189,321	290,473	—
Interest on debt (1)	44,099	17,256	17,893	8,950	—
Purchase commitments	3,616	3,616	—	—	—
Total	\$702,367	\$91,237	\$264,801	\$329,691	\$16,638

(1) Amounts represent estimated contractual interest payments on outstanding long-term debt and notes payable. Rates in effect as of December 31, 2014 are used for variable rate debt.

At December 31, 2014, the Company also maintained uncertain tax positions of \$14,967, for which there is a high degree of uncertainty as to the expected timing of payments (refer to note 5 to the consolidated financial statements, which is contained in Item 8 of this annual report on Form 10-K).

As of December 31, 2014, the Company had various short-term uncommitted lines of credit with borrowing limits of \$139,942. The weighted-average interest rate on outstanding borrowings on the short-term uncommitted lines of credit as of December 31, 2014 and 2013 was 2.96 percent and 3.24 percent, respectively. The decrease in the weighted-average interest rate is attributable to the change in mix of borrowings in foreign entities. Short-term uncommitted lines mature in less than one year. The amount available under the short-term uncommitted lines at December 31, 2014 was \$115,192.

In August 2014, the Company amended and extended its credit facility. As of December 31, 2014, the Company has increased its borrowing limits under its amended credit facility from \$500,000 to \$520,000. The amended facility expires in August 2019 and did not change any of the covenants related to the previous agreement. Under the terms of the amended credit facility agreement, the Company has the ability, subject to various approvals, to increase the borrowing limits by \$250,000. Up to \$50,000 of the revolving credit facility is available under a swing line subfacility. The weighted-average interest rate on outstanding credit facility borrowings as of December 31, 2014 and 2013 was 1.69 percent and 1.36 percent, respectively, which is variable based on the London Interbank Offered Rate (LIBOR). The amount available under the credit facility as of December 31, 2014 was \$280,000. The Company incurred \$1,368 of fees related to its amended credit facility in 2014, which are amortized as a component of interest expense over the term of the facility.

In March 2006, the Company issued senior notes in an aggregate principal amount of \$300,000 with a weighted-average fixed interest rate of 5.50 percent. The Company entered into a derivative transaction to hedge interest rate risk on \$200,000 of the senior notes, which was treated as a cash flow hedge. This reduced the effective interest rate from 5.50 percent to 5.36 percent. The Company funded the repayment of \$75,000 of the senior notes at maturity in March 2013 using borrowings under its revolving credit facility. The maturity dates of the remaining senior notes are staggered, with \$175,000 and \$50,000 due in 2016 and 2018, respectively.

The Company's financing agreements contain various restrictive financial covenants, including net debt to capitalization and net interest coverage ratios. As of December 31, 2014, the Company was in compliance with the financial covenants in its debt agreements.

Off-Balance Sheet Arrangements The Company enters into various arrangements not recognized in the consolidated balance sheets that have or could have an effect on its financial condition, results of operations, liquidity, capital expenditures or capital resources. The principal off-balance sheet arrangements that the Company enters into are guarantees, operating leases (refer to note 14 to the consolidated financial statements, which is contained in Item 8 of this annual report on Form 10-K) and sales of finance receivables. The Company provides its global operations guarantees and standby letters of credit through various financial institutions to suppliers, customers, regulatory agencies and insurance providers. If the Company is not able to comply with its contractual obligations, the suppliers, regulatory agencies and insurance providers may draw on the pertinent bank (refer to note 15 to the consolidated financial statements, which is contained in Item 8 of this annual report on Form 10-K). The Company has sold finance receivables to financial institutions while continuing to service the receivables. The Company records these sales by

removing finance receivables from the consolidated balance sheets and recording gains and losses in the consolidated statement of operations (refer to note 7 to the consolidated financial statements, which is contained in Item 8 of this annual report on Form 10-K).

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Management's discussion and analysis of the Company's financial condition and results of operations are based upon the Company's consolidated financial statements. The consolidated financial statements of the Company are prepared in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP). The preparation of the accompanying consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions about future events. These estimates and the underlying assumptions affect the amounts of assets and liabilities reported, disclosures about contingent assets and liabilities and reported amounts of revenues and expenses. Such estimates include revenue recognition, the valuation of trade and financing receivables, inventories, goodwill, intangible assets, other long-lived assets, legal contingencies, guarantee obligations, and assumptions used in the calculation of income taxes, pension and post-retirement benefits and customer incentives, among others. These estimates and assumptions are based on management's best estimates and judgment. Management evaluates its estimates and assumptions on an ongoing basis using historical experience and other factors. Management monitors the economic conditions and other factors and will adjust such estimates and assumptions when facts and circumstances dictate. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates.

The Company's significant accounting policies are described in note 1 to the consolidated financial statements, which is contained in Item 8 of this annual report on Form 10-K. Management believes that, of its significant accounting policies, its policies concerning revenue recognition, allowances for credit losses, inventory reserves, goodwill, long-lived assets, taxes on income, contingencies and pensions and post-retirement benefits are the most critical because they are affected significantly by judgments, assumptions and estimates. Additional information regarding these policies is included below.

Revenue Recognition The Company records revenue when it is realized, or realizable and earned. The application of U.S. GAAP revenue recognition principles to the Company's customer contracts requires judgment, including the determination of whether an arrangement includes multiple deliverables such as hardware, software, maintenance and /or other services. For contracts that contain multiple deliverables, total arrangement consideration is allocated at the inception of the arrangement to each deliverable based on the relative selling price method. The relative selling price method is based on a hierarchy consisting of vendor specific objective evidence (VSOE) (price sold on a stand-alone basis), if available, or third-party evidence (TPE), if VSOE is not available, or estimated selling price (ESP) if neither VSOE nor TPE is available. The Company's ESP is consistent with the objective of determining VSOE, which is the price at which we would expect to transact on a stand-alone sale of the deliverable. The determination of ESP is based on applying significant judgment to weigh a variety of company-specific factors including our pricing practices, customer volume, geography, internal costs and gross margin objectives. This information is gathered from experience in customer negotiations, recent technological trends and the competitive landscape. In contracts that involve multiple deliverables, maintenance services are typically accounted for under Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 605-20, Separately Priced Extended Warranty and Product Maintenance

Contracts. There have been no material changes to these estimates for the periods presented and the Company believes that these estimates generally should not be subject to significant changes in the future. However, changes to deliverables in future arrangements could materially impact the amount of earned or deferred revenue.

For sales of software, excluding software required for the equipment to operate as intended, the Company applies the software revenue recognition principles within FASB ASC 985-605, Software - Revenue Recognition. For software and software-related deliverables (software elements), the Company allocates revenue based upon the relative fair value of these deliverables as determined by VSOE. If the Company cannot obtain VSOE for any undelivered software element, revenue is deferred until all deliverables have been delivered or until VSOE can be determined for any remaining undelivered software elements. When the fair value of a delivered element cannot be established, but fair value evidence exists for the undelivered software elements, the Company uses the residual method to recognize revenue. Under the residual method, the fair value of the undelivered elements is deferred and the remaining portion of the arrangement consideration is allocated to the delivered elements and recognized as revenue. Determination of amounts deferred for software support requires judgment about whether the deliverables can be divided into more than one unit of accounting and whether the separate deliverables have value to the customer on a stand-alone basis. There have been no material changes to these deliverables for the periods presented. However, changes to deliverables in future arrangements and the ability to establish VSOE could affect the amount and timing of revenue recognition.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS as of December 31, 2014
DIEBOLD, INCORPORATED AND SUBSIDIARIES
(unaudited)
(dollars in thousands, except per share amounts)

Allowances for Credit Losses The Company maintains allowances for potential credit losses and such losses have been minimal and within management's expectations. Since the Company's receivable balance is concentrated primarily in the financial and government sectors, an economic downturn in these sectors could result in higher than expected credit losses. The concentration of credit risk in the Company's trade receivables with respect to financial and government customers is largely mitigated by the Company's credit evaluation process and the geographical dispersion of sales transactions from a large number of individual customers.

Inventory Reserves At each reporting period, the Company identifies and writes down its excess and obsolete inventories to net realizable value based on usage forecasts, order volume and inventory aging. With the development of new products, the Company also rationalizes its product offerings and will write-down discontinued product to the lower of cost or net realizable value.

Goodwill Goodwill is the cost in excess of the net assets of acquired businesses (refer to note 11 to the consolidated financial statements, which is contained in Item 8 of this annual report on Form 10-K). The Company tests all existing goodwill at least annually as of November 30 for impairment on a reporting unit basis. The Company tests for impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the carrying value of a reporting unit below its reported amount. The Company's five reporting units are defined as Domestic and Canada, Brazil, LA, AP and EMEA. Each year, the Company may elect to perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. In evaluating whether it is more likely than not the fair value of a reporting unit is less than its carrying amount, the Company considers the following events and circumstances, among others, if applicable: (a) macroeconomic conditions such as general economic conditions, limitations on accessing capital or other developments in equity and credit markets; (b) industry and market considerations such as competition, multiples or metrics and changes in the market for the Company's products and services or regulatory and political environments; (c) cost factors such as raw materials, labor or other costs; (d) overall financial performance such as cash flows, actual and planned revenue and earnings compared with actual and projected results of relevant prior periods; (e) other relevant events such as changes in key personnel, strategy or customers; (f) changes in the composition of a reporting unit's assets or expected sales of all or a portion of a reporting unit; and (g) any sustained decrease in share price.

If the Company's qualitative assessment indicates that it is more likely than not that the fair value of a reporting unit is less than its carrying value, or if management elects to perform a quantitative assessment of goodwill, a two-step impairment test is used to identify potential goodwill impairment and measure the amount of any impairment loss to be recognized. In the first step, the Company compares the fair value of each reporting unit with its carrying value. The fair value is determined based upon discounted estimated future cash flows as well as the market approach or guideline public company method. The Company's Step 1 impairment test of goodwill of a reporting unit is based upon the fair value of the reporting unit, defined as the price that would be received to sell the net assets or transfer the net liabilities in an orderly transaction between market participants at the assessment date. In the event that the net carrying amount exceeds the fair value, a Step 2 test must be performed whereby the fair value of the reporting unit's goodwill must be estimated to determine if it is less than its net carrying amount. In its two-step test, the Company uses the discounted cash flow method and the guideline company method for determining the fair value of its

reporting units. Under these methods, the determination of implied fair value of the goodwill for a particular reporting unit is the excess of the fair value of a reporting unit over the amounts assigned to its assets and liabilities in the same manner as the allocation in a business combination.

The techniques used in the Company's qualitative assessment and, if necessary, two-step impairment test have incorporated a number of assumptions that the Company believes to be reasonable and to reflect market conditions forecast at the assessment date. Assumptions in estimating future cash flows are subject to a high degree of judgment. The Company makes all efforts to forecast future cash flows as accurately as possible with the information available at the time the forecast is made. To this end, the Company evaluates the appropriateness of its assumptions as well as its overall forecasts by comparing projected results of upcoming years with actual results of preceding years and validating that differences therein are reasonable. Key assumptions, all of which are Level 3 inputs (refer to note 19 to the consolidated financial statements, which is contained in Item 8 of this annual report on Form 10-K), relate to price trends, material costs, discount rate, customer demand, and the long-term growth and foreign exchange rates. A number of benchmarks from independent industry and other economic publications were also used. Changes in assumptions and estimates after the assessment date may lead to an outcome where impairment charges would be required in future periods. Specifically, actual results may vary from the Company's forecasts and such variations may be material and unfavorable, thereby triggering the need for future impairment tests where the conclusions may differ in reflection of prevailing market conditions.

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS as of December 31, 2014
DIEBOLD, INCORPORATED AND SUBSIDIARIES
(unaudited)
(dollars in thousands, except per share amounts)

Management determined that the Brazil and AP reporting units had excess fair value of approximately \$61,000 or 17 percent and approximately \$114,200 or 39 percent, respectively, when compared to their carrying amounts. The Domestic and Canada and LA reporting units had excess fair value greater than 100 percent when compared to their carrying amounts.

During the third quarter of 2013, the Company performed an other-than-annual assessment for its Brazil reporting unit based on a two-step impairment test as a result of a reduced earnings outlook for the Brazil business unit. This was due to a deteriorating macro-economic outlook, structural changes to an auction-based purchasing environment and new competitors entering the market. The Company concluded that the goodwill within the Brazil reporting unit was partially impaired and recorded a \$70,000 pre-tax, non-cash goodwill impairment charge. In the fourth quarter of 2013, the Brazil reporting unit was reviewed for impairment based on a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. In addition, the remaining reporting units were reviewed based on a two-step test. These tests resulted in no additional impairment in any of the Company's reporting units.

Long-Lived Assets Impairment of long-lived assets is recognized when events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. If the expected future undiscounted cash flows are less than the carrying amount of the asset, an impairment loss is recognized at that time to reduce the asset to the lower of its fair value or its net book value.

Taxes on Income Deferred taxes are provided on an asset and liability method, whereby deferred tax assets are recognized for deductible temporary differences, operating loss carry-forwards and tax credits. Deferred tax liabilities are recognized for taxable temporary differences and undistributed earnings in certain jurisdictions. Deferred tax assets are reduced by a valuation allowance when, based upon the available evidence, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Determination of a valuation allowance involves estimates regarding the timing and amount of the reversal of taxable temporary differences, expected future taxable income and the impact of tax planning strategies. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.

The Company operates in numerous taxing jurisdictions and is subject to examination by various federal, state and foreign jurisdictions for various tax periods. Additionally, the Company has retained tax liabilities and the rights to tax refunds in connection with various acquisitions and divestitures of businesses. The Company's income tax positions are based on research and interpretations of the income tax laws and rulings in each of the jurisdictions in which the Company does business. Due to the subjectivity of interpretations of laws and rulings in each jurisdiction, the differences and interplay in tax laws between those jurisdictions, as well as the inherent uncertainty in estimating the final resolution of complex tax audit matters, the Company's estimates of income tax liabilities may differ from actual payments or assessments.

The Company assesses its position with regard to tax exposures and records liabilities for these uncertain tax positions and any related interest and penalties, when the tax benefit is not more likely than not realizable. The Company has recorded an accrual that reflects the recognition and measurement process for the financial statement recognition and

measurement of a tax position taken or expected to be taken on a tax return. Additional future income tax expense or benefit may be recognized once the positions are effectively settled.

At the end of each interim reporting period, the Company estimates the effective tax rate expected to apply to the full fiscal year. The estimated effective tax rate contemplates the expected jurisdiction where income is earned, as well as tax planning alternatives. Current and projected growth in income in higher tax jurisdictions may result in an increasing effective tax rate over time. If the actual results differ from estimates, the Company may adjust the effective tax rate in the interim period if such determination is made.

Contingencies Liabilities for loss contingencies arising from claims, assessments, litigation, fines, and penalties and other sources are recorded when it is probable that a liability has been incurred and the amount can be reasonably estimated. Legal costs incurred in connection with loss contingencies are expensed as incurred. There is no liability recorded for matters in which the liability is not probable and reasonably estimable. Attorneys in the Company's legal department monitor and manage all claims filed against the Company and review all pending investigations. Generally, the estimate of probable loss related to these matters is developed in consultation with internal and outside legal counsel representing the Company. These estimates are based upon an analysis of potential results, assuming a combination of litigation and settlement strategies. The Company attempts to resolve these matters through settlements, mediation and arbitration proceedings when possible. If the actual settlement costs, final judgments, or fines,

Table of Contents

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS as of December 31, 2014
DIEBOLD, INCORPORATED AND SUBSIDIARIES
(unaudited)
(dollars in thousands, except per share amounts)

after appeals, differ from the estimates, the future results may be materially impacted. Adjustments to the initial estimates are recorded when a change in the estimate is identified.

Pensions and Other Post-retirement Benefits Annual net periodic expense and benefit liabilities under the Company's defined benefit plans are determined on an actuarial basis. Assumptions used in the actuarial calculations have a significant impact on plan obligations and expense. Members of the management investment committee periodically review the actual experience compared with the more significant assumptions used and make adjustments to the assumptions, if warranted. The discount rate is determined by analyzing the average return of high-quality (i.e., AA-rated) fixed-income investments and the year-over-year comparison of certain widely used benchmark indices as of the measurement date. The expected long-term rate of return on plan assets is determined using the plans' current asset allocation and their expected rates of return based on a geometric averaging over 20 years. The rate of compensation increase assumptions reflects the Company's long-term actual experience and future and near-term outlook. Pension benefits are funded through deposits with trustees. Other post-retirement benefits are not funded and the Company's policy is to pay these benefits as they become due.

The following table represents assumed healthcare cost trend rates at December 31:

	2014	2013	
Healthcare cost trend rate assumed for next year	7.5	% 7.5	%
Rate to which the cost trend rate is assumed to decline (the ultimate trend rate)	5.0	% 5.0	%
Year that rate reaches ultimate trend rate	2020	2019	

The healthcare trend rates are reviewed based upon the results of actual claims experience. The Company used healthcare cost trends of 7.5 percent in both 2015 and 2014 decreasing to an ultimate trend of 5.0 percent in 2020 for both medical and prescription drug benefits using the Society of Actuaries Long Term Trend Model with assumptions based on the 2008 Medicare Trustees' projections. Assumed healthcare cost trend rates have a significant effect on the amounts reported for the healthcare plans. A one-percentage-point change in assumed healthcare cost trend rates would have the following effects:

	One-Percentage-Point Increase	One-Percentage-Point Decrease	
Effect on total of service and interest cost	\$ 34	\$ (32)
Effect on other post-retirement benefit obligation	\$ 928	\$ (836)

During 2014, the Society of Actuaries released a series of updated mortality tables resulting from recent studies conducted by them measuring mortality rates for various groups of individuals. As of December 31, 2014, the Company updated these mortality tables which reflect improved trends in longevity and therefore have the effect of increasing the estimate of benefits to be received by plan participants. Management will continue to monitor assumptions used for our actuarial projections along with any funding requirements for the plans.

RECENTLY ISSUED ACCOUNTING GUIDANCE

Refer to note 1 to the consolidated financial statements, which is contained in Item 8 of this annual report on Form 10-K, for information on recently issued accounting guidance.

FORWARD-LOOKING STATEMENT DISCLOSURE

In this annual report on Form 10-K, statements that are not reported financial results or other historical information are “forward-looking statements.” Forward-looking statements give current expectations or forecasts of future events and are not guarantees of future performance. These forward-looking statements relate to, among other things, the Company’s future operating performance, the Company’s share of new and existing markets, the Company’s short- and long-term revenue and earnings growth rates, the Company’s implementation of cost-reduction initiatives and measures to improve pricing, including the optimization of the Company’s manufacturing capacity. The use of the words "will," "believes," "anticipates," "plans," "projects," "expects," "intends" and similar expressions is intended to identify forward-looking statements that have been made and may in the future be made by or on behalf of the Company.

Table of Contents

AND RESULTS OF OPERATIONS as of December 31, 2014
DIEBOLD, INCORPORATED AND SUBSIDIARIES
(unaudited)
(dollars in thousands, except per share amounts)

Although the Company believes that these forward-looking statements are based upon reasonable assumptions regarding, among other things, the economy, its knowledge of its business, and on key performance indicators that impact the Company, these forward-looking statements involve risks, uncertainties and other factors that may cause actual results to differ materially from those expressed in or implied by the forward-looking statements. The Company is not obligated to update forward-looking statements, whether as a result of new information, future events or otherwise.

Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. Some of the risks, uncertainties and other factors that could cause actual results to differ materially from those expressed in or implied by the forward-looking statements include, but are not limited to:

- competitive pressures, including pricing pressures and technological developments;
- changes in the Company's relationships with customers, suppliers, distributors and/or partners in its business ventures;
- changes in political, economic or other factors such as currency exchange rates, inflation rates, recessionary or expansive trends, taxes and regulations and laws affecting the worldwide business in each of the Company's operations;
- global economic conditions, including any additional deterioration and disruptions in the financial markets, including bankruptcies, restructurings or consolidations of financial institutions, which could reduce our customer base and/or adversely affect our customers' ability to make capital expenditures, as well as adversely impact the availability and cost of credit;
- acceptance of the Company's product and technology introductions in the marketplace;
- the Company's ability to maintain effective internal controls;
- changes in the Company's intention to further repatriate cash and cash equivalents and short-term investments residing in international tax jurisdictions could negatively impact foreign and domestic taxes;
- unanticipated litigation, claims or assessments, as well as the outcome/impact of any current/pending litigation, claims or assessments, including with respect to the Company's Brazilian tax dispute;
- variations in consumer demand for FSS technologies, products and services;
- potential security violations to the Company's information technology systems;
- the investment performance of the Company's pension plan assets, which could require the Company to increase its pension contributions, and significant changes in healthcare costs, including those that may result from government action;
- the amount and timing of repurchases of the Company's common shares, if any;
- the Company's ability to achieve benefits from its cost-reduction initiatives and other strategic changes, including its multi-year realignment plan and other restructuring actions, as well as its business process outsourcing initiative; and
- the risk factors described above under "Part I - Item 1A - Risk Factors" of this Form 10-K.

ITEM 7A: QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company's Venezuelan operations consist of a fifty-percent owned subsidiary, which is consolidated. Venezuela financial results are measured using the U.S. dollar as its functional currency because its economy is considered highly inflationary. On March 24, 2014, the Venezuelan government announced a currency exchange mechanism, SICAD 2, which yielded an exchange rate significantly higher than the rates established through the other regulated exchange mechanisms. Management determined that it was unlikely that the Company would be able to convert bolivars under a currency exchange other than SICAD 2. On March 31, 2014, the Company remeasured its Venezuelan balance sheet using the SICAD 2 rate of 50.86 compared to the previous official government rate of 6.30, resulting in a decrease of \$6,051 to the Company's cash balance and net losses of \$12,101 that were recorded within foreign exchange (loss) gain, net in the consolidated statements of operations in the first quarter of 2014. In addition, as a result of the currency devaluation, the Company recorded a \$4,073 lower of cost or market adjustment related to its service inventory within service cost of sales in the consolidated statements of operations in the first quarter of 2014. In the future, if the Company converts bolivars at a rate other than the SICAD 2 rate, the Company may realize additional gains or losses that would be recorded in the statements of operations. The Company's Venezuelan operations represented less than one percent of the Company's total assets as of December 31, 2014 and less than one percent of net sales for the year ended December 31, 2014. The Company does not expect its Venezuelan operations to be a significant component of its consolidated revenue or operating profit during 2015.

The Company is exposed to foreign currency exchange rate risk inherent in its international operations denominated in currencies other than the U.S. dollar. A hypothetical 10 percent movement in the applicable foreign exchange rates would have resulted in an increase or decrease in 2014 and 2013 year-to-date operating profit of approximately \$10,088 and \$341, respectively. The sensitivity model assumes an instantaneous, parallel shift in the foreign currency exchange rates. Exchange rates rarely move in the same direction. The assumption that exchange rates change in an instantaneous or parallel fashion may overstate the impact of changing exchange rates on amounts denominated in a foreign currency.

The Company's risk-management strategy uses derivative financial instruments such as forwards to hedge certain foreign currency exposures. The intent is to offset gains and losses that occur on the underlying exposures, with gains and losses on the derivative contracts hedging these exposures. The Company does not enter into derivatives for trading purposes. The Company's primary exposures to foreign exchange risk are movements in the euro/U.S. dollar, U.S. dollar/Brazilian real/U.S. dollar and Chinese yuan renminbi/U.S. dollar. There were no significant changes in the Company's foreign exchange risks in 2014 compared with 2013.

The Company manages interest rate risk with the use of variable rate borrowings under its committed and uncommitted credit facilities and interest rate swaps. Variable rate borrowings under the credit facilities totaled \$280,369 and \$293,962 at December 31, 2014 and 2013, respectively, of which \$50,000 for both years was effectively converted to fixed rate using interest rate swaps. A one percentage point increase or decrease in interest rates would have resulted in an increase or decrease in interest expense of approximately \$2,331 and \$2,391 for 2014 and 2013, respectively, including the impact of the swap agreements. The Company's primary exposure to interest rate risk is movements in the LIBOR, which is consistent with prior periods.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders

Diebold, Incorporated:

We have audited the accompanying consolidated balance sheets of Diebold, Incorporated and subsidiaries as of December 31, 2014 and 2013, and the related consolidated statements of operations, comprehensive (loss) income, equity, and cash flows for each of the years in the three year period ended December 31, 2014. In connection with our audits of the consolidated financial statements, we also have audited financial statement schedule, Schedule II "Valuation and Qualifying Accounts." These consolidated financial statements and the financial statement schedule are the responsibility of Diebold, Incorporated's management. Our responsibility is to express an opinion on these consolidated financial statements and the financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Diebold, Incorporated and subsidiaries as of December 31, 2014 and 2013, and the results of their operations and their cash flows for each of the years in the three year period ended December 31, 2014, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Diebold, Incorporated's internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control - Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 17, 2015 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders

Diebold, Incorporated:

We have audited Diebold, Incorporated's internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control - Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Diebold, Incorporated's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting appearing under Item 9A(b) of the Diebold, Incorporated's December 31, 2014 annual report on Form 10-K. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Diebold, Incorporated maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control - Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Diebold, Incorporated and subsidiaries as of December 31, 2014 and 2013, and the related consolidated statements of operations, comprehensive (loss) income, equity, and cash flows for each of the years in the three-year period ended December 31, 2014, and our report dated February 17, 2015 expressed an unqualified opinion on those consolidated financial statements.

FORM 10-K as of December 31, 2014

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(in thousands, except per share amounts)

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation The consolidated financial statements include the accounts of Diebold, Incorporated and its wholly- and majority-owned subsidiaries (collectively, the Company). All significant intercompany accounts and transactions have been eliminated.

Use of Estimates in Preparation of Consolidated Financial Statements The preparation of the accompanying consolidated financial statements in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP) requires management to make estimates and assumptions about future events. These estimates and the underlying assumptions affect the amounts of assets and liabilities reported, disclosures about contingent assets and liabilities, and reported amounts of revenues and expenses. Such estimates include revenue recognition, the valuation of trade and financing receivables, inventories, goodwill, intangible assets, other long-lived assets, legal contingencies, guarantee obligations and assumptions used in the calculation of income taxes, pension and other post-retirement benefits and customer incentives, among others. These estimates and assumptions are based on management's best estimates and judgment. Management evaluates its estimates and assumptions on an ongoing basis using historical experience and other factors. Management monitors the economic condition and other factors and will adjust such estimates and assumptions when facts and circumstances dictate. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates.

International Operations The financial statements of the Company's international operations are measured using local currencies as their functional currencies, with the exception of Venezuela's financial results, which are measured using the currency exchange mechanism, SICAD 2. The Company translates the assets and liabilities of its non-U.S. subsidiaries at the exchange rates in effect at year end and the results of operations at the average rate throughout the year. The translation adjustments are recorded directly as a separate component of shareholders' equity, while transaction gains (losses) are included in net income. Sales to customers outside the United States in relation to total consolidated net sales approximated 56.1 percent, 52.3 percent and 48.7 percent in 2014, 2013 and 2012, respectively.

Venezuelan Currency Devaluation The Company's Venezuelan operations consist of a fifty-percent owned subsidiary, which is consolidated. Venezuela financial results are measured using the U.S. dollar as its functional currency because its economy is considered highly inflationary. On March 24, 2014, the Venezuelan government announced a currency exchange mechanism, SICAD 2, which yielded an exchange rate significantly higher than the rates established through the other regulated exchange mechanisms. Management determined that it was unlikely that the Company would be able to convert bolivars under a currency exchange other than SICAD 2. On March 31, 2014, the Company remeasured its Venezuelan balance sheet using the SICAD 2 rate of 50.86 compared to the previous official government rate of 6.30, resulting in a decrease of \$6,051 to the Company's cash balance and net losses of \$12,101 that were recorded within foreign exchange (loss) gain, net in the consolidated statements of operations in the first quarter of 2014. In addition, as a result of the currency devaluation, the Company recorded a \$4,073 lower of cost or market adjustment related to its service inventory within service cost of sales in the consolidated statements of operations in the first quarter of 2014. In the future, if the Company converts bolivars at a rate other than the SICAD 2 rate, the Company may realize additional gains or losses that would be recorded in the statements of operations. The Company's Venezuelan operations represented less than one percent of the Company's total assets as of December 31, 2014 and less than one percent of net sales for the year ended December 31, 2014. The Company does not expect its

Venezuelan operations to be a significant component of its consolidated revenue or operating profit during 2015.

Acquisition and Divestiture In the third quarter of 2014, the Company acquired Cryptera A/S (Cryptera), a supplier of the Company's encrypting PIN pad technology and a world leader in the research and development of secure payment technologies. The total purchase price was approximately \$13,000 and Cryptera is included in the Europe, Middle East and Africa (EMEA) segment within the Company's consolidated financial statements from July 1, 2014, the date of acquisition. In the second quarter of 2014, the Company divested its check and payment processing subsidiary, Diebold Eras, Incorporated (Eras), which resulted in a gain of \$13,709 recognized within gain on sale of assets, net in the consolidated statement of operations. Eras was included in the North America (NA) segment. Total assets and operating results of Eras were not significant to the consolidated financial statements.

Reclassification The Company has reclassified the presentation of certain prior-year information to conform to the current presentation.

DIEBOLD INCORPORATED AND SUBSIDIARIES

FORM 10-K as of December 31, 2014

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

(in thousands, except per share amounts)

Revenue Recognition The Company's revenue recognition policy is consistent with the requirements of Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 605, Revenue Recognition (ASC 605). In general, the Company records revenue when it is realized, or realizable and earned. The Company considers revenue to be realized, or realizable and earned when, persuasive evidence of an arrangement exists, the products or services have been approved by the customer after delivery and/or installation acceptance or performance of services; the sales price is fixed or determinable within the contract; and collectability is reasonably assured. The Company's products include both hardware and the software required for the equipment to operate as intended, and for product sales, the Company determines the earnings process is complete when title, risk of loss and the right to use the product has transferred to the customer. Within the North America region, the earnings process is completed upon customer acceptance. Where the Company is contractually responsible for installation, customer acceptance occurs upon completion of the installation of all equipment at a job site and the Company's demonstration that the equipment is in operable condition. Where the Company is not contractually responsible for installation, customer acceptance occurs upon shipment or delivery to a customer location depending on the terms within the contract. Internationally, customer acceptance is upon the earlier of delivery or completion of the installation depending on the terms in the contract with the customer.

The application of ASC 605 to the Company's customer contracts requires judgment, including the determination of whether an arrangement includes multiple deliverables such as hardware, software, maintenance and/or other services. For contracts that contain multiple deliverables, total arrangement consideration is allocated at the inception of the arrangement to each deliverable based on the relative selling price method. The relative selling price method is based on a hierarchy consisting of vendor specific objective evidence (VSOE) (price when sold on a stand-alone basis), if available, or third-party evidence (TPE), if VSOE is not available, or estimated selling price (ESP) if neither VSOE nor TPE is available. The Company's ESP is consistent with the objective of determining VSOE, which is the price at which we would expect to transact on a stand-alone sale of the deliverable. The determination of ESP is based on applying significant judgment to weigh a variety of company-specific factors including our pricing practices, customer volume, geography, internal costs and gross margin objectives, information gathered from experience in customer negotiations, recent technological trends, and competitive landscape. In contracts that involve multiple deliverables with separately priced extended warranty and product maintenance, these services are typically accounted for under FASB ASC 605-20, Separately Priced Extended Warranty and Product Maintenance Contracts where stated price is recognized ratably over the period.

For software sales, excluding software required for the equipment to operate as intended, the Company applies the software revenue recognition principles within FASB ASC 985-605, Software - Revenue Recognition. For software and software-related deliverables (software elements), the Company allocates revenue based upon the relative fair value of these deliverables as determined by VSOE. If the Company cannot obtain VSOE for any undelivered software element, revenue is deferred until all deliverables have been delivered or until VSOE can be determined for any remaining undelivered software elements. When the fair value of a delivered element cannot be established, but fair value evidence exists for the undelivered software elements, the Company uses the residual method to recognize revenue. Under the residual method, the fair value of the undelivered elements is deferred and the remaining portion of the arrangement consideration is allocated to the delivered elements and recognized as revenue.

The Company has the following revenue streams related to sales to its customers:

Financial Self-Service Product & Managed Service Revenue Financial self-service (FSS) products are primarily automated teller machines (ATMs) and other equipment primarily used in the banking industry which include both hardware and the software required for the equipment to operate as intended. The Company also provides service contracts on FSS products that typically cover a 12-month period and can begin at any time after the warranty period expires. The service provided under warranty is limited as compared to those offered under service contracts. Further, warranty is not considered a separate deliverable of the sale and covers only replacement of defective parts inclusive of labor. Service contracts provide additional services beyond those covered under the warranty, including preventative maintenance service, cleaning, supplies stocking and cash handling, all of which are not essential to the functionality of the equipment. Service revenue also includes services and parts the Company provides on a billed-work basis that are not covered by warranty or service contract. The Company also provides customers with integrated services such as outsourced and managed services, including remote monitoring, trouble-shooting, training, transaction processing, currency management, maintenance or full support services.

Electronic Security Products & Managed Service Revenue The Company provides global product sales, service, installation, project management for longer-term contracts and monitoring of original equipment manufacturer electronic security products to financial, government, retail and commercial customers. These solutions provide the Company's customers a single-source solution to their electronic security needs.

Table of Contents

DIEBOLD INCORPORATED AND SUBSIDIARIES

FORM 10-K as of December 31, 2014

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

(in thousands, except per share amounts)

Physical Security & Facility Revenue The Company designs, manufactures and/or procures and installs physical security and facility products. These consist of vaults, safe deposit boxes and safes, drive-up banking equipment and a host of other banking facilities products.

Brazil Other The Company offers election and lottery systems product solutions and support to the Brazilian government. Election systems revenue consists of election equipment sales, networking, tabulation and diagnostic software development, training, support and maintenance. Lottery systems revenue primarily consists of equipment sales. The election and lottery equipment components are included in product revenue. The software development, training, support and maintenance components are included in service revenue.

Software Solutions & Service Revenue The Company offers software solutions, excluding software required for the equipment to operate as intended, consisting of multiple applications that process events and transactions (networking software) along with the related server. Sales of networking software represent software solutions to customers that allow them to network various different vendors' ATMs onto one network. Included within service revenue is revenue from software support agreements, which are typically 12 months in duration and pertain to networking software.

Depreciation and Amortization Depreciation of property, plant and equipment is computed using the straight-line method for financial statement purposes. Amortization of leasehold improvements is based upon the shorter of original terms of the lease or life of the improvement. Repairs and maintenance are expensed as incurred. Amortization of the Company's other long-term assets, such as intangible assets and capitalized computer software, is computed using the straight-line method over the life of the asset.

Advertising Costs Advertising costs are expensed as incurred and were \$16,708, \$9,812 and \$11,316 in 2014, 2013 and 2012, respectively.

Research, Development and Engineering Research, development and engineering costs are expensed as incurred and were \$93,617, \$92,315 and \$85,881 in 2014, 2013 and 2012, respectively.

Shipping and Handling Costs The Company recognizes shipping and handling fees billed when products are shipped or delivered to a customer and includes such amounts in net sales. Third-party freight payments are recorded in cost of sales.

Taxes on Income Deferred taxes are provided on an asset and liability method, whereby deferred tax assets are recognized for deductible temporary differences, operating loss carry-forwards and tax credits. Deferred tax liabilities are recognized for taxable temporary differences and undistributed earnings in certain tax jurisdictions. Deferred tax assets are reduced by a valuation allowance when, based on available evidence, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Determination of a valuation allowance involves estimates regarding the timing and amount of the reversal of taxable temporary differences, expected future taxable income and the impact of tax planning strategies. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.

The Company regularly assesses its position with regard to tax exposures and records liabilities for these uncertain tax positions and related interest and penalties, if any, when the tax benefit is not more likely than not realizable. The Company has recorded an accrual that reflects the recognition and measurement process for the financial statement recognition and measurement of a tax position taken or expected to be taken on a tax return. Additional future income tax expense or benefit may be recognized once the positions are effectively settled.

Sales Tax The Company collects sales taxes from customers and accounts for sales taxes on a net basis.

Cash Equivalents The Company considers highly liquid investments with original maturities of three months or less at the time of purchase to be cash equivalents.

Financial Instruments The carrying amount of cash and cash equivalents, trade receivables and accounts payable, approximated their fair value because of the relatively short maturity of these instruments. The Company's risk-management strategy uses derivative financial instruments such as forwards to hedge certain foreign currency exposures and interest rate swaps to manage interest rate risk. The intent is to offset gains and losses that occur on the underlying exposures, with gains and losses on the derivative contracts hedging these exposures. The Company does not enter into derivatives for trading purposes. The Company

Table of Contents

DIEBOLD INCORPORATED AND SUBSIDIARIES

FORM 10-K as of December 31, 2014

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

(in thousands, except per share amounts)

recognizes all derivatives on the balance sheet at fair value. Changes in the fair values of derivatives that are not designated as hedges are recognized in earnings. If the derivative is designated and qualifies as a hedge, depending on the nature of the hedge, changes in the fair value of the derivatives are either offset against the change in the hedged assets or liabilities through earnings or recognized in other comprehensive income until the hedged item is recognized in earnings.

Fair Value The Company measures its financial assets and liabilities using one or more of the following three valuation techniques:

Valuation technique	Description
Market approach	Prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities.
Cost approach	Amount that would be required to replace the service capacity of an asset (replacement cost).
Income approach	Techniques to convert future amounts to a single present amount based upon market expectations.

The hierarchy that prioritizes the inputs to valuation techniques used to measure fair value is divided into three levels:

Fair value level	Description
Level 1	Unadjusted quoted prices in active markets for identical assets or liabilities.
Level 2	Unadjusted quoted prices in active markets for similar assets or liabilities, unadjusted quoted prices for identical or similar assets or liabilities in markets that are not active or inputs, other than quoted prices in active markets, that are observable either directly or indirectly.
Level 3	Unobservable inputs for which there is little or no market data.

A financial asset or liability's classification within the hierarchy is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company uses the end of period when determining the timing of transfers between levels.

Short-Term Investments The Company had investments in certificates of deposit that were recorded at cost, which approximates fair value. Additionally, the Company has investments in U.S. dollar indexed bond funds that are classified as available-for-sale and stated at fair value. U.S. dollar indexed bond funds are reported at net asset value, which is the practical expedient for fair value as determined by banks where funds are held.

Assets Held in Rabbi Trusts / Deferred Compensation The fair value of the assets held in rabbi trusts (refer to notes 6 and 13) is derived from investments in a mix of money market, fixed income and equity funds managed by Bank of America/Merrill Lynch. The related deferred compensation liability is recorded at fair value.

Foreign Exchange Forward Contracts A substantial portion of the Company's operations and revenues are international. As a result, changes in foreign exchange rates can create substantial foreign exchange gains and losses from the revaluation of non-functional currency monetary assets and liabilities. The foreign exchange contracts are valued using the market approach based on observable market transactions of forward rates.

Interest Rate Swaps The Company has variable rate debt and is subject to fluctuations in interest related cash flows due to changes in market interest rates. The Company's policy allows it to periodically enter into derivative instruments designated as cash flow hedges to fix some portion of future variable rate based interest expense. The Company executed two pay-fixed receive-variable interest rate swaps to hedge against changes in the London Interbank Offered Rate (LIBOR) benchmark interest rate on a portion of the Company's LIBOR-based borrowings.

The fair value of the swap is determined using the income approach and is calculated based on LIBOR rates at the reporting date.

Assets and Liabilities Not Measured at Fair Value on a Recurring Basis In addition to assets and liabilities that are measured at fair value on a recurring basis, the Company also measures certain assets and liabilities at fair value on a nonrecurring basis. Our non-financial assets, including goodwill, intangible assets and property, plant and equipment, are measured at fair value when there is an indication of impairment. These assets are recorded at fair value, determined using level 3 inputs, only when an impairment charge is recognized. Further details regarding the Company's goodwill impairment review appear in note 11.

Assets and Liabilities Recorded at Carrying Value The fair value of the Company's cash and cash equivalents, trade receivables and accounts payable, approximates the carrying value due to the relative short maturity of these instruments.

Table of Contents

DIEBOLD INCORPORATED AND SUBSIDIARIES

FORM 10-K as of December 31, 2014

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

(in thousands, except per share amounts)

The fair value of the Company's industrial development revenue bonds are measured using unadjusted quoted prices in active markets for identical assets categorized as level 1 inputs. The fair value of the Company's current notes payable and credit facility debt instruments approximates the carrying value due to the relative short maturity of the revolving borrowings under these instruments. The fair values of the Company's long-term senior notes were estimated using market observable inputs for the Company's comparable peers with public debt, including quoted prices in active markets, market indices and interest rate measurements, considered level 2 inputs.

Refer to note 19 for further details of assets and liabilities subject to fair value measurement.

Trade Receivables The Company evaluates the collectability of trade receivables based on a percentage of sales related to historical loss experience and current trends. The Company will also record periodic adjustments for known events such as specific customer circumstances and changes in the aging of accounts receivable balances. After all efforts at collection have been unsuccessful, the account is deemed uncollectible and is written off.

Financing Receivables The Company evaluates the collectability of notes and finance lease receivables (collectively, financing receivables) on a customer-by-customer basis and evaluates specific customer circumstances, aging of invoices, credit risk changes and payment patterns and historical loss experience. When the collectability is determined to be at risk based on the above criteria, the Company records the allowance for credit losses which represents the Company's current exposure less estimated reimbursement from insurance claims. After all efforts at collection have been unsuccessful, the account is deemed uncollectible and is written off.

Inventories The Company primarily values inventories at the lower of cost or market applied on a first-in, first-out basis. The Company identifies and writes down its excess and obsolete inventories to net realizable value based on usage forecasts, order volume and inventory aging. With the development of new products, the Company also rationalizes its product offerings and will write-down discontinued product to the lower of cost or net realizable value.

Deferred Revenue Deferred revenue is recorded for any services billed to customers and not yet recognizable if the contract period has commenced or for the amount collected from customers in advance of the contract period commencing. In addition, deferred revenue is recorded for products and other deliverables that are billed to and collected from customers prior to revenue being recognizable.

Split-Dollar Life Insurance The Company recognizes a liability for the post-retirement obligation associated with a collateral assignment arrangement if, based on an agreement with an employee, the Company has agreed to maintain a life insurance policy during the post-retirement period or to provide a death benefit. In addition, the Company recognizes a liability and related compensation costs for future benefits that extend to post-retirement periods.

Goodwill Goodwill is the cost in excess of the net assets of acquired businesses (refer to note 11). The Company tests all existing goodwill at least annually as of November 30 for impairment on a reporting unit basis. The Company tests for impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the carrying value of a reporting unit below its reported amount. The Company's reporting units are defined as Domestic and Canada, Latin America (LA), Brazil, Asia Pacific (AP), and Europe, Middle East and Africa (EMEA). Each year, the Company may elect to perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. In evaluating whether it is more likely than not the

fair value of a reporting unit is less than its carrying amount, the Company considers the following events and circumstances, among others, if applicable: (a) macroeconomic conditions such as general economic conditions, limitations on accessing capital or other developments in equity and credit markets; (b) industry and market considerations such as competition, multiples or metrics and changes in the market for the Company's products and services or regulatory and political environments; (c) cost factors such as raw materials, labor or other costs; (d) overall financial performance such as cash flows, actual and planned revenue and earnings compared with actual and projected results of relevant prior periods; (e) other relevant events such as changes in key personnel, strategy or customers; (f) changes in the composition of a reporting unit's assets or expected sales of all or a portion of a reporting unit; and (g) any sustained decrease in share price.

If the Company's qualitative assessment indicates that it is more likely than not that the fair value of a reporting unit is less than its carrying value, or if management elects to perform a quantitative assessment of goodwill, a two-step impairment test is used to identify potential goodwill impairment and measure the amount of any impairment loss to be recognized. In the first step, the Company compares the fair value of each reporting unit with its carrying value. The fair value is determined based upon discounted

Table of Contents

DIEBOLD INCORPORATED AND SUBSIDIARIES

FORM 10-K as of December 31, 2014

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

(in thousands, except per share amounts)

estimated future cash flows as well as the market approach or guideline public company method. The Company's Step 1 impairment test of goodwill of a reporting unit is based upon the fair value of the reporting unit, defined as the price that would be received to sell the net assets or transfer the net liabilities in an orderly transaction between market participants at the assessment date. In the event that the net carrying amount exceeds the fair value, a Step 2 test must be performed whereby the fair value of the reporting unit's goodwill must be estimated to determine if it is less than its net carrying amount. In its two-step test, the Company uses the discounted cash flow method and the guideline company method for determining the fair value of its reporting units. Under these methods, the determination of implied fair value of the goodwill for a particular reporting unit is the excess of the fair value of a reporting unit over the amounts assigned to its assets and liabilities in the same manner as the allocation in a business combination.

The techniques used in the Company's qualitative assessment and, if necessary, two-step impairment test have incorporated a number of assumptions that the Company believes to be reasonable and to reflect market conditions forecast at the assessment date. Assumptions in estimating future cash flows are subject to a high degree of judgment. The Company makes all efforts to forecast future cash flows as accurately as possible with the information available at the time the forecast is made. To this end, the Company evaluates the appropriateness of its assumptions as well as its overall forecasts by comparing projected results of upcoming years with actual results of preceding years and validating that differences therein are reasonable. Key assumptions, all of which are Level 3 inputs, relate to price trends, material costs, discount rate, customer demand and the long-term growth and foreign exchange rates. A number of benchmarks from independent industry and other economic publications were also used. Changes in assumptions and estimates after the assessment date may lead to an outcome where impairment charges would be required in future periods. Specifically, actual results may vary from the Company's forecasts and such variations may be material and unfavorable, thereby triggering the need for future impairment tests where the conclusions may differ in reflection of prevailing market conditions.

Long-Lived Assets Impairment of long-lived assets is recognized when events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. If the expected future undiscounted cash flows are less than the carrying amount of the asset, an impairment loss is recognized at that time to reduce the asset to the lower of its fair value or its net book value.

Contingencies Liabilities for loss contingencies arising from claims, assessments, litigation, fines, and penalties and other sources are recorded when it is probable that a liability has been incurred and the amount can be reasonably estimated. As additional information becomes available, any potential liability related to these matters is assessed and the estimates are revised, if necessary. Legal costs incurred in connection with loss contingencies are expensed as incurred.

Pensions and Other Post-retirement Benefits Annual net periodic expense and benefit liabilities under the Company's defined benefit plans are determined on an actuarial basis. Assumptions used in the actuarial calculations have a significant impact on plan obligations and expense. Members of the management investment committee periodically review the actual experience compared with the more significant assumptions used and make adjustments to the assumptions, if warranted. The healthcare trend rates are reviewed based upon the results of actual claims experience. The discount rate is determined by analyzing the average return of high-quality (i.e., AA-rated) fixed-income investments and the year-over-year comparison of certain widely used benchmark indices as of the measurement date. The expected long-term rate of return on plan assets is determined using the plans' current asset allocation and their

expected rates of return based on a geometric averaging over 20 years. The rate of compensation increase assumptions reflects the Company's long-term actual experience and future and near-term outlook. Pension benefits are funded through deposits with trustees. Other post-retirement benefits are not funded and the Company's policy is to pay these benefits as they become due.

The Company recognizes the funded status of each of its plans in the consolidated balance sheet. Amortization of unrecognized net gain or loss resulting from experience different from that assumed and from changes in assumptions (excluding asset gains and losses not yet reflected in market-related value) is included as a component of net periodic benefit cost for a year if, as of the beginning of the year, that unrecognized net gain or loss exceeds five percent of the greater of the projected benefit obligation or the market-related value of plan assets. If amortization is required, the amortization is that excess divided by the average remaining service period of participating employees expected to receive benefits under the plan.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

(in thousands, except per share amounts)

Recently Adopted Accounting Guidance

In April 2014, the FASB issued Accounting Standards Update (ASU) 2014-08, Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity (ASU 2014-08), which includes amendments that change the requirements for reporting discontinued operations and require additional disclosures about discontinued operations. Under the new guidance, only disposals representing a strategic shift in operations should be presented as discontinued operations. Those strategic shifts should have a major effect on the organization's operations and financial results. Additionally, ASU 2014-08 requires expanded disclosures about discontinued operations that will provide financial statement users with more information about the assets, liabilities, income and expenses of discontinued operations. In the second quarter of 2014, the Company adopted ASU 2014-08. The adoption of this update did not have a material impact on the financial statements of the Company.

In July 2013, the FASB issued ASU 2013-11, Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists (ASU 2013-11), which requires entities to present an unrecognized tax benefit as a reduction of a deferred tax asset for a net operating loss (NOL) or tax credit carryforward whenever the NOL or tax credit carryforward would be available to reduce the additional taxable income or tax due if the tax position is disallowed. This accounting standard update requires entities to assess whether to net the unrecognized tax benefit with a deferred tax asset as of the reporting date. The adoption of this update in 2014 did not have a material impact on the financial statements of the Company.

Recently Issued Accounting Guidance

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers (ASU 2014-09), which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. The ASU will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. The standard is effective for the Company on January 1, 2017. Early application is not permitted. The standard permits the use of either the retrospective or cumulative effect transition method. The Company is evaluating the effect that ASU 2014-09 will have on its consolidated financial statements and related disclosures. The Company has not yet selected a transition method nor has it determined the effect of the standard on its ongoing financial reporting.

No other new accounting pronouncements issued or with effective dates during 2014 had or are expected to have a material impact on the Company's consolidated financial statements.

(in thousands, except per share amounts)

NOTE 2: EARNINGS (LOSS) PER SHARE

Basic earnings (loss) per share is based on the weighted-average number of common shares outstanding. Diluted earnings (loss) per share includes the dilutive effect of potential common shares outstanding. Under the two-class method of computing earnings (loss) per share, non-vested share-based payment awards that contain rights to receive non-forfeitable dividends are considered participating securities. The Company's participating securities include restricted stock units (RSUs), director deferred shares and shares that were vested but deferred by employees. The Company calculated basic and diluted earnings (loss) per share under both the treasury stock method and the two-class method. For the years presented there were no differences in the earnings (loss) per share amounts calculated using the two methods. Accordingly, the treasury stock method is disclosed below.

The following table represents amounts used in computing earnings (loss) per share and the effect on the weighted-average number of shares of dilutive potential common shares for the years ended December 31:

	2014	2013	2012
Numerator			
Income (loss) used in basic and diluted earnings (loss) per share			
Income (loss) from continuing operations, net of tax	\$ 114,417	\$(181,605)) \$76,728
Loss from discontinued operations, net of tax	—	—	(3,125)
Net income (loss) attributable to Diebold, Incorporated	\$ 114,417	\$(181,605)) \$73,603
Denominator			
Weighted-average number of common shares used in basic earnings (loss) per share	64,530	63,659	63,061
Effect of dilutive shares (1)	624	—	853
Weighted-average number of shares used in diluted earnings (loss) per share	65,154	63,659	63,914
Basic earnings (loss) per share			
Income (loss) from continuing operations, net of tax	\$ 1.77	\$(2.85)) \$1.22
Loss from discontinued operations, net of tax	—	—	(0.05)
Net income (loss) attributable to Diebold, Incorporated	\$ 1.77	\$(2.85)) \$1.17
Diluted earnings (loss) per share			
Income (loss) from continuing operations, net of tax	\$ 1.76	\$(2.85)) \$1.20
Loss from discontinued operations, net of tax	—	—	(0.05)
Net income (loss) attributable to Diebold, Incorporated	\$ 1.76	\$(2.85)) \$1.15
Anti-dilutive shares			
Anti-dilutive shares not used in calculating diluted weighted-average shares	1,053	2,597	2,201

(1) Incremental shares of 545 thousand were excluded from the computation of diluted EPS for the year ended December 31, 2013 because their effect is anti-dilutive due to the loss from continuing operations.

NOTE 4: SHARE-BASED COMPENSATION AND EQUITY

Dividends On the basis of amounts declared and paid quarterly, the annualized dividends per share were \$1.15, \$1.15 and \$1.14 for the years ended December 31, 2014, 2013 and 2012, respectively.

Share-Based Compensation Cost The Company recognizes costs resulting from all share-based payment transactions based on the fair market value of the award as of the grant date. Awards are valued at fair value and compensation cost is recognized on a straight-line basis over the requisite periods of each award. The Company estimated forfeiture rates are based on historical experience. To cover the exercise and/or vesting of its share-based payments, the Company generally issues new shares from its authorized, unissued share pool. The number of common shares that may be issued pursuant to the Amended and Restated 1991 Equity and Performance Incentive Plan (as amended and restated as of February 12, 2014) (1991 Plan) was 9,126,005, of which 5,532,005 shares were available for issuance at December 31, 2014.

The following table summarizes the components of the Company's employee and non-employee share-based compensation programs recognized as selling and administrative expense for the years ended December 31:

	2014	2013	2012
Stock options			
Pre-tax compensation expense	\$2,696	\$6,032	\$2,572

DIEBOLD INCORPORATED AND SUBSIDIARIES

FORM 10-K as of December 31, 2014

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

(in thousands, except per share amounts)

The following table summarizes information related to unrecognized share-based compensation costs as of December 31, 2014:

	Unrecognized Cost	Weighted-Average Period (years)
Stock options	\$3,460	1.3
RSUs	9,099	1.8
Performance shares	11,528	1.7
	\$24,087	

SHARE-BASED COMPENSATION AWARDS

Stock options, RSUs, restricted shares and performance shares have been issued to officers and other management employees under the Company's 1991 Plan.

Stock Options

Stock options generally vest after a one- to four-year period and have a maturity of ten years from the issuance date. Option exercise prices equal the closing price of the Company's common shares on the date of grant. The estimated fair value of the options granted was calculated using a Black-Scholes option pricing model using the following assumptions:

	2014	2013	2012	
Expected life (in years)	5	6	6-7	
Weighted-average volatility	31	% 38	% 41	%
Risk-free interest rate	1.47-1.66%	1.08-1.27%	0.83-1.39%	
Expected dividend yield	3.59	% 3.23-3.59%	3.08-3.23%	

The Company uses historical data to estimate option exercise timing within the valuation model. Employees with similar historical exercise behavior with regard to timing and forfeiture rates are considered separately for valuation and attribution purposes. Expected volatility is based on historical volatility of the price of the Company's common shares. The risk-free rate of interest is based on a zero-coupon U.S. government instrument over the expected life of the equity instrument. The expected dividend yield is based on actual dividends paid per share and the price of the Company's common shares.

Options outstanding and exercisable as of December 31, 2014 and changes during the year ended were as follows:

	Number of Shares	Weighted-Average Exercise Price (per share)	Weighted-Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value (1)
Outstanding at January 1, 2014	1,954	\$ 39.63		
Expired or forfeited	(355)) \$ 51.45		
Exercised	(445)) \$ 32.89		
Granted	454	\$ 34.20		
Outstanding at December 31, 2014	1,608	\$ 37.11	6	\$2,277
Options exercisable at December 31, 2014	871	\$ 40.17	3	\$1,359
	1,580	\$ 37.19	6	\$2,227

Options vested and expected to vest (2) at
December 31, 2014

- The aggregate intrinsic value represents the total pre-tax intrinsic value (the difference between the Company's closing share price on the last trading day of the year in 2014 and the exercise price, multiplied by the number of
- (1) "in-the-money" options) that would have been received by the option holders had all option holders exercised their options on December 31, 2014. The amount of aggregate intrinsic value will change based on the fair market value of the Company's common shares.
 - (2) The expected to vest options are the result of applying the pre-vesting forfeiture rate assumption to total outstanding non-vested options.

Table of Contents

DIEBOLD INCORPORATED AND SUBSIDIARIES

FORM 10-K as of December 31, 2014

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

(in thousands, except per share amounts)

The aggregate intrinsic value of options exercised for the years ended December 31, 2014, 2013 and 2012 was \$2,149, \$2,083 and \$4,393, respectively. The weighted-average grant-date fair value of stock options granted for the years ended December 31, 2014, 2013 and 2012 was \$6.75, \$7.79 and \$10.43, respectively. Total fair value of stock options vested during the years ended December 31, 2014, 2013 and 2012 was \$1,769, \$8,043 and \$3,413, respectively. Exercise of options during the year ended December 31, 2014, 2013 and 2012 resulted in cash receipts of \$14,607, \$16,723 and \$16,679, respectively.

Restricted Stock Units

Each RSU provides for the issuance of one common share of the Company at no cost to the holder and are granted to both employees and non-employee directors. RSUs for employees vest after a four- or seven-year period and for non-employee directors vest after one year. During the vesting period, employees are paid the cash equivalent of dividends on RSUs. Non-vested employee RSUs are forfeited upon termination unless the Board of Directors determines otherwise.

Non-vested RSUs outstanding as of December 31, 2014 and changes during the year ended were as follows:

	Number of Shares	Weighted-Average Grant-Date Fair Value
Non-vested at January 1, 2014	499	\$ 32.28
Forfeited	(62)) \$ 32.90
Vested	(134)) \$ 32.72
Granted	350	\$ 35.25
Non-vested at December 31, 2014	653	\$ 33.72

(1) The RSUs granted during the year ended December 31, 2014 include 35 thousand one-year RSUs to non-employee directors under the 1991 Plan. These RSUs have a weighted-average grant-date fair value of \$39.35.

The weighted-average grant-date fair value of RSUs granted for the years ended December 31, 2014, 2013 and 2012 was \$35.25, \$30.14 and \$35.16, respectively. The total fair value of RSUs vested during the years ended December 31, 2014, 2013 and 2012 was \$4,394, \$9,176 and \$4,202, respectively.

Performance Shares

Performance shares are granted based on certain management objectives, as determined by the Board of Directors each year. Each performance share earned entitles the holder to one common share of the Company. The Company's performance shares include performance objectives that vest and are calculated after a three-year period as well as performance objectives that vest proportionately over a three-year period which are calculated annually. No shares are granted unless certain management threshold objectives are met.

Non-vested performance shares outstanding as of December 31, 2014 and changes during the year ended were as follows:

	Number of Shares	Weighted-Average Grant-Date Fair Value
Non-vested at January 1, 2014 (1)	542	\$ 37.10

Edgar Filing: DIEBOLD INC - Form 10-K

Forfeited	(173) \$ 39.63
Granted (2)	778	\$ 38.07
Non-vested at December 31, 2014	1,147	\$ 37.38

(1) Non-vested performance shares are based on a maximum potential payout. Actual shares granted at the end of the performance period may be less than the maximum potential payout level depending on achievement of performance share objectives. Performance shares are based on certain annual management objectives, as determined by the Board of Directors.

(2) The maximum performance shares granted during the year ended December 31, 2014 include 439 thousand shares that vest proportionately over a three-year period and have a weighted-average grant-date fair value of \$35.49.

The weighted-average grant-date fair value of performance shares granted for the years ended December 31, 2014, 2013 and 2012 was \$38.07, \$29.15 and \$44.25, respectively. The total fair value of performance shares vested during the years ended December 31, 2014, 2013 and 2012 was \$0, \$1,090 and \$2,521, respectively.

Table of Contents

DIEBOLD INCORPORATED AND SUBSIDIARIES

FORM 10-K as of December 31, 2014

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

(in thousands, except per share amounts)

Director Deferred Shares

Deferred shares have been issued to non-employee directors under the 1991 Plan. Deferred shares provide for the issuance of one common share of the Company at no cost to the holder. Deferred shares vest in either a six- or twelve-month period and are issued at the end of the deferral period. During the vesting period and until the common shares are issued, non-employee directors are paid the cash equivalent of dividends on deferred shares.

As of December 31, 2014, there were 143 non-employee director deferred shares vested and outstanding. There were no deferred shares granted in 2014. The weighted-average grant-date fair value of deferred shares granted for the years ended December 31, 2013 and 2012 was \$29.73 and \$40.54, respectively. The aggregate intrinsic value of deferred shares released during the years ended December 31, 2014, 2013 and 2012 was \$121, \$1,023 and \$247, respectively. Total fair value of deferred shares vested for the years ended December 31, 2014, 2013 and 2012 was \$898, \$1,090 and \$979, respectively.

Other Non-employee Share-Based Compensation

In connection with the acquisition of Diebold Colombia, S.A., in December 2005, the Company issued warrants to purchase 35 thousand common shares with an exercise price of \$46.00 per share and grant-date fair value of \$14.66 per share. The grant-date fair value of the warrants was valued using the Black-Scholes option pricing model with the following assumptions: risk-free interest rate of 4.45 percent, dividend yield of 1.63 percent, expected volatility of 30 percent, and contractual life of six years. The warrants will expire in December 2016.

NOTE 5: INCOME TAXES

The following table presents components of income (loss) from continuing operations before income taxes for the years ended December 31:

	2014	2013	2012
Domestic	\$1,054	\$(171,878)	\$(37,910)
Foreign	169,535	52,071	148,805
Total	\$170,589	\$(119,807)	\$110,895

The following table presents the components of income tax expense (benefit) from continuing operations for the years ended December 31:

	2014	2013	2012
Current			
U.S. federal	\$5,857	\$10,453	\$3,381
Foreign	61,414	59,481	39,185
State and local	723	3,231	2,006
Total current	67,994	73,165	44,572
Deferred			
U.S. federal	(2,660)	(20,180)	(2,344)
Foreign	(9,387)	9,678	(13,159)
State and local	(2,377)	(5,948)	(844)
Total deferred	(14,424)	(16,450)	(16,347)
Income tax expense	\$53,570	\$56,715	\$28,225

In addition to the income tax expense listed above for the years ended December 31, 2014, 2013 and 2012, income tax (benefit) expense allocated directly to shareholders equity for the same periods was \$(38,545), \$67,351 and \$(8,909), respectively. Offsetting the income tax expense allocated directly to shareholders equity for the years ended December 31, 2014 and 2013 was a benefit of \$9,227 and \$9,049, respectively, related to current year movement in valuation allowance.

Table of Contents

DIEBOLD INCORPORATED AND SUBSIDIARIES

FORM 10-K as of December 31, 2014

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

(in thousands, except per share amounts)

Income tax expense (benefit) attributable to income (loss) from continuing operations differed from the amounts computed by applying the U.S. federal income tax rate of 35 percent to pretax income (loss) from continuing operations. The following table presents these differences for the years ended December 31:

	2014	2013	2012
Statutory tax expense (benefit)	\$59,706	\$(41,932)) \$38,813
Brazil nontaxable incentive	(15,454)) (7,849)) (10,622)
Valuation allowance	9,458	43,884	1,609
Brazil tax goodwill amortization	(1,509)) (3,807)) (4,802)
Foreign tax rate differential	(14,853)) (12,432)) (14,332)
Foreign subsidiary earnings	14,621	59,460	10,648
Accrual adjustments	2,243	5,755	494
Non-deductible goodwill	—	5,189	—
FCPA provision, nondeductible portion	—	5,412	2,939
Other	(642)) 3,035	3,478
Income tax expense	\$53,570	\$56,715	\$28,225

In the second quarter of 2013, the Company recorded a valuation allowance for the Brazil manufacturing subsidiary due to a change in circumstances including lower profitability in core operations, lower anticipated taxable income and an unfavorable business outlook. The Company also changed its assertion regarding the indefinite reinvestment of foreign subsidiary earnings due primarily to forecasted cash needs within the United States and strategic decisions related to the Company's capital structure. As a result, the Company recorded current and deferred tax expense (net of related foreign tax credits) due to the repatriation of earnings of approximately \$55,000.

The Company recognizes the benefit of tax positions taken or expected to be taken in its tax returns in the consolidated financial statements when it is more likely than not that the position will be sustained upon examination by authorities. Recognized tax positions are measured at the largest amount of benefit that is greater than fifty percent likely of being realized upon settlement.

Details of the unrecognized tax benefits are as follows:

	2014	2013
Balance at January 1	\$16,545	\$13,178
Increases related to prior year tax positions	314	1,489
Increases related to current year tax positions	694	2,864
Settlements	(2,499)) —
Reduction due to lapse of applicable statute of limitations	(87)) (986)
Balance at December 31	\$14,967	\$16,545

The entire amount of unrecognized tax benefits, if recognized, would affect the Company's effective tax rate.

The Company classifies interest expense and penalties related to the underpayment of income taxes in the consolidated financial statements as income tax expense. Consistent with the treatment of interest expense, the Company accrues interest income on overpayments of income taxes where applicable and classifies interest income as a reduction of income tax expense in the consolidated financial statements. As of December 31, 2014 and 2013, accrued interest and penalties related to unrecognized tax benefits totaled approximately \$7,362 and \$5,805, respectively.

It is reasonably possible that the total amount of unrecognized tax benefits will change during the next 12 months. The Company does not expect those changes to have a significant impact on its consolidated financial statements. The expected timing of payments cannot be determined with any degree of certainty.

As of December 31, 2014, the Company is under audit by the Internal Revenue Service (IRS) for tax years ended December 31, 2011, 2012 and 2013. During the year ended December 31, 2014, the IRS completed its examination of the Company's U.S. federal income tax returns for the years 2008-2010 and issued a Revenue Agent's Report (RAR). The net tax deficiency, excluding interest,

Table of Contents

DIEBOLD INCORPORATED AND SUBSIDIARIES

FORM 10-K as of December 31, 2014

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

(in thousands, except per share amounts)

associated with the RAR is \$6,300 after net operating loss utilization. The Company appealed the findings in the RAR and a decision is expected in 2015. The Company believes it has adequately provided for any related uncertain tax positions. All federal tax years prior to 2005 are closed by statute. The Company is subject to tax examination in various U.S. state jurisdictions for tax years 2004 to the present, as well as various foreign jurisdictions for tax years 2006 to the present.

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the Company's deferred tax assets and liabilities at December 31 are as follows:

	2014	2013
Deferred tax assets		
Accrued expenses	\$56,652	\$56,704
Warranty accrual	35,601	25,943
Deferred compensation	15,751	14,839
Allowance for doubtful accounts	9,112	8,141
Inventories	14,057	11,253
Deferred revenue	12,460	14,795
Pension and post-retirement benefits	73,026	45,601
Tax credits	33,393	34,350
Net operating loss carryforwards	68,883	74,472
Capital loss carryforwards	—	2,295
State deferred taxes	17,393	13,489
Other	3,557	—
	339,885	301,882
Valuation allowance	(87,959)	(87,773)
Net deferred tax assets	\$251,926	\$214,109
Deferred tax liabilities		
Property, plant and equipment	\$18,316	\$15,494
Goodwill and intangible assets	17,508	17,601
Partnership interest	13,105	13,170
Undistributed earnings	14,346	27,766
Other	—	1,130
Net deferred tax liabilities	63,275	75,161
Net deferred tax asset	\$188,651	\$138,948

Deferred income taxes reported in the consolidated balance sheets as of December 31 are as follows:

	2014	2013
Deferred income taxes - current assets	\$110,999	\$110,165
Deferred income taxes - long-term assets	86,544	39,461
Other current liabilities	(2,365)	(1,528)
Deferred income taxes - long-term liabilities	(6,527)	(9,150)
Net deferred tax asset	\$188,651	\$138,948

At December 31, 2014, the Company had foreign and state NOL carryforwards of \$489,029, resulting in an NOL deferred tax asset of \$68,883. Of these NOL carryforwards, \$351,289 expire at various times between 2015 and 2035 and \$137,740 does not expire. At December 31, 2014, the Company had a domestic foreign tax credit carryforward resulting in a deferred tax asset of \$22,698 that will expire between 2019 and 2023 and a general business credit carryforward resulting in a deferred tax asset of \$10,494 that will expire between 2030 and 2035.

Table of Contents

DIEBOLD INCORPORATED AND SUBSIDIARIES

FORM 10-K as of December 31, 2014

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

(in thousands, except per share amounts)

The Company recorded a valuation allowance to reflect the estimated amount of certain foreign and state deferred tax assets that, more likely than not, will not be realized. The net change in total valuation allowance for the years ended December 31, 2014 and 2013 was an increase of \$186 and \$34,835, respectively. The 2013 increase in valuation allowance is primarily attributable to recording valuation allowances for Brazil and Italy deferred tax assets, partially offset by the release of a valuation allowance for Switzerland deferred tax assets.

For the years ended December 31, 2014 and 2013, provisions were made for foreign withholding taxes and estimated U.S. income taxes, less available tax credits, which may be incurred upon the remittance of certain undistributed earnings in foreign subsidiaries and foreign unconsolidated affiliates. Provisions have not been made for income taxes on approximately \$513,117 of undistributed earnings at December 31, 2014 in foreign subsidiaries and corporate joint ventures that are deemed permanently reinvested. Determination of the amount of unrecognized deferred income tax liabilities on these earnings is not practicable because such liability, if any, depends on certain circumstances existing if and when remittance occurs. A deferred tax liability will be recognized if and when the Company no longer plans to permanently reinvest these undistributed earnings.

NOTE 6: INVESTMENTS

The Company's investments, primarily in Brazil, consist of certificates of deposit and U.S. dollar indexed bond funds that are classified as available-for-sale and stated at fair value based upon quoted market prices and net asset values, respectively. Unrealized gains and losses are recorded in AOCI. Realized gains and losses are recognized in investment income and are determined using the specific identification method. Realized gains from the sale of securities for the years ended December 31, 2014 and 2013 were \$538 and \$3,987, respectively. Proceeds from the sale of available-for-sale securities were \$39,586 and \$55,987 during the years ended December 31, 2014 and 2013, respectively.

The Company has deferred compensation plans that enable certain employees to defer receipt of a portion of their cash, 401(k) or share-based compensation and non-employee directors to defer receipt of director fees at the participants' discretion. For deferred cash-based compensation, the Company established rabbi trusts (refer to note 13), which are recorded at fair value of the underlying securities within securities and other investments. The related deferred compensation liability is recorded at fair value within other long-term liabilities. Realized and unrealized gains and losses on marketable securities in the rabbi trusts are recognized in investment income.

The Company's investments, excluding cash surrender value of insurance contracts of \$73,854 and \$72,214 as of December 31, 2014 and 2013, respectively, consist of the following:

	Cost Basis	Unrealized Gain/(Loss)	Fair Value
As of December 31, 2014			
Short-term investments			
Certificates of deposit	\$136,653	\$—	\$136,653
Long-term investments			
Assets held in a rabbi trust	\$9,327	\$444	\$9,771

NOTE 7: FINANCE LEASE RECEIVABLES

The Company provides financing arrangements to customers purchasing its products. These financing arrangements are largely classified and accounted for as sales-type leases.

The following table presents finance lease receivables sold by the Company for the years ended December 31:

	2014	2013	2012
Finance lease receivables sold	\$21,958	\$—	\$50,225

The following table presents the components of finance lease receivables as of December 31:

	2014	2013	
Gross minimum lease receivable	\$161,241	\$109,312	
Allowance for credit losses	(385)	(439))
Estimated unguaranteed residual values	6,057	6,979	
	166,913	115,852	
Less:			
Unearned interest income	(1,266)	(9,345))
Unearned residuals	(7,345)	(1,016))
	(8,611)	(10,361))
Total	\$158,302	\$105,491	

Future minimum payments due from customers under finance lease receivables as of December 31, 2014 are as follows:

2015	\$59,466
2016	56,226
2017	36,943
2018	4,521
2019	2,050
Thereafter	2,035
	\$161,241

NOTE 8: ALLOWANCE FOR CREDIT LOSSES

The following table summarizes the Company's allowance for credit losses and amount of financing receivables evaluated for impairment:

	Finance Leases	Notes Receivable	Total
Allowance for credit losses			
Balance at January 1, 2013	\$525	\$2,047	\$2,572
Provision for credit losses	8	4,134	4,142
Recoveries	3	—	3
Write-offs	(97) (2,047) (2,144
Balance at December 31, 2013	\$439	\$4,134	\$4,573
Provision for credit losses	243	—	243
Write-offs	(297) —	(297
Balance at December 31, 2014	\$385	\$4,134	\$4,519

The Company's allowance of \$4,519 and \$4,573 for the years ended December 31, 2014 and 2013, respectively, all resulted from individual impairment evaluation. As of December 31, 2014, finance leases and notes receivables individually evaluated for impairment were \$153,687 and \$23,053, respectively. As of December 31, 2013, finance leases and notes receivables individually evaluated for impairment were \$105,930 and \$17,340, respectively. As of December 31, 2014 and 2013, the Company's financing receivables in Brazil were \$105,676 and \$33,283, respectively. The increase related to customer financing arrangements within the education ministry.

The Company records interest income and any fees or costs related to financing receivables using the effective interest method over the term of the lease or loan. The Company reviews the aging of its financing receivables to determine past due and delinquent accounts. Credit quality is reviewed at inception and is re-evaluated as needed based on customer specific circumstances. Receivable balances 60 days to 89 days past due are reviewed and may be placed on nonaccrual status based on customer-specific circumstances. Receivable balances are placed on nonaccrual status upon reaching greater than 89 days past due. Upon receipt of payment on nonaccrual financing receivables, interest income is recognized and accrual of interest is resumed once the account has been made current or the specific circumstances have been resolved.

As of December 31, 2014 and 2013, the recorded investment in past-due financing receivables on nonaccrual status was \$2,182 and \$1,670, respectively. The recorded investment in financing receivables past due 90 days or more and still accruing interest was \$35 as of December 31, 2014. The recorded investment in impaired notes receivable was \$4,134 as of December 31, 2014 and 2013 and was fully reserved.

The following table summarizes the Company's aging of past-due notes receivable balances:

	December 31,	
	2014	2013
30-59 days past due	\$85	\$85
60-89 days past due	—	—
> 89 days past due	1,518	—

Total past due	\$1,603	\$85
----------------	---------	------

Table of Contents

NOTE 9: INVENTORIES

The following table summarizes the major classes of inventories as of December 31:

	2014	2013
Finished goods	\$197,429	\$167,577
Service parts	125,570	132,508
Raw materials and work in process	82,174	76,377
Total inventories	\$405,173	\$376,462

NOTE 10: PROPERTY, PLANT AND EQUIPMENT

The following is a summary of property, plant and equipment, at cost less accumulated depreciation and amortization as of December 31:

	Estimated Useful Life (years)	2014	2013
Land and land improvements	0-15	\$7,044	\$7,008
Buildings and building equipment	15	59,754	63,225
Machinery, tools and equipment	5-12	86,513	93,403
Leasehold improvements (1)	10	24,871	26,858
Computer equipment	3-5	57,859	79,719
Computer software	5-10	162,690	154,622
Furniture and fixtures	5-8	65,409	71,492
Tooling	3-5	94,571	85,560
Construction in progress		54,183	17,207
Total property plant and equipment, at cost		\$612,894	\$599,094
Less accumulated depreciation and amortization		443,388	438,199
Total property plant and equipment, net		\$169,506	\$160,895

(1) The estimated useful life for leasehold improvements is the lesser of 10 years or the term of the lease.

During 2014, 2013 and 2012, depreciation expense, computed on a straight-line basis over the estimated useful lives of the related assets, was \$48,202, \$50,151 and \$51,447, respectively.

The increase of construction in progress is due to the Company's reinvestment of cost savings from the multi-year alignment strategy. This investment is primarily related to the implementation of an enterprise resource planning (ERP) system in the NA segment.

During 2013 and 2012, the Company recorded impairment charges of \$2,017 and \$7,835, respectively, related to its property, plant and equipment. Impairment charges in 2012 related primarily to the portion of the Company's global ERP system. Previously capitalized software and software-related costs were impaired due to changes in the ERP implementation plan related to configuration and design.

Goodwill	110,250	40,036	168,714	4,324	139,394	462,718
Accumulated impairment losses	(13,171)	—	(168,714)	—	(108,859)	(290,744)
Balance at December 31, 2014	\$97,079	\$40,036	\$—	\$4,324	\$30,535	\$171,974

Goodwill In the fourth quarter of 2014, goodwill was reviewed for impairment based on a two-step test, which resulted in no impairment in any of the Company's reporting units. Management determined that the Brazil and AP reporting units had excess fair value of approximately \$61,000 or 17 percent and approximately \$114,200 or 39 percent, respectively, when compared to their carrying amounts. The Domestic and Canada and LA reporting units had excess fair value greater than 100 percent when compared to their carrying amounts. During 2014, NA had a reduction to goodwill of \$1,600 relating to the sale of Eras.

During the third quarter of 2013, the Company performed an other-than-annual assessment for its Brazil reporting unit based on a two-step impairment test as a result of a reduced earnings outlook for the Brazil business unit. This was due to a deteriorating macro-economic outlook, structural changes to an auction-based purchasing environment and new competitors entering the market. The Company concluded that the goodwill within the Brazil reporting unit was partially impaired and recorded a \$70,000 pre-tax, non-cash goodwill impairment charge. In the fourth quarter of 2013, the Brazil reporting unit was reviewed for impairment based on a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. In addition, the remaining reporting units were reviewed based on a two-step test. These tests resulted in no additional impairment in any of the Company's reporting units.

Other Assets Included in other assets are net capitalized computer software development costs of \$36,260 and \$40,235 as of December 31, 2014 and 2013, respectively. Amortization expense on capitalized software of \$18,326, \$20,889 and \$18,833 was included in product cost of sales for 2014, 2013 and 2012, respectively. Other long-term assets also

consist of patents, trademarks and other intangible assets. Where applicable, other assets are stated at cost and, if applicable, are amortized ratably over the relevant contract period or the estimated life of the assets. Fees to renew or extend the term of the Company's intangible assets are expensed when incurred.

In August 2012, the Company acquired GAS Tecnologia (GAS), a Brazilian internet banking, online payment and mobile banking security company. At June 30, 2013, the Company finalized the purchase accounting with respect to opening balance sheet valuations. Goodwill and amortizable intangible assets resulting from the acquisition were approximately \$26,003 and \$16,000, respectively.

Impairment of long-lived assets is recognized when events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. If the expected future undiscounted cash flows are less than the carrying amount of the asset, an impairment loss is recognized at that time to reduce the asset to the lower of its fair value or its net book value. For the year ended December 31, 2014, the Company recorded other asset-related impairment charges of \$2,123 related to leased assets in which the carrying amount of the assets were not recoverable.

FORM 10-K as of December 31, 2014

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

(in thousands, except per share amounts)

NOTE 12: DEBT

Outstanding debt balances were as follows:

	December 31, 2014	2013
Notes payable – current		
Uncommitted lines of credit	\$24,750	\$43,062
Other	825	729
	\$25,575	\$43,791
Long-term debt		
Credit facility	\$240,000	\$239,000
Senior notes	225,000	225,000
Industrial development revenue bonds	11,900	11,900
Other	2,894	4,342
	\$479,794	\$480,242

As of December 31, 2014, the Company had various short-term uncommitted lines of credit with borrowing limits of \$139,942. The weighted-average interest rate on outstanding borrowings on the short-term uncommitted lines of credit as of December 31, 2014 and 2013 was 2.96 percent and 3.24 percent, respectively. The decrease in the weighted-average interest rate is attributable to the change in mix of borrowings in foreign entities. Short-term uncommitted lines mature in less than one year. The amount available under the short-term uncommitted lines at December 31, 2014 was \$115,192.

In August 2014, the Company amended and extended its credit facility. As of December 31, 2014, the Company has increased its borrowing limits under its amended credit facility from \$500,000 to \$520,000. The amended credit facility expires in August 2019 and did not change any of the covenants related to the previous agreement. Under the terms of the amended credit facility agreement, the Company has the ability, subject to various approvals, to increase the borrowing limits by \$250,000. Up to \$50,000 of the revolving credit facility is available under a swing line sub-facility. The weighted-average interest rate on outstanding credit facility borrowings as of December 31, 2014 and 2013 was 1.69 percent and 1.36 percent, respectively, which is variable based on the LIBOR. The amount available under the amended credit facility as of December 31, 2014 was \$280,000. The Company incurred \$1,368 of fees related to its amended credit facility in 2014, which are amortized as a component of interest expense over the term of the facility.

In March 2006, the Company issued senior notes in an aggregate principal amount of \$300,000 with a weighted-average fixed interest rate of 5.50 percent. The Company entered into a derivative transaction to hedge interest rate risk on \$200,000 of the senior notes, which was treated as a cash flow hedge. This reduced the effective interest rate from 5.50 percent to 5.36 percent. The Company funded the repayment of \$75,000 of the senior notes at maturity in March 2013 using borrowings under its revolving credit facility. The maturity dates of the remaining senior notes are staggered, with \$175,000 and \$50,000 due in 2016 and 2018, respectively.

Maturities of long-term debt as of December 31, 2014 are as follows:

Maturities of
Long-Term Debt

2015	\$—
2016	176,091
2017	13,230
2018	50,364
Thereafter	240,109
	\$479,794

Interest expense on the Company's debt instruments for the years ended December 31, 2014, 2013 and 2012 was \$22,417, \$26,896 and \$23,454, respectively.

Table of Contents

DIEBOLD INCORPORATED AND SUBSIDIARIES

FORM 10-K as of December 31, 2014

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

(in thousands, except per share amounts)

In 1997, industrial development revenue bonds were issued on behalf of the Company. The proceeds from the bond issuances were used to construct new manufacturing facilities in the United States. The Company guaranteed the payments of principal and interest on the bonds by obtaining letters of credit. The bonds were issued with a 20-year original term and are scheduled to mature in 2017. Each industrial development revenue bond carries a variable interest rate, which is reset weekly by the remarketing agents. The weighted-average interest rate on the bonds was 0.27 percent and 0.36 percent as of December 31, 2014 and 2013, respectively. Interest expense on the bonds for the years ended December 31, 2014, 2013 and 2012 was \$95, \$96 and \$88, respectively.

The Company's financing agreements contain various restrictive financial covenants, including net debt to capitalization and net interest coverage ratios. As of December 31, 2014, the Company was in compliance with the financial and other covenants in its debt agreements.

NOTE 13: BENEFIT PLANS

Qualified Pension Benefits The Company has pension plans covering certain U.S. employees that have been closed to new participants since July 2003. The Company's funding policy for salaried plans is to contribute annually based on actuarial projections and applicable regulations. Plans covering hourly employees and union members generally provide benefits of stated amounts for each year of service. The Company's funding policy for hourly plans is to make at least the minimum annual contributions required by applicable regulations. Employees of the Company's operations in countries outside of the United States participate to varying degrees in local pension plans, which in the aggregate are not significant.

Supplemental Executive Retirement Benefits The Company has non-qualified pension plans to provide supplemental retirement benefits to certain officers. Benefits are payable at retirement based upon a percentage of the participant's compensation, as defined.

During the first quarter of 2013, the Company recognized a curtailment loss of \$1,159 within selling and administrative expense as a result of the termination of certain executives.

In July 2013, the Company's board of directors approved the freezing of certain pension and supplemental executive retirement plan (SERP) benefits effective as of December 31, 2013 for U.S.-based salaried employees. The Company recognized the plan freeze in the three-month period ended September 30, 2013 as a curtailment, since it eliminates for a significant number of participants the accrual of defined benefits for all of their future services. The impact of the curtailment includes the one-time accelerated recognition of outstanding unamortized pre-tax prior service cost of \$809 within selling and administrative expense and a pre-tax reduction in AOCI of \$52,550, attributable to the decrease in long-term pension liabilities. This curtailment event triggered a re-measurement for the affected benefit plans as of July 31, 2013 using a discount rate of 5.06 percent. The re-measurement resulted in a further reduction of long-term pension liabilities and AOCI (pre-tax) related to the actuarial gain occurring during the year of \$71,008.

In connection with the voluntary early retirement program in the fourth quarter of 2013, the Company recorded distributions of \$138,482 of pension plan assets, of which \$15,817 were paid to participants in 2014. Distributions were made via lump-sum payments out of plan assets to participants. These distributions resulted in a non-cash pension charge of \$67,593 recognized in selling and administrative expense within the Company's statement of

operations. The non-cash pension charge included a \$8,704 curtailment loss, a \$20,156 settlement loss and \$38,733 in special termination benefits. During the fourth quarter of 2012, \$62,754 of pension plan assets were distributed to certain deferred terminated vested participants to settle certain salary plan liabilities, which resulted in \$21,907 of additional pension expense recognized in selling and administrative expense within the Company's statement of operations.

Other Benefits In addition to providing pension benefits, the Company provides post-retirement healthcare and life insurance benefits (referred to as other benefits) for certain retired employees. Eligible employees may be entitled to these benefits based upon years of service with the Company, age at retirement and collective bargaining agreements. Currently, the Company has made no commitments to increase these benefits for existing retirees or for employees who may become eligible for these benefits in the future. Currently there are no plan assets and the Company funds the benefits as the claims are paid. The post-retirement benefit obligation was determined by application of the terms of medical and life insurance plans together with relevant actuarial assumptions and healthcare cost trend rates.

Table of Contents

DIEBOLD INCORPORATED AND SUBSIDIARIES

FORM 10-K as of December 31, 2014

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

(in thousands, except per share amounts)

The following tables set forth the change in benefit obligation, change in plan assets, funded status, consolidated balance sheet presentation and net periodic benefit cost for the Company's defined benefit pension plans and other benefits at and for the years ended December 31:

	Pension Benefits		Other Benefits	
	2014	2013	2014	2013
Change in benefit obligation				
Benefit obligation at beginning of year	\$468,945	\$673,711	\$13,085	\$15,727

	(101,134) 71,075	(1,909) 1,991

Net actuarial (losses) gains occurring during the year				
Prior service cost recognized due to curtailment—		2,075	—	—
Net actuarial losses recognized due to curtailment	—	54,455	—	—
Settlements	—	20,156	—	—
Balance at end of year	\$(176,171)	\$(77,906)	\$(4,056)	\$(2,123)

(1) The fair value of plan assets as of December 31, 2013 reflects distributions of \$15,817 paid in 2014 related to the Company's voluntary early retirement program.

(2) Included in the consolidated balance sheets in pensions and other benefits and other post-retirement benefits are international plans.

(3) Represents amounts in accumulated other comprehensive loss that have not yet been recognized as components of net periodic benefit cost.

Table of Contents

DIEBOLD INCORPORATED AND SUBSIDIARIES

FORM 10-K as of December 31, 2014

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

(in thousands, except per share amounts)

	Pension Benefits			Other Benefits		
	2014	2013	2012	2014	2013	2012
Components of net periodic benefit cost						
Service cost	\$2,924	\$11,616	\$11,446	\$—	\$—	\$—
Interest cost	22,999	27,597	31,831	627	628	814
Expected return on plan assets	(25,798)	(35,746)	(40,821)	—	—	—
Amortization of prior service cost (1)	(156)	(313)	258	(226)	(488)	(517)
Recognized net actuarial loss	3,025	14,469	16,777	202	423	488
Curtailment loss	—	10,672	—	—	—	—
Settlement loss	—	20,156	21,907	—	—	—
Special termination benefits	—	38,733	—	—	—	—
Net periodic benefit cost	\$2,994	\$87,184	\$41,398	\$603	\$563	\$785

The annual amortization of prior service cost is determined as the increase in projected benefit obligation due to the (1) plan change divided by the average remaining service period of participating employees expected to receive benefits under the plan.

The following table represents information for pension plans with an accumulated benefit obligation in excess of plan assets at December 31:

	2014	2013
Projected benefit obligation	\$578,003	\$455,009
Accumulated benefit obligation	\$577,639	\$454,681
Fair value of plan assets	\$364,205	\$332,543

The following table represents the weighted-average assumptions used to determine benefit obligations at December 31:

	Pension Benefits		Other Benefits		
	2014	2013	2014	2013	
Discount rate	4.21	% 5.09	% 4.21	% 5.09	%
Rate of compensation increase	N/A	N/A	N/A	N/A	

The following table represents the weighted-average assumptions used to determine periodic benefit cost at December 31:

	Pension Benefits		Other Benefits		
	2014	2013	2014	2013	
Discount rate	5.09	% 4.21	% 5.09	% 4.21	%
Expected long-term return on plan assets	7.95	% 8.05	% N/A	N/A	
Rate of compensation increase	N/A	3.25	% N/A	N/A	

The discount rate is determined by analyzing the average return of high-quality (i.e., AA-rated) fixed-income investments and the year-over-year comparison of certain widely used benchmark indices as of the measurement date. The expected long-term rate of return on plan assets is primarily determined using the plan's current asset allocation and its expected rates of return based on a geometric averaging over 20 years. The Company also considers

information provided by its investment consultant, a survey of other companies using a December 31 measurement date and the Company's historical asset performance in determining the expected long-term rate of return. The rate of compensation increase assumptions reflects the Company's long-term actual experience and future and near-term outlook.

During 2014, the Society of Actuaries released a series of updated mortality tables resulting from recent studies measuring mortality rates for various groups of individuals. As of December 31, 2014, the Company adopted these mortality tables, which reflect improved trends in longevity and have the effect of increasing the estimate of benefits to be received by plan participants.

Table of Contents

DIEBOLD INCORPORATED AND SUBSIDIARIES

FORM 10-K as of December 31, 2014

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

(in thousands, except per share amounts)

The following table represents assumed healthcare cost trend rates at December 31:

	2014	2013	
Healthcare cost trend rate assumed for next year	7.5	% 7.5	%
Rate to which the cost trend rate is assumed to decline (the ultimate trend rate)	5.0	% 5.0	%
Year that rate reaches ultimate trend rate	2020	2019	

The healthcare trend rates are reviewed based upon the results of actual claims experience. The Company used healthcare cost trends of 7.5 percent in both 2015 and 2014 decreasing to an ultimate trend of 5.0 percent in 2020 and 2019 for both medical and prescription drug benefits using the Society of Actuaries Long Term Trend Model with assumptions based on the 2008 Medicare Trustees' projections. Assumed healthcare cost trend rates have a significant effect on the amounts reported for the healthcare plans.

A one-percentage-point change in assumed healthcare cost trend rates would have the following effects:

	One-Percentage-Point Increase	One-Percentage-Point Decrease	
Effect on total of service and interest cost	\$ 34	\$ (32))
Effect on post-retirement benefit obligation	\$ 928	\$ (836))

The Company has a pension investment policy designed to achieve an adequate funded status based on expected benefit payouts and to establish an asset allocation that will meet or exceed the return assumption while maintaining a prudent level of risk. The plans' target asset allocation adjusts based on the plan's funded status. As the funded status improves or declines, the debt security target allocation will increase and decrease, respectively. The Company utilizes the services of an outside consultant in performing asset / liability modeling, setting appropriate asset allocation targets along with selecting and monitoring professional investment managers.

The plan assets are invested in equity and fixed income securities, alternative assets and cash. Within the equities asset class, the investment policy provides for investments in a broad range of publicly-traded securities including both domestic and international stocks diversified by value, growth and cap size. Within the fixed income asset class, the investment policy provides for investments in a broad range of publicly-traded debt securities with a substantial portion allocated to a long duration strategy in order to partially offset interest rate risk relative to the plans' liabilities. The alternative asset class includes investments in diversified strategies with a stable and proven track record and low correlation to the U.S. stock market.

The following table summarizes the Company's target mix for these asset classes in 2015, which are readjusted at least quarterly within a defined range, and the Company's actual pension plan asset allocation as of December 31, 2014 and 2013:

	Target Allocation Percentage	Actual Allocation Percentage	
	2015	2014	2013
Equity securities	45%	45%	41%
Debt securities	40%	40%	33%
Real estate	5%	5%	8%

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

(in thousands, except per share amounts)

Assets are categorized into a three level hierarchy based upon the assumptions (inputs) used to determine the fair value of the assets.

Level 1 - Fair value of investments categorized as level 1 are determined based on period end closing prices in active markets. Mutual funds are valued at their net asset value (NAV) on the last day of the period.

Level 2 - Fair value of investments categorized as level 2 are determined based on the latest available ask price or latest trade price if listed. The fair value of unlisted securities is established by fund managers using the latest reported information for comparable securities and financial analysis. If the manager believes the fund is not capable of immediately realizing the fair value otherwise determined, the manager has the discretion to determine an appropriate value. Common collective trusts are valued at NAV on the last day of the period.

Level 3 - Fair value of investments categorized as level 3 represent the plan's interest in private equity, hedge and property funds. The fair value for these assets is determined based on the NAV as reported by the underlying investment managers.

The following table summarizes the fair value of the Company's plan assets as of December 31, 2014:

	Fair Value	Level 1	Level 2	Level 3
Cash and other	\$3,883	\$3,883	\$—	\$—
Mutual funds:

Fair value of plan assets at end of year	\$346,560			

Real estate common collective trust The objective of the real estate common collective trust (CCT) is to achieve long-term returns through investments in a broadly diversified portfolio of improved properties with stabilized occupancies. As of December 31, 2014, investments in this CCT included approximately 44 percent office, 21 percent residential, 24 percent retail and 11 percent industrial, cash and other. As of December 31, 2013, investments in this CCT included approximately 45 percent office, 23 percent residential, 18 percent retail and 14 percent industrial, cash and other. Investments in the real estate CCT can be redeemed once per quarter subject to available cash, with a 45-day notice.

Other common collective trusts At December 31, 2014, approximately 58 percent of the other CCTs are invested in fixed income securities including approximately 27 percent in mortgage-backed securities, 47 percent in corporate bonds and 26 percent in U.S. Treasury and other. Approximately 42 percent of the other CCTs at December 31, 2014 are invested in Russell 1000 Fund large cap index funds. At December 31, 2013, approximately 54 percent of the other CCTs are invested in fixed-income securities including approximately 29 percent in mortgage-backed securities, 42 percent in corporate bonds and 29 percent in U.S. Treasury and other. Approximately 46 percent of the other CCTs at December 31, 2013 are invested in Russell 1000 Fund large cap index funds. Investments in fixed-income securities can be redeemed daily.

Multi-strategy hedge funds The objective of the multi-strategy hedge funds is to diversify risks and reduce volatility. At December 31, 2014 and 2013, investments in this class include approximately 44 percent and 35 (c) percent long/short equity, respectively, 44 percent and 45 percent arbitrage and event investments, respectively, and 10 percent and 20 percent in directional trading, fixed income and other, respectively. Investments in the multi-strategy hedge fund can be redeemed semi-annually with a 95-day notice.

Private equity funds The objective of the private equity funds is to achieve long-term returns through investments in a diversified portfolio of private equity limited partnerships that offer a variety of investment strategies, targeting low volatility and low correlation to traditional asset classes. As of December 31, 2014 and 2013, investments in these private equity funds include approximately 50 percent, in both years, in buyout private equity (d) funds that usually invest in mature companies with established business plans, 25 percent in both years, in special situations private equity and debt funds that focus on niche investment strategies and 25 percent in both years, in venture private equity funds that invest in early development or expansion of business. Investments in the private equity fund can be redeemed only with written consent from the general partner, which may or may not be granted. At December 31, 2014 and 2013, the Company had unfunded commitments of underlying funds of \$5,529 in both years.

DIEBOLD INCORPORATED AND SUBSIDIARIES

FORM 10-K as of December 31, 2014

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

(in thousands, except per share amounts)

The following table summarizes the changes in fair value of level 3 assets for the years ended December 31:

	2014	2013
Balance, January 1	\$73,426	\$76,883
Dispositions	(26,167) (12,850
Realized and unrealized gain, net	6,881	9,393
Balance, December 31	\$54,140	\$73,426

The following table represents the amortization amounts expected to be recognized during 2015:

	Pension Benefits	Other Benefits
Amount of net prior service credit	\$7	\$(159
Amount of net loss	\$6,514	\$326

The Company contributed \$9,622 to its pension plans, including contributions to the nonqualified plan, and \$1,314 to its other post-retirement benefit plan during the year ended December 31, 2014. The Company expects to contribute \$18,648 to its pension plans, including the nonqualified plan, and \$1,533 to its other post-retirement benefit plan during the year ending December 31, 2015. The following benefit payments, which reflect expected future service, are expected to be paid:

	Pension Benefits	Other Benefits	Other Benefits after Medicare Part D Subsidy
2015	\$26,830	\$1,533	\$1,390
2016	\$27,071	\$1,505	\$1,366
2017	\$27,366	\$1,473	\$1,337
2018	\$27,967	\$1,425	\$1,294
2019	\$28,439	\$1,367	\$1,241
2020-2024	\$152,422	\$5,936	\$5,399

Retirement Savings Plan The Company offers employee 401(k) savings plans (Savings Plans) to encourage eligible employees to save on a regular basis by payroll deductions. Effective July 1, 2003, a new enhanced benefit to the Savings Plans was effective in lieu of participation in the pension plan for salaried employees. The following table represents the Company's basic match percentage on participant qualified contributions up to a percentage of their compensation:

	Employees hired prior to July 1, 2003	Employees hired on or after July 1, 2003
Effective January 1, 2012 - December 31, 2013	30% of first 6%	60% of first 6%
Effective January 1, 2014 - December 31, 2014	60% of first 6%	60% of first 6%

The Company match is determined by the Board of Directors and evaluated at least annually. Total Company match was \$8,738, \$7,667 and \$8,357 for the years ended December 31, 2014, 2013 and 2012, respectively. Effective December 31, 2013, the salaried pension plan benefits were frozen and therefore all participants in the Savings Plan began receiving the equal Company basic match percentages in January 2014.

Deferred Compensation Plans The Company has deferred compensation plans that enable certain employees to defer receipt of a portion of their cash bonus, 401(k) or share-based compensation and non-employee directors to defer receipt of director fees at the participants' discretion. For deferred cash-based compensation and 401(k), the Company established rabbi trusts which are recorded at fair value of the underlying securities within securities and other investments. The related deferred compensation liabilities are recorded at fair value within other long-term liabilities. Realized and unrealized gains and losses on marketable securities in the rabbi trusts are recognized in investment income with corresponding changes in the Company's deferred compensation obligation recorded as compensation cost within selling and administrative expense.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

(in thousands, except per share amounts)

NOTE 14: LEASES

The Company's future minimum lease payments due under non-cancellable operating leases for real estate, vehicles and other equipment at December 31, 2014 are as follows:

	Total	Real Estate	Vehicles and Equipment (a)
2015	\$44,790	\$30,233	\$14,557
2016	33,978	25,892	8,086
2017	23,609	19,205	4,404
2018	16,483	14,725	1,758
2019	13,785	13,004	781
Thereafter	16,638	16,148	490
	\$149,283	\$119,207	\$30,076

The Company leases vehicles with contractual terms of 36 to 60 months that are cancellable after 12 months (a) without penalty. Future minimum lease payments reflect only the minimum payments during the initial 12-month non-cancellable term.

Under lease agreements that contain escalating rent provisions, lease expense is recorded on a straight-line basis over the lease term. Rental expense under all lease agreements amounted to \$72,164, \$75,348 and \$74,849 for the years ended December 31, 2014, 2013 and 2012, respectively.

NOTE 15: GUARANTEES AND PRODUCT WARRANTIES

In 1997, industrial development revenue bonds were issued on behalf of the Company. The Company guaranteed repayment of the bonds (refer to note 12) by obtaining letters of credit. The carrying value of the bonds was \$11,900 as of December 31, 2014 and 2013.

The Company provides its global operations guarantees and standby letters of credit through various financial institutions to suppliers, customers, regulatory agencies and insurance providers. If the Company is not able to make payment, the suppliers, customers, regulatory agencies and insurance providers may draw on the pertinent bank. At December 31, 2014, the maximum future contractual obligations relative to these various guarantees totaled \$111,101, of which \$27,985 represented standby letters of credit to insurance providers, and no associated liability was recorded. At December 31, 2013, the maximum future payment obligations relative to these various guarantees totaled \$87,104, of which \$26,035 represented standby letters of credit to insurance providers, and no associated liability was recorded.

The Company provides its customers a standard manufacturer's warranty and records, at the time of the sale, a corresponding estimated liability for potential warranty costs. Estimated future obligations due to warranty claims are based upon historical factors such as labor rates, average repair time, travel time, number of service calls per machine and cost of replacement parts.

Changes in the Company's warranty liability balance are illustrated in the following table:

	2014	2013
Balance at January 1	\$83,199	\$81,751

Current period accruals (1)	81,316	58,736	
Current period settlements	(51,167) (57,288)
Balance at December 31	\$113,348	\$83,199	

(1) Includes the impact of foreign exchange rate fluctuations.

NOTE 16: COMMITMENTS AND CONTINGENCIES

Contractual Obligation

At December 31, 2014, the Company had purchase commitments due within one year totaling \$3,616 for materials through contract manufacturing agreements at negotiated prices. The amounts purchased under these obligations totaled \$11,869 in 2014.

Indirect Tax Contingencies

The Company accrues non income-tax liabilities for indirect tax matters when management believes that a loss is probable and the amounts can be reasonably estimated, while contingent gains are recognized only when realized. In the event any losses are sustained in excess of accruals, they are charged against income. In evaluating indirect tax matters, management takes into consideration factors such as historical experience with matters of similar nature, specific facts and circumstances, and the likelihood of prevailing. Management evaluates and updates accruals as matters progress over time. It is reasonably possible that some of the matters for which accruals have not been established could be decided unfavorably to the Company and could require recognizing future expenditures. Also, statutes of limitations could expire without the Company paying the taxes for matters for which accruals have been established, which could result in the recognition of future gains upon reversal of these accruals at that time.

At December 31, 2014, the Company was a party to several routine indirect tax claims from various taxing authorities globally that were incurred in the normal course of business, none of which individually or in the aggregate is considered material by management in relation to the Company's financial position or results of operations. In management's opinion, the consolidated financial statements would not be materially affected by the outcome of these indirect tax claims and/or proceedings or asserted claims.

In addition to these routine indirect tax matters, the Company was a party to the proceedings described below:

In August 2012, one of the Company's Brazilian subsidiaries was notified of a tax assessment of approximately R\$270,000, including penalties and interest, regarding certain Brazilian federal indirect taxes (Industrialized Products Tax, Import Tax, Programa de Integração Social and Contribution to Social Security Financing) for 2008 and 2009. The assessment alleges improper importation of certain components into Brazil's free trade zone that would nullify certain indirect tax incentives. On September 10, 2012, the Company filed its administrative defenses with the tax authorities. This proceeding is currently pending an administrative level decision, which could negatively impact Brazilian federal indirect taxes in other years that remain open under statute. It is reasonably possible that the Company could be required to pay taxes, penalties and interest related to this matter, which could be material to the Company's consolidated financial statements.

In response to an order by the administrative court, the tax inspector provided further analysis with respect to the initial assessment in December 2013, which has now been accepted by the initial administrative court, that indicates a potential exposure that is significantly lower than the initial tax assessment received in August 2012. However, this matter remains subject to ongoing administrative proceedings and appeals. Accordingly, the Company cannot provide any assurance that its exposure pursuant to the initial assessment will be lowered significantly or at all. The Company continues to defend itself in the administrative proceedings.

In connection with the Brazilian indirect tax assessment, in May 2013, the SEC requested that the Company retain certain documents and produce certain records relating to the assessment, to which the Company complied. However, in September 2014, the Company was notified by the SEC that it had closed its inquiry relating to the assessment.

In addition, the Company is challenging customs rulings in Thailand seeking to retroactively collect customs duties on previous imports of ATMs. Management believes that the customs authority's attempt to retroactively assess customs duties is in contravention of World Trade Organization agreements and, accordingly, is challenging the rulings. The matters are currently in the appeals process and management continues to believe that the Company has a valid legal position in these appeals. Accordingly, the Company has not accrued any amount for this contingency; however, the Company cannot provide any assurance that it will not ultimately be subject to a retroactive assessment.

At December 31, 2014 and 2013, the Company had an accrual of approximately \$12,500 and \$20,750, respectively, related to the Brazilian indirect tax matter disclosed above. The reduction in the accrual is due to the expiration of the statute of limitations related to years subject to audit and foreign currency fluctuations.

Table of Contents

DIEBOLD INCORPORATED AND SUBSIDIARIES

FORM 10-K as of December 31, 2014

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

(in thousands, except per share amounts)

A loss contingency is reasonably possible if it has a more than remote but less than probable chance of occurring. Although management believes the Company has valid defenses with respect to its indirect tax positions, it is reasonably possible that a loss could occur in excess of the estimated accrual, for which the Company estimated the aggregate risk at December 31, 2014 to be up to approximately \$229,700 for its material indirect tax matters, of which approximately \$175,600 and \$26,000, respectively, relates to the Brazilian indirect tax matter and Thailand customs matter disclosed above. The aggregate risk related to indirect taxes is adjusted as the applicable statutes of limitations expire.

Legal Contingencies

At December 31, 2014, the Company was a party to several lawsuits that were incurred in the normal course of business, none of which individually or in the aggregate is considered material by management in relation to the Company's financial position or results of operations. In addition, the Company has indemnification obligations with certain former employees, and costs associated with these indemnifications are expensed as incurred. In management's opinion, the Company's consolidated financial statements would not be materially affected by the outcome of these legal proceedings, commitments or asserted claims.

NOTE 17: DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

The Company uses derivatives to mitigate the economic consequences associated with the fluctuations in currencies and interest rates. The Company records all derivative instruments on the balance sheet at fair value and the changes in the fair value are recognized in earnings unless specific hedge accounting criteria are met. Special accounting for qualifying hedges allows derivative gains and losses to be reflected in the statement of operations or AOCI together with the hedged exposure, and requires that the Company formally document, designate and assess the effectiveness of transactions that receive hedge accounting treatment.

Gains or losses associated with ineffectiveness are reported currently in earnings. The Company does not enter into any speculative positions with regard to derivative instruments.

The Company periodically evaluates its monetary asset and liability positions denominated in foreign currencies. The impact of the Company's and the counterparties' credit risk on the fair value of the contracts is considered as well as the ability of each party to execute its obligations under the contract. The Company generally uses investment grade financial counterparties in these transactions and believes that the resulting credit risk under these hedging strategies is not significant.

FOREIGN EXCHANGE

Net Investment Hedges The Company has international subsidiaries with net balance sheet positions that generate cumulative translation adjustments within AOCI. The Company uses derivatives to manage potential changes in value of its net investments in Brazil. The Company uses the forward-to-forward method for its quarterly retrospective and prospective assessments of hedge effectiveness. No ineffectiveness results if the notional amount of the derivative matches the portion of the net investment designated as being hedged because the Company uses derivative instruments with underlying exchange rates consistent with its functional currency and the functional currency of the hedged net investment. Changes in value that are deemed effective are reflected in AOCI until complete liquidation of the subsidiary, when they would be reclassified to income together with the gain or loss on the entire investment. The

fair value of the Company's net investment hedge contracts was \$1,221 and \$313 as of December 31, 2014 and 2013, respectively. The gain recognized in AOCI on net investment hedge contracts was \$788 and \$4,563 for the years ended December 31, 2014 and 2013, respectively.

Non-Designated Hedges A substantial portion of the Company's operations and revenues are international. As a result, changes in foreign exchange rates can create substantial foreign exchange gains and losses from the revaluation of non-functional currency monetary assets and liabilities. The Company's policy allows the use of foreign exchange forward contracts with maturities of up to 24 months to mitigate the impact of currency fluctuations on those foreign currency asset and liability balances. The Company elected not to apply hedge accounting to its foreign exchange forward contracts. Thus, spot-based gains/losses offset revaluation gains/losses within foreign exchange loss, net and forward-based gains/losses represent interest expense. The fair value of the Company's non-designated foreign exchange forward contracts was \$776 and \$705 as of December 31, 2014 and 2013, respectively.

The following table summarizes the gain (loss) recognized on non-designated foreign exchange derivative instruments for the years ended December 31:

	2014	2013
Interest expense	\$(6,291) \$(6,406
Foreign exchange gain, net	21,100	10,900
Total	\$14,809	\$4,494

INTEREST RATE

Cash Flow Hedges The Company has variable rate debt and is subject to fluctuations in interest related cash flows due to changes in market interest rates. The Company's policy allows derivative instruments designated as cash flow hedges that fix a portion of future variable-rate interest expense. As of December 31, 2014, the Company has two pay-fixed receive-variable interest rate swaps, with a notional amount totaling \$50,000, to hedge against changes in the LIBOR benchmark interest rate on a portion of the Company's LIBOR-based borrowings. Changes in value that are deemed effective are accumulated in AOCI and reclassified to interest expense when the hedged interest is accrued. To the extent that it becomes probable that the Company's variable rate borrowings will not occur, the gains or losses on the related cash flow hedges will be reclassified from AOCI to interest expense. The fair value of the Company's interest rate contracts was \$(1,212) and \$(2,351) as of December 31, 2014 and 2013, respectively.

In December 2005 and January 2006, the Company executed cash flow hedges by entering into receive-variable and pay-fixed interest rate swaps, with a total notional amount of \$200,000, related to the senior notes issuance in March 2006. Amounts previously recorded in AOCI related to the pre-issuance cash flow hedges will continue to be reclassified to income on a straight-line basis through February 2016.

The gain recognized on designated cash flow hedge derivative instruments for the years ended December 31, 2014 and 2013 were \$1,093 and \$1,181, respectively. Gains and losses related to interest rate contracts are reclassified from AOCI are recorded in interest expense on the statement of operations. The Company anticipates reclassifying \$906 from other comprehensive income to interest expense within the next 12 months.

NOTE 18: RESTRUCTURING AND OTHER CHARGES

The following table summarizes the impact of Company's restructuring charges (accrual adjustments) on the consolidated statements of operations for the years ended December 31:

	2014	2013	2012
Cost of sales - services	\$601	\$27,107	\$6,226
Cost of sales - products	1,398	1,256	(1,849
Selling and administrative expense	13	22,561	9,037
Research, development and engineering expense	9,860	6,091	1,827
Total	\$11,872	\$57,015	\$15,241

EMEA	—	567	376
Total Other	—	3,128	356
Total	\$11,872	\$57,015	\$15,241

During the first quarter of 2013, the Company announced a multi-year realignment plan. Certain aspects of this plan were previously disclosed under the Company's global realignment plan and global shared services plan. This multi-year realignment focuses on globalizing the Company's service organization and creating a unified center-led global organization for research and development, as well as transforming the Company's general and administrative cost structure. Restructuring charges of \$11,872, \$57,015 and \$15,241 for the years ended December 31, 2014, 2013 and 2012, respectively, related to the Company's multi-year realignment plan. Restructuring charges of \$31,282 in 2013 related to severance as part of the the voluntary early retirement program elected by approximately 800 participants. Also included were charges related to realignment of resources and certain international facilities to better support opportunities in target markets and leverage software-led services technology to support customers in efforts to optimize overall operational performance. As of December 31, 2014, the Company anticipates additional restructuring costs of \$5,000 to \$7,000 to be incurred through the end of 2015, primarily within NA and EMEA, along with the realignment of LA and Brazil announced in January 2015. Further details regarding the Company's realignment of LA and Brazil appear in note 20. As of December 31, 2014, the restructuring accrual balance consists of only severance restructuring activities. As management finalizes certain aspects of the realignment plan, the anticipated future costs related to this plan are subject to change.

The following table summarizes the Company's cumulative total restructuring costs for the multi-year realignment plan as of December 31, 2014:

	Severance	Other	Total
Cumulative total restructuring costs for the multi-year realignment plan			
NA	\$61,713	\$1,988	\$63,701

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

(in thousands, except per share amounts)

The following table summarizes the Company's restructuring accrual balances and related activity:

Balance at January 1, 2012	\$10,136	
Liabilities incurred	15,241	
Liabilities paid/settled	(13,533))
Balance at December 31, 2012	\$11,844	
Liabilities incurred	57,015	
Liabilities paid/settled	(33,570))
Balance at December 31, 2013	\$35,289	
Liabilities incurred	11,872	
Liabilities paid/settled	(39,315))
Balance at December 31, 2014	\$7,846	

Other Charges

Other charges consist of items that the Company has determined are non-routine in nature and are not expected to recur in future operations. Net non-routine income (expenses) of \$12,486, \$(127,931) and \$(42,133) impacted the years ended December 31, 2014, 2013 and 2012, respectively.

Net non-routine income for the year ended December 31, 2014 related primarily to a \$13,709 pre-tax gain from the sale of the Eras, recognized in gain on sale of assets, net within the consolidated statements of operations, and \$5,821 pre-tax recovery related to indirect taxes in Brazil, within products cost of sales. These gains were partially offset by legal, indemnification and professional fees paid by the Company in connection with ongoing obligations related to a prior settlement recorded within selling and administrative expense.

Net non-routine expenses for 2013 included a \$67,593 non-cash pension charge (refer to note 13), additional losses of \$28,000 related to the settlement of the FCPA investigation, \$17,245 related to settlement of the securities class action, and \$9,300 for executive severance costs. These non-routine charges were recorded within selling and administrative expense.

Net non-routine expenses for 2012 included \$21,907 related to early pension buy-out payments made to certain deferred terminated vested participants (refer to note 13) and estimated losses of \$16,750 related to the FCPA investigation and were recorded within selling and administrative expense.

NOTE 19: FAIR VALUE OF ASSETS AND LIABILITIES

Refer to note 1 for the Company's accounting policies related to fair value accounting. Refer to note 13 for assets held in the Company's defined pension plans, which are measured at fair value. Assets and liabilities subject to fair value measurement are as follows:

	December 31, 2014			December 31, 2013		
	Fair Value	Fair Value Measurements Using Level 1	Level 2	Fair Value	Fair Value Measurements Using Level 1	Level 2
Assets						
Short-term investments						
Certificates of deposit	\$ 136,653	\$ 136,653	\$—	\$ 215,010	\$ 215,010	\$—
U.S. dollar indexed bond funds	—	—	—	27,978	—	27,978
Assets held in rabbi trusts	9,771	9,771	—	10,377	10,377	—
Foreign exchange forward contracts	2,964	—	2,964	1,382	—	1,382
Total	\$ 149,388	\$ 146,424	\$ 2,964	\$ 254,747	\$ 225,387	\$ 29,360
Liabilities						
Deferred compensation	\$ 9,771	\$ 9,771	\$—	\$ 10,377	\$ 10,377	\$—
Foreign exchange forward contracts	967	—	967	364	—	364
Interest rate swaps	1,212	—	1,212	2,351	—	2,351
Total	\$ 11,950	\$ 9,771	\$ 2,179	\$ 13,092	\$ 10,377	\$ 2,715

During the years ended December 31, 2014 and 2013, there were no transfers between levels.

The fair value and carrying value of the Company's debt instruments are summarized as follows:

	December 31, 2014		December 31, 2013	
	Fair Value	Carrying Value	Fair Value	Carrying Value
Notes payable	\$ 25,575	\$ 25,575	\$ 43,791	\$ 43,791
Long-term debt	483,621	479,794	489,499	480,242
Total debt instruments	\$ 509,196	\$ 505,369	\$ 533,290	\$ 524,033

NOTE 20: SEGMENT INFORMATION

The Company considers its operating structure and the information subject to regular review by its President and Chief Executive Officer, who is the Chief Operating Decision Maker (CODM), to identify reportable operating segments. The CODM makes decisions, allocates resources and assesses performance by the following regions, which are also the Company's five reportable operating segments: NA, AP, EMEA, LA and Brazil. The five geographic segments sell and service FSS and security systems around the globe, as well as elections, lottery and information technology solutions in Brazil, through wholly-owned subsidiaries, majority-owned joint ventures and independent distributors in most major countries.

Certain information not routinely used in the management of the segments, information not allocated back to the segments or information that is impractical to report is not shown. Segment operating profit is defined as revenues less expenses identifiable to the those segments. Segment operating income reconciles to consolidated income (loss) from continuing operations before income taxes by deducting corporate costs and other income or expense items that are not attributed to the segments. Further details regarding the Company's net non-routine income (expense) appear in note 18. Total assets are not allocated to segments and are not included in the assessment of segment performance and therefore are excluded from the segment information disclosed below.

Brazil other	225,156	72,033	98,859
	\$ 3,051,053	\$ 2,857,491	\$ 2,991,693

The Company had no customers that accounted for more than 10 percent of total net sales in 2014, 2013 and 2012.

In January 2015, the Company announced the realignment of its Brazil and LA businesses to drive greater efficiency and further improve customer service. Beginning with the first quarter of 2015, the Company will report combined results from its LA and Brazil operations under one single reportable operating segment and reclassify comparative periods for consistency.

NOTE 21: DISCONTINUED OPERATIONS

Included in loss from discontinued operations in 2012 was the realization of the currency translation adjustment balance on the Company's liquidated EMEA-based security business, which was discontinued in 2008.

NOTE 22: QUARTERLY FINANCIAL INFORMATION (UNAUDITED)

The following table presents selected unaudited quarterly financial information for the years ended December 31:

	First Quarter		Second Quarter		Third Quarter		Fourth Quarter	
	2014	2013	2014	2013	2014	2013	2014	2013
Net sales	\$688,293	\$633,511	\$733,457	\$707,113	\$768,031	\$705,424	\$861,272	\$811,443
Gross profit	164,133	130,014	186,795	157,416	200,583	172,805	227,839	180,121
Net income (loss)	4,876	(13,882)	43,131	(103,852)	34,955	(20,204)	34,057	(38,584)
Net (loss) income attributable to noncontrolling interests	(4,930)	(436)	1,496	1,183	1,935	1,486	4,101	2,850
Net income (loss) attributable to Diebold, Incorporated	\$9,806	\$(13,446)	\$41,635	\$(105,035)	\$33,020	\$(21,690)	\$29,956	\$(41,434)
Net income (loss) attributable to Diebold, Incorporated								
Basic earnings (loss) per share	\$0.15	\$(0.21)	\$0.64	\$(1.65)	\$0.51	\$(0.34)	\$0.46	\$(0.65)
Diluted earnings (loss) per share	\$0.15	\$(0.21)	\$0.64	\$(1.65)	\$0.51	\$(0.34)	\$0.46	\$(0.65)
Basic weighted-average shares outstanding (in thousands)	64,254	63,311	64,588	63,700	64,615	63,825	64,631	63,928
Diluted weighted-average shares outstanding (in thousands) (1)	64,809	63,311	65,224	63,700	65,293	63,825	65,380	63,928

Incremental shares of 659 thousand, 447 thousand, 479 thousand and 508 thousand were excluded from the (1) computation of diluted EPS for the first, second, third and fourth quarter of 2013 because their effect is anti-dilutive due to the loss from continuing operations.

Net gain for the second quarter of 2014 included a \$13,709 pre-tax gain from the sale of the Eras subsidiary. Cryptera was acquired for a purchase price of approximately \$13,000 and is included in the EMEA segment within the Company's consolidated financial statements from July 1, 2014, the date of acquisition.

Net loss for the second quarter of 2013 was negatively impacted by \$28,000 of pre-tax estimated losses related to the Foreign Corrupt Practices Act (FCPA) investigation that were partially non-deductible and a \$17,500 pre-tax charge related to settlement of the securities legal action. The second quarter of 2013 was negatively impacted by current and deferred tax expense of \$42,838 related to a change in assertion regarding permanent reinvestment of foreign

subsidiary earnings. In addition, the Company recorded non-cash tax expense related to the re-establishment of a valuation allowance of \$39,130 for the Brazilian manufacturing entity. Loss from continuing operations for the third quarter of 2013 was negatively impacted by a \$70,000 pre-tax, non-cash goodwill impairment charge that was partially non-deductible (refer to note 11). Net loss for the fourth quarter of 2013 was negatively impacted by a \$67,593 pre-tax non-cash pension charge (refer to note 13) and \$35,611 of pre-tax restructuring charges primarily related to the voluntary early retirement program as part of the multi-year realignment plan (refer to note 18).

Table of Contents

ITEM 9: CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 9A: CONTROLS AND PROCEDURES

This annual report on Form 10-K includes the certifications of our chief executive officer (CEO) and chief financial officer (CFO) required by Rule 13a-14 of the Exchange Act. See Exhibits 31.1 and 31.2. This Item 9A includes information concerning the controls and control evaluations referred to in those certifications.

(a) DISCLOSURE CONTROLS AND PROCEDURES

Disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) promulgated under the Exchange Act) are designed to ensure that information required to be disclosed in the reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to management, including the CEO and CFO as appropriate, to allow timely decisions regarding required disclosures.

In connection with the preparation of this annual report on Form 10-K, Diebold's management, under the supervision and with the participation of the CEO and CFO, conducted an evaluation of disclosure controls and procedures as of the end of the period covered by this report. Based on this evaluation, the CEO and CFO have concluded that such disclosure controls and procedures were effective as of December 31, 2014.

(b) MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management, under the supervision of the CEO and CFO, is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting, as defined in Rules 13a-15(f) and 15d-15(f) promulgated under the Exchange Act, is a process designed by, or under the supervision of, the CEO and CFO and effected by the Board of Directors, management and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external reporting purposes in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP). Internal control over financial reporting includes those policies and procedures that:

pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;

provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. GAAP;

provide reasonable assurance that receipts and expenditures of the Company are being made only in accordance with appropriate authorization of management and the Board of Directors; and

provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies and procedures may deteriorate.

A material weakness in internal control over financial reporting is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis.

The Company concluded that its internal control over financial reporting was effective as of December 31, 2014.

KPMG LLP, the Company's independent registered public accounting firm, has issued an auditor's report on management's assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2014. This report is included in Item 8 of this annual report on Form 10-K.

Table of Contents

(c) CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

As previously noted under "Item 4 - Controls and Procedures" in our quarterly report on Form 10-Q for the quarter ended September 30, 2014, management concluded that there was sufficient support to conclude that the previously reported material weakness related to internal controls over Brazil indirect taxes and communication was remediated. During 2014, management completed remediation efforts to: 1) enhance the design and operating effectiveness of control procedures pertaining to manufacturing and supply chain processes relating to indirect tax incentives in its Brazilian subsidiary; 2) redefine and strengthen the roles and responsibilities within its Brazilian subsidiary, including the reporting structure, with respect to the indirect tax compliance program including hiring an Administrative Director who is responsible for managing indirect tax compliance; and 3) formalize and strengthen communication by operational management to regional and corporate management.

India System Adoption and Account Reconciliation Process: As of December 31, 2014, management concluded that there is sufficient support to conclude that the previously reported material weakness related to internal controls relating to system adoption and accounts reconciliation process in its Indian subsidiary has been remediated. During 2014, management completed remediation efforts to: 1) conclude focused training and reinforcement of account reconciliation policies and procedures which govern requirements for content, format, review and approval of balance sheet account reconciliations; 2) align those processes with system functionality to reduce the risk of future errors.

During the quarter ended December 31, 2014, there were no changes, other than the above noted remediation of the India System Adoption and Account Reconciliation Process material weakness, to the Company's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

In connection with the preparation of this annual report on Form 10-K, management, under the supervision and with the participation of the CEO and CFO, conducted an evaluation of the effectiveness of our internal control over financial reporting as of December 31, 2014, based on criteria established in, Internal Control-Integrated Framework (1992), established by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company plans to adopt the updated Internal Control - Integrated Framework (2013), established by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) and effective as of December 15, 2014 during its evaluation of internal control over financial reporting for the year ending December 31, 2015.

ITEM 9B: OTHER INFORMATION

None.

Table of Contents

PART III

ITEM 10: DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Information with respect to directors of the Company, including the audit committee and the designated audit committee financial experts, is included in the Company's proxy statement for the 2015 Annual Meeting of Shareholders (the 2015 Annual Meeting) and is incorporated herein by reference. Information with respect to any material changes to the procedures by which security holders may recommend nominees to the Company's board of directors is included in the Company's proxy statement for the 2015 Annual Meeting and is incorporated herein by reference. The following table summarizes information regarding executive officers of the Company:

Name, Age, Title and Year Elected to Present Office	Other Positions Held Last Five Years
Andreas W. Mattes — 53 President and Chief Executive Officer Year elected: 2013	2011-Jun 2013: Senior Vice President, Global Strategic Partnerships, Violin Memory (computer storage systems); 2008 - 2011: Senior Vice President and General Manager of Enterprise Services for the Americas, Hewlett-Packard Co. (computer technologies)
George S. Mayes, Jr. — 56 Executive Vice President, Chief Operating Officer Year elected: 2013	2006-2013: Senior Vice President, Supply Chain Management
Stefan E. Merz — 50 Senior Vice President, Strategic Projects Year elected: 2013	2011-Aug 2013: Vice President, Sales, Strategy and Operations, Enterprise Group, Hewlett-Packard Co. (computer technologies); 2009 - 2011: Vice President Strategy and Operations, Enterprise Operations, Enterprise services for Americas, Hewlett-Packard Co.
Christopher A. Chapman — 40 Senior Vice President and Chief Financial Officer Year elected: 2014	2011 - Jun 2014: Vice President, Global Finance, 2004-2011: Vice President, Controller, International Operations
Jonathan B. Leiken — 41 Senior Vice President, Chief Legal Officer and Secretary Year elected: 2014	2005 - May 2014: Partner, Jones Day (global legal services)
John D. Kristoff — 47 Vice President, Chief Communications Officer Year elected: 2006	
Christopher Macey — 42 Vice President, Corporate Controller Year elected: 2012	2009-Apr 2012: Vice President, Corporate Accounting and External Reporting
Sheila M. Rutt — 46 Vice President, Chief Human Resources Officer Year elected: 2005	

There is no family relationship, either by blood, marriage or adoption, between any of the executive officers of the Company.

CODE OF ETHICS

All of the directors, executive officers and employees of the Company are required to comply with certain policies and protocols concerning business ethics and conduct, which we refer to as our Business Ethics Policy. The Business Ethics Policy applies not only to the Company, but also to all of those domestic and international companies in which the Company owns or controls a majority interest. The Business Ethics Policy describes certain responsibilities that the directors, executive officers and employees have to the Company, to each other and to the Company's global partners and communities including, but not limited to, compliance with laws, conflicts of interest, intellectual property and the protection of confidential information. The Business Ethics Policy is available on the Company's web site at www.diebold.com or by written request to the Corporate Secretary.

SECTION 16(a) BENEFICIAL OWNERSHIP REPORTING COMPLIANCE

Information with respect to Section 16(a) Beneficial Ownership Reporting Compliance is included in the Company's proxy statement for the 2015 Annual Meeting and is incorporated herein by reference.

ITEM 11: EXECUTIVE COMPENSATION

Information with respect to executive officer and director's compensation is included in the Company's proxy statement for the 2015 Annual Meeting and is incorporated herein by reference. Information with respect to compensation committee interlocks and insider participation and the compensation committee report is included in the Company's proxy statement for the 2015 Annual Meeting and is incorporated herein by reference.

ITEM 12: SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Information with respect to security ownership of certain beneficial owners and management is included in the Company's proxy statement for the 2015 Annual Meeting and is incorporated herein by reference.
