Item 7.01 Regulation FD Disclosure

The following information is furnished pursuant to Regulation FD.

Emerson 3-Month Orders Growth

(Percentage change versus prior year; trailing 3-month averages, excluding acquisitions and divestitures)

	May '13	June '13	July '13
Process Management	+5 to $+10$	+10 to +15	+10
Industrial Automation	-10 to -5	-5	-5 to 0
Network Power	-5	-5 to 0	-5 to 0
Climate Technologies	-5 to 0	0 to +5	0 to +5
Commercial & Residential Solutions	+5	0 to +5	0 to +5
Total Emerson	-5 to 0	0 to +5	0 to +5

July 2013 Orders Comments

Trailing three-month orders growth remained steady, increasing at a rate consistent with the prior month, suggesting continued modest improvement in global business investment. Process Management remained the primary growth driver, with Climate Technologies and Commercial & Residential Solutions also reporting increases. Industrial Automation improved but remained negative, while Network Power continued to decline modestly. Currency translation added 1 percentage point.

Process Management underlying orders remained solid, as investment in oil and gas, power, and chemical end markets continued to drive growth. Europe, Latin America, and Middle East/Africa reported strong increases, along with slight growth in North America. Asia declined slightly, as softer demand in Australia and India offset robust investment in China. Currency translation added 4 percentage points, primarily due to favorable backlog revaluation.

Industrial Automation orders were slightly negative but have an improving trend, reflecting favorable prior year comparisons and increased demand for short-cycle industrial goods. The power generating alternators business remained weakest, particularly in Europe, but was partially offset by solid growth in the electrical drives business. Currency translation added 2 percentage points.

Network Power orders decreased modestly, with mixed trends among businesses. The network power systems business declined slightly, reflecting soft demand globally for data center and telecommunications infrastructure, with growth in Asia and Europe more than offset by weakness in the U.S. and Latin America. The embedded computing and power business remained negative.

Climate Technologies orders grew modestly, led by continued improvement in the refrigeration business and strengthening trends in Asia. Slight growth in the air conditioning business was tempered by mild weather. Market conditions remained slow in Europe.

Commercial & Residential Solutions orders increased moderately, supported by continued investment in U.S. residential end markets. Growth was led by the professional tools and food waste disposers businesses.

Upcoming Investor Events

On Tuesday, September 10, 2013, Emerson President and Chief Operating Officer Edward L. Monser will present at the Vertical Research Partners Industrials Conference in Westbrook, Connecticut, at 8:45 a.m. ET. The presentation
