ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934 (NO FEE REQUIRED)

For the fiscal year ended December 31, 2011

Or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934 (NO FEE REQUIRED)

For the transition period from _____ to _____

Commission file number 0-11129
COMMUNITY TRUST BANCORP, INC.
(Exact name of registrant as specified in its charter)

Kentucky	61-0979818
(State or other jurisdiction of incorporation or organization)	IRS Employer Identification No.
346 North Mayo Trail	41501
Pikeville, Kentucky	(Zip Code)
(address of principal executive offices)	

(606) 432-1414

(Registrant's telephone number)

Securities registered pursuant to Section 12(b) of the Act:
Common Stock, \$5.00 par value
(Title of Class)

Securities registered pursuant to Section 12(g) of the Act:
None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes

No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes

No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days.

Yes

No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate web site, if any, every interactive data file required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files.)

Yes

No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. []

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "accelerated filer, large accelerated filer, and smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes

No

Based upon the closing price of the Common Shares of the Registrant on the NASDAQ-Stock Market LLC – Global Select Market, the aggregate market value of voting stock held by non-affiliates of the Registrant as of June 30, 2011 was \$405.2 million. For the purpose of the foregoing calculation only, all directors and executive officers of the Registrant have been deemed affiliates. The number of shares outstanding of the Registrant's Common Stock as of February 29, 2012 was 15,526,895.

CAUTIONARY STATEMENT
REGARDING FORWARD LOOKING STATEMENTS

Certain of the statements contained herein that are not historical facts are forward-looking statements within the meaning of the Private Securities Litigation Reform Act. CTBI's actual results may differ materially from those included in the forward-looking statements. Forward-looking statements are typically identified by words or phrases such as "believe," "expect," "anticipate," "intend," "estimate," "may increase," "may fluctuate," and similar expressions or phrases, and conditional verbs such as "will," "should," "would," and "could." These forward-looking statements involve risks and uncertainties including, but not limited to, economic conditions, portfolio growth, the credit performance of the portfolios, including bankruptcies, and seasonal factors; changes in general economic conditions including the performance of financial markets, prevailing inflation and interest rates, realized gains from sales of investments, gains from asset sales, and losses on commercial lending activities; results of various investment activities; the effects of competitors' pricing policies, changes in laws and regulations, competition, and demographic changes in target market populations' savings and financial planning needs; industry changes in information technology systems on which we are highly dependent; failure of acquisitions to produce revenue enhancements or cost savings at levels or within the time frames originally anticipated or unforeseen integration difficulties; the adoption by CTBI of a Federal Financial Institutions Examination Council (FFIEC) policy that provides guidance on the reporting of delinquent consumer loans and the timing of associated credit charge-offs for financial institution subsidiaries; and the resolution of legal proceedings and related matters. In addition, the banking industry in general is subject to various monetary and fiscal policies and regulations, which include those determined by the Federal Reserve Board, the Federal Deposit Insurance Corporation, and state regulators, whose policies and regulations could affect CTBI's results. These statements are representative only on the date hereof, and CTBI undertakes no obligation to update any forward-looking statements made.

PART I

Item 1. Business

Community Trust Bancorp, Inc. ("CTBI") is a bank holding company registered with the Board of Governors of the Federal Reserve System pursuant to Section 5(a) of the Bank Holding Company Act of 1956, as amended. CTBI was incorporated August 12, 1980, under the laws of the Commonwealth of Kentucky for the purpose of becoming a bank holding company. Currently, CTBI owns all the capital stock of one commercial bank and one trust company, serving small and mid-sized communities in eastern, northeastern, central, and south central Kentucky, southern West Virginia, and northeastern Tennessee. The commercial bank is Community Trust Bank, Inc., Pikeville, Kentucky and the trust company is Community Trust and Investment Company, Lexington, Kentucky.

At December 31, 2011, CTBI had total consolidated assets of \$3.6 billion and total consolidated deposits, including repurchase agreements, of \$3.1 billion, making it the largest bank holding company headquartered in the Commonwealth of Kentucky.

Through its subsidiaries, CTBI engages in a wide range of commercial and personal banking and trust and wealth management activities, which include accepting time and demand deposits; making secured and unsecured loans to corporations, individuals and others; providing cash management services to corporate and individual customers; issuing letters of credit; renting safe deposit boxes; and providing funds transfer services. The lending activities of our Bank include making commercial, construction, mortgage, and personal loans. Lease-financing, lines of credit, revolving lines of credit, term loans, and other specialized loans, including asset-based financing, are also

available. Our corporate subsidiaries act as trustees of personal trusts, as executors of estates, as trustees for employee benefit trusts, as registrars, transfer agents, and paying agents for bond and stock issues, as depositories for securities, and as providers of full service brokerage services.

COMPETITION

CTBI's subsidiaries face substantial competition for deposit, credit, trust, wealth management, and brokerage relationships in the communities we serve. Competing providers include state banks, national banks, thrifts, trust companies, insurance companies, mortgage banking operations, credit unions, finance companies, brokerage companies, and other financial and non-financial companies which may offer products functionally equivalent to those offered by our subsidiaries. Many of these providers offer services within and outside the market areas served by our subsidiaries. We strive to offer competitively priced products along with quality customer service to build customer relationships in the communities we serve.

The United States and global markets, as well as general economic conditions, have been disruptive and volatile. Some financial institutions have failed and others have been forced to seek acquisition partners. Larger financial institutions could strengthen their competitive position as a result of ongoing consolidation within the financial services industry.

Since July 1989, banking legislation in Kentucky places no limits on the number of banks or bank holding companies that a bank holding company may acquire. Interstate acquisitions are allowed where reciprocity exists between the laws of Kentucky and the home state of the bank or bank holding company to be acquired. Bank holding companies continue to be limited to control of less than 15% of deposits held by banks in the states where they do business (exclusive of inter-bank and foreign deposits).

The Gramm-Leach-Bliley Act of 1999 (the "GLB Act") has expanded the permissible activities of a bank holding company. The GLB Act allows qualifying bank holding companies to elect to be treated as financial holding companies. A financial holding company may engage in activities that are financial in nature or are incidental or complementary to financial activities. We have not yet elected to be treated as a financial holding company. The GLB Act also eliminated restrictions imposed by the Glass-Steagall Financial Services Law, adopted in the 1930s, which prevented banking, insurance, and securities firms from fully entering each other's business. This legislation has resulted in further consolidation in the financial services industry. In addition, removal of these restrictions has increased the number of entities providing banking services and thereby created additional competition.

No material portion of our business is seasonal. We are not dependent upon any one customer or a few customers, and the loss of any one or a few customers would not have a material adverse effect on us. See note 19 to the consolidated financial statements for additional information regarding concentrations of credit.

We do not engage in any operations in foreign countries.

EMPLOYEES

As of December 31, 2011, CTBI and subsidiaries had 1,015 full-time equivalent employees. Our employees are provided with a variety of employee benefits. A retirement plan, an employee stock ownership plan, group life insurance, major medical insurance, a cafeteria plan, and annual management and employee incentive compensation plans are available to all eligible personnel.

SUPERVISION AND REGULATION

General

We, as a registered bank holding company, are restricted to those activities permissible under the Bank Holding Company Act of 1956, as amended, and are subject to actions of the Board of Governors of the Federal Reserve System thereunder. We are required to file an annual report with the Federal Reserve Board and are subject to an annual examination by the Board.

Community Trust Bank, Inc. is a state-chartered bank subject to state and federal banking laws and regulations and periodic examination by the Kentucky Department of Financial Institutions and the restrictions, including dividend restrictions, thereunder. Our Bank is also a member of the Federal Reserve System and is subject to certain restrictions imposed by and to examination and supervision under the Federal Reserve Act. Community Trust and Investment Company is also regulated by the Kentucky Department of Financial Institutions and the Federal Reserve.

Deposits of our Bank are insured by the Federal Deposit Insurance Corporation (FDIC), which subjects banks to regulation and examination under the provisions of the Federal Deposit Insurance Act.

The operations of CTBI and our subsidiaries are also affected by other banking legislation and policies and practices of various regulatory authorities. Such legislation and policies include statutory maximum rates on some loans, reserve requirements, domestic monetary and fiscal policy, and limitations on the kinds of services that may be offered.

CTBI's annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports are available free of charge on our website at www.ctbi.com as soon as reasonably practicable after such materials are electronically filed with or furnished to the Securities and Exchange Commission. CTBI's Code of Business Conduct and Ethics is also available on our website. Copies of our annual report will be made available free of charge upon written request.

The Dodd-Frank Wall Street Reform and Consumer Protection Act

On July 21, 2010, President Obama signed the Dodd-Frank Act into law. This new law has significantly changed the bank regulatory structure and affected the lending, deposit, investment, trading, and operating activities of financial institutions and their holding companies. The Dodd-Frank Act has required various federal agencies to adopt a broad range of new implementing rules and regulations and to prepare numerous studies and reports for Congress. The federal agencies have been given significant discretion in drafting the implementing rules and regulations, and consequently, many of the details and much of the impact of the Dodd-Frank Act are still unknown.

Certain provisions of the Dodd-Frank Act that are relevant to us:

- Broadened the base for FDIC insurance assessments, eliminated the ceiling and increased the size of the floor of the Deposit Insurance Fund, and offset the impact of the minimum floor on institutions with less than \$10 billion in assets. Assessments are now based on the average consolidated total assets less tangible equity capital of a financial institution.

- Removed the federal prohibition on payment of interest on demand deposits, thereby permitting businesses to have interest bearing checking accounts.

- Require new capital regulations which call for higher levels of capital. The same leverage and risk based capital requirements that apply to depository institutions now apply to holding companies. New issuances of trust preferred securities are no longer eligible to qualify as Tier 1 capital. However, CTBI's currently outstanding trust preferred securities are grandfathered and are still considered in Tier 1 capital under the regulations. Under Dodd-Frank, and previously under Federal Reserve policy, we are required to act as a source of financial strength for our bank subsidiary and to commit sufficient resources to support it.

Created a new agency, the Consumer Financial Protection Bureau (Bureau), responsible for the implementation of federal consumer protection laws. The Bureau has broad rule-making authority for a wide range of consumer protection laws that apply to all banks, including the authority to prohibit “unfair, deceptive or abusive” acts and practices. The term “abusive” is relatively new and untested, and we cannot predict how it will be interpreted and enforced. Although insured depository institutions with assets of \$10 billion or less (such as CTBI) will continue to be supervised and examined by their primary federal regulators, rather than the Bureau, with respect to compliance with federal consumer protection laws, any change in regulatory environment may have a negative impact on all financial institutions. In February 2012, the Bureau announced that it was launching an inquiry into industry checking account overdraft programs to determine how these practices are impacting consumers. The full reach and the impact of the Bureau’s inquiries and rulemaking powers on the operations of financial institutions are currently unknown.

Permanently increased the maximum amount of deposit insurance for banks, savings institutions and credit unions to \$250,000 per depositor, retroactive to January 1, 2008, with noninterest bearing transaction accounts and IOLTA accounts having unlimited deposit insurance through December 31, 2012.

Increased the authority of the Federal Reserve Board to examine CTBI and its non-bank subsidiaries and gave the Federal Reserve Board the authority to establish rules regarding interchange fees charged for electronic debit transactions by payment card issuers having assets over \$10 billion and to enforce a new statutory requirement that such fees be reasonable and proportional to the actual cost of a transaction to the issuer. The Federal Reserve Board capped fees at 12 cents, subject to adjustment for fraud prevention costs. Although this requirement does not apply to CTBI, it may impact our ability to generate revenue at the same level as we have in the past.

Restrict proprietary trading by banks, bank holding companies and others, and their acquisition and retention of ownership interests in and sponsorship of hedge funds and private equity funds, subject to an exception allowing a bank to organize and offer hedge funds and private equity funds to customers if certain conditions are met, including, among others, a requirement that the bank limit its ownership interest in any single fund to 3%, and its aggregate investment in all funds to 3%, of Tier 1 capital, with no director or employee of the bank holding an ownership interest in the fund unless he or she provides services directly to the funds.

Require publicly traded companies to give stockholders a non-binding vote on executive compensation and so-called “golden parachute” payments in mergers and acquisitions. The legislation also directs the federal banking regulators to issue rules prohibiting incentive compensation that encourages inappropriate risks.

Imposed new restrictions related to mortgage lending, such as new minimum underwriting standards, requiring certain loan provision qualifications, limitations on mortgage terms, and additional disclosures to mortgage borrowers and prohibits certain yield-spread compensation to mortgage originators.

Permits banks to establish de novo interstate branches at a location where a bank based in that state could establish a branch, and requires banks and bank holding companies to be well-capitalized and well-managed in order to acquire banks outside their home state.

Item 1A. Risk Factors

An investment in our common stock is subject to risks inherent to our business. The material risks and uncertainties that management believes affect us are described below. Before making an investment decision, you should carefully consider the risks and uncertainties described below, together with all of the other information included or incorporated by reference herein. The risks and uncertainties described below are not the only ones facing us. Additional risks and uncertainties that management is not aware of or focused on or that management currently deems immaterial may also impair our business operations. This report is qualified in its entirety by these risk

factors. See also, “Cautionary Statement Regarding Forward-Looking Statements.” If any of the following risks actually occur, our financial condition and results of operations could be materially and adversely affected. If this were to happen, the value of our common stock could decline significantly, and you could lose all or part of your investment.

Economic Risk

CTBI may continue to be adversely affected by current economic and market conditions.

The national and global economic downturn has resulted in unprecedented levels of financial market volatility and has in general adversely impacted the market value of financial institutions, limited access to capital, and had an adverse effect on the financial condition or results of operations of banking companies in general, including CTBI. In some cases, the markets have produced downward pressure on stock prices and credit capacity for certain issuers without regard to those issuers’ underlying financial strength. From early 2008 to the middle of 2010, we experienced significant challenges, credit quality deteriorated, and net income and results of operations were adversely impacted. While there has been some improvement in economic conditions in our markets starting in the second half of 2010 and continuing through 2011, we believe that we will continue to experience a challenging environment in 2012. We are part of the financial system and a continuation of the systemic lack of available credit, lack of confidence in the financial sector, increased volatility in the financial markets, and reduced business activity could materially and adversely impact our business, financial condition, and results of operations. In addition, the possible duration and severity of the adverse economic cycle is unknown and may exacerbate financial service providers’, including CTBI’s, exposure to credit risk. Actions by Congress, Treasury, the FDIC and other governmental agencies and regulators have been initiated to address economic stabilization, yet the efficacy of these programs in stabilizing the economy and the banking system is still uncertain. There can be no assurance that these actions will not have an adverse effect on the financial position or results of operations of financial service providers including CTBI.

Economy of Our Markets

Our business may continue to be adversely affected by continued weaknesses in the local economies on which we depend.

Our loan portfolio is concentrated primarily in eastern, northeastern, central, and south central Kentucky, southern West Virginia, and northeastern Tennessee. Our profits depend on providing products and services to clients in these local regions. These regions have experienced an increase in unemployment and a decrease in real estate values. Further increases in unemployment, additional decreases in real estate values, or increases in interest rates could weaken the local economies in which we operate. Typically, our market area lags behind the national economy in the recovery from economic downturns. The improvement of certain economic indicators such as unemployment and real estate asset values, may continue to lag behind improvement in the overall economy. These economic indicators typically affect certain industries, such as real estate and financial services, more significantly. A continuation of high levels of unemployment and depressed real estate asset values in the markets we serve would likely prolong the economic recovery period in our market area. Weakness in our market area could depress our earnings and consequently our financial condition because:

- Clients may not want, need, or qualify for our products and services;
- Borrowers may not be able to repay their loans;
- The value of the collateral securing our loans to borrowers may decline; and
- The quality of our loan portfolio may decline.

Interest Rate Risk

Changes in interest rates could adversely affect our earnings and financial condition.

Our earnings and financial condition are dependent to a large degree upon net interest income, which is the difference between interest earned from loans and investments and interest paid on deposits and borrowings. The narrowing of interest-rate spreads, meaning the difference between the interest rates earned on loans and investments and the

interest rates paid on deposits and borrowings, could adversely affect our earnings and financial condition. Interest rates are highly sensitive to many factors, including:

- The rate of inflation;
- The rate of economic growth;
- Employment levels;
- Monetary policies; and
- Instability in domestic and foreign financial markets.

Changes in market interest rates will also affect the level of voluntary prepayments on our loans and the receipt of payments on our mortgage-backed securities resulting in the receipt of proceeds that may be reinvested at a lower rate than the loan or mortgage-backed security being prepaid.

We originate residential loans for sale and for our portfolio. The origination of loans for sale is designed to meet client financing needs and earn fee income. The origination of loans for sale is highly dependent upon the local real estate market and the level and trend of interest rates. Increasing interest rates may reduce the origination of loans for sale and consequently the fee income we earn. While our commercial banking, construction, and income property business lines remain a significant portion of our activities, high interest rates may reduce our mortgage-banking activities and thereby our income. In contrast, decreasing interest rates have the effect of causing clients to refinance mortgage loans faster than anticipated. This causes the value of assets related to the servicing rights on loans sold to be lower than originally anticipated. If this happens, we may need to write down our servicing assets faster, which would accelerate our expense and lower our earnings.

We consider interest rate risk one of our most significant market risks. Interest rate risk is the exposure to adverse changes in net interest income due to changes in interest rates. Consistency of our net interest revenue is largely dependent upon the effective management of interest rate risk. We employ a variety of measurement techniques to identify and manage our interest rate risk including the use of an earnings simulation model to analyze net interest income sensitivity to changing interest rates. The model is based on actual cash flows and repricing characteristics for on and off-balance sheet instruments and incorporates market-based assumptions regarding the effect of changing interest rates on the prepayment rates of certain financial assets and liabilities. Assumptions based on the historical behavior of deposit rates and balances in relation to changes in interest rates are also incorporated into the model. These assumptions are inherently uncertain, and as a result, the model cannot precisely measure net interest income or precisely predict the impact of fluctuations in interest rates on net interest income. Actual results will differ from simulated results due to timing, magnitude, and frequency of interest rate changes as well as changes in market conditions and management strategies.

Liquidity Risk

CTBI is subject to liquidity risk.

CTBI requires liquidity to meet its deposit and debt obligations as they come due and to fund loan demands. CTBI's access to funding sources in amounts adequate to finance its activities or on terms that are acceptable to it could be impaired by factors that affect it specifically or the financial services industry or economy in general. Factors that could reduce its access to liquidity sources include a downturn in the market, difficult credit markets, or adverse regulatory actions against CTBI. CTBI's access to deposits may also be affected by the liquidity needs of its depositors. In particular, a substantial majority of CTBI's liabilities are demand, savings, interest checking, and money market deposits, which are payable on demand or upon several days' notice, while by comparison, a substantial portion of its assets are loans, which cannot be called or sold in the same time frame. Although CTBI historically has been able to replace maturing deposits and advances as necessary, it might not be able to replace such funds in the future, especially if a large number of its depositors sought to withdraw their accounts, regardless of the reason. A failure to maintain adequate liquidity could have a material adverse effect on our financial condition and results of operations.

Banking Reform

Our business may be adversely affected by “banking reform” legislation.

On July 21, 2010, President Obama signed the Dodd-Frank Act into law. This new law has significantly changed the bank regulatory structure and affected the lending, deposit, investment, trading, and operating activities of financial institutions and their holding companies. The Dodd-Frank Act has required various federal agencies to adopt a broad range of new implementing rules and regulations, and to prepare numerous studies and reports for Congress. The federal agencies have been given significant discretion in drafting the implementing rules and regulations, and consequently, many of the details and much of the impact of the Dodd-Frank Act are still unknown. This legislation includes, among other things: (i) changes in the manner in which the FDIC deposit insurance assessments are computed and an increase in the minimum designated reserve ratio for the Deposit Insurance Fund; (ii) authorization of interest-bearing demand deposits; (iii) requirements for new capital regulations applicable to banks and bank holding companies which call for higher levels of capital; (iv) creation of the Consumer Financial Protection Bureau, responsible for implementation of federal consumer protection laws which affect banks and bank holding companies; (v) a permanent increase in the maximum amount of deposit insurance for banks; (vi) a prohibition of certain proprietary trading and equity investment activities by banks; (vii) new restrictions related to mortgage lending; (viii) allowance of de novo interstate branching; and (ix) additional corporate governance provisions relating to non-binding shareholder votes on executive compensation and new rules prohibiting incentive compensation that encourages inappropriate risks.

Many aspects of the Dodd-Frank Act are subject to rulemaking and take effect over several years, making it difficult to anticipate the overall financial impact on CTBI. However, compliance with this new law and its implementing regulations will result in additional operating costs that could have a material adverse effect on our financial condition and results of operations.

Government Policies and Oversight

Our business may be adversely affected by changes in government policies and oversight.

The earnings of banks and bank holding companies such as ours are affected by the policies of regulatory authorities, including the Federal Reserve Board, which regulates the money supply. Among the methods employed by the Federal Reserve Board are open market operations in U.S. Government securities, changes in the discount rate on member bank borrowings, and changes in reserve requirements against member bank deposits. These methods are used in varying combinations to influence overall growth and distribution of bank loans, investments and deposits, and their use may also affect interest rates charged on loans or paid on deposits. The monetary policies of the Federal Reserve Board have had a significant effect on the operating results of commercial and savings banks in the past and are expected to continue to do so in the future.

Many states and municipalities are experiencing financial stress due to the economy. As a result, various levels of government could seek to increase their tax revenues through increased tax levies, which could have an adverse impact on our results of operations.

Federal banking regulators are increasing regulatory scrutiny, and additional limitations (including those contained in the Dodd-Frank Act) on financial institutions have been proposed or adopted by regulators and by Congress. The banking industry is highly regulated and changes in federal and state banking regulations as well as policies and administration guidelines may affect our practices, growth prospects, and earnings. In particular, there is no assurance that recent governmental actions designed to stabilize the economy and banking system will not adversely affect the financial position or results of operations of CTBI.

We are involved from time to time in examinations, reviews, and investigations (both formal and informal) by governmental and regulatory authorities regarding our business. These matters could result in adverse judgments, settlements, fines, penalties, injunctions, and other relief.

Credit Risk

Our earnings and reputation may be adversely affected if we fail to effectively manage our credit risk.

Originating and underwriting loans are integral to the success of our business. This business requires us to take “credit risk,” which is the risk of losing principal and interest income because borrowers fail to repay loans. Collateral values and the ability of borrowers to repay their loans may be affected at any time by factors such as:

The length and severity of downturns in the local economies in which we operate or the national economy;

The length and severity of downturns in one or more of the business sectors in which our customers operate, particularly the automobile, hotel/motel, coal, and residential development industries; or

A rapid increase in interest rates.

Our loan portfolio includes loans with a higher risk of loss.

We originate commercial real estate loans, construction and development loans, consumer loans, and residential mortgage loans, primarily within our market area. Commercial real estate, commercial, and construction and development loans tend to involve larger loan balances to a single borrower or groups of related borrowers and are most susceptible to a risk of loss during a downturn in the business cycle. These loans also have historically had a greater credit risk than other loans for the following reasons:

Commercial Real Estate Loans. Repayment is dependent on income being generated in amounts sufficient to cover operating expenses and debt service. These loans also involve greater risks because they are generally not fully amortizing over a loan period, but rather have a balloon payment due at maturity. A borrower’s ability to make a balloon payment typically will depend on being able to either refinance the loan or timely sell the underlying property. As of December 31, 2011, commercial real estate loans, including multi-family loans, comprised approximately 36% of our total loan portfolio.

Other Commercial Loans. Repayment is generally dependent upon the successful operation of the borrower’s business. In addition, the collateral securing the loans may depreciate over time, be difficult to appraise, be illiquid, or fluctuate in value based on the success of the business. As of December 31, 2011, other commercial loans comprised approximately 15% of our total loan portfolio.

Construction and Development Loans. The risk of loss is largely dependent on our initial estimate of whether the property’s value at completion equals or exceeds the cost of property construction and the availability of take-out financing. During the construction phase, a number of factors can result in delays or cost overruns. If our estimate is inaccurate or if actual construction costs exceed estimates, the value of the property securing our loan may be insufficient to ensure full repayment when completed through a permanent loan, sale of the property, or by seizure of collateral. As of December 31, 2011, construction and development loans comprised approximately 7% of our total loan portfolio.

Consumer loans may carry a higher degree of repayment risk than residential mortgage loans, particularly when the consumer loan is unsecured. Repayment of a consumer loan typically depends on the borrower’s financial stability, and it is more likely to be affected adversely by job loss, illness, or personal bankruptcy. In addition, federal and state bankruptcy, insolvency, and other laws may limit the amount we can recover when a consumer client defaults. As of December 31, 2011, consumer loans comprised approximately 18% of our total loan portfolio.

A significant part of our lending business is focused on small to medium-sized business which may be impacted more severely during periods of economic weakness.

A significant portion of our commercial loan portfolio is tied to small to medium-sized businesses in our markets. During periods of economic weakness, small to medium-sized businesses may be impacted more severely than larger businesses. As a result, the ability of smaller businesses to repay their loans may deteriorate, particularly if

economic challenges persist over a period of time, and such deterioration would adversely impact our results of operations and financial condition.

A large percentage of our loan portfolio is secured by real estate, in particular commercial real estate. Continued weakness in the real estate market or other segments of our loan portfolio would lead to additional losses, which could have a material adverse effect on our business, financial condition, and results of operations.

As of December 31, 2011, approximately 67% of our loan portfolio is secured by real estate, 36% of which is commercial real estate. High levels of commercial and consumer delinquencies or further declines in real estate market values could require increased net charge-offs and increases in the allowance for loan and lease losses, which could have a material adverse effect on our business, financial condition, and results of operations and prospects.

Our level of other real estate owned has increased, primarily as a result of foreclosures. To the extent that we continue to hold a higher level of real estate owned, related real estate expense would likely increase.

During the recent economic downturn, we experienced an increase in nonperforming real estate loans. As a result, we have experienced, and we continue to experience, an increase in the level of foreclosed properties. Foreclosed real estate expense consists of maintenance costs, taxes, valuation adjustments to appraisal values, and gains or losses on disposition. The amount that we may realize after a default is dependent upon factors outside of our control, including but not limited to: (i) general and local economic conditions; (ii) neighborhood values; (iii) interest rates; (iv) real estate tax rates; (v) operating expenses of the properties; (vi) environmental remediation liabilities; (vii) ability to obtain and maintain occupancy of the properties; (viii) zoning laws; (ix) governmental rules, regulations, and fiscal policies; (x) potential vandalism; and (xi) acts of God. Expenditures associated with the ownership of real estate, such as real estate taxes, insurance, and maintenance costs, may adversely affect income from the real estate. The cost of operating real property may exceed the income earned from the property, and we may need to advance funds in order to protect our investment in the property, or we may be required to dispose of the property at a loss. If our levels of other real estate owned increase or are sustained and local real estate values decline, our foreclosed real estate expense will increase, which would adversely impact our results of operations.

Environmental Liability Risk

We are subject to environmental liability risk associated with lending activity.

A significant portion of our loan portfolio is secured by real property. During the ordinary course of business, we may foreclose on and take title to properties securing loans. In doing so, there is a risk that hazardous or toxic substances could be found on these properties. If hazardous or toxic substances are found, we may be liable for remediation costs, as well as for personal injury and property damage. Environmental laws may require us to incur substantial expenses and may materially reduce the affected property's value or limit our ability to use or sell the affected property. In addition, future laws or more stringent interpretations or enforcement policies with respect to existing laws may increase our exposure to environmental liability. Although we have policies and procedures to perform an environmental review before initiating any foreclosure action on real property, these reviews may not be sufficient to detect all potential environmental hazards. The remediation costs and any other financial liabilities associated with an environmental hazard could have a material adverse effect on our financial condition and results of operations.

Competition

Strong competition within our market area may reduce our ability to attract and retain deposits and originate loans.

We face competition both in originating loans and in attracting deposits. Competition in the financial services industry is intense. We compete for clients by offering excellent service and competitive rates on our loans and deposit products. The type of institutions we compete with include commercial banks, savings institutions, mortgage banking firms, credit unions, finance companies, mutual funds, insurance companies and brokerage and investment banking firms. Competition arises from institutions located within and outside our market areas. As a result of their size and

ability to achieve economies of scale, certain of our competitors offer a broader range of products and services than we offer. The recent economic crisis is likely to result in increased consolidation in the financial industry and larger financial institutions may strengthen their competitive positions. In addition, to stay competitive in our markets we may need to adjust the interest rates on our products to match the rates offered by our competitors, which could adversely affect our net interest margin. As a result, our profitability depends upon our continued ability to successfully compete in our market areas while achieving our investment objectives.

Acquisition Risk

We may have difficulty in the future continuing to grow through acquisitions.

Due to consolidation within the banking industry, the number of suitable acquisition targets has decreased and there is intense competition for attractive acquisitions. As a result, we may experience difficulty in making acquisitions on acceptable terms.

Any future acquisitions or mergers by CTBI or its banking subsidiary are subject to approval by the appropriate federal and state banking regulators. The banking regulators evaluate a number of criteria in making their approval decisions, such as:

- Safety and soundness guidelines;

- Compliance with all laws including the USA Patriot Act, the International Money Laundering Abatement and Anti-Terrorist Financing Act, the Sarbanes-Oxley Act and the related rules and regulations promulgated under such Act or the Exchange Act, the Equal Credit Opportunity Act, the Fair Housing Act, the Community Reinvestment Act, the Home Mortgage Disclosure Act, and all other applicable fair lending laws and other laws relating to discriminatory business practices; and

- Anti-competitive concerns with the proposed transaction.

If the banking regulators or a commenter on our regulatory application raise concerns about any of these criteria at the time a regulatory application is filed, the banking regulators may deny, delay, or condition their approval of a proposed transaction.

We have grown, and intend to continue to grow, through acquisitions of banks and other financial institutions. After these acquisitions, we may experience adverse changes in results of operations of acquired entities, unforeseen liabilities, asset quality problems of acquired entities, loss of key personnel, loss of clients because of change of identity, difficulties in integrating data processing and operational procedures, and deterioration in local economic conditions. These various acquisition risks can be heightened in larger transactions.

Integration Risk

We may not be able to achieve the expected integration and cost savings from our ongoing bank acquisition activities.

We have a long history of acquiring financial institutions and we expect this acquisition activity to continue in the future. Difficulties may arise in the integration of the business and operations of the financial institutions that agree to merge with and into CTBI and, as a result, we may not be able to achieve the cost savings and synergies that we expect will result from the merger activities. Achieving cost savings is dependent on consolidating certain operational and functional areas, eliminating duplicative positions and terminating certain agreements for outside services. Additional operational savings are dependent upon the integration of the banking businesses of the acquired financial institution with that of CTBI, including the conversion of the acquired entity's core operating systems, data systems and products to those of CTBI and the standardization of business practices. Complications or difficulties in the conversion of the core operating systems, data systems, and products of these other banks to those of CTBI may result in the loss of clients, damage to our reputation within the financial services industry, operational problems, one-time costs currently not anticipated by us, and/or reduced cost savings resulting from the merger activities.

Operational Risk

An extended disruption of vital infrastructure or a security breach could negatively impact our business, results of operations, and financial condition.

Our operations depend upon, among other things, our infrastructure, including equipment and facilities. Extended disruption of vital infrastructure by fire, power loss, natural disaster, telecommunications failure, computer hacking or viruses, terrorist activity or the domestic and foreign response to such activity, or other events outside of our control could have a material adverse impact on the financial services industry as a whole and on our business, results of operations, cash flows, and financial condition in particular. Our business recovery plan may not work as intended or may not prevent significant interruption of our operations. The occurrence of any failures, interruptions, or security breaches of our information systems could damage our reputation, result in the loss of customer business, subject us to additional regulatory scrutiny, or expose us to civil litigation and possible financial liability, any of which could have an adverse effect on our financial condition and results of operation.

Market Risk

Community Trust Bancorp, Inc.'s stock price is volatile.

Our stock price has been volatile in the past, and several factors could cause the price to fluctuate substantially in the future. These factors include:

- Actual or anticipated variations in earnings;
- Changes in analysts' recommendations or projections;
- CTBI's announcements of developments related to our businesses;
- Operating and stock performance of other companies deemed to be peers;
- New technology used or services offered by traditional and non-traditional competitors;
- News reports of trends, concerns, and other issues related to the financial services industry; and
- Additional governmental policies and enforcement of current laws.

Our stock price may fluctuate significantly in the future, and these fluctuations may be unrelated to CTBI's performance. The recent financial crisis has resulted in a lack of investor confidence in the financial institutions sector. General market price declines or market volatility in the future could adversely affect the price of our common stock, and the current market price may not be indicative of future market prices.

Technology Risk

CTBI continually encounters technological change.

The financial services industry is continually undergoing rapid technological change with frequent introductions of new technology-driven products and services. The effective use of technology increases efficiency and enables financial institutions to better serve customers and to reduce costs. Our future success depends, in part, upon our ability to address the needs of our customers by using technology to provide products and services that will satisfy customer demands, as well as to create additional efficiencies in our operations. Many of our competitors have substantially greater resources to invest in technological improvements. We may not be able to effectively implement new technology-driven products and services or be successful in marketing these products and services to our customers. Failure to successfully keep pace with technological change affecting the financial services industry could have a material adverse impact on our business and, in turn, our financial condition and results of operations.

Counterparty Risk

The soundness of other financial institutions could adversely affect CTBI.

Our ability to engage in routine funding transactions could be adversely affected by the actions and commercial soundness of other financial institutions. Financial services companies are interrelated as a result of trading, clearing, counterparty, or other relationships. We have exposure to many different industries and counterparties, and we routinely execute transactions with counterparties in the financial services industry, including brokers and dealers,

commercial banks, investment banks, mutual and hedge funds, and other institutional counterparties. As a result, defaults by, or even rumors or questions about, one or more financial services companies, or the financial services industry generally, have led to market-wide liquidity problems and could lead to losses or defaults by us or by other institutions. Many of these transactions expose us to credit risk in the event of default of our counterparty or client. In addition, our credit risk may be exacerbated when the collateral held by us cannot be realized or is liquidated at prices not sufficient to recover the full amount of the loan or derivative exposure due us. There is no assurance that any such losses would not materially and adversely affect our businesses, financial condition, or results of operations.

Item 1B. Unresolved Staff Comments

None.

SELECTED STATISTICAL INFORMATION

The following tables set forth certain statistical information relating to CTBI and subsidiaries on a consolidated basis and should be read together with our consolidated financial statements.

Consolidated Average Balance Sheets and Taxable Equivalent Income/Expense and Yields/Rates

The calculations of the weighted average interest rates for each maturity category are based upon yield weighted by the respective costs of the securities. The weighted average rates on state and political subdivisions are computed on a taxable equivalent basis using a 35% tax rate.

Excluding those holdings of the investment portfolio in U.S. Treasury securities, government agencies, and government sponsored agencies, there were no securities of any one issuer that exceeded 10% of our shareholders'

equity at December 31, 2011.

The book values of securities available-for-sale and securities held-to-maturity as of December 31, 2011 and 2010 are presented in note 4 to the consolidated financial statements.

The book value of securities at December 31, 2009 is presented below:

(in thousands)	Available-for-Sale	Held-to-Maturity
U.S. Treasury and government agencies	\$ 16,994	\$ 0

Discussion of the Nonaccrual Policy

The accrual of interest income on loans is discontinued when management believes, after considering economic and business conditions, collateral value, and collection efforts, that the borrower's financial condition is such that the collection of interest is doubtful. Cash payments received on nonaccrual loans generally are applied against principal, and interest income is only recorded once principal recovery is reasonably assured. Any loans greater than 90 days past due must be well secured and in the process of collection to continue accruing interest. See note 1 for further discussion on our nonaccrual policy.

Potential Problem Loans

Interest accrual is discontinued when we believe, after considering economic and business conditions, collateral value, and collection efforts, that the borrower's financial condition is such that collection of interest is doubtful.

Foreign Outstandings

None

Loan Concentrations

We had no concentration of loans exceeding 10% of total loans at December 31, 2011. See note 19 to the consolidated financial statements for further information.

Analysis of the Allowance for Loan and Lease Losses

Total	0.58	% 0.58	% 0.66	% 0.38	% 0.27
Other ratios:					
Allowance to net loans, end of year	1.30	% 1.34	% 1.34	% 1.31	% 1.26
Allowance to net legacy loans, end of year	1.34	% 1.40	% 1.34	% 1.31	% 1.26
Provision for loan losses to average loans	0.51	% 0.67	% 0.73	% 0.50	% 0.30

The allowance for loan and lease losses balance is maintained at a level considered adequate to cover anticipated probable losses based on past loss experience, general economic conditions, information about specific borrower situations including their financial position and collateral values, and other factors and estimates which are subject to change over time. This analysis is completed quarterly and forms the basis for allocation of the loan loss reserve and what charges to the provision may be required. See notes 1, 5, and 8 to the consolidated financial statements for further information.

Generally accepted accounting principles require that expected credit losses associated with loans obtained in an acquisition be reflected in the estimation of loan fair value as of the acquisition date and prohibits any carryover of an allowance for credit losses. The allowance to net legacy loans ratios exclude amounts related to loans obtained through acquisition in 2010.

Average Deposits and Other Borrowed Funds

(in thousands)	2011	2010	2009
Deposits:			
Noninterest bearing deposits	\$573,067	\$514,196	\$471,902

* Community Trust and Investment Company has leased offices in the main office locations in these markets.

See notes 9 and 16 to the consolidated financial statements included herein for the year ended December 31, 2011, for additional information relating to lease commitments and amounts invested in premises and equipment.

Item 3. Legal Proceedings

CTBI and subsidiaries, and from time to time, our officers, are named defendants in legal actions arising from ordinary business activities. Management, after consultation with legal counsel, believes any pending actions are without merit or that the ultimate liability, if any, will not materially affect our consolidated financial position or results of operations.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for the Registrant's Common Equity, Related Shareholder Matters, and Issuer Purchases of Equity Securities

Our common stock is listed on The NASDAQ-Stock Market LLC – Global Select Market under the symbol CTBI. As of February 29, 2012, there were approximately 6,471 holders of record of our outstanding common shares.

Dividends

The annual dividend paid to our stockholders was increased from \$1.21 per share to \$1.23 per share during 2011. We have adopted a conservative policy of cash dividends by maintaining an average annual cash dividend ratio of less than 45%, with periodic stock dividends. The current year cash dividend ratio was 48.43%. The higher dividend ratio reflects the Board of Directors decision to continue to pay modestly increased dividends to our shareholders despite the current economy as CTBI has continued to outperform many of its peers during this recessionary time. Dividends are typically paid on a quarterly basis. Future dividends are subject to the discretion of CTBI's Board of Directors, cash needs, general business conditions, dividends from our subsidiaries, and applicable governmental regulations and policies. For information concerning restrictions on dividends from the subsidiary bank to CTBI, see note 21 to the consolidated financial statements included herein for the year ended December 31, 2011.

Stock Repurchases

CTBI did not acquire any shares of common stock through the stock repurchase program during the years 2011 and 2010. There are 288,519 shares remaining under CTBI's current repurchase authorization. For further information, see the Stock Repurchase Program section of Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Common Stock Performance

The following graph shows the cumulative return experienced by CTBI's shareholders during the last five years compared to the NASDAQ Stock Market (U.S.) and the NASDAQ Bank Stock Index. The graph assumes the investment of \$100 on December 31, 2006 in CTBI's common stock and in each index and the reinvestment of all dividends paid during the five-year period.

Comparison of 5 Year Cumulative Total Return
among Community Trust Bancorp, Inc., NASDAQ Stock Market (U.S.),

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

The following Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") is intended to help the reader understand Community Trust Bancorp, Inc., our operations, and our present business environment. The MD&A is provided as a supplement to—and should be read in conjunction with—our consolidated financial statements and the accompanying notes thereto contained in Item 8 of this annual report. The MD&A includes the following sections:

Our Business

Financial Goals and Performance

Results of Operations and Financial Condition

Contractual Obligations and Commitments

Liquidity and Market Risk

Interest Rate Risk

Capital Resources

Impact of Inflation, Changing Prices, and Economic Conditions

Stock Repurchase Program

Critical Accounting Policies and Estimates

Our Business

Community Trust Bancorp, Inc. ("CTBI") is a bank holding company headquartered in Pikeville, Kentucky. Currently, we own one commercial bank and one trust company. Through our subsidiaries, we have eighty banking locations in eastern, northeastern, central, and south central Kentucky, southern West Virginia, and northeastern Tennessee, four trust offices across Kentucky, and one trust office in northeastern Tennessee. At December 31, 2011, we had total consolidated assets of \$3.6 billion and total consolidated deposits, including repurchase agreements, of \$3.1 billion, making us the largest bank holding company headquartered in the Commonwealth of Kentucky. Total shareholders' equity at December 31, 2011 was \$366.9 million.

On June 8, 2010, we entered into an Agreement and Plan of Share Exchange with LaFollette First National Corporation, a Tennessee corporation ("LaFollette Corporation") and First National Bank of LaFollette ("LaFollette Bank"), the wholly-owned subsidiary of LaFollette Corporation. On November 17, 2010, we completed the acquisition of LaFollette Corporation and LaFollette Bank, acquiring all outstanding shares of LaFollette Corporation in a share exchange for \$650 per share, or a total of approximately \$16.1 million. In addition, we paid \$1.2 million to retire a debt owed by LaFollette Corporation. Immediately following the share exchange, LaFollette Corporation was merged into CTBI. LaFollette Bank was merged into Community Trust Bank, Inc. (CTB) on January 21, 2011.

Through our subsidiaries, we engage in a wide range of commercial and personal banking and trust and wealth management activities, which include accepting time and demand deposits; making secured and unsecured loans to corporations, individuals and others; providing cash management services to corporate and individual customers; issuing letters of credit; renting safe deposit boxes; and providing funds transfer services. The lending activities of our Bank include making commercial, construction, mortgage, and personal loans. Lease-financing, lines of credit, revolving lines of credit, term loans, and other specialized loans, including asset-based financing, are also available. Our corporate subsidiaries act as trustees of personal trusts, as executors of estates, as trustees for employee

benefit trusts, as registrars, transfer agents, and paying agents for bond and stock issues, as depositories for securities, and as providers of full service brokerage services. For further information, see Item 1 of this annual report.

Financial Goals and Performance

The following table shows the primary measurements used by management to assess annual performance. The goals in the table below should not be viewed as a forecast of our performance for 2012. Rather, the goals represent a range of target performance for 2012. There is no assurance that any or all of these goals will be achieved. See “Cautionary Statement Regarding Forward Looking Statements.”

	2011 Goals	2011 Performance	Variance	2012 Goals
Earnings Per Share	\$2.56	\$2.54	(\$0.02)	\$2.55 - \$2.71
Net Income	\$39.1 million	\$38.8 million	(\$0.3 million)	\$39.5 - \$42 million
ROAA	1.16%	1.09%	(0.07%)	1.08% - 1.15%
ROAE	11.11%	10.71%	(0.40%)	10.50% - 11.00%
Revenues	\$173.8 million	\$175.3 million	\$1.5 million	\$176 - \$186 million
Noninterest Revenue as of % of Total Revenue	24.1%	25.0%	0.9%	20% - 25%
Assets	\$3.4 billion	\$3.6 billion	\$0.2 billion	\$3.65 - \$3.85 billion
Loans	\$2.7 billion	\$2.6 billion	(\$0.1 billion)	\$2.6 - \$2.8 billion
Deposits, including Repurchase Agreements	\$2.9 billion	\$3.1 billion	\$0.2 billion	\$3.1 - \$3.3 billion
Shareholders' Equity	\$361 million	\$367 million	\$6 million	\$380 - \$400 million

Results of Operations and Financial Condition

For the year ended December 31, 2011, we reported earnings of \$38.8 million, or \$2.54 per basic share, an increase of 17.5% from the \$33.0 million, or \$2.17 per basic share, earned during the year ended December 31, 2010. Earnings for the year ended December 31, 2009 were \$25.1 million or \$1.66 per basic share.

2011 Highlights

Earnings per share for the year 2011 increased \$0.37 per share from prior year with increased net interest income and noninterest income and decreased provision for loan loss partially offset by increased noninterest expense.

Noninterest expense was significantly impacted by a \$3.2 million decrease in the carrying value of two groups of foreclosed properties that were vandalized. Claims have been filed with the insurance carriers and discussions are ongoing. Since no agreement has been reached, the amount of recovery is uncertain. Accordingly, the entire decrease in the carrying value of the properties has been charged against earnings and no estimate of insurance recovery is reflected at December 31, 2011.

Our net interest margin for the year 2011 of 4.13% was a 6 basis point increase from prior year.

Our nonperforming loans at \$37.3 million decreased from the \$62.0 million at December 31, 2010. Nonperforming assets at \$93.9 million were an \$11.2 million decrease from prior year.

Our loan loss provision for the year 2011 was \$3.2 million below 2010.

Net loan charge-offs for the year 2011 of \$14.9 million, or 0.58% of average loans annualized, was an increase from the \$14.3 million, or 0.58%, experienced for 2010.

Our loan loss reserve as a percentage of total loans outstanding at December 31, 2011 decreased to 1.30% compared to 1.34% at December 31, 2010. Our reserve coverage (allowance for loan loss reserve to nonperforming loans) of 93.3% at September 30, 2011 began to show improvement from the 59.0% and 56.1% at June 30, 2011 and December 31, 2010, respectively. Our December 31, 2011 reserve coverage of 89.0% evidenced two consecutive quarters of continued improvement. Several of the matrices and factors utilized in evaluating the adequacy of our loan loss reserve also show significant improvement, including level of past dues, nonperforming loans, and nonaccrual loans, and after two consecutive quarters of continued improvement, we determined that our loan loss reserve of 1.30% was adequate. The allowance-to-legacy loan ratio, which excludes acquired loans, was 1.34%, and 1.40%, respectively, at December 31, 2011 and December 31, 2010.

Noninterest income for the year ended December 31, 2011 increased 7.1% from prior year, primarily due to increased gains on sales of loans, deposit service charges, and trust revenue.

Our loan portfolio decreased \$48.6 million from prior year.

Our investment portfolio increased \$188.7 million from prior year.

Deposits, including repurchase agreements, increased \$201.1 million from prior year.

Our tangible common equity/tangible assets ratio remains strong at 8.52%.

Income Statement Review

(dollars in thousands)				Change 2011 vs. 2010	
Year Ended December 31	2011	2010	2009	Amount	Percent
Net interest income	\$131,455	\$119,254	\$105,510	\$12,201	10.2 %
Provision for loan losses	13,262	16,484	17,468	(3,222)	(19.5)%
Noninterest income	43,832	40,926	41,420	2,906	7.1
Noninterest expense	106,387	96,050	93,801	10,337	10.8
Income taxes	16,811	14,612	10,602	2,199	15.0
Net income	\$38,827	\$33,034	\$25,059	\$5,793	17.5 %
Average earning assets	\$3,221,648	\$2,961,971	\$2,830,701	\$259,677	8.8 %
Yield on average earnings assets	4.97 %	5.26 %	5.45 %	(0.29)%	(5.5)%
Cost of interest bearing funds	1.06 %	1.51 %	2.13 %	(0.45)%	(29.8)%
Net interest margin	4.13 %	4.07 %	3.77 %	0.06 %	1.5 %

Net Interest Income

We experienced a 6 basis point improvement in our net interest margin for the year 2011 compared to prior year. Average earning assets for the year increased 8.8% from prior year, and the yield on average earning assets decreased 29 basis points. The decline in yield on earning assets is the result of a change in our earning asset mix. Loans represented 80.1% of our average earning assets for the year ended December 31, 2011, compared to 83.1% for the year ended December 31, 2010. As deposits, including repurchase agreements, have increased and loan demand has slowed, management has chosen to invest the excess liquidity in our investment portfolio. The cost of interest bearing funds decreased 45 basis points from prior year, primarily the result of the repricing of our CD products.

We saw improvement in our net interest margin of 30 basis points for the year 2010 compared to 2009. Net interest income increased 13.0% with a 4.6% increase in average earning assets. The yield on average earnings assets for the year 2010 decreased 19 basis points in comparison to the 62 basis point decline in the cost of interest bearing funds.

Provision for Loan Losses

The provision for loan losses that was added to the allowance for 2011 of \$13.3 million was a \$3.2 million decrease from prior year. This provision represented a charge against current earnings in order to maintain the allowance at an appropriate level determined using the accounting estimates described in the Critical Accounting Policies and Estimates section.

The provision for loan losses added to the allowance for 2010 of \$16.5 million was a \$1.0 million decrease from 2009.

Noninterest Income

Noninterest income for the year ended December 31, 2011 increased 7.1% from prior year. The year over year increase was primarily attributable to increased gains on sales of loans, deposit service charges, and trust revenue partially offset by decreased loan related fees. Deposit service charges are anticipated to be negatively impacted in the year 2012 due to a change in the processing of overdraft items. Management anticipates the impact to be in the range of \$3 million to \$5 million.

Noninterest income for the year 2010 declined 1.2% from 2009. The decrease in noninterest income was significantly impacted by decreased gains on sales of loans as 2009 was a period of significant refinancing of residential real estate loans, as well as a \$0.8 million decline in the fair value of our mortgage servicing rights. The decline in these noninterest income sources was partially offset by increases in trust and brokerage revenue and deposit service charges.

Noninterest Expense

Noninterest expense for the year ended December 31, 2011 increased 10.8% from prior year, primarily as a result of increased personnel expense, including health insurance and the increase related to the acquisition of LaFollette; repossession expense; and other real estate owned expense, including adjustments to reflect declines in the values of foreclosed properties, as well as expected losses in investments in limited partnerships that were offset by tax credits. Other real estate owned expense during the year of \$8.6 million was significantly impacted by a \$3.2 million decrease in the carrying value of two groups of foreclosed properties that were vandalized. Claims have been filed with the insurance carriers, and discussions are ongoing. Since no agreement has been reached, the amount of recovery is uncertain. Accordingly, the entire decrease in the carrying value of the properties has been charged against earnings and no estimate of insurance recovery is reflected at December 31, 2011.

Noninterest expense for the year 2010 increased 2.4% from 2009 as increased personnel expenses were partially offset by a decrease in FDIC insurance premiums and special assessment.

Balance Sheet Review

CTBI's total assets at \$3.6 billion increased \$235.3 million, or 7.0%, from December 31, 2010. Loans outstanding at December 31, 2011 were \$2.6 billion, decreasing \$48.6 million, or 1.9%, year over year. Loan growth during the year of \$22.6 million in the residential loan portfolio was offset by declines of \$41.3 million in the commercial loan portfolio and \$29.9 million in the consumer loan portfolio. The increase in the residential loan portfolio resulted from our decision to keep a portion of Federal Home Loan Mortgage Corporation (FHLMC) qualified loans which we normally sell in our in-house loan portfolio during the year. CTBI's investment portfolio increased \$188.7 million, or 55.5%, from December 31, 2010. Deposits, including repurchase agreements, at \$3.1 billion increased \$201.1

million, or 6.9%, from December 31, 2010. The deposit (including repurchase agreements) to FTE (full-time equivalent) ratio remained at \$2.8 million from December 31, 2010 to December 31, 2011.

Shareholders' equity at December 31, 2011 was \$366.9 million compared to \$338.6 million at December 31, 2010. As of December 31, 2011, CTBI's current dividend yield to shareholders was an annualized 4.21%.

Loans

Total loans	\$2,556,548	(1.9)%	\$ 14,896	\$ 37,268	\$33,171

Asset Quality

CTBI's total nonperforming loans were \$37.3 million at December 31, 2011, a 39.9% decrease from the \$62.0 million at December 31, 2010. The decrease for the year included a \$19.2 million decrease in nonaccrual loans and a \$5.5 million decrease in the 90+ days past due category. Loans 30-89 days past due at \$21.7 million is a decline of \$6.7 million from December 31, 2010. Our loan portfolio management processes focus on the immediate identification, management, and resolution of problem loans to maximize recovery and minimize loss. Our loan risk management processes include weekly delinquent loan review meetings at the market levels and monthly delinquent loan review meetings involving senior corporate management to review all nonaccrual loans and loans 30 days or more past due. Any activity regarding a criticized/classified loan (i.e. problem loan) must be approved by CTB's Watch List Asset Committee (i.e. Problem Loan Committee). CTB's Watch List Asset Committee also meets on a quarterly basis and reviews every criticized/classified loan of \$100,000 or greater. We also have a Loan Review Department that reviews every market within CTB annually and performs extensive testing of the loan portfolio to assure the accuracy of loan grades and classifications for delinquency, troubled debt restructuring, impaired status, impairment, nonaccrual status, and adequate loan loss reserves. The Loan Review Department has annually reviewed on average 93.6% of the outstanding commercial loan portfolio for the past three years. The average annual review percentage of the consumer and residential loan portfolio for the past three years was 90.9% based on the loan production during the number of months included in the review scope which is generally four to six months.

Impaired loans, loans not expected to meet contractual principal and interest payments, at December 31, 2011 totaled \$47.4 million compared to \$63.3 million at December 31, 2010. Included in certain loan categories of impaired loans are troubled debt restructurings that were classified as impaired. At December 31, 2011, CTBI had \$18.9 million in commercial loans secured by real estate, \$5.5 million in commercial real estate construction loans, \$2.4 million in commercial other loans, and \$0.3 million in consumer loans that were modified in troubled debt restructurings and impaired. Included in these amounts are troubled debt restructurings that were performing in accordance with their modified terms of \$16.1 million in commercial loans secured by real estate, \$1.3 million in commercial real estate construction loans, \$0.4 million in commercial other loans, and \$0.2 million in consumer loans. Management evaluates all impaired loans for impairment and provides specific reserves when necessary.

For further information regarding nonperforming and impaired loans, see note 5 to the consolidated financial statements.

CTBI generally does not offer high risk loans such as option ARM products, high loan to value ratio mortgages, interest-only loans, loans with initial teaser rates, or loans with negative amortizations, and therefore, CTBI would have no significant exposure to these products.

Our level of foreclosed properties at \$56.5 million at December 31, 2011 was an increase from the \$42.9 million at December 31, 2010. Sales of foreclosed properties for the year ended December 31, 2011 totaled \$11.8 million while new foreclosed properties totaled \$31.5 million. At December 31, 2011, eleven properties with a book value of \$2.2 million were under contracts to sell; however, the closings had not occurred at year-end. The proceeds of these sales per the contracts is \$2.3 million, representing 106% of the book value of those properties.

When foreclosed properties are acquired, appraisals are obtained and the properties are booked at the current market value less expected sales costs. Additionally, periodic updated appraisals are obtained on unsold foreclosed properties. When an updated appraisal reflects a market value below the current book value, a charge is booked to current earnings to reduce the property to its new market value less expected sales costs. Charges to earnings to reflect the decrease in current market values of foreclosed properties totaled \$6.4 million, including a \$3.2 million charge due to the decrease in the carrying value of two groups of foreclosed properties that were vandalized. There were 190 properties reappraised during 2011, excluding those vandalized, totaling \$48.0 million. Of these, 77 were written down by a total of \$2.7 million or 5.7%. Charges during the year ended December 31, 2010 were \$0.7 million. Our policy for determining the frequency of periodic reviews is based upon consideration of the specific properties and the known or perceived market fluctuations in a particular market and is typically between 12 and 18 months. Ninety percent of our OREO properties have been reappraised within the past 12 months. Our nonperforming loans and foreclosed properties remain primarily concentrated in our Central Kentucky Region. Management anticipates that our foreclosed properties will remain elevated as we work through current market conditions.

The major classifications of foreclosed properties are shown in the following table:

(in thousands)	2011	2010
December 31		
1-4 family	\$20,065	\$18,792
Agricultural/farmland	652	58
Construction/land development/other	23,006	10,207
Multifamily	1,841	4,594
Non-farm/non-residential	10,981	9,284
Total foreclosed properties	\$56,545	\$42,935

The appraisal aging analysis of foreclosed properties, as well as the holding period, at December 31, 2011 is shown below:

(in thousands)

Appraisal Aging Analysis		Holding Period Analysis	
Days Since Last Appraisal	Current Book Value	Holding Period	Current Book Value
		Less than one year	
Up to 90 days	\$ 8,009		\$ 28,642
91 to 180 days	7,969	1 to 2 years	6,314
181 to 270 days	19,180	2 to 3 years	17,828
271 to 365 days	16,018	3 to 4 years	2,291
Over one year	5,369	Over 4 years	1,470

Net loan charge-offs for the year were \$14.9 million, or 0.58% of average loans annualized, an increase from prior year's \$14.3 million, or 0.58% of average loans annualized. Of the total net charge-offs, \$10.0 million were in commercial loans, \$2.4 million were in indirect auto loans, and \$1.8 million were in residential real estate mortgage loans. Specific reserves covered 76.3% of the commercial loan charge-offs.

Our loan loss reserve as a percentage of total loans outstanding at December 31, 2011 was 1.30% compared to 1.34% at December 31, 2010. Our reserve coverage (allowance for loan loss reserve to nonperforming loans) of 93.3% at September 30, 2011 began to show improvement from the 59.0% and 56.1% at June 30, 2011 and December 31, 2010, respectively. Our December 31, 2011 reserve coverage of 89.0% evidenced two consecutive quarters of continued improvement. Several of the matrices and factors utilized in evaluating the adequacy of our loan loss reserve also show significant improvement, including level of past dues, nonperforming loans, and nonaccrual loans, and after two consecutive quarters of continued improvement, we determined that our loan loss reserve of 1.30% at December 31, 2011 was adequate. Generally accepted accounting principles require that expected credit losses associated with loans obtained in an acquisition be reflected in the estimation of loan fair value as of the acquisition date and prohibits any carryover of an allowance for credit losses. Excluding amounts related to loans obtained in the fourth quarter 2010 acquisition of LaFollette, the allowance-to-legacy loan ratio was 1.34% and 1.40%, respectively, at December 31, 2011 and 2010.

Contractual Obligations and Commitments

As disclosed in the notes to the consolidated financial statements, we have certain obligations and commitments to make future payments under contracts. At December 31, 2011, the aggregate contractual obligations and commitments are:

Contractual Obligations: (in thousands)	Payments Due by Period			
	Total	1 Year	2-5 Years	After 5 Years
Deposits without stated maturity	\$1,424,884	\$1,424,884	\$0	\$0
Certificates of deposit and other time deposits	1,453,475	1,310,595	141,618	1,262
Repurchase agreements and other short-term borrowings	230,281	230,281	0	0
Advances from Federal Home Loan Bank	21,609	20,194	479	936
Interest on advances from Federal Home Loan Bank*	141	41	90	10
Long-term debt	61,341	0	0	61,341
Interest on long-term debt*	67,434	2,608	9,996	54,830
Annual rental commitments under leases	7,092	1,533	2,863	2,696
Total contractual obligations	\$3,266,257	\$2,990,136	\$155,046	\$121,075

*The amounts provided as interest on advances from Federal Home Loan Bank and interest on long-term debt assume the liabilities will not be prepaid and interest is calculated to their individual maturities.

The interest on \$61.3 million in long-term debt is based on a fixed rate of 6.52% for the first six months of 2012 and calculated based on the three-month LIBOR plus 1.59% thereafter until its maturity of June 1, 2037. The three-month LIBOR rate is projected using the most likely rate forecast from assumptions incorporated in the interest rate risk model and is determined two business days prior to the interest payment date. These assumptions are uncertain, and as a result, the actual payments will differ from the projection due to changes in economic conditions.

Other Commitments: (in thousands)	Amount of Commitment - Expiration by Period			
	Total	1 Year	2-5 Years	After 5 Years
Standby letters of credit	\$50,201	\$36,898	\$13,303	\$0
Commitments to extend credit	370,671	297,537	59,663	13,471
Total other commitments	\$420,872	\$334,435	\$72,966	\$13,471

Commitments to extend credit and standby letters of credit do not necessarily represent future cash requirements in that these commitments often expire without being drawn upon. Refer to note 18 in the consolidated financial statements for additional information regarding other commitments.

Liquidity and Market Risk

The objective of CTBI's Asset/Liability management function is to maintain consistent growth in net interest income within our policy limits. This objective is accomplished through management of our consolidated balance sheet composition, liquidity, and interest rate risk exposures arising from changing economic conditions, interest rates, and customer preferences. The goal of liquidity management is to provide adequate funds to meet changes in loan and lease demand or deposit withdrawals. This is accomplished by maintaining liquid assets in the form of cash and cash equivalents and investment securities, sufficient unused borrowing capacity, and growth in core deposits. As of December 31, 2011, we had approximately \$238.5 million in cash and cash equivalents and approximately \$527.4 million in securities valued at estimated fair value designated as available-for-sale and available to meet liquidity needs on a continuing basis. Additional asset-driven liquidity is provided by the remainder of the securities portfolio and the repayment of loans. In addition to core deposit funding, we also have a variety of other short-term and long-term funding sources available. We also rely on Federal Home Loan Bank advances for both liquidity and management of our asset/liability position. Federal Home Loan Bank advances were \$21.6 million at December 31, 2011 compared to \$21.2 million at December 31, 2010. As of December 31, 2011, we had a \$259.3 million available borrowing position with the Federal Home Loan Bank. We generally rely upon net inflows of cash from financing activities, supplemented by net inflows of cash from operating activities, to provide cash for our investing activities. As is typical of many financial institutions, significant financing activities include deposit gathering, use of short-term borrowing facilities such as repurchase agreements and federal funds purchased, and issuance of long-term debt. At December 31, 2011, we had a \$12 million revolving line of credit, all of which is currently available to meet any future cash needs. Our primary investing activities include purchases of securities and loan originations. We do not rely on any one source of liquidity and manage availability in response to changing consolidated balance sheet needs. At December 31, 2011, federal funds sold were \$2.7 million compared to \$26.3 million at December 31, 2010, and deposits with the Federal Reserve were \$159.0 million compared to \$48.9 million at December 31, 2010. Additionally, we project cash flows from our investment portfolio to generate additional liquidity over the next 90 days.

The investment portfolio consists of investment grade short-term issues suitable for bank investments. The majority of the investment portfolio is in U.S. government and government sponsored agency issuances. The average life of the portfolio is 4.2 years. At the end of 2011, available-for-sale ("AFS") securities comprised approximately 99.7% of the total investment portfolio, and the AFS portfolio was approximately 144% of equity capital. Eighty-three

percent of the pledge eligible portfolio was pledged.

Interest Rate Risk

We consider interest rate risk one of our most significant market risks. Interest rate risk is the exposure to adverse changes in net interest income due to changes in interest rates. Consistency of our net interest revenue is largely dependent upon the effective management of interest rate risk. We employ a variety of measurement techniques to identify and manage our interest rate risk including the use of an earnings simulation model to analyze net interest income sensitivity to changing interest rates. The model is based on actual cash flows and repricing characteristics for on and off-balance sheet instruments and incorporates market-based assumptions regarding the effect of changing interest rates on the prepayment rates of certain assets and liabilities. Assumptions based on the historical behavior of deposit rates and balances in relation to changes in interest rates are also incorporated into the model. These assumptions are inherently uncertain, and as a result, the model cannot precisely measure net interest income or precisely predict the impact of fluctuations in interest rates on net interest income. Actual results will differ from simulated results due to timing, magnitude, and frequency of interest rate changes as well as changes in market conditions and management strategies.

CTBI's Asset/Liability Management Committee (ALCO), which includes executive and senior management representatives and reports to the Board of Directors, monitors and manages interest rate risk within Board-approved policy limits. Our current exposure to interest rate risks is determined by measuring the anticipated change in net interest income spread evenly over the twelve-month period.

The following table shows our estimated earnings sensitivity profile as of December 31, 2011:

Change in Interest Rates (basis points)	Percentage Change in Net Interest Income (12 Months)
+400	3.32%
+300	2.08%
+200	1.03%
+100	0.46%
-25	(0.25)%

The following table shows our estimated earnings sensitivity profile as of December 31, 2010:

Change in Interest Rates (basis points)	Percentage Change in Net Interest Income (12 Months)
+400	2.48%
+300	1.45%
+200	0.58%
+100	0.22%
-25	(0.09)%

The simulation model used the yield curve spread evenly over a twelve-month period. The measurement at December 31, 2011 estimates that our net interest income in an up-rate environment would increase by 3.32% at a 400 basis point change, 2.08% increase at a 300 basis point change, 1.03% increase at a 200 basis point change, and a 0.46% increase at a 100 basis point change. In a down-rate environment, a 25 basis point decrease in interest rates would decrease net interest income by 0.25% over one year. In order to reduce the exposure to interest rate fluctuations and to manage liquidity, we have developed sale procedures for several types of interest-sensitive assets. The majority of long-term, fixed rate single family residential mortgage loans underwritten according to Federal Home Loan Mortgage Corporation guidelines are sold for cash upon origination. Periodically, additional assets such as commercial loans are also sold. In 2011 and 2010, \$81.1 million and \$82.3 million, respectively, was realized on the sale of fixed rate

residential mortgages. We focus our efforts on consistent net interest revenue and net interest margin growth through each of the retail and wholesale business lines. We do not currently engage in trading activities.

The preceding analysis was prepared using a rate ramp analysis which attempts to spread changes evenly over a specified time period as opposed to a rate shock which measures the impact of an immediate change. Had these measurements been prepared using the rate shock method, the results would vary.

Our Static Repricing GAP as of December 31, 2011 is presented below. In the 12 month repricing GAP, rate sensitive liabilities (“RSL”) exceeded rate sensitive assets (“RSA”) by \$174.2 million.

(dollars in thousands)	1-3 Months	4-6 Months	7-9 Months	10-12 Months	2-3 Years	4-5 Years	> 5 Years
Assets	\$1,577,366	\$222,402	\$179,410	\$176,307	\$660,291	\$168,059	\$607,344
Liabilities and Equity	892,369	418,902	378,314	640,120	829,930	29,701	401,843
Repricing difference	684,996	(196,500)	(198,904)	(463,812)	(169,639)	138,358	205,501
Cumulative GAP	684,996	488,496	289,592	(174,221)	(343,860)	(205,501)	0
RSA/RSL	1.77	x 0.53	x 0.47	x 0.28	x 0.80	x 5.66	x 1.51
Cumulative GAP to total assets	19.07	% 13.60	% 8.06	% (4.85)	% (9.58)	% (5.72)	% 0.00

Capital Resources

We continue to grow our shareholders’ equity while also providing an annual dividend yield for the year 2011 of 4.18% to shareholders. Shareholders’ equity increased 8.3% from December 31, 2010 to \$366.9 million at December 31, 2011. Our primary source of capital growth is the retention of earnings. Cash dividends were \$1.23 per share for 2011 and \$1.21 per share for 2010. We retained 51.6% of our earnings in 2011 compared to 44.2% in 2010.

Regulatory guidelines require bank holding companies, commercial banks, and savings banks to maintain certain minimum capital ratios and define companies as “well-capitalized” that sufficiently exceed the minimum ratios. The banking regulators may alter minimum capital requirements as a result of revising their internal policies and their ratings of individual institutions. To be “well-capitalized” banks and bank holding companies must maintain a Tier 1 leverage ratio of no less than 5.0%, a Tier 1 risk based ratio of no less than 6.0%, and a total risk based ratio of no less than 10.0%. Our ratios as of December 31, 2011 were 9.89%, 13.88%, and 15.14%, respectively, all exceeding the threshold for meeting the definition of “well-capitalized.” See note 21 to the consolidated financial statements for further information.

As of December 31, 2011, we are not aware of any current recommendations by banking regulatory authorities which, if they were to be implemented, would have, or are reasonably likely to have, a material adverse impact on our liquidity, capital resources, or operations, except as provided for in the Dodd-Frank Act which is discussed in the Supervision and Regulation section of Item 1. Business.

Deposit Insurance

Substantially all of the deposits of CTBI are insured up to applicable limits by the Deposit Insurance Fund (DIF) of the FDIC and are subject to deposit insurance assessments to maintain the DIF. The FDIC utilizes a risk-based assessment system that imposes insurance premiums based upon a risk matrix that takes into account a bank's capital level and supervisory rating ("CAMELS rating"). The risk matrix utilizes four risk categories which are distinguished by capital levels and supervisory ratings.

In December 2008, the FDIC issued a final rule that raised the then current assessment rates uniformly by seven basis points for the first quarter of 2009 assessment, which resulted in annualized assessment rates for institutions in the highest risk category ("Risk Category 1 institutions") ranging from 12 to 14 basis points (basis points representing cents per \$100 of assessable deposits). In February 2009, the FDIC issued final rules to amend the DIF restoration plan, change the risk-based assessment system and set assessment rates for Risk Category 1 institutions beginning in the second quarter of 2009. For Risk Category 1 institutions that have long-term debt issuer ratings, the FDIC determines the initial base assessment rate using a combination of weighted average CAMELS component ratings, long-term debt issuer ratings (converted to numbers and averaged) and the financial ratios method assessment rate (as defined), each equally weighted. The initial base assessment rates for Risk Category 1 institutions range from 12 to 16 basis points, on an annualized basis. After the effect of potential base-rate adjustments, total base assessment rates range from 7 to 24 basis points. The potential adjustments to a Risk Category 1 institution's initial base assessment rate include (i) a potential decrease of up to five basis points for long-term unsecured debt, including senior and subordinated debt and (ii) a potential increase of up to eight basis points for secured liabilities in excess of 25% of domestic deposits.

In May 2009, the FDIC issued a final rule which levied a special assessment applicable to all insured depository institutions totaling five basis points of each institution's total assets less Tier 1 capital as of June 30, 2009, not to exceed 10 basis points of domestic deposits. The special assessment was part of the FDIC's efforts to rebuild the DIF. Deposit insurance expense during 2009 included \$1.3 million recognized in the second quarter related to the special assessment.

In November 2009, the FDIC issued a rule that required all insured depository institutions, with limited exceptions, to prepay their estimated quarterly risk-based assessments for the fourth quarter of 2009 and for all of 2010, 2011 and 2012. The FDIC also adopted a uniform three-basis point increase in assessment rates effective on January 1, 2011. In December 2009, CTBI paid \$14.2 million in prepaid risk-based assessment, which included \$0.9 million related to the fourth quarter of 2009 that would have otherwise been payable in the first quarter of 2010. This amount was included in deposit insurance expense for 2009. The remaining \$13.3 million in prepaid deposit insurance was included in other assets on the consolidated balance sheet as of December 31, 2009. During 2010, \$3.9 million was expensed as a component of FDIC insurance and \$0.9 million in prepaid deposit insurance was acquired from LaFollette, leaving \$10.3 million in the prepaid. During 2011, \$2.9 million was expensed as a component of FDIC insurance, leaving \$7.4 million in the prepaid.

FDIC insurance expense totaled \$3.2 million, \$4.4 million, and \$5.8 million in 2011, 2010, and 2009. FDIC insurance expense includes deposit insurance assessments and Financing Corporation (ICO) assessments.

On July 21, 2010, President Obama signed the Dodd-Frank Act into law. This new law has significantly changed the current bank regulatory structure and affected the lending, deposit, investment, trading, and operating activities of financial institutions and their holding companies. The Dodd-Frank Act requires various federal agencies to adopt a broad range of new implementing rules and regulations, and to prepare numerous studies and reports for Congress. The federal agencies have been given significant discretion in drafting the implementing rules and regulations, and consequently, many of the details and much of the impact of the Dodd-Frank Act are still unknown.

Among many other provisions, the Dodd-Frank Act broadens the base for FDIC insurance assessments. Assessments are now based on the average consolidated total assets less tangible equity capital of a financial institution. The

Dodd-Frank Act also permanently increased the maximum amount of deposit insurance for banks, savings institutions and credit unions to \$250,000 per depositor, retroactive to January 1, 2008, and noninterest bearing transaction accounts and IOLTA accounts have unlimited deposit insurance through December 31, 2012. See the Supervision and Regulation section of Item 1. Business for further information on the provisions of the Dodd-Frank Act.

Impact of Inflation, Changing Prices, and Economic Conditions

The majority of our assets and liabilities are monetary in nature. Therefore, CTBI differs greatly from most commercial and industrial companies that have significant investment in nonmonetary assets, such as fixed assets and inventories. However, inflation does have an important impact on the growth of assets in the banking industry and on the resulting need to increase equity capital at higher than normal rates in order to maintain an appropriate equity to assets ratio. Inflation also affects other expenses, which tend to rise during periods of general inflation.

We believe one of the most significant impacts on financial and operating results is our ability to react to changes in interest rates. We seek to maintain an essentially balanced position between interest rate sensitive assets and liabilities in order to protect against the effects of wide interest rate fluctuations.

Our success is dependent on the general economic conditions of the communities we serve. Unlike larger banks that are more geographically diversified, we provide financial and banking services primarily to eastern, northeastern, central, and south central Kentucky, southern West Virginia, and northeastern Tennessee. The economic conditions in these areas have a significant impact on loan demand, the ability of borrowers to repay loans, and the value of the collateral securing loans. A significant decline in general economic conditions will affect these local economic conditions and will negatively affect the financial results of our banking operations. Factors influencing general conditions include inflation, recession, unemployment, and other factors beyond our control.

The national and global economic downturn has resulted in unprecedented levels of financial market volatility and has in general adversely impacted the market value of financial institutions, limited access to capital and had an adverse effect on the financial condition and results of operations of banking companies in general, including CTBI. From early 2008 to the middle of 2010, CTBI experienced significant challenges, credit quality deteriorated, and net income and results of operations were adversely impacted. While there has been improvement in economic conditions in our markets starting in the second half of 2010 and continuing into 2011, we believe that we will continue to experience a challenging environment in 2012. CTBI is a part of the financial system and a continuation of systemic lack of available credit, lack of confidence in the financial sector, increased volatility in the financial markets, and reduced business activity could materially and adversely impact CTBI's business, financial condition and results of operations.

Stock Repurchase Program

CTBI's stock repurchase program began in December 1998 with the authorization to acquire up to 500,000 shares and was increased by an additional 1,000,000 shares in July 2000 and in May 2003. We have not repurchased any shares of our common stock since February 2008. There are currently 288,519 shares remaining under CTBI's current repurchase authorization. As of December 31, 2011, a total of 2,211,481 shares have been repurchased through this program. The following table shows Board authorizations and repurchases made through the stock repurchase program for the years 1998 through 2011:

	Board	Repurchases*		Shares Available
	Authorizations	Average Price (\$)	# of Shares	for Repurchase
1998	500,000	-	0	
1999	0	15.89	131,517	
2000	1,000,000	11.27	694,064	
2001	0	14.69	444,945	
2002	0	19.48	360,287	

2003	1,000,000	21.58	235,668	
2004	0	25.45	55,000	
2005	0	-	0	
2006	0	-	0	
2007	0	31.42	196,500	
2008	0	28.08	93,500	
2009	0	-	0	
2010	0	-	0	
2011	0	-	0	
Total	2,500,000	17.52	2,211,481	288,519

*Repurchased shares and average prices have been restated to reflect stock dividends that have occurred; however, board authorized shares have not been adjusted.

Critical Accounting Policies and Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires the appropriate application of certain accounting policies, many of which require us to make estimates and assumptions about future events and their impact on amounts reported in our consolidated financial statements and related notes. Since future events and their impact cannot be determined with certainty, the actual results will inevitably differ from our estimates. Such differences could be material to the consolidated financial statements.

We believe the application of accounting policies and the estimates required therein are reasonable. These accounting policies and estimates are constantly reevaluated, and adjustments are made when facts and circumstances dictate a change. Historically, we have found our application of accounting policies to be appropriate, and actual results have not differed materially from those determined using necessary estimates.

Our accounting policies are described in note 1 to the consolidated financial statements. We have identified the following critical accounting policies:

Investments – Management determines the classification of securities at purchase. We classify securities into held-to-maturity, trading, or available-for-sale categories. Held-to-maturity securities are those which we have the positive intent and ability to hold to maturity and are reported at amortized cost. In accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 320, Investment Securities, investments in debt securities that are not classified as held-to-maturity and equity securities that have readily determinable fair values shall be classified in one of the following categories and measured at fair value in the statement of financial position:

a. Trading securities. Securities that are bought and held principally for the purpose of selling them in the near term (thus held for only a short period of time) shall be classified as trading securities. Trading generally reflects active and frequent buying and selling, and trading securities are generally used with the objective of generating profits on short-term differences in price.

b. Available-for-sale securities. Investments not classified as trading securities (nor as held-to-maturity securities) shall be classified as available-for-sale securities.

We do not have any securities that are classified as trading securities. Available-for-sale securities are reported at fair value, with unrealized gains and losses included as a separate component of shareholders' equity, net of tax. If declines in fair value are other than temporary, the carrying value of the securities is written down to fair value as a realized loss with a charge to income for the portion attributable to credit losses and a charge to other comprehensive

income for the portion that is not credit related.

Gains or losses on disposition of securities are computed by specific identification for all securities except for shares in mutual funds, which are computed by average cost. Interest and dividend income, adjusted by amortization of purchase premium or discount, is included in earnings.

When the fair value of a security is below its amortized cost, and depending on the length of time the condition exists and the extent the fair market value is below amortized cost, additional analysis is performed to determine whether an other than temporary impairment condition exists. Available-for-sale and held-to-maturity securities are analyzed quarterly for possible other than temporary impairment. The analysis considers (i) whether we have the intent to sell our securities prior to recovery and/or maturity and (ii) whether it is more likely than not that we will not have to sell our securities prior to recovery and/or maturity. Often, the information available to conduct these assessments is limited and rapidly changing, making estimates of fair value subject to judgment. If actual information or conditions are different than estimated, the extent of the impairment of the security may be different than previously estimated, which could have a material effect on the CTBI's results of operations and financial condition.

Loans – Loans with the ability and the intent to be held until maturity and/or payoff are reported at the carrying value of unpaid principal reduced by unearned interest, an allowance for loan and lease losses, and unamortized deferred fees or costs. Income is recorded on the level yield basis. Interest accrual is discontinued when management believes, after considering economic and business conditions, collateral value, and collection efforts, that the borrower's financial condition is such that collection of interest is doubtful. Any loan greater than 90 days past due must be well secured and in the process of collection to continue accruing interest. Cash payments received on nonaccrual loans generally are applied against principal, and interest income is only recorded once principal recovery is reasonably assured. Loans are not reclassified as accruing until principal and interest payments remain current for a period of time, generally six months, and future payments appear reasonably certain. Included in certain loan categories of impaired loans are troubled debt restructurings that were classified as impaired. A restructuring of a debt constitutes a troubled debt restructuring if the creditor for economic or legal reasons related to the debtor's financial difficulties grants a concession to the debtor that it would not otherwise consider.

Loan origination and commitment fees and certain direct loan origination costs are deferred and the net amount amortized over the estimated life of the related loans, leases, or commitments as a yield adjustment.

Allowance for Loan and Lease Losses – We maintain an allowance for loan and lease losses (“ALLL”) at a level that is appropriate to cover estimated credit losses on individually evaluated loans determined to be impaired, as well as estimated credit losses inherent in the remainder of the loan and lease portfolio. Since arriving at an appropriate ALLL involves a high degree of management judgment, we use an ongoing quarterly analysis to develop a range of estimated losses. In accordance with accounting principles generally accepted in the United States, we use our best estimate within the range of potential credit loss to determine the appropriate ALLL. Credit losses are charged and recoveries are credited to the ALLL.

We utilize an internal risk grading system for commercial credits. Those larger commercial credits that exhibit probable or observed credit weaknesses are subject to individual review. The borrower's cash flow, adequacy of collateral coverage, and other options available to CTBI, including legal remedies, are evaluated. The review of individual loans includes those loans that are impaired as defined by ASC 310-35, Impairment of a Loan. We evaluate the collectability of both principal and interest when assessing the need for loss provision. Historical loss rates are analyzed and applied to other commercial loans not subject to specific allocations. The ALLL allocation for this pool of commercial loans is established based on the historical average, maximum, minimum, and median loss ratios.

A loan is considered impaired when, based on current information and events, it is probable that CTBI will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan

agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan-by-loan basis for commercial and construction loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent.

Homogenous loans, such as consumer installment, residential mortgages, and home equity lines are not individually risk graded. The associated ALLL for these loans is measured under ASC 450, Contingencies.

All closed-end commercial loans (excluding loans secured by real estate) are charged off no later than 90 days delinquent. If a loan is considered uncollectable, it is charged off earlier than 90 days delinquent. When a commercial loan secured by real estate is past due, a current assessment of the value of the real estate is made. If the balance of the loan exceeds the fair value of the property, the loan is placed on nonaccrual with a specific reserve equal to the difference between book value and fair value assigned to the credit until such time as the property has been foreclosed. When the foreclosed property has been legally assigned to CTBI, a charge-off is taken with the remaining balance, reflecting the fair value less estimated costs to sell, transferred to other real estate owned.

All closed-end consumer loans (excluding conventional 1-4 family residential loans and installment and revolving loans secured by real estate) are charged off no later than 120 days (5 monthly payments) delinquent. If a loan is considered uncollectable, it is charged off earlier than 120 days delinquent. For conventional 1-4 family residential loans and installment and revolving loans secured by real estate, when a loan is 90 days past due, a current assessment of the value of the real estate is made. If the balance of the loan exceeds the fair value of the property, the loan is placed on nonaccrual and foreclosure proceedings are initiated. When the foreclosed property has been legally assigned to CTBI, a charge-off is taken with the remaining balance, reflecting the fair value less estimated costs to sell, transferred to other real estate owned.

Historical loss rates for loans are adjusted for significant factors that, in management's judgment, reflect the impact of any current conditions on loss recognition. We generally review the historical loss rates over eight quarters and four quarters on a rolling average basis. Factors that we consider include delinquency trends, current economic conditions and trends, strength of supervision and administration of the loan portfolio, levels of underperforming loans, level of recoveries to prior year's charge-offs, trend in loan losses, industry concentrations and their relative strengths, amount of unsecured loans and underwriting exceptions. Based upon management's judgment, "best case," "worst case," and "most likely" scenarios are determined. The total of each of these weighted factors is then applied against the applicable portion of the portfolio and the ALLL is adjusted accordingly.

Other Real Estate Owned – When foreclosed properties are acquired, appraisals are obtained and the properties are booked at the current market value less expected sales costs. Additionally, periodic updated appraisals are obtained on unsold foreclosed properties. When an updated appraisal reflects a market value below the current book value, a charge is booked to current earnings to reduce the property to its new market value less expected sales costs. Our policy for determining the frequency of periodic reviews is based upon consideration of the specific properties and the known or perceived market fluctuations in a particular market and is typically between 12 and 18 months. All revenues and expenses related to the carrying of other real estate owned are recognized by a charge to income.

Goodwill and Core Deposit Intangible – We evaluate total goodwill and core deposit intangible for impairment, based upon ASC 350, Intangibles-Goodwill and Other, using fair value techniques including multiples of price/equity. Goodwill and core deposit intangible are evaluated for impairment on an annual basis or as other events may warrant.

The activity to goodwill and core deposit intangible for the years ended December 31, 2011, 2010, and 2009 are shown below.

Goodwill:

(in thousands)	2011	2010	2009
Beginning balance, January 1	\$65,499	\$65,059	\$65,059
Acquisition adjustments	(9)	440	0
Ending balance, December 31	\$65,490	\$65,499	\$65,059

Core Deposit Intangible:

(in thousands)	2011	2010	2009
Beginning balance, January 1	\$1,342	\$648	\$1,282
Amortization	(213)	(430)	(634)
Acquisition adjustments	(12)	1,124	0
Ending balance, December 31, 2011	\$1,117	\$1,342	\$648

Amortization of core deposit intangible is estimated at approximately \$0.2 million annually for years one through seven.

Bank Owned Life Insurance – CTBI’s bank owned life insurance policies are carried at their cash surrender value. We recognize tax-free income from the periodic increases in cash surrender value of these policies and from death benefits.

Mortgage Servicing Rights – Mortgage servicing rights (“MSRs”) are carried at fair market value following the accounting guidance in ASC 860-50, Servicing Assets and Liabilities. MSRs are valued using Level 3 inputs as defined in ASC 820, Fair Value Measurements. The fair value is determined quarterly based on an independent third-party valuation using a discounted cash flow analysis and calculated using a computer pricing model. The system used in this evaluation, Compass Point, attempts to quantify loan level idiosyncratic risk by calculating a risk derived value. As a result, each loan’s unique characteristics determine the valuation assumptions ascribed to that loan. Additionally, the computer valuation is based on key economic assumptions including the prepayment speeds of the underlying loans generated using the Andrew Davidson Prepayment Model, FHLMC/FNMA guidelines, the weighted-average life of the loan, the discount rate, the weighted-average coupon, and the weighted-average default rate, as applicable. Along with the gains received from the sale of loans, fees are received for servicing loans. These fees include late fees, which are recorded in interest income, and ancillary fees and monthly servicing fees, which are recorded in noninterest income. Costs of servicing loans are charged to expense as incurred. Changes in fair market value of the MSRs are reported as an increase or decrease to mortgage banking income.

Comprehensive Income – Comprehensive income consists of net income and other comprehensive income, net of applicable income taxes. Other comprehensive income includes unrealized appreciation (depreciation) on available-for-sale securities and unrealized appreciation (depreciation) on available-for-sale securities for which a portion of an other than temporary impairment has been recognized in income.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

CTBI currently does not engage in any hedging activity or any derivative activity which management considers material. Analysis of CTBI’s interest rate sensitivity can be found in the Interest Rate Risk section of Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations.

Item 8. Financial Statements and Supplementary Data

Community Trust Bancorp, Inc.
Consolidated Balance Sheets

Notes to Consolidated Financial Statements

1. Accounting Policies

Basis of Presentation – The consolidated financial statements include Community Trust Bancorp, Inc. (“CTBI”) and its subsidiaries, including its principal subsidiary, Community Trust Bank, Inc. (“CTB”). Intercompany transactions and accounts have been eliminated in consolidation.

Nature of Operations – Substantially all assets, liabilities, revenues, and expenses are related to banking operations, including lending, investing of funds, obtaining of deposits, trust and wealth management operations, full service brokerage operations, and other financing activities. All of our business offices and the majority of our business are located in eastern, northeastern, central, and south central Kentucky, southern West Virginia, and northeastern Tennessee.

Use of Estimates – In preparing the consolidated financial statements, management must make certain estimates and assumptions. These estimates and assumptions affect the amounts reported for assets, liabilities, revenues, and expenses, as well as affecting the disclosures provided. Future results could differ from the current estimates. Such estimates include, but are not limited to, the allowance for loan and lease losses, valuation of other real estate owned, fair value of securities and mortgage servicing rights, and goodwill (the excess of cost over net assets acquired).

The current protracted economic decline continues to present financial institutions with circumstances and challenges, which in some cases have resulted in large and unanticipated declines in the fair values of investments and other assets, constraints on liquidity and capital, and significant credit quality problems, including severe volatility in the valuation of real estate and other collateral supporting loans.

The accompanying financial statements have been prepared using values and information currently available to CTBI.

Given the volatility of current economic conditions, the values of assets and liabilities recorded in the financial statements could change rapidly, resulting in material future adjustments in asset values, the allowance for loan losses, and capital.

Cash and Cash Equivalents – CTBI considers all liquid investments with original maturities of three months or less to be cash equivalents. Cash and cash equivalents include cash on hand, amounts due from banks, interest bearing deposits in other financial institutions, and federal funds sold. Generally, federal funds are sold for one-day periods.

Certificates of Deposit in Other Banks – Certificates of deposit in other banks generally mature within 18 months and are carried at cost.

Investments – Management determines the classification of securities at purchase. We classify securities into held-to-maturity, trading, or available-for-sale categories. Held-to-maturity securities are those which we have the positive intent and ability to hold to maturity and are reported at amortized cost. In accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 320, Investment Securities, investments in debt securities that are not classified as held-to-maturity and equity securities that have readily determinable fair values shall be classified in one of the following categories and measured at fair value in the statement of financial position:

a. **Trading securities.** Securities that are bought and held principally for the purpose of selling them in the near term (thus held for only a short period of time) shall be classified as trading securities. Trading generally reflects active and frequent buying and selling, and trading securities are generally used with the objective of generating profits on

short-term differences in price.

b. Available-for-sale securities. Investments not classified as trading securities (nor as held-to-maturity securities) shall be classified as available-for-sale securities.

We do not have any securities that are classified as trading securities. Available-for-sale securities are reported at fair value, with unrealized gains and losses included as a separate component of shareholders' equity, net of tax. If declines in fair value are other than temporary, the carrying value of the securities is written down to fair value as a realized loss with a charge to income for the portion attributable to credit losses and a charge to other comprehensive income for the portion that is not credit related.

Gains or losses on disposition of securities are computed by specific identification for all securities except for shares in mutual funds, which are computed by average cost. Interest and dividend income, adjusted by amortization of purchase premium or discount, is included in earnings.

When the fair value of a security is below its amortized cost, and depending on the length of time the condition exists and the extent the fair market value is below amortized cost, additional analysis is performed to determine whether an other than temporary impairment condition exists. Available-for-sale and held-to-maturity securities are analyzed quarterly for possible other than temporary impairment. The analysis considers (i) whether we have the intent to sell our securities prior to recovery and/or maturity and (ii) whether it is more likely than not that we will not have to sell our securities prior to recovery and/or maturity. Often, the information available to conduct these assessments is limited and rapidly changing, making estimates of fair value subject to judgment. If actual information or conditions are different than estimated, the extent of the impairment of the security may be different than previously estimated, which could have a material effect on the CTBI's results of operations and financial condition.

Loans – Loans with the ability and the intent to be held until maturity and/or payoff are reported at the carrying value of unpaid principal reduced by unearned interest, an allowance for loan and lease losses, and unamortized deferred fees or costs. Income is recorded on the level yield basis. Interest accrual is discontinued when management believes, after considering economic and business conditions, collateral value, and collection efforts, that the borrower's financial condition is such that collection of interest is doubtful. Any loan greater than 90 days past due must be well secured and in the process of collection to continue accruing interest. Cash payments received on nonaccrual loans generally are applied against principal, and interest income is only recorded once principal recovery is reasonably assured. Loans are not reclassified as accruing until principal and interest payments remain current for a period of time, generally six months, and future payments appear reasonably certain. Included in certain loan categories of impaired loans are troubled debt restructurings that were classified as impaired. A restructuring of a debt constitutes a troubled debt restructuring if the creditor for economic or legal reasons related to the debtor's financial difficulties grants a concession to the debtor that it would not otherwise consider.

Loan origination and commitment fees and certain direct loan origination costs are deferred and the net amount amortized over the estimated life of the related loans, leases, or commitments as a yield adjustment.

Allowance for Loan and Lease Losses – We maintain an allowance for loan and lease losses (“ALLL”) at a level that is appropriate to cover estimated credit losses on individually evaluated loans determined to be impaired, as well as estimated credit losses inherent in the remainder of the loan and lease portfolio. Since arriving at an appropriate ALLL involves a high degree of management judgment, we use an ongoing quarterly analysis to develop a range of estimated losses. In accordance with accounting principles generally accepted in the United States, we use our best estimate within the range of potential credit loss to determine the appropriate ALLL. Credit losses are charged and recoveries are credited to the ALLL.

We utilize an internal risk grading system for commercial credits. Those larger commercial credits that exhibit probable or observed credit weaknesses are subject to individual review. The borrower's cash flow, adequacy of

collateral coverage, and other options available to CTBI, including legal remedies, are evaluated. The review of individual loans includes those loans that are impaired as defined by ASC 310-35, Impairment of a Loan. We evaluate the collectability of both principal and interest when assessing the need for loss provision. Historical loss rates are analyzed and applied to other commercial loans not subject to specific allocations. The ALLL allocation for this pool of commercial loans is established based on the historical average, maximum, minimum, and median loss ratios.

A loan is considered impaired when, based on current information and events, it is probable that CTBI will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan-by-loan basis for commercial and construction loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent.

Homogenous loans, such as consumer installment, residential mortgages, and home equity lines are not individually risk graded. The associated ALLL for these loans is measured under ASC 450, Contingencies.

All closed-end commercial loans (excluding loans secured by real estate) are charged off no later than 90 days delinquent. If a loan is considered uncollectable, it is charged off earlier than 90 days delinquent. When a commercial loan secured by real estate is past due, a current assessment of the value of the real estate is made. If the balance of the loan exceeds the fair value of the property, the loan is placed on nonaccrual with a specific reserve equal to the difference between book value and fair value assigned to the credit until such time as the property has been foreclosed. When the foreclosed property has been legally assigned to CTBI, a charge-off is taken with the remaining balance, reflecting the fair value less estimated costs to sell, transferred to other real estate owned.

All closed-end consumer loans (excluding conventional 1-4 family residential loans and installment and revolving loans secured by real estate) are charged off no later than 120 days (5 monthly payments) delinquent. If a loan is considered uncollectable, it is charged off earlier than 120 days delinquent. For conventional 1-4 family residential loans and installment and revolving loans secured by real estate, when a loan is 90 days past due, a current assessment of the value of the real estate is made. If the balance of the loan exceeds the fair value of the property, the loan is placed on nonaccrual and foreclosure proceedings are initiated. When the foreclosed property has been legally assigned to CTBI, a charge-off is taken with the remaining balance, reflecting the fair value less estimated costs to sell, transferred to other real estate owned.

Historical loss rates for loans are adjusted for significant factors that, in management's judgment, reflect the impact of any current conditions on loss recognition. We generally review the historical loss rates over eight quarters and four quarters on a rolling average basis. Factors that we consider include delinquency trends, current economic conditions and trends, strength of supervision and administration of the loan portfolio, levels of underperforming loans, level of recoveries to prior year's charge-offs, trend in loan losses, industry concentrations and their relative strengths, amount of unsecured loans and underwriting exceptions. Based upon management's judgment, "best case," "worst case," and "most likely" scenarios are determined. The total of each of these weighted factors is then applied against the applicable portion of the portfolio and the ALLL is adjusted accordingly.

Loans Held for Sale – Mortgage loans originated and intended for sale in the secondary market are carried at the lower of cost or estimated market value in the aggregate. Net unrealized losses, if any, are recognized by charges to income. Gains and losses on loan sales are recorded in noninterest income.

Premises and Equipment – Premises and equipment are stated at cost less accumulated depreciation and amortization. Capital leases are included in premises and equipment at the capitalized amount less accumulated amortization. Premises and equipment are evaluated for impairment on a quarterly basis.

Depreciation and amortization are computed primarily using the straight-line method. Estimated useful lives range up to 40 years for buildings, 2 to 10 years for furniture, fixtures, and equipment, and up to the lease term for leasehold improvements. Capitalized leased assets are amortized on a straight-line basis over the lives of the respective leases.

Federal Home Loan Bank and Federal Reserve Stock – CTB is a member of the Federal Home Loan Bank (“FHLB”) system. Members are required to own a certain amount of stock based on the level of borrowings and other factors and may invest on additional amounts. FHLB stock is carried at cost, classified as a restricted security, and periodically evaluated for impairment based on the ultimate recovery par value. Both cash and stock dividends are reported as income.

CTB is also a member of its regional Federal Reserve Bank. Federal Reserve Bank stock is carried at cost, classified as a restricted security, and periodically evaluated for impairment based on the ultimate recovery par value. Both cash and stock dividends are reported as income.

Other Real Estate Owned – When foreclosed properties are acquired, appraisals are obtained and the properties are booked at the current market value less expected sales costs. Additionally, periodic updated appraisals are obtained on unsold foreclosed properties. When an updated appraisal reflects a market value below the current book value, a charge is booked to current earnings to reduce the property to its new market value less expected sales costs. Our policy for determining the frequency of periodic reviews is based upon consideration of the specific properties and the known or perceived market fluctuations in a particular market and is typically between 12 and 18 months. All revenues and expenses related to the carrying of other real estate owned are recognized by a charge to income.

Goodwill and Core Deposit Intangible – We evaluate total goodwill and core deposit intangible for impairment, based upon ASC 350, Intangibles-Goodwill and Other, using fair value techniques including multiples of price/equity. Goodwill and core deposit intangible are evaluated for impairment on an annual basis or as other events may warrant.

The activity to goodwill and core deposit intangible for the years ended December 31, 2011, 2010, and 2009 are shown below.

Goodwill:

(in thousands)	2011	2010	2009
Beginning balance, January 1	\$65,499	\$65,059	\$65,059
Acquisition adjustments	(9)	440	0
Ending balance, December 31	\$65,490	\$65,499	\$65,059

Core Deposit Intangible:

(in thousands)	2011	2010	2009
Beginning balance, January 1	\$1,342	\$648	\$1,282
Amortization	(213)	(430)	(634)
Acquisition adjustments	(12)	1,124	0
Ending balance, December 31, 2011	\$1,117	\$1,342	\$648

Amortization of core deposit intangible is estimated at approximately \$0.2 million annually for years one through seven.

Transfers of Financial Assets -- Transfers of financial assets are accounted for as sales, when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from CTBI—put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership, (2) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (3) CTBI does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity or the ability to unilaterally cause the holder to return specific assets.

Income Taxes – Income tax expense is based on the taxes due on the consolidated tax return plus deferred taxes based on the expected future tax benefits and consequences of temporary differences between carrying amounts and tax bases of assets and liabilities, using enacted tax rates.

Earnings Per Share (“EPS”) – Basic EPS is calculated by dividing net income available to common shareholders by the weighted average number of common shares outstanding, excluding restricted shares.

Diluted EPS adjusts the number of weighted average shares of common stock outstanding by the dilutive effect of stock options, including restricted shares, as prescribed in ASC 718, Share-Based Payment.

Segments – Management analyzes the operation of CTBI assuming one operating segment, community banking services. CTBI, through its operating subsidiaries, offers a wide range of consumer and commercial community banking services. These services include: (i) residential and commercial real estate loans; (ii) checking accounts; (iii) regular and term savings accounts and savings certificates; (iv) full service securities brokerage services; (v) consumer loans; (vi) debit cards; (vii) annuity and life insurance products; (viii) Individual Retirement Accounts and Keogh plans; (ix) commercial loans; (x) trust and wealth management services; and (xi) commercial demand deposit accounts.

Bank Owned Life Insurance – CTBI’s bank owned life insurance policies are carried at their cash surrender value. We recognize tax-free income from the periodic increases in cash surrender value of these policies and from death benefits.

Mortgage Servicing Rights – Mortgage servicing rights (“MSRs”) are carried at fair market value following the accounting guidance in ASC 860-50, Servicing Assets and Liabilities. MSRs are valued using Level 3 inputs as defined in ASC 820, Fair Value Measurements. The fair value is determined quarterly based on an independent third-party valuation using a discounted cash flow analysis and calculated using a computer pricing model. The system used in this evaluation, Compass Point, attempts to quantify loan level idiosyncratic risk by calculating a risk derived value. As a result, each loan’s unique characteristics determine the valuation assumptions ascribed to that loan. Additionally, the computer valuation is based on key economic assumptions including the prepayment speeds of the underlying loans generated using the Andrew Davidson Prepayment Model, FHLMC/FNMA guidelines, the weighted-average life of the loan, the discount rate, the weighted-average coupon, and the weighted-average default rate, as applicable. Along with the gains received from the sale of loans, fees are received for servicing loans. These fees include late fees, which are recorded in interest income, and ancillary fees and monthly servicing fees, which are recorded in noninterest income. Costs of servicing loans are charged to expense as incurred. Changes in fair market value of the MSRs are reported as an increase or decrease to mortgage banking income.

Share-Based Compensation – At December 31, 2011 and December 31, 2010, CTBI had a share-based employee compensation plan, which is described more fully in note 15 to the consolidated financial statements. CTBI accounts for this plan under the recognition and measurement principles of ASC 718, Share-Based Payment.

Comprehensive Income – Comprehensive income consists of net income and other comprehensive income, net of applicable income taxes. Other comprehensive income includes unrealized appreciation (depreciation) on available-for-sale securities and unrealized appreciation (depreciation) on available-for-sale securities for which a portion of an other than temporary impairment has been recognized in income.

Transfers between Fair Value Hierarchy Levels – Transfers in and out of Level 1 (quoted market prices), Level 2 (other significant observable inputs), and Level 3 (significant unobservable inputs) are recognized on the period ending date. **Reclassifications** – Certain reclassifications considered to be immaterial have been made in the prior year condensed consolidated financial statements to conform to current year classifications. These reclassifications had no effect on net income.

New Accounting Standards –

Deferral of the Effective Date of Disclosures about Troubled Debt Restructurings – In January 2011, the FASB released ASU 2011-01, Receivables (Topic 310): Deferral of the Effective Date of Disclosures about Troubled Debt Restructurings. The amendments in this ASU temporarily delayed the effective date of the disclosures about troubled debt restructurings in ASU 2010-20 discussed above. The delay was intended to allow the Board time to complete its deliberations on what constitutes a troubled debt restructuring. CTBI adopted the new disclosures effective for the reporting period ending September 30, 2011.

A Creditor's Determination of Whether a Restructuring is a Troubled Debt Restructuring – In April 2011, the FASB issued ASU No. 2011-02, A Creditor's Determination of Whether a Restructuring is a Troubled Debt Restructuring. The provisions of ASU No. 2011-02 provide additional guidance related to determining whether a creditor has granted a concession, include factors and examples for creditors to consider in evaluating whether a restructuring results in a delay in payment that is insignificant, prohibit creditors from using the borrower's effective rate test to evaluate whether a concession has been granted to the borrower, and add factors for creditors to use in determining whether a borrower is experiencing financial difficulties. A provision in ASU No. 2011-02 also ends the FASB's deferral of the additional disclosures about troubled debt restructurings as required by ASU No. 2010-20. The provisions of ASU No. 2011-02 were effective for CTBI's reporting period ending September 30, 2011. The adoption of ASU No. 2011-02 did not have a material impact on CTBI's consolidated financial statements.

Reconsideration of Effective Control for Repurchase Agreements – In April 2011, the FASB issued ASU 2011-03, Reconsideration of Effective Control for Repurchase Agreements. The main objective in developing this ASU is to improve the accounting for repurchase agreements and other agreements that both entitle and obligate a transferor to repurchase or redeem financial assets before their maturity. The amendments in this ASU remove from the assessment of effective control (1) the criterion requiring the transferor to have the ability to repurchase or redeem the financial assets on substantially the agreed terms, even in the event of default by the transferee, and (2) the collateral maintenance implementation guidance related to that criterion. Other criteria applicable to the assessment of effective control are not changed by the amendments in this Update. The guidance in this Update is effective for the first interim or annual period beginning on or after December 15, 2011. The guidance should be applied prospectively to transactions or modifications of existing transactions that occur on or after the effective date. Early adoption is not permitted. The adoption of ASU No. 2011-03 is not expected to have a material impact on CTBI's consolidated financial statements.

Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs – In May 2011, the FASB issued ASU No. 2011-04, Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs. The amendments in this ASU generally represent clarifications of Topic 820, but also include some instances where a particular principle or requirement for measuring fair value or disclosing information about fair value measurements has changed. This ASU results in common principles and requirements for measuring fair value and for disclosing information about fair value measurements in accordance with U.S. GAAP and IFRSs.

The amendments in this ASU are to be applied prospectively. For public entities, the amendments are effective during interim and annual periods beginning after December 15, 2011. Early application by public entities is not permitted. CTBI will adopt the methodologies prescribed by this ASU by the date required and does not anticipate that the ASU will have a material effect on our financial position or results of operations.

Amendments to Topic 220, Comprehensive Income – In June 2011, the FASB issued ASU No. 2011-05, Amendments to Topic 220, Comprehensive Income. Under the amendments in this ASU, an entity has the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both choices, an entity is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. This ASU eliminates the option to present the components of other comprehensive income as part of the statement of changes in stockholders' equity. The amendments in this ASU do not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income.

The amendments in this ASU should be applied retrospectively. For public entities, the amendments are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. Early adoption is permitted, because compliance with the amendments is already permitted. The amendments do not require any transition disclosures. In October 2011, the FASB decided that the specific requirement to present items that are reclassified from other comprehensive income to net income alongside their respective components of net income and other comprehensive income will be deferred. Therefore, those requirements will not be effective for public entities for fiscal years and interim periods within those years beginning after December 15, 2011. CTBI will adopt ASU 2011-05 retrospectively by the due date and does not anticipate that it will have a material impact on our consolidated financial statements.

In December 2011, the FASB issued ASU No. 2011-12, Comprehensive Income (Topic 220): Deferral of the Effective Date for Amendments to the Presentation of Reclassification of Items Out of Accumulated Other Comprehensive Income in ASU No. 2011-05. The amendments in this ASU supersede certain pending paragraphs in ASU No. 2011-05 to effectively defer only those changes in that relate to the presentation of reclassification adjustments out of accumulated other comprehensive income. The amendments will be temporary to allow the FASB time to redeliberate the presentation requirements for reclassifications out of accumulated other comprehensive income for annual and interim financial statements for public, private, and non-profit entities.

Testing Goodwill for Impairment – In September 2011, the FASB issued ASU No. 2011-08, Intangibles-Goodwill and Other (Topic 350): Testing Goodwill for Impairment. The amendments in this ASU will allow an entity to first assess qualitative factors to determine whether it is necessary to perform the two-step quantitative goodwill impairment test. Under these amendments, an entity would not be required to calculate the fair value of a reporting unit unless the entity determines, based on a qualitative assessment, that it is more likely than not that its fair value is less than its carrying amount. The amendments include a number of events and circumstances for an entity to consider in conducting the qualitative assessment. ASU 2011-08 is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption is permitted, including for annual and interim goodwill impairment tests performed as of a date before September 15, 2011, if an entity's financial statements for the most recent annual or interim period have not yet been issued. CTBI will adopt this ASU by the date required and does not anticipate that it will have a material effect on our consolidated financial statements.

2. Business Combinations

On June 8, 2010, CTBI entered into an Agreement and Plan of Share Exchange with LaFollette First National Corporation, a Tennessee corporation (“LaFollette Corporation”) and First National Bank of LaFollette (“LaFollette

Bank”), the wholly-owned subsidiary of LaFollette Corporation. On November 17, 2010, CTBI completed the acquisition of LaFollette Corporation and LaFollette Bank, acquiring all outstanding shares of LaFollette Corporation in a share exchange for \$650 per share, or a total of approximately \$16.1 million. In addition, CTBI paid \$1.2 million to retire a debt owed by LaFollette Corporation. Immediately following the share exchange, LaFollette Corporation was merged into CTBI. LaFollette Bank was merged into Community Trust Bank, Inc. (the “Bank”) on January 21, 2011.

This acquisition was accounted for under ASC 805, Business Combinations. Accordingly, assets and liabilities acquired were recorded at their estimated fair values, net of applicable income tax effects. The excess cost over fair value of net assets acquired was recorded as goodwill. Pro forma results of operations of LaFollette Corporation for the year ended December 31, 2010 are not included as the acquisition did not have a material impact on CTBI’s consolidated financial statements. Total assets acquired were approximately 5% of CTBI’s total consolidated assets. The following table summarizes the consideration paid for the purchase of LaFollette Corporation and the amounts of the assets acquired and liabilities assumed recognized at the acquisition date:

(in thousands)	
Fair value of consideration	
Cash paid (24,759 shares @ \$650)	\$16,093
Payoff of LaFollette Corporation debt	1,213
Total consideration paid	17,306
Assets acquired	
Cash	20,212
Loans, net of purchase discounts	118,602
Federal Reserve Bank and Federal Home Loan Bank stock	1,036
Securities	29,784
Other real estate owned	2,726
Premises and equipment	7,622
Accrued interest receivable	708
Core deposit intangible	1,124
Other assets	1,824
Total assets acquired	183,638
Liabilities assumed	
Deposits	164,114
Repurchase agreements	426
Federal Home Loan Bank advances	1,199
Accrued interest payable	158
Other liabilities	875
Total liabilities assumed	166,772
Net assets acquired	16,866
Goodwill	\$440

3. Cash and Due from Banks and Interest Bearing Deposits

Included in cash and due from banks and interest bearing deposits are amounts required to be held at the Federal Reserve or maintained in vault cash in accordance with regulatory reserve requirements. The balance requirements were \$52.1 million and \$46.1 million at December 31, 2011 and 2010, respectively.

Effective July 21, 2010, the FDIC's insurance limits were permanently increased to \$250,000. At December 31, 2011, CTBI had no cash accounts which exceeded federally insured limits; however, CTBI had \$159 million in deposits with the Federal Reserve which are not subject to FDIC insurance.

Pursuant to legislation enacted in 2010, the FDIC fully insures all noninterest bearing transaction accounts beginning December 31, 2010 through December 31, 2012, at all FDIC insured institutions.

4. Securities

Securities are classified into held-to-maturity and available-for-sale categories. Held-to-maturity (HTM) securities are those that CTBI has the positive intent and ability to hold to maturity and are reported at amortized cost. Available-for-sale (AFS) securities are those that CTBI may decide to sell if needed for liquidity, asset-liability management or other reasons. Available-for-sale securities are reported at fair value, with unrealized gains or losses included as a separate component of equity, net of tax.

The amortized cost and fair value of securities at December 31, 2011 are summarized as follows:

Available-for-Sale

(in thousands)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
U.S. Treasury and government agencies	\$32,077	\$1,171	\$0	\$33,248
State and political subdivisions	68,358	3,816	(30)	72,144
U.S. government sponsored agency mortgage-backed securities	390,213	10,180	(57)	400,336

Marketable equity securities	20,582	21,163	0	0
Total securities	\$511,731	\$527,398	\$1,662	\$1,661

There was a pre-tax gain of \$218 thousand realized in 2011 due to the sale of an agency security. There were no pre-tax gains or losses as of December 31, 2010. There was a combined gain of \$658 thousand realized in 2009 due to sales of six securities and a loss of \$4 thousand realized due to sales of two securities.

The amortized cost of securities pledged as collateral, to secure public deposits and for other purposes, was \$198.6 million at December 31, 2011 and \$106.2 million at December 31, 2010.

The amortized cost of securities sold under agreements to repurchase amounted to \$217.2 million at December 31, 2011 and \$188.3 million at December 31, 2010.

Certain investments in debt and marketable equity securities are reported in the financial statements at amounts less than their historical costs. CTBI evaluates its investment portfolio on a quarterly basis for impairment. The analysis performed as of December 31, 2011 indicates that all impairment is considered temporary, market driven, and not credit-related. The percentage of total investments with unrealized losses as of December 31, 2011 was 4.8% compared to 18.9% as of December 31, 2010. The following tables provide the amortized cost, gross unrealized losses, and fair market value, aggregated by investment category and length of time the individual securities have been in a continuous unrealized loss position as of December 31, 2011 that are not deemed to be other-than-temporarily impaired.

As of December 31, 2010, there were no held-to-maturity securities with unrealized losses.

5. Loans

Classes of loans, net of deferred loan origination costs, are summarized as follows:

(in thousands)	December 31 2011	December 31 2010
Commercial construction	\$120,577	\$135,091
Commercial secured by real estate	798,887	807,049
Equipment lease financing	9,706	14,151
Commercial other	374,597	388,746
Real estate construction	53,534	56,910
Real estate mortgage	650,075	623,851
Home equity	84,841	85,103
Consumer direct	123,949	126,046
Consumer indirect	340,382	368,233
Total loans	\$2,556,548	\$2,605,180

CTBI has segregated and evaluates its loan portfolio through nine portfolio classes. The nine classes are commercial construction, commercial secured by real estate, equipment lease financing, commercial other, real estate construction, real estate mortgage, home equity, consumer direct, and consumer indirect. CTBI serves customers in small and mid-sized communities in eastern, northeastern, central, and south central Kentucky, southern West Virginia, and northeastern Tennessee. Therefore, CTBI's exposure to credit risk is significantly affected by changes in these communities.

Commercial construction loans are for the purpose of erecting or rehabilitating buildings or other structures for commercial purposes, including any infrastructure necessary for development. Included in this category are improved property, land development, and tract development loans. The terms of these loans are generally short-term with permanent financing upon completion.

Commercial real estate loans include loans secured by nonfarm, nonresidential properties, 1-4 family/ multi-family properties, farmland, and other commercial real estate. These loans are originated based on the borrower's ability to service the debt and secondarily based on the fair value of the underlying collateral.

Equipment lease financing loans are fixed, variable, and tax exempt leases for commercial purposes.

Commercial other loans consist of commercial check loans, agricultural loans, receivable financing, floorplans, loans to financial institutions, loans for purchasing or carrying securities, and other commercial purpose loans. Commercial loans are underwritten based on the borrower's ability to service debt from the business's underlying cash flows. As a general practice, we obtain collateral such as real estate, equipment, or other assets, although such loans may be uncollateralized but guaranteed.

Real estate construction loans are typically for owner-occupied properties. The terms of these loans are generally short-term with permanent financing upon completion.

Residential real estate loans are a mixture of fixed rate and adjustable rate first and second lien residential mortgage loans. As a policy, CTBI holds adjustable rate loans and sells the majority of its fixed rate first lien mortgage loans into the secondary market. Changes in interest rates or market conditions may impact a borrower's ability to meet contractual principal and interest payments. Residential real estate loans are secured by real property.

Home equity lines are revolving adjustable rate credit lines secured by real property.

Consumer direct loans are fixed rate products comprised of unsecured loans, consumer revolving credit lines, deposit secured loans, and all other consumer purpose loans.

Consumer indirect loans are fixed rate loans secured by automobiles, trucks, vans, and recreational vehicles originated at the selling dealership underwritten and purchased by CTBI's indirect lending department. Both new and used products are financed. Only dealers who have executed dealer agreements with CTBI participate in the indirect lending program.

Not included in the loan balances above were loans held for sale in the amount of \$0.5 million at December 31, 2011 and 2010, respectively. The amount of capitalized fees and costs under ASC 310-20, included in the above loan totals were \$0.7 million and \$0.8 million at December 31, 2011 and 2010, respectively.

CTBI acquired loans through the acquisition of First National Bank of LaFollette in the fourth quarter 2010. At acquisition, the transferred loans with evidence of deterioration of credit quality since origination were not significant; therefore, none of the loans acquired were accounted for under the guidance in ASC 310-30.

Credit discounts representing principal losses expected over the life of the loans are a component of the initial fair value for purchased loans acquired that are not deemed impaired at acquisition. Accordingly, an allowance for credit losses related to these loans is not carried over and recorded at the acquisition date. Subsequent to the acquisition date, the methods used to estimate the required allowance for credit losses for these loans is similar to originated loans; however, CTBI records a provision for loan losses only when the required allowance exceeds any remaining credit discounts. The remaining difference between the purchase price and the unpaid principal balance at the date of acquisition is recorded in interest income over the life of the loans. Management estimated the cash flows expected to be collected at acquisition using a third party that incorporated estimates of current key assumptions, such as default rates, severity, and prepayment speeds. The carrying amounts of those loans included in the balance sheet are \$88.5 million and \$115.7 million at December 31, 2011 and 2010, respectively.

Changes in accretable yield for the years ended December 31, 2011 and 2010 are as follows:

(in thousands)	2011	2010
Beginning balance	\$2,995	\$0
Additions	0	3,152
Accretion	(1,067)	(126)
Disposals	(1,208)	(31)
Ending balance	\$720	\$2,995

The amount of loans on a non-accruing income status was \$25.8 million, \$45.0 million, and \$32.2 million at December 31, 2011, 2010, and 2009, respectively. The total of loans on non-accrual that were in homogeneous pools and not evaluated individually for impairment were \$5.0 million, \$7.6 million, and \$5.6 million at December 31, 2011, 2010, and 2009, respectively. Any loan greater than 90 days past due must be well secured and in the process of collection to continue accruing interest. The amount of loans 90 days or more past due and still accruing interest was \$11.5 million, \$17.0 million, and \$9.1 million at December 31, 2011, 2010, and 2009, respectively. Refer to note 1 to the consolidated financial statements for further information regarding our nonaccrual policy. Nonaccrual loans segregated by class of loans were as follows:

(in thousands)	December 31 2011	December 31 2010
Commercial:		
Commercial construction	\$7,029	\$13,138
Commercial secured by real estate	9,810	15,608
Commercial other	3,914	9,338
Residential:		
Real estate construction	607	636
Real estate mortgage	4,204	6,137
Home equity	189	164
Total nonaccrual loans	\$25,753	\$45,021

The following tables present CTBI's loan portfolio aging analysis, segregated by class, as of December 31, 2011 and 2010:

(in thousands)	December 31, 2011						Total Loans	90+ and Accruing*
	30-59 Days Past Due	60-89 Days Past Due	90+ Days Past Due	Total Past Due	Current

*90+ and Accruing are also included in 90+ Days Past Due column.

Credit Quality Indicators:

CTBI categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. CTBI also considers the fair value of the underlying collateral and the strength and willingness of the guarantor(s). CTBI analyzes commercial loans individually by classifying the loans as to credit risk. Loans classified as loss, doubtful, substandard, or special mention are reviewed quarterly for further deterioration or improvement to determine if appropriately classified and valued if deemed impaired. All other commercial loan reviews are completed every 12 to 18 months. In addition, during the renewal process of any loan, as well as if a loan becomes past due or if other information becomes available, CTBI will evaluate the loan grade. CTBI uses the following definitions for risk ratings:

Pass grades include investment grade, low risk, moderate risk, and acceptable risk loans. The loans range from loans that have no chance of resulting in a loss to loans that have a limited chance of resulting in a loss. Customers in this grade have excellent to fair credit ratings. The cash flows are adequate to meet required debt repayments.

Watch graded loans are loans that warrant extra management attention but are not currently criticized. Loans on the watch list may be potential troubled credits or may warrant "watch" status for a reason not directly related to the asset quality of the credit. The watch grade is a management tool to identify credits which may be candidates for future classification or may temporarily warrant extra management monitoring.

Other assets especially mentioned (OAEM) reflects loans that are currently protected but are potentially weak. These loans constitute an undue and unwarranted credit risk but not to the point of justifying a classification of substandard. The credit risk may be relatively minor yet constitute an unwarranted risk in light of circumstances surrounding a specific asset. Loans in this grade display potential weaknesses which may, if unchecked or uncorrected, inadequately protect CTBI's credit position at some future date. The loans may be adversely affected by economic or market conditions.

Substandard grading indicates that the loan is inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged. These loans have a well-defined weakness or weaknesses that jeopardize the orderly liquidation of the debt with the distinct possibility that CTBI will sustain some loss if the deficiencies are not corrected.

Doubtful graded loans have the weaknesses inherent in the substandard grading with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable. The probability of loss is extremely high, but because of certain important and reasonably specific pending factors which may work to CTBI's advantage or strengthen the asset(s), its classification as an estimated loss is deferred until its more exact status may be determined. Pending factors include proposed merger, acquisition, or liquidation procedures, capital injection, perfecting liens on additional collateral, and refinancing plans.

A loss grading applies to loans that are considered uncollectible and of such little value that their continuance as bankable assets is not warranted. This classification does not mean that the asset has absolutely no recovery value, but rather it is not practical or desirable to defer writing off the asset. Losses must be taken in the period in which they surface as uncollectible, or in the case of collateral-dependent loans, a specific reserve in the amount of the expected loss is applied to the loan until the collateral is liquidated or we have taken possession and moved it into other real estate owned.

The following tables present the credit risk profile of CTBI's commercial loan portfolio based on rating category and payment activity, segregated by class of loans, as of December 31, 2011 and 2010:

Total	\$ 56,910	\$623,851	\$85,103	\$126,046	\$368,233	\$1,260,143

(1) A loan is considered nonperforming if it is 90 days or more past due or on nonaccrual.

A loan is considered impaired, in accordance with the impairment accounting guidance (ASC 310-10-35-16), when based on current information and events, it is probable CTBI will be unable to collect all amounts due from the borrower in accordance with the contractual terms of the loan. Impaired loans include nonperforming commercial loans but also include loans modified in troubled debt restructurings where concessions have been granted to borrowers experiencing financial difficulties. These concessions could include a reduction in the interest rate on the loan, payment extensions, forgiveness of principal, forbearance, or other actions intended to maximize collection.

The following table presents impaired loans, the average investment in impaired loans, and interest income recognized on impaired loans for the years ended December 31, 2011 and 2010:

(in thousands)	December 31, 2011				
	Recorded Balance	Unpaid Contractual Principal Balance	Specific Allowance	Average Investment in Impaired Loans	Interest Income Recognized

Cash basis interest is substantially the same as interest income recognized for the years ended December 31, 2011, 2010, and 2009.

At December 31, 2009, the recorded investment in impaired loans was \$37.6 million. Included in this amount was \$19.2 million of impaired loans for which specific reserves for loan losses were carried in the amount of \$6.6 million. The average investment in impaired loans at December 31, 2009 was \$35.4 million, while interest income of \$0.5 million was recognized.

Included in certain loan categories of impaired loans are certain loans and leases that have been modified in a troubled debt restructuring, where economic concessions have been granted to borrowers who have experienced financial difficulties. These concessions typically result from our loss mitigation activities and could include reductions in the interest rate, payment extensions, forgiveness of principal, forbearance or other actions. Modifications of terms for our loans and their inclusion as troubled debt restructurings are based on individual facts and circumstances. Loan modifications that are included as troubled debt restructurings may involve either an increase or reduction of the interest rate, extension of the term of the loan, or deferral of principal and/or interest payments, regardless of the period of the modification. All of the loans identified as troubled debt restructuring were modified due to financial stress of the borrower. In order to determine if a borrower is experiencing financial difficulty, an evaluation is performed to determine the probability that the borrower will be in payment default on any of its debt in the foreseeable future with the modification. This evaluation is performed under CTBI's internal underwriting policy.

When we modify loans and leases in a troubled debt restructuring, we evaluate any possible impairment similar to other impaired loans based on the present value of expected future cash flows, discounted at the contractual interest rate of the original loan or lease agreement, or use the current fair value of the collateral, less selling costs for collateral dependent loans. If we determined that the value of the modified loan is less than the recorded investment in the loan (net of previous charge-offs, deferred loan fees or costs and unamortized premium or discount), impairment is recognized through an allowance estimate or a charge-off to the allowance. In periods subsequent to modification, we evaluate all troubled debt restructuring, including those that have payment defaults, for possible impairment and recognize impairment through the allowance.

Restructured loans segregated by class of loans were as follows:

(in thousands)	December 31 2011	December 31 2010
Commercial:		
Commercial construction	\$5,464	\$2,973
Commercial secured by real estate	18,881	2,511
Commercial other	2,445	1,156
Residential:		
Real estate construction	27	0
Real estate mortgage	82	0
Consumer:		
Consumer direct	92	0
Consumer indirect	112	0
Total restructured loans	\$27,104	\$6,640

As of December 31, 2011, commitments to extend credit of \$0.5 million and a standby letter of credit in the amount of \$0.8 million were outstanding and are not included in the above table.

During 2011, certain loans were modified in troubled debt restructurings, where economic concessions were granted to borrowers consisting of reductions in the interest rates, payment extensions, forgiveness of principal, and forbearances. Presented below, segregated by class of loans, are troubled debt restructurings that occurred during the year ended December 31, 2011:

(in thousands)	Year Ended December 31, 2011		
	Number of Loans	Post-Modification Outstanding Balance	Net Charge-offs Resulting from Modification
Commercial:			
Commercial construction	7	\$ 3,457	\$ 0
Commercial secured by real estate	19	17,497	0
Commercial other	13	2,068	(1)
Residential:			
Real estate construction	1	28	0
Real estate mortgage	2	82	0
Consumer:			
Consumer direct	8	93	0
Consumer indirect	8	112	0
Total troubled debt restructurings	58	\$ 23,337	\$ (1)

In the preceding table, additional specific reserves were allocated for loan modifications to the following loan classifications: \$200 thousand for one loan modification in commercial other and \$11 thousand for two loan modifications in commercial secured by real estate.

Presented below, segregated by class of loans, are troubled debt restructurings that were performing in accordance with their modified terms. CTBI considers a troubled debt restructuring to be performing in accordance with its

modified terms if the loan is not past due 30 days or more as of the reporting date.

(in thousands)	December 31 2011	December 31 2010
Commercial:		
Commercial construction	\$1,323	\$1,633
Commercial secured by real estate	16,082	2,427
Commercial other	390	771
Residential:		
Real estate construction	0	0
Real estate mortgage	0	0
Consumer:		
Consumer direct	59	0
Consumer indirect	112	0
Total current restructured loans	\$17,966	\$4,831

Loans retain their accrual status at the time of their modification. As a result, if a loan is on nonaccrual at the time it is modified, it stays as nonaccrual, and if a loan is on accrual at the time of the modification, it generally stays on accrual. Commercial and consumer loans modified in a troubled debt restructuring are closely monitored for delinquency as an early indicator of possible future default. If loans modified in a troubled debt restructuring subsequently default, CTBI evaluates the loan for possible further impairment. The allowance for loan losses may be increased, adjustments may be made in the allocation of the allowance, or partial charge-offs may be taken to further write-down the carrying value of the loan. Presented below, segregated by class of loans, are loans that were modified as troubled debt restructurings within the previous 12 months which have subsequently defaulted. CTBI considers a loan in default when it is 90 days or more past due or transferred to nonaccrual.

(in thousands)	Year Ended December 31, 2011	
	Number of Loans	Recorded Balance
Commercial:		
Commercial construction	2	\$3,913
Commercial secured by real estate	2	1,669
Commercial other	6	1,280
Residential:		
Real estate construction	0	0
Real estate mortgage	0	0
Consumer:		
Consumer direct	1	7
Consumer indirect	0	0
Total defaulted restructured loans	11	\$6,869

6. Mortgage Banking Activities

Mortgage banking activities primarily include residential mortgage originations and servicing. As discussed in note 1 above, mortgage servicing rights ("MSRs") are carried at fair market value. The fair value is determined quarterly based

on an independent third-party valuation using a discounted cash flow analysis and calculated using a computer pricing model. The system used in this evaluation, Compass Point, attempts to quantify loan level idiosyncratic risk by calculating a risk derived value. As a result, each loan's unique characteristics determine the valuation assumptions ascribed to that loan. Additionally, the computer valuation is based on key economic assumptions including the prepayment speeds of the underlying loans generated using the Andrew Davidson Prepayment Model, FHLMC/FNMA guidelines, the weighted-average life of the loan, the discount rate, the weighted-average coupon, and the weighted-average default rate, as applicable. Along with the gains received from the sale of loans, fees are received for servicing loans. These fees include late fees, which are recorded in interest income, and ancillary fees and monthly servicing fees, which are recorded in noninterest income. Costs of servicing loans are charged to expense as incurred. Changes in fair market value of the MSR's are reported as an increase or decrease to mortgage banking income.

The following table presents the components of mortgage banking income:

(in thousands)			
Year Ended December 31	2011	2010	2009
Net gain on sale of loans held for sale	\$1,749	\$1,642	\$4,324
Net loan servicing income (expense)			
Servicing fees	1,072	1,110	1,040
Late fees	77	74	72
Ancillary fees	278	269	512
Fair value adjustments	(1,405)	(769)	(107)
Net loan servicing income (expense)	22	684	1,517
Mortgage banking income	\$1,771	\$2,326	\$5,841

Mortgage loans serviced for others are not included in the accompanying balance sheets. Loans serviced for the benefit of others (primarily FHLMC) totaled \$425 million at December 31, 2011 and 2010 and \$431 million at December 31, 2009. Servicing loans for others generally consists of collecting mortgage payments, maintaining escrow accounts, disbursing payments to investors, and processing foreclosures. Custodial escrow balances maintained in connection with the foregoing loan servicing, and included in demand deposits, were approximately \$579 thousand, \$485 thousand, and \$556 thousand at December 31, 2011, 2010, and 2009, respectively.

Activity for capitalized mortgage servicing rights using the fair value method is as follows:

(in thousands)			
	2011	2010	2009
Fair value of MSR's, beginning of period	\$3,161	\$3,406	\$2,168
New servicing assets created	526	524	1,345
Change in fair value during the period due to:			
Time decay (1)	(124)	(161)	(136)
Payoffs (2)	(439)	(190)	(579)
Changes in valuation inputs or assumptions (3)	(842)	(418)	608
Fair value of MSR's, end of period	\$2,282	\$3,161	\$3,406

(1) Represents decrease in value due to regularly scheduled loan principal payments and partial loan paydowns.

(2) Represents decrease in value due to loans that paid off during the period.

(3) Represents change in value resulting from market-driven changes in interest rates.

The fair values of capitalized mortgage servicing rights were \$2.3 million, \$3.2 million, and \$3.4 million at December 31, 2011, 2010, and 2009, respectively. Fair values for the years ended December 31, 2011, 2010, and 2009 were determined by management using third-party valuations. Major assumptions used included a discount rate of 10.00% for each year, respectively, and weighted average default rates of 2.61%, 2.0%, and 1.9%, respectively. Prepayment

speeds generated using the Andrew Davidson Prepayment Model averaged 19.2%, 13.3%, and 13.6% at December 31, 2011, 2010, and 2009, respectively. These assumptions are prepared by the third party provider and reviewed and approved by management prior to final determination of the fair value. MSR values are very sensitive to movement in interest rates as expected future net servicing income depends on the projected balance of the underlying loans, which can be greatly impacted by the level of prepayments. CTBI does not currently hedge against changes in the fair value of its MSR portfolio.

7. Related Party Transactions

In the ordinary course of business, CTB has made extensions of credit and had transactions with certain directors and executive officers of CTBI or our subsidiaries, including their associates (as defined by the Securities and Exchange Commission). We believe such extensions of credit and transactions were made on substantially the same terms, including interest rate and collateral, as those prevailing at the same time for comparable transactions with other persons.

Activity for related party transactions during 2011 and 2010 is as follows:

(in thousands)	2011	2010
Related party extensions of credit, beginning of period	\$19,545	\$18,393
New loans	5,295	2,794
Repayments	(1,281)	(2,065)
Decrease due to changes in related parties	(699)	423
Related party extensions of credit, end of period	\$22,860	\$19,545

The aggregate balances of related party deposits at December 31, 2011 and 2010 were \$20.7 million and \$16.8 million, respectively.

A director of CTBI is a shareholder in a law firm that provides services to CTBI and its subsidiaries. The total of those payments for legal services for the years ended December 31, 2011, 2010, and 2009 were \$1.4 million, \$1.1 million, and \$1.1 million, respectively.

8. Allowance for Loan and Lease Losses

Activity in the allowance for loan and lease losses (ALLL) was as follows:

(in thousands)	2011	2010	2009
ALLL balance, beginning of year	\$34,805	\$32,643	\$30,821
Provision charged to operations	13,262	16,484	17,468
Recoveries	2,638	3,314	3,213
Charge-offs	(17,534)	(17,636)	(18,859)
ALLL balance, end of year	\$33,171	\$34,805	\$32,643

The following tables present the balance in the allowance for loan losses and the recorded investment in loans based on portfolio segment and impairment method as of December 31, 2011 and 2010:

Ending balance:

Individually evaluated for impairment	\$15,841	\$32,691	\$13,037	\$0	\$790	\$950	\$0	\$0	\$0	\$63,309
Collectively evaluated for impairment	\$119,250	\$774,358	\$375,709	\$14,151	\$56,120	\$622,901	\$85,103	\$126,046	\$368,233	\$2,541,871

9. Premises and Equipment

Premises and equipment are summarized as follows:

(in thousands)

December 31	2011	2010
Land and buildings	\$75,240	\$75,319
Leasehold improvements	5,113	5,022
Furniture, fixtures, and equipment	46,463	43,967
Construction in progress	621	928
	127,437	125,236
Less accumulated depreciation and amortization	(73,140)	(69,893)
Total premises and equipment	\$54,297	\$55,343

Depreciation and amortization of premises and equipment for 2011, 2010, and 2009 was \$4.0 million, \$4.0 million, and \$4.6 million, respectively.

10. Other Real Estate Owned

Activity for other real estate owned was as follows:

(in thousands)	2011	2010
----------------	------	------

Beginning balance of other real estate owned	\$42,935	\$37,333
Transfers in at lower of cost or fair value less estimated costs to sell	31,536	11,806
Additional investment	744	225
Fair value adjustments charged to expense	(6,464)	(689)
Sale of assets	(11,786)	(8,466)
Properties acquired through acquisition	0	2,726
Ending balance of other real estate owned	\$56,965	\$42,935

Foreclosed properties at December 31, 2011 and 2010 were \$56.5 million and \$42.9 million, respectively. Also included in other real estate owned is a \$0.4 million property which was not acquired through foreclosure. Carrying costs and fair value adjustments associated with foreclosed properties were \$8.6 million, \$2.6 million, and \$3.3 million for 2011, 2010, and 2009, respectively. See note 1 for a description of our accounting policies relative to foreclosed properties and other real estate owned.

11. Deposits

Major classifications of deposits are categorized as follows:

(in thousands)		
December 31	2011	2010
Noninterest bearing deposits	\$584,735	\$525,478
NOW accounts	19,113	33,641
Money market deposits	556,765	450,289
Savings	264,271	229,466
Certificates of deposit and other time deposits of \$100,000 or more	693,655	653,629
Certificates of deposit and other time deposits less than \$100,000	759,820	813,614
Total deposits	\$2,878,359	\$2,706,117

Interest expense on deposits is categorized as follows:

(in thousands)	2011	2010	2009
Savings, NOW, and money market accounts	\$2,824	\$3,074	\$4,002
Certificates of deposit and other time deposits of \$100,000 or more	8,778	11,695	15,059
Certificates of deposit and other time deposits less than \$100,000	9,680	14,383	20,732
Total interest expense on deposits	\$21,282	\$29,152	\$39,793

Maturities of certificates of deposits and other time deposits are presented below:

	Maturities by Period at December 31, 2011						
(in thousands)	Total	Within 1 Year	2 Years	3 Years	4 Years	5 Years	After 5 Years
Certificates of deposit and other time deposits of \$100,000 or more	\$693,655	\$627,864	\$38,073	\$11,880	\$3,882	\$11,761	\$195
Certificates of deposit and other time deposits less than \$100,000	759,820	682,731	48,064	14,127	4,901	8,930	1,067
Total maturities	\$1,453,475	\$1,310,595	\$86,137	\$26,007	\$8,783	\$20,691	\$1,262

12. Advances from Federal Home Loan Bank

Federal Home Loan Bank advances consisted of the following monthly amortizing and term borrowings at December 31:

(in thousands)	2011	2010
Monthly amortizing	\$1,609	\$1,238
Term	20,000	20,000
Total FHLB advances	\$21,609	\$21,238

The advances from the FHLB that require monthly principal payments were due for repayment as follows:

Principal Payments Due by Period at December 31, 2011							
(in thousands)	Total	Within 1 Year	2 Years	3 Years	4 Years	5 Years	After 5 Years
Outstanding advances, weighted average interest rate – 2.20%	\$1,609	\$194	\$138	\$116	\$114	\$111	\$936

At December 31, 2010, CTBI had monthly amortizing FHLB advances totaling \$1.2 million at a weighted average interest rate of 3.51%.

The term advances that require the total payment to be made at maturity follow:

(in thousands)	2011	2010
December 31		
Advance #158, 0.37%, due 1/24/11	\$0	\$20,000
Advance #271, 0.25%, due 1/18/12	20,000	0
Total term advances	\$20,000	\$20,000

Advances totaling \$21.6 million at December 31, 2011 were collateralized by FHLB stock of \$25.7 million and a blanket lien on qualifying first mortgage loans. As of December 31, 2011, CTBI had a \$399.4 million FHLB borrowing capacity with \$21.6 million in advances and \$118.5 million in letters of credit used for public fund pledging leaving \$259.3 million available for additional advances. The advances had fixed interest rates ranging from 0.00% to 7.42% with a weighted average rate of 0.39%. The advances are subject to restrictions or penalties in the event of prepayment. Advance #271 matured and was paid off on January 18, 2012.

13. Borrowings

Short-term debt is categorized as follows:

(in thousands)	2011	2010
December 31		
Subsidiaries:		
Repurchase agreements	\$217,177	\$188,275
Federal funds purchased	13,104	9,680
Total short-term debt	\$230,281	\$197,955

All federal funds purchased and the majority of repurchase agreements mature and reprice daily. The average rates paid for federal funds purchased and repurchase agreements on December 31, 2011 were 0.15% and 0.65%, respectively.

The maximum balance for repurchase agreements at any month-end during 2011 occurred at September 30, 2011, with a month-end balance of \$229.0 million. The average balance of repurchase agreements for the year was \$205.3 million.

Long-term debt is categorized as follows:

(in thousands)	2011	2010
December 31		
Parent:		
Junior subordinated debentures, 6.52%, due 6/1/37	\$61,341	\$61,341

On March 31, 2007, CTBI issued \$61.3 million in junior subordinated debentures to a newly formed unconsolidated Delaware statutory trust subsidiary which in turn issued \$59.5 million of capital securities in a private placement to institutional investors. The debentures, which mature in 30 years but are redeemable at par at CTBI's option after five years, were issued at a rate of 6.52% until June 1, 2012, and thereafter at a floating rate based on the three-month LIBOR plus 1.59%. The underlying capital securities were issued at the equivalent rates and terms. The proceeds of the debentures were used to fund the redemption on April 2, 2007 of all CTBI's outstanding 9.0% and 8.25% junior subordinated debentures in the total amount of \$61.3 million.

On October 27, 2011, Community Trust Bancorp, Inc. entered into a revolving credit promissory note for a line of credit in the amount of \$12 million at a floating interest rate of 2.25% in excess of the one-month LIBOR Rate, with an unused commitment fee of 0.15%. Currently, all \$12 million remain available for general corporate purposes. The agreement, which was effective October 27, 2011, replaced the agreement dated October 28, 2010, and will mature on October 26, 2012.

14. Income Taxes

The components of the provision for income taxes, exclusive of tax effect of unrealized securities gains, are as follows:

(in thousands)	2011	2010	2009
Current income tax expense	\$16,905	\$14,393	\$7,684
Deferred income tax expense (benefit)	(94)	219	2,918
Total income tax expense	\$16,811	\$14,612	\$10,602

A reconciliation of income tax expense at the statutory rate to our actual income tax expense is shown below:

(in thousands)	2011			2010			2009		
Computed at the statutory rate	\$19,602	35.23	%	\$16,818	35.71	%	\$12,577	35.41	%
Decrease resulting from:									
Tax-exempt interest	(948)	(1.70))	(806)	(1.71))	(739)	(2.08))
Housing and new markets credits	(1,007)	(1.81))	(507)	(1.08))	(654)	(1.84))
Dividends received deduction	(183)	(0.33))	(172)	(0.36))	(188)	(0.53))
Bank owned life insurance	(470)	(0.85))	(477)	(1.01))	(342)	(0.96))
ESOP dividend deduction	(262)	(0.47))	(245)	(0.53))	(230)	(0.65))
Other, net	79	0.14		1	0.01		178	0.50	

Edgar Filing: COMMUNITY TRUST BANCORP INC /KY/ - Form 10-K

Total \$16,811 30.21 % \$14,612 31.03 % \$10,602 29.85 %

The components of the net deferred tax liability as of December 31 are as follows:

(in thousands)	2011	2010
Deferred tax assets:		
Allowance for loan and lease losses	\$11,610	\$12,852
Interest on nonperforming loans	883	1,427
Accrued expenses	356	582
Dealer reserve valuation	982	1,119
Allowance for other real estate owned	3,964	1,755
Write-down of auction rate securities	3,969	4,162
Other	317	688
Total deferred tax assets	22,080	22,585
Deferred tax liabilities:		
Depreciation and amortization	(16,852)	(14,624)
FHLB stock dividends	(4,956)	(4,985)
Loan fee income	(1,092)	(1,288)
Mortgage servicing rights	(799)	(1,106)
Capitalized lease obligations	(766)	(2,275)
Unrealized gains on AFS securities	(6,088)	(2,710)
Purchase accounting adjustments	0	(354)
Other	(1,028)	(1,460)
Total deferred tax liabilities	(31,581)	(28,802)
Net deferred tax liability	\$(9,501)	\$(6,217)

CTBI accounts for income taxes in accordance with income tax accounting guidance (ASC 740, Income Taxes). The income tax accounting guidance results in two components of income tax expense: current and deferred. Current income tax expense reflects taxes to be paid or refunded for the current period by applying the provisions of the enacted tax law to the taxable income or excess of deductions over revenues. CTBI determines deferred income taxes using the liability (or balance sheet) method. Under this method, the net deferred tax asset or liability is based on the tax effects of the differences between the book and tax bases of assets and liabilities, and enacted changes in tax rates and laws are recognized in the period in which they occur. Deferred income tax expense results from changes in deferred tax assets and liabilities between periods. Deferred tax assets are reduced by a valuation allowance if, based on the weight of evidence available, it is more likely than not that some portion or all of a deferred tax asset will not be realized.

Uncertain tax positions are recognized if it is more likely than not, based on the technical merits, that the tax position will be realized or sustained upon examination. The term more likely than not means a likelihood of more than 50 percent; the terms examined and upon examination also include resolution of the related appeals or litigation processes, if any. A tax position that meets the more-likely-than-not recognition threshold is initially and subsequently measured as the largest amount of tax benefit that has a greater than 50 percent likelihood of being realized upon settlement with a taxing authority that has full knowledge of all relevant information. The determination of whether or not a tax position has met the more-likely-than-not recognition threshold considers the facts, circumstances, and information available at the reporting date and is subject to management's judgment.

With a few exceptions, CTBI is no longer subject to U.S. federal tax examinations by tax authorities for years before 2009, and state and local income tax examinations by tax authorities for years before 2007. For federal tax purposes, CTBI recognizes interest and penalties on income taxes as a component of income tax expense.

CTBI files consolidated income tax returns with its subsidiaries.

A reconciliation of the beginning and ending amounts of unrecognized tax benefits under ASC 740 is shown below:

(in thousands)	2011	2010
Balance at January 1	\$163	\$409
Additions based on tax positions related to current year	0	0
Additions for tax positions of prior years	0	20
Reductions for tax positions of prior years	0	(266)
Balance at December 31	\$163	\$163

15. Employee Benefits

CTBI maintains two separate retirement savings plans, a 401(k) Plan and an Employee Stock Ownership Plan (“ESOP”).

The 401(k) Plan is available to all employees (age 21 and over) with one year of service and who work at least 1,000 hours per year. Participants in the plan have the option to contribute from 1% to 15% of their annual compensation. CTBI matches 50% of participant contributions up to 4% of gross pay. CTBI may at its discretion, contribute an additional percentage of covered employees’ compensation. CTBI’s matching contributions were \$0.9 million for each of the years ended December 31, 2011, 2010, and 2009. The 401(k) Plan owned 531,361, 507,932, and 533,473 shares of CTBI’s common stock at December 31, 2011, 2010, and 2009, respectively. Substantially all shares owned by the 401(k) were allocated to employee accounts on those dates. The market price of the shares at the date of allocation is essentially the same as the market price at the date of purchase.

The ESOP Plan has the same entrance requirements as the 401(k) Plan above. CTBI currently contributes 4% of covered employees’ gross compensation to the ESOP. The ESOP uses the contributions to acquire shares of CTBI’s common stock. CTBI’s contributions to the ESOP were \$1.4 million, \$1.3 million, and \$1.3 million for the years ending December 31, 2011, 2010, and 2009, respectively. The ESOP owned 661,691, 647,158, and 623,392 shares of CTBI’s common stock at December 31, 2011, 2010, and 2009, respectively. Substantially all shares owned by the ESOP were allocated to employee accounts on those dates. The market price of the shares at the date of allocation is essentially the same as the market price at the date of purchase.

Stock-Based Compensation:

CTBI currently maintains one active and one inactive incentive stock option plan covering key employees. The 2006 Stock Ownership Incentive Plan (“2006 Plan”) was approved by the Board of Directors and the shareholders in 2006. The 1998 Stock Option Plan (“1998 Plan”) was approved by the Board of Directors and the shareholders in 1998. The 1998 Plan was rendered inactive as of April 26, 2006. The 2006 Plan had 1,500,000 shares authorized, 1,244,795 of which were available at December 31, 2011 for future grants. In addition, any shares reserved for issuance under the 1998 Stock Option Plan (“1998 Plan”) in excess of the number of shares as to which options or other benefits are awarded thereunder, plus any shares as to which options or other benefits granted under the 1998 Plan may lapse, expire, terminate or be canceled, shall also be reserved and available for issuance or reissuance under the 2006 Plan. As of December 31, 2011, the 1998 Plan had 1,046,831 shares authorized, 197,924 of which were transferred to the 2006 Plan. The total shares available for issuance under the 2006 Plan as of December 31, 2011 was 1,442,719. The following table provides detail of the number of shares to be issued upon exercise of outstanding stock-based awards and remaining shares available for future issuance under all of CTBI’s equity compensation plans as of December 31, 2011:

Plan Category (shares in thousands)

	Number of Shares to Be Issued Upon Exercise/Vesting	Weighted Average Price (\$)	Shares Available for Future Issuance
Equity compensation plans approved by shareholders:			
Stock options	474	29.33	1,443 (a)
Restricted stock	97 (c)	27.91	(a)
Performance units	(d)	(b)	(a)
Stock appreciation rights ("SARs")	(e)	(b)	(a)
Total			1,443

(a) Under the 2006 Plan, 1.5 million shares (plus any shares reserved for issuance under the 1998 Stock Option Plan) were authorized for issuance as nonqualified and incentive stock options, SARs, restricted stock and performance units. As of December 31, 2011, the above shares remained available for issuance.

(b) Not applicable

(c) The maximum number of shares of Restricted Stock that may be granted is 400,000 shares, and the maximum that may be granted to a participant during any calendar year is 40,000 shares.

(d) No performance units had been issued as of December 31, 2011. The maximum payment that can be made pursuant to Performance Units granted to any one Participant in any calendar year shall be \$250,000.

(e) No SARs have been issued. The maximum number of shares with respect to which SARs may be granted to a Participant during any calendar year shall be 100,000 shares.

The following table details the shares available for future issuance under the 2006 Plan at December 31, 2011.

Plan Category (shares in thousands)	Shares Available for Future Issuance
Shares available at January 1, 2011	1,420,778
1998 Plan forfeitures in 2011	42,713
2006 Plan stock option issuances in 2011	0
2006 Plan restricted stock issuances in 2011	(45,542)
2006 Plan forfeitures in 2011	24,770
Shares available for future issuance	1,442,719

CTBI uses a Black-Scholes option pricing model with the following weighted average assumptions, which are evaluated and revised as necessary, in estimating the grant-date fair value of each option grant for the year end:

	2011	2010	2009
Expected option life (in years)	--	7.5	7.5
Expected volatility	--	0.391	0.371
Expected dividend yield	--	4.78 %	4.02 %
Risk-free interest rate	--	3.139 %	2.23 %

The expected option life is derived from the "safe-harbor" rules for estimating option life in ASC 718, Share-Based Payment. The expected volatility is based on historical volatility of the stock using a historical look back that approximates the expected life of the option grant. The interest rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of the grant. CTBI's stock-based compensation expense for the years 2011, 2010, and 2009 was \$0.7 million, \$0.8 million, and \$0.5 million, respectively. Dividends paid on restricted stock shares was \$120 thousand, \$74 thousand, and \$20 thousand, respectively, for the same

periods.

CTBI's stock option activity for the 2006 Plan for the years ended December 31, 2011, 2010, and 2009 is summarized as follows:

December 31	2011		2010		2009	
	Options	Weighted Average Exercise Price	Options	Weighted Average Exercise Price	Options	Weighted Average Exercise Price
Outstanding at beginning of year	177,125	\$34.61	174,678	\$34.85	165,678	\$35.12
Granted	0	--	4,525	25.09	9,000	29.82
Exercised	0	--	0	--	0	--
Forfeited/expired	(24,554)	34.84	(2,078)	33.83	0	--
Outstanding at end of year	152,571	\$34.57	177,125	\$34.61	174,678	\$34.85
Exercisable at end of year	101,092	\$37.81	90,962	\$37.70	55,717	\$38.43

A summary of the status of CTBI's 2006 Plan for nonvested shares as of December 31, 2011, and changes during the year ended December 31, 2011, is presented as follows:

	Shares	Weighted Average Grant Date Fair Value
Nonvested Shares		
Nonvested at January 1, 2011	86,163	\$8.35
Granted	0	--
Vested	(10,130)	12.89
Forfeited	(24,554)	10.29
Nonvested at December 31, 2011	51,479	\$6.53

The 2006 Plan had options with the following remaining lives at December 31, 2011:

2006 Option Plan		
Remaining Life	Outstanding Options	Weighted Average Price
Five years	89,846	\$38.95
Six years	49,200	28.32
Seven years	9,000	29.82
Eight years	4,525	25.09
Total outstanding	152,571	
Weighted average price		\$34.57

No stock options were granted during 2011. The weighted-average fair value of options granted from the 2006 Plan during the years 2010 and 2009 was \$0.03 million or \$6.53 per share and \$0.10 million or \$7.69 per share, respectively.

The intrinsic values of in-the-money exercisable and outstanding stock options in the 2006 Plan were \$0.04 million and \$0.34 million, respectively, at December 31, 2011. No stock options were exercised in the 2006 Plan during 2011. There was no intrinsic value of options exercised, exercisable, or outstanding for the years ended December 31,

Edgar Filing: COMMUNITY TRUST BANCORP INC /KY/ - Form 10-K

2010 and 2009 in the 2006 Plan, as the exercise price exceeded the year-end fair value of the stock.

The following table shows restricted stock activity for the years ended December 31, 2011, 2010, and 2009:

December 31	2011		2010		2009	
	Grants	Weighted Average Fair Value	Grants	Weighted Average Fair Value	Grants	Weighted Average Fair Value
Outstanding at beginning of year	52,834	\$26.10	16,786	\$28.83	11,076	\$28.32
Granted	45,542	30.09	44,996	25.09	5,710	29.82
Exercised	(1,617)	30.09	(4,474)	26.14	0	--
Forfeited/expired	(216)	30.09	(4,474)	26.14	0	--
Outstanding at end of year	96,543	\$27.91	52,834	\$26.10	16,786	\$28.83
Exercisable at end of year	0	--	0	--	0	--

During 2011 and 2010, the Compensation Committee of the Board of Directors approved the accelerated vesting of restricted stock grants of certain employees who had retired. The total amount of restricted stock grants for which vesting was accelerated during the years 2011 and 2010 was 1,617 shares at a weighted average fair value of \$30.09 and 4,474 shares at a weighted average fair value of \$26.14, respectively. During 2010, the Compensation Committee also approved the accelerated vesting of regular stock options consisting of 5,215 shares with an option price of \$38.95 and 3,750 shares with an option price of \$28.32.

CTBI's stock option activity for the 1998 Plan for the years ended December 31, 2011, 2010, and 2009 is summarized as follows:

December 31	2011		2010		2009	
	Options	Weighted Average Exercise Price	Options	Weighted Average Exercise Price	Options	Weighted Average Exercise Price
Outstanding at beginning of year	371,077	\$27.07	420,731	\$25.64	500,454	\$23.91
Granted	0	--	0	--	0	--
Exercised	(6,824)	19.63	(48,730)	14.66	(79,723)	14.75
Forfeited/expired	(42,713)	29.94	(924)	32.44	0	--
Outstanding at end of year	321,540	\$26.85	371,077	\$27.07	420,731	\$25.64
Exercisable at end of year	321,540	\$26.85	361,077	\$26.92	386,498	\$25.03

The 1998 Plan had options with the following remaining lives at December 31, 2011:

1998 Option Plan		
Remaining Life	Outstanding Options	Weighted Average Price
One year or less	74,819	\$18.94
Two years	39,062	20.99
Three years	48,950	27.62
Four years	69,786	30.88
Five years	88,923	32.44

Total outstanding	321,540
Weighted average price	\$26.84

The following table shows the intrinsic values of options exercised, exercisable, and outstanding for the 1998 Plan for the years ended December 31, 2011, 2010, and 2009:

(in thousands)	2011	2010	2009
Options exercised	\$27	\$627	\$1,017
Options exercisable	833	1,206	1,057
Outstanding options	833	1,206	1,057

A summary of the status of CTBI's 1998 Plan nonvested shares as of December 31, 2011 and changes during the year ended December 31, 2011 is presented below:

	Shares	Weighted Average Grant Date Fair Value
Nonvested Shares		
Nonvested at January 1, 2011	10,000	\$10.51
Granted	0	--
Vested	(10,000)	10.51
Forfeited	0	--
Nonvested at December 31, 2011	0	\$--

As of December 31, 2011, there was \$1.7 million of total unrecognized compensation cost related to nonvested share-based compensation arrangements granted under the plans. That cost is expected to be recognized over a weighted-average period of 1.8 years. The total unrecognized compensation cost related to nonvested share-based compensation arrangements granted as of December 31, 2010 and 2009 was \$1.0 million and \$0.5 million, respectively. The total grant-date fair value of shares vested during the years ended December 31, 2011, 2010, and 2009, was \$0.3 million, \$0.7 million, and \$1.3 million, respectively. Cash received from option exercises under all share-based payment arrangements for the years ended December 31, 2011, 2010, and 2009 was \$0.1 million, \$0.7 million, and \$1.2 million, respectively. The actual tax benefit realized for the tax deductions from option exercises of the share-based payment arrangements totaled \$22 thousand, \$0.2 million, and \$0.4 million, respectively, for the years ended December 31, 2011, 2010, and 2009.

16. Operating Leases

Certain premises and equipment are leased under operating leases. Additionally, certain premises are leased or subleased to third parties. These leases generally contain renewal options and require CTBI to pay all executory costs, such as taxes, maintenance fees, and insurance. Minimum non-cancellable rental payments and rental receipts are as follows:

(in thousands)	Payments	Receipts
2012	\$1,533	\$325
2013	1,252	81
2014	747	45
2015	533	28
2016	331	23
Thereafter	2,696	0
Total	\$7,092	\$502

Rental expense net of rental income under operating leases was \$0.9 million for 2011 and \$0.7 million for each of the years 2010 and 2009.

17. Fair Market Value of Financial Instruments

The following table presents the carrying amounts and estimated fair values of financial instruments at December 31, 2011 and 2010:

(in thousands) December 31	2011		2010	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
Financial assets				
Cash and cash equivalents	\$238,481	\$238,481	\$158,983	\$158,983
Certificates of deposit in other banks	11,875	11,860	14,762	14,775
Securities available-for-sale	527,398	527,398	338,675	338,675
Securities held-to-maturity	1,662	1,661	1,662	1,662

Financial liabilities				
Deposits	\$2,878,359	\$2,879,722	\$2,706,117	\$2,690,960
Repurchase agreements	217,177	217,062	188,275	186,989
Federal funds purchased	13,104	13,104	9,680	9,680
Advances from Federal Home Loan Bank	21,609	21,617	21,238	21,213
Long-term debt	61,341	31,030	61,341	30,894
Accrued interest payable	2,171	2,171	2,848	2,848
Unrecognized financial instruments				
Letters of credit	\$0	\$0	\$0	\$0
Commitments to extend credit	0	0	0	0
Forward sale commitments	0	0	0	0

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practicable to estimate that value:

Cash and cash equivalents – The carrying amount approximates fair value.

Certificates of deposit in other banks – Fair values are based on quoted market prices or dealer quotes.

Securities – Fair values are based on quoted market prices, if available. If a quoted price is not available, fair value is estimated using quoted prices for similar securities. The fair value estimate is provided to management from a third party using modeling assumptions specific to each type of security that are reviewed and approved by management. Quarterly sampling of fair values provided by additional third parties supplement the fair value review process.

Loans held for sale – The fair value is predetermined at origination based on sale price.

Loans (net of the allowance for loan and lease losses) – The fair value of fixed rate loans and variable rate mortgage loans is estimated by discounting the future cash flows using current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. For other variable rate loans, the carrying amount approximates fair value. Loans acquired through acquisition were booked at their fair value on their date of acquisition. Management utilized a third party to assist in the valuation of the acquired loans and considered such factors as coupon rate on the acquired loans versus the current rate for similar instruments on the date of acquisition, weighted average expected life and expected loss rates using both national and regional loss rates on similar loans, and the historic loss rates on the pools of loans acquired.

Federal Home Loan Bank stock – The carrying value of Federal Home Loan Bank stock approximates fair value based on the redemption provisions of the Federal Home Loan Bank.

Federal Reserve Bank stock – The carrying value of Federal Reserve Bank stock approximates fair value based on the redemption provisions of the Federal Reserve Bank.

Accrued interest receivable – The carrying amount approximates fair value.

Mortgage servicing rights – The fair value is determined quarterly based on an independent third-party valuation using a discounted cash flow analysis and calculated using a computer pricing model. The computer valuation is based on key economic assumptions including the prepayment speeds of underlying loans, the weighted-average life of the loan, the discount rate, the weighted-average coupon, and the weighted-average default rate, as applicable.

Deposits – The fair value of fixed maturity time deposits is estimated by discounting the future cash flows using the rates currently offered for deposits of similar remaining maturities. For deposits including demand deposits, savings accounts, NOW accounts, and certain money market accounts, the carrying value approximates fair value.

Repurchase agreements – The fair value is estimated by discounting future cash flows using current rates.

Federal funds purchased – The carrying amount approximates fair value.

Advances from Federal Home Loan Bank – The fair value of these fixed-maturity advances is estimated by discounting future cash flows using rates currently offered for advances of similar remaining maturities.

Long-term debt – The fair value is estimated by discounting future cash flows using current rates.

Accrued interest payable – The carrying amount approximates fair value.

Commitments to originate loans, forward sale commitments, letters of credit, and lines of credit – The fair value of commitments to originate loans is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed-rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The fair value of forward sale commitments is estimated based on current market prices for loans of similar terms and credit quality. The fair values of letters of credit and lines of credit are based on fees currently charged for similar agreements or on the estimated cost to terminate or otherwise settle the obligations with the counterparties at the reporting date. The fair values of these commitments are not material.

Fair Value Measurements

ASC 820, Fair Value Measurements, defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. ASC 820 applies whenever

other standards require (or permit) assets or liabilities to be measured at fair value but does not expand the use of fair value in any new circumstances. In this standard, the FASB clarifies the principle that fair value should be based on the assumptions market participants would use when pricing the asset or liability. In support of this principle, ASC 820 establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. The fair value hierarchy is as follows:

Level 1 Inputs – Quoted prices in active markets for identical assets or liabilities.

Level 2 Inputs - Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals.

Level 3 Inputs - Unobservable inputs for determining the fair values of assets or liabilities that reflect an entity's own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.

A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below. These valuation methodologies were applied to all of CTBI's financial assets carried at fair value. The following tables present information about CTBI's assets measured at fair value on a recurring and nonrecurring basis as of December 31, 2011 and December 31, 2010, and indicates the fair value hierarchy of the valuation techniques and inputs utilized by CTBI to determine such fair value. CTBI had no liabilities measured at fair value as of December 31, 2011 and December 31, 2010.

(in thousands)	Fair Value Measurements at December 31, 2011 Using			
	Fair Value December 31 2011	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets Measured – Recurring Basis

Total recurring assets measured at fair value	\$341,836	\$20,102	\$318,362	\$ 3,372
Assets Measured – Nonrecurring Basis				
Impaired loans (collateral dependent)	\$16,589	\$0	\$0	\$ 16,589
Other real estate/assets owned	4,579	0	0	4,579
Total nonrecurring assets measured at fair value	\$21,168	\$0	\$0	\$ 21,168

In general, fair value is based upon quoted market prices, where available. If quoted market prices are not available, fair value is based on internally developed models or obtained from an independent pricing service. While management believes CTBI's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

Available-For-Sale Securities

Securities classified as available-for-sale are reported at fair value on a recurring basis. CTBI's collateralized mortgage obligations and CRA investment funds (included in marketable equity securities) are classified as Level 1 of the valuation hierarchy where quoted market prices are available in the active market on which the individual securities are traded.

If quoted market prices are not available, CTBI obtains fair value measurements from an independent pricing service, such as Interactive Data, which utilizes pricing models to determine fair value measurement. CTBI reviews the pricing quarterly to verify the reasonableness of the pricing. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond's terms and conditions, among other factors. U.S. Treasury and government agencies, state and political subdivisions, U.S. government sponsored agency mortgage-backed securities, and certain marketable equity securities are classified as Level 2 inputs.

The securities owned by CTBI that were measured using Level 3 criteria are auction rate securities (included in marketable equity securities) issued by FNMA. These securities which have been exchanged into public preferred stock are valued at the closing price reported on the active market on which the individual securities are traded. Consideration is also given for the relative illiquidity of these shares. The securities that remain in the auction-rate security structure are valued assuming that they are exchanged into the contractual shares of public preferred stock. Likewise, consideration is given for the uncertainty of the reorganization process currently on-going.

Mortgage Servicing Rights

CTBI records MSRs at fair value on a recurring basis with subsequent remeasurement of MSRs based on change in fair value. In determining fair value, CTBI utilizes the expertise of an independent third party. An estimate of the fair value of CTBI's MSRs is determined by the independent third party utilizing assumptions about factors such as mortgage interest rates, discount rates, mortgage loan prepayment speeds, market trends and industry demand. Management reviews and approves these assumptions prior to final determination of the fair value. All of CTBI's MSRs are classified as Level 3. See note 6 for description of significant inputs.

Impaired Loans (Collateral Dependent)

Loans considered impaired under ASC 310-35, Impairment of a Loan, are loans for which, based on current information and events, it is probable that the creditor will be unable to collect all amounts due according to the contractual terms of the loan agreement. Impaired loans are subject to nonrecurring fair value adjustments to reflect subsequent partial write-downs that are based on the observable market price or current appraised value of the collateral. Year-to-date losses on impaired loans were \$2.6 million and \$5.5 million for the years ended December 31, 2011 and 2010, respectively.

Other Real Estate/Assets Owned

In accordance with the provisions of ASC 360, Property, Plant, and Equipment, long-lived assets held for sale with a carrying amount of \$16.4 million were written down to their fair value less costs to sell during the year. Long-lived assets are subject to nonrecurring fair value adjustments to reflect subsequent partial write-downs that are based on the observable market price or current appraised value of the collateral. Losses on other real estate/assets owned were \$6.5 million and \$0.7 million, respectively, for the years ended December 31, 2011 and 2010.

Following is a reconciliation of the beginning and ending balances of recurring fair value measurements using significant unobservable (Level 3) inputs:

Marketable Equity Securities (in thousands)	2011	2010
Beginning balance, January 1	\$211	\$211
Total realized and unrealized gains and losses:		
Included in net income	0	0
Transfer of securities from Level 3 to Level 2	0	0
Purchases, issuances, and settlements	0	0
Ending balance, December 31	\$211	\$211
Mortgage Servicing Rights (in thousands)	2011	2010
Beginning balance, January 1	\$3,161	\$3,406
Total realized and unrealized gains and losses:		
Included in net income	(842)	(418)
Issuances	526	524
Settlements	(563)	(351)
Ending balance, December 31	\$2,282	\$3,161

There were no transfers in or out of Levels 1, 2, or 3 financial assets for the years ended December 31, 2011 and 2010.

18. Off-Balance Sheet Transactions and Guarantees

CTBI is a party to transactions with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include standby letters of credit and commitments to extend credit

in the form of unused lines of credit. CTBI uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments.

At December 31, CTBI had the following off-balance sheet financial instruments, whose approximate contract amounts represent additional credit risk to CTBI:

(in thousands)	2011	2010
Standby letters of credit	\$50,201	\$54,690
Commitments to extend credit	375,736	376,858
Total off-balance sheet financial instruments	\$425,937	\$431,548

Standby letters of credit represent conditional commitments to guarantee the performance of a third party. The credit risk involved is essentially the same as the risk involved in making loans. At December 31, 2011, we maintained a credit loss reserve of approximately \$5 thousand relating to these financial standby letters of credit. The reserve coverage calculation was determined using essentially the same methodology as used for the allowance for loan and lease losses. Approximately 92% of the total standby letters of credit are secured, with \$39.6 million of the total \$50.2 million secured by cash. Collateral for the remaining secured standby letters of credit varies but is comprised primarily of accounts receivable, inventory, property, equipment, and income-producing properties.

Commitments to extend credit are agreements to originate loans to customers as long as there is no violation of any condition of the contract. At December 31, 2011, a credit loss reserve of \$180 thousand was maintained relating to these commitments. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since a portion of the commitments may expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Each customer's creditworthiness is evaluated on a case-by-case basis. The amount of collateral obtained, if deemed necessary, is based on management's credit evaluation of the counterparty. Collateral held varies, but may include accounts receivable, inventory, property, plant and equipment, commercial real estate, and residential real estate. A portion of the commitments is to extend credit at fixed rates. Fixed rate loan commitments at December 31, 2011 of \$17.1 million had interest rates and terms ranging predominantly from 4.25% to 5.99% and 6 months to 1 year, respectively. These credit commitments were based on prevailing rates, terms, and conditions applicable to other loans being made at December 31, 2011.

Included in our commitments to extend credit, are mortgage loans in the process of origination which are intended for sale to investors in the secondary market. These forward sale commitments are on an individual loan basis that CTBI originates as part of its mortgage banking activities. CTBI commits to sell the loans at specified prices in a future period, typically within 60 days. These commitments are acquired to reduce market risk on mortgage loans in the process of origination and mortgage loans held for sale since CTBI is exposed to interest rate risk during the period between issuing a loan commitment and the sale of the loan into the secondary market. Total mortgage loans in the process of origination amounted to \$5.1 million and \$3.0 million at December 31, 2011 and 2010, respectively, and mortgage loans held for sale amounted to \$0.5 million at both December 31, 2011 and 2010.

19. Concentrations of Credit Risk

CTBI's banking activities include granting commercial, residential, and consumer loans to customers primarily located in eastern, northeastern, central, and south central Kentucky, southern West Virginia, and northeastern Tennessee. CTBI is continuing to manage all components of its portfolio mix in a manner to reduce risk from changes in economic conditions. Concentrations of credit, as defined for regulatory purposes, are reviewed quarterly by management to ensure that internally established limits based on Tier 1 Capital plus the allowance for loan and lease losses are not exceeded. At December 31, 2011 and 2010, our concentrations of hotel/motel industry credits were 37% and 39% of Tier 1 Capital plus the allowance for loan and lease losses, respectively. Lessors of residential buildings and dwellings credits were 33% and 32%, respectively. Lessors of non-residential buildings were 29% and 32%, respectively. Coal mining and related support industries credits were 22% and 28%, respectively. These

percentages are within our internally established limits regarding concentrations of credit.

20. Commitments and Contingencies

CTBI and our subsidiaries, and from time to time, our officers, are named defendants in legal actions arising from ordinary business activities. Management, after consultation with legal counsel, believes any pending actions are without merit or that the ultimate liability, if any, will not materially affect our consolidated financial position or results of operations.

CTBI's income was significantly impacted by a \$3.2 million decrease in the carrying value of two groups of foreclosed properties that were vandalized. Claims have been filed with the insurance carriers and discussions are ongoing. Since no agreement has been reached, the amount of recovery is uncertain.

21. Regulatory Matters

CTBI's principal source of funds is dividends received from our subsidiary bank, Community Trust Bank, Inc. Regulations limit the amount of dividends that may be paid by CTB without prior approval. During 2012, approximately \$19.1 million plus any 2012 net profits can be paid by CTB without prior regulatory approval.

The Federal Reserve Bank adopted quantitative measures which assign risk weightings to assets and off-balance sheet items and also define and set minimum regulatory capital requirements (risk based capital ratios). All banks are required to have a minimum Tier 1 (core capital) leverage ratio of 4% of adjusted quarterly average assets, Tier 1 capital of at least 4% of risk-weighted assets, and total capital of at least 8% of risk-weighted assets. Tier 1 capital consists principally of shareholders' equity including capital-qualifying subordinated debt but excluding unrealized gains and losses on securities available-for-sale, less goodwill and certain other intangibles. Total capital consists of Tier 1 capital plus certain debt instruments and the reserve for credit losses, subject to limitation. Failure to meet certain capital requirements can initiate certain actions by regulators that, if undertaken, could have a direct material effect on our consolidated financial statements. The regulations also define well-capitalized levels of Tier 1 leverage, Tier 1, and total capital as 5%, 6%, and 10%, respectively. We had Tier 1 leverage, Tier 1, and total capital ratios above the well-capitalized levels at December 31, 2011 and 2010. We believe, as of December 31, 2011, CTBI meets all capital adequacy requirements for which it is subject to be defined as well-capitalized under the regulatory framework for prompt corrective action.

Under the current Federal Reserve Board's regulatory framework, certain capital securities offered by wholly owned unconsolidated trust preferred entities of CTBI are included as Tier 1 regulatory capital. On March 1, 2005, the Federal Reserve Board adopted a final rule that allows the continued limited inclusion of trust preferred securities in the Tier 1 capital of bank holding companies ("BHCs"). Under the final rule, trust preferred securities and other restricted core capital elements are subject to stricter quantitative limits. The Board's final rule limits restricted core capital elements to 25 percent of all core capital elements, net of goodwill less any associated deferred tax liability. Amounts of restricted core capital elements in excess of these limits generally may be included in Tier 2 capital. The final rule provided a five-year transition period, which ended March 31, 2009, for application of the quantitative limits. The requirement for trust preferred securities to include a call option has been eliminated, and standards for the junior subordinated debt underlying trust preferred securities eligible for Tier 1 capital treatment have been clarified. The final rule addresses supervisory concerns, competitive equity considerations, and the accounting for trust preferred securities. The final rule also strengthens the definition of regulatory capital by incorporating longstanding Board policies regarding the acceptable terms of capital instruments included in banking organizations' Tier 1 or Tier 2 capital. The final rule did not have a material impact on our regulatory ratios.

Consolidated Capital Ratios

Repayment of investments in and advances to subsidiaries	(96)	(411)	(466)
Additional investment in subsidiaries	0	(17,306)	0

Edgar Filing: COMMUNITY TRUST BANCORP INC /KY/ - Form 10-K

Net cash used in investing activities	(294)	(17,815)	(512)
Cash flows from financing activities:			
Issuance of common stock	1,291	1,875	2,292
Excess tax benefit of stock-based compensation	(23)	(205)	(411)
Dividends paid	(18,742)	(18,332)	(18,124)
Net cash used in financing activities	(17,474)	(16,662)	(16,243)
Net increase (decrease) in cash and cash equivalents	300	(144)	248
Cash and cash equivalents at beginning of year	5,805	5,949	5,701
Cash and cash equivalents at end of year	\$6,105	\$5,805	\$5,949

23. Earnings Per Share

The following table sets forth the computation of basic and diluted earnings per share:

Year Ended December 31	2011	2010	2009
Numerator:			
Net income (in thousands)	\$38,827	\$33,034	\$25,059
Denominator:			
Basic earnings per share:			
Weighted average shares	15,313,081	15,233,858	15,128,777
Diluted earnings per share:			
Dilutive effect of equity grants	51,112	24,936	40,137
Adjusted weighted average shares	15,364,193	15,258,794	15,168,914
Earnings per share:			
Basic earnings per share	\$2.54	\$2.17	\$1.66
Diluted earnings per share	2.53	2.16	1.65

At December 31, 2011, 323,255 stock options at a weighted average price of \$33.02 were outstanding and were not used in the computation of diluted earnings per share because their exercise price was greater than the average market value of the common stock. Unvested restricted stock grants were also used in the calculation of diluted earnings per share based on the treasury method. At December 31, 2010, 422,972 stock options at a price of \$32.36 were outstanding and were not used in the computation of diluted earnings per share. At December 31, 2009, 425,974 stock options at a price of \$32.37 were outstanding and were not used in the computation of diluted earnings per share.

24. Accumulated Other Comprehensive Income

CTBI has elected to present the disclosure required by ASC 220, Comprehensive Income, in the consolidated Statements of Changes in Shareholders' Equity. The subtotal Comprehensive income represents total comprehensive income as defined in the statement. Reclassification adjustments, related tax effects allocated to changes in equity, and accumulated other comprehensive income as of and for the years ended December 31, were as follows:

(in thousands)	2011	2010	2009
Reclassification adjustment, pretax:			
Change in unrealized net gains (losses) arising during year	\$9,868	\$(464)	\$5,758
Reclassification adjustment for realized gains included in net income	(218)	0	(654)
Change in unrealized gains (losses) on securities available-for-sale	9,650	(464)	5,104
Related tax effects:			

Edgar Filing: COMMUNITY TRUST BANCORP INC /KY/ - Form 10-K

Change in unrealized net gains (losses) arising during year	3,454	(162)	2,015
Reclassification adjustment for realized gains included in net income	(76)	0	(229
Deferred tax expense (benefit)	3,378	(162)	1,786
Reclassification adjustment, net of tax:				
Change in unrealized net gains (losses) arising during year	6,414	(302)	3,743
Reclassification adjustment for realized gains included in net income	(142)	0	(425
Change in other comprehensive income	\$6,272	\$ (302)	\$3,318

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Audit Committee, Board of Directors and Shareholders
Community Trust Bancorp, Inc.
Pikeville, Kentucky

We have audited Community Trust Bancorp, Inc.'s (Company) internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying management report on internal control over financial reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control – Integrated Framework issued by the COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements of the Company and our report dated March 15, 2012, expressed an unqualified opinion thereon.

/s/ BKD, LLP
Louisville, Kentucky
March 15, 2012

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Audit Committee, Board of Directors and Shareholders
Community Trust Bancorp, Inc.
Pikeville, Kentucky

We have audited the accompanying consolidated balance sheets of Community Trust Bancorp, Inc. (Company) as of December 31, 2011 and 2010, and the related consolidated statements of income, changes in shareholders' equity and cash flows for each of the years in the three-year period ended December 31, 2011. The Company's management is responsible for these consolidated financial statements. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. Our audits included examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management and evaluating the overall consolidated financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2011 and 2010, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2011, in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) and our report dated March 15, 2012, expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

CTBI's management is responsible for establishing and maintaining effective disclosure controls and procedures, as defined under Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934. As of December 31, 2011, an evaluation was carried out by CTBI's management, with the participation of our Chief Executive Officer and the Executive Vice President/Treasurer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based on this evaluation, management concluded that disclosure controls and procedures as of December 31, 2011 were effective in ensuring material information required to be disclosed in this annual report on Form 10-K was recorded, processed, summarized, and reported on a timely basis.

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

There were no changes in CTBI's internal control over financial reporting that occurred during the year ended December 31, 2011 that have materially affected, or are reasonably likely to materially affect, CTBI's internal control over financial reporting.

MANAGEMENT REPORT ON INTERNAL CONTROL

We, as management of Community Trust Bancorp, Inc. and its subsidiaries (“CTBI”), are responsible for establishing and maintaining adequate internal control over financial reporting. Pursuant to the rules and regulations of the Securities and Exchange Commission, internal control over financial reporting is a process designed by, or under the supervision of, the company’s principal executive and principal financial officers, or persons performing similar functions, and effected by the company’s board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the company;

Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and

Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company’s assets that could have a material effect on the financial statements.

All internal control systems, no matter how well designed, have inherent limitations, including the possibility of human error and the circumvention of overriding controls. Accordingly, even effective internal control can provide only reasonable assurance with respect to financial statement preparation. Further, because of changes in conditions, the effectiveness of internal control may vary over time.

Because of the inherent limitations, any system of internal control over financial reporting, no matter how well designed, may not prevent or detect misstatements due to the possibility that a control can be circumvented or overridden or that misstatements due to error or fraud may occur that are not detected. Also, projections of the effectiveness to future periods are subject to the risk that the internal controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies and procedures included in such controls may deteriorate.

Management has evaluated the effectiveness of its internal control over financial reporting as of December 31, 2011 based on the control criteria established in a report entitled Internal Control—Integrated Framework, issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on such evaluation, we have concluded that CTBI’s internal control over financial reporting is effective as of December 31, 2011.

The effectiveness of CTBI’s internal control over financial reporting as of December 31, 2011 has been audited by BKD, LLP, an independent registered public accounting firm that audited the CTBI’s consolidated financial statements included in this annual report.

D. Andrew Jones; 49	Executive Vice President	2010	(4)	Executive Vice President/ Northeastern Region President of Community Trust Bank, Inc.
Andy D. Waters; 46	Executive Vice President	2011	(5)	President and CEO of Community Trust and Investment Company

- (1) The ages listed for CTBI's executive officers are as of February 29, 2012.
- (2) Mr. Larry Jones was named Executive Vice President/Central Kentucky Region President of Community Trust Bank, Inc. in November 2010. Mr. Jones had served as Executive Vice President/Northeastern Region President since September 2002.
- (3) Mr. Jameson is a non-voting member of the Executive Committee.
- (4) Mr. Andrew Jones replaced Mr. Larry Jones as Executive Vice President/Northeastern Region President. Mr. Andrew Jones has been employed by Community Trust Bank, Inc. since 1987. His most recent position was Senior Vice President/Senior Lender of the Ashland Market which he had held since 2002.
- (5) Mr. Waters has been with Community Trust and Investment Company since 2004, serving as Senior Vice President/Manager of Trust and Estate Services prior to becoming President and CEO effective January 1, 2011.

Item 11. Executive Compensation

The information required by this item is omitted because CTBI is filing a definitive proxy statement pursuant to Regulation 14A not later than 120 days after the end of the fiscal year covered by this report which includes the required information. The required information contained in CTBI's proxy statement is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Shareholder Matters

The information required by this item other than the information provided below is omitted because CTBI is filing a definitive proxy statement pursuant to Regulation 14A not later than 120 days after the end of the fiscal year covered by this report which includes the required information. The required information contained in CTBI's proxy statement is incorporated herein by reference.

Equity Compensation Plan Information

The following table provides information as of December 31, 2011, with respect to compensation plans under which common shares of CTBI are authorized for issuance to officers or employees in exchange for consideration in the form of services provided to CTBI and/or its subsidiaries. We currently maintain one active and one inactive incentive stock option plan covering key employees. The 2006 Stock Ownership Incentive Plan ("2006 Plan") was approved by the Board of Directors and the shareholders in 2006. The 1998 Stock Option Plan ("1998 Plan") was approved by the Board of Directors and the shareholders in 1998. The 1998 Plan was rendered inactive as of April 26, 2006. The 2006 Plan had 1,500,000 shares authorized, 1,244,795 of which were available at December 31, 2011 for future grants. In addition, any shares reserved for issuance under the 1998 Stock Option Plan ("1998 Plan") in excess of the number of shares as to which options or other benefits are awarded thereunder, plus any shares as to which options or other benefits granted under the 1998 Plan may lapse, expire, terminate or be canceled, shall also be reserved and available for issuance or reissuance under the 2006 Plan. As of December 31, 2011, the 1998 Plan had 1,046,831 shares authorized, 197,924 of which were transferred to the 2006 Plan. The total shares available for issuance under the 2006 Plan as of December 31, 2011 was 1,442,719.

	A	B	C
			Number of Securities Available for Future Issuance Under Equity Compensation Plans (excluding securities reflected in Column A)
Plan Category (shares in thousands)	Number of Common Shares to be Issued Upon Exercise/Vesting	Weighted Average Price (\$)	
Equity compensation plans approved by shareholders:			
Stock options	474	29.33	1,443
Restricted stock	97	27.91	
Equity compensation plans not approved by shareholders	0	--	0
Total			1,443

Additional information regarding CTBI's stock option plans can be found in notes 1 and 15 to the consolidated financial statements.

Item 13. Certain Relationships, Related Transactions, and Director Independence

The information required by this item is omitted because CTBI is filing a definitive proxy statement pursuant to Regulation 14A not later than 120 days after the end of the fiscal year covered by this report which includes the required information. The required information contained in CTBI's proxy statement is incorporated herein by reference.

Item 14. Principal Accountant Fees and Services

The information required by this item is omitted because CTBI is filing a definitive proxy statement pursuant to Regulation 14A not later than 120 days after the end of the fiscal year covered by this report which includes the required information. The required information contained in CTBI's proxy statement is incorporated herein by reference.

PART IV

Item 15. Exhibits and Financial Statement Schedules

(a) 1. Financial Statements

The following financial statements of CTBI and the auditor's report thereon are filed as part of this Form 10-K under Item 8. Financial Statements and Supplementary Data:

Consolidated Balance Sheets
 Consolidated Statements of Income
 Consolidated Statements of Shareholders' Equity
 Consolidated Statements of Cash Flows
 Notes to Consolidated Financial Statements
 Reports of Independent Registered Public Accounting Firm

2. Financial Statement Schedules

All required financial statement schedules for CTBI have been included in this Form 10-K in the consolidated financial statements or the related footnotes.
