## NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

## Basis of Presentation

The accompanying condensed consolidated financial statements should be read in conjunction with the consolidated financial statements contained in the Company's December 31, 2013 Annual Report on Form 10 K. In the opinion of management, all adjustments (consisting of normal recurring accruals) necessary for a fair presentation have been included. The results for the quarter and six months ended June 30, 2014 do not necessarily indicate the results that may be expected for the full year.

## Restaurant Information

The following table presents restaurant information by ownership type:

Restaurants at June 30,	2014	2013
Conventional franchised	20,481	19,965
Developmental licensed	4,943	4,479
Foreign affiliated	3,570	3,663
Total Franchised	28,994	28,107
Company-operated	6,689	6,627
Systemwide restaurants	35,683	34,734

The results of operations of restaurant businesses purchased and sold in transactions with franchisees were not material either individually or in the aggregate to the condensed consolidated financial statements for the periods prior to purchase and sale.

## Per Common Share Information

Diluted earnings per common share is calculated using net income divided by diluted weighted-average shares. Diluted weighted-average shares include weighted-average shares outstanding plus the dilutive effect of share-based compensation, calculated using the treasury stock method, of 5.8 million shares and 7.3 million shares for the quarters 2014 and 2013, respectively, and 6.1 million shares and 7.8 million shares for the six months 2014 and 2013, respectively. Stock options that would have been antidilutive and therefore were not included in the calculation of diluted weighted-average shares totaled 4.8 million shares and 4.9 million shares for the quarters 2014 and 2013, respectively, and 5.9 million shares and 4.8 million shares for the six months 2014 and 2013, respectively.

## Fair Value Measurements

The Company measures certain financial assets and liabilities at fair value. Fair value disclosures are reflected in a three-level hierarchy, maximizing the use of observable inputs and minimizing the use of unobservable inputs. The Company did not have any significant changes to the valuation techniques used to measure fair value as described in the Company's December 31, 2013 Annual Report on Form 10-K.

## Certain Financial Assets and Liabilities Measured at Fair Value

The following table presents financial assets and liabilities measured at fair value on a recurring basis:

In millions	Level 1	Level 2	Carrying Value
June 30, 2014			
Derivative assets	\$ 135.3	\$ 38.5	\$ 173.8
Derivative liabilities		\$(133.2)	\$(133.2)

## Certain Financial Assets and Liabilities not Measured at Fair Value

At June 30, 2014, the fair value of the Company's debt obligations was estimated at \$16.8 billion, compared to a carrying amount of \$15.4 billion. The fair value was based upon quoted market prices, Level 2, within the valuation hierarchy. The carrying amounts of cash and equivalents and notes receivable approximate fair value.

Table of Contents**Financial Instruments and Hedging Activities**

The Company is exposed to global market risks, including the effect of changes in interest rates and foreign currency fluctuations. The Company uses foreign currency denominated debt and derivative instruments to mitigate the impact of these changes. The Company does not hold or issue derivatives for trading purposes.

The following table presents the fair values of derivative instruments included on the Consolidated balance sheet:

In millions	Derivative Assets		Derivative Liabilities	
	June 30,	December 31,	June 30,	December 31,
	2014	2013	2014	2013
Total derivatives designated as hedging instruments	\$ 32.4	\$ 55.6	\$(122.2)	\$(155.5)
Total derivatives not designated as hedging instruments	141.4	144.2	(11.0 )	(23.8 )
Total derivatives	\$173.8	\$ 199.8	\$(133.2)	\$(179.3)

The following table presents the pretax amounts affecting income and other comprehensive income ("OCI") for the six months ended June 30, 2014 and 2013, respectively:

In millions	Gain (Loss) Recognized in Accumulated OCI		Gain (Loss) Reclassified into Income from Accumulated OCI		Gain (Loss) Recognized in Income on Derivative <sup>(1)</sup>	
	2014	2013	2014	2013	2014	2013
	Cash Flow Hedges	\$ 19.1	\$(38.0 )	\$ 8.9	\$(17.2)	\$ 2.0
Net Investment Hedges	\$(15.0 )	\$252.1	\$(15.2)	\$—		
Undesignated derivatives					\$ 3.8	\$(12.1)

(1) Includes amounts excluded from effectiveness testing, ineffectiveness, and undesignated gains (losses).

**Fair Value Hedges**

The Company enters into fair value hedges which convert a portion of its fixed-rate debt into floating-rate debt by use of interest rate swaps. At June 30, 2014, \$2.6 billion of the Company's outstanding fixed-rate debt was effectively converted. For the six months ended June 30, 2014, the Company recognized a \$2.8 million gain on fair value interest rate swaps, which was exactly offset by a corresponding loss in the fair value of the hedged debt instruments.

**Cash Flow Hedges**

The Company enters into cash flow hedges to reduce the exposure to variability in certain expected future cash flows. To protect against the reduction in value of forecasted foreign currency cash flows (such as royalties denominated in foreign currencies), the Company uses foreign currency forwards and foreign currency options to hedge a portion of anticipated exposures. The hedges cover the next 19 months for certain exposures and are denominated in various currencies. As of June 30, 2014, the Company had derivatives outstanding with an equivalent notional amount of \$555.1 million that hedged a portion of forecasted foreign currency denominated royalties.

The Company uses cross-currency swaps to hedge the risk of cash flows associated with certain foreign currency denominated debt, including forecasted interest payments, and has elected cash flow hedge accounting. The hedges cover periods up to 41 months and have an equivalent notional amount of \$359.6 million.

Based on market conditions at June 30, 2014, the \$5.1 million in cumulative cash flow hedging gains, after tax, is not expected to have a significant effect on earnings over the next 12 months.

Table of Contents**Net Investment Hedges**

The Company primarily uses foreign currency denominated debt (third party and intercompany) to hedge its investments in certain foreign subsidiaries and affiliates. Realized and unrealized translation adjustments from these hedges are included in shareholders' equity in the foreign currency translation component of OCI and offset translation adjustments on the underlying net assets of foreign subsidiaries and affiliates, which also are recorded in OCI. As of June 30, 2014, \$4.3 billion of intercompany foreign currency denominated debt, \$5.4 billion of the Company's third party foreign currency denominated debt and \$1.0 billion of derivatives were designated to hedge investments in certain foreign subsidiaries and affiliates.

**Credit Risk**

The Company is exposed to credit-related losses in the event of non-performance by its derivative counterparties. The Company did not have significant exposure to any individual counterparty at June 30, 2014 and has master agreements that contain netting arrangements. For financial reporting purposes, the Company presents gross derivative balances in the financial statements and supplementary data, including for counterparties subject to netting arrangements.

**Segment Information**

The Company franchises and operates McDonald's restaurants in the global restaurant industry. The following table presents the Company's revenues and operating income by geographic segment. The APMEA segment represents operations in Asia/Pacific, Middle East and Africa. Other Countries & Corporate represents operations in Canada and Latin America, as well as Corporate activities.

In millions	Quarters Ended		Six Months Ended	
	June 30, 2014	2013	June 30, 2014	2013
Revenues				
U.S.	\$2,249.0	\$2,282.4	\$4,303.1	\$4,370.9
Europe	2,913.3	2,837.1	5,625.5	5,423.5

Other Countries & Corporate	355.1	374.8	670.3	711.5
Total revenues	\$7,181.7	\$7,083.8	\$13,882.0	\$13,689.1
Operating Income				
U.S.	\$980.5	\$967.9	\$1,801.3	\$1,812.6
Europe	853.6	850.8	1,606.1	1,558.9
APMEA	348.3	354.7	693.4	736.6
Other Countries & Corporate	6.6	24.3	24.2	39.1
Total operating income	\$2,189.0	\$2,197.7	\$4,125.0	\$4,147.2

**Recently Issued Accounting Standard**

In May 2014, the Financial Accounting Standards Board issued guidance codified in Accounting Standards Codification (ASC) 606, "Revenue Recognition - Revenue from Contracts with Customers," which amends the guidance in former ASC 605, "Revenue Recognition," and becomes effective beginning January 1, 2017. The Company is currently evaluating the impact of the provisions of ASC 606.

**Subsequent Events**

In mid-July, food quality and safety issues were discovered at a supplier to certain food companies in China, including McDonald's. As a consequence, McDonald's businesses in China, Japan and certain other markets are experiencing a significant negative impact to results. The affected markets represent approximately 10% of consolidated revenues. While this matter will negatively impact results in the near term, we cannot reasonably estimate the impact on full year 2014 earnings at this time.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

The Company franchises and operates McDonald's restaurants. Of the 35,683 restaurants in 119 countries at June 30, 2014, 28,994 were licensed to franchisees (including 20,481 franchised to conventional franchisees, 4,943 licensed to developmental licensees and 3,570 licensed to foreign affiliates ("affiliates") – primarily Japan) and 6,689 were operated by the Company. Under our conventional franchise arrangement, franchisees provide a portion of the capital required by initially investing in the equipment, signs, seating and décor of their restaurant business, and by reinvesting in the business over time. The Company owns the land and building or secures long-term leases for both Company-operated and conventional franchised restaurant sites. This maintains long-term occupancy rights, helps control related costs and assists in alignment with franchisees. In certain circumstances, the Company participates in reinvestment for conventional franchised restaurants. Under our developmental license arrangement, licensees provide capital for the entire business, including the real estate interest, and the Company has no capital invested. In addition, the Company has an equity investment in a limited number of affiliates that invest in real estate and operate or franchise restaurants within a market.

We view ourselves primarily as a franchisor and believe franchising is important to both delivering great, locally-relevant customer experiences and driving profitability. However, directly operating restaurants is paramount to being a credible franchisor and is essential to providing Company personnel with restaurant operations experience. In our Company-operated restaurants, and in collaboration with franchisees, we further develop and refine operating standards, marketing concepts and product and pricing strategies, so that only those that we believe are most beneficial are introduced in the restaurants. We continually review, and as appropriate adjust, our mix of Company-operated and franchised (conventional franchised, developmental licensed and foreign affiliated) restaurants to help optimize overall performance.

The Company's revenues consist of sales by Company-operated restaurants and fees from restaurants operated by franchisees. Revenues from conventional franchised restaurants include rent and royalties based on a percent of sales along with minimum rent payments, and initial fees. Revenues from restaurants licensed to affiliates and developmental licensees include a royalty based on a percent of sales, and generally include initial fees. Fees vary by type of site, amount of Company investment, if any, and local business conditions. These fees, along with occupancy and operating rights, are stipulated in franchise/license agreements that generally have 20 year terms.

The business is managed as distinct geographic segments. Significant reportable segments include the United States ("U.S."), Europe, and Asia/Pacific, Middle East and Africa ("APMEA"). In addition, throughout this report we present "Other Countries & Corporate" that includes operations in Canada and Latin America, as well as Corporate activities. For the six months ended June 30, 2014, the U.S., Europe and APMEA segments accounted for 31%, 41% and 24% of total revenues, respectively.

Strategic Direction and Financial Performance

The strength of the alignment among the Company, its franchisees and suppliers (collectively referred to as the "System") has been key to McDonald's success. By leveraging our System, we are able to identify, implement and scale ideas that meet customers' changing needs and preferences. In addition, our business model enables McDonald's to consistently deliver locally-relevant restaurant experiences to customers and be an integral part of the communities we serve.

McDonald's customer-focused Plan to Win ("Plan") provides a common framework that aligns our global business and allows for local adaptation through an emphasis on the Plan's five pillars - People, Products, Place, Price and Promotion. We have recently evolved our Plan framework, refocusing our planning and actions on what matters most to our customers. The following four strategic global growth priorities support our Plan: optimizing our menu by serving our customers' favorite food and drinks; modernizing the customer experience to be even more memorable; broadening accessibility by providing unparalleled convenience to our customers; and becoming an even more trusted brand. We believe that our strategic priorities align with our customers' evolving needs, and - combined with our competitive advantages of convenience, menu variety, geographic diversification and System alignment - will drive long-term sustainable growth and shareholder value.

To reignite momentum over the next 18 months, we are focused on strengthening the foundational elements of our business by concentrating on compelling value, marketing and operations excellence. We are prioritizing our near-term efforts on improving performance in key opportunity markets that are significant contributors to consolidated results, including the U.S., Germany, Australia and Japan. In addition, we are pursuing growth initiatives focused on customizing and personalizing the menu, accelerating our digital efforts, and growing our business sustainably to become a more relevant and trusted brand.

At the same time, we are continuing to optimize our capital and ownership structures and pursuing opportunities to reallocate G&A spending to higher return initiatives and growth areas, while maintaining our existing longer-term financial strength and philosophy.

Table of Contents

Global comparable sales decreased 0.1% for the quarter and increased 0.2% for the six months, reflecting higher average check and negative guest traffic in all major segments. On a consolidated basis, comparable guest counts decreased 3.0% for the six months. Comparable sales are driven by changes in guest counts and average check, which is affected by changes in pricing and product mix. Typically, pricing has a greater impact on average check than product mix. The goal is to achieve a balanced contribution from both guest counts and average check.

U.S. comparable sales decreased 1.5% for the quarter and 1.6% for the six months, reflecting negative comparable guest counts amid ongoing broad-based challenges. Looking ahead, McDonald's U.S. is intent on strengthening the overall customer experience to effectively position the segment for long-term growth. Key areas of focus include service excellence, enhanced marketing, and value, core menu and breakfast daypart initiatives. We will continue to invest in new and existing restaurants, although the pace of our reimagining program is slower compared to last year. In Europe, comparable sales decreased 1% for the quarter and increased 0.2% for the six months, reflecting positive performance in the U.K. and France offset by ongoing weakness in Germany. Looking ahead, Europe remains focused on growing the business through a renewed focus on core menu and value options, premium menu additions and limited-time offers, and we will continue to expand the breakfast daypart and beverage initiatives. In addition, we remain committed to our ongoing restaurant reimagining and technology initiatives, extending operating hours, optimizing drive-thrus and opening new restaurants.

In APMEA, comparable sales increased 1.1% for the quarter and 1.0% for the six months, benefiting from strong comparable sales performance in China, as well as positive performance in many other markets. Results were also impacted by continued weakness in Japan. In mid-July, food quality and safety issues were discovered at a supplier to certain food companies in China, including McDonald's. As a consequence, McDonald's businesses in China, Japan and certain other markets are experiencing a significant negative impact to results. The affected markets represent approximately 10% of consolidated revenues. As a result, McDonald's is undertaking recovery strategies to restore the trust and confidence of our customers. The segment will continue to pursue customer-focused initiatives to deliver menu variety, increased convenience and branded affordability. In addition, we are focused on restaurant expansion and ongoing restaurant reimagining.

In the Company's Form 8-K dated July 22, 2014, we indicated that full year 2014 global comparable sales were expected to be relatively similar to year-to-date June performance (i.e. relatively flat) given a stagnant IEO category, sustained competitive activity, consumer price sensitivity and cost pressures. As a result of the China supplier issue, the Company's global comparable sales forecast for 2014 is now at risk. With our current sales outlook, expected currency volatility in Russia and Ukraine, and labor and other cost pressures, we expect continued pressure on company-operated margins for the remainder of the year.

Second Quarter and Six Months 2014 Operating Results Included:

Global comparable sales decreased 0.1% for the quarter and increased 0.2% for the six months.

Consolidated revenues increased 1% (1% in constant currencies) for the quarter and increased 1% (2% in constant currencies) for the six months, benefiting from expansion.

Consolidated operating income was flat (decreased 1% in constant currencies) for the quarter and decreased 1% (0% in constant currencies) for the six months.

Diluted earnings per share was \$1.40 for the quarter and \$2.61 for the six months, up 1% (1% in constant currencies) and down 1% (0% in constant currencies), respectively. Foreign currency translation had a positive impact of \$0.01 on diluted earnings per share for the quarter and a negative impact of \$0.02 for the six months.

For the six months, the Company paid total dividends of \$1.6 billion and repurchased 12.6 million shares for \$1.2 billion, in connection with our \$18-\$20 billion, 3-year cash return target.

Outlook

While the Company does not provide specific guidance on earnings per share, the following information is provided to assist in forecasting the Company's future results.

Changes in Systemwide sales are driven by comparable sales and net restaurant unit expansion. The Company expects net restaurant additions to add approximately 2.5 percentage points to 2014 Systemwide sales growth (in constant currencies), most of which will be due to the 949 net restaurants (1,098 net traditional openings less 149 net satellite closings) added in 2013.

The Company does not generally provide specific guidance on changes in comparable sales. However, as a perspective, assuming no change in cost structure, a 1 percentage point change in comparable sales for either the U.S. or Europe would change annual diluted earnings per share by about 4 cents.

Table of Contents

With about 75% of McDonald's grocery bill comprised of 10 different commodities, a basket of goods approach is the most comprehensive way to look at the Company's commodity costs. For the full year 2014, the total basket of goods cost is expected to increase 1%-2% in the U.S. and Europe.

The Company expects full-year 2014 selling, general and administrative expenses to increase approximately 4%-5% in constant currencies, with fluctuations expected between the quarters. The increase is primarily due to expenses associated with our 2014 Worldwide Owner/Operator Convention and sponsorship of the Winter Olympics, and costs related to long-term growth initiatives.

Based on current interest and foreign currency exchange rates, the Company expects interest expense for the full year 2014 to increase approximately 9% compared with 2013.

A significant part of the Company's operating income is generated outside the U.S., and about 40% of its total debt is denominated in foreign currencies. Accordingly, earnings are affected by changes in foreign currency exchange rates, particularly the Euro, British Pound, Australian Dollar and Canadian Dollar. Collectively, these currencies represent approximately 65% of the Company's operating income outside the U.S. If all four of these currencies moved by 10% in the same direction, the Company's annual diluted earnings per share would change by about 25 cents.

The Company expects the effective income tax rate for the full-year 2014 to be 31% to 33%. Some volatility may be experienced between the quarters resulting in a quarterly tax rate that is outside the annual range.

The Company expects capital expenditures for 2014 to be between \$2.9-\$3.0 billion. Over half of this amount will be used to open new restaurants. The Company expects to open about 1,500-1,600 restaurants including about 500 restaurants in affiliated and developmental licensee markets, such as Japan and Latin America, where the Company does not fund any capital expenditures. The Company expects net additions of between 1,000-1,100 restaurants. The remaining capital will be used to reinvest in existing locations, in part through reimaging. Over 1,000 restaurants worldwide are expected to be reimaged, including locations in affiliated and developmental licensee markets that require no capital investment from the Company.

The Company has established a 3-year cash return target of \$18-\$20 billion for 2014 to 2016. This target is based on several ongoing factors, including the significant free cash flow generated from our operations, as well as the use of cash proceeds from debt additions and refranchising of at least 1,500 restaurants.

The Following Definitions Apply to these Terms as Used Throughout this Form 10-Q:

Information in constant currency is calculated by translating current year results at prior year average exchange rates.

Management reviews and analyzes business results excluding the effect of foreign currency translation and bases incentive compensation plans on these results because they believe this better represents the Company's underlying business trends.

Systemwide sales include sales at all restaurants, whether operated by the Company or by franchisees. While franchised sales are not recorded as revenues by the Company, management believes the information is important in understanding the Company's financial performance because these sales are the basis on which the Company calculates and records franchised revenues and are indicative of the financial health of the franchisee base.

Comparable sales represent sales at all restaurants and comparable guest counts represent the number of transactions at all restaurants, whether operated by the Company or by franchisees, in operation at least thirteen months including those temporarily closed. Some of the reasons restaurants may be temporarily closed include reimaging or remodeling, rebuilding, road construction and natural disasters. Comparable sales exclude the impact of currency translation. Comparable sales are driven by changes in guest counts and average check, which is affected by changes in pricing and product mix. Typically, pricing has a greater impact on average check than product mix. Management reviews the increase or decrease in comparable sales and comparable guest counts compared with the same period in the prior year to assess business trends. The number of weekdays and weekend days, referred to as the calendar shift/trading day adjustment, can impact comparable sales and guest counts. In addition, the timing of holidays can also impact comparable sales and guest counts.

Table of Contents

## Impact of Foreign Currency Translation

While changes in foreign currency exchange rates affect reported results, McDonald's mitigates exposures, where practical, by purchasing goods and services in local currencies, financing in local currencies and hedging certain foreign-denominated cash flows. Management reviews and analyzes business results excluding the effect of foreign currency translation and bases incentive compensation plans on these results, because they believe this better represents the Company's underlying business trends. Results excluding the effect of foreign currency translation (also referred to as constant currency) are calculated by translating current year results at prior year average exchange rates.

## IMPACT OF FOREIGN CURRENCY TRANSLATION

Dollars in millions, except per share data

			Currency Translation Benefit/ (Cost)
Quarters Ended June 30,	2014	2013	2014
Revenues	\$7,181.7	\$7,083.8	\$3.9
Company-operated margins	816.1	841.9	1.6
Franchised margins	1,968.2	1,923.3	4.5
Selling, general & administrative expenses	629.2	607.0	(4.8 )
Operating income	2,189.0	2,197.7	2.3
Net income	1,387.1	1,396.5	3.5
Earnings per share-diluted	\$1.40	\$1.38	\$0.01

			Currency Translation (Cost)
Six Months Ended June 30,	2014	2013	2014
Revenues	\$13,882.0	\$13,689.1	\$(75.6)
Company-operated margins	1,539.5	1,561.3	(8.8 )
Franchised margins	3,760.9	3,688.0	(14.0 )
Selling, general & administrative expenses	1,249.6	1,203.5	(2.0 )
Operating income	4,125.0	4,147.2	(26.5 )
Net income	2,591.9	2,666.7	(25.8 )
Earnings per share-diluted	\$2.61	\$2.64	\$(0.02)

The impact of foreign currency translation on consolidated operating results for the quarter and six months was primarily due to the weaker Australian Dollar, Russian Ruble and Canadian Dollar, offset by the stronger Euro and British Pound.

## Net Income and Diluted Earnings per Common Share

For the quarter, net income decreased 1% (1% in constant currencies) to \$1,387.1 million, and diluted earnings per share increased 1% (1% in constant currencies) to \$1.40. Foreign currency translation had a positive impact of \$0.01 on diluted earnings per share.

For the six months, net income decreased 3% (2% in constant currencies) to \$2,591.9 million, and diluted earnings per share decreased 1% (0% in constant currencies) to \$2.61. Foreign currency translation had a negative impact of \$0.02 on diluted earnings per share.

For the quarter and six months, net income benefited from higher franchised margin dollars, but was more than offset by a higher effective income tax rate, higher selling, general and administrative expenses and lower Company-operated margin dollars. Diluted earnings per share benefited from a decrease in diluted weighted average shares outstanding in both periods.

During the quarter, the Company paid a quarterly dividend of \$0.81 per share or \$800.6 million, bringing the total dividends paid for the six months to \$1.6 billion. In addition, the Company repurchased 8.0 million shares of its stock for \$810.7 million, bringing total purchases for the six months to 12.6 million shares or \$1.2 billion.

Table of Contents

## Revenues

Revenues consist of sales by Company-operated restaurants and fees from restaurants operated by franchisees. Revenues from conventional franchised restaurants include rent and royalties based on a percent of sales along with minimum rent payments and initial fees. Revenues from franchised restaurants that are licensed to affiliates and developmental licensees include a royalty based on a percent of sales and generally include initial fees.

Table of Contents

Consolidated revenues increased 1% (1% in constant currencies) for the quarter and increased 1% (2% in constant currencies) for the six months due to expansion.

In the U.S., revenues decreased for the quarter and six months due to negative comparable sales, reflecting negative comparable guest counts amid ongoing broad-based challenges.

In Europe, the constant currency increase in revenues for the quarter and six months benefited from expansion, primarily in Russia. Revenue growth also benefited from positive comparable sales performance in the U.K. and France, offset by negative results in Germany.

In APMEA, the constant currency increase in revenues for the quarter and six months was driven by China and other Asian markets due to positive comparable sales performance and expansion, partly offset by the impact of refranchising in Australia.

The following table presents the percent change in comparable sales for the quarters ended June 30, 2014 and 2013:

## COMPARABLE SALES

	Increase/ (Decrease)			
	Quarters Ended		Six Months Ended	
	June 30,		June 30,*

Total	16.6 %	17.0 %	\$1,539.5	\$1,561.3	(1 )%	(1 )%

Franchised margin dollars increased \$44.9 million or 2% (2% in constant currencies) for the quarter and increased \$72.9 million or 2% (2% in constant currencies) for the six months due to expansion in both periods.

In the U.S., the franchised margin percent decreased for the quarter and six months due to negative comparable sales and higher depreciation, primarily related to reimaging.

In Europe, the franchised margin percent decreased for the quarter and six months due to the impact of refranchising in Germany and certain other markets and higher rent expense in some markets. The decrease for the quarter was also impacted by negative comparable sales, primarily in Germany.

In APMEA, the franchised margin percent decreased for the quarter and six months partly due to the impact of refranchising and higher rent expense in Australia. The margin percent decrease also reflected a higher proportion of conventionally-franchised restaurants relative to developmentally-licensed and affiliate restaurants. While this has a dilutive effect on the franchised margin percent, it results in higher franchised margin dollars.

Table of Contents

Company-operated margin dollars decreased \$25.8 million or 3% (3% in constant currencies) for the quarter and decreased \$21.8 million or 1% (1% in constant currencies) for the six months.

In the U.S., the Company-operated margin percent decreased for the quarter and six months as the positive impact of a higher average check was more than offset by negative comparable guest counts and higher commodity and labor costs.

In Europe, the Company-operated margin percent decreased for the quarter and six months reflecting higher imported commodity costs in Russia and Ukraine due to weaker currencies, and negative performance in Germany. Both periods benefited from positive comparable sales performance in France and the U.K.

In APMEA, the Company-operated margin percent for the quarter and six months decreased as the impact of positive comparable sales was offset by higher labor, occupancy and other costs, as well as the negative impact of new restaurant openings. While the margin percent grew in certain markets, including China, refranchising in Australia and the weaker Australian Dollar negatively impacted the segment's overall margin.

The following table presents Company-operated restaurant margin components as a percent of sales:

**CONSOLIDATED COMPANY-OPERATED RESTAURANT EXPENSES AND MARGINS AS A PERCENT OF SALES**

	Quarters Ended		Six Months Ended	
	June 30,		June 30,	
	2014	2013	2014	2013
Food & paper	33.6 %	33.7 %	33.6 %	33.8 %
Payroll & employee benefits	25.8	25.7	26.0	26.0
Occupancy & other operating expenses	23.5	22.9	23.8	23.2
Total expenses	82.9 %	82.3 %	83.4 %	83.0 %
Company-operated margins	17.1 %	17.7 %	16.6 %	17.0 %

**Selling, General & Administrative Expenses**

Selling, general and administrative expenses increased \$22.2 million or 4% (3% in constant currencies) for the quarter and increased \$46.1 million or 4% (4% in constant currencies) for the six months primarily due to costs associated with the 2014 Worldwide Owner/Operator Convention and higher employee costs. The six months also included costs related to the 2014 Winter Olympics.

For the six months, selling, general and administrative expenses as a percent of revenues increased to 9.0% for 2014 compared with 8.8% for 2013, and as a percent of Systemwide sales was 2.8% for 2014 and 2013.

**Other Operating (Income) Expense, Net**

**OTHER OPERATING (INCOME) EXPENSE, NET**

Dollars in millions

	Quarters Ended		Six Months Ended

Asset dispositions and other (income) expense, net	2.4	16.8	7.6	26.3
Total	\$(33.9)	\$(39.5)	\$(74.2)	\$(101.4)

The Company's sale of restaurants to franchisees are aimed at achieving an optimal ownership mix in each market.

Gains on sales of restaurant businesses decreased for the quarter and six months, primarily in Australia.

Equity in earnings of unconsolidated affiliates decreased for the quarter and six months primarily due to weaker operating performance in Japan.

Asset dispositions and other expense decreased for the quarter and six months due to lower write-offs and higher other income items.

U.S.	\$1,801.3	\$1,812.6	(1	)%	(1	)%
Europe	1,606.1	1,558.9	3		0	
APMEA	693.4	736.6	(6	)	0	
Other Countries & Corporate	24.2	39.1	(38	)	61	
Total	\$4,125.0	\$4,147.2	(1	)%	0	%

Operating income decreased \$8.7 million or 0% (1% in constant currencies) for the quarter and decreased \$22.2 million or 1% (0% in constant currencies) for the six months.

In the U.S., operating results for the quarter and six months reflected lower restaurant margin dollars, partly offset by lower selling, general and administrative expenses. In addition, the quarter benefited from higher other operating income.

In Europe, constant currency operating results for the quarter decreased primarily due to lower Company-operated margin dollars and lower other operating income. For the six months, operating results reflected higher selling, general and administrative expenses, primarily due to the 2014 Winter Olympics, mostly offset by higher franchised margin dollars.

In APMEA, constant currency operating results for the quarter and six months reflected higher franchised margin dollars, mostly offset by lower other operating income.

**Combined Operating Margin**

Combined operating margin is defined as operating income as a percent of total revenues. Combined operating margin was 29.7% and 30.3% for the six months 2014 and 2013, respectively.

**Interest Expense**

Interest expense increased 6% (4% in constant currencies) for the quarter and six months, primarily due to higher average debt balances.

## Income Taxes

The effective income tax rate was 33.0% and 32.2% for the quarters 2014 and 2013, respectively, and 32.8% and 31.2% for the six months 2014 and 2013, respectively.

The 2013 effective income tax rate for the six months included a tax benefit of nearly \$50 million, reflecting the retroactive impact of certain tax benefits as a result of the American Taxpayer Relief Act of 2012.

## Cash Flows and Financial Position

The Company generates significant cash from operations and has substantial credit capacity to fund operating and discretionary spending such as capital expenditures, debt repayments, dividends and share repurchases.

Cash provided by operations totaled \$3.4 billion and exceeded capital expenditures by \$2.2 billion for the six months 2014. Cash provided by operations increased \$197.6 million compared with the six months 2013, primarily due to changes in working capital, including lower incentive-based compensation payments.

Cash used for investing activities totaled \$1.2 billion for the six months 2014, an increase of \$142.7 million compared with the six months 2013, primarily due to an increase in other investing activities related to short-term time deposits, partly offset by lower capital expenditures and higher proceeds from sales of restaurant businesses.

Cash used for financing activities totaled \$1.3 billion for the six months 2014, a decrease of \$789.8 million compared with the six months 2013, due to an increase in net borrowings, partly offset by higher treasury stock purchases.

Debt obligations at June 30, 2014 totaled \$15.4 billion compared with \$14.1 billion at December 31, 2013. The increase was primarily due to bond issuances of \$1.5 billion, partly offset by bond repayments of \$538.7 million.

## Recently Issued Accounting Standard

In May 2014, the Financial Accounting Standards Board issued guidance codified in Accounting Standards Codification (ASC) 606, "Revenue Recognition - Revenue from Contracts with Customers," which amends the guidance in former ASC 605, "Revenue Recognition," and becomes effective beginning January 1, 2017. The Company is currently evaluating the impact of the provisions of ASC 606.

Risk Factors and Cautionary Statement Regarding Forward-Looking Statements

The information in this report includes forward-looking statements about our plans and future performance, including those under Outlook. These statements use such words as “may,” “will,” “expect,” “believe” and “plan.” They reflect our expectations and speak only as of the date of this report. We do not undertake to update them. Our expectations (or the underlying assumptions) may change or not be realized, and you should not rely unduly on forward-looking statements.

Our business results are subject to a variety of risks. The most important of these is whether we can continue to evolve in today’s dynamic marketplace and enhance our relationship with our customers to become a more relevant and trusted brand. Meeting customer expectations is complicated by the risks inherent in our global operating environment. Ongoing broad-based challenges continue to pressure our operating and financial performance. In particular, in some of our major markets, IEO segments may remain stagnant or experience only modest growth, reflecting consumer caution and price sensitivity. There has also been sustained, intense competition from both traditional and non-traditional competitors in many markets. Further, certain menu, pricing and promotional decisions may continue to yield results below desired levels and could continue to negatively impact sales, guest counts and market share. We have the added challenge of differing cultural, regulatory and economic environments that exist within and among the more than 100 countries where McDonald’s restaurants operate. Our initiatives may not have universal appeal among different segments of our customer base and could drive unanticipated changes in customer perceptions and guest counts. Our operations, plans and results are also affected by many factors, including regulatory, tax and other initiatives around the world as described in this section.

The risks that can have an impact on the Company’s financial performance, both in the near- and long-term, are reflected in the following considerations and factors that we believe are most likely to affect our performance. In reviewing these risks, it is important to understand the Company’s business model. The Company’s restaurant margins arise from two sources: Company-operated restaurants and franchised restaurants. As it relates to our Company-operated restaurants, our business model is built around growing comparable sales to realize margin leverage. When comparable sales performance is muted, our ability to grow margins and income is significantly impacted, and given the conditions described in this section as well as persistent cost pressures, we expect margins for Company-owned restaurants will remain challenged in 2014. Our franchisees manage their businesses independently, and therefore are responsible for the operation of their restaurants. The margins the Company realizes from franchised restaurants are largely dependent on the ability of our franchisees to grow their sales and many of the factors described in this section will likely have a negative impact on franchised margins in 2014. Although the Company’s reported results do not include franchisee profits, their financial viability is important to our success as it enables franchisees to effectively deliver the McDonald’s experience.

Our ability to become a more relevant and trusted brand and to increase sales and profits depends largely on how well we execute the Plan to Win and our global growth priorities.

The Plan to Win aligns the McDonald’s System (which represents the Company, its franchisees and suppliers) around the four strategic growth priorities that represent our greatest opportunities to drive results - serving our customers’ favorite food and drinks, creating memorable experiences, offering unparalleled convenience, and being a more trusted brand. The Plan to Win framework also keeps us focused on execution across all of our key initiatives through a common, integrated approach to people, products, place, price and promotion. The quality of our execution depends mainly on the following:

• Our System’s ability to anticipate and respond effectively to trends or other factors that affect the IEO segment and our competitive position in the diverse markets we serve, such as spending patterns, demographic changes, trends in food preparation, consumer preferences and publicity about us, all of which can drive perceptions of our business or affect the willingness of other companies to enter into site, supply or other arrangements with us;

• Our System’s continued innovation in all aspects of the McDonald’s experience, including successful menu enhancements, to differentiate the McDonald’s experience in a way that balances value with margin levels;

• Our System’s ability to develop robust menu enhancements, and whether these will result in sales gains; our System’s ability to manage the complexity of our restaurant operations resulting from providing customers additional choices; our System’s ability to continuously adapt in order to deliver a locally-relevant experience in a highly competitive,

value-driven operating environment; and our System's ability to leverage promotional or operating successes across markets;

The risks associated with our franchise business model, including whether our franchisees have the experience and financial resources to be effective operators and remain aligned with us on operating, promotional and capital-intensive initiatives, especially during periods of softer sales performance and the potential impact on us if they experience food safety or other operational problems or project a brand image inconsistent with our values, particularly if our contractual and other rights and remedies are limited, costly to exercise or subject to litigation; Our ability to achieve the benefits of our stated refranchising goals, which will depend on various factors including the returns we realize from such transactions and whether the resulting ownership mix supports our financial objectives;

Table of Contents

The success of our System's tiered approach to menu offerings and the impact of changes we may make to our value menu, which has been and will continue to be an important component of our System's overall menu strategy; the impact of pricing, product, marketing and promotional plans on sales and margins; and our System's ability to adjust these plans to respond quickly to changing economic and competitive conditions;

Our System's ability to drive restaurant improvements that achieve optimal capacity, particularly during peak mealtime hours, and motivate McDonald's restaurant personnel and our franchisees to achieve consistency and high service levels so as to improve perceptions of our System's ability to meet expectations for quality food served in clean and friendly environments;

Our System's ability to respond effectively to adverse perceptions about the quick-service category of the IEO segment or about our food (including its nutritional content and preparation), promotions and premiums, such as Happy Meal toys (collectively, our "products"), how we source the commodities we use, and our ability to manage the potential impact on McDonald's of food-borne illnesses and food or product safety issues (such as the China supplier issue referenced on page 11);

Our System's plans for restaurant reimagining and rebuilding, and whether we are able to identify and develop restaurant sites consistent with our System's plans for net growth of System-wide restaurants and achieve our sales and profitability targets;

Whether we will be able to develop an effective and compelling global digital strategy in the future that will enhance customer engagement and whether competitor loyalty initiatives will impact our ability to attract customers, particularly as these initiatives become established and customer acquisition costs (i.e., switching costs) increase;

The success of our sustainability initiatives to support our brand ambition of good food, good people and good neighbor, which will require System-wide coordination and alignment, and whether we will be effective in achieving our stated sustainability goals and addressing these and other matters of social responsibility in a way that inspires trust and confidence;

The costs and risks associated with our System's increasing reliance on technological and digital systems (e.g., point-of-sale and other in-store systems or platforms) that support our System-wide restaurants; the risk that we will not fully realize the benefits of the significant investments we are making to enhance the

- customer experience; the potential for technology system performance failures, security breaches involving our systems or those of third-party providers; legal risks associated with data collection, protection and management, in particular as it relates to information we collect when we provide technology-related services to franchisees; and litigation risk involving intellectual property rights;

The impact of economic action, such as boycotts or protests, work stoppages, and supply chain interruptions (including due to lack of supply or price increases) that can adversely affect us or the suppliers, franchisees and others that are also part of the McDonald's System and whose performance has a material impact on our results;

The impact of campaigns by labor organizations and activists, including through the use of social media and other mobile communications and applications, to promote adverse perceptions of the quick-service category of the IEO segment or our brand, management, suppliers or franchisees, or to promote or threaten specific economic action involving the industry, McDonald's or our suppliers and franchisees; and

Our System's ability to recruit and retain qualified personnel to manage our operations and growth.

Our results and financial condition are affected by global and local market conditions, and the prolonged challenging economic environment can be expected to continue to pressure our results.

Our results of operations are substantially affected by economic conditions, both globally and in local markets, and conditions can also vary substantially by market. The current global environment has been characterized by weak economies, high unemployment rates and inflationary pressures. Many major economies, both advanced and developing, are still facing ongoing economic issues. In the U.S., these include concerns about the long-term direction of federal fiscal policies. In many European markets, consumer and business confidence and spending remain muted. Important markets in Asia have also been experiencing slower growth rates. Uncertainty about the long-term environment could derail any potential improvements in economic activity for 2014.

These conditions have pressured our performance, adversely affecting sales, guest counts and/or our market share in many markets, including some major markets. We are also facing sustained, intense competition from traditional

competitors as well as an expanded set of competitors that include many non-traditional market participants, such as conventional retailers and coffee shops. To address this environment, we are intensifying our focus on increasing our relevance to drive guest counts through, among other things, menu, pricing and promotional actions. Certain of these actions can adversely affect our margin percent and therefore we expect that margins will remain under pressure. The key factors that can affect our operations, plans and results in this environment are the following:

- Whether our strategies will be effective in enabling market share gains, while at the same time enabling us to achieve our targeted operating income growth despite the current adverse economic conditions, intense competition and increasingly complex and costly advertising environment;
- The effectiveness of our supply chain management to assure reliable and sufficient product supply on favorable terms;

Table of Contents

The impact on consumer disposable income levels and spending habits of governmental actions to manage national economic matters, whether through austerity or stimulus measures and initiatives intended to control wages, unemployment, credit availability, inflation, taxation and other economic drivers;

The impact on restaurant sales and margins of ongoing commodity price volatility, and the effectiveness of pricing, hedging and other actions taken to address this environment;

The impact on the margins of our Company-owned restaurants that we cannot offset through price increases, and the trend toward higher wages and social expenses in both mature and developing markets;

The impact of foreign exchange and interest rates on our financial condition and results;

The challenges and uncertainties associated with operating in developing markets, which may entail a relatively higher risk of political instability, economic volatility, crime, corruption and social and ethnic unrest, including the recent events in the Ukraine and Russia, all of which are exacerbated in many cases by a lack of an independent and experienced judiciary and uncertainties in how local law is applied and enforced, including in areas most relevant to commercial transactions and foreign investment;

The nature and timing of decisions about underperforming markets or assets, including decisions that result in impairment charges that reduce our earnings; and

The impact of changes in our debt levels on our credit ratings, interest expense, availability of acceptable counterparties, ability to obtain funding on favorable terms or our operating or financial flexibility, especially if lenders impose new operating or financial covenants.

Increasing legal and regulatory complexity will continue to affect our operations and results in material ways.

Our legal and regulatory environment worldwide exposes us to complex compliance, litigation and similar risks that could affect our operations and results in material ways. In many of our markets, including the United States and Europe, we are subject to increasing regulation, which has increased our cost of doing business. In developing markets, we face the risks associated with new and untested laws and judicial systems. Among the more important regulatory and litigation risks we face and must manage are the following:

The impact of new, potential or changing regulations that can affect our business plans, such as those relating to product packaging, marketing and the nutritional content and safety of our food and other products, as well as the risks and costs of our labeling and other disclosure practices, particularly given varying legal requirements and practices for testing and disclosure within our industry, ordinary variations in food preparation among our own restaurants, and the need to rely on the accuracy and completeness of information from third-party suppliers;

The cost, compliance and other risks associated with the often conflicting and highly prescriptive regulations we face, including where inconsistent standards imposed by governmental authorities can adversely affect our business and increase our exposure to litigation or governmental investigations or proceedings;

The impact of nutritional, health and other scientific studies and conclusions, which constantly evolve and often have contradictory implications, but nonetheless drive popular opinion, litigation and regulation (including initiatives intended to drive consumer behavior) in ways that could be material to our business;

The impact of litigation trends, particularly in our major markets, including class actions, administrative proceedings, employment and personal injury claims, litigation with or involving our relationship with franchisees and the legal distinction between our franchisees and us for employment law purposes, landlord/tenant disputes and intellectual property claims (including often aggressive or opportunistic attempts to enforce patents used in information technology systems); the relative level of our defense costs, which vary from period to period depending on the number, nature and procedural status of pending proceedings; the cost and other effects of settlements or judgments, which may require us to make disclosures or take other actions that may affect perceptions of our brand and products; and the scope and terms of insurance or indemnification protections that we may have;

Adverse results of pending or future litigation, including litigation challenging the composition and preparation of our products, or the appropriateness or accuracy of our marketing or other communication practices;

The risks and costs to us, our franchisees and our supply chain of the effects of climate change, greenhouse gases, energy and water resources, as well as the increased public focus, including by governmental and non-governmental organizations, on these and other environmental sustainability matters (e.g., packaging and waste, animal health and welfare and land use) and the increased pressure to make commitments, set targets or establish additional goals and

take actions to meet them, which could expose the Company to market, operational and execution costs or risks, particularly when actions are undertaken System-wide;

The increasing focus on workplace practices and conditions and costs and other effects of compliance with U.S. and overseas regulations affecting the Company's workforce (both Company staff and employees working in our Company-owned restaurants), including those relating to wage and hour, healthcare, immigration, retirement and other employee benefits and unlawful workplace discrimination, and our potential exposure to reputational and other harm regarding our workplace practices or conditions or those of our independent franchisees or suppliers (or perceptions thereof);

Table of Contents

Disruptions in our operations or price volatility in a market that can result from governmental actions, such as price, foreign exchange or import-export controls, increased tariffs or government-mandated closure of our or our suppliers' operations, and the cost and disruption of responding to governmental investigations or proceedings, whether or not they have merit;

The legal and compliance risks and costs associated with privacy, data protection and similar laws, particularly as they apply to children, the potential costs (including the loss of consumer confidence) arising from alleged security breaches of information systems, and the risk of resulting criminal penalties or civil liability related to such breaches;

The impact on our operations of tax and other regulations affecting capital flows, financial markets or financial institutions, which can limit our ability to manage and deploy our liquidity or increase our funding costs; and

The impact of changes in financial reporting requirements, accounting principles or practices, including with respect to our critical accounting estimates, changes in tax accounting or tax laws (or related authoritative interpretations), particularly if corporate tax reform becomes a key component of budgetary initiatives in the United States and elsewhere, and the impact of settlements of pending or any future adjustments proposed by the IRS or other taxing authorities in connection with our tax audits, all of which will depend on their timing, nature and scope.

Trading volatility and price of our common stock may be affected by many factors.

Many factors affect the volatility and price of our common stock in addition to our operating results and prospects. The most important of these, some of which are outside our control, are the following:

- The continuing unpredictable global economic and market conditions;
  - Governmental action or inaction in light of key indicators of economic activity or events that can significantly influence financial markets, particularly in the United States which is the principal trading market for our common stock, and media reports and commentary about economic or other matters, even when the matter in question does not directly relate to our business;
- Changes in financial or tax reporting and accounting principles or practices that materially affect our reported financial condition and results and investor perceptions of our performance;

Trading activity in our common stock or trading activity in derivative instruments with respect to our common stock or debt securities, which can be affected by market commentary (including commentary that may be unreliable or incomplete); unauthorized disclosures about our performance, plans or expectations about our business; our actual performance and creditworthiness; investor confidence generally; actions by shareholders and others seeking to influence our business strategies; portfolio transactions in our stock by significant shareholders; or trading activity that results from the ordinary course rebalancing of stock indices in which McDonald's may be included, such as the S&P 500 Index and the Dow Jones Industrial Average;

- The impact of our stock repurchase program or dividend rate; and
- The impact on our results of other corporate actions, such as those we may take from time to time as part of our continuous review of our corporate structure in light of business, legal and tax considerations.

Our results and prospects can be adversely affected by events such as severe weather conditions, natural disasters, hostilities and social unrest, among others.

Severe weather conditions, natural disasters, hostilities and social unrest, terrorist activities, health epidemics or pandemics (or expectations about them) can adversely affect consumer spending and confidence levels or other factors that affect our results and prospects, such as commodity costs. Our receipt of proceeds under any insurance we maintain with respect to certain of these risks may be delayed or the proceeds may be insufficient to offset our losses fully.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There were no material changes to the disclosure made in our Annual Report on Form 10-K for the year ended December 31, 2013 regarding this matter.

Item 4. Controls and Procedures

An evaluation was conducted under the supervision and with the participation of the Company's management, including the Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), of the effectiveness of the design

and operation of the Company's disclosure controls and procedures as of June 30, 2014. Based on that evaluation, the CEO and CFO concluded that the Company's disclosure controls and procedures were effective as of such date to ensure that information required to be disclosed in the reports that it files or submits under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms. Such officers also confirm that there was no change in the Company's internal control over financial reporting during the quarter ended June 30, 2014 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

## PART II – OTHER INFORMATION

## Item 1. Legal Proceedings

There were no material changes to the disclosure made in our Annual Report on Form 10-K for the year ended December 31, 2013 regarding these matters.

## Item 1A. Risk Factors

This report contains certain forward-looking statements which reflect management's expectations regarding future events and operating performance and speak only as of the date hereof. These forward-looking statements involve a number of risks and uncertainties. These and other risks are noted in the Risk Factors and Cautionary Statement Regarding Forward-Looking Statements following Management's Discussion and Analysis.

## Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

## Issuer Purchases of Equity Securities\*

The following table presents information related to repurchases of common stock the Company made during the three months ended June 30, 2014:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs <sup>(1)</sup>	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs <sup>(1)</sup>
April 1 - 30, 2014	1,066,717	\$98.53	1,066,717	\$ 6,904,025,872
May 1 - 31, 2014	553,422	101.08	553,422	6,848,087,005
June 1 - 30, 2014	6,417,541	101.23	6,417,541	6,198,459,658
Total	8,037,680	\$100.86	8,037,680	

Subject to applicable law, the Company may repurchase shares directly in the open market, in privately negotiated transactions, or pursuant to derivative instruments and plans complying with Rule 10b5-1, among other types of transactions and arrangements.

On July 19, 2012, the Company's Board of Directors approved a share repurchase program that authorized the purchase of up to \$10 billion of the Company's outstanding common stock with no specified expiration date (2012 Program). On May 21, 2014, the Company's Board of Directors terminated the 2012 Program, effective June 30, (1)2014, and replaced it with a new share repurchase program, effective July 1, 2014 (2014 Program), that authorizes the purchase of up to \$10 billion of the Company's outstanding common stock with no specified expiration date. As of June 30, 2014, no further share repurchases may be made under the 2012 Program; future share repurchases will be made pursuant to the 2014 Program.
