PAR TECHNOLOGY CORPORATION ANNOUNCES

2012 FIRST QUARTER RESULTS FROM CONTINUING OPERATIONS

New Hartford, NY- April 26, 2012 -- PAR Technology Corporation (NYSE: PAR) today announced results from continuing operations for the first quarter ended March 31, 2012. The Company reported revenues of \$55.6 million and net earnings of \$1.0 million, or \$0.07 per diluted share. This compares with the prior year's first quarter results from continuing operations of \$54.2 million of revenues and net earnings of \$741,000, or \$0.05 per diluted share.

"We are pleased with our financial performance in the first quarter. With the successful divestiture of the LMS business, we are now focused on our two core businesses," commented Paul B. Domorski, Chairman and Chief Executive Officer. "While our first quarter consolidated performance was in line with our expectations, it does not reflect what we believe the organization is capable of generating. Our intent is to transition our businesses over time to a recurring revenue model, largely based on software-as-a-service and high value-add service contracts, in no small part enabled by our superior hardware. We are beginning to see encouraging results."

Describing the performance of the Hospitality segment, Mr. Domorski stated, "Quarterly revenue in Hospitality declined 4.8% year over year and 11.2% sequentially, however, despite the completion last year of our largest customer rollout in our history, we maintained profitability in the segment for the first quarter. Highlights within the segment included a major deployment of our new cloud-based EverServ® SureCheck™ temperature monitoring solution with a major retailer. This sale confirms the compelling value proposition of SureCheck, although future revenue from other SureCheck deployments likely will be more representative of the software-as-a-service model we are utilizing, as the magnitude of the revenue recognized during the quarter reflects the scale of this particular deployment. Another software-as-a-service initiative, ATRIO®, which is our cloud-based property management solution for hotels, was formally deployed with a launch partner during the first quarter. ATRIO has received considerable recognition, from industry analysts, trade journals, and potential customers, all acknowledging the platform's significant innovations. While still early in its rollout, ATRIO's initial market traction has exceeded our expectations."

Mr. Domorski, describing the performance of the Government segment, continued, "Our Government business showed steady profitability for the first quarter year over year. Quarterly revenues in our Government segment rose 19.2% year over year, but was essentially unchanged sequentially, reflecting the impact of the large U.S. Army contract

awarded early in the fourth quarter of 2011. A highlight during the quarter was our announcement that the world leader in geographic information system software had chosen our GV Video Framework (Gv2F™) to support the introduction of full motion video capabilities into that company's latest product release. We see this as confirmation of our effort to create recurring revenue streams from our significant technical expertise in highly sophisticated areas such as geospatial technology."

Mr. Domorski concluded, "Our newest product initiatives are being well received in their respective markets, and we are enthusiastic they will be meaningful contributors to our future."

Certain information in this release or statements made by representatives of PAR Technology from time to time may contain forward-looking statements. Any statements in this document that do not describe historical facts are forward-looking statements. Forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Investors are cautioned that all forward-looking statements involve risks and uncertainties, including without limitation, delays in new product introduction, risks in technology development and commercialization, risks in product development and market acceptance of and demand for the Company's products, risks of downturns in economic conditions generally, and in the quick service sector of the restaurant market specifically, risks of intellectual property rights associated with competition and competitive pricing pressures, risks associated with foreign sales and high customer concentration, and other risks detailed in the Company's filings with the Securities and Exchange Commission.

#### About PAR Technology Corporation

PAR Technology Corporation's stock is traded on the New York Stock Exchange under the symbol PAR. PAR has two operating segments:

- PAR's Hospitality Technology segment has been a leading provider of restaurant, hotel and retail technology for more than 30 years and offers technology solutions for the full spectrum of restaurant operations, from large chain and independent table service restaurants to international quick service chains. PAR also offers a range of products targeted at food safety applications. For the hotel and resort market, PAR markets hotel management software systems that provide a complete suite of powerful tools for guest management, recreation management, and timeshare/condo management. PAR provides the spa industry a leading management application that is specifically designed to support the unique needs of the resort spa and day spa markets, a rapidly growing hospitality segment. Products from PAR also can be found in retailers, cinemas, cruise lines, stadiums and food service companies.
- PAR's Government segment is comprised of PAR Government Systems Corporation, which develops and delivers geospatial and full motion video solutions to our customers that include federal/state governments and industry, and Rome Research Corporation, which is a leading provider of communications and information technology support services to the United States Department of Defense.
