President's Letter

Dear Shareowner,

The U.S. stock market rallied sharply through the third quarter of 2012 amid a sluggish, but nonetheless growing, U.S. economy. We have been cautiously optimistic about the U.S. from the start of the year, and the economic data continue to be encouraging. The housing and auto sectors are benefitting from record-low interest rates. The climate for consumer and business credit has improved, and inflation appears to be subdued. While corporate profits slowed in the third quarter, many U.S. companies continue to have strong balance sheets and to pay attractive dividends* compared to fixed-income securities.

All of these factors contributed to gains for investors who owned riskier assets, including equities and higher-yielding corporate bonds. Year to date

Edgar Filing: PIONEER HIGH INCOME TRUST - Form N-CSR

through September 30, 2012, the Standard & Poor's 500 Index returned 16.35%. In fixed income, the Bank of America Merrill Lynch High Yield Master II Index was up by 12.02% during the same period, while the Barclays Capital Aggregate Bond Index gained 3.99%. Treasury bonds, by contrast, generated a comparatively sluggish return of 1.70%, as measured by the Barclays Capital Intermediate Treasuries Index.

Despite this generally positive picture during the first nine months of 2012, investors face powerful macroeconomic challenges in the months ahead. These include the threat of a so-called "fiscal cliff" in the U.S. budget process after the November elections, the European sovereign-debt crisis, and slowing growth in both Europe and China. Investors can continue to count on market volatility tied to these factors, although we remain optimistic that the underlying economic trends are moving in the right direction.

At Pioneer, we have long advocated the benefits of staying diversified** and investing for the long term. And while diversification alone does not assure a profit or protect against loss in a declining market, we believe in actively seeking out opportunities in undervalued securities and sectors around the globe. Our advice, as always, is to work closely with a trusted financial advisor to discuss your goals and work together to develop an investment strategy that meets your individual needs. There is no single best strategy that works for every investor.

* Dividends are not guaranteed.

** Diversification does not assure a profit or protect against loss in a declining market.

Pioneer's investment professionals focus on finding good opportunities in both equity and bond markets using the same disciplined investment approach we have used since 1928. Our strategy is to identify undervalued individual securities with the greatest potential for success, carefully weighing risk against reward. Edgar Filing: PIONEER HIGH INCOME TRUST - Form N-CSR

Portfolio Management Discussion | 9/30/12

Higher-yielding investments performed well during the six-month period ended September 30, 2012 as interventions by major central banks around the world eased immediate worries about the underpinnings of the global economic recovery. In the following interview, Andrew Feltus discusses the factors that influenced the performance of Pioneer High Income Trust during the six-month period ended September 30, 2012. Mr. Feltus, senior vice president and portfolio manager at Pioneer and a member of Pioneer's fixed-income team, is responsible for day-to-day management of the Trust.

Q How did Pioneer High Income Trust perform during the six-month period ended September 30, 2012?

A Pioneer High Income Trust returned 6.41% at net asset value and 17.61% at market price during the six-month period ended September 30, 2012. During the same six-month period, the Trust's benchmark, the Bank of America Merrill Lynch (BofA ML) High Yield Master II Index, returned 6.53%. The BofA ML High Yield Master II Index is a commonly accepted measure of the performance of high-yield securities. During the same six-month period, the average return (at market price) of the 38 closed-end funds in Lipper's High Current Yield Closed End Funds category (which may or may not be leveraged), was 10.27%.

The shares of the Trust were selling at a 36.9% premium to net asset value at the end of the six-month period.

Unlike the Trust, the BofA ML High Yield Master II does not use leverage. While the use of leverage can increase investment opportunity, it also can increase investment risk.

On September 30, 2012, the standardized 30-day SEC yield on the Trust's shares was 11.75%.

Q How would you describe the investment environment during the six-month period ended September 30, 2012?

A The six months ended September 30, 2012, saw a continuance of the pattern of alternating periods when risky asset classes moved in and out of favor in the capital markets, while the general market trend favored investments in securities that would benefit from a growing economy. As the pattern persisted, global economic events seemed to have as much of an influence on market trends as domestic issues, with investors closely watching developments in China and Europe as well as in the United States. At the start of the period, on April 1, 2012, high-yield bonds and other perceived riskier asset classes remained in favor with the market, but sentiment

4 Pioneer High Income Trust | Semiannual Report | 9/30/12

abruptly changed as evidence mounted that growth in China and the rest of Asia was slowing, and that the sovereign-debt problems of several European nations had not been solved. In the U.S., fears about the strength of the economic recovery were exacerbated when some corporations began announcing disappointing profit growth. Corporate bonds and other credit-sensitive securities fell out of favor in the spring of 2012, amid renewed fears about a potential global economic slowdown.

The market downturn continued through much of the summer of 2012, until the announcements by central banks--particularly the European Central Bank (ECB) and the U.S. Federal Reserve System (the Fed)--of their intentions

Edgar Filing: PIONEER HIGH INCOME TRUST - Form N-CSR

to inject more liquidity into the global financial system in an effort to stimulate economic growth and encourage job creation. The ECB announced in August 2012 that it could become more active in buying the short-term debt of peripheral European nations, including Greece and Spain, in an effort to keep borrowing rates low for national governments on the Continent. Shortly after that, the Fed announced its third round of quantitative easing ("QE3") in an effort to encourage lower interest rates through the purchasing of mortgage-backed securities in the open market. Additionally, monetary authorities in China announced that they also were lowering short-term interest rates and easing credit conditions.

The combination of the central banks' announcements helped trigger a sharp rally in the financial markets, and high-yield and other credit-sensitive securities rallied through the end of the period (September 30, 2012), outperforming higher-quality securities.

Q How did you manage the Trust in the prevailing market environment during the six-month period ended September 30, 2012, and how did the Trust's positioning influence its performance during the period?

A The Trust's management team consistently pursues a low-turnover strategy, maintaining a portfolio of well-seasoned investments. Domestic high-yield corporate bonds represented the largest component of the Trust's total investment portfolio during the six-month period ended September 30, 2012. The Trust's positioning helped to mute the effects of the market volatility we experienced during the six-month period, with the Trust's portfolio holding up relatively well when the market turned downward, but not registering as many gains when the market rallied. With the added help from the use of leverage, the Trust handily outperformed the benchmark BofA ML High Yield Master II Index during the six-month period, and continued to deliver above-average income.

At the end of the period on September 30, 2012, domestic high-yield corporate bonds accounted for 56% of the Trust's total investment portfolio, with international high-yield debt representing another 12%. Bank loans represented 5% of the Trust's total investment portfolio, and emerging

Pioneer High Income Trust | Semiannual Report | 9/30/12 5

markets and convertible bonds each represented 4% of the Trust's total investment portfolio. Cash and cash-equivalents represented nearly 6% of the Trust's total investment portfolio at period-end. The Trust also had exposures to investment-grade corporate bonds, and event-linked ("catastrophe") bonds issued by insurance companies, among other asset classes. The Trust's cash position was at higher-than-average levels at period-end.

Q What individual securities or investment decisions had the most influence on the Trust's performance, either positive or negative, during the six-month period ended September 30, 2012?

A Some of the Trust's best individual performers during the six-month period were bond holdings that appreciated after the issuing companies were acquired and their old debt was retired. They included the securities of theater chain AMC, which was acquired by foreign investors, and the debt of packaging company BWAY, which was the subject of a buyout deal from a private equity investor. Additionally, two issuers--fast food chain Burger King and satellite communications company Intelsat--strengthened their finances by deciding to go public, which resulted in gains for the Trust's investments in the two companies.

Edgar Filing: PIONEER HIGH INCOME TRUST - Form N-CSR

By sector, the Trust's holdings of bonds of homebuilders performed well during the six-month period, as the group recovered after housing sales and construction trends appeared to bottom out and stabilize. The debt of Beazer Homes USA was a standout for the Trust in the homebuilding group. The Trust's securities in health care generally recovered during the six-month period, as most of the group bounced back from the price losses experienced in 2011, when investors were more concerned about uncertainties created by passage of the U.S. Affordable Care Act. A notable example of an outperformer in the Trust's portfolio was the debt of Kindred Health Care, a home health care provider.

Despite the overall benchmark-relative outperformance during the six-month period, the Trust's portfolio did have some disappointing investments, particularly in the more cyclical areas of the economy (that is, groups that are highly exposed to changes in the economic cycle). A weakening demand for coal hurt the values of the Trust's bond holdings of coal producers such as James River Coal and Bumi Capital, the latter of which operates primarily in Indonesia. Similarly, the Trust's holdings in both stainless steel producer Aperam, based in Europe, and steel producer Essar Steel, operating in the U.S. and Canada, were affected by slowing economic trends. The Trust's positions in the bonds of several other metals producers also underperformed during the six-month period as base metal prices declined. Similarly, returns from the Trust's holdings of chemical companies tended to be weak.

6 Pioneer High Income Trust | Semiannual Report | 9/30/12

The Trust had one investment that defaulted during the six-month period: KV Pharmaceutical. The company failed to meet its debt obligations as a result of difficulties in enforcing its exclusivity production rights for a drug product. The Trust's KV investment was 0.18% of the Trust's total net assets, however, and did not have a significant impact on performance.

Q How did the level of leverage in the Trust change over the six months ended September 30, 2012?

A At the end of the six-month period, 28.1% of the Trust's total managed assets were financed by leverage, compared with 28.5% at the start of the period on April 1, 2012. The change was due to fluctuations in the values of securities in which the Trust had invested.

Q What is your investment outlook?

A The fundamentals supporting both the economy and corporate profits appear solid, but in the short term, we expect that the capital markets will be highly affected by events that occur as the U.S. government approaches the so-called "fiscal cliff" budget scenario at the end of 2012. Congress is not expected to take any action until sometime after the November elections on three significant financial challenges: the nation's debt ceiling; sequestration, which calls for unspecified, but deep, across-the-board spending cuts in the absence of a budget agreement; and the automatic end of the Bush-era tax cuts. If Congress and the President cannot come to an agreement, the "fiscal cliff" would be reached. Obviously, the outcome of the November elections will have a major influence on how all three issues will be approached.

If there were a successful resolution to the nation's immediate debt, spending and tax issues, we believe we would see less market volatility and a return by investors to focusing on fundamental investment principles. While the nation's economic growth, as measured by gross

Edgar Filing: PIONEER HIGH INCOME TRUST - Form N-CSR

domestic product, clearly slowed in the first and second quarters of 2012, we think the prospects for improving economic conditions are good. The more accommodative stances by the major central banks in the U.S., Europe, China and Japan should help to encourage economic expansion as well as an improvement in corporate profits. We think those factors should encourage a higher level of economic growth, especially if the U.S. manages to avoid the "fiscal cliff."

In an environment of extremely low interest rates, we think there should be continuing investor appetite for corporate bonds and other credit-sensitive securities that offer yield premiums over high-grade debt. Nevertheless, the currently low absolute level of interest rates does limit the total-return potential of fixed-income investments in general.

Pioneer High Income Trust | Semiannual Report | 9/30/12 7

In this environment, we plan to remain cautious and be particularly selective in choosing investments for the Trust. We expect to continue to maintain a larger-than-normal cash position in the Trust's portfolio, which should give us the flexibility to move aggressively should investment opportunities present themselves.

As we enter the final quarter of 2012, the Trust's dividend yield remains solid, although investors should be aware that any increase in short-term interest rates could increase the Trust's borrowing costs and have an effect on the dividend yield.

Please refer to the Schedule of Investments on pages 13-37 for a full listing of Trust securities.

Investments in high-yield or lower-rated securities are subject to greater-than-average risk.

The Trust may invest in securities of issuers that are in default or that are in bankruptcy.

Investing in foreign and/or emerging markets securities involves risks relating to interest rates, currency exchange rates, economic, and political conditions.

When interest rates rise, the prices of fixed-income securities in the Trust will generally fall. Conversely, when interest rates fall the prices of fixed-income securities in the Trust will generally rise.

Investments in the Trust are subject to possible loss due to the financial failure of the issuers of the underlying securities and their inability to meet their debt obligations.

The Trust may invest up to 50% of its total assets in illiquid securities. Illiquid securities may be difficult to dispose of at a fair price at the times when the Trust believes it is desirable to do so, and their market price is generally more volatile than that of more liquid securities. Illiquid securities are also more difficult to value and investment of the Trust's assets in illiquid securities may restrict the Trust's ability to take advantage of market opportunities.

The Trust currently uses leverage through the issuance of preferred shares. Leverage creates significant risks, including the risk that the Trust's income or capital appreciation will not be sufficient to cover the cost of leverage, which may adversely affect the return for the holders of common shares. Since February of 2008, regularly scheduled auctions for the Trust's preferred shares

Edgar Filing: PIONEER HIGH INCOME TRUST - Form N-CSR

have failed and preferred shareowners have not been able to sell their shares at auction. The Board of Trustees of the Trust has considered, and continues to consider, this issue.

The Trust is required to maintain certain regulatory and rating agency asset coverage requirements in connection with its outstanding preferred shares. In order to maintain required asset coverage levels, the Trust may be required to alter the composition of its investment portfolio or take other actions, such as

8 Pioneer High Income Trust | Semiannual Report | 9/30/12

redeeming preferred shares with the proceeds from portfolio transactions, at what might be inopportune times in the market. Such actions could reduce the net earnings or returns to holders of the Trust's common shares over time.

Risks of investing in the Trust are discussed in greater detail in the Trust's original offering documents relating to its common shares and shareowner reports issued from time to time.

These risks may increase share price volatility.

Past performance is no guarantee of future results, and there is no guarantee that market forecasts discussed will be realized.

Any information in this shareowner report regarding market or economic trends or the factors influencing the Trust's historical or future performance are statements of opinion as of the date of this report. These statements should not be relied upon for any other purposes.

Call 1-800-225-6292 or visit us.pioneerinvestments.com for the most recent month-end performance results. Current performance may be lower or higher than the performance data quoted.

Performance data shown represents past performance. Past performance is no guarantee of future results. Investment return and market price will fluctuate, and your shares may trade below NAV, due to such factors as interest rate changes and the perceived credit quality of borrowers.

Total investment return does not reflect broker sales charges or commissions. All performance is for common shares of the Trust.

Closed-end funds, unlike open-end funds, are not continuously offered. There is a one-time public offering and, once issued, shares of closed-end funds are sold in the open market through a stock exchange and frequently trade at prices lower than their NAV. NAV per common share is total assets less total liabilities, which includes preferred shares, divided by the number of common shares outstanding.

When NAV is lower than market price, dividends are assumed to be reinvested at the greater of NAV or 95% of the market price. When NAV is higher, dividends are assumed to be reinvested at prices obtained under the Trust's dividend reinvestment plan.

The performance table and graph do not reflect the deduction of fees and taxes that a shareowner would pay on Trust distributions or the sale of Trust shares.

Index comparison begins April 30, 2002. The Bank of America Merrill Lynch High Yield Master II Index is a commonly accepted measure of the performance of high yield securities. Index returns are calculated monthly, assume reinvestment of dividends and, unlike Trust returns, do not reflect any fees, expenses or sales charges. The Index does not employ leverage. It is not possible to invest directly in the Index.

Notes to Financial Statements | 9/30/12 (Consolidated) (unaudited)

1. Organization and Significant Accounting Policies

Pioneer High Income Trust (the Trust) was organized as a Delaware statutory trust on January 30, 2002. Prior to commencing operations on April 26, 2002, the Trust had no operations other than matters relating to its organization and registration as a diversified, closed-end management investment company under the Investment Company Act of 1940, as amended. The investment objective of the Trust is to seek a high level of current income and the Trust may, as a secondary objective, also seek capital appreciation to the extent that it is consistent with its investment objective.

The Trust's financial statements have been prepared in conformity with U.S. generally accepted accounting principles that require the management of the Trust to, among other things, make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of income, expenses and gain or loss on investments during the reporting period. Actual results could differ from those estimates.

The following is a summary of significant accounting policies followed by the Trust in the preparation of its financial statements, which are consistent with those policies generally accepted in the investment company industry:

A. Security Valuation

Security transactions are recorded as of trade date. Investments in loan interests are valued in accordance with guidelines established by the Board of Trustees at the mean between the last available bid and asked prices from one or more brokers or dealers as obtained from Loan Pricing Corporation. Loan interests for which no reliable price quotes are available will be valued by Loan Pricing Corporation through the use of pricing matrices to determine valuations. Fixed-income securities with remaining maturity of more than sixty days are valued at prices supplied by independent pricing services, which consider such factors as market prices, market events, quotations from one or more brokers, Treasury spreads, yields, maturities and ratings. Valuations may be supplemented by dealers and other sources, as required. Equity securities that have traded on an exchange are valued at the last sale price on the principal exchange where they are traded. Equity securities that have not traded on the date of valuation or securities for which sale prices are not available, generally are valued using the mean between the last bid and asked prices. Short-term fixed income securities with remaining maturities of sixty days or less generally are valued at amortized cost. Money market mutual funds

Edgar Filing: PIONEER HIGH INCOME TRUST - Form N-CSR

are valued at net asset value.

Pioneer High Income Trust | Semiannual Report | 9/30/12 43

Trading in foreign securities is substantially completed each day at various times prior to the close of the NYSE. The values of such securities used in computing the net asset value of the Trust's shares are determined as of such times.

Securities or loan interests for which independent pricing services are unable to supply prices or for which market prices and/or quotations are not readily available or are considered to be unreliable are valued using fair value methods pursuant to procedures adopted by the Board of Trustees. The Trust may use fair value methods if it is determined that a significant event has occurred after the close of the exchange or market on which the security trades and prior to the determination of the Trust's net asset value. Examples of a significant event might include political or economic news, corporate restructurings, natural disasters, terrorist activity or trading halts. Thus, the valuation of the Trust's securities may differ from exchange prices.

At September 30, 2012, three securities were valued using fair value methods (in addition to securities valued using prices supplied by independent pricing services) representing 0.3% of net assets applicable to common shareowners. Inputs used when applying fair value methods to value a security may include credit ratings, the financial condition of the company, current market conditions and comparable securities.

Discounts and premiums on debt securities are accreted or amortized, respectively, daily, into interest income on an effective yield to maturity basis with a corresponding increase or decrease in the cost basis of the security. Premiums and discounts related to certain mortgage-backed securities are amortized or accreted in proportion to the monthly paydowns. Interest income, including interest on income bearing cash accounts, is recorded on an accrual basis, net of unrecoverable foreign taxes withheld at the applicable country rates.

Dividend income is recorded on the ex-dividend date, except that certain dividends from foreign securities where the ex-dividend date may have passed are recorded as soon as the Trust becomes aware of the ex-dividend data in the exercise of reasonable diligence.

Gains and losses on sales of investments are calculated on the identified cost method for both financial reporting and federal income tax purposes.

B. Foreign Currency Translation

The books and records of the Trust are maintained in U.S. dollars. Amounts denominated in foreign currencies are translated into U.S. dollars using current exchange rates.

44 Pioneer High Income Trust | Semiannual Report | 9/30/12

Net realized gains and losses on foreign currency transactions, if any, represent, among other things, the net realized gains and losses on foreign currency contracts, disposition of foreign currencies and the difference between the amount of income accrued and the U.S. dollars actually received. Further, the effects of changes in foreign currency exchange rates on investments are not segregated in the Statement of Operations from the effects of changes in market prices of those

Edgar Filing: PIONEER HIGH INCOME TRUST - Form N-CSR

securities but are included with the net realized and unrealized gain or loss on investments.

C. Forward Foreign Currency Contracts

The Trust may enter into forward foreign currency contracts (contracts) for the purchase or sale of a specific foreign currency at a fixed price on a future date. All contracts are marked to market daily at the applicable exchange rates, and any resulting unrealized gains or losses are recorded in the Trust's financial statements. The Trust records realized gains and losses at the time a portfolio hedge is offset by entry into a closing transaction or extinguished by delivery of the currency. Risks may arise upon entering into these contracts from the potential inability of counterparties to meet the terms of the contracts and from unanticipated movements in the value of foreign currencies relative to the U.S. dollar (see Note 6).

D. Federal Income Taxes

It is the Trust's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its taxable income and net realized capital gains, if any, to its shareowners. Therefore, no federal income tax provision is required. Tax years for the prior three fiscal years remain subject to examination by federal and state tax authorities.

The amounts and characterizations of distributions to shareowners for financial reporting purposes are determined in accordance with federal income tax rules. Therefore, the sources of the Trust's distributions may be shown in the accompanying financial statements as from or in excess of net investment income or as from net realized gain (loss) on investment and foreign currency transactions, or as from paid-in capital, depending on the type of book/tax differences that may exist.

Pioneer High Income Trust | Semiannual Report | 9/30/12 45

The tax character of current year distributions payable to common and preferred shareowners will be determined at the end of the current taxable year. The tax character of distribution paid during the year ended March 31, 2012 was as follows:

The difference between book-basis and tax-basis unrealized appreciation is primarily attributable to the tax deferral of losses on wash sales, the realization for tax purposes of unrealized gains on certain foreign currency contracts, the difference between book and tax amortization methods for premiums and discounts on fixed income securities, the accrual of income on securities in default, and other book/tax temporary differences.

E. Risks

Information regarding the Trust's principal risks is contained in the Trust's original offering prospectus, with additional information included in the Trust's shareowner reports issued from time to time. Please refer to those documents when considering the Trust's principal risks. At times, the Trust's investments may represent industries or industry sectors that are interrelated or have common risks, making the Trust more susceptible to any economic, political, or regulatory developments or other risks affecting those industries and sectors.

46 Pioneer High Income Trust | Semiannual Report | 9/30/12

Under normal market conditions, the Trust invests at least 80% of its assets in below investment grade (high-yield) debt securities, loans and preferred stocks. Because the Trust's investments are concentrated in high-yield securities, the Trust is subject to risks of such securities. Below investment grade securities are commonly referred to as "junk bonds" and are considered speculative with respect to the issuer's capacity to pay interest and repay principal. The Trust's investments in certain foreign markets or countries with limited developing markets may subject the Trust to a greater degree of risk than in a developed market. These risks include disruptive political or economic conditions and the possible imposition of adverse governmental laws or currency exchange restrictions.

F. Repurchase Agreements

With respect to repurchase agreements entered into by the Trust, the value of the underlying securities (collateral), including accrued interest, is required to be equal to or in excess of the repurchase price. The collateral for all repurchase agreements is held in safekeeping in the customer-only account of the Trust's custodian or a subcustodian of the Trust. The Trust's investment adviser, Pioneer Investment Management, Inc. (PIM), is responsible for determining that the value of the collateral remains at least equal to the repurchase price.

G. Automatic Dividend Reinvestment Plan

All common shareowners whose shares are registered in their own names automatically participate in the Automatic Dividend Reinvestment Plan (the

Edgar Filing: PIONEER HIGH INCOME TRUST - Form N-CSR

Plan), under which participants receive all dividends and capital gain distributions (collectively, dividends) in full and fractional common shares of the Trust in lieu of cash. Shareowners may elect not to participate in the Plan. Shareowners not participating in the Plan receive all dividends and capital gain distributions in cash. Participation in the Plan is completely voluntary and may be terminated or resumed at any time without penalty by notifying American Stock Transfer & Trust Company, the agent for shareowners in administering the Plan (the Plan Agent), in writing prior to any dividend record date; otherwise such termination or resumption will be effective with respect to any subsequently declared dividend or other distribution.

If a shareowner's shares are held in the name of a brokerage firm, bank or other nominee, the shareowner can ask the firm or nominee to participate in the Plan on the shareowner's behalf. If the firm or nominee does not offer the Plan, dividends will be paid in cash to the shareowner of record. A firm or nominee may reinvest a shareowner's cash dividends in common shares of the Trust on terms that differ from the terms of the Plan.

Pioneer High Income Trust | Semiannual Report | 9/30/12 47

Whenever the Trust declares a dividend on common shares payable in cash, participants in the Plan will receive the equivalent in common shares acquired by the Plan Agent either (i) through receipt of additional unissued but authorized common shares from the Trust or (ii) by purchase of outstanding common shares on the New York Stock Exchange or elsewhere. If, on the payment date for any dividend, the net asset value per common share is equal to or less than the market price per share plus estimated brokerage trading fees (market premium), the Plan Agent will invest the dividend amount in newly issued common shares. The number of newly issued common shares to be credited to each account will be determined by dividing the dollar amount of the dividend by the net asset value per common share on the date the shares are issued, provided that the maximum discount from the then current market price per share on the date of issuance does not exceed 5%. If, on the payment date for any dividend, the net asset value per common share is greater than the market value (market discount), the Plan Agent will invest the dividend amount in common shares acquired in open-market purchases. There are no brokerage charges with respect to newly issued common shares. However, each participant will pay a pro rata share of brokerage trading fees incurred with respect to the Plan Agent's open-market purchases. Participating in the Plan does not relieve shareowners from any federal, state or local taxes which may be due on dividends paid in any taxable year. Shareowners holding Plan shares in a brokerage account may not be able to transfer the shares to another broker and continue to participate in the Plan.

2. Management Agreement

PIM, a wholly owned indirect subsidiary of UniCredit S.p.A. (UniCredit), manages the Trust's portfolio. Management fees payable under the Trust's Advisory Agreement with PIM are calculated daily at the annual rate of 0.60% of the Trust's average daily managed assets. "Managed assets" means (a) the total assets of the Trust, including any form of investment leverage, minus (b) all accrued liabilities incurred in the normal course of operations, which shall not include any liabilities or obligations attributable to investment leverage obtained through (i) indebtedness of any type (including, without limitation, borrowing through a credit facility of the issuance of debt securities), (ii) the issuance of preferred stock or other similar preference securities, and/or (iii) any other means. For the period ended September 30, 2012, the net management fee was 0.60% of the Trust's average daily managed assets, which was

Edgar Filing: PIONEER HIGH INCOME TRUST - Form N-CSR

equivalent to 0.84% of the Trust's average daily net assets attributable to the common shareowners.

48 Pioneer High Income Trust | Semiannual Report | 9/30/12

In addition, under PIM's management and administration agreements, certain other services and costs are paid by PIM and reimbursed by the Trust. At September 30, 2012, \$270,131 was payable to PIM related to management costs, administrative costs and certain other reimbursements and is included in "Due to affiliates" and "Administration fee" on the Statement of Assets and Liabilities.

Effective April 2, 2012, PIM has retained Brown Brothers Harriman & Co. (BBH) to provide certain administrative and accounting services to the Trust on its behalf. For such services, PIM pays BBH a monthly fee at an annual rate of 0.025% of the Trust's average daily managed assets subject to a minimum monthly fee of \$6,250. Previously, PIM had retained State Street Bank and Trust Company (State Street) to provide such services. PIM paid State Street a monthly fee at an annual rate of 0.07% of the Trust's average daily managed assets in excess up to \$500 million, subject to a minimum monthly fee of \$10,000. Neither BBH nor State Street received compensation directly from the Trust for providing such services.

3. Transfer Agents

Pioneer Investment Management Shareholder Services, Inc. (PIMSS), a wholly owned indirect subsidiary of UniCredit, through a sub-transfer agency agreement with American Stock Transfer & Trust Company, provides substantially all transfer agent and shareowner services related to the Trust's common shares at negotiated rates. Deutsche Bank Trust Company Americas (Deutsche Bank) is the transfer agent, registrar, dividend paying agent and auction agent with respect to the Trust's Auction Market Preferred Shares (AMPS). The Trust pays Deutsche Bank an annual fee, as is agreed to from time to time by the Trust and Deutsche Bank, for providing such services.

In addition, the Trust reimburses PIMSS for out-of-pocket expenses incurred by PIMSS related to shareowner communications activities such as proxy and statement mailings and outgoing phone calls.

4. Basis for Consolidation for the Pioneer High Income Trust

The consolidated financial statements of the Trust include the accounts of Blaze Holding HINCT, Inc. ("the Subsidiary"). All intercompany accounts and transactions have been eliminated in consolidation. The Subsidiary, a Delaware corporation, was incorporated on February 10, 2011 and is wholly-owned and controlled by the Trust. It is intended that the Trust will remain the sole shareholder of, and will continue to control, the Subsidiary. The Subsidiary acts as an investment vehicle for the Trust's interest in Blaze Recycling and Metals LLC, Class A Units. As of September 30, 2012, the Subsidiary represented approximately \$626,227 or approximately 0.2% of the net assets applicable to the common shareholders of the Trust.

Pioneer High Income Trust | Semiannual Report | 9/30/12 49

5. Expense Offset Arrangement

The Trust has entered into an arrangement with its custodian whereby credits realized as a result of uninvested cash balances are used to reduce a portion of the Trust's custodian expenses. For the six months ended September 30, 2012, the Trust expenses were not reduced under such arrangement.

Edgar Filing: PIONEER HIGH INCOME TRUST - Form N-CSR

6. Forward Foreign Currency Contracts

During the six months ended September 30, 2012, the Trust entered into various forward foreign currency contracts that obligate the Trust to deliver or take delivery of currencies at specified future maturity dates. Alternatively, prior to the settlement date of a forward foreign currency contract, the Trust may close out such contract by entering into an offsetting contract. The average value of contracts open during the six months ended September 30, 2012 was \$8,667,932. At September 30, 2012, the Trust had no outstanding settlement contracts.

Open portfolio hedges at September 30, 2012, were as follows:

Total					\$ (218,191)

7. Unfunded Loan Commitments

As of September 30, 2012, the Trust had unfunded loan commitments of \$3,950,000 (excluding unrealized appreciation on this commitment of \$19,750 as of September 30, 2012) which could be extended at the option of the borrower, pursuant to the following loan agreements:

Borrower	Par	Cost	Value	Unrealized Gain
Cequel Communications LLC	\$ 1,500,000	\$ 1,500,000	\$ 1,507,500	\$ 7,500

Total				\$ 19.750

There were no bridge loan commitments outstanding at September 30, 2012.

8. Trust Shares

There are an unlimited number of common shares of beneficial interest authorized.

50 Pioneer High Income Trust | Semiannual Report | 9/30/12

Transactions in common shares of beneficial interest for the periods ended September 30, 2012 and March 31, 2012 were as follows:

Edgar Filing: PIONEER HIGH INCOME TRUST - Form N-CSR

	9/30/12	3/31/12
Shares outstanding at beginning of period	28,213,163	27,999,225
Reinvestment of distributions	102,224	213,938
Shares outstanding at end of period	28,315,387	28,213,163

The Trust may classify or reclassify any unissued shares of beneficial interest into one or more series of preferred shares of beneficial interest. As of September 30, 2012, there were 6,010 AMPS as follows: Series M7-2,020, Series W28-2,020 and Series TH7-2,000.

Dividends on Series M7 and Series TH7 are cumulative at a rate which is to be reset every seven days based on the results of an auction. Dividends on Series W28 are also cumulative at a rate to be reset every 28 days based on the results of an auction. An auction fails if there are more AMPS offered for sale than there are buyers. When an auction fails, the dividend rate for the period will be the maximum rate on the auction dates described in the prospectus for the AMPS. Preferred shareowners are not able to sell their AMPS at an auction if the auction fails. Since February 2008, the Trust's auctions related to the AMPS have failed. The maximum rate for each 7-day series is 150% of the 7 day commercial paper rate. The maximum rate for the 28-day series is 150% of the 30 day commercial paper rate. Dividend rates on AMPS ranged from 0.075% to 0.227% during the six months ended September 30, 2012.

The Trust may not declare dividends or make other distributions on its common shares or purchase any such shares if, at the time of the declaration, distribution or purchase, the Trust does not comply with the asset coverage ratios described in the prospectus for the AMPS.

The AMPS are redeemable at the option of the Trust, in whole or in part, on any dividend payment date at \$25,000 per share plus any accumulated or unpaid dividends, whether or not declared. The AMPS are also subject to mandatory redemption at \$25,000 per share plus any accumulated or unpaid dividends, whether or not declared, if certain requirements relating to the composition of the assets and liabilities of the Trust as set forth in the Statement of Preferences are not satisfied.

The holders of AMPS have voting rights equal to the holders of the Trust's common shares (one vote per share) and will vote together with holders of the common shares as a single class. Holders of AMPS are also entitled to elect two of the Trust's Trustees. In addition, the Investment Company Act of 1940, as amended, requires that along with approval by shareowners that might otherwise be required, the approval of the holders of a majority of any

outstanding preferred shares, voting separately as a class, would be required to (a) adopt any plan of reorganization that would adversely affect the preferred shares and (b) take any action requiring a vote of security holders, including, among other things, changes in the Trust's subclassification as a closed-end management investment company or changes in its fundamental investment restrictions.

PIONEER FUNDS

APPROVAL OF AUDIT, AUDIT-RELATED, TAX AND OTHER SERVICES PROVIDED BY THE INDEPENDENT AUDITOR

SECTION I - POLICY PURPOSE AND APPLICABILITY

The Pioneer Funds recognize the importance of maintaining the independence of their outside auditors. Maintaining independence is a shared responsibility involving Pioneer Investment Management, Inc ("PIM"), the audit committee and the independent auditors.

The Funds recognize that a Fund's independent auditors: 1) possess knowledge of the Funds, 2) are able to incorporate certain services into the scope of the audit, thereby avoiding redundant work, cost and disruption of Fund personnel and processes, and 3) have expertise that has value to the Funds. As a result, there are situations where it is desirable to use the Fund's independent auditors for services in addition to the annual audit and where the potential for conflicts of interests are minimal. Consequently, this policy, which is intended to comply with Rule 210.2-01(C) (7), sets forth guidelines and procedures to be followed by the Funds when retaining the independent audit firm to perform audit, audit-related tax and other services under those circumstances, while also maintaining independence.

Approval of a service in accordance with this policy for a Fund shall also constitute approval for any other Fund whose pre-approval is required pursuant to Rule 210.2-01(c) (7) (ii).

In addition to the procedures set forth in this policy, any non-audit services that may be provided consistently with Rule 210.2-01 may be approved by the Audit Committee itself and any pre-approval that may be waived in accordance with Rule 210.2-01(c) (7) (i) (C) is hereby waived.

Selection of a Fund's independent auditors and their compensation shall be determined by the Audit Committee and shall not be subject to this policy.
