## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

### (1) General Business

The interim financial data is unaudited; however, in our opinion, it includes all adjustments, consisting only of normal recurring adjustments necessary for a fair statement of the results for the interim periods. The financial statements included herein have been prepared pursuant to the SEC's rules and regulations; accordingly, certain information and footnote disclosures normally included in GAAP financial statements have been condensed or omitted. The results of operations and cash flows for the nine months ended September 30, 2010 are not necessarily indicative of the results to be expected for future quarters or for the year ending December 31, 2010.

Our organization and business, the accounting policies we follow and other information, are contained in the notes to our consolidated financial statements filed as part of our 2009 Form 10-K. This quarterly report should be read in conjunction with such 10-K.

The accompanying consolidated financial statements include the accounts of Hallador Energy Company and its subsidiary. All significant intercompany accounts and transactions have been eliminated. We are engaged in the production of coal from an underground mine located in southwestern Indiana. We also own a 45% equity interest in Savoy Energy L.P., a private oil and gas company which has operations primarily in Michigan.

### (2) Stock Options and RSUs

On January 7, 2010 we allowed four Denver employees (non officers) a one-time opportunity to relinquish 1/3 of their vested options (115,833) for cash of \$679,000, the intrinsic value on such date. Equity was charged for this transaction. As a result of this transaction, we now have 434,167 outstanding stock options which are fully vested.

We have 1,148,000 restricted stock units outstanding. On December 16, 2010, 195,000 of those will vest.

### (3) Sunrise Coal Acquisition

Through a series of independent transactions which began in 2006 and ended in September 2009, we now own 100% of Sunrise Coal, LLC (Sunrise). At the end of 2006 and 2007 we owned 60% of Sunrise; at the end of 2008 we owned 80%; and at the end of 2009 we owned 100%.

### (4) Notes Payable

In December 2008, we entered into a new loan agreement with a bank consortium that provides for a \$40 million term loan and a \$30 million revolving credit facility. At September 30, 2010, we owe \$30 million on the term loan. We have outstanding letters of credit in the amount of \$6 million, which leaves about \$24 million available under the revolver. We pay a 2.75% fee on the letters of credit and a .5% commitment fee on the unused funds. Substantially all of Sunrise's assets are pledged under this loan agreement and we are the guarantor. The loan agreement requires customary covenants, required financial ratios and restrictions on dividends or distributions. The current interest rate is LIBOR- one month (0.28%) plus 2.50% or 2.78%.

In connection with the old loan agreements, we entered into two agreements swapping variable rates for fixed rates. Considering the two swap agreements, our current interest rate is about 5.7%. Accounting rules require us to recognize all derivatives on the balance sheet at estimated fair value. Derivatives that are not hedges must be adjusted to estimated fair value through earnings. We have no derivatives designated as a hedge. The recorded value of our bank debt approximates fair value as it bears interest at a floating rate.

(5) Equity Investment in Savoy

We own a 45% interest in Savoy Energy L.P., a private company engaged in the oil and gas business primarily in the State of Michigan. We account for our interest in Savoy using the equity method of accounting. Savoy uses the successful efforts method of accounting.

Below (in thousands) are a condensed balance sheet at September 30, 2010 and a condensed statement of operations for the nine months ended September 30, 2010 and 2009.

Current assets	\$9,173
Oil and gas properties, net	18,116
	\$27,289
Current liabilities	\$13,667
Partners' capital	13,622
	\$27,289

	2010	2009
Revenue	\$ 8,921	\$ 5,556
Expenses	(10,190 )	(7,668 )
Net loss	\$ (1,269 )	\$ (2,112 )

(6) Insurance

In late August we concluded to drop the insurance on our underground mining equipment which has a cost of about \$71 million. In September we purchased an insurance policy to cover our director and officers commonly referred to as a D&O policy; heretofore we did not have such coverage. In late October we formed a Delaware captive insurance company in compliance with Section 831 (b) of the Internal Revenue Code.

## ITEM 2. MD&A

THE FOLLOWING DISCUSSION UPDATES THE MD&A SECTION OF OUR 2009 FORM 10-K AND SHOULD BE READ IN CONJUNCTION THEREWITH.

Our consolidated financial statements should be read in conjunction with this discussion.

### New Underground Mining Project

We have leased over 17,000 acres in Vermilion County, Illinois. Leasing and exploratory drilling operations are ongoing. We continue to evaluate data and hope to declare a minable reserve early in 2011. If we are successful we would expect to receive a mining permit early in 2013.

Though we are cautiously optimistic about the project, we want to be clear that a great amount of research needs to be completed before we can determine if this is an economically developable reserve.

### Liquidity and Capital Resources

For the first nine months of 2010, we generated \$33.7 million in cash from operations. We do not anticipate any liquidity issues in the foreseeable future. We plan to fund future mine activity at our Carlisle Mine through cash from operations and, if necessary, draws from the remaining \$24 million on our revolver. Our capital expenditures budget for the remainder of 2010 is in the \$4-\$5 million range. Eventually, if and when we develop a new reserve, we intend to incur additional debt and restructure our existing credit facility.

On May 27, 2010 we declared a one-time cash dividend of \$0.10 per common share of which there were 27,782,028 outstanding. The cash dividend was paid July 16, 2010 to shareholders of record at the close of business July 9, 2010. Furthermore, our board approved that the \$0.10 dividend would also apply to the 1,150,000 outstanding restricted stock units and to the 434,167 outstanding stock options. The total cash payment for all the outstanding securities was about \$2.9 million. Next spring we plan to evaluate our cash position and funding requirements and decide if we will again declare a cash dividend.

Cash payments for income taxes were \$4.4 million for the first nine months of 2010. We don't expect to make any more payments for the 2010 tax year.

We have no material off-balance sheet arrangements.

## Results of Operations

### Nine Months Ended September 30, 2010 vs. 2009

For the first nine months of 2010, we sold 2,373,000 tons at an average price of \$42.41/ton. For the comparable 2009 period we sold 1,931,000 tons at an average price of \$44.09/ton. The lower price for 2010 compared to 2009 is due to the mix of our various contracts and corresponding prices.

Assuming we have no spot sales, we expect our coal sales for the remainder of 2010 (fourth quarter) to be 692,000 tons with an average price of \$41.50-\$42.50/ton.

Cost of coal sales averaged \$23.90/ton in 2010 compared to \$25.02 in 2009. The decrease was due primarily to improved mining conditions. Our mine employees totaled 341 at September 30, 2010 (309 at October 31, 2010) compared to 290 at September 30, 2009. We expect our cost of coal sales to average \$23-\$25/ton for the remainder of 2010.

The increase in DD&A was due to the increase in our coal sales and the additions to coal properties to support the higher production volumes.

SG&A increased primarily to the higher level of operations and to higher amortization of our restricted stock units (RSUs). Total RSU amortization for the first nine months of 2010 was \$1,625,000 compared to \$216,000 for 2009. Included in cost of coal sales for 2010 was \$536,000 for RSU amortization compared to nil for 2009.

On January 7, 2010 we allowed four Denver employees (non officers) a one-time opportunity to relinquish 1/3 of their vested options (115,833) for cash of \$679,000, the intrinsic value on such date. Equity was charged for this transaction. As a result of this transaction, we now have 434,167 outstanding stock options which are fully vested.

Interest expense for 2010 is higher primarily due to \$293,000 being capitalized in 2009 offset by lower interest expense due to lower debt levels. Interest rates have remained static for the periods. Because our mine expansion was completed in the summer of 2009, we are no longer capitalizing interest. Furthermore, included in interest expense for 2010 and 2009 is a credit of \$496,000 and \$647,000 respectively, for the change in the estimated fair value of our interest rate swaps.

Regarding Savoy, we recorded losses for both periods. The 2010 loss was lower due to successful drilling efforts; Savoy's oil production of 92,000 barrels for the first nine months of 2010 has almost tripled compared to the same period in 2009; and 2010 oil prices averaged \$72/barrel compared to \$53 for 2009. Gas production stayed about the same at 130,000 MCF but 2010 gas prices are lower. Currently, oil revenue comprises about 90% of Savoy's oil and gas revenue. Exploration costs for 2010 were \$4.9 million compared to \$1.9 million for 2009; the increase was due primarily to higher dry hole costs, higher geological and geophysical costs and higher impairment charges for undeveloped acreage. Savoy also experienced a one-time gain of \$280,000 during the first quarter of 2010 relating to an insurance claim settlement. Assuming oil prices do not materially decline, we expect Savoy to break even or record a small profit for the remainder of 2010 (fourth quarter).

Our effective tax rate was 38% and we expect that rate to continue for the remainder of 2010.

Three Months Ended September 30, 2010 vs. 2009

For the third quarter of 2010, we sold 811,000 tons at an average price of \$42.15/ton. For the comparable 2009 period, we sold 673,000 tons at an average price of \$43.90/ton. Assuming we have no spot sales, we expect our coal sales for the remainder of 2010 (fourth quarter) to be 692,000 tons with an average price of \$41.50-\$42.50/ton.

Cost of coal sales averaged \$22.66/ton for the third quarter of 2010 compared to \$25.11 in 2009. The decrease was due primarily to improved mining conditions.

The increase in DD&A was due to the increase in our coal sales and the additions to coal properties to support the higher production volumes.

SG&A increased primarily to the higher level of operations and to higher amortization of our restricted stock units (RSUs). Total RSU amortization for the third quarter of 2010 was \$569,000 compared to \$93,000 for 2009. Included in cost of coal sales for 2010 was \$143,000 for RSU amortization compared to nil for 2009.

Our effective tax rate was 34% due to a change in estimate of our effective rate for the year ending December 31, 2010. For the first six months we used a 40% rate and for the last six months we expect the rate to be in the 38% range.

#### New Accounting Pronouncements

None of the recent FASB pronouncements will have any material effect on us.

### ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Smaller reporting companies are not required to provide the information required by this item.

### ITEM 4 T. CONTROLS AND PROCEDURES

#### Disclosure Controls

We maintain a system of disclosure controls and procedures that are designed for the purposes of ensuring that information required to be disclosed in our SEC reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our CEO and CFO as appropriate to allow timely decisions regarding required disclosure.

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our CEO and CFO, of the effectiveness of the design and operation of our disclosure controls and procedures. Based upon that evaluation, our CEO and CFO concluded that our disclosure controls and procedures are effective for the purposes discussed above.

There has been no change in our internal control over financial reporting during the quarter ended September 30, 2010 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II - Other Information

ITEM 5. OTHER INFORMATION

Our principles are safety, honesty, and compliance. We firmly believe that these values comprise a dedicated workforce and with that, come high production. The core to this is our strong training programs that include accident prevention, workplace inspection and examination, emergency response, and compliance. We have currently budgeted over \$300,000 over the next nine months for management and employee safety and compliance training. We work with the Federal and State regulatory agencies to help eliminate safety and health hazards from our workplace and increase safety and compliance awareness throughout the mining industry. Our subsidiary, Sunrise Coal, LLC has not had a fatality since its establishment in 2005.

We are regulated by the Mine Safety and Health Administration (“MSHA”) under the Federal Mine Safety and Health Act of 1977 (“Mine Act”). MSHA inspects our mine on a regular basis and issues various citations and orders when it believes a violation has occurred under the Mine Act. We present information below regarding certain violations which MSHA has issued with respect to our mine. While assessing this information please consider that the number and cost of violations will vary depending on the MSHA inspector and can be contested and appealed, and in that process, are often reduced in severity and amount, and are sometimes dismissed. We are contesting 21 citations with MSHA; some involve the amount of the assessments and some involve the citation itself.

The disclosures listed below are provided pursuant to the recently enacted Dodd-Frank Act. It is our understanding that the SEC will propose some rules in November or December regarding these disclosures.

Sunrise Coal, LLC has not been issued written notice from MSHA of a pattern of, or the potential to have a pattern of, violations of mandatory health or safety standards that are of such a nature as could significantly and substantially cause and effect health or safety standards under section 104(e) of the Mine Act.

The table that follows outlines citations and orders issued to us by MSHA during the nine month period ended September 30, 2010. The citations and orders outlined below may differ from MSHA’s data retrieval system due to timing, special assessed citations, and other factors.

Definitions:

Section 104(a) Significant and Substantial Citations “S&S”: An alleged violation of a mining safety or health standard or regulation where there exists a reasonable likelihood that the hazard outlined will result in an injury or illness of a serious nature.

Section 104(b) Orders: Failure to abate a 104(a) citation within the period of time prescribed by MSHA. The result of which is an order of immediate withdraw of non-essential persons from the affected area until MSHA determines the violation has been corrected.

Section 104(d) Citations and Orders: An alleged unwarrantable failure to comply with mandatory health and safety standards.

Section 107(a) Orders: An order of withdraw for situations where MSHA has determined that an imminent danger exists.

Section 110(b)(2) Violations: An alleged flagrant violation issued by MSHA under section 110(b)(2) of the Mine Act.

Month	Section 104(a) Citations	Section 104(b) Orders	Section 104(d) Citation/Orders	Section 107(a) Orders	Section 110(b)(2) Violations	Proposed MSHA Assessments (in thousands)
January	6	0	0	0	0	\$19.5
February	4	0	0	0	0	8.1
March	3	0	0	0	0	8.2
April	2	0	0	0	0	3.3
May	6	0	0	0	0	9.8
June	6	0	3	0	0	45.6
July	7	0	0	0	0	14.8
