PART I

Item 1. Description of Business

GENERAL

Spindletop Oil & Gas Co. is an independent oil and gas company engaged in the exploration, development, production and acquisitions of oil and natural gas; the rental of oilfield equipment; and through one of its subsidiaries, the

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

gathering and marketing of natural gas. The terms the "Company", "We", "Us" or Spindletop are used interchangeably herein to refer to Spindletop Oil & Gas Co. ("SOG") and its wholly owned subsidiaries, Prairie Pipeline Co. ("PPC") and Spindletop Drilling Company ("SDC").

The Company has focused its oil and gas operations principally in Texas, although we operate properties in six states including: Texas, Oklahoma, New Mexico, Louisiana, Alabama and Arkansas. We operate a majority of our projects through the drilling and production phases. Our staff has a great deal of experience in the operations arena. We have traditionally leveraged the risks associated with drilling by obtaining industry partners to share in the costs of drilling. However, we typically retain a controlling interest in the prospects we drill.

In addition, the Company, through PPC, owns approximately 26.1 miles of pipelines located in Texas, which are used for the gathering of natural gas. These gathering lines are located in the Fort Worth Basin and are being utilized to transport the Company's natural gas as well as natural gas produced by third parties.

Website Access to Our Reports

We make available free of charge through our website, www.spindletopoil.com, our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on form 8-K, and all amendments to those reports as soon as reasonably practicable after such material is electronically filed with the Securities and Exchange Commission. Information on our website is not a part of this report

Operating Approach

We believe that a major attribute of the Company is its long history with, and extensive knowledge of, the Fort Worth Basin of Texas. Our technical staff has an average of over 22 years oil and gas experience, most of it in the Fort Worth Basin.

One of our strengths has been the ability of the Company to look at cost effective ways to grow our production. We have traditionally increased our reserve base in one of two ways. Initially, in the 1970's and 1980's, the Company obtained its production through an exploration and development drilling

- 3 -

program focused principally in the Fort Worth Basin of North Texas. Today, the Company has retained many of these wells as producing properties and holds a large amount of acreage by production in that Basin.

From the 1990's through 2003, the Company took advantage of the lower product prices by cost effectively adding to its reserve base through value-priced acquisitions. We found that through selective purchases we could make producing property acquisitions that were more cost effective than drilling.

During this time period, the Company acquired a large number of operated and non-operated oil and gas properties in various states.

From 2003 through the fourth quarter of 2008, we returned our focus to a strategy of development drilling with a focus on our Barnett Shale acreage. From 2009 we split our focus by looking for value-priced acquisitions combined with development drilling. In the current economic climate, we are continuing our efforts to acquire producing properties and taking a more conservative approach to development of our leasehold acreage. We are looking at growth

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

through acquisitions and limited drilling. With current lower natural gas prices and high costs to produce, we believe that it makes sense to carefully evaluate all our options and make sure that each transaction can be supported in today's lower price environment.

Strategic Business Plans

One of our key strategies is to enhance shareholder value through implementation of plans for controlled growth and development. The Company's long-term focus is to grow its oil and gas production through a strategic combination of selected property acquisitions, to the extent feasible, and an exploration and development program primarily based on developing its leasehold acreage. Additionally, the Company will continue to rework existing wells to increase production and reserves.

The Company's primary area of operation has been and will continue to be in Texas with an emphasis in the geological province known as the Fort Worth Basin. We want to capitalize on our strengths which include an extensive knowledge of the Fort Worth Basin, experience in operations in this geographic area, development of lease holdings, and utilization of existing infrastructure to minimize costs.

The Company will continue to generate and evaluate prospects using its own technical staff. The Company intends to fund operations primarily from cash flow generated by operations.

- 4 -

Project Significant Areas

The Company owns various interests in wells located in 15 states and the Company's operations are currently located in 6 of those states which include Alabama, Arkansas, Louisiana, Oklahoma, New Mexico and Texas.

The Company holds approximately 92,293 gross acres under lease in 15 states. The majority of the leases are held by production. A breakout of the Company's leasehold acreage by geographic area is as follows:

Geographic Area	Operated Properties		Non-Operated Properties		Total		Percent of Total	
	Gross Acres	Net Acres	Gross Acres	Net Acres	Gross Acres	Net Acres	Gross Acres	Net Acres
North Texas Including the Fort Worth Basin & Bend Arch	7,282	6,750	2,070	221	9,352	6,971	10.1	33.0
East Texas	2,613	2,245	7,629	543	10,242	2,788	11.1	13.2

Total	2,132,755 BOE	100.00 %

North Texas - Fort Worth Basin & Bend Arch

The Fort Worth Basin-Bend Arch Province has been the focal point of the Company since its inception. Our technical personnel have an average of 22 years of exploration, drilling, completing, and production experience extracting natural

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

gas and oil from both conventional and unconventional hydrocarbon deposits found across the basin. Furthermore, the Company maintains comprehensive and extensive dossiers of geologic and engineering data gathered from the province. Exploration and development drilling for hydrocarbons across the Fort Worth Basin-Bend Arch Province remain strong.

The Fort Worth Basin-Bend Arch Province is a major United States onshore natural gas-prone expanse containing multiple pay zones that range in depth from one thousand to nine thousand (1,000-9,000) feet. Improved advances in fracturing and stimulation technologies, which have unlocked natural gas and oil reserves from the hydrocarbon bearing Barnett Shale Formation; and thus, continue to bolster vigorous exploration and development activities that target conventional and unconventional reservoir reserves throughout the province.

The Barnett Shale is a thick blanket type natural gas bearing stratigraphic zone found throughout the Fort Worth Basin-Bend Arch Province. The natural gas reserves in place are significant; however, as a consequence of the extreme low permeability character of the shales, it has been technically challenging to produce these reserves. According to the United States Geological Survey assessment, an estimated 26.7 trillion cubic feet (TCF) of undiscovered natural gas, 98.5 MMBO of undiscovered oil, as well as a mean of 1.1 BBNGl of

- 6 -

undiscovered natural gas liquids reserves remain within the 54,000 square mile Fort Worth Basin-Bend Arch Province. More than 98 percent or approximately 26.2 TCF of the undiscovered natural gas is contained in the organic-rich Mississippian Barnett Shale. Combined, recent advances in hydraulic fracturing, completion procedures, as well as refined horizontal well drilling technologies continue to enable economic recovery of natural gas reserves from tight-gas reservoirs throughout the Fort Worth Basin-Bend Arch Province. Undiscovered conventional reservoir natural gas reserves are estimated to be 467 billion cubic feet of gas (BCFG) the majority of which is dissolved in conventional oil accumulations (source: United States Geological Survey Energy Resource Program).

The Company has 9,352 gross acres under lease across the prolific Fort Worth Basin-Bend Arch Province the majority of which, is held by production from the more shallow producing zones. The Company uses recent and emerging technologies, as well as proven extant practices to develop and produce oil and natural gas from the portfolio. Additionally, the Company has a dedicated well-trained team of employees and professional staff continually seeking low-risk profitable acquisition opportunities throughout the Fort Worth Basin-Bend Arch Province.

Barnett Shale

During the fourth quarter of 2008, the Poston #1 well, located on our Godley North Block, in Johnson County, Texas was drilled to the Barnett Shale Formation at a depth of 6,754 ft. and cased. The well was completed, placed on-line and went into sales with an initial rate of 400 mcf/gpd on August 2, 2010. The well is located in the Newark, E. (Barnett Shale) field. The Company owns a 91.0% working interest in this well. The well is currently producing at a rate of 40 mcf/gpd and 2 bswpd.

Additional Company activities in the North Texas area include the following:

North Texas

During the third quarter of 2010, the Company acquired non-operating working interests in 29 natural gas wells in Jack, Palo Pinto, Parker, and Wise Counties, Texas. At the time of acquisition, gross production from these wells

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

was approximately 416 mcfgpd and 3.4 bopd. Net production attributable to the Company's acquired interest was approximately 87 mcfgpd and 0.8 bopd. Working interests acquired range from 21.25% to 40.00%. Net revenue interests acquired range from 16.42% to 30.00%.

East Texas

The Company participated for a 45.00% non-operated working interest in the drilling of two wells operated by Giant Energy Co., LP, a related entity. The two wells are located in Nacogdoches County, Texas. The Giant Gas Unit #1 well was spud on November 11, 2009 and reached a total depth of 9,700 ft. on December 6, 2009. Production casing was set to a depth of 9,616 ft. through the Travis Peak Formation. The Giant Gas Unit #2 well was spud on June 1, 2010 and reached a total depth of 9,608 ft. on July 7, 2010. Production casing was

- 7 -

set to a depth of 9,605 ft. through the Travis Peak Formation. The wells are currently being worked on.

West Texas

During the first half of 2010, the Company participated in the drilling of four non-operated wells located in the Fuhrman-Mascho field in Andrews County, Texas. Three of the wells were cased, completed and placed in production during the second quarter of 2010. The fourth well was cased and completed on July 2, 2010 and placed in production on July 11, 2010. The Miles #13, #14, #15, and #16 wells had initial production rate of 148 bopd, 69 bopd, 99 bopd, and 76 bopd respectively, and 30 mcfgpd, 30 mcfgpd, 28 mcfgpd, and 16 mcfgpd respectively from the San Andres formation at an approximate depth of 4,750 ft. All of the wells on this lease are currently producing at a combined rate of 203 bopd and 95 mcfgpd. The Company owns a 4.69% working interest and a 3.28% net revenue interest in these wells.

Texas Panhandle

During the third quarter of 2010, the Company acquired operations of two wells in its Spearman SE block in Ochiltree County, Texas; the Pope #140-3 and Pope #140-4. The Company has a 100.00% working interest and an 81.25% net revenue interest in both of these wells. At the time of acquisition, the Pope #140-3 well was producing at a rate of 4 mcfgpd from the Horizon (Oswego) field from a perforated interval at 6,920 ft. - 6,930 ft. in the Oswego Formation. The Pope #140-4 well was producing at a rate of 24 mcfgpd from the Lips (Mississippian) field from a perforated interval at 8,294 ft. - 8,396 ft. in the Mississippian Formation. The Pope #3 well is currently producing at a rate of 3 mcfgpd and the Pope #4 well is currently producing at a rate of 23 mcfgpd.

South Texas

During the second quarter of 2010, the Company acquired working interests in five natural gas wells in Victoria County, Texas. The Company assumed operatorship of three of these wells effective April 1, 2010.

The Vaquero #1 well produces gas from the Rob Welder (Wilcox 9100) field in the Wilcox Group from a perforated interval of 9,314-9,346 ft. Current production from the Vaquero #1 is approximately 6 mcfgpd. The Vaquero "A" #2 well produces gas from the Welder Ranch field from a perforated interval of 12,026 - 12,090 ft. in the Wilcox Group. Current production from this well is approximately 4 mcfgpd. The Rob Welder #1 well produces gas from the McFaddin (5700) field from a perforated interval at 5,660 - 5,658 ft. in the Yegua Formation. Current production from this well is approximately 109 mcfgpd and 4 bswpd. The working interests in these three wells are 94.63%, 85.00%, and

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

100.00% with net revenue interests of 64.69%, 58.13%, and 68.00% respectively.

The interests acquired in the two remaining wells were non-operated working interests. The Company acquired a 25.00% non-operating working interest and 17.00% net revenue interest in the Welder Ranch #1 well which produces gas from the Rob Welder (Wilcox 10,400) field from the perforated interval of 10,480 ft.- 10,520 ft. in the Wilcox Group. Current gross production from this

- 8 -

well is approximately 11 mcfgpd. The Company acquired a 24.17% non-operating working interest and 16.44% net revenue interest in the Welder Ranch A #2 well which produces gas from the Marshall (Middle Wilcox) field from a perforated interval of 10,306 - 10,312 ft. in the Middle Wilcox Group. Current gross production from this well is approximately 99 mcfgpd and 0.4 bopd.

The Company acquired a 33.06% operated working interest and a 22.5% net revenue interest in the State Tract 39A-#1 gas well in Chambers County, Texas effective July 1, 2010. The State Tract 39A-#1 well produces gas from the Turtle Beach (Vicksburg) field from a perforated interval at 11,111 ft. - 11,148 ft. in the Vicksburg Formation. Gross gas production from this well at the time of acquisition was approximately 1,294 mcfgpd and 3 bopd. Production attributable to the Company's acquired interest was approximately 292 mcfgpd and 0.5 bopd. Currently, this well is shut-in.

On July 29, 2010 the Company spud its Hynes #28 well in Bee County, Texas. The well was drilled to a depth of 3,500 ft. to test the Catahoula Sands. The well was cased and completed and placed into production on August 14, 2010. The well's IPP (initial potential pumping) was 17 bopd and 20 bswpd from the Papalote, E. (3250-B) field at a perforated interval of 3,244 ft. - 3,346 ft. from the Catahoula Formation. The company owns a 100.00% working interest and a 60.84% net revenue interest in this well. The well is currently producing at a rate of approximately 10.5 bopd and 12 bswpd.

Additional Company activities outside of Texas include the following:

Oklahoma

Effective August 1, 2010, the Company acquired operations and working interests in four wells located in Major County and Canadian County, Oklahoma as follows:

The Irvan #1-22 well, located in Major County, produces natural gas from the N. Homestead field from a perforation interval ranging from 7,158 ft. - 7,306 ft. from the Inola and Chester formations. At the time of acquisition, the Irvan #1-22 well was producing natural gas at a rate of 6 mcfgpd and is currently producing at the same rate. The Company acquired a 100.00% working interest and a 75.00% net revenue interest in this well.

The Tobe #1-21 well, located in Major County, produces natural gas from the N. Homestead field from a perforation interval ranging from 7,158 ft. - 7,232 ft. from the Red Fork and Inola Formations. At the time of acquisition, the Tobe #1-21 well was shut-in and not producing. The Company acquired a 92.31% working interest and a 73.29% net revenue interest in this well.

The Faith #1-21 well, located in Canadian County, produces natural gas from the Watonga-Chickasha field from a perforation interval ranging from 10,882 ft. - 0,952 ft. from the Morrow Formation. At the time of acquisition, the Faith #1-21 well was shut-in and not producing. The Company acquired an 83.33% working interest and a 66.67% net revenue interest in this well.

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

- 9 -

The Lottie Jones #33-4 well, located in Canadian County, produces natural gas from the El Reno field from a perforation interval ranging from 8,750 ft. - 10,366 ft. from the Viola, Hunton, Mississippian and Red Fork formations. At the time of acquisition, the Lottie Jones #4 well was shut-in and not producing. The Company acquired a 97.43% working interest and a 74.64% net revenue interest in this well.

These wells were acquired for their behind the pipe potential. The Company plans to rework them at a future date and place them back into production, if successful.

New Mexico

Effective December 1, 2010, the Company acquired operations and working interests in four oil wells located in the Fowler East Field, one oil well located in the Teague Field, and one well located in the Dollarhide Field, Lea County, New Mexico as follows:

The Greenback State #1 well produces approximately 2 bopd, 1 mcfgpd, and 3 bswpd, from a perforation interval of 11,685 ft. - 11,839 ft. in the Ellenberger Formation. The Company acquired a 100.00% working interest and 80.25% net revenue interest in this oil well.

The Greenback State #2 well produces 4.2 bopd, 4 mcfgpd, and 30 bswpd from an open hole interval of 11,581 ft. - 11,641 ft. from the Ellenberger Formation. The Company acquired a 100.00% working interest and 77.75% net revenue interest.

The Greenback State #3 well produces 9.6 bopd, 8 mcfgpd, and 113 bswpd from an open hole interval between 11,630 ft. - 11,756 ft. in the Ellenberger Formation. The Company acquired a 100.00% working interest and 77.75% net revenue interest.

The Greenback State #7-1 well is producing from an open hole interval between 11,462 ft. - 11,568 ft. in the Ellenberger Formation. The well produces 16.3 bopd, 10 mcfgpd, and 96 bswpd. The Company acquired an 80.0% working interest and 70.0% net revenue interest.

The Greenback Federal #1 well produces from a perforation interval of 7,103 ft. - 7,311 ft. from the Abo Formation. The well is currently producing approximately 0.2 bopd. The Company acquired a 100.00% working interest and 82.50% net revenue interest.

The Hunt #23-1 well is producing approximately 3.1 bopd and 52 bswpd from an open hole interval between 10,928 ft. - 11,017 ft. in the Ellenberger Formation. The Company acquired a 97.10% working interest and a net revenue interest of 77.05%.

Effective December 1, 2010, the Company acquired non-operating working interests in four oil wells in the Monument Abo Field, Lea County New Mexico as follows:

-10 -

The Foster #3 well produces approximately 20.8 bopd and 25 mcfgpd from a perforation interval of 7,323 ft. - 7,428 ft. from the Abo Zone. The Company acquired a working interest of 40.37% and a net revenue interest of 29.27%.

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

The Royal Wulff #1 well produces from an interval of 7,258 ft. - 7,360 ft. from the Abo Formation. The well is currently shut in. The Company acquired a working interest of 40.25% and a Net Revenue interest of 30.19%.

The Royal Coachman #1 well produces approximately .033 mcf/gpd from a perforation interval of 7,330 ft. - 7,444 ft. in the Abo Formation. The Company purchased a working interest of 38.61% and a net revenue interest of 28.96%.

The Royal Trude #1 well produces approximately .09 bopd and 0.19 mcf/gpd from a perforation interval of 7,298 ft. - 7,315 ft. in the Abo Formation. The Company purchased a working interest of 12.00% and a net revenue interest of 9.00%.

The production rates referenced above for these New Mexico properties are as of the effective date.

For all of the aforementioned wells, the Company cautions that the initial production rates of new wells or production rates at the effective date of acquisition may not be an indicator of stabilized production rates or an indicator of the ultimate recoveries obtained.

Oil and Natural Gas Reserves

The net proved crude oil and gas reserves of the Company as of December 31, 2010 were 362,350 barrels of oil and condensate and 10.622 BCFG of natural gas. Based on SEC guidelines, the reserves were classified as follows:

Proved Developed Producing	327,750 BO and	8.106 BCFG
Proved Developed Non-Producing	34,120 BO and	0.648 BCFG
Proved Undeveloped	480 BO and	1.868 BCFG
Total Proved Reserves	362,350 BO and	10.622 BCFG

Only reserves that fell within the Proved classification were considered. Other categories such as Probable or Possible Reserves were not considered. No value was given to the potential future development of behind pipe reserves, untested fault blocks, or the potential for deeper reservoirs (other than Barnett Shale proved undeveloped reserves directly offset by producing wells which are slated for drilling in the next five years) underlying the Company's properties. Shut-in uneconomic wells and insignificant non-operated interests were excluded.

- 11 -

On a BOE (barrel of oil equivalent) basis (6 MCF/BOE), the net reserves are:

Natural Gas Reserves	1,770,405 BOE	83%
Oil Reserves	362,350 BOE	17%
Total Reserves	2,132,755 BOE	100%
Proved Developed Producing	1,678,946 BOE	79%
Proved Developed Non-Producing	142,077 BOE	7%
Proved Undeveloped	311,732 BOE	14%
Total Proved Reserves	2,132,755 BOE	100%

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

The Company has operational control over the majority of these reserves and can therefore to a large extent control the timing of development and production.

The Company's Operated Wells	1,864,327 BOE	87%
Non Operated Wells	268,428 BOE	13%
Total	2,132,755 BOE	100%

Financial Information Relating to Industry Segments

The Company has three identifiable business segments: exploration, development and production of oil and natural gas, gas gathering, and commercial real estate investment. Footnote 15 to the Consolidated Financial Statements filed herein sets forth the relevant information regarding revenues, income from operations and identifiable assets for these segments.

Narrative Description of Business

The Company is engaged in the exploration, development and production of oil and natural gas, and the gathering and marketing of natural gas. The Company is also engaged in commercial real estate leasing through the acquisition and partial occupancy of its corporate headquarters office building.

Principal Products, Distribution and Availability

The principal products marketed by the Company are crude oil and natural gas which are sold to major oil and gas companies, brokers, pipelines and distributors, and oil and gas properties which are acquired and sold to oil and gas development entities. Reserves of oil and gas are depleted upon extraction, and the Company is in competition with other entities for the discovery of new prospects.

The Company is also engaged in the gathering and marketing of natural gas through its subsidiary PPC, which owns 26.1 miles of pipelines and currently gathers approximately 1,793 mcf/gpd. Natural gas is gathered for a fee. Substantially all of the gas gathered by the Company is gas produced from wells that the Company operates and in which it owns a working interest.

- 12 -

The Company owns land and a two story commercial office building in Dallas, Texas, which it uses as its principal headquarters office. The Company leases the remainder of the building to non-related third party commercial tenants at prevailing market rates.

Patents, Licenses and Franchises

Oil and gas leases of the Company are obtained from the owner of the mineral estate. The leases are generally for a primary term of one to five years, and in some instances as long as ten years, with the provision that such leases shall be extended into a secondary term and will continue during such secondary term as long as oil and gas are produced in commercial quantities or other operations are conducted on such leases as provided by the terms of the leases. It is generally required that a delay rental be paid on an annual basis during the primary term of the lease unless the lease is producing. Delay rentals are normally \$1.00 to \$25.00 per net mineral acre but can exceed this range.

The Company currently holds interests in producing and non-producing oil and

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

gas leases. The existence of the oil and gas leases and the terms of the oil and gas leases are important to the business of the Company because future additions to reserves will come from oil and gas leases currently owned by the Company, and others that may be acquired, when they are proven to be productive. The Company is continuing to purchase oil and gas leases in areas where it currently has production, and also in other areas.

Dependence on Customers

The following is a summary of significant purchasers from oil and natural gas produced by the Company for the three-year period ended December 31, 2010:

Purchaser	Year Ended December 31, (1)		
	2010	2009	2008
Enbridge Energy Partners			
(formerly Enbridge North Texas)	26%	36%	26%
Crosstex Gulf Coast Mktg	16%	23%	42%
Eastex Crude Company	7%	7%	3%
Shell Trading (US) Company	7%	6%	5%
Kinder Morgan	5%	-%	-%
Enterprise Crude Oil LLC (Teppco Crude Oil, LP)	5%	4%	2%
Conoco Phillips Company	4%	1%	-%
Targa Midstream Service, LIM	3%	3%	6%
Navajo Refining Co.	3%	3%	1%
Genesis	2%	2%	1%
DCP Midstream, LP	2%	-%	-%
ETC Texas Pipeline	2%	1%	1%
Sunoco Partners Marketing	2%	-%	-%
Devon Gas Services, LP	-%	1%	2%
Gateway Gathering & Marketing	-%	-%	1%

(1) Percent of Total Oil & Gas Sales

- 13 -

Oil and gas is sold to approximately 102 different purchasers under market sensitive, short-term contracts computed on a month to month basis.

Except as set forth above, there are no other customers of the Company that individually accounted for more than two percent of the Company's oil and gas revenues during the three years ended December 31, 2010.

The Company currently has no hedged contracts.

Prospective Drilling Activities

The Company's primary oil and gas prospect generation and acquisition efforts have been in known producing areas in the United States with emphasis devoted to Texas.

The Company intends to use a portion of its available funds to participate in drilling activities. The Company does not own any drilling rigs and all drilling activity is performed by independent drilling contractors. The Company does not refine or otherwise process its oil and gas production.

Exploration for oil and gas is normally conducted with the Company acquiring undeveloped oil and gas leases under prospects, and carrying out exploratory drilling on the prospective leasehold with the Company retaining a majority interest in the prospect. Interests in the property are sometimes sold to key employees and associated companies at cost. Also, interests may be sold to

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

third parties with the Company retaining an overriding royalty interest, carried working interest, or a reversionary interest.

A prospect is a geographical area designated by the Company for the purpose of searching for oil and gas reserves and reasonably expected by it to contain at least one oil or gas reservoir. The Company utilizes its own funds along with the issuance of common stock and options to purchase common stock in some limited cases, to acquire oil and gas leases covering the lands comprising the prospects. These leases are selected by the Company and are obtained directly from the landowners, as well as from land men, geologists, other oil companies, some of whom may be affiliated with the Company, and by direct purchase, farm-in, or option agreements. After an initial test well is drilled on a property, any subsequent development drilling of such prospect will normally require the Company to fund the development activities.

Special Tax Provisions

See Footnote 8 to Consolidated Financial Statements regarding the accounting for income taxes.

- 14 -

Employees

The Company employs or contracts for the services of a total of approximately sixty-two people. Twenty-seven are full-time employees. The remainder, are part-time employees or independent contractors. We believe that our relationships with our employees are good.

In order to effectively utilize our resources, we employ the services of independent consultants and contractors to perform a variety of professional and technical services, including in the areas of lease acquisition, land related documentation and contracts, drilling and completion work, pumping, inspection, testing, maintenance and specialized services. We believe that it can be more cost effective to utilize the services of consultants and independent contractors for some of these services.

We depend to a large extent on the services of certain key management personnel and officers, and the loss of any these individuals could have a material adverse effect on our operations. The Company does not maintain key-man life insurance policies on its employees.

Financial information about foreign and domestic operations and export sales

All of the Company's business is conducted domestically, with no export sales.

Compliance with Environmental Regulations

Our oil and natural gas operations are subject to numerous United States federal, state and local laws and regulations relating to the protection of the environment, including those governing the discharge of materials into the water and air, the generation, management and disposal of hazardous substances and wastes and clean-up of contaminated science. We could incur material costs, including clean-up costs, fines and civil and criminal sanctions and

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

third party claims for property damage and personal injury as a result of violations of, or liabilities under, environmental laws and regulations. Such laws and regulations not only expose us to liability for our own activities, but may also expose us to liability for the conduct of others or for actions by us that were in compliance with all applicable laws at the time those actions were taken. In addition, we could incur substantial expenditures complying with environmental laws and regulations, including future environmental laws and regulations which may be more stringent.

- 15 -

Glossary of Oil and Gas Terms

The following are abbreviations and definitions of terms commonly used in the oil and gas industry that are used in this Report. The terms defined herein may be found in this report in both upper and lower case or a combination of both.

"BBL" means a barrel of 42 U.S. gallons.

"BBNGL" means billion barrels of natural gas liquids.

"BCF" or "BCFG" means billion cubic feet.

"BOE" means barrels of oil equivalent; converting volumes of natural gas to oil equivalent volumes using a ratio of six Mcf of natural gas to one Bbl of oil.

"BOPD" means barrels of oil per day.

"BTU" means British Thermal Units. British Thermal Unit means the quantity of heat required to raise the temperature of one pound of water by one degree Fahrenheit.

"BSWPD" means barrels of salt water per day.

"Completion" means the installation of permanent equipment for the production of oil or gas.

"Development Well" means a well drilled within the proved area of an oil or gas reservoir to the depth of a strata graphic horizon known to be productive.

"Dry Hole" or "Dry Well" means a well found to be incapable of producing hydrocarbons in sufficient quantities such that proceeds from the sale of such production exceed production expenses and taxes.

"Exploratory Well" means a well drilled to find and produce oil or gas reserves not classified as proved, to find a new production reservoir in a field previously found to be productive of oil or gas in another reservoir or to extend a known reservoir.

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

"Farm-Out" means an agreement pursuant to which the owner of a working interest in an oil and gas lease assigns the working interest or a portion thereof to another party who desires to drill on the leased acreage. Generally, the assignee is required to drill one or more wells in order to earn its interest in the acreage. The assignor usually retains a royalty or reversionary interest in the lease. The interest received by an assignee is a "farm-in" and the assignor issues a "farm-out."

"Farm-In" see "Farm-Out" above.

"Gas" means natural gas.

- 16 -

"Gross" when used with respect to acres or wells, refers to the total acres or wells in which we have a working interest.

"Infill Drilling" means drilling of an additional well or wells provided for by an existing spacing order to more adequately drain a reservoir.

"MCF" or "MCFG" means thousand cubic feet.

"MCFE" means MCF of natural gas equivalent; converting volumes of oil to natural gas equivalent volumes using a ratio of one BBL of oil to six MCF of natural gas.

"MCFGPD" means thousand cubic feet of gas per day.

"MMBO" means million barrels of oil.

"MMBTU" means ones million BTUs.

"Net" when used with respect to acres or wells, refers to gross acres or wells multiplied, in each case, by the percentage working interest owned by the Company.

"Net Production" means production that is owned by the Company less royalties and production due others.

"Non-Operated" or "Outside Operated" means wells that are operated by a third party.

"Operator" means the individual or company responsible for the exploration, development, production and management of an oil or gas well or lease.

"Overriding Royalty" means a royalty interest which is usually reserved by an owner of the leasehold in connection with a transfer to a subsequent owner.

"Present Value" ("PV") when used with respect to oil and gas reserves, means the estimated future gross revenues to be generated from the production of proved reserves calculated in accordance with the guidelines of the SEC, net of estimated production and future development costs, using prices and costs as of the date of estimation without future escalation (except to the extent a contract specifically provides otherwise), without giving effect to non-property related expenses such as general and administrative expenses, debt service, future income tax expense and depreciation, depletion and amortization, and discounted using an annual discount rate of 10%.

"Productive Wells" or "Producing Wells" consist of producing wells and wells capable of production, including wells waiting on pipeline connections.

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

"Proved Developed Reserves" means reserves that can be expected to be recovered through existing wells with existing equipment and operating methods. Additional oil and gas expected to be obtained through the application of fluid injection or other improved recovery techniques for supplementing the natural forces and mechanisms of primary recovery will be included as "proved developed reserves" only after testing by a pilot project or after the operation of an

- 17 -

installed program has confirmed through production response that increased recovery will be achieved.

"Proved Reserves" means the estimated quantities of crude oil and natural gas which upon analysis of geological and engineering data appear with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions, i.e., prices and costs as of the date the estimate is made. Prices include consideration of changes in existing prices provided only by contractual arrangements, but not on escalations based upon future conditions.

(i) Reservoirs are considered proved if either actual production or onclusive formation tests support economic producibility. The area of a reservoir considered proved includes (A) that portion delineated by drilling and defined by gas-oil and/or oil-water contacts, if any; and (B) the immediately adjoining portions not yet drilled, but which can be reasonably judged as economically productive on the basis of available geological and engineering data. In the absence of information on fluid contacts, the lowest known structural occurrence of hydrocarbons controls the lower proved limit of the reservoir.

(ii) Reserves which can be produced economically through application of improved recovery techniques (such as fluid injection) are included in the "proved" classification when successful testing by a pilot project, or the operation of an installed program in the reservoir, provides support for the engineering analysis on which the project or program was based.

(iii) Estimates of proved reserves do not include the following: (A) oil that may become available from known reservoirs but is classified separately as "indicated additional reserves"; (B) crude oil and natural gas, the recovery of which is subject to reasonable doubt because of uncertainty as to geology, reservoir characteristics or economic factors; (C) crude oil and natural gas that may occur in undrilled prospects; and (D) crude oil and natural gas that may be recovered from oil shales, coal, gilsonite and other such resources.

"Proved Undeveloped Reserves" means reserves that are recovered from new wells on undrilled acreage, or from existing wells where a relatively major expenditure is required for completion. Reserves on undrilled acreage shall be limited to those drilling units offsetting productive units that are reasonably certain of production when drilled. Proved reserves for other undrilled units can be claimed only where it can be demonstrated with certainty that there is continuity of production from the existing productive formation. Under no circumstances should estimates for proved undeveloped reserves be attributable to any acreage for which an application of fluid injection or other improved recovery technique is contemplated, unless such techniques have been proved effective by actual tests in the area and in the same reservoir.

- 18 -

"Recompletion" means the completion for production of an existing well bore in another formation from that in which the well has been previously completed.

"Reserves" means proved reserves.

"Reservoir" means a porous and permeable underground formation containing a natural accumulation of producible oil and/or gas that is confined by impermeable rock or water barriers and is individual and separate from other reservoirs.

"Royalty" means an interest in an oil and gas lease that gives the owner of the interest the right to receive a portion of the production from the leased acreage (or of the proceeds of the sale thereof), but generally does not require the owner to pay any portion of the costs of drilling or operating the wells on the leased acreage. Royalties may be either landowner's royalties, which are reserved by the owner of the leased acreage at the time the lease is granted, or overriding royalties, which are usually reserved by an owner of the leasehold in connection with a transfer to a subsequent owner.

"TCF" means trillion cubic feet.

"2-D Seismic" means an advanced technology method by which a cross-section of the earth's subsurface is created through the interpretation of reflecting seismic data collected along a single source profile.

"3-D Seismic" means an advanced technology method by which a three dimensional image of the earth's subsurface is created through the interpretation of reflection seismic data collected over a surface grid. 3-D seismic surveys allow for a more detailed understanding of the subsurface than do conventional surveys and contribute significantly to field appraisal, development and production.

"Working Interest" means an interest in an oil and gas lease that gives the owner of the interest the right to drill for and produce oil and gas on the leased acreage and requires the owner to pay a share of the costs of drilling and production operations. The share of production to which a working interest owner is entitled will always be smaller than the share of costs that the working interest owner is required to bear, with the balance of the production accruing to the owners of royalties.

"Workover" means operations on a producing well to restore or increase production.

- 19 -

Item 1A. Risk Factors

Risks related directly to our Company

One should carefully consider the following risk factors, in addition to the

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

other information set forth in this Report, before investing in shares of our common stock. Each of these risk factors could adversely affect our business, operating results and financial condition, as well as adversely affect the value of an investment in our common stock. Some information in this Report may contain "forward-looking" statements that discuss future expectations of our financial condition and results of operation. The risk factors noted in this section and other factors could cause our actual results to differ materially from those contained in any forward-looking statements.

The current global economic and financial crisis could lead to an extended national or global economic recession. A slowdown in economic activity caused by a recession would likely reduce national and worldwide demand for oil and natural gas and result in lower commodity prices for long periods of time. Costs of exploration, development and production have not yet adjusted to current economic conditions. or in proportion to the significant reduction in product prices. Prolonged, substantial decreases in oil and natural gas prices would likely have a material adverse effect on Spindletop's business, financial condition and results of operations, could further limit the Company's access to liquidity and credit and could hinder its ability to satisfy its capital requirements.

Capital and credit markets have experienced unprecedented volatility and disruption during recent years. Given the current levels of market volatility and disruption, the availability of funds from those markets has diminished substantially. Further, arising from concerns about the stability of financial markets generally and the solvency of borrowers specifically, the cost of accessing the credit markets has increased as many lenders have raised interest rates, enacted tighter lending standards or altogether ceased to provide funding to borrowers.

Due to these capital and credit market conditions, Spindletop cannot be certain that funding will be available to the Company in amounts or on terms acceptable to the Company. The Company is evaluating whether current cash balances and cash flow from operations alone would be sufficient to provide working capital to fully fund the Company's operations. Accordingly, the Company is evaluating alternatives, such as joint ventures with third parties, or sales of interest in one or more of its properties. Such transactions if undertaken, could result in a reduction in the Company's operating interests or require the Company to relinquish the right to operate the property. There can be no assurance that any such transactions can be completed or that such transactions will satisfy the Company's operating capital requirements. If the Company is not successful in obtaining sufficient funding or completing an alternative transaction on a timely basis on terms acceptable to the Company, Spindletop would be required to curtail its expenditures or restructure its operations, and the Company would be unable to continue its exploration, drilling, and recompletion program, any of which would have a material adverse effect on Spindletop's business, financial condition and results of operations.

- 20 -

We face significant competition, and many of our competitors have resources in excess of our available resources.

The oil and gas industry is highly competitive. We encounter competition from other oil and gas companies in all areas of our operations, including the acquisition of producing properties and sale of crude oil and natural gas. Our competitors include major integrated oil and gas companies and numerous independent oil and gas companies, individuals and drilling and income programs. Many of our competitors are large, well established companies with substantially larger operating staffs and greater capital resources than us. Such companies may be able to pay more for productive oil and gas properties and exploratory prospects and to define, evaluate, bid for and purchase a greater number of properties and prospects than our financial or human

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

resources permit. Our ability to acquire additional properties and to discover reserves in the future will depend upon our ability to evaluate and select suitable properties and to consummate transactions in this highly competitive environment.

Exploratory drilling is a speculative activity that may not result in commercially productive reserves and may require expenditures in excess of budgeted amounts.

Drilling activities are subject to many risks, including the risk that no commercially productive oil or gas reservoirs will be encountered. There can be no assurance that new wells drilled by us will be productive or that we will recover all or any portion of our investment. Drilling for oil and gas may involve unprofitable efforts, not only from dry wells, but also from wells that are productive but do not produce sufficient net revenues to return a profit after drilling, operating and other costs. The cost of drilling, completing and operating wells is often uncertain. Our drilling operations may be curtailed, delayed or canceled as a result of a variety of factors, many of which are beyond our control, including economic conditions, mechanical problems, pressure or irregularities in formations, title problems, weather conditions, compliance with governmental requirements and shortages in or delays in the delivery of equipment and services. In today's environment, shortages make drilling rigs, labor and services difficult to obtain and could cause delays or inability to proceed with our drilling and development plans. Such equipment shortages and delays sometimes involve drilling rigs where inclement weather prohibits the movement of land rigs causing a high demand for rigs by a large number of companies during a relatively short period of time. Our future drilling activities may not be successful. Lack of drilling success could have a material adverse effect on our financial condition and results of operations.

Our operations are also subject to all the hazards and risks normally incident to the development, exploitation, production and transportation of, and the exploration for, oil and gas, including unusual or unexpected geologic formations, pressures, down hole fires, mechanical failures, blowouts, explosions, uncontrollable flows of oil, gas or well fluids and pollution and other environmental risks. These hazards could result in substantial losses to us due to injury and loss of life, severe damage to and destruction of property and equipment, pollution and other environmental damage and suspension of operations. We participate in insurance coverage maintained by the operator of

- 21 -

its wells, although there can be no assurances that such coverage will be sufficient to prevent a material adverse effect to us in such events.

The vast majority of our oil and gas reserves are classified as proved reserves. Recovery of the Company's future proved undeveloped reserves will require significant capital expenditures. Our management estimates that aggregate capital expenditures of approximately \$2,187,000 will be required to fully develop some of these reserves in the next twelve month period. No assurance can be given that our estimates of capital expenditures will prove accurate, that our financing sources will be sufficient to fully fund our planned development activities or that development activities will be either successful or in accordance with our schedule. Additionally, any significant decrease in oil and gas prices or any significant increase in the cost of development could result in a significant reduction in the number of wells drilled and/or reworked. No assurance can be given that any wells will produce oil or gas in commercially profitable quantities.

We are subject to uncertainties in reserve estimates and future net cash flows.

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

This annual report contains estimates of our oil and gas reserves and the future net cash flows from those reserves. These estimates have been prepared by Company personnel for 2010 and 2009 and by Netherland, Sewell & Associates, Inc., independent petroleum engineers for 2008. There are numerous uncertainties inherent in estimating quantities of reserves of oil and gas and in projecting future rates of production and the timing of development expenditures, including many factors beyond our control. The reserve estimates in this annual report are based on various assumptions, including, for example, constant oil and gas prices, operating expenses, capital expenditures and the availability of funds, and therefore, are inherently imprecise indications of future net cash flows. Actual future production, cash flows, taxes, operating expenses, development expenditures and quantities of recoverable oil and gas reserves may vary substantially from those assumed in the estimates. Any significant variance in these assumptions could materially affect the estimated quantity and value of reserves set forth in this prospectus. Additionally, our reserves may be subject to downward or upward revision based upon actual production performance, results of future development and exploration, prevailing oil and gas prices and other factors, many of which are beyond our control.

The present value of future net reserves discounted at 10% (the "PV-10") of proved reserves referred to in this annual report should not be construed as the current market value of the estimated proved reserves of oil and gas attributable to our properties. In accordance with applicable requirements of the SEC, the estimated discounted future net cash flows from proved reserves are generally based on prices and costs as of the date of the estimate, whereas actual future prices and costs may be materially higher or lower. Actual future net cash flows also will be affected by: (i) the timing of both production and related expenses; (ii) changes in consumption levels; and (iii) governmental regulations or taxation. In addition, the calculation of the present value of the future net cash flows using a 10% discount as required by the SEC is not necessarily the most appropriate discount factor based on interest rates in effect from time to time and risks associated with our

- 22 -

reserves or the oil and gas industry in general. Furthermore, our reserves may be subject to downward or upward revision based upon actual production, results of future development, supply and demand for oil and gas, prevailing oil and gas prices and other factors. See "Properties - Oil and Gas Reserves."

Unless we replace our oil and natural gas reserves, our reserves and production will decline, which would adversely affect our cash flows and income.

Unless we conduct successful development, exploitation and exploration activities or acquire properties containing proved reserves, our proved reserves will decline as those reserves are produced. Producing oil and natural gas reservoirs generally are characterized by declining production rates that vary depending upon reservoir characteristics and other factors. Our future oil and natural gas reserves and production, and, therefore our cash flow and income, are highly dependent on our success in efficiently developing and exploiting our current reserves and economically finding or acquiring additional recoverable reserves. We may be unable to make such acquisitions because we are:

- unable to identify attractive acquisition candidates or negotiate acceptable purchase contracts with them;
- unable to obtain financing for these acquisitions on economically acceptable terms; or
- outbid by competitors.

If we are unable to develop, exploit, find or acquire additional reserves to

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

replace our current and future production, our cash flow and income will decline as production declines, until our existing properties would be incapable of sustaining commercial production.

There are risks in acquiring producing oil and gas properties, including difficulties in integrating acquired properties into our business, additional liabilities and expenses associated with acquired properties, diversion of management attention, increasing the scope, geographic diversity and complexity of our operations.

One of our business strategies includes growing our reserve base through acquisitions. Our failure to integrate acquired properties successfully into our existing business, or the expense incurred in consummating future acquisitions, could result in unanticipated expenses and losses. In addition, we may assume cleanup or reclamation obligations or other unanticipated liabilities in connection with these acquisitions. The scope and cost of these obligations may ultimately be materially greater than estimated at the time of the acquisition.

We are continually investigating opportunities for acquisitions. In connection with future acquisitions, the process of integrating acquired operations into our existing operations may result in unforeseen operating difficulties and may require significant management attention and financial resources that would otherwise be available for the ongoing development or expansion of existing operations. Our ability to make future acquisitions may be constrained by our ability to obtain additional financing.

- 23 -

Possible future acquisitions could result in our incurring debt, contingent liabilities and expense, all of which could have a material effect on our financial condition and operating results.

Acquisitions may prove to be worth less than we paid because of uncertainties in evaluating recoverable reserves and potential liabilities.

Successful acquisitions require an assessment of a number of factors, including estimates of recoverable reserves, exploration potential, recovery applicability from waterflood and Enhanced Oil Recovery techniques ("EOR"), future oil and natural gas prices, operating costs and potential environmental and other liabilities. Such assessments are inexact and their accuracy is inherently uncertain. In connection with our assessments, we perform a review of the acquired properties which we believe is generally consistent with industry practices. However, such a review will not reveal all existing or potential problems. In addition, our review may not permit us to become sufficiently familiar with the properties to fully assess their deficiencies and capabilities. We do not inspect every well or property. Even when we inspect a well or property, we do not always discover structural, subsurface and environmental problems that may exist or arise. We are generally not entitled to contractual indemnification for pre-closing liabilities, including environmental liabilities. Normally, we acquire interests in properties on an "as is" basis with limited remedies for breaches of representations and warranties. As a result of these factors, we may not be able to acquire oil and natural gas properties that contain economically recoverable reserves or be able to complete such acquisitions on acceptable terms.

Additionally, significant acquisitions can change the nature of our operations and business depending upon the character of the acquired properties, which may have substantially different operating and geological characteristics or be in different geographic locations than our existing properties. It is our current intention to continue focusing on acquiring properties with development and

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

exploration potential located in onshore United States. To the extent that we acquire properties substantially different from the properties in our primary operating regions or acquire properties that require different technical expertise, we may not be able to realize the economic benefits of these acquisitions as efficiently as in our prior acquisitions.

We cannot control activities on properties we do not operate. Failure to fund capital expenditure requirements may result in reduction or forfeiture of our interests in some of our non-operated projects.

We do not operate some of the properties in which we have an interest and we have limited ability to exercise influence over operations for these properties or their associated costs. As of December 31, 2010, approximately 13% of our crude oil and natural gas proved reserves were operated by other companies. Our dependence on other operators and other working interest owners for these projects and our limited ability to influence operations and associated costs could materially adversely affect the realization of our targeted return on capital in drilling or acquisition activities and our targeted production

- 24 -

growth rate. The success and timing of drilling, development and exploitation activities on properties operated by others depend on a number of factors that are beyond our control, including the operator's expertise and financial resources, approval of other participants for drilling wells and utilization of technology.

When we are not the majority owner or operator of a particular crude oil or natural gas project, we may have no control over the timing or amount of capital expenditures associated with such project. If we are not willing or able to fund our capital expenditures relating to such projects when required by the majority owner or operator, our interests in these projects may be reduced or forfeited.

We are subject to risks associated with the current United States Government Administration's proposed budget features.

The Obama administration has set forth budget proposals which if passed, would significantly curtail our ability to attract investors and raise capital. Proposed changes in the Federal income tax laws which would eliminate or reduce the percentage depletion deduction and the deduction for intangible drilling and development costs for small independent producers, will significantly reduce the investment capital available to those in the industry as well as our Company. Lengthening the time to expense seismic costs will also have an adverse effect on our ability to explore and find new reserves.

We are subject to various operating and other casualty risks that could result in liability exposure or the loss of production and revenues.

Our oil and gas business involves a variety of operating risks, including, but not limited to, unexpected formations or pressures, uncontrollable flows of oil, gas, brine or well fluids into the environment (including groundwater contamination), blowouts, fires, explosions, pollution and other risks, any of which could result in personal injuries, loss of life, damage to properties and substantial losses. Although we carry insurance at levels that we believe are reasonable, we are not fully insured against all risks. We do not carry business interruption insurance. Losses and liabilities arising from uninsured or under-insured events could have a material adverse effect on our financial condition and operations.

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

From time to time, due primarily to contract terms, pipeline interruptions or weather conditions, the producing wells in which we own an interest have been subject to production curtailments. The curtailments range from production being partially restricted to wells being completely shut-in. The duration of curtailments varies from a few days to several months. In most cases, we are provided only limited notice as to when production will be curtailed and the duration of such curtailments. We are not currently experiencing any material curtailment of our production.

We intend to increase to some extent our development and, to a lesser extent, exploration activities. Exploration drilling and, to a lesser extent,

- 25 -

development drilling of oil and gas reserves involve a high degree of risk that no commercial production will be obtained and/or that production will be insufficient to recover drilling and completion costs. The cost of drilling, completing and operating wells is often uncertain. Our drilling operations may be curtailed, delayed or canceled as a result of numerous factors, including title problems, weather conditions, compliance with governmental requirements and shortages or delays in the delivery of equipment. Furthermore, completion of a well does not assure a profit on the investment or a recovery of drilling, completion and operating costs.

We depend on our key management personnel and technical experts and the loss of any of these individuals could adversely affect our business.

If we lose the services of our key management personnel, technical experts or are unable to attract additional qualified personnel, our business, financial condition, results of operations, development efforts and ability to grow could suffer. We have assembled a team of engineers and geologists who have considerable experience in applying advanced drilling and completion techniques to explore for and to develop crude oil and natural gas. We depend upon the knowledge, skill and experience of these experts to assist us in improving the performance and reducing the risks associated with our participation in crude oil and natural gas exploration and development projects. In addition, the success of our business depends, to a significant extent, upon the abilities and continued efforts of our management, particularly Chris Mazzini, our Chief Executive Officer, President and Chairman of the Board. We do not have an employment agreement with or key man life insurance on Mr. Mazzini or any of our other employees.

Certain of our affiliates control a majority of our outstanding common stock, which may affect your vote as a shareholder.

Our executive officers, directors and their affiliates hold approximately 77% of our outstanding shares of common stock. As a result, officers, directors and their affiliates and such shareholders have the ability to exert significant influence over our business affairs, including the ability to control the election of directors and results of voting on all matters requiring shareholder approval. This concentration of voting power may delay or prevent a potential change in control.

Certain of our affiliates have engaged in business transactions with the Company, which may result in conflicts of interest.

Certain officers, directors and related parties, including entities controlled by Mr. Mazzini, the President and Chief Executive Officer, have engaged in

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

business transactions with the Company which were not the result of arm's length negotiations between independent parties. Our management believes that the terms of these transactions were as favorable to us as those that could have been obtained from unaffiliated parties under similar circumstances. All future transactions between us and our affiliates will be on terms no less

- 26 -

favorable than could be obtained from unaffiliated third parties and will be approved by a majority of the disinterested members of our Board of Directors.

Our common stock is traded on the Over-the-Counter market and is currently quoted on the OTC Bulletin Board ("OTCBB"), symbol "SPND".

The liquidity of our common stock may be adversely affected, and purchasers of our common stock may have difficulty selling our common stock, if our common stock does not continue to trade in that or another suitable trading market.

There is presently only a limited public market for our common stock, and there is no assurance that a ready public market for our securities will develop. It is likely that any market that develops for our common stock will be highly volatile and that the trading volume in such market will be limited. The trading price of our common stock could be subject to wide fluctuations in response to quarter-to-quarter variations in our operating results, announcements of our drilling results and other events or factors. In addition, the United States stock market has from time to time experienced extreme price and volume fluctuations that have affected the market price for many companies and which often have been unrelated to the operating performance of these companies. These broad market fluctuations may adversely affect the market price of our securities.

We do not intend to declare dividends in the foreseeable future.

Our Board of Directors presently intends to retain all of our earnings for the expansion of our business. We therefore do not anticipate the distribution of cash dividends in the foreseeable future. Any future decision of our Board of Directors to pay cash dividends will depend, among other factors, upon our earnings, financial position and cash requirements.

We are subject to certain title risks.

Our company employees and contract land professionals have reviewed title records or other title review materials relating to substantially all of our producing properties. The title investigation performed by us prior to acquiring undeveloped properties is thorough, but less rigorous than that conducted prior to drilling, consistent with industry standards. We believe we have satisfactory title to all our producing properties in accordance with standards generally accepted in the oil and gas industry. Our properties are subject to customary royalty interests, liens incident to operating agreements, liens for current taxes and other burdens, which we believe do not materially interfere with the use of or affect the value of such properties. At December 31, 2010, our leaseholds for some of our net acreage were being kept in force by virtue of production on that acreage in paying quantities. The remaining net acreage was held by lease rentals and similar provisions and requires production in paying quantities prior to expiration of various time periods to avoid lease termination.

- 27 -

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

We expect to make acquisitions of oil and gas properties from time to time subject to available resources. In making an acquisition, we generally focus most of our title and valuation efforts on the more significant properties. It is generally not feasible for us to review in-depth every property we purchase and all records with respect to such properties. However, even an in-depth review of properties and records may not necessarily reveal existing or potential problems, nor will it permit us to become familiar enough with the properties to assess fully their deficiencies and capabilities. Evaluation of future recoverable reserves of oil and gas, which is an integral part of the property selection process, is a process that depends upon evaluation of existing geological, engineering and production data, some or all of which may prove to be unreliable or not indicative of future performance. To the extent the seller does not operate the properties, obtaining access to properties and records may be more difficult. Even when problems are identified, the seller may not be willing or financially able to give contractual protection against such problems, and we may decide to assume environmental and other liabilities in connection with acquired properties.

Our business is highly capital-intensive requiring continuous development and acquisition of oil and gas reserves. In addition, capital is required to operate and expand our oil and gas field operations and purchase equipment. At December 31, 2010, we had working capital of \$5,685,000. We anticipate that we will be able to meet our cash requirements for the next 12 months. However, if such plans or assumptions change or prove to be inaccurate, we could be required to seek additional financing sooner than currently anticipated.

We have funded our operations, acquisitions and expansion costs primarily through our internally generated cash flow. Our success in obtaining the necessary capital resources to fund future costs associated with our operations and expansion plans is dependent upon our ability to: (i) increase revenues through acquisitions and recovery of our proved producing and proved developed non-producing oil and gas reserves; and (ii) maintain effective cost controls at the corporate administrative office and in field operations. However, even if we achieve some success with our plans, there can be no assurance that we will be able to generate sufficient revenues to achieve significant profitable operations or fund our expansion plans.

We have substantial capital requirements necessary for undeveloped properties for which we may not be able to obtain adequate financing.

Development of our properties will require additional capital resources. We have no commitments to obtain any additional debt or equity financing and there can be no assurance that additional financing will be available, when required, on favorable terms to us. The inability to obtain additional financing could have a material adverse effect on us, including requiring us to curtail significantly our oil and gas acquisition and development plans or farm-out development of our properties. Any additional financing may involve substantial dilution to the interests of our shareholders at that time.

- 28 -

Oil and natural gas prices fluctuate widely and low prices could have a material adverse impact on our business and financial results.

Our revenues, profitability and the carrying value of our oil and gas properties are substantially dependent upon prevailing prices of, and demand for, oil and gas and the costs of acquiring, finding, developing and producing

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

reserves. Our ability to obtain borrowing capacity, to repay future indebtedness, and to obtain additional capital on favorable terms is also substantially dependent upon oil and gas prices. Historically, the markets for oil and gas have been volatile and are likely to continue to be volatile in the future. Prices for oil and gas are subject to wide fluctuations in response to: (i) relatively minor changes in the supply of, and demand for, oil and gas; (ii) market uncertainty; and (iii) a variety of additional factors, all of which are beyond our control. These factors include domestic and foreign political conditions, the price and availability of domestic and imported oil and gas, the level of consumer and industrial demand, weather, domestic and foreign government relations, the price and availability of alternative fuels and overall economic conditions. Furthermore, the marketability of our production depends in part upon the availability, proximity and capacity of gathering systems, pipelines and processing facilities. Volatility in oil and gas prices could affect our ability to market our production through such systems, pipelines or facilities. As of December 31, 2010, approximately 76% of our gas production is currently sold to nine gas purchasing firms on a month-to-month basis at prevailing spot market prices. Oil prices remained subject to unpredictable political and economic forces during 2010, 2009, and 2008, and experienced fluctuations similar to those seen in natural gas prices for the year. We believe that oil prices will continue to fluctuate in response to changes in the policies of the Organization of Petroleum Exporting Countries ("OPEC"), changes in demand from many Asian countries, current events in the Middle East, security threats to the United States, and other factors associated with the world political and economic environment. As a result of the many uncertainties associated with levels of production maintained by OPEC and other oil producing countries, the availabilities of worldwide energy supplies and competitive relationships and consumer perceptions of various energy sources, we are unable to predict what changes will occur in crude oil and natural gas prices.

We may be responsible for additional costs in connection with abandonment of properties.

We are responsible for payment of plugging and abandonment costs on its oil and gas properties pro rata to our working interest. Based on our experience, we anticipate that in most cases, the ultimate aggregate salvage value of lease and well equipment located on our properties should equal to the costs of abandoning such properties. There can be no assurance, however, that we will be successful in avoiding additional expenses in connection with the abandonment of any of our properties. In addition, abandonment costs and their timing may change due to many factors, including actual production results, inflation rates and changes in environmental laws and regulations.

- 29 -

Risks that Involve the Oil & Gas Industry in General

We are subject to various governmental regulations which may cause us to incur substantial costs.

Our operations are affected from time to time in varying degrees by political developments and federal, state and local laws and regulations. In particular, oil and gas production related operations are or have been subject to price controls, taxes and other laws and regulations relating to the oil and gas industry. Failure to comply with such laws and regulations can result in substantial penalties. The regulatory burden on the oil and gas industry increases our cost of doing business and affects our profitability. Although

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

we believe we are in substantial compliance with all applicable laws and regulations, because such laws and regulations are frequently amended or reinterpreted, we are unable to predict the future cost or impact of complying with such laws and regulations.

Sales of natural gas by us are not regulated and are generally made at market prices. However, the Federal Energy Regulatory Commission ("FERC") regulates interstate natural gas transportation rates and service conditions, which affect the marketing of natural gas produced by us, as well as the revenues received by us for sales of such production. Sales of our natural gas currently are made at uncontrolled market prices, subject to applicable contract provisions and price fluctuations that normally attend sales of commodity products.

Since the mid-1980's, the FERC has issued a series of orders, culminating in Order Nos. 636, 636-A and 636-B ("Order 636"), that have significantly altered the marketing and transportation of natural gas. Order 636 mandated a fundamental restructuring of interstate pipeline sales and transportation service, including the unbundling by interstate pipelines of the sale, transportation, storage and other components of the city-gate sales services such pipelines previously performed. One of the FERC's purposes in issuing the orders was to increase competition within all phases of the natural gas industry. Order 636 and subsequent FERC orders issued in individual pipeline restructuring proceedings have been the subject of appeals, and the courts have largely upheld Order 636. Because further review of certain of these orders is still possible, and other appeals may be pending, it is difficult to exactly predict the ultimate impact of the orders on us and our natural gas marketing efforts. Generally, Order 636 has eliminated or substantially reduced the interstate pipelines' traditional role as wholesalers of natural gas, and has substantially increased competition and volatility in natural gas markets.

While significant regulatory uncertainty remains, Order 636 may ultimately enhance our ability to market and transport our natural gas, although it may also subject us to greater competition, more restrictive pipeline imbalance tolerances and greater associated penalties for violation of such tolerances.

The FERC has announced several important transportation-related policy statements and proposed rule changes, including the appropriate manner in which interstate pipelines release capacity under Order 636 and, more recently, the

- 30 -

price which shippers can charge for their released capacity. In addition, in 1995, the FERC issued a policy statement on how interstate natural gas pipelines can recover the costs of new pipeline facilities. In January 1997, the FERC issued a policy statement and a request for comments concerning alternatives to its traditional cost-of-service rate making methodology. A number of pipelines have obtained FERC authorization to charge negotiated rates as one such alternative. While any additional FERC action on these matters would affect us only indirectly, these policy statements and proposed rule changes are intended to further enhance competition in natural gas markets. We cannot predict what the FERC will take on these matters, nor can we predict whether the FERC's actions will achieve its stated goal of increasing competition in natural gas markets. However, we do not believe that we will be treated materially differently than other natural gas producers and marketers with which we compete.

The price we receive from the sale of oil is affected by the cost of transporting such products to market. Effective January 1, 1995, the FERC implemented regulations establishing an indexing system for transportation rates for oil pipelines, which, generally, would index such rates to inflation, subject to certain conditions and limitations. These regulations could

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

increase the cost of transporting oil by interstate pipelines, although the most recent adjustment generally decreased rates. These regulations have generally been approved on judicial review. We are not able to predict with certainty the effect, if any, of these regulations on its operations. However, the regulations may increase transportation costs or reduce wellhead prices for oil.

The State of Texas and many other states require permits for drilling operations, drilling bonds and reports concerning operations and impose other requirements relating to the exploration for and production of oil and gas. Such states also have statutes or regulations addressing conservation matters, including provisions for the unitization or pooling of oil and gas properties, the establishment of maximum rates of production from wells and the regulation of spacing, plugging and abandonment of such wells. The statutes and regulations of certain states limit the rate at which oil and gas can be produced from our properties. However, we do not believe we will be affected materially differently by these statutes and regulations than any other similarly situated oil and gas company.

We may not have enough insurance to cover all of the risks we face, which could result in significant financial exposure.

We maintain insurance coverage against some, but not all, potential losses in order to protect against the risks we face. We may elect not to carry insurance if our management believes that the cost of insurance is excessive relative to the risks presented. If an event occurs that is not covered, or not fully covered, by insurance, it could harm our financial condition, results of operations and cash flows. In addition, we cannot fully insure against pollution and environmental risks.

- 31 -

We are subject to various environmental risks which may cause us to incur substantial costs.

Our operations and properties are subject to extensive and changing federal, state and local laws and regulations relating to environmental protection, including the generation, storage, handling and transportation of oil and gas and the discharge of materials into the environment, and relating to safety and health. The recent trend in environmental legislation and regulation generally is toward stricter standards, and this trend will likely continue. These laws and regulations may require the acquisition of a permit or other authorization before construction or drilling commences and for certain other activities; limit or prohibit construction, drilling and other activities on certain lands lying within wilderness and other protected areas; and impose substantial liabilities for pollution resulting from our operations. The permits required for our various operations are subject to revocation, modification and renewal by issuing authorities. Governmental authorities have the power to enforce compliance with their regulations, and violations are subject to fines, penalties or injunctions. In the opinion of management, we are in substantial compliance with current applicable environmental laws and regulations, and we have no material commitments for capital expenditures to comply with existing environmental requirements. Nevertheless, changes in existing environmental laws and regulations or in interpretations thereof could have a significant impact on us. The impact of such changes, however, would not likely be any more burdensome to us than to any other similarly situated oil and gas company.

The Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"), also known as the "Superfund" law, and similar state laws impose

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

liability, without regard to fault or the legality of the original conduct, on certain classes of persons that are considered to have contributed to the release of a "hazardous substance" into the environment. These persons include the owner or operator of the disposal site or sites where the release occurred and companies that disposed or arranged for the disposal of the hazardous substances found at the site. Persons who are or were responsible for releases of hazardous substances under CERCLA may be subject to joint and several liability for the costs of cleaning up the hazardous substances that have been released into the environment and for damages to natural resources. Furthermore, neighboring landowners and other third parties may file claims for personal injury and property damage allegedly caused by the hazardous substances released into the environment.

We generate typical oil and gas field wastes, including hazardous wastes that are subject to the Federal Resources Conservation and Recovery Act and comparable state statutes. The United States Environmental Protection Agency and various state agencies have limited the approved methods of disposal for certain hazardous and non-hazardous wastes. Furthermore, certain wastes generated by our oil and gas operations that are currently exempt from regulation as "hazardous wastes" may in the future be designated as "hazardous wastes", and therefore be subject to more rigorous and costly operating and disposal requirements.

The Oil Pollution Act ("OPA") imposes a variety of requirements on responsible parties for onshore and offshore oil and gas facilities and vessels related to

- 32 -

the prevention of oil spills and liability for damages resulting from such spills in waters of the United States. The "responsible party" includes the owner or operator of an onshore facility or vessel or the lessee or permittee of, or the holder of a right of use and easement for, the area where an onshore facility is located. OPA assigns liability to each responsible party for oil spill removal costs and a variety of public and private damages from oil spills. Few defenses exist to the liability for oil spills imposed by OPA. OPA also imposes financial responsibility requirements. Failure to comply with ongoing requirements or inadequate cooperation in a spill event may subject a responsible party to civil or criminal enforcement actions.

We own or lease properties that for many years have produced oil and gas. We also own natural gas gathering systems. It is not uncommon for such properties to be contaminated with hydrocarbons. Although we or previous owners of these interests may have used operating and disposal practices that were standard in the industry at the time, hydrocarbons or other wastes may have been disposed of or released on or under the properties or on or under other locations where such wastes have been taken for disposal. These properties may be subject to federal or state requirements that could require us to remove any such wastes or to remediate the resulting contamination. In addition to properties that we operate, we have interests in many properties which are operated by third parties over whom we have limited control. Notwithstanding our lack of control over properties operated by others, the failure of the previous owners or operators to comply with applicable environmental regulations may, in certain circumstances, adversely impact us.

Item 1B. Unresolved Staff Comments

None

Item 2. Properties

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

OIL AND GAS PROPERTIES

The following table sets forth pertinent data with respect to the Company-owned oil and gas properties, all located within the continental United States, as estimated by the Company:

	Year Ended December 31,		
	2010	2009	2008
Gas and Oil Properties, net (1):			
Proved developed gas reserves-Mcf (2)			
Proved developed producing	8,106,000	8,166,000	8,280,000
Proved developed non-producing	648,000	2,507,000	2,603,000
Proved undeveloped gas reserves-Mcf (3)	1,868,000	1,848,000	2,877,000
Total proved gas reserves-Mcf	10,622,000	12,521,000	13,760,000

- 33 -

Proved Developed Crude Oil and Condensate reserves-Bbls (2)			
Proved developed producing	328,000	284,000	225,000
Proved developed non-producing	34,000	13,000	28,000
Proved Undeveloped crude oil and Condensate reserves-Bbls (3)	-0-	26,000	9,000
Total proved crude oil and condensate Reserves-Bbls	362,000	323,000	262,000

(1) The estimate of the net proved oil and gas reserves, future net revenues, and the present value of future net revenues.

(2) "Proved Developed Oil and Gas Reserves" are reserves that can be expected to be recovered through existing wells with existing equipment and operating methods.

(3) "Proved Undeveloped Reserves" are reserves that are expected to be recovered from new wells on undrilled acreage, or from existing wells where a relatively major expenditure is required for recompletion. See Footnote 18 to the Financial Statements, Supplemental Reserve Information (Unaudited), for further explanation of the changes for 2008 through 2010.

(4) Reserve amounts are rounded to the nearest thousand.

Productive Wells

The following table sets forth our domestic productive wells and includes both operated wells and wells operated by third parties at December 31, 2010.

Gas Wells		Oil Wells		Total Wells	
Gross	Net	Gross	Net	Gross	Net
374	97.24	153	63.06	527	160.30

Acreage

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

The following table sets forth our undeveloped and developed gross and net leasehold acreage for our operated and non-operated wells at December 31, 2010. Undeveloped acreage includes leased acres on which wells have not been drilled or completed to a point that would permit the production of commercial quantities of oil and gas, regardless of whether or not such acreage contains proved reserves. Undeveloped acreage should not be confused with undrilled acreage held by Production under the terms of a lease. Undrilled acreage held by production under the terms of a lease is included in the Developed Acre category total shown below.

- 34 -

Undeveloped Acreage		Developed Acreage		Total Acreage	
Gross	Net	Gross	Net	Gross	Net
7,215	3,398	92,294	21,152	99,509	25,550

All the leases for the undeveloped acreage summarized in the preceding table will expire at the end of their respective primary terms unless prior to that date, the existing leases are renewed or production has been obtained from the acreage subject to the lease, in which event the lease will remain in effect until the cessation of production. As is customary in the industry, we generally acquire oil and gas acreage without any warranty of title except as to claims made by, through or under the transferor. Although we have title to developed acreage examined prior to acquisition in those cases in which the economic significance of the acreage justifies the cost, there can be no assurance that losses will not result from title defect or from defects in the assignment of leasehold rights.

Wells Drilled and Completed

The Company's working interests in both operated and outside operated exploration and development wells completed during the years indicated were as follows:

	Year Ended December 31,					
	2010		2009		2008	
	Gross	Net	Gross	Net	Gross	Net
Exploratory Wells (1):						
Productive	-	-	-	-	-	-
Non-Productive	-	-	-	-	-	-
Total	-	-	-	-	-	-
Development Wells (2):						
Productive	10.000	1.391	9.000	1.261	11.000	1.962
Non-Productive	-	-	-	-	-	-
Total	10.000	1.391	9.000	1.261	11.000	1.962
Total Exploration & Development Wells:						
Productive	10.000	1.391	9.000	1.261	11.000	1.962

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

Non-Productive	-	-	-	-	-	-
	10.000	1.391	9.000	1.261	11.000	1.962
Total						

- 35 -

(1) An exploratory well is a well drilled to find and produce oil or gas in an unproved area, to find a new reservoir in a field previously found to be productive of oil or gas in another reservoir, or to extend a known reservoir

(2) A development well is a well drilled within the proved area of an oil or gas reservoir to the depth of a stratigraphic horizon known to be productive.

The following tables set forth additional data with respect to production from Company-owned oil and gas operated and non-operated properties, all located within the continental United States:

	For the years ended December 31				
	2010	2009	2008	2007	2006
Oil and Gas Production, net:					
Natural Gas (Mcf)	823,957	866,416	1,231,835	880,662	671,527
Crude Oil & Condensate (Bbl)	31,526	25,875	32,663	24,472	25,443
Average Sales Price per Unit Produced:					
Natural Gas (\$/Mcf)	\$ 4.89	\$ 4.13	\$ 8.41	\$ 6.63	\$ 5.55
Crude Oil & Condensate (\$/Bbl)	\$ 74.35	\$ 56.55	\$ 71.21	\$ 65.17	\$ 53.14
Average Production Cost per Equivalent Barrel (1) (2)	\$ 15.48	\$ 14.37	\$ 14.98	\$ 14.36	\$ 15.14

(1) Includes severance taxes and ad valorem taxes.

(2) Gas production is converted to equivalent barrels at the rate of six MCFG per barrel, representing relative energy content of natural gas to oil.

The Company owns producing royalties and overriding royalties under properties located in Texas. The revenue from these properties is not significant.

The Company is not aware of any major discovery or other favorable or adverse event that is believed to have caused a significant change in the estimated proved reserves since December 31, 2010.

OFFICE SPACE

The Company owns a commercial office building. The property is a two story multi-tenant, garden office building with a sub-grade parking garage. The 28 year old building contains approximately 46,286 rentable square feet and sits on a 1.4919 acre block of land situated in north Dallas, Texas in close proximity to hotels, restaurants and shopping areas (the Galleria/Valley View Mall) with easy access to Interstate Highway 635 (LBJ Freeway) and Dallas Parkway (North Dallas Toll Road). The Company occupies approximately 10,317 rentable square feet of the building as its primary office headquarters, and leases the remaining space in the building to non-related third party commercial tenants at prevailing market rates.

- 36 -

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

The address of the Company's principal executive offices is One Spindletop Centre, 12850 Spurling Road, Suite 200, Dallas, Texas 75230. The telephone number is (972) 644-2581.

PIPELINES

The Company owns, through its subsidiary, PPC, 26.1 miles of natural gas pipelines in Parker, Palo Pinto and Eastland Counties, Texas. These pipelines are steel and polyethylene and range in size from two inches to four inches. These pipelines primarily gather natural gas from wells operated by the Company and in which the Company owns a working interest, but also for other parties.

The Company normally does not purchase and resell natural gas, but gathers gas for a fee. The fees charged in some cases are subject to regulations by the State of Texas and the Federal Energy Regulatory Commission. Average daily volumes of gas gathered by the pipelines owned by the Company were 1,793, 1,659, and 1,520, MCF per day for 2010, 2009, and 2008 respectively.

Oilfield Production Equipment

The Company owns various natural gas compressors, pumping units, dehydrators and various other pieces of oil field production equipment.

Substantially all of the equipment is located on oil and gas properties operated by the Company and in which it owns a working interest. The rental fees are charged as lease operating fees to each property and each owner.

M-R Oilfield Services, LP is an oilfield service company which provides to the Company, roustabout, swabbing and completion services at rates which are at or below market. This limited partnership has Chris G. Mazzini and Michelle H. Mazzini as its limited partners. This oil field services company currently does work exclusively for the Company and its related company, Giant Energy although it has contemplated doing work for unrelated third parties as well. The Company benefits by having immediate access to services.

Item 3. Legal Proceedings

Neither the Registrant nor its subsidiaries nor any officers or directors is a party to any material pending legal proceedings for or against the Company or its subsidiary nor are any of their properties subject to any proceedings.

During the fourth quarter of the fiscal year covered by this report, no proceeding previously reported was terminated.

Item 4. Submission Of Matters Of Security Holders To A Vote

During the fourth quarter of the registrant's fiscal year covered by this report, no matter was submitted to a vote of security holders of the registrant.

- 37 -

PART II

Item 5. Market For The Company's Common Stock, Related Stockholder Matters And Issuer Purchases Of Equity Securities.

The Company's common stock trades over-the-counter under the symbol "SPND".

Prior to 2004, no significant public trading market had been established for

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

the Company's common stock. The Company does not believe that listings of bid and asking prices for its stock are indicative of the actual trades of its stock, since trades are made infrequently. However during 2004, there was a material increase in the number of shares traded and a material increase in the stock price. The following table shows high and low trading prices for each quarter in 2008, 2009, and 2010.

	Price Per Share	
	High	Low
2008		
First Quarter	\$ 6.50	\$ 5.00
Second Quarter	10.95	5.23
Third Quarter	8.80	4.25
Fourth Quarter	4.00	1.75
2009		
First Quarter	3.19	1.75
Second Quarter	2.50	1.70
Third Quarter	2.45	1.50
Fourth Quarter	2.95	1.65
2010		
First Quarter	1.99	1.65
Second Quarter	5.50	1.60
Third Quarter	2.25	1.39
Fourth Quarter	2.25	1.45

During the First Quarter of 2011, subsequent to year end, the following high and low prices were recorded for the Company's common stock.

	Price Per Share	
	High	Low
2011		
First Quarter	\$ 2.79	\$ 2.10

There is no amount of common stock that is subject to outstanding warrants to purchase, or securities convertible into, common stock of the Company.

According to the transfer records of the Company at March 31, 2011, common stock of the Company was held by approximately 547 holders of record.

- 38 -

The following chart compares the yearly percentage change in the cumulative total stockholder return on the Company's Common Stock during the five years ended December 31, 2010 with the cumulative total return of the Standard and Poor's 500 Stock Index and of the Dow Jones U.S. Exploration and Production Index (formerly Dow Jones Secondary Oil Stock Index). The comparison assumes \$100 was invested on December 31, 2005 in the Company's Common Stock and in each of the foregoing indices and assumes reinvestment of dividends. The Company paid no dividends on its Common Stock during the five-year period.

Stock Performance Chart

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

(See Chart in PDF Format filed separately)

The Company has not paid any dividends since its reorganization and it is not contemplated that it will pay any dividends on its Common Stock in the foreseeable future. The Business Loan Agreement entered into between the Company and JPMorgan Chase Bank for the purpose of acquiring its commercial office building contains restrictions on the payment of dividends in the event a default under terms of the Business Loan Agreement has occurred and is continuing or would result from the payment of such dividends or distributions.

The Registrant currently serves as its own stock transfer agent and registrar

During the fourth quarter of the fiscal year ended December 31, 2010, the Company did not repurchase any of its equity securities. The Board of Directors has not approved nor authorized any standing repurchase program.

- 39 -

Item 6. Selected Financial Data

The selected financial information presented should be read in conjunction with the consolidated financial statements and the related notes thereto.

	For the years ended December 31				
	2010	2009	2008	2007	2006
Total Revenue	\$ 7,656,000	6,913,000	\$14,064,000	\$ 8,707,000	\$ 6,174,000
Net Income	447,000	39,000	3,521,000	1,808,000	920,000

Total Assets	\$20,777,000	\$20,386,000	\$21,289,000	\$15,631,000	\$13,024,000
Long-Term Debt	840,000	960,000	1,080,000	1,200,000	1,320,000

Item 7. Management's Discussion And Analysis Of Financial Condition And Results Of Operations

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

Liquidity and Capital Resources

The Company's operating capital needs, as well as its capital spending program are generally funded from cash flow generated by operations. Because future cash flow is subject to a number of variables, such as the level of production and the sales price of oil and natural gas, the Company can provide no assurance that its operations will provide cash sufficient to maintain current levels of capital spending. Accordingly, the Company may be required to seek additional financing from third parties in order to fund its exploration and development programs.

Results of Operations

2010 Compared to 2009

Oil revenue for 2010 was approximately \$ 2,368,000 compared to \$1,485,000 for 2009, an increase of approximately \$883,000 or 59%. This was due in large part to an increase in oil prices from an average of \$56.55 per bbl in 2009 to an average of \$74.35 per bbl in 2010; an increase of \$17.80 per bbl or 31%. In addition to the increase in prices, oil sales increased from approximately 25,875 bbls in 2009 to approximately 31,526 bbls in 2010, an increase of 5,651 bbls or 22%.

- 40 -

Gas revenue for 2010 was approximately \$3,934,000 compared to \$3,582,000 for 2009, an increase of approximately \$352,000 or 10%. Gas sales decreased from approximately 866,000 mcf in 2009 to approximately 824,000 mcf in 2010, a decrease of 42,000 mcf or 5%. Gas prices increased an average of \$0.76 per mcf or 18% from an average of \$4.13 per mcf in 2009, to an average of \$4.89 per mcf in 2010.

Revenue from gas gathering for 2010 was \$179,000, a decrease of \$13,000 or 7% from \$192,000 in 2009. This was due primarily to the decrease in gas volume sold.

Real estate income was down 11% or \$55,000 from \$503,000 in 2009 to \$448,000 in 2010. This was due to the expiration of three rental contracts in 2010 which were not renewed.

Interest income for 2010 was \$158,000, a decrease of \$50,000 from \$208,000 in 2009 or 24%.

The interest rate on certain deposit accounts at one of the banks in which the Company is a depositor was decreased significantly toward the end of the year resulting in an approximate \$18,000 reduction in interest income received. In addition, certificate of deposit rates decreased from an average of 3.3% in 2009 to an average of 1.8% in 2010 resulting in a decrease of approximately \$14,000. Also, in 2009, an interest payment of approximately \$18,000 was received from the Texas State Comptroller that was not received in 2010.

Other income for 2010 was \$250,000, a decrease of \$376,000 or over 60% from \$626,000 in 2009. Approximately \$100,000 of this decrease is due to ad valorem service fees charged by the Company in 2009 over those charged in 2010. An

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

additional \$20,000 was due to gain on divestitures in 2009 that did not exist in 2010. The majority of the remaining amount is due to recognition of turnkey income in 2009 that did not occur in 2010.

Lease operating expenses increased to \$1,901,000 in 2010 from \$1,640,000 in 2009 an increase of \$261,000 or 16%. Approximately \$120,000 of this increase comes from new wells in 2010 and another \$52,000 comes from increased work over costs. Expenses to plug non-economical wells increased by \$37,000 and finally, there was an increase in expenses from non-operated wells of approximately \$29,000.

Production taxes, gathering, transportation and marketing expenses for 2010 were approximately \$712,000 compared to \$807,000 in 2009, a net decrease of \$95,000. This 12% decrease is due in part to the decrease in volume sold. Additionally, there have been reductions in severance taxes paid due to the low-volume tax exemptions.

Depreciation and amortization for 2010 was \$1,042,000 compared to \$997,000 for 2009, an increase of \$45,000, or 4.5%. The Company re-evaluated its proved oil and gas reserves as of December 31, 2010, and decreased its estimated total proved reserves by approximately 277,000 BOE to 2,133,000 BOE at the end of 2010 compared to 2,410,000 BOE at the end of 2009, a decrease of approximately 11.5%. Sales of oil and gas products during 2010 decreased by approximately

- 41 -

31,000 BOE from approximately 200,000 BOE in 2009 to approximately 169,000 BOE in 2010, a decrease of 15.5%. (See Footnote 18 to the Financial Statements). This resulted in a decrease in the depletion rate factor from 7.662% in 2009 on an unamortized full cost pot base of \$11,368,000 to a depletion rate factor of 7.336% on an unamortized full cost pot base of \$12,496,000 in 2010.

ARO expense for 2010 was \$48,000 down from \$86,000 in 2009; a decrease of \$38,000 or 44%.

General and administrative expenses for 2010 were \$3,467,000 compared to \$3,332,000 for 2009, an increase of approximately \$135,000 between years or 4%. This increase is due mainly to payroll and associated employee benefit costs of approximately \$175,000. This was offset by a decrease in SEC related costs of approximately \$40,000 as the Company brought the preparation of its annual reserve report in house as opposed to having it prepared by an outside third party.

2009 Compared to 2008

Oil revenue for 2009 was approximately \$1,485,000 compared to \$2,326,000 for 2008, a decrease of approximately \$841,000 or 36.16%. This was due to a decrease in average oil prices from \$71.21 per bbl in 2008 to \$56.55 per bbl in 2009, a decrease of \$14.66 per bbl or 20.59%. In addition to the decrease in oil prices, oil sales decreased from approximately 32,650 bbls in 2008 to approximately 25,875 bbls in 2009, a decrease of 6,775 bbls or 20.75%.

Gas revenue for 2009 was approximately \$3,582,000 compared to \$10,364,000 for 2008, a decrease of approximately \$6,782,000 or 65.44%. This was due primarily to a drop in average gas prices from \$8.41 per Mcf in 2008 to \$4.13 per Mcf in 2009, a decrease of \$4.28 per MCF or 50.89%. In addition to the decrease in gas prices, gas sales decreased from approximately 1,232,000 Mcf in 2008 to approximately 866,000 Mcf in 2009, a decrease of 366,000 Mcf or 29.71%.

Lease operating expenses for 2009 were \$1,640,000 compared to \$2,552,000 in 2008, a net decrease of \$912,000 or 35.74%. Production taxes, gathering, transportation and marketing expenses for 2009 were approximately \$807,000

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

compared to \$969,000 in 2008, a net decrease of \$162,000 or 16.75%. For presentation purposes the Company split out amounts for production taxes, gathering, transportation and marketing expenses separately from lease operating expenses. In prior years, these amounts were presented together under the line item description of lease operating expenses. There have been no changes to total expenses for the each of the periods shown, and the presentation for 2008 has been restated to conform to the new presentation. The Company believes the separate reporting of the amounts gives a better look at the results of the Company's expenses to operate its leases. Approximately \$413,000 of the decrease in lease operating expenses is due to reduced workover costs. Another \$250,000 of the drop is due to high cost wells being shut in during 2009. Nearly \$100,000 is due to reduced water production on wells which in 2008 had significant water hauling expenses. The remaining decrease in lease operating expenses is due to cost containment. The decrease in production taxes, gathering, transportation and marketing expenses is due to overall production being down from 2008 to 2009.

- 42 -

Depreciation and amortization for 2009 was \$997,000 compared to \$1,215,000 for 2008, a decrease of \$218,000, or 17.94%. The Company re-evaluated its proved oil and gas reserves as of December 31, 2009, and decreased its estimated total proved reserves by approximately 145,000 BOE to 2,410,000 BOE at the end of 2009 compared to 2,555,000 BOE at the end of 2008, a decrease of approximately 5.68%. Sale of oil and gas products during 2009 decreased by approximately 38,000 BOE from approximately 238,000 BOE in 2008 to approximately 200,000 BOE in 2009, a decrease of 15.97%. (See Footnote 18 to the Financial Statements). This resulted in a decrease in the depletion rate factor from 8.520% in 2008 to 7.662% in 2009. In addition to the lower depletion rate, the overall decrease in the amount of amortization was caused by a reduction between years in the estimated cost basis on which the depletion rate factor was applied. This decrease was primarily due to a reduction in the estimated future cost of developing proved undeveloped properties by approximately \$1,794,000 in the 2009 reserve report.

General and administrative expenses for 2009 were \$3,332,000 compared to \$3,198,000 for 2008, an increase of approximately \$134,000 between years or 4.19%. This increase is due mainly to payroll costs and associated employee benefit costs. Personnel costs and benefits accounted for approximately \$2,970,000 of the total general and administrative costs in 2009 as compared to \$2,649,000 in 2008. A portion of the increase in salary and benefits was due to personnel added to the Company's payroll as the result of the termination of the Management Services Contract between the Company and Giant Energy on September 30, 2008. Effective October 1, 2008, Chris Mazzini, Michelle Mazzini, President and Vice President of the Company respectively, became employees of Spindletop Oil & Gas Co. which eliminated the monthly management fee.

Certain Factors That Could Affect Future Operations

Certain information contained in this report, as well as written and oral statements made or incorporated by reference from time to time by the Company and its representatives in other reports, filings with the Securities and Exchange Commission, press releases, conferences, teleconferences or otherwise, may be deemed to be 'forward-looking statements' within the meaning of Section 21E of the Securities Exchange Act of 1934 and are subject to the 'Safe Harbor' provisions of that section.

Forward-looking statements include statements concerning the Company's and management's plans, objectives, goals, strategies and future operations and performance and the assumptions underlying such forward-looking statements. When used in this document, the words "anticipates", "estimates", "expects",

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

"believes", "intends", "plans", and similar expressions are intended to identify such forward-looking statements. Actual results and developments could differ materially from those expressed in or implied by such statements due to these and other factors.

Item 8. Consolidated Financial Statements And Schedules Index At Page 54

Item 9. Changes In And Disagreements With Accountants On Accounting And Financial Disclosure

None

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our Principal Executive Officer and Principal Financial and Accounting Officer, we conducted an evaluation of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e)) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), which are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our Principal Executive Officer and Principal Financial and Accounting Officer, as appropriate to allow timely decisions regarding required disclosure. Based on this evaluation, our Principal Executive Officer and Principal Financial and Accounting Officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting for the Company. Our internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with generally accepted accounting principles. There are inherent limitations to the effectiveness of any system of internal control over financial reporting. These limitations include the possibility of human error, the circumvention of overriding of the system and reasonable resource constraints. Because of its inherent limitations, our internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with policies or procedures may deteriorate.

Management assessed the effectiveness of the Company's internal controls over financial reporting as of December 31, 2010. In making this assessment, management used the criteria set forth in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

Commission (COSO). Based on management's assessments and those criteria,

- 44 -

management has concluded that Company's internal control over financial reporting was effective as of December 31, 2010.

This annual report does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial report. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to rules of the Securities and Exchange Commission that permit the Company to provide only management's report in this annual report.

Changes in Internal Control over Financial Reporting

In preparation for management's report on internal control over financial reporting, we documented and tested the design and operating effectiveness of our internal control over financial reporting. There were no changes in our internal controls over financial reporting (as such term is defined in Exchange Act Rule 13a-15(f)) that occurred during the quarter ended December 31, 2010 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

Not Applicable

PART III

Item 10. Directors And Executive Officers Of The Registrant

The Directors and Executive Officers of the Company and certain information concerning them is set forth below:

Name	Age	Position
Chris G. Mazzini	53	Chairman of the Board, Director and President
Michelle H. Mazzini	49	Director, Vice President, Secretary, Treasurer
David E. Allard	52	Director

On April 2, 2008, Mr. David E. Allard, was appointed as a member of the Board of Directors of Spindletop Oil & Gas Co.

All directors hold offices until the next annual meeting of the shareholders or until their successors are duly elected and qualified. Officers of the Company serve at the discretion of the Board of directors.

- 45 -

Business Experience

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

Chris Mazzini, Chairman of the Board of Directors and President, graduated from the University of Texas at Arlington in 1979 with a Bachelor of Science degree in Geology. He started his career in the oil and gas industry in 1978, and began as a Petroleum Geologist with Spindletop in 1979, working the Fort Worth Basin of North Texas. He became Vice President of Geology at Spindletop in 1982, and served in that capacity until he left the Company in 1985 when he founded Giant Energy Corp. ("Giant"). Mr. Mazzini has served as President of Giant since then. He rejoined the Company in December 1999 when he, through Giant, purchased controlling interest. Mr. Mazzini has been Chairman of the Board of Directors and President of the Company since 1999 and is a Certified and Licensed Petroleum Geologist. Mr. Mazzini has worked numerous geological basins throughout the United States with an emphasis on the Fort Worth Basin. He is responsible for several new field discoveries in the Fort Worth Basin.

Michelle Mazzini, Vice President and General Counsel, received her Bachelor of Science Degree in Business Administration (Major: Accounting) from the University of Southwestern Louisiana (now named University of Louisiana at Lafayette) where she graduated magna cum laude in 1985. She earned her law degree from Louisiana State University where she graduated Order of the Coif in 1988. Ms. Mazzini began her career with Thompson & Knight, a large law firm in Dallas, where she focused her practice on general corporate and finance telecommunications manufacturing corporation where her practice was broad-based. Ms. Mazzini serves as Vice President and General Counsel of the Company.

Mr. Allard has been employed (since May 2008) by Wescott, LLC, a Dallas, Texas based investment holding company. He was Chief Financial Officer (February 2005 to May 2008) of Digital Witness Surveillance, a Dallas, Texas based development stage software provider; Executive Vice President and Secretary (April 2003 to February 2, 2005) of Internet America, Inc. Mr. Allard was Chief Operating Officer (2000-2002) of Primedia Workplace Learning, a workplace training business; Executive Vice President and Chief Financial Officer (1999-2000) of E-Train, Inc., a provider of online job training and seminars; Special Advisor (1998-1999) of Thayer Capital Partners; Chief Operating Officer (1997-1998) of Career Track, Inc. (a subsidiary of Transcontinental Realty Investors, Inc.); Senior Vice President and Vice President - Business Development (1992-996) of Wescott Communications, Inc.; Partner (1985-1992) of Farmer and Allard, P.C. (a CPA firm); Audit Manager/CPA (1983-1985) of Grant Thornton LLP (a CPA Firm). Mr. Allard has been a Certified Public Accountant since 1983.

- 46 -

Key and Technical Employees

In addition to the services provided by Mr. Mazzini and Ms. Mazzini (both of whom have biographies listed above), the Company also relies extensively on the key and the technical employees identified below.

Michael G. Boos, Geologist, earned a Bachelor of Science degree in Geology from the University of Delaware in 1979. After performing geophysical research for the State of Delaware seeking hydrothermal energy sources, Mr. Boos worked

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

independently for many years as a Petroleum Exploration Consultant and as a Staff Explorationist for a local oil company. He has numerous field discoveries in the Mid-Continent to his credit. In 1993 Mr. Boos joined Spindletop's Geological Department. He pursued a Masters degree through the University of Texas system, and later worked as a Geologist and Senior Project Manager for several national environmental consulting firms until rejoining Spindletop in October, 2008. His petroleum exploration experience includes Alaska's North Slope (Prudhoe Bay), many of the continental U.S. producing basins, as well as Central and South America. He has testified as an expert witness before the Texas Railroad Commission (TRRC) on several occasions. He is a founding member of both the Geological Information Library of Dallas (GILD, now Geomap) and the American Association of Petroleum Geologists (AAPG) Environmental Division, and is a licensed Professional Geologist (P.G.) in the states of Texas and Tennessee.

Dave Chivvis, Petroleum Engineer, joined the Company at the end of May, 2008. Mr. Chivvis earned his Bachelor of Science degree in Petroleum Engineering from Texas A&M University in 1993. After graduation, he worked for Cox Resources Corporation, an independent oil and gas company located in Dallas, Texas. Mr. Chivvis worked in various engineering areas from operations to acquisitions of oil and gas properties in Texas, Oklahoma, Louisiana, and Arkansas. He then moved to Los Angeles in 2001 to pursue other opportunities before moving back to Texas to join the Company.

Robert E. Corbin, Controller, has been a full-time employee of Spindletop since April 2002. From May 2001 until April 2002, Mr. Corbin was an Independent Accounting Consultant and devoted substantially all of his time to Spindletop. He has been active in the oil and gas industry for over 35 years, during which time he has served as financial officer of a publicly-held company as well as several private oil and gas companies and partnerships. Mr. Corbin graduated from Texas Tech University in 1969 with a BBA degree in Accounting and began his accounting career as an auditor with Arthur Andersen & Co. in 1970. Mr. Corbin is a Certified Public Accountant.

Charles (Chuck) D. Howell, Jr., Geologist, joined the Company in April, 2008. Mr. Howell earned a Bachelor of Science in Geology from Southern Methodist University in 1999. Currently, he is finishing his Ph.D. in Geology at the University of Texas at Dallas. Mr. Howell has been in the energy industry since 2003. He began his career at Pioneer Natural Resources working in the Gulf of Mexico. During 2005, Mr. Howell was an Independent Consulting Geologist for Anadarko Petroleum Corporation and worked on development of the historic Salt Creek Oil Field. In 2007, immediately before joining Spindletop Oil and Gas Company, he was a Geologist for Chevron Energy Technology Company

- 47 -

in Houston, Texas and was part of a team of stratigraphic specialists for the West Coast of Africa. Mr. Howell is a long-standing and active member of the American Association of Petroleum Geologists, the Society for Sedimentary Geology, the Geological Society of America, the International Association of Sedimentologists, and remains associated with the Ichnology Research Group.

Dick A. Mastin, Petroleum Landman, has been a full-time employee of the Company since February, 2006. Mr. Mastin graduated cum laude from Stephen F. Austin State University in 1980 with a Bachelor of Science in Forestry and a minor in General Business. From September of 1980 until December of 1985, Mr. Mastin worked for Spindletop Oil & Gas Co. as a Petroleum Landman. He received his Masters of Science in Management and Administrative Sciences from the University of Texas at Dallas in 1990. In January of 1987, he took a position with the Dallas office of the Federal Bureau of Investigation. After a year with the Bureau, he accepted a position with the Internal Revenue Service as a Revenue Agent. Fifteen of his eighteen years with the Service were spent in

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

the Large and Mid-Sized Business unit auditing tax returns of the largest business entities.

Glenn E. Sparks is the Land Director and also acts as Associate General Counsel to the Company. Mr. Sparks was previously employed as a Landman by the Company from 1982 through 1986, prior to attending law school. Mr. Sparks holds a B.B.A. with a concentration in Finance from the University of Texas at Arlington, and a J.D. from Texas Tech University School of Law. From 1990 to 2005, Mr. Sparks practiced law in a private practice focusing primarily on oil and gas law and real estate, as a partner in the law firm of Logan & Sparks, PLLC, and has acted as outside legal counsel for the Company in numerous oil and gas transactions during his years in private practice. Mr. Sparks left his private law practice and joined the Company again as an employee in his current position in 2005. Mr. Sparks is Board Certified in Oil & Gas Mineral Law by the Texas Board of Legal Specialization.

Family Relationships

Michelle Mazzini, Vice President, Secretary and General Counsel is the wife of Chris Mazzini, Chairman of the Board and President.

Involvement in Certain Legal Proceedings

None of the directors or executive officers of the Registrant, during the past five years, has been involved in any civil or criminal legal proceedings, bankruptcy filings or has been the subject of an order, judgment or decree of any Federal or State authority involving Federal or State securities laws.

- 48 -

Board Meetings and Committees

The Board of Directors met two times in 2010. The Board has established an audit committee. The Board is small and all members of the Board serve on the audit committee. The function of the audit committee is to assist the Board in fulfilling its oversight responsibilities by reviewing the financial information that will be provided to the shareholders and others, the systems of internal controls that management and the Board of Directors have established, and the audit process. The committee is comprised of Mr. David Allard (Chairman), Mr. Chris Mazzini, and Ms. Michelle Mazzini. The committee met two times in 2010.

With respect to nominations to the Board, compensation, financial planning, strategies, and business alternatives, the Company does not have separate committees as the Board is small and all members of the Board participate in making recommendations and decisions on these matters.

Item 11. Executive Compensation

Cash Compensation

On October 1, 2008, Mr. Mazzini and Ms. Mazzini became employees of the

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

Company. From October 1, 2008 to December 31, 2008 neither Mr. Mazzini nor Ms. Mazzini were paid cash compensation in excess of \$100,000.00 each as they were employed by Giant from January 1, 2008 through October 31, 2008. In 2008, management fees the Company paid to Giant were used to reimburse a portion of Mr. Mazzini's, Ms. Mazzini's and other Giant employees' salaries for time spent working on matters for the Company. Cash compensation including salaries and bonuses, of \$297,038 and \$195,400 was paid to Mr. Mazzini in 2010 and 2009 respectively. Cash compensation including salaries and bonuses of \$170,180 and \$143,700 was paid to Ms. Mazzini in 2010 and 2009 respectively.

The Company has no stock option or incentive plan, does not grant any plan-based awards or awards of equity securities. The Company has no pension plan for its employees.

Compensation Pursuant to Plan

None

Other Compensation

Key employees and officers of the Company may sometimes be assigned overriding royalty interests and/or carried working interests in prospects acquired by or generated by the Company. These interests normally vary from less than one percent to three percent for each employee or officer. There is no set formula or policy for such program, and the frequency and amounts are largely controlled by the economics of each particular prospect. We believe that these types of compensation arrangements enable us to attract, retain and provide additional incentives to qualified and experienced personnel

- 49 -

Effective December 1, 2010, the Company issued 10,000 shares of restricted common stock to a key employee pursuant to an employment package. The shares were valued at \$2.25 per share, the believed market value for free trading shares at the time of issue. The amount was expensed as general and administrative expense. The shares of common stock were issued out of Treasury Stock and reduced the amount of the Company's common stock held in Treasury from 46,668 to 36,668 shares.

Effective December 16, 2009, the Company issued 10,000 shares of restricted common stock to a key employee pursuant to an employment package. The shares were valued at \$1.65 per share, the believed market value for free trading shares at the time of issue. The amount was expensed as general and administrative expense. The shares of common stock were issued out of Treasury Stock and reduced the amount of the Company's common stock held in Treasury from 56,668 to 46,668 shares.

Effective April 9, 2009, the Company issued 10,000 shares of restricted common stock to a key employee pursuant to an employment package. The shares were valued at \$2.00 per share, the believed market value for free trading shares at the time of issue. The amount was expensed as general and administrative expense. The shares of common stock were issued out of Treasury Stock and reduced the amount of the Company's common stock held in Treasury from 66,668 to 56,668 shares.

Compensation of Directors

Directors who are employees of the Company are not currently compensated for their services on the Board. Mr. Allard was paid a director's fee of \$12,500 in 2010, \$15,000 in 2009 and \$17,500 in 2008 to compensate him for his position as the Board of Directors' Financial Expert. Mr. Allard receives \$2,500 for

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

each Board of directors meeting during the year.

Termination of Employment and Change of Control Arrangement

There are no plans or arrangements for payment to officers or directors upon resignation or a change in control of the Registrant.

Item 12. Security Ownership Of Certain Beneficial Owners And Management

Security Ownership of Certain Beneficial Owners and Managers

The table below sets forth the information indicated regarding ownership of the Registrant's common stock, \$.01 par value, the only outstanding voting securities, as of March 31, 2011 with respect to: (i) any person who is known to the Registrant to be the owner of more than five percent of the Registrant's common stock; (ii) the common stock of the Registrant beneficially owned by each of the directors of the Registrant and, (iii) by all officers and directors as a group. Each person has sole investment and voting power with

- 50 -

respect to the shares indicated, except as otherwise set forth in the footnotes to the table.

Name and Address Of Beneficial Owner	Number of Shares	Nature of Beneficial Ownership*	Pct Based On Outstanding Percent of Class**
Chris Mazzini and Michelle Mazzini 12850 Spurling Rd., Suite 200 Dallas, Texas 75230	5,900,543	(1)	77%
All officers and directors as a group	5,900,543		77%
West Coast Asset Management, Inc. Paul J. Orfalea Lance W. Helfert R. Atticus Lowe 1205 Coast Village Road Montecito, California 93108	3,000	(2)	<1%
Enerjex Resources, Inc. 1600 NE Loop 410, Suite 104 San Antonio, Texas 78209	0	(3)	0%
Nadel and Gussman Energy, LLC Stephen J. Heyman James F. Adelson 15 East 5th Street, Suite 3200 Tulsa, Oklahoma 74103	700,000	(3) (4)	9%

* "Beneficial Ownership" means the sole or shared power to vote, or direct the voting of, a security or investment power with respect to a security, or any combination thereof.

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

** Percentages are base upon 7,640,803 shares of Common Stock outstanding at March 31, 2011

(1) Chris Mazzini directly owns 39,654 shares (1%). Giant Energy Corp. directly owns 5,860,889 shares (76%). Chris Mazzini owns 100% of the common stock of Giant Energy Corp.

(2) According to a Schedule 13D/A filed with the Commission by these persons for an event occurring December 31, 2010, each of the individually named persons have shared power to vote or direct a vote as well as shared power to dispose of or direct the disposition of the aggregate amount of stock owned. Each person is listed as the beneficial owner of the aggregate amount of these shares.

- 51 -

(3) According to a Schedule 13G filed with the Commission by Enerjex Resources, Inc. for an event occurring December 31, 2010, Enerjex Resources, Inc. owns beneficially 700,000 shares of the Company's Common Stock. According to a Schedule 13D/A filed by West Coast Opportunity Fund, LLC, West Coast Asset Management, Inc., R. Atticus Lowe, Lance W. Helfert and Paul J. Orfalea for event occurring December 31, 2010, such group of "Reporting Persons" for which West Coast Opportunity Fund, LLC is described as the "Fund" contributed its interest in 700,000 shares to Enerjex Resources, Inc. in exchange for all Enerjex Resources, Inc. Common Stock.

(4) According to Schedule 13G filed with the Commission with respect to an event occurring January 19, 2011, these persons own the number of shares reported. Such Schedule 13G does not identify any transaction involving the acquisition of such shares. It is believed the 700,000 shares of the Company's Common Stock reported as owned by Nadel and Gussman Energy, LLC were acquired from Enerjex Resources, Inc.

Changes in control

The Company is not aware of any arrangements or pledges with respect to its securities that may result in a change in control of the Company.

Item 13. Certain Relationships And Related Transactions

Transactions with management and others

Certain officers, directors and related parties, including entities controlled by Mr. Mazzini, the President and Chief Executive Officer, have engaged in business transactions with the Company which were not the result of arm's length negotiations between independent parties. Our management believes that the terms of these transactions were as favorable to us as those that could have been obtained from unaffiliated parties under similar circumstances. All future transactions between us and our affiliates will be on terms no less favorable than could be obtained from unaffiliated third parties and will be approved by a majority of the disinterested members of our Board of Directors.

Chris G. Mazzini and Michelle H. Mazzini, through a limited partnership in which they are limited partners, own M-R Oilfield Services, LP ("MRO"), an oilfield service company which provides roustabout, swabbing and completion services at rates which are at or below market to the Company. This oilfield services company currently does work exclusively for the Company, its parent company, Giant Energy Corp. and Giant NRG, LP, although MRO is contemplating

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

offering its services to unrelated third-parties. The Company benefits by having immediate access to services.

- 52 -

Certain Business Relationships

The long-term debt, which is secured by the commercial office building, is also guaranteed individually by Chris G. Mazzini and Michelle H. Mazzini, related parties.

The management services agreement between Giant and the Company was in effect from 1999 until September 30, 2008 when it terminated. This agreement provided monthly payments from the Company to Giant in the amount of \$20,000 in exchange for several of Giant's personnel providing management, administrative and other services to the Company and for the use of certain Giant assets.

On October 1, 2008, Giant entered into an Administrative Services Agreement with the Company whereby Giant pays the Company \$250 per month for the Company providing administrative services to Giant.

The Company has entered into a management services agreement with MRO whereby MRO makes monthly payments in the amount of \$1,000 per month to the Company in exchange for the Company providing administrative services to MRO. On October 1, 2008, the Company entered into a similar agreement with Giant NRG, LP ("NRG") a limited partnership with Chris Mazzini and Michelle Mazzini as limited partners. Under this agreement NRG pays a monthly fee of \$2,500 to the Company in exchange for the Company providing certain administrative services to NRG. The Company has entered into a similar arrangement with Peveler Pipeline, LP ("Peveler"), whereby Peveler pays the Company a monthly charge of \$250 in exchange for the Company providing administrative services to Peveler. Chris and Michelle Mazzini are the owners of Peveler Pipeline, LP, a limited partnership which owns a pipeline gathering system servicing wells owned by Giant, another related entity, described elsewhere in this report. The Company entered into a similar agreement with M-R Ventures, LLC ("MRV") a limited liability company that operates some wells in Michigan, and that is owned by Chris and Michelle Mazzini. Pursuant to this agreement, MRV will pay the Company a monthly fee in the amount of \$500 for certain administrative services that the Company provides to MRV. See also note 6 to the Financial Statements.

Item 14. Principal Accounting Fees and Services

The following table sets forth the aggregate fees for professional services rendered to Spindletop Oil & Gas Co. and Subsidiaries for the years 2010, 2009 and 2008 by accounting firm, Farmer, Fuqua, & Huff, P.C.

Type of Fees	2010	2009	2008
-----	-----	-----	-----
Audit Fees	\$41,000	\$40,000	\$31,000
Audit related fees	-	-	-
Tax fees	4,000	-	-
All other fees	-	-	-

Members of the Board of Directors (the "Board") fulfill the responsibilities of

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

an audit committee and have established policies and Procedures for the

- 53 -

approval and pre-approval of audit services and permitted non-audit services. The Board has the responsibility to engage and terminate Farmer, Fuqua, & Huff, P.C. independent auditors, to pre-approve their performance of audit services and permitted non-audit services, to approve all audit and non-audit fees, and to set guidelines for permitted non-audit services and fees. All the fees for 2010, 2009 and 2008 were pre-approved by the Board or were within the pre-approved guidelines for permitted non-audit services and fees established by the Board, and there were no instances of waiver of approved requirements or guidelines during the same periods.

PART IV

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and
Shareholders of Spindletop Oil & Gas Co.

We have audited the accompanying consolidated balance sheets of Spindletop Oil & Gas Co. (A Texas Corporation) and subsidiaries as of December 31, 2010 and 2009, and the related consolidated statements of operations, shareholders' equity and cash flows for each of the years in the three-year period ended December 31, 2010. Spindletop Oil & Gas Co.'s management is responsible for these consolidated financial statements. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Spindletop Oil & Gas Co. and subsidiaries as of December 31, 2010 and 2009, and the consolidated results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2010 in conformity with accounting principles generally accepted in the United States of America.

We were not engaged to examine management's assertion about the effectiveness of Spindletop Oil & Gas Co.'s internal control over financial reporting as of December 31, 2010 included in the accompanying management report on internal control over financial reporting and, accordingly, we do not express an opinion thereon.

Our audits were made for the purpose of forming an opinion on the basic consolidated financial statements taken as a whole. The schedules listed in the index of the consolidated financial statements are presented for purposes of complying with the Securities and Exchange Commission's rules and are not part of the basic consolidated financial statements. These schedules have been subjected to the auditing procedures applied in the audits of the basic consolidated financial statements and, in our opinion, fairly state, in all material respects, the financial data required to be set forth therein in relation to the basic consolidated financial statements taken as a whole.

/s/ Farmer, Fuqua and Huff, P.C.

SPINDLETOP OIL & GAS CO. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. BASIS OF PRESENTATION AND ORGANIZATION

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

Merger and Basis of Presentation

On July 13, 1990, Prairie States Energy Co., a Texas corporation, (the Company) merged with Spindletop Oil & Gas Co., a Utah corporation (the Acquired Company). The name of Prairie States Energy Co. was changed to Spindletop Oil & Gas Co., a Texas corporation at the time of the merger.

Certain balances for 2008 have been reclassified to conform to the 2010 and 2009 presentations.

Organization and Nature of Operations

The Company was organized as a Texas corporation in September 1985, in connection with the Plan of Reorganization ("the Plan"), effective September 9, 1985, of Prairie States Exploration, Inc., ("Exploration"), a Colorado corporation, which had previously filed for Chapter 11 bankruptcy. In connection with the Plan, Exploration was merged into the Company, with the Company being the surviving corporation. After giving effect to a stock split, up to a total of 166,667 of the Company's common shares may be issued to Exploration's former shareholders. As of December 31, 2010, 122,436 shares have been issued to former shareholders in connection with the Plan.

Spindletop Oil & Gas Co. is engaged in the exploration, development and production of oil and natural gas; and through one of its subsidiaries, the gathering and marketing of natural gas.

The Company owns land along with a commercial office building which contains approximately 46,286 of rentable square feet, of which the Company occupies approximately 10,317 rentable square feet as its corporate office headquarters. The Company leases the remaining space in the building to non-related third party commercial tenants at prevailing market rates.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

FASB Accounting Standards Codification

The Company presents its financial statements in accordance with generally accepted accounting principles in the United States ("GAAP"). In June, 2009, the Financial Accounting Standards Board ("FASB") completed its accounting guidance codification project. The FASB Accounting Standards Codification ("ASC") became effective for the Company's financial statements issued subsequent to June 30, 2009 and is the single source of authoritative

- 64 -

accounting principles recognized by the FASB to be applied to nongovernmental entities in the preparation of financial statements in conformity with GAAP. As of the effective date, the Company will no longer refer to the authoritative guidance dictating its accounting methodologies under the previous accounting standards hierarchy. Instead, the Company will refer to the ASC as the sole source of authoritative literature.

Consolidation

The consolidated financial statements include the accounts of Spindletop Oil &

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

Gas Co. and its wholly owned subsidiaries, Prairie Pipeline Co. and Spindletop Drilling Company. All significant inter-company transactions and accounts have been eliminated.

Cash and Cash Equivalents

The Company considers all highly liquid instruments with a maturity of three months or less to be cash equivalents.

Other Investments

Other short-term and long-term investments consist of certificates of deposit with maturities of more than three months. Carrying amounts approximate fair value.

Allowance for Doubtful Accounts

The Company provides an allowance for doubtful accounts equal to the estimated uncollectible portion of accounts receivable. This estimate is based on historical collection experience and a review of the current status of accounts receivable.

Oil and Gas Properties

The Company follows the full cost method of accounting for its oil and gas properties. Accordingly, all costs associated with acquisition, exploration and development of oil and gas reserves are capitalized and accounted for in cost centers, on a country-by-country basis. For each cost center, capitalized costs, less accumulated amortization and related deferred income taxes, shall not exceed an amount (the cost center ceiling) equal to the sum of:

- a) The present value of estimated future net revenues computed by applying current prices of oil and gas reserves (with consideration of price changes only to the extent provided by contractual arrangements) to estimated future production of proved oil and gas reserves as of the date of the latest balance sheet presented, less estimated future expenditures (based on current costs) to be incurred in developing and

- 65 -

- producing the proved reserves computed using a discount factor of ten percent and assuming continuation of existing economic conditions; plus
- b) The cost of properties not being amortized; plus
- c) The lower of cost or estimated fair market value of unproven properties included in the costs being amortized; less
- d) Income tax effects related to differences between the book and tax basis of the properties.

If unamortized costs capitalized within a cost center, less related deferred income taxes, exceed the cost center ceiling (as defined), the excess is charged to expense and separately disclosed during the period in which the excess occurs. Amounts required to be written off will not be reinstated for any subsequent increase in the cost center ceiling. Accordingly, no impairment of oil and gas properties charge was recorded for 2010 or 2009.

Depreciation and amortization for each cost center are computed on a composite unit-of-production method, based on estimated proven reserves attributable to the respective cost center. All costs associated with oil and gas properties

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

are currently included in the base for computation and amortization. Such costs include all acquisition, exploration, development costs and estimated future expenditures for proved undeveloped properties as well as estimated dismantlement and abandonment costs as calculated under the asset retirement obligation category, net of salvage value. All of the Company's oil and gas properties are located within the continental United States.

Gains and losses on sales of oil and gas properties are treated as adjustments of capitalized costs. Gains or losses on sales of property and equipment, other than oil and gas properties, are recognized as part of operations. Expenditures for renewals and improvements are capitalized, while expenditures for maintenance and repairs are charged to operations as incurred.

Property and Equipment

The Company, as operator, leases equipment to owners of oil and gas wells, on a month-to-month basis.

The Company, as operator, transports gas through its gas gathering systems, in exchange for a fee.

Depreciation is provided in amounts sufficient to relate the cost of depreciable assets to operations over their estimated service lives (5 to 10 years for rental equipment and gas gathering systems, 4 to 5 years for other property and equipment). The straight-line method of depreciation is used for financial reporting purposes, while accelerated methods are used for tax purposes.

Real Estate Property

The Company owns land along with a two-story commercial office building which is situated thereon. The Company occupies a portion of the building as its

- 66 -

primary corporate headquarters, and leases the remaining space in the building to non-related third party commercial tenants at prevailing market rates. The Company depreciates the commercial office using the straight-line method of depreciation for financial statement and income tax purposes.

Investments in Real Estate

All investments in real estate holdings are stated at cost or adjusted carrying value. ASC Topic 360, "Accounting for the Impairment or Disposal of Long-Lived Assets", requires that a property be considered impaired if the sum of the expected future cash flows (undiscounted and without interest charges) is less than the carrying amount of the property. If impairment exists, an impairment loss is recognized by a charge against earnings equal to the amount by which the carrying amount of the property exceeds fair market value less cost to sell the property. If impairment of a property is recognized, the carrying amount of the property is reduced by the amount of the impairment, and a new cost for the property is established. Depreciation is provided over the properties estimated remaining useful life. There was no charge to earnings during 2010 due to impairment of real estate holdings.

Accounting for Asset Retirement Obligations

The Company adopted ASC Topic 410-20, "Accounting for Asset Retirement

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

Obligations" on December 31, 2005. The adoption of ASC Topic 410-20 resulted in a cumulative effect adjustment to record a \$239,000 increase in the carrying value of oil and gas properties, and an asset retirement obligation liability of the same amount. This statement requires the recording of a liability in the period in which an asset retirement obligation ("ARO") is incurred, in an amount equal to the discounted estimated fair value of the obligation that is capitalized. Thereafter, each quarter, this liability is accreted up to the final retirement cost. The determination of the ARO is based on an estimate of the future cost to plug and abandon our oil and gas wells. The actual costs could be higher or lower than current estimates.

The following table reflects the changes of the asset retirement obligations during the period ending December 31;

	2010	2009
	-----	-----
Carrying amount of asset retirement obligation	\$ 762,000	\$ 667,000
Liabilities added	131,000	61,000
Liabilities divested or settled	(87,000)	(52,000)
Current period accretion expenses	48,000	86,000
	-----	-----
Carrying amount as of December 31,	\$ 854,000	\$ 762,000
	=====	=====

- 67 -

Revenue Recognition

The Company follows the "sales" (takes or cash) method of accounting for oil and gas revenues. Under this method, the Company recognizes revenues on oil and gas production as it is taken and delivered to the purchasers. The volumes sold may be more or less than the volumes the Company is entitled to take based on our ownership in the property. These differences result in a condition known as a production imbalance. Our crude oil and natural gas imbalances are insignificant.

Income Taxes

In June, 2006, an interpretation of ASC Topic 740-10, "Accounting for Uncertainty in Income Taxes" was issued. The interpretation creates a single model to address accounting for uncertainty in tax positions. Specifically, the pronouncement prescribes a recognition threshold and a measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The interpretation also provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods, disclosure and transition of certain tax positions.

The Company adopted the provisions of the interpretation of ASC Topic 740-10 effective January 1, 2007. The adoption of this accounting principle did not have an effect on the Company's consolidated financial statements at, and for the three years ended December 31, 2010.

The Company accounts for income taxes pursuant to ASC Topic 740-10 "Accounting for Income Taxes" , which requires the recognition of deferred tax liabilities and assets for the expected future tax consequences of events that have been recognized in the Company's financial statements or tax returns. Under this

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

method, deferred tax liabilities and assets are determined based on the difference between the financial statement carrying amounts and tax bases of assets and liabilities, using enacted tax rates in effect in the years in which the differences are expected to reverse. The temporary differences primarily relate to depreciation, depletion and intangible drilling costs.

Use of Estimates

The preparation of financial statements in conformity with U. S. Generally Accepted Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

- 68 -

Share-Based Payments

Effective January 1, 2006, the Company adopted ASC Topic 718-10, "Share-Based Payment". ASC Topic 718-10 requires compensation costs related to share-based payments to be recognized in the income statement over the requisite service period. The amount of the compensation cost is to be measured based on the grant-date fair value of the instrument issued. ASC Topic 718-10 is effective for awards granted or modified after the date of adoption and for awards granted prior to that date that have not vested. ASC Topic 718-10 does not materially change the Company's existing accounting practices or the amount of share-based compensation recognized in earnings.

Recently issued accounting pronouncements

FASB Accounting Standards Update ("ASU") 2010-03 was issued in January 2010, and aligns the current oil and natural gas reserve estimation and disclosure requirements of ASC Topic 932 with those in the SEC Final Rule Modernization of Oil and Gas Reporting issued December 31, 2008. Specifically, ASU No. 2010-03 introduces additional terms and re-defines others, (2) expands the definition of the term oil and gas producing activities, (3) requires a reporting entity to take into account its equity method investments in determining whether it engages in significant oil and gas producing activities, (4) requires that an un-weighted average of prices for the previous 12 months to be used to determine whether proved reserves are economically producible, and (5) requires separate disclosure of information about reserve quantities and financial statement amounts for geographic areas representing 15% or more of proved reserves. ASU 2010-03 is effective for entities with annual reporting periods ending on or after December 31, 2009. The Company adopted both the FASB and SEC rules as of December 31, 2009. The adoption did not have a material impact on the consolidated financial statements.

In August 2009, the Financial Accounting Standards Board ("FASB") issued ASU No. 2009-05, Fair Value Measurement and Disclosures: Measuring Liabilities at Fair Value. ASU 2009-05 provides clarification on measuring liabilities at fair value when a quoted price in an active market available. The Company adopted ASU No. 2009-05 (ASC Topic 820-10). The adoption of this statement did not have an impact on the consolidated financial statements.

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

The Company adopted FSP SFAS 107-1 and APB 28-1 (incorporated in ASC Topic 825), "Interim Disclosures about Fair Value of Financial Instruments". The statement increases the frequency of fair value disclosures to a quarterly instead of annual basis. The guidance relates to fair value disclosures for any financial instruments that are not currently reflected on the balance sheet at fair value. The adoption of this statement did not have a material impact on the consolidated financial statements.

The Company adopted FSP SFAS 157-4 (incorporated in ASC Topic 820), "Determining Fair Value When the Volume and Level of Activity for the Asset and Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly". ASC 820 provides guidelines for a broad interpretation of when to

- 69 -

apply market-based fair value measures. The statement reaffirms management's need to use judgment to determine when a market that was once active has become inactive and in determining fair values in markets that are no longer active.

The Company adopted ASC Topic 815, "Disclosure about Derivative Instruments and Hedging Activities" on January 1, 2009. ASC Topic 815 amends and expands the disclosure requirements for derivatives and hedging activities with the intent to provide users of financial statements with an enhanced understanding. The adoption of this statement did not have an impact on the consolidated financial statements.

The Company adopted ASC Topic 805, "Business Combinations" on January 1, 2009. The revision broadens the definition of a business combination to include transactions or other events in which control of one or more business is obtained. Further, this statement establishes principles and requirements for how an acquirer recognizes assets acquired, liabilities assumed and any non-controlling interests acquired. The adoption of this statement did not have an impact on the consolidated financial statements.

In January 2010, FASB issued ASU No. 2010-06, Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements. ASU 2010-06 requires reporting entities to provide information about movements of assets among Levels 1 and 2 of the three-tier fair value hierarchy established by ASC Topic 820. The guidance is effective for any fiscal year that begins after December 15, 2010 and should be used for quarterly and annual filings. The Company adopted the provisions of ASU 2010-06 on January 1, 2010 and this standard did not impact the Company's consolidated financial statements.

Subsequent Events

The Company has evaluated subsequent events through the issuance date of April 15, 2011.

3. ACCOUNTS RECEIVABLE

	December 31,	
	2010	2009
Trade	\$ 127,000	\$ 95,000
Accrued receivable	976,000	792,000
	1,103,000	887,000
Less: Allowance for losses	(15,000)	(14,000)

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

\$ 1,088,000 \$ 873,000
 =====

Accrued receivables are receivables from purchasers of oil and gas. These revenues are booked from check stub detail after receipt of the check for sales of oil and gas products. These payments are for sales of oil and gas produced

----- 70 -

in the reporting period, but for which payment has not yet been received until after the closing date of the reporting period. Therefore these sales are accrued as receivables as of the balance sheet date. Revenues for oil and gas production that has been sold but for which payment has not yet been received is accrued in the period sold.

4. ACCOUNTS PAYABLE

	December 31,	
	2010	2009
Trade payables	\$ 505,000	\$ 1,736,000
Production proceeds payable	1,535,000	976,000
Prepaid drilling costs	236,000	283,000
	\$ 2,276,000	\$ 2,995,000

5. NOTES PAYABLE

	December 31,	
	2010	2009
Note payable to a bank with monthly principal payments of \$10,000 plus accrued interest at a variable annual interest rate based upon an index which is the Treasury securities rate for a term of seven years, plus 2.20%. The interest rate is subject to change on the first day of each seven year anniversary after the date of the note based on the Index then in effect. As of the date of the Loan, the annual interest rate was 6.11%. The note is collateralized by land and a commercial office building, plus a guarantee by certain related parties. The note matures in November, 2018.	\$ 960,000	\$ 1,080,000
Less current maturities	120,000	120,000
Total notes payable, long-term portion	\$ 840,000	\$ 960,000

Estimated annual maturities for long-term debt are as follows:

2011	120,000
2012	120,000
2013	120,000
2014	120,000
2015	120,000
thereafter	360,000
	\$ 960,000

6. RELATED PARTY TRANSACTIONS

From 1999 through September 30, 2008, Giant Energy Corp. ("Giant") charged the Company a fee pursuant to a management services agreement. Giant is wholly owned by Chris Mazzini, President of the Company. General and administrative expense for the year ending December 31, 2008 was \$180,000 related to this agreement. Effective October 1, 2008, this agreement was terminated.

On October 1, 2008, Giant entered into an Administrative Services Agreement with the Company whereby Giant agreed to pay the Company \$250 per month for the Company providing administrative services to Giant.

The Company also entered into a management services agreement with M-R Oilfield Services, LP ("MRO") whereby MRO makes monthly payments in the amount of \$1,000 per month to the Company in exchange for the Company providing administrative services to MRO. On October 1, 2008, the Company entered into a similar agreement with Giant NRG, LP ("NRG") a limited partnership with Chris Mazzini and Michelle Mazzini as limited partners. Under this agreement NRG pays a monthly fee of \$2,500 to the Company in exchange for the Company providing certain administrative services to NRG. The Company has entered into a similar arrangement with Peveler Pipeline, LP ("Peveler"), whereby Peveler pays the Company a monthly charge of \$250 in exchange for the Company providing administrative services to Peveler. Chris and Michelle Mazzini are the owners of Peveler Pipeline, LP, a limited partnership which owns a pipeline gathering system servicing wells owned by Giant, another related entity, described elsewhere in this report. The Company entered into a similar agreement with M-R Ventures, LLC ("MRV") a limited liability company that operates some wells in Michigan, and that is owned by Chris and Michelle Mazzini. Pursuant to this agreement, MRV will pay the Company a monthly fee in the amount of \$500 for certain administrative services that the Company provides to MRV.

The long-term debt, which is secured by the commercial office building, is also guaranteed individually by Chris G. Mazzini and Michelle H. Mazzini, related parties.

The Company and Giant entered into a joint Barnett Shale horizontal drilling and development program dated August 22, 2006, and later amended on October 20, 2006 (the "Agreement") with an unrelated third party company. Effective September 19, 2008, the unrelated third party terminated the Agreement in accordance with provisions contained in the Agreement, and subsequent amendments.

7. COMMON STOCK

Effective January 1, 2006, the Company adopted ASC Topic 718-10, "Share-Based Payment". ASC Topic 718-10 requires compensation costs related to share-based payments to be recognized in the income statement over the requisite service period. The amount of the compensation cost is to be measured based on the grant-date fair value of the instrument issued. ASC Topic 718-10 is effective for awards granted or modified after the date of adoption and for awards granted prior to that date that have not vested. ASC Topic 718-10 does not

materially change the Company's existing accounting practices or the amount of share-based compensation recognized in earnings.

Effective April 9, 2009, the Company issued 10,000 shares of restricted common stock to a key employee pursuant to an employment package. The shares were

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

valued at \$2.00 per share, the believed market value for free trading shares at the time of issue. The amount was expensed as general and administrative expense. The shares of common stock were issued out of Treasury Stock and reduced the amount of the Company's common stock held in Treasury from 66,668 to 56,668 shares.

Effective December 16, 2009, the Company issued 10,000 shares of restricted common stock to a key employee pursuant to an employment package. The shares were valued at \$1.65 per share, the believed market value for free trading shares at the time of issue. The amount was expensed as general and administrative expense. The shares of common stock were issued out of Treasury Stock and reduced the amount of the Company's common stock held in Treasury from 56,668 to 46,668 shares.

Effective December 1, 2010, the Company issued 10,000 shares of restricted common stock to a key employee pursuant to an employment package. The shares were valued at \$2.25 per share, the believed market value for free trading shares at the time of issue. The amount was expensed as general and administrative expense. The shares of common stock were issued out of Treasury Stock and reduced the amount of the Company's common stock held in Treasury from 46,668 to 36,668 shares.

8. INCOME TAXES

The Company accounts for income taxes pursuant to ASC Topic 740-10, "Accounting for Income Taxes". ASC Topic 740-10 utilizes the liability method of computing deferred income taxes.

In connection with the Plan discussed in Note 1, the Company agreed to pay, in cash, to Exploration's unsecured creditors, as defined, one-half of the future reductions of Federal income taxes which were directly related to any allowed carryovers of Exploration's net operating losses and investment tax credits. Such payments are to be made on a pro-rata basis. Amounts incurred under this agreement, which are considered contingent consideration, totaled \$ -0-, \$ -0-, and \$ -0- in 2010, 2009 and 2008, respectively. As of December 31, 2010 the Company has not received a ruling from the Internal Revenue Service concerning the net operating loss and investment credit carryovers. Until the tax savings which result from the utilization of these carry-forwards is assured, the Company will not pay to Exploration's unsecured creditors any of the tax savings benefit. As of December 31, 2010, the Company owes \$97,000 to Exploration's unsecured creditors.

In calculating tax savings benefits described above, consideration was given to the alternative minimum tax, where applicable, and the tax effects of temporary differences, as shown below:

- 73 -

Income tax differed from the amounts computed by applying an effective United States federal income tax rate of 34% to pretax income in 2010, 2009 and 2008 as a result of the following:

	2010	2009	2008
	-----	-----	-----
Computed expected tax expense (benefit)	\$ 42,000	\$ (104,000)	\$1,910,000
Miscellaneous timing differences related to book and tax depletion differences and the expensing of intangible drilling costs	(139,000)	(122,000)	(576,000)
	-----	-----	-----

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

Expected Federal			
income tax expense (benefit)	\$ (97,000)	\$ (226,000)	\$1,334,000
	=====	=====	=====

Income tax expense (benefit) for the years ended December 31, 2010, 2009 and 2008 consisted of the following:

	2010	2009	2008
	-----	-----	-----
Federal income taxes (benefit)	\$ (97,000)	\$ (226,000)	\$1,334,000
State income taxes	-	-	163,000
	-----	-----	-----
Current income tax provision (benefit)	\$ (97,000)	\$ (226,000)	\$1,497,000
	=====	=====	=====

Deferred income taxes reflect the effects of temporary differences between the tax bases of assets and liabilities and the reported amounts of those assets and liabilities for financial reporting purposes. Deferred income taxes also reflect the value of net operating losses, investment tax credits and an offsetting valuation allowance. The Company's total deferred tax assets and corresponding valuation allowance at December 31, 2010 and 2009 consisted of the following:

	December 31,	
	2010	2009
	-----	-----
Deferred tax assets		
Depreciation, depletion and amortization	320,000	422,000
Other, net	16,000	9,000
	-----	-----
Total	336,000	431,000
Deferred tax liabilities		
Expired leasehold	(231,000)	(54,000)
Intangible drilling costs	(3,114,000)	(2,718,000)
	-----	-----
Net deferred tax liability	(3,009,000)	(2,341,000)
	=====	=====

- 74 -

9. CASH FLOW INFORMATION

The Company does not consider any of its assets, other than cash and certificates of deposit shown as cash on the balance sheet, to meet the definition of a cash equivalent.

Net cash provided by operating activities includes cash payments for interest of \$84,000, \$71,000, and \$79,000 for the years 2010, 2009 and 2008, respectively. Also included are cash payments for taxes of \$-0-, \$400,000, and \$1,300,000 in 2010, 2009 and 2008, respectively.

Excluded from the Consolidated Statements of Cash Flows were the effects of certain non-cash investing and financing activities, as follows:

	2010	2009	2008
	-----	-----	-----
Addition (reduction) of Oil & Gas			
Properties by recognition of			
Asset Retirement Obligation	\$ 45,000	8,000	\$ 65,000
	-----	-----	-----

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

\$ 45,000 \$ 8,000 \$ 65,000
 =====

10. EARNINGS PER SHARE

Earnings per share ("EPS") are calculated in accordance with ASC Topic 260-10, "Earnings per Share", which was adopted in 1997 for all years presented. Basic EPS is computed by dividing income available to common shareholders by the weighted average number of common shares outstanding during the period. The adoption of ASC Topic 260-10 had no effect on previously reported EPS. Diluted EPS is computed based on the weighted number of shares outstanding, plus the additional common shares that would have been issued had the options outstanding been exercised.

11. CONCENTRATIONS OF CREDIT RISK

As of December 31, 2010 the Company had approximately \$2,192,000 in checking and money market accounts at one bank, and approximately \$2,863,000 in a second bank. The Company also had approximately \$2,900,000, including \$400,000 of short-term certificates of deposit and \$1,000,000 of long-term certificates of deposit invested at eight other banking institutions. Cash amounts on deposit at these institutions exceed current per account FDIC protection limits by approximately \$2,623,000.

Most of the Company's business activity is located in Texas. Accounts receivable as of December 31, 2010 and 2009 are due from both individual and institutional owners of joint interests in oil and gas wells as well as purchasers of oil and gas. A portion of the Company's ability to collect these receivables is dependent upon revenues generated from sales of oil and gas produced by the related wells.

- 75 -

12. FINANCIAL INSTRUMENTS

The estimated fair value of the Company's financial instruments at December 31, 2010 and 2009 follows:

	2010		2009	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Cash	\$ 6,244,000	\$ 6,244,000	\$ 9,153,000	\$ 9,153,000
Short-term certificates	400,000	400,000	-	-
Accounts receivable	1,088,000	1,088,000	873,000	873,000

The fair value amounts for each of the financial instruments listed above approximate carrying amounts due to the short maturities of these instruments.

13. COMMITMENTS AND CONTINGENCIES

In connection with the Plan of Reorganization discussed in Note 1, the Company agreed to pay, in cash, to Exploration's unsecured creditors, as defined, one-half of the future reduction of Federal income taxes which were directly related to any allowed carryovers of Exploration's net operating losses and investment tax credits existing at the time of the reorganization.

The Company's oil and gas exploration and production activities are subject to Federal, State and environmental quality and pollution control laws and regulations. Such regulations restrict emission and discharge of wastes from

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

wells, may require permits for the drilling of wells, prescribe the spacing of wells and rate of production, and require prevention and clean-up pollution.

Although the Company has not in the past incurred substantial costs in complying with such laws and regulations, future environmental restrictions or requirements may materially increase the Company's capital expenditures, reduce earnings, and delay or prohibit certain activities.

At December 31, 2010 the Company has acquired bonds and letters of credit issued in favor of various state regulatory agencies as mandated by state law in order to comply with financial assurance regulations required to perform oil and gas operations within the various state jurisdictions.

The Company has seven, \$5,000 single-well bonds totaling \$35,000 and three \$10,000 single well bonds with an insurance company, for wells the Company operates in Alabama. The \$5,000 bonds are written for a three year period and the \$10,000 bonds are written for a one year period.

The Company has 11 letters of credit from a bank issued for the benefit of various state regulatory agencies in Texas, Oklahoma, and Louisiana, ranging in amounts from \$15,000 to \$50,000 and totaling \$413,000. These letters of credit have expiration dates that range from January 1, 2011 through March 31, 2014 and are fully secured by funds on deposit with the bank in business money market accounts.

14. ADDITIONAL OPERATIONS AND BALANCE SHEET INFORMATION

Certain information about the Company's operations for the years ended December 31, 2010, 2009 and 2008 follows.

Sale of Oil & Gas Properties

In March, 2010, the Company sold its working interest and operations in the Robertson 20-12 well located in Lamar County, Alabama to an unrelated party for \$5,000 in cash.

Dependence on Customers

The following is a summary of significant purchasers from oil and natural gas produced by the Company for the three-year period ended December 31, 2010:

Purchaser	Year Ended December 31, (1)		
	2010	2009	2008
Enbridge Energy Partners			
(formerly Enbridge North Texas)	26%	36%	26%
Crosstex Gulf Coast Mktg	16%	23%	42%
Eastex Crude Company	7%	7%	3%
Shell Trading (US) Company	7%	6%	5%
Kinder Morgan	5%	-	-
Enterprise Crude Oil LLC (Teppco Crude Oil, LP)	5%	4%	2%
Conoco Phillips Company	4%	1%	-
Targa Midstream Service, LIM	3%	3%	6%
Navajo Refining Co.	3%	3%	1%
Genesis	2%	2%	1%
DCP Midstream, LP	2%	-	-
ETC Texas Pipeline	2%	1%	1%

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

Sunoco Partners Marketing	2%	-%	-%
Devon Gas Services, LP	-%	1%	2%
Gateway Gathering & Marketing	-%	-%	1%

(1) Percent of Total Oil & Gas Sales

Oil and gas is sold to approximately 102 different purchasers under market sensitive, short-term contracts computed on a month to month basis.

Except as set forth above, there are no other customers of the Company that individually accounted for more than two percent of the Company's oil and gas revenues during the three years ended December 31, 2010.

The Company currently has no hedged contracts.

- 77 -

Certain revenues, costs and expenses related to the Company's oil and gas operations are as follows:

	Year Ended December 31,		
	2010	2009	2008
Capitalized costs relating to oil and gas producing activities:			
Unproved properties	\$ 2,064,000	\$ 1,874,000	\$ 1,820,000
Proved properties	15,820,000	13,206,000	11,813,000
Total capitalized costs	17,884,000	15,080,000	13,633,000
Accumulated amortization	(8,129,000)	(7,212,000)	(6,340,000)
Total capitalized costs, net	\$ 9,755,000	\$ 7,868,000	\$ 7,293,000
	Year Ended December 31,		
	2010	2009	2008
Costs incurred in oil and gas property acquisition, exploration and development:			
Acquisition of properties	\$ 458,000	\$ 121,000	\$ 28,000
Development costs	2,346,000	1,327,000	2,509,000
Total costs incurred	\$ 2,804,000	\$ 1,448,000	\$ 2,537,000
	Year Ended December 31,		
	2010	2009	2008
Results of Operations from producing activities:			
Sales of oil and gas	\$ 6,302,000	\$ 5,067,000	\$ 12,690,000

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

Production costs	2,613,000	2,447,000	3,521,000
Amortization of oil and gas Properties	916,000	871,000	1,091,000
Total production costs	3,529,000	3,318,000	4,612,000

Depreciation	1,000	7,000	8,000
Total costs	34,000	41,000	48,000
Total net revenue	\$ 145,000	\$ 151,000	\$ 131,000

15. BUSINESS SEGMENTS

The Company's three business segments are (1) oil and gas exploration, production and operations, (2) transportation and compression of natural gas, and (3) commercial real estate investment. Management has chosen to organize the Company into the three segments based on the products or services provided. The following is a summary of selected information for these segments for the three-year period ended December 31, 2010:

	Year Ended December 31,		
	2010	2009	2008
Revenues: (3)			
Oil and gas exploration, production and operations	\$ 6,621,000	\$ 5,384,000	\$ 12,959,000
Gas gathering, compression and			

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

equipment rental	179,000	192,000	179,000
Real estate rental	448,000	503,000	509,000
	-----	-----	-----
	\$ 7,248,000	\$ 6,079,000	\$13,647,000
	=====	=====	=====

- 79 -

Depreciation, depletion and
Amortization expense:

Oil and gas exploration, production and operations	\$ 940,000	\$ 890,000	\$ 1,110,000
Gas gathering, compression and equipment rental	1,000	7,000	8,000
Real estate rental	101,000	100,000	97,000
	-----	-----	-----
	\$ 1,042,000	\$ 997,000	\$ 1,215,000
	=====	=====	=====

Income from operations:

Oil and gas exploration, production and operations	\$ 3,020,000	\$ 1,961,000	\$ 8,240,000
Gas gathering, compression and equipment rental	145,000	151,000	131,000
Real estate rental	101,000	154,000	142,000
	-----	-----	-----
	3,266,000	2,266,000	8,513,000

Corporate and other (1)

	(2,819,000)	(2,227,000)	(4,992,000)
	-----	-----	-----

Consolidated net income (loss)

	\$ 447,000	\$ 39,000	\$ 3,521,000
	=====	=====	=====

Identifiable Assets net of DDA:

Oil and gas exploration, production and operations	\$ 9,829,000	\$ 7,906,000	\$ 7,333,000
Gas gathering, compression and equipment rental	-	1,000	7,000
Real estate rental	1,767,000	1,868,000	1,968,000
	-----	-----	-----
	11,596,000	9,775,000	9,308,000

Corporate and other (2)

	9,181,000	10,611,000	11,981,000
	-----	-----	-----

Consolidated total assets

	\$20,777,000	\$20,386,000	\$21,289,000
	=====	=====	=====

Note (1): Corporate and other includes general and administrative expenses, other non-operating income and expense and income taxes.

Note (2): Corporate and other includes cash, accounts and notes receivable, inventory, other property and equipment and intangible assets.

Note (3): All reported revenues are from external customers.

16. SUPPLEMENTARY INCOME STATEMENT INFORMATION

The following items were charged directly to expense:

	Year Ended December 31,		
	2010	2009	2008
	-----	-----	-----
Maintenance and repairs	\$ 15,000	\$ 15,000	\$ 21,000

18. SUPPLEMENTAL RESERVE INFORMATION (UNAUDITED)

The Company's net proved oil and natural gas reserves as of December 31, 2010 and 2009 have been estimated by Company personnel. The Company's net proved oil and natural gas reserves as of December 31, 2008 were estimated by Netherland, Sewell & Associates, Inc.

All estimates are in accordance generally accepted petroleum engineering and evaluation principles and definitions and with guidelines established by the Securities and Exchange Commission.

Our policies and practices regarding internal control over the estimating of reserves are structured to objectively and accurately estimate our oil and natural gas reserve quantities and present values in compliance with the U.S. Securities and Exchange Commission ("SEC") regulations and accounting principles generally accepted in the United States of America. We maintain an internal staff of petroleum engineers and geosciences professionals who work closely with the accounting and financial departments to insure the integrity, accuracy and timeliness of data used in the estimation process. The data used in our reserve estimation process is based on historical results for production, oil and natural gas prices received, lease operating expenses and development costs incurred, ownership interest and other required data. Historical oil and gas prices, lease operating expenses, and ownership interests are provided by and verified by the Company's accounting department.

The Petroleum Engineer responsible for the supervision and preparation of the Company's internally generated reserve report has a Bachelor of Science degree in Petroleum Engineering from a major university and has experience in preparing economic evaluations and reserve estimates. He meets the requirements regarding qualifications, objectivity and confidentiality set forth in the Standards Pertaining to the Engineering and Auditing of Oil and Gas Reserves Information promulgated by the Society of Petroleum Engineers.

The Company has established a written internal control procedure to verify that the data entered into our engineering evaluation software is complete and correct. These internal control procedures establish the source of the data both internally and externally, the personnel that will collect the data and testing of the data collected to insure its accuracy. A summary of the procedures are shown below:

Accordingly, the following reserve estimates were based on existing economic and operating conditions. Oil and gas prices for 2010 and 2009 were calculated

- 82 -

using a 12-month average price, calculated as the unweighted arithmetic of the first-day-of-the month price for each month of each year. Oil and gas prices in effect at December 31, were used for 2008. Operating costs, production and ad valorem taxes and future development costs were based on current costs with no escalation.

There are numerous uncertainties inherent in estimating quantities of proved reserves and in projecting the future rates of production and timing of development expenditures. The following reserve data represents estimates only and should not be construed as being exact. Moreover, the present values should not be construed as the current market value of the Company's oil and gas reserves or the costs that would be incurred to obtain equivalent reserves.

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

Changes in Estimated Quantities of Proved Oil and Gas Reserves (Unaudited):

	Crude Oil Bbls	Natural Gas Mcf
	-----	-----
Quantities of Proved Reserves:		

Balance December 31, 2007	345,154	14,366,765
Sales of reserves in place	-	-

Balance December 31, 2009	296,770	10,672,610
Balance December 31, 2010	361,870	8,754,920

- 83 -

Standardized Measure of Discounted Future Net Cash Flows and Changes Therein
Relating to Proved Oil and Gas Reserves (Unaudited)

The Standardized Measure of Discounted Future Net Cash Flows and Changes Therein Relating to Proved Oil and Gas Reserves ("Standardized Measures") does not purport to present the fair market value of a company's oil and gas properties. An estimate of such value should consider, among other factors, anticipated future prices of oil and gas, the probability of recoveries in excess of existing proved reserves, the value of probable reserves and acreage prospects, and perhaps different discount rates. It should be noted that estimates of reserve quantities, especially from new discoveries, are inherently imprecise and subject to substantial revision.

Reserve estimates were prepared in accordance with standard Security and Exchange Commission guidelines. The future net cash flow for 2010 and 2009 was computed using a 12-month average price, calculated as the un-weighted arithmetic average of the first-day-of-the-month price for each month of the year. The future net cash flow for 2008 was calculated using year-end prices. Lease operating costs, compression, dehydration, transportation, ad valorem taxes, severance taxes, and federal income taxes were deducted. Costs and

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

prices were held constant and were not escalated over the life of the properties. No deduction has been made for interest, or general corporate overhead. The annual discount of estimated future cash flows is defined, for use herein, as future cash flows discounted at 10% per year, over the expected period of realization.

Proved Developed Reserves were calculated based on Decline Curve Analysis on 115 operated wells and 113 non-operated wells. Materially insignificant operated and non-operated wells were excluded from the reserve estimate.

The Company emphasizes that reserve estimates are inherently imprecise. Accordingly, the estimates are expected to change as more current information becomes available. It is reasonably possible that, because of changes in market conditions or the inherent imprecision of these reserve estimates, that the estimates of future cash inflows, future gross revenues, the amount of oil and gas reserves, the remaining estimated lives of the oil and gas properties, or any combination of the above may be increased or reduced in the near term. If reduced, the carrying amount of capitalized oil and gas properties may be reduced materially in the near term.

- 84 -

Standardized measure of discounted future net cash flows related to proved reserves:

	Year Ended December 31,		
	2010	2009	2008
Future production revenue	\$ 72,465,000	\$ 61,140,000	\$ 83,207,000
Future development costs	(2,187,000)	(2,807,000)	(4,476,000)
Future production costs	(32,386,000)	(23,501,000)	(29,657,000)
Future net cash flow before Federal income tax	37,892,000	34,832,000	49,074,000
Future income taxes	(10,610,000)	(9,753,000)	(13,741,000)
Future net cash flows	27,282,000	25,079,000	35,333,000
Effect of 10% annual discounting	(8,577,000)	(8,969,000)	(13,072,000)
Standardized measure of Discounted net cash flows	\$ 18,705,000	\$ 16,110,000	\$ 22,261,000

Changes in the standardized measure of discounted future net cash flows:

Amounts for 2009 and 2008 are restated from previously issued report to more closely align with SEC reporting rules.

Year Ended December 31,

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

	2010	2009	2008
Beginning of the year	\$ 16,110,000	\$ 22,261,000	\$ 42,214,000
Sales of Oil and gas, net of production costs	(3,510,000)	(2,493,000)	(8,724,000)
Net changes in prices and Production costs	3,713,000	(7,333,000)	(19,493,000)

I, Chris G. Mazzini, certify that:

Edgar Filing: SPINDLETOP OIL & GAS CO - Form 10-K

1. I have reviewed this report on Form 10-K of Spindletop Oil & Gas Co.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13-15(e) and 15d-15e) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f) for the registrant and have:
 - (a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the controls and procedures as of the end of the period covered by this report based on such evaluation; and
 - (d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

-91-

5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
 - (a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls.

Exhibit 32

Certification Pursuant to 18 U.S.C. Section 1350
As Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002

In connection with the Annual Report of Spindletop Oil & Gas Co. (the "Company"), on Form 10-K for the year ended December 31, 2010 as filed with the Securities Exchange Commission on the date hereof (the "Report"), the undersigned Principal Executive Officer and Principal Financial and Accounting Officer of the Company, do hereby certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and

The information contained in the Report fairly presents, in all material respects, the financial condition and result of operations of the Company.
