Nuveen New Jersey and Pennsylvania Closed-End Exchange-Traded Funds
(NQJ, NNJ, NXJ, NQP, NPY, NXM)

Portfolio Managers'

Comments

Portfolio managers Tom Spalding and Tom O'Shaughnessy examine national and state economic conditions, key investment strategies, and the performance of the Nuveen Closed-End Exchange-Traded Municipal Funds for New Jersey and Pennsylvania. Spalding, who has been with Nuveen since 1976, assumed portfolio management responsibility for NQJ and NNJ in March 2001. At that time, he also added the new Nuveen Dividend Advantage Fund for New Jersey (NXJ). An 18-year Nuveen veteran, O'Shaughnessy has managed NQP since 1991 and NPY since 1995; he added the Nuveen Pennsylvania Dividend Advantage Fund (NXM) upon its inception in March 2001.

WHAT FACTORS HAD THE GREATEST INFLUENCE ON THE U.S. ECONOMY AND THE MUNICIPAL MARKET DURING THIS REPORTING PERIOD?

The major factors affecting the economy and the municipal market over the past twelve months were the Federal Reserve's increase and reduction of short-term interest rates, and the general slowdown in economic growth. After a series of rate increases through 1999 and 2000, the Fed embarked in January 2001 on a series of rate cuts designed to stimulate the sluggish U.S. economy. Over the first half of 2001, the Fed announced six reductions totaling 275 basis points, bringing the target federal funds rate to 3.75%, its lowest point since 1994. The consensus among many market observers is that the Fed is prepared to continue easing rates as long as signs of a significant economic slowdown remain.

In the municipal market, the overall economic environment combined with tight municipal supply helped many bonds perform well over this reporting period. As 2001 got underway, the Fed's interest rate cuts created more favorable conditions for both new municipal issuance and refundings, which totaled \$133.6 billion nationwide during the first six months of the year, an increase of 39% over January-June 2000 and up 30% from July-December 2000.

On the demand side, municipal bonds continued to be highly sought after by individual investors looking for diversification, tax-free income, and an alternative to a volatile stock market. We believe municipal bonds continue to represent good value in today's market.

HOW WAS THE MARKET ENVIRONMENT IN NEW JERSEY AND PENNSYLVANIA?

TOM SPALDING: In sharp contrast to the expanding national supply, new municipal issuance in New Jersey during the first six months of 2001 totaled only \$2.5 billion, a decrease of 45% from the same period a year ago and down 32% from the last half of 2000. This decline was due largely to last year's heavy issuance by the state's transportation sector. Overall, the New Jersey economy remained healthy, although growth has slowed in line with national trends. One area of concern is the tele-communications industry, where restructuring could lead to thousands of job cuts at some of the state's largest employers. Slowdowns in the financial markets also continued to have adverse effects on the New Jersey economy. However, over the near term, the state's central location, transportation infrastructure, high-tech industries, skilled workforce, and high

Edgar Filing: NUVEEN PENNSYLVANIA INVESTMENT QUALITY MUNICIPAL FUND INC - Form N-30D

per-capita income are expected to provide a solid economic base. In June 2001, state unemployment stood at 4.5%, up from 3.7% in June 2000 and in line with the current national average of 4.5%.

TOM O'SHAUGHNESSY: Mirroring events at the national level, Pennsylvania's economy also showed signs of slowing, due largely to downturns in retail trade, service industries, and construction as well as a recession in the state's manufacturing sector. Pennsylvania remains heavily reliant on manufacturing - this slowdown could have a detrimental effect on the overall state economy. However, this may be somewhat offset by continued growth in the state's high-tech and FIRE (financial,

insurance, real estate) sectors, especially in the housing market if interest rates continue to decline. As of June 2001, Pennsylvania unemployment was 4.8%, up from 4.3% in June 2000 and slightly higher than the current national average of 4.5%. Despite the economic slowdown, the state's highly skilled workforce helped Pennsylvania's per-capita income average rank 19th overall in 2000, above the national average. Aided by the lower interest rate environment, Pennsylvania municipal issuance came back from a decline of 42% in 2000 with a total of \$6.1 billion in new state paper during the first six months of 2001, up 143% over the same period in 2000 and up 57% from the previous six months. Currently, the market is anticipating continued heavy issuance from the Pennsylvania Turnpike Commission.

HOW DID THESE NUVEEN FUNDS PERFORM OVER THIS REPORTING PERIOD?

For the year ended June 30, 2001, the four older Nuveen Closed-End Exchange-Traded Funds covered in this report - NQJ, NNJ, NQP, and NPY - produced total returns on net asset value (NAV) as shown in the accompanying table. The annual returns for the Lehman Brothers Municipal Bond Index¹ and the Funds' Lipper Peer Groups² are also presented.

	Market Yield		Total Return on NAV	Lehman Total Return ¹	Lipper Average ²
	6/30/01	Taxable-Equivalent ³	1 Year Ended 6/30/01	1 Year Ended 6/30/01	1 Year Ended 6/30/01
NQJ	5.92%	9.11%	10.62%	9.98%	14.61%
NNJ	5.49%	8.45%	12.90%	9.98%	14.61%
NXJ	5.68%	8.74%

For additional information, see the individual Performance Overview for your Fund in this report.

Over the past twelve months, municipal bonds enjoyed a generally positive total return environment as a result of relatively tight municipal supply, Fed

easings, and favorable technicals. The Funds' participation in these market gains is reflected in the total returns on NAV listed in the previous table.

Between June 30, 2000, and June 30, 2001, the yield on the Bond Buyer 25 Revenue Bond Index fell from 5.98% to 5.52%. In this environment of falling yields (and rising bond values), funds with longer durations⁴ would be expected to perform well. As of June 30, 2001, the durations of the four older Nuveen Funds ranged from 7.10 to 10.90, compared with 7.89 for the unleveraged Lehman Brothers Municipal Bond Index, while the longer durations of NXJ and NXM (14.58 and 16.78, respectively) are typical of newly established Funds. The older Funds' relative performance was also influenced by differences in their structure and individual portfolio holdings. For example, NQP's holdings of high coupon bonds have helped this Fund provide one of the most attractive yields in the Pennsylvania market. However, as these bonds approach their call dates, their price performance has had an impact on the Fund's total return on NAV.

HOW DID THE MARKET ENVIRONMENT AFFECT THE FUNDS' DIVIDENDS AND SHARE PRICES?

During the year ended June 30, 2001, Nuveen's dividend management strategies helped to support the income streams of all four older Nuveen Funds. As of June 30, 2001, NNJ and NPY had each offered shareholders 13 consecutive months of steady or increasing dividends, while NQJ and NQP had provided 32 and 13 consecutive months, respectively, of stable income.

The two newer Funds, NXJ and NXM, declared their first monthly tax-free dividends in May and began paying them in June.

All of these Funds use leverage as a way to potentially enhance the dividends paid to common shareholders. This benefit is tied in part to the short-term rates the Funds pay their MuniPreferred(R) shareholders. When short-term rates rise or fall, the Funds must adjust the amount of income they pay to preferred shareholders, which affects the income available for common shareholders.

In coming months, lower short-term rates could continue to have beneficial effects on the Funds' dividends. However, this trend could be offset by the effect of bond

- 1 The Funds' performances are compared with that of the national Lehman Brothers Municipal Bond Index, an unleveraged index comprising a broad range of investment-grade municipal bonds. Results for the Lehman index do not reflect any expenses.
- 2 The total returns of the Nuveen New Jersey Funds are compared with the average annualized return of the eight funds in the Lipper New Jersey Municipal Debt Funds category, while the returns of the Pennsylvania Funds are compared with the average return of the nine funds in the Lipper Pennsylvania category. Fund and Lipper returns assume reinvestment of dividends.
- 3 The taxable-equivalent yield represents the yield that must be earned on a taxable investment in order to equal the yield of the Nuveen Fund on an after-tax basis. The taxable-equivalent yield is based on the Fund's market yield on the indicated date and a federal income tax rate of 30.5% plus the applicable state income tax rate. The combined federal and state tax rates used in this report are as follows: New Jersey 35% and Pennsylvania 32.5%.
- 4 Duration is a measure of a Fund's NAV volatility in reaction to interest rate movements. Fund duration, also known as leverage-adjusted duration, takes into account the leveraging process for a Fund and therefore is

generally longer than the duration of the actual portfolio of individual bonds that make up the Fund. Unless otherwise noted, references to duration in this commentary are intended to indicate Fund duration.

calls on the higher-yielding bonds held by these port-folios. This is especially true of NQJ and NQP, which have entered the part of their life cycle when they can expect an increased level of call activity. The level of short-term rates, the amount of bond calls, and the interest rates at which we can reinvest the proceeds of any calls will all influence the dividends of these Nuveen Funds over the next twelve months.

During the past year, as the stock market remained volatile and the bond market continued to perform well, many investors turned to tax-free fixed-income investments as a way to add balance to their portfolios and reduce overall risk. As a result, the share prices of the four older Nuveen Funds improved (see the charts on the individual Performance Overview pages). As investors recognized the opportunity offered by these Funds, increased demand caused the discounts on NQJ and NQP to move to premiums over the past twelve months, while the discounts on NNJ and NPY narrowed significantly.

WHAT KEY STRATEGIES WERE USED TO MANAGE THESE NUVEEN FUNDS DURING THE YEAR ENDED JUNE 30, 2001?

As evidenced by their twelve-month total returns on NAV, the four older Nuveen Funds were well structured going into this period. Despite the relatively tight supply of new municipal issuance during most of the past year, especially in New Jersey, the Funds continued to meet their goal of keeping assets fully invested and working for shareholders. However, tight supply, as well as the types of bonds that did come to market, meant relatively fewer opportunities to make trades that would substantially enhance the Funds' holdings. As appropriate opportunities became available, we focused on strengthening long-term dividend-payment capabilities, enhancing call protection, and purchasing bonds with the potential to add value and diversification to the Funds' portfolios.

In NQJ and NNJ, our focus over the past year was on reinvesting proceeds from bond calls in the most attractive bonds available that would support the Funds' dividends. We also selectively trimmed some positions that had become relatively high-priced in order to invest in issues that offered potentially superior performance.

In Pennsylvania, although we saw new issuance increase significantly during the first six months of 2001, much of the supply was rated AAA or insured and provided fewer opportunities to improve the income streams of NQP and NPY. As we did find opportunities to enhance the Funds' portfolios, we financed our purchases by selling bonds at attractive prices. The market of the past twelve months represented a good time to sell bonds with short calls as well as pre-refunded bonds.

As of June 30, 2001, all six of the Nuveen Funds covered in this report offered excellent credit quality, with between 74% and 90% of their portfolios invested in bonds rated AAA/U.S. guaranteed and AA. NQJ and NPY each also had a 10% allocation of BBB and non-rated bonds, which generally provided higher returns during 2000.

In March 2001, we introduced new Nuveen Dividend Advantage Municipal Funds for New Jersey (NXJ) and Pennsylvania (NXM). As of June 30, 2001, the portfolios of both of these Funds were invested in intermediate and longer-term bonds that are expected to help achieve the Funds' objective of attractive monthly income. In assembling NXJ's portfolio, we focused on quality bonds in the healthcare sector as well as a variety of revenue bonds that spanned several sectors, including water and sewer, transportation, and education. Our largest healthcare purchase

was \$15 million of A+ rated Robert Wood Johnson University Hospital bonds, which added attractive yields to the Fund. Because of the extremely tight supply of New Jersey municipal paper, we also bought a number of Puerto Rico territorial bonds that we plan to replace with New Jersey paper as we find better opportunities in the market.

In contrast to the situation in New Jersey, ample issuance in the Pennsylvania municipal market helped us structure NXM with all in-state paper. However, much of the new supply was insured or high-quality paper that did not carry the types of yields we were seeking. In purchasing bonds for this portfolio, therefore, we focused on sectors of the market that we believed had the greatest yield potential, including industrial development bonds, healthcare and long-term care issues, and housing. We were able to take advantage of an offering by the Allegheny County Residential Finance Authority to purchase more than \$5 million of GNMA-backed single-family housing bonds, the Fund's top holding. As of June 30, 2001, our three largest sector weightings were general obligation bonds, healthcare, and education.

WHAT IS YOUR OUTLOOK FOR THE MUNICIPAL MARKET IN GENERAL AND THESE NUVEEN FUNDS IN PARTICULAR?

Overall, our outlook for the fixed-income markets during the next 12 months continues to be positive. Demand for tax-exempt municipal bonds is anticipated to remain strong, as investors look for ways to rebalance their portfolios and reduce potential risk. If interest rates continue to fall and the pace of refundings accelerates, new municipal issuance nationwide in 2001 could exceed \$250 billion.

Looking specifically at these Nuveen Funds, NNJ and NPY provide good levels of call protection during the remainder of 2001 and in 2002, with 12% of NNJ's portfolio and 15% of NPY subject to calls over the next 18 months. However, both NQJ and NQP, which reached the 10-year anniversary of their inception in February 2001, have entered the part of the bond market cycle where they are experiencing a typical increase in call exposure. Over the next 18 months, these two Funds could see up to 35% and 36% of their portfolios, respectively, affected by bond calls, depending on market interest rates during this time. The newly established NXJ has no scheduled bond calls in 2001 and 2002, while NXM's portfolio has a 8% call exposure over this period.

Our expectations for future bond calls are already being integrated into the overall investment strategies of these Funds. The absolute level of interest rates, new issue and secondary market supply, and credit and sector spreads will help dictate how called bond proceeds are reinvested. Given the current tight supply in the New Jersey municipal market, we may continue to hold bonds with short calls in anticipation of increased new issuance in the months ahead. In Pennsylvania, we plan to keep the Funds fully invested while we wait for opportunities that may offer the potential of greater total returns.

In general, we believe these Nuveen Funds are well positioned for the market environment of the next 12 months. As value-oriented investors, we plan to remain focused on adding value for our shareholders, providing support for the Funds' dividends, and watching new issuance for opportunities to purchase the research-intensive credits that fully utilize Nuveen's expertise in this area, especially in the healthcare and housing sectors. Overall, we believe these Nuveen Funds will continue to play an important role in investors' long-range financial programs, providing balance and diversification, dependable tax-free income, and quality investments.

1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The state Funds (the "Funds") covered in this report and their corresponding stock exchange symbols are Nuveen New Jersey Investment Quality Municipal Fund,

Inc. (NQJ), Nuveen New Jersey Premium Income Municipal Fund, Inc. (NNJ), Nuveen New Jersey Dividend Advantage Municipal Fund (NXJ), Nuveen Pennsylvania Investment Quality Municipal Fund (NQP), Nuveen Pennsylvania Premium Income Municipal Fund 2 (NPY) and Nuveen Pennsylvania Dividend Advantage Municipal Fund (NXM). New Jersey Investment Quality (NQJ), New Jersey Premium Income (NNJ), Pennsylvania Investment Quality (NQJ) and Pennsylvania Premium Income (NPY) are traded on the New York Stock Exchange while New Jersey Dividend Advantage (NXJ) and Pennsylvania Dividend Advantage (NXM) are traded on the American Stock Exchange. Prior to the commencement of operations of New Jersey Dividend Advantage (NXJ) and Pennsylvania Dividend Advantage (NXM), each Fund had no operations other than those related to organizational matters, the initial capital contribution of \$100,275 by Nuveen Advisory Corp. (the "Adviser"), a wholly owned subsidiary of The John Nuveen Company and the recording of the organizational expenses (\$15,000) and their reimbursement by Nuveen Investments, also a wholly owned subsidiary of The John Nuveen Company.

Each Fund seeks to provide current income exempt from both regular federal and designated state income taxes by investing primarily in a diversified portfolio of municipal obligations issued by state and local government authorities within a single state. The Funds are registered under the Investment Company Act of 1940 as closed-end management investment companies.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with accounting principles generally accepted in the United States.

Securities Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Directors/Trustees. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers and general market conditions. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. The securities so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets in a separate account with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At June 30, 2001, New Jersey Investment Quality (NQJ) and Pennsylvania Dividend Advantage (NXM) had outstanding when-issued or delayed delivery purchase commitments of \$9,212,285 and \$2,840,792, respectively. There were no such outstanding purchase commitments in any of the other Funds.

Investment Income

Interest income is determined on the basis of interest accrued, adjusted for amortization of premiums and accretion of discounts on long-term debt securities.

Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its shareholders. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and

Edgar Filing: NUVEEN PENNSYLVANIA INVESTMENT QUALITY MUNICIPAL FUND INC - Form N-30D

applicable state and local income taxes, to retain such tax-exempt status when distributed to the shareholders of the Funds. All monthly tax-exempt income dividends paid during the fiscal year ended June 30, 2001, have been designated Exempt Interest Dividends.

Dividends and Distributions to Shareholders

Tax-exempt net investment income is declared monthly as a dividend and payment is made or reinvestment is credited to shareholder accounts on the first business day after month end. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to shareholders of tax-exempt net investment income, net realized capital gains and/or market discount are recorded on the ex-dividend date. The amount and timing of such distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States. Accordingly, temporary over-distributions as a result of these differences may occur and will be classified as either distributions in excess of net investment income, distributions in excess of net realized gains and/or distributions in excess of net ordinary taxable income from investment transactions, where applicable.

Preferred Shares

The Funds have issued and outstanding \$25,000 stated value Preferred shares. Each Fund's Preferred shares are issued in one or more Series. The dividend rate on each Series may change every seven days, as set by the auction agent. The number of shares outstanding, by Series and in total, are as follows:

	NEW JERSEY INVESTMENT QUALITY (NQJ)	NEW JERSEY PREMIUM INCOME (NNJ)	NEW JERSEY DIVIDEND ADVANTAGE (NXJ)	PENNSYLVANIA INVESTMENT QUALITY (NQP)	PENNSYLVANIA PREMIUM INCOME 2 (NPY)	PE

Number of Shares:

Series W	--	1,440	--	2,400	--	
Series Th	2,000	1,600	--	2,000	2,080	
Series F	1,280	--	--	--	1,800	

Total	6,480	3,664	1,920	5,280	4,724	
=====						

Effective May 18, 2001, New Jersey Dividend Advantage (NXJ) and Pennsylvania Dividend Advantage (NXM) issued 1,920 and 1,000, respectively, Series T \$25,000 stated value Preferred shares.

Derivative Financial Instruments

The Funds may invest in certain derivative financial instruments including futures, forward, swap and option contracts, and other financial instruments with similar characteristics. Although the Funds are authorized to invest in such financial instruments, and may do so in the future, they did not make any such investments during the fiscal year ended June 30, 2001.

Custodian Fee Credit

Edgar Filing: NUVEEN PENNSYLVANIA INVESTMENT QUALITY MUNICIPAL FUND INC - Form N-30D

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

Offering Costs

Nuveen Investments has agreed to pay all offering costs (other than the sales load) that exceed \$.03 per Common share for New Jersey Dividend Advantage (NXJ) and Pennsylvania Dividend Advantage (NXM). New Jersey Dividend Advantage's (NXJ) and Pennsylvania Dividend Advantage's (NXM) share of offering costs (\$196,200 and \$98,667, respectively) were recorded as a reduction of the proceeds from the sale of common shares.

Costs incurred by New Jersey Dividend Advantage (NXJ) and Pennsylvania Dividend Advantage (NXM) in connection with their offering of Preferred shares (\$636,500 and \$390,750, respectively) were recorded as a reduction of the proceeds from the sale of the Preferred shares.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results may differ from those estimates.

Audit Guide

In November 2000, the American Institute of Certified Public Accountants (AICPA) issued a revised version of the AICPA Audit and Accounting Guide for Investment Companies (the "Guide"). The Guide is effective for annual financial statements issued for fiscal years beginning after December 15, 2000. It is not anticipated that the adoption of the Guide will have a significant effect on the financial statements.

Build Your Wealth

Automatically

NUVEEN EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

FLEXIBILITY

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

Edgar Filing: NUVEEN PENNSYLVANIA INVESTMENT QUALITY MUNICIPAL FUND INC - Form N-30D

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.
