2 SEMI-ANNUAL REPORT FEBRUARY 28, 2009

A Letter to Shareholders

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

Dear Shareholder

The present time may well be remembered as one of the most tumultuous periods in financial market history. Over the past year, the housing market

collapse and the ensuing credit crisis swelled into an all-out global financial market meltdown, featuring the collapse of storied financial firms, volatile

swings in the world's financial markets and monumental government actions, including the recent passage of the nearly \$800 billion American Recovery

and Reinvestment Act of 2009.

The US economy appeared somewhat resilient through the first few months of 2008 before becoming mired in the worst recession in decades. The

economic data was dire across the board, but worse was the intensifying pace of deterioration in consumer spending, employment, manufacturing and

other key indicators. US gross domestic product (GDP) contracted at an annual rate of 6.3% in the 2008 fourth quarter substantially below forecast and

the worst reading since 1982. The Federal Reserve Board (the Fed) took forceful action to revive the global economy and financial system. In addition to

slashing the federal funds target rate from 3% to a record low range of 0% to 0.25%, the central bank provided enormous cash injections and significantly

expanded its balance sheet via various lending and acquisition programs.

Against this backdrop, US equities contended with relentless market volatility, and the sentiment turned decisively negative toward period end. Declines

were significant and broad based, with little divergence among the returns for large and small cap stocks. Non-US stocks were not spared either, as the

credit crisis revealed itself to be global in nature and economic activity slowed dramatically.

Risk aversion remained the dominant theme in fixed income markets, leading the Treasury sector to top all other asset classes. The high yield market was

particularly hard hit in this environment, as economic turmoil, combined with frozen credit markets and substantial technical pressures, took a heavy toll.

Meanwhile, tax-exempt issues posted positive returns for the period, but the sector was not without significant challenges, including a shortage of market

participants, lack of liquidity, difficult funding environment and backlog of new-issue supply.

In all, investors continued to gravitate toward relative safety, as evidenced in the six- and 12-month returns of the major benchmark indexes:

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

Total Returns as of February 28, 2009	6-month	12-month
US equities (S&P 500 Index)	(41.82)%	(43.32)%
Small cap US equities (Russell 2000 Index)	(46.91)	(42.38)
International equities (MSCI Europe, Australasia, Far East Index)	(44.58)	(50.22)
US Treasury securities (Merrill Lynch 10-Year US Treasury Index)	8.52	8.09
Taxable fixed income (Barclays Capital US Aggregate Bond Index*)	1.88	2.06
Tax-exempt fixed income (Barclays Capital Municipal Bond Index*)	0.05	5.18
High yield bonds (Barclays Capital US Corporate High Yield 2% Issuer Capped Index*)	(21.50)	(20.92)

* Formerly a Lehman Brothers index.

Through periods of market turbulence, as ever, BlackRock's full resources are dedicated to the management of our clients' assets. For our most current

views on the economy and financial markets, we invite you to visit www.blackrock.com/funds. We thank you for entrusting BlackRock with your investments,

and we look forward to continuing to serve you in the months and years ahead.

Sincerely,

Rob Kapito

President, BlackRock Advisors, LLC

THIS PAGE NOT PART OF YOUR FUND REPORT 3

Fund Summary as of February 28, 2009 **BlackRock Defined Opportunity Credit Trust**

Investment Objective

BlackRock Defined Opportunity Credit Trust (BHL) (the Fund) seeks high current income, with a secondary objective of long-term capital appreciation.

Performance

For the six months ended February 28, 2009, the Fund returned (20.79)% based on market price and (27.30)% based on net asset value (NAV). For the same period, the Lipper Loan Participation Funds category posted an average return of (39.55)% on a market price basis and (35.93)% on a NAV basis. The performance of the Lipper category does not necessarily correlate to that of the Fund, as the Lipper group comprises both closed-end funds and unleveraged continuously offered closed-end funds. All returns reflect reinvestment of dividends. The Fund's discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. This semi-annual period was one of the most difficult in market history. Accordingly, the Fund was conservatively invested with an emphasis on more liquid credits and defensive market

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

sectors, which aided relative performance for the six months.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

4 SEMI-ANNUAL REPORT FEBRUARY 28, 2009

Fund Summary as of February 28, 2009 **BlackRock Diversified Income Strategies Fund, Inc.**

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

Investment Objective

BlackRock Diversified Income Strategies Fund, Inc. (DVF) (the Fund) seeks to provide investors with a high current income by investing primarily in a diversified portfolio of floating rate debt securities and instruments, including floating or variable rate loans, bonds, preferred securities (including convertible preferred securities), notes or other debt securities or instruments that pay a floating rate of interest.

Performance

For the six months ended February 28, 2009, the Fund returned (47.13)% based on market price and (53.82)% based on NAV. For the same period, the closed-end Lipper Loan Participation Funds category posted an average return of (39.55)% on a market price basis and (35.93)% on a NAV basis. All returns reflect reinvestment of dividends. The Fund moved from a discount to a premium to NAV, which accounts for the difference between performance based on price and performance based on NAV. During the period, high yield bonds, which made up 48% of the Fund's portfolio as of February 28, 2009, performed inline with loans. This was neutral to performance, however, the Fund's allocation to high yield floating rate notes detracted, as these issues underperformed. The Fund was 25% leveraged as of February 28, 2009, amplifying its negative return during one of the most difficult periods in market history. Credit quality also hampered results, as the Fund's average credit distribution was lower than that of the market.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT FEBRUARY 28, 2009 5

Fund Summary as of February 28, 2009 BlackRock Floating Rate Income Strategies Fund, Inc

Investment Objective

BlackRock Floating Rate Income Strategies Fund, Inc. (FRA) (the Fund) seeks high current income and such preservation of capital as is consistent with investment in a diversified, leveraged portfolio consisting primarily of floating rate debt securities and instruments.

Performance

For the six months ended February 28, 2009, the Fund returned (35.03)% based on market price and (37.26)% based on NAV. For the same period, the closed-end Lipper Loan Participation Funds category posted an average return of (39.55)% on a market price basis and (35.93)% on a NAV basis. The performance of the Lipper category does not necessarily correlate to that of the Fund, as the Lipper group comprises both closed-end funds and unleveraged continuously offered closed-end funds. All returns reflect reinvestment of dividends. The Fund's discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The six-month period featured considerable volatility in credit markets. Consequently, the Fund was invested fairly conservatively in terms of credit and sector allocation, which aided performance.

6 SEMI-ANNUAL REPORT FEBRUARY 28, 2009

Fund Summary as of February 28, 2009 **BlackRock Limited Duration Income Trust**

Investment Objective

BlackRock Limited Duration Income Trust (BLW) (the Fund) seeks to provide current income and capital appreciation.

Performance

For the six months ended February 28, 2009, the Fund returned (13.14)% based on market price and (20.15)% based on NAV. For the same period, the closed-end Lipper High Current Yield Funds (Leveraged) category posted an average return of (34.08)% on a market price basis and (34.87)% on a NAV basis. All returns reflect reinvestment of dividends. The Fund's discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The Fund's 24% allocation to mortgage securities (as of February 28, 2009) helped relative performance dramatically, as these issues outperformed high yield for the six-month period. The Fund employed very little leverage, which also proved beneficial to performance.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT FEBRUARY 28, 2009 7

Fund Summary as of February 28, 2009 **BlackRock Senior Floating Rate Fund, Inc.**

Investment Objective

BlackRock Senior Floating Rate Fund, Inc. (the Fund) is a continuously offered closed-end fund that seeks high current income and such preservation of capital as is consistent with investment in senior collateralized corporate loans made by banks and other financial institutions.

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

Performance

For the six months ended February 28, 2009, the Fund returned (22.69)% based on NAV. For the same period, the closed-end Lipper Loan Participation Funds category posted an average return of (35.93)% on a NAV basis. All returns reflect reinvestment of dividends. The Fund employed no leverage during the six months, while the Lipper category comprises primarily leveraged closed-end funds. This had a huge impact on relative performance during the first three months of the reporting period notably, the worst period in market history. In general, the Fund was defensively positioned with respect to sector allocation, and was broadly diversified among individual credits. This aided performance in the first half, but detracted as performance improved during the final two months.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Fund Information¹

Initial Offering Date	November 3, 1989
Yield based on Net Asset Value as of February 28, 2009 (\$5.95) ²	6.60%
Current Monthly Distribution per Share ³	\$0.030132
Current Annualized Distribution per Share ³	\$0.392792

¹ The Fund is a continuously offered closed-end fund that does not trade on an exchange.

² Yield based on net asset value is calculated by dividing the current annualized distribution per share by the net asset value.

Past performance does not guarantee future results.

³ The distribution is not constant and is subject to change.

The table below summarizes the change in the Fund's NAV per share:

	2/28/09	8/31/08	Change	High	Low
Net Asset Value	\$5.95	\$7.98	(25.44)%	\$7.98	\$5.54

Expense Example for Continuously Offered Closed-End Funds

	Actual			Hypothetical ⁵		
	Beginning Account Value	Ending Account Value	Expenses Paid	Beginning Account Value	Ending Account Value	Expenses Paid
	September 1, 2008	February 28, 2009	During the Period ⁴	September 1, 2008	February 28, 2009	During the Period ⁴
BlackRock Senior Floating Rate, Inc.	\$1,000	\$773.10	\$6.66	\$1,000	\$1,017.39	\$7.57

⁴ Expenses are equal to the annualized expense ratio of 1.51%, multiplied by the average account value over the period, multiplied by 181/365 (to reflect the one-half year period shown). Because the Fund is a feeder fund, the expense table reflects the expenses of both the feeder fund and the Master LLC in which it

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

invests.

⁵ Hypothetical 5% annual return before expenses is calculated by pro-rating the number of days in the most recent fiscal half year divided by 365. See Disclosure of Expenses for Continuously Offered Closed-End Funds on page 11 for further information on how expenses were calculated.

8 SEMI-ANNUAL REPORT FEBRUARY 28, 2009

Fund Summary as of February 28, 2009 BlackRock Senior Floating Rate Fund II, Inc.

Investment Objective

BlackRock Senior Floating Rate Fund II, Inc. (the Fund) is a continuously offered closed-end fund that seeks high current income and such preservation of capital as is consistent with investment in senior collateralized corporate loans made by banks and other financial institutions.

Performance

For the six months ended February 28, 2009, the Fund returned (22.75)% based on NAV. For the same period, the closed-end Lipper Loan Participation Funds category posted an average return of (35.93)% on a NAV basis. All returns reflect reinvestment of dividends. The Fund employed no leverage during the six months, while the Lipper category comprises primarily leveraged closed-end funds. This had a huge impact on relative performance during the first three months of the reporting period notably, the worst period in market history. SEMI-ANNUAL REPORT FEBRUARY 28, 2009 9

The Benefits and Risks of Leveraging

BlackRock Defined Opportunity Credit Trust, BlackRock Diversified Income Strategies Fund, Inc., BlackRock Floating Rate Income Strategies Fund, Inc. and BlackRock Limited Duration Income Trust (each a Fund and collectively, the Funds) may utilize leverage to seek to enhance the yield and NAV of its Common Shares. However, these objectives cannot be achieved in all interest rate environments.

The Funds may utilize leverage through borrowings and the issuance of short-term debt securities. In general, the concept of leveraging is based on the premise that the cost of assets to be obtained from leverage will be based on short-term interest rates, which normally will be lower than the income earned by each Fund on its longer-term portfolio investments. To the extent that the total assets of the Fund (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, the Fund's shareholders will benefit from the incremental yield.

The interest earned on securities purchased with the proceeds from leverage is paid to Common Shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV of the Fund's Common Shares. However, in order to benefit Common Shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. If the yield curve becomes negatively sloped, meaning short-term interest rates exceed long-term interest rates, returns to Common Shareholders will be lower than if the Fund had not used leverage.

To illustrate these concepts, assume a Fund's Common Shares capitalization is \$100 million and it issues debt securities for an additional \$30 million, creating a total value of \$130 million available for investment in long-

term securities. If prevailing short-term interest rates are 3% and long-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Fund pays interest expense on the \$30 million of debt securities based on the lower short-term interest rates. At the same time, the Fund's total portfolio of \$130 million earns the income based on long-term interest rates. In this case, the interest expense of the debt securities is significantly lower than the income earned on the fund's long-term investments, and therefore the Common Shareholders are the beneficiaries of the incremental yield.

Conversely, if prevailing short-term interest rates rise above long-term interest rates of 6%, the yield curve has a negative slope. In this case, the Fund pays interest expense on the higher short-term interest rates whereas the Fund's total portfolio earns income based on lower long-term interest rates. If short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental yield pickup on the Common Shares will be reduced or eliminated completely.

Furthermore, the value of the Fund's portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the redemption value of the Fund's debt securities do not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Fund's NAV positively or negatively in addition to the impact on Fund performance from leverage from debt securities.

The use of leverage may enhance opportunities for increased returns to the Funds and Common Shareholders, but as described above, it also creates risks as short- or long-term interest rates fluctuate. Leverage also will generally cause greater changes in a Funds' NAV, market price and dividend rate than a comparable portfolio without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, the Funds' net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, the Funds' net income will be less than if leverage had not been used, and therefore the amount available for distribution to shareholders will be reduced. The Funds may be required to sell portfolio securities at inopportune times or below fair market values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments which may cause the Funds to incur losses. The use of leverage may limit a Funds' ability to invest in certain types of securities or use certain types of hedging strategies. The Funds will incur expenses in connection with the use of leverage, all of which are borne by the holders of the Common Shares and may reduce returns on the Common Shares.

Under the Investment Company Act of 1940, the Funds are permitted to borrow through a credit facility and the issuance of short-term debt securities up to $33\frac{1}{3}\%$ of total managed assets. As of February 28, 2009, BlackRock Limited Duration Income Trust had no outstanding leverage and the other Funds had outstanding leverage from credit facility borrowings as a per-

centage of total managed assets as follows:

	Percent of Leverage
BlackRock Defined Opportunity Credit Trust	24%
BlackRock Diversified Income Strategies Fund, Inc	25%
BlackRock Floating Rate Income Strategies Fund, Inc	19%

10 SEMI-ANNUAL REPORT FEBRUARY 28, 2009

Derivative Instruments

The Funds may invest in various derivative instruments, including swap agreements, futures and forward currency contracts, and other instruments specified in the Notes to Financial Statements, which constitute forms of economic leverage. Such instruments are used to obtain exposure to a market without owning or taking physical custody of securities or to hedge market and/or interest rate risks. Such derivative instruments involve risks, including the imperfect correlation between the value of a derivative instrument and the underlying asset, possible default of the other party to the transaction and illiquidity of the derivative instrument. The Funds' ability to

successfully use a derivative instrument depends on the Advisor's ability to accurately predict pertinent market movements, which cannot be assured. The use of derivative instruments may result in losses greater than if they had not been used, may require the Funds to sell or purchase portfolio securities at inopportune times or for prices other than current market values, may limit the amount of appreciation the Funds can realize on an investment or may cause the Funds to hold a security that it might otherwise sell. The Funds' investments in these instruments are discussed in detail in the Notes to Financial Statements.

Disclosure of Expenses for Continuously Offered Closed-End Funds

Shareholders of BlackRock Senior Floating Rate Fund, Inc. and BlackRock Senior Floating Rate Fund II, Inc. may incur the following charges:

(a) expenses related to transactions, including early withdrawal fees; and
 (b) operating expenses, including advisory fees, and other Fund expenses.
 The examples on pages 8 and 9 (which are based on a hypothetical investment of \$1,000 invested on September 1, 2008 and held through February 28, 2009) are intended to assist shareholders both in calculating expenses based on an investment in each Fund and in comparing these expenses with similar costs of investing in other mutual funds.

The tables provide information about actual account values and actual expenses. In order to estimate the expenses a shareholder paid during the period covered by this report, shareholders can divide their account

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

value by \$1,000 and then multiply the result by the number under the heading entitled Expenses Paid During the Period.

The tables also provide information about hypothetical account values and hypothetical expenses based on each Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses. In order to assist shareholders in comparing the ongoing expenses of investing in these Funds and other funds, compare the 5% hypothetical example with the 5% hypothetical examples that appear in other funds' shareholder reports.

The expenses shown in the tables are intended to highlight shareholders' ongoing costs only and do not reflect any transactional expenses, such as early withdrawal fees. Therefore, the hypothetical examples are useful in comparing ongoing expenses only, and will not help shareholders determine the relative total expenses of owning different funds. If these transactional expenses were included, shareholder expenses would have been higher.

14 SEMI-ANNUAL REPORT FEBRUARY 28, 2009

Schedule of Investments (concluded)

BlackRock Defined Opportunity Credit Trust (BHL)

(Percentages shown are based on Net Assets)

Corporate Bonds	Par (000)	Value
Diversified Telecommunication Services 0.7%		
Qwest Corp., 5.246%, 6/15/13 (a)	USD 750 \$	635,625
Total Corporate Bonds 0.7%		635,625
Total Long-Term Investments		
(Cost \$146,762,245) 126.9%		110,916,252

Short-Term Securities	Beneficial Interest (000)	Value
BlackRock Liquidity Series, LLC Cash Sweep Series, 0.73% (b)(c)	2,338	2,338,274
Total Short-Term Securities		
(Cost \$2,338,274) 2.7%		2,338,274
Total Investments (Cost \$149,100,519*) 129.6%		113,254,526
Liabilities in Excess of Other Assets (29.6)%		(25,860,529)
Net Assets 100.0%		\$ 87,393,997

* The cost and unrealized appreciation (depreciation) of investments as of February 28, 2009, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$ 148,898,929
----------------	----------------

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

Gross unrealized appreciation	\$	98,628
Gross unrealized depreciation		(35,743,031)
Net unrealized depreciation	\$	(35,644,403)

(a) Variable rate security. Rate shown is as of report date.

(b) Investments in companies considered to be an affiliate of the Fund, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

Affiliate	Net Activity	Income
BlackRock Liquidity Series, LLC		
Cash Sweep Series	USD (27,287)	\$14,960

(c) Represents the current yield as of report date.

For Fund compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classifications for reporting ease.

Foreign currency exchange contracts as of February 28, 2009 were as follows:

Currency Purchased	Currency Sold	Counterparty	Settlement Date	Unrealized Appreciation
USD 5,195,272	EUR 3,963,000	Deutsche Bank AG	3/18/09	\$ 172,291
USD 644,025	EUR 500,000	UBS AG	3/18/09	10,252
USD 209,232	EUR 165,000	UBS AG	3/18/09	87
USD 2,101,838	GBP 1,418,500	Deutsche Bank AG	3/18/09	71,293
USD 217,518	GBP 150,000	UBS AG	3/18/09	2,797
Total				\$ 256,720

Credit default swaps on traded indexes sold protection outstanding as of February 28, 2009 were as follows:

Issuer	Received Fixed Rate	Counter- party	Expiration	Credit Rating ¹	Notional Amount (000) ²	Unrealized Depreciation
LCDX Index	3.25%	JPMorgan Chase Bank	June 2013	B	USD 1,000	\$(26,702)

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

¹ Using Standard and Poor's weighted average ratings of the underlying securities in the index.

² The maximum potential amount the Fund may pay should a negative credit event take place as defined under the terms of the agreement.

Currency Abbreviations:

EUR	Euro
GBP	British Pound
USD	U.S. Dollar

Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements, clarifies the definition of fair value, establishes a framework for measuring fair values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstance, to the extent observable inputs are not available (including the Fund's own assumption used in determining the fair value of investments)
The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Fund's policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.
The following table summarizes the inputs used as of February 28, 2009 in determining the fair valuation of the Fund's investments:

Valuation Inputs	Investments in Securities		Other Financial Instruments*	
	Assets		Assets	Liabilities
Level 1				
Level 2		\$ 86,549,621	\$ 256,720	\$ (26,702)
Level 3		26,704,905		
Total		\$113,254,526	\$ 256,720	\$ (26,702)

* Other financial instruments are foreign currency exchange contracts and swaps, which are valued at the unrealized appreciation/depreciation on the instrument.

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

The following is a reconciliation of investments for unobservable inputs (Level 3) that were used in determining fair value:

		Investments in Securities Assets
Balance as of August 31, 2008	\$	4,841,355
Accrued discounts/premiums		224,400
Realized loss		(275,118)
Change in unrealized appreciation/depreciation ¹		(15,927,562)
Net sales		(2,114,803)
Net transfers in Level 3		39,956,633
Balance as of February 28, 2009	\$	26,704,905

¹ Included in the related net change in unrealized appreciation/depreciation on the Statements of Operations.

See Notes to Financial Statements.

20 SEMI-ANNUAL REPORT FEBRUARY 28, 2009

Schedule of Investments (concluded)

BlackRock Diversified Income Strategies Fund, Inc. (DVF)

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

Effective September 1, 2008, the Fund adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 clarifies the definition of fair value, establishes a framework for measuring fair values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstance, to the extent observable inputs are not available (including the Fund's own assumption used in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Fund's policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following table summarizes the inputs used as of February 28, 2009 in determining the fair valuation of the Fund's investments:

Valuation Inputs		Investments in	Other Financial	
		Securities	Assets	Liabilities
		Assets	Assets	Liabilities
Level 1	\$	1,017,322		
Level 2		65,867,757	\$ 522,737	\$ (8,558,118)
Level 3		29,252,590		(108,863)
Total	\$	96,137,669	\$ 522,737	\$ (8,666,981)

* Other financial instruments are swaps, foreign currency exchange contracts and options. Swaps and foreign currency exchange contracts are valued at the unrealized appreciation/depreciation on the instrument and options are shown at market value.

The following is a reconciliation of investments for unobservable inputs (Level 3) that were used in determining fair value:

		Investments in
		Securities
		Assets

EUR	Euro
GBP	British Pound
USD	U.S. Dollar

Effective September 1, 2008, the Fund adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 clarifies the definition of fair value, establishes a framework for measuring fair values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstance, to the extent observable inputs are not available (including the Fund's own assumption used in determining the fair value of investments)
The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Fund's policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following table summarizes the inputs used as of February 28, 2009 in determining the fair valuation of the Fund's investments:

Valuation Inputs	Investments in	Other Financial	
	Securities	Instruments*	
	Assets	Assets	Liabilities
Level 1	\$ 711,284		
Level 2	145,788,452 \$	1,755,748	\$ (7,007,760)
Level 3	62,614,294		
Total	\$ 209,114,030 \$	1,755,748	\$ (7,007,760)

* Other financial instruments are swaps, foreign currency exchange contracts and options. Swaps and foreign currency exchange contracts are valued at the unrealized appreciation/depreciation on the instruments and options are shown at market value.

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

The following is a reconciliation of investments for unobservable inputs (Level 3) that were used in determining fair value:

		Investments in Securities Assets
Balance as of August 31, 2008	\$	27,977,920
Accrued discounts/premiums		164,900
Realized loss		(5,006,943)
Change in unrealized appreciation/depreciation ¹		(46,483,912)
Net sales		(16,941,868)
Net transfers in Level 3		102,904,197
Balance as of February 28, 2009	\$	62,614,294

¹ Included in the related net change in unrealized appreciation/depreciation on the Statements of Operations.

See Notes to Financial Statements.

Gross unrealized depreciation	(195,094,661)
Net unrealized depreciation	\$(193,240,491)

(a) Represents the interest only portion of a mortgage-backed security and has either a nominal or notional amount of principal.

(b) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional investors.

(c) Represents a payment-in-kind security, which may pay interest/dividends in additional par/shares.

(d) Variable rate security. Rate shown is as of report date.

(e) Issuer filed for bankruptcy and/or is in default of interest payments.

(f) Non-income producing security.

(g) Represents the current yield as of report date.

(h) Convertible security.

See Notes to Financial Statements.

34 SEMI-ANNUAL REPORT FEBRUARY 28, 2009

Schedule of Investments (concluded)

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

BlackRock Limited Duration Income Trust (BLW)

(i) Represents or includes a to-be-announced transaction. The Fund has committed to purchasing securities for which all specific information is not available at this time.

Counterparty	Market Value	Unrealized Appreciation
Barclays Capital PLC	\$124,403,125	\$170,156

(j) All, or a portion of security, pledged as collateral in connection with open financial futures contracts.

(k) Warrants entitle the Fund to purchase a predetermined number of shares of common stock. The purchase price and number of shares are subject to adjustment under certain conditions until the expiration date.

(l) Other interests represent beneficial interest in liquidation trusts and other reorganization entities and are non-income producing.

(m) Investments in companies considered to be an affiliate of the Fund, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

Affiliate	Net Activity	Income
BlackRock Liquidity Funds, TempFund	USD 31,220,283	\$20,283

For Fund compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classification for reporting ease.

Financial futures contracts sold as of February 28, 2009 were as follows:

Contracts	Issue	Expiration Date	Face Value	Unrealized Appreciation
57	5-Year U.S. Treasury Bond	June 2009	\$6,628,587	\$16,811

Foreign currency exchange contracts as of February 28, 2009 were as follows:

Currency Purchased	Currency Sold	Counterparty	Settlement Date	Unrealized Appreciation (Depreciation)
USD	529,140 EUR	400,000	Citibank N.A. 3/18/09	\$ 22,122

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

USD	1,803,270	EUR	1,400,000	UBS AG	3/18/09	28,707
USD	14,055,445	EUR	10,721,000	Deutsche Bank AG	3/18/09	466,094
USD	191,534	GBP	139,500	Citibank NA	3/18/09	(8,157)
USD	8,041,224	GBP	5,423,000	UBS AG	3/18/09	278,344
Total						\$ 787,110

Currency Abbreviations:

EUR	Euro
GBP	British Pound
USD	U.S. Dollar

Effective September 1, 2008, the Fund adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 clarifies the definition of fair value, establishes a framework for measuring fair values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstance, to the extent observable inputs are not available (including the Fund's own assumption used in determining the fair value of investments)
The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Fund's policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following table summarizes the inputs used as of February 28, 2009 in determining the fair valuation of the Fund's investments:

Valuation Inputs	Investments in	Other Financial	
	Securities Assets	Assets	Liabilities
Level 1		\$ 31,317,092	\$ 16,811
Level 2	449,520,281	869,557	(8,157)
Level 3	101,505,387		
Total		\$582,342,760	\$ 886,368 (8,157)

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

Other financial instruments are futures, foreign currency exchange contracts and options. Futures and foreign currency exchange contracts are valued at the unrealized appreciation/depreciation on the instrument and options are shown at market value.

The following is a reconciliation of investments for unobservable inputs (Level 3) that were used in determining fair value:

		Investments in Securities Assets
Balance as of August 31, 2008	\$	27,082,546
Accrued discounts/premiums		340,388
Realized loss		(6,448,682)
Change in unrealized appreciation/depreciation ¹		(72,247,376)
Net sales		(1,890,185)
Net transfers in Level 3		154,668,696
Balance as of February 28, 2009	\$	101,505,387

¹ Included in the related net change in unrealized appreciation/depreciation on the Statements of Operations.

See Notes to Financial Statements.

SEMI-ANNUAL REPORT FEBRUARY 28, 2009 49

Notes to Financial Statements (Unaudited)

1. Organization and Significant Accounting Policies:

BlackRock Defined Opportunity Credit Trust (Defined Opportunity),
BlackRock Diversified Income Strategies Fund, Inc. (Diversified Income),

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

BlackRock Floating Rate Income Strategies Fund, Inc. (Floating Rate Income), BlackRock Limited Duration Income Trust (Limited Duration), BlackRock Senior Floating Rate Fund, Inc. (Senior Floating Rate) and BlackRock Senior Floating Rate Fund II, Inc. (Senior Floating Rate II) (referred to as the Funds or individually as the Fund) are registered under the Investment Company Act of 1940, as amended (the 1940 Act). Defined Opportunity and Limited Duration are organized as Delaware Statutory trusts. Diversified Income, Floating Rate Income, Senior Floating Rate and Senior Floating Rate II are organized as Maryland corporations. Defined Opportunity, Diversified Income, Floating Rate Income and Limited Duration are registered as diversified, closed-end management investment companies. Senior Floating Rate and Senior Floating Rate II are registered as continuously offered, non-diversified, closed-end management investment companies. The Funds financial statements are prepared in conformity with accounting principles generally accepted in the United States of America, which may require the use of management accruals and estimates. Actual results may differ from these estimates. The Funds determine and make available for publication the net asset value of their Common Shares on a daily basis.

Prior to commencement of operations on January 31, 2008, Defined Opportunity had no operations other than those relating to organizational matters and the sale of 8,517 Common Shares on November 13, 2007 to BlackRock Advisors, LLC (the Advisor or Administrator), an indirect, wholly owned subsidiary of BlackRock, Inc., for \$122,006. Investment operations for Defined Opportunity commenced on January 31, 2008. Defined Opportunity will terminate no later than December 31, 2017.

Senior Floating Rate and Senior Floating Rate II seek to achieve their investment objectives by investing all their assets in the Master Senior Floating Rate LLC (the Master LLC), which has the same investment objective and strategies of the Funds. The value of each Fund s investment in the Master LLC reflects each Fund s proportionate interest in the net assets of the Master LLC. The performance of each Fund is directly affected by the performance of the Master LLC. The financial statements of the Master LLC, including the Schedule of Investments, are included elsewhere in this report and should be read in conjunction with Senior Floating Rate and Senior Floating Rate II s financial statements. The percentage of the Master LLC owned by Senior Floating Rate and Senior Floating Rate II at February 28, 2009 was 69% and 31%, respectively.

The following is a summary of significant accounting policies followed by the Funds:

Valuation of Investments: The Funds value their bond investments on the basis of last available bid prices or current market quotations provided by dealers or pricing services selected under the supervision of the Funds Board of Directors/Trustees (the Board). Floating rate loan interests are valued at the mean between the last available bid prices from one or more

brokers or dealers as obtained from pricing services. In determining the value of a particular investment, pricing services may use certain information with respect to transactions in such investments, quotations from dealers, pricing matrixes, market transactions in comparable investments, various relationships observed in the market between investments and calculated yield measures based on valuation technology commonly employed in the market for such investments. The fair value of asset-backed and mortgage backed securities are estimated based on models that consider the estimated cash flows of each tranche of the entity, establishes a benchmark yield and develops an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche. Financial futures contracts traded on exchanges are valued at their last sale price. TBA commitments are valued at the current market value of the underlying securities. Swap agreements are valued utilizing quotes received daily by the Funds pricing service or through brokers which are derived using daily swap curves and trades of underlying securities. Short-term securities with maturities less than 60 days are valued at amortized cost, which approximates fair value. Investments in open-end investment companies are valued at net asset value each business day. The Funds value their investments in Cash Sweep Series and Money Market Series, each of BlackRock Liquidity Series, LLC, at fair value, which is ordinarily based upon their pro-rata ownership in the net assets of the underlying fund.

Equity investments traded on a recognized securities exchange or the NASDAQ Global Market System are valued at the last reported sale price that day or the NASDAQ official closing price, if applicable. For equity investments traded on more than one exchange, the last reported sale price on the exchange where the stock is primarily traded is used. Equity investments traded on a recognized exchange for which there were no sales on that day are valued at the last available bid price. If no bid price is available, the prior day's price will be used, unless it is determined that such prior day's price no longer reflects the fair value of the security.

Exchange-traded options are valued at the mean between the last bid and ask prices at the close of the options market in which the options trade. An exchange-traded option for which there is no mean price is valued at the last bid price. If no bid price is available, the prior day's price will be used unless it is determined that the prior day's price no longer reflects the fair value of the option. Over-the-counter options and swaptions are valued by an independent pricing service using a mathematical model which incorporates a number of market data factors, such as the trades and prices of the underlying securities.

In the event that application of these methods of valuation results in a price for an investment which is deemed not to be representative of the market value of such investment, the investment will be valued by a method approved by the Board as reflecting fair value (Fair Value Assets). When determining the price for Fair Value Assets, the investment advisor and/or sub-advisor seeks to determine the price that each Fund might reasonably expect to receive from the current sale of that asset in an arm's-length transaction. Fair value determinations shall be based upon

all available factors that the investment advisor and/or sub-advisor deems

50 SEMI-ANNUAL REPORT FEBRUARY 28, 2009

Notes to Financial Statements (continued)

relevant. The pricing of all Fair Value Assets is subsequently reported to the Board or a committee thereof.

Generally, trading in foreign securities is substantially completed each day at various times prior to the close of business on the New York Stock Exchange (NYSE). The values of such securities used in computing the net assets of each Fund are determined as of such times. Foreign currency exchange rates will be determined as of the close of business on the NYSE. Occasionally, events affecting the values of such securities and such exchange rates may occur between the times at which they are determined and the close of business on the NYSE that may not be reflected in the computation of the Fund's net assets. If events (for example, a company announcement, market volatility or a natural disaster) occur during such periods that are expected to materially affect the value of such securities, those securities may be valued at their fair value as determined in good faith by the Board or by the investment advisor using a pricing service and/or procedures approved by the Board. Foreign currency exchange contracts and forward foreign currency exchange contracts are valued at the mean between the bid and ask prices. Interpolated values are derived when the settlement date of the contract is an interim date for which quotations are not available.

Senior Floating Rate and Senior Floating Rate II record their investments in the Master LLC at fair value. Valuation of securities held by the Master LLC is discussed in Note 1 of the Master LLC's Notes to Financial Statements, which are included elsewhere in this report.

Effective September 1, 2008, the Senior Floating Rate and Senior Floating Rate II implemented Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 clarifies the definition of fair value, establishes a framework for measuring fair values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks, and default rates) or other market-

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

corroborated inputs

Level 3 unobservable inputs based on the best information available in the circumstance, to the extent observable inputs are not available (including the Funds' own assumptions used in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following table summarizes the inputs used as of February 28, 2009 in determining the fair valuation of the Senior Floating Rate's investments:

Valuation Inputs	Investments in Securities
Level 1	
Level 2	\$ 268,277,380
Level 3	
Total	\$ 268,277,380

The following table summarizes the inputs used as of February 28, 2009 in determining the fair valuation of the Senior Floating Rate II's investments:

Valuation Inputs	Investments in Securities
Level 1	
Level 2	\$ 122,821,506
Level 3	
Total	\$ 122,821,506

Derivative Financial Instruments: The Funds may engage in various portfolio investment strategies both to increase the returns of the Funds and to hedge, or protect, their exposure to interest rate movements and movements in the securities markets. Losses may arise if the value of the contract decreases due to an unfavorable change in the price of the underlying security, or if the counterparty does not perform under the contract.

Financial futures contracts The Funds may purchase or sell financial futures contracts and options on financial futures contracts for investment purposes or to manage its interest rate risk. Futures contracts are contracts for delayed delivery of securities at a specific future date and at a specific price or yield. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in value of the contract. Such receipts or payments are

known as margin variation and are recognized by the Portfolio as unrealized gains or losses. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The use of futures transactions involves the risk of an imperfect correlation in the movements in the price of futures contracts, interest rates and the underlying assets, and the possible inability of counterparties to meet the terms of their contracts.

Forward foreign currency exchange contracts A forward foreign currency exchange contract is an agreement between two parties to buy and sell a currency at a set exchange rate on a future date. Each Fund may enter into forward foreign currency exchange contracts as a hedge against either specific transactions or portfolio positions. Foreign currency exchange contracts, when used by the Fund, help to manage the overall exposure to the foreign currency backing some of the investments held by the Fund. The contract is marked-to-market daily and the change in market value is recorded by the Fund as an unrealized gain or loss. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value at the time it was opened and the value at the time it was closed. The use of forward foreign currency contracts involves the risk that counterparties may not

SEMI-ANNUAL REPORT FEBRUARY 28, 2009 51

Notes to Financial Statements (continued)

meet the terms of the agreement and market risk of unanticipated movements in the value of a foreign currency relative to the US dollar.

Options The Funds may purchase and write call and put options. A call option gives the purchaser of the option the right (but not the obligation) to buy, and obligates the seller to sell (when the option is exercised), the underlying position at the exercise price at any time or at a specified time during the option period. A put option gives the holder the right to sell and obligates the writer to buy the underlying position at the exercise price at any time or at a specified time during the option period.

When a Fund purchases (writes) an option, an amount equal to the premium paid (received) by the Fund is reflected as an asset and an equivalent liability. The amount of the asset (liability) is subsequently marked-to-market to reflect the current market value of the option written. When a security is purchased or sold through an exercise of an option, the related premium paid (or received) is added to (or deducted from) the basis of the security acquired or deducted from (or added to) the proceeds of the security sold. When an option expires (or the Fund enter into a closing transaction), the Fund realizes a gain or loss on the option to the extent of the premiums received or paid (or gain or loss

to the extent the cost of the closing transaction exceeds the premium received or paid). When a Fund writes a call option, such option is covered, meaning that the Fund holds the underlying security subject to being called by the option counterparty, or cash in an amount sufficient to cover the obligation. Certain call options are written as part of an arrangement where the counterparty to the transaction borrows the underlying security from the Fund in a securities lending transaction.

In purchasing and writing options, the Funds bear the market risk of an unfavorable change in the price of the underlying security or index. Exercise of a written option could result in the Funds purchasing a security at a price different from the current market value. A Fund may execute transactions in both listed and over-the-counter options. Transactions in certain over-the-counter options may expose the Fund to the risk of default by the counterparty to the transaction.

Covered call options The Funds may sell covered call options which are options that give the purchaser the right to require the Fund to sell a security owned by the Fund to the purchaser at a specified price within a limited time period. A Fund will receive a premium (an up front payment) for selling a covered call option, and if the option expires unexercised because the price of the underlying security has gone down the premium received by the Fund will partially offset any unrealized losses on the underlying security. By writing a covered call option, however, a Fund limits its ability to sell the underlying security and gives up the opportunity to profit from any increase in the value of the underlying security beyond the sale price specified in the option.

Swaps The Funds may enter into swap agreements, in which the Fund and a counterparty agree to make periodic net payments on a specified notional amount. These periodic payments received or made by the

Funds are recorded in the accompanying Statements of Operations as realized gains or losses, respectively. Swaps are marked-to-market daily and changes in value are recorded as unrealized appreciation depreciation). When the swap is terminated, the Funds will record a realized gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the Funds' basis in the contract, if any. Swap transactions involve, to varying degrees, elements of credit and market risk in excess of the amounts recognized on the Statements of Assets and Liabilities. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreements may default on its obligation to perform or disagree as to the meaning of the contractual terms in the agreements, and that there may be unfavorable changes in interest rates and/or market values associated with these transactions.

Credit default swaps The Funds may enter into credit default swaps for investment purposes or to manage their credit risk. Each Fund enters into credit default agreements to provide a measure of protection

against the default of an issuer (as buyer of protection) and/or gain credit exposure to an issuer to which it is not otherwise exposed (as seller of protection). Credit default swaps are agreements in which one party pays fixed periodic payments to a counterparty in consideration for a guarantee from the counterparty to make a specific payment should a negative credit event take place (e.g. bankruptcy, failure to pay, obligation accelerators, repudiation, moratorium or restructuring). A Fund may either buy or sell (write) credit default swaps. As a buyer, the Fund will either receive from the seller an amount equal to the notional amount of the swap and deliver the referenced security or underlying securities comprising of an index or receive a net settlement of cash equal to the notional amount of the swap less the recovery value of the security or underlying securities comprising of an index. As a seller (writer), the Fund will either pay the buyer an amount equal to the notional amount of the swap and take delivery of the referenced security or underlying securities comprising of an index or pay a net settlement of cash equal to the notional amount of the swap less the recovery value of the security or underlying securities comprising of an index. In the event of default by the counterparty, the Fund may recover amounts paid under the agreement either partially or in total by offsetting any payables and/or receivables with collateral held or pledged.

Interest rate swaps Certain Funds may enter into interest rate swaps for investment purposes or to manage their interest rate risk. Interest rate swaps are agreements in which one party pays a floating rate of interest on a notional principal amount and receives a fixed rate of interest on the same notional principal amount for a specified period of time. Alternatively, a party may pay a fixed rate and receive a floating rate. In more complex swaps, the notional principal amount may decline (or amortize) over time.

Swaptions Swap options (swaptions) are similar to options on securities except that instead of selling or purchasing the right to buy or sell a security, the writer or purchaser of the swap option is granting or buying

52 SEMI-ANNUAL REPORT FEBRUARY 28, 2009

Notes to Financial Statements (continued)

the right to enter into a previously agreed upon swap agreement at any time before the expiration of the option.

Foreign Currency Transactions: Foreign currency amounts are translated into United States dollars on the following basis: (i) market value of investment securities, assets and liabilities at the current rate of exchange; and (ii) purchases and sales of investment securities, income and expenses at the rates of exchange prevailing on the respective dates of such transactions.

The Funds report foreign currency related transactions as components of realized gains for financial reporting purposes, whereas such components are treated as ordinary income for federal income tax purposes.

Asset-Backed and Mortgage-Backed Securities: The Funds may invest in asset-backed securities. Asset-backed securities are generally issued as pass-through certificates, which represent undivided fractional ownership interests in an underlying pool of assets, or as debt instruments, which are also known as collateralized obligations, and are generally issued as the debt of a special purpose entity organized solely for the purpose of owning such assets and issuing such debt. Asset-backed securities are often backed by a pool of assets representing the obligations of a number of different parties. The yield characteristics of certain asset-backed securities may differ from traditional debt securities. One such major difference is that all or a principal part of the obligations may be prepaid at any time because the underlying assets (i.e., loans) may be prepaid at any time. As a result, a decrease in interest rates in the market may result in increases in the level of prepayments as borrowers, particularly mortgagors, refinance and repay their loans. An increased prepayment rate with respect to an asset-backed security subject to such a prepayment feature will have the effect of shortening the maturity of the security. If a Fund has purchased such an asset-backed security at a premium, a faster than anticipated prepayment rate could result in a loss of principal to the extent of the premium paid.

The Funds may purchase in the secondary market certain mortgage pass-through securities. There are a number of important differences among the agencies and instrumentalities of the US Government that issue mortgage related securities and among the securities that they issue. For example, mortgage-related securities guaranteed by the Government National Mortgage Association (GNMA) are guaranteed as to the timely payment of principal and interest by GNMA and such guarantee is backed by the full faith and credit of the United States. However, mortgage-related securities issued by the Federal National Mortgage Association (FNMA) include FNMA guaranteed Mortgage Pass-Through Certificates, which are solely the obligations of the FNMA, are not backed by or entitled to the full faith and credit of the United States and are supported by the right of the issuer to borrow from the Treasury.

Certain Funds invest a significant portion of its assets in securities backed by commercial or residential mortgage loans or in issuers that hold mortgage and other asset-backed securities. Please see the Schedules of Investments for these securities. Changes in economic conditions, including delinquencies

and/or defaults on assets underlying these securities, can affect the value, income and/or liquidity of such positions.

Capital Trusts: These securities are typically issued by corporations, generally in the form of interest-bearing notes with preferred securities characteristics, or by an affiliated business trust of a corporation, generally in the form of beneficial interests in subordinated debentures or similarly

structured securities. The securities can be structured as either fixed or adjustable coupon securities that can have either a perpetual or stated maturity date. Dividends can be deferred without creating an event of default or acceleration, although maturity cannot take place unless all cumulative payment obligations have been met. The deferral of payments does not affect the purchase or sale of these securities in the open market. Payments on these securities are treated as interest rather than dividends for federal income tax purposes. These securities can have a rating that is slightly below that of the issuing company's senior debt securities.

Mortgage Dollar Roll Transactions: The Funds may sell mortgage-backed securities and simultaneously contract to repurchase substantially similar (same type, coupon and maturity) securities on a specific future date at an agreed upon price. Pools of mortgage securities are used to collateralize mortgage dollar roll transactions and may have different prepayment histories than those sold. During the period between the sale and the repurchase, the Funds will not be entitled to receive interest and principal payments on the securities sold. Proceeds of the sale will be invested in additional instruments for the Funds, and the income from these investments will generate income for the Funds. The Funds will account for dollar roll transactions as purchases and sales and realize gains and losses on these transactions.

Mortgage dollar rolls involve the risk that the market value of the securities that the Funds are required to purchase may decline below the agreed upon repurchase price of those securities. If investment performance of securities purchased with proceeds from these transactions does not exceed the income, capital appreciation and gain or loss that would have been realized on the securities sold as part of the dollar roll, the use of this technique will adversely impact the investment performance of the Funds.

Floating Rate Loans: The Funds may invest in floating rate loans, which are generally non-investment grade, made by banks, other financial institutions and privately and publicly offered corporations. Floating rate loans are senior in the debt structure of a corporation. Floating rate loans generally pay interest at rates that are periodically determined by reference to a base lending rate plus a premium. The base lending rates are generally (i) the lending rate offered by one or more European banks, such as LIBOR (London InterBank Offered Rate), (ii) the prime rate offered by one or more U.S. banks or (iii) the certificate of deposit rate. The Funds consider these investments to be investments in debt securities for purposes of its investment policies.

The Fund earns and/or pays facility and other fees on floating rate loans. Other fees earned/paid include commitment, amendment, consent, commissions and prepayment penalty fees. Facility, amendment and consent

Notes to Financial Statements (continued)

fees are typically amortized as premium and/or accreted as discount over the term of the loan. Commitment, commission and various other fees are recorded as income. Prepayment penalty fees are recorded on the accrual basis. When the Fund buys a floating rate loan it may receive a facility fee and when it sells a floating rate loan it may pay a facility fee. On an ongoing basis, the Fund may receive a commitment fee based on the undrawn portion of the underlying line of credit portion of a floating rate loan. In certain circumstances, the Fund may receive a prepayment penalty fee upon the prepayment of a floating rate loan by a borrower. Other fees received by the Fund may include covenant waiver fees and covenant modification fees.

The Fund may invest in multiple series or tranches of a loan. A different series or tranche may have varying terms and carry different associated risks.

Floating rate loans are usually freely callable at the issuer's option. The Fund may invest in such loans in the form of participations in loans (Participations) and assignments of all or a portion of loans from third parties. Participations typically will result in the Fund having a contractual relationship only with the lender, not with the borrower. The Fund will have the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the Participation and only upon receipt by the lender of the payments from the borrower.

In connection with purchasing Participations, the Fund generally will have no right to enforce compliance by the borrower with the terms of the loan agreement relating to the loans, nor any rights of offset against the borrower, and the Fund may not benefit directly from any collateral supporting the loan in which it has purchased the Participation.

As a result, the Fund will assume the credit risk of both the borrower and the lender that is selling the Participation. The Fund's investments in loan participation interests involve the risk of insolvency of the financial intermediaries who are parties to the transactions. In the event of the insolvency of the lender selling the Participation, the Fund may be treated as a general creditor of the lender and may not benefit from any offset between the lender and the borrower.

Preferred Stock: Certain Funds may invest in preferred stocks. Preferred stock has a preference over common stock in liquidation (and generally in receiving dividends as well) but is subordinated to the liabilities of the issuer in all respects. As a general rule, the market value of preferred stock with a fixed dividend rate and no conversion element varies inversely with interest rates and perceived credit risk, while the market price of convertible preferred stock generally also reflects some element of conversion value. Because preferred stock is junior to debt securities and other obligations of the issuer, deterioration in the credit quality of the issuer will cause greater changes in the value of a preferred stock than in a more senior debt security with similar stated yield characteristics. Unlike interest pay-

ments on debt securities, preferred stock dividends are payable only if declared by the issuer's board of directors. Preferred stock also may be subject to optional or mandatory redemption provisions.

Reverse Repurchase Agreements: The Funds may enter into reverse repurchase agreements with qualified third party broker-dealers. In a reverse

repurchase agreement, the Funds sell securities to a bank or broker-dealer and agree to repurchase the securities at a mutually agreed upon date and price. Interest on the value of the reverse repurchase agreements issued and outstanding is based upon competitive market rates determined at the time of issuance. The Funds may utilize reverse repurchase agreements when it is anticipated that the interest income to be earned from the investment of the proceeds of the transaction is greater than the interest expense of the transaction. Reverse repurchase agreements involve leverage risk and also the risk that the market value of the securities that the Funds are obligated to repurchase under the agreement may decline below the repurchase price. In the event the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, the Funds' use of the proceeds of the agreement may be restricted pending determination by the other party, or its trustee or receiver, whether to enforce the Funds' obligation to repurchase the securities.

TBA Commitments: The Funds may enter into to-be-announced (TBA) commitments to purchase or sell securities for a fixed price at a future date. TBA commitments are considered securities in themselves, and involve a risk of loss if the value of the security to be purchased or sold declines or increases prior to settlement date, which is in addition to the risk of decline in the value of the Funds' other assets.

Treasury Roll Transactions: A treasury roll transaction involves the sale of a Treasury security, with an agreement to repurchase the same security at an agreed upon price and date. Treasury rolls constitute a borrowing (not treated as purchase and sales) and the difference between the sale and repurchase prices represents interest expense at an agreed upon rate. Whether such a transaction produces a positive impact on performance depends upon whether the income and gains on the securities purchased with the proceeds received from the sale of the security exceeds the interest expense incurred by the Fund. Treasury rolls are not considered purchases and sales and any gains or losses incurred on the treasury rolls will be deferred until the treasury securities are disposed.

Treasury roll transactions involve the risk that the market value of the securities that the Fund is required to purchase may decline below the agreed upon purchase price of those securities. If investment performance of securities purchased with proceeds from these transactions does not exceed the income, capital appreciation and gain or loss that would have been realized on the securities sold as part of the dollar roll, the use of this technique will adversely impact the investment performance of the Funds.

Segregation and Collateralization: In cases in which the 1940 Act and the

interpretive positions of the Securities and Exchange Commission (SEC) require that each Fund segregates assets in connection with certain investments (e.g., dollar rolls, TBA s beyond normal settlement, options, swaps, forward foreign currency exchange contracts or financial futures contracts) or certain borrowings (e.g., reverse repurchase agreements), each Fund will, consistent with certain interpretive letters issued by the SEC, designate on its books and records cash or other liquid securities having a market value at least equal to the amount that would otherwise be required to be physically segregated. Furthermore, based on requirements and agreements with

54 SEMI-ANNUAL REPORT FEBRUARY 28, 2009

Notes to Financial Statements (continued)

certain exchanges and third party broker-dealers, each Fund may also be required to deliver or deposit securities as collateral for certain investments (e.g., financial futures contracts, reverse repurchase agreements and swaps).

Investment Transactions and Investment Income: Certain Funds' investment transactions are recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on security transactions are determined on the identified cost basis. Dividend income is recorded on the ex-dividend dates. Dividends from foreign securities where the ex-dividend date may have passed are subsequently recorded when the Funds have determined the ex-dividend date. Interest income is recognized on the accrual basis. The Funds amortize all premiums and discounts on debt securities.

Senior Floating Rate and Senior Floating Rate II record daily their proportionate share of the Master LLC s income, expenses and realized and unrealized gains and losses. In addition, both Funds accrue their own expenses.

Dividends and Distributions: Dividends from net investment income are declared and paid monthly. Distributions of capital gains are recorded on the ex-dividend dates.

Income Taxes: It is the Funds policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of their taxable income to their shareholders. Therefore, no federal income tax provision is required. Under the applicable foreign tax laws, a withholding tax may be imposed on interest, dividends and capital gains at various rates.

Each Fund files US federal and various state and local tax returns. No income tax returns are currently under examination. The statute of limitations on the Funds' US federal tax returns remains open for the year ended August 31, 2008 for Defined Opportunity, the four years ended August 31, 2008 for Diversified Income, Floating Rate Income, Senior Floating Rate and Senior Floating Rate II, the three years ended October 31, 2007 and the year ended August 31, 2008 for Limited Duration. The statutes of limi-

tations on the Funds' state and local tax returns may remain open for an additional year depending upon the jurisdiction.

Recent Accounting Pronouncement: In March 2008, Statement of Financial Accounting Standards No. 161, "Disclosures about Derivative Instruments and Hedging Activities" (an amendment of FASB Statement No. 133 (FAS 161)), was issued. FAS 161 is intended to improve financial reporting for derivative instruments by requiring enhanced disclosure that enables investors to understand how and why an entity uses derivatives, how derivatives are accounted for, and how derivative instruments affect an entity's results of operations and financial position. FAS 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. The impact on each of the Portfolio's financial statement disclosures, if any, is currently being assessed.

Bank Overdraft: Diversified Income and Floating Rate Income recorded bank overdrafts which resulted from estimates of available cash.

Deferred Compensation and BlackRock Closed-End Share Equivalent Investment Plan: Under the deferred compensation plan approved by each Fund's Board, non-interested Directors (Independent Directors) may defer a portion of their annual complex-wide compensation. Deferred amounts earn an approximate return as though equivalent dollar amounts have been invested in common shares of other certain BlackRock Closed-End Funds selected by the Independent Directors. This has approximately the same economic effect for the Independent Directors as if the Independent Directors had invested the deferred amounts directly in other certain BlackRock Closed-End Funds.

The deferred compensation plan is not funded and obligations thereunder represent general unsecured claims against the general assets of the Funds. The Funds may, however, elect to invest in common shares of other certain BlackRock Closed-End Funds selected by the Independent Directors in order to match its deferred compensation obligations. Investments to cover certain Funds' deferred compensation liability are included in other assets on the Statements of Assets and Liabilities. Dividends and distributions from the BlackRock Closed-End Fund investments under the plan are included in income affiliated on the Statements of Operations.

Other: Expenses directly related to a Fund are charged to that Fund. Other operating expenses shared by several funds are pro-rated among those funds on the basis of relative net assets or other appropriate methods.

2. Investment Advisory Agreement and Other Transactions with Affiliates:

Certain Funds entered into an Investment Advisory Agreement with Advisor to provide investment advisory and administration services. The PNC Financial Services Group, Inc. (PNC) and Bank of America Corporation (BAC) are the largest stockholders of BlackRock, Inc. (BlackRock). BAC became a stockholder of BlackRock following its acquisition of Merrill

Lynch & Co., Inc. (Merrill Lynch) on January 1, 2009. Prior to that date, both PNC and Merrill Lynch were considered affiliates of the Fund under the 1940 Act. Subsequent to the acquisition, PNC remains an affiliate, but due to the restructuring of Merrill Lynch's ownership interest of BlackRock, BAC is not deemed to be an affiliate under the 1940 Act.

The Advisor is responsible for the management of the Funds' portfolio and provides the necessary personnel, facilities, equipment and certain other services necessary to the operations of the Funds. For such services, Defined Opportunity pays a monthly fee at an annual rate of 1.00%, Limited Duration pays a monthly fee at an annual rate of 0.55% and Diversified Income and Floating Rate Income each pay a monthly fee at an annual rate of 0.75% of the average daily value of each Fund's net assets plus the proceeds of any outstanding borrowings. Average daily net assets is the average daily value of the Fund's total assets minus the sum of its accrued liabilities.

The Advisor, on behalf of Diversified Income, Floating Rate Income and Limited Duration, has entered into a separate sub-advisory agreement with BlackRock Financial Management, Inc. (BFM), an affiliate of the Advisor,

SEMI-ANNUAL REPORT FEBRUARY 28, 2009 55

Notes to Financial Statements (continued)

under which the Advisor pays BFM, for services it provides, a monthly fee that is an annual percentage of the investment advisory fee paid by the Funds to the Advisor.

For the six months ended February 28, 2009, the Funds reimbursed the Advisor for certain accounting services, which are included in accounting services in the Statements of Operations. The reimbursements were as follows:

	Reimbursement to Advisor
Defined Opportunity	\$ 723
Diversified Income	\$1,276
Floating Rate Income	\$2,487
Limited Duration	\$4,928

For the period September 1, 2008 through December 31, 2008 Merrill Lynch, Pierce, Fenner & Smith, Incorporated (MLPF&S), a wholly owned subsidiary of Merrill Lynch, received underwriting fees of \$3,462,804 in connection with the issuance of the Defined Opportunity's Common Shares. In addition, Defined Opportunity reimbursed MLPF&S \$46,000 as a partial reimbursement of expenses incurred in connection with the

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

issuance of the Fund's Common Shares.

Senior Floating Rate and Senior Floating Rate II have entered into an Administration Agreement with the Administrator. The administration fee to the Administrator is calculated daily and paid monthly based on an annual rate of 0.25% and 0.40%, respectively, of the average daily value of each Fund's net assets for the performance of administrative services (other than investment advice and related portfolio activities) necessary for the operation of the Funds.

Senior Floating Rate and Senior Floating Rate II entered into a separate Distribution Agreement and Distribution Plan with BlackRock Investments, LLC (BIL), which replaced FAM Distributors, Inc. (FAMD) and BlackRock Distributors, Inc. and its affiliates (BDI) (collectively, the Distributor) as the sole distributor of the Funds. FAMD is a wholly owned subsidiary of Merrill Lynch Group, Inc. BIL and BDI are affiliates of BlackRock, Inc.

For the six months ended February 28, 2009, the Distributor received early withdrawal charges for Senior Floating Rate and Senior Floating Rate II in the amount of \$136,691 and \$27,255, respectively, relating to the tender of each Fund's shares.

PNC Global Investment Servicing (U.S.) Inc., an indirect, wholly owned subsidiary of PNC and an affiliate of the Administrator, is Senior Floating Rate and Senior Floating Rate II's transfer agent. Transfer agency fees borne by each Fund are comprised of those fees charged for all shareholder communications including mailing of shareholder reports, dividend and distribution notices, and proxy materials for shareholders meetings, as well as per account and per transaction fees related to servicing and maintenance of shareholder accounts, including the issuing, redeeming and transferring of shares, check writing, anti-money laundering services, and customer identification services.

Pursuant to the terms of the custody agreement, custodian fees may be reduced by amounts calculated on uninvested cash balances, which are shown on the Statements of Operations as fees paid indirectly.

Certain officers and/or directors of the Funds are officers and/or directors of BlackRock, Inc. or its affiliates. The Funds reimburse the Advisor for compensation to the Funds' Chief Compliance Officer.

3. Investments:

Purchases and sales (including paydowns and TBA and mortgage dollar roll transactions and excluding short-term securities US Government securities) for the six months ended February 28, 2009 were as follows:

		Total Purchases	Total Sales
Defined Opportunity	\$	13,511,775	\$ 40,755,731

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

Diversified Income	\$	18,951,256	\$	67,980,006
Floating Rate Income	\$	49,461,383	\$	118,610,313
Limited Duration	\$	892,518,966	\$	956,093,504

For the six months ended February 28, 2009, purchases and sales of US government securities for Limited Duration were \$0 and \$17,000,000, respectively.

For the six months ended February 28, 2009, purchases and sales for Limited Duration attributable to mortgage dollar rolls were \$739,743,242 and \$738,788,047, respectively.

4. Reverse Repurchase Agreements:

For the six months ended February 28, 2009, Limited Duration's daily weighted average interest rate was 0.43%.

5. Market and Credit Risk:

In the normal course of business, the Funds invest in securities and enter into transactions where risks exist due to fluctuations in the market (market risk) or failure of the issuer of a security to meet all its obligations (credit risk). The value of securities held by the Funds may decline in response to certain events, including those directly involving the issuers whose securities are owned by the Funds; conditions affecting the general economy; overall market changes; local, regional or global political, social or economic instability; and currency and interest rate and price fluctuations. Similar to credit risk, the Funds may be exposed to counterparty risk, or the risk that an entity with which the Funds have unsettled or open transactions may default. Financial assets, which potentially expose the Funds to credit and counterparty risks, consist principally of investments and cash due from counterparties. The extent of the Funds' exposure to credit and counterparty risks with respect to these financial assets is approximated by their value recorded in the Funds' Statements of Assets and Liabilities.

6. Capital Share Transactions:

Defined Opportunity and Limited Duration are authorized to issue an unlimited number of shares, par value \$0.001, all of which were initially classified as Common Shares. Diversified Income and Floating Rate Income are authorized to issue 200,000,000 shares, par value \$0.10, all of which

56 SEMI-ANNUAL REPORT FEBRUARY 28, 2009

Notes to Financial Statements (continued)

were initially classified as Common Shares. The Board is authorized, however, to classify and reclassify any unissued shares without approval of

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

Common Shareholders.

Defined Opportunity s shares issued and outstanding during the period January 31, 2008 (commencement of operations) to August 31, 2008 increased by 8,900,000 from shares sold.

Organization costs of \$22,000 were expensed upon the commencement of operations. Offering costs incurred in connection with Defined Opportunity s offering of Common Shares have been charged against the proceeds from the initial Common Share offering in the amount of \$200,500.

Shares issued and outstanding for the six months ended February 28, 2009 and the period ended August 31, 2008 (and the year ended October 31, 2007 for Limited Duration) increased by the following amounts as a result of dividend reinvestments:

	Six Months Ended	Period Ended	Year Ended
	February 28,	August 31,	October 31,
	2009	2008	2007
Defined Opportunity	84,923	15,264	
Diversified Income	49,816	13,892	
Floating Rate Income	31,791		
Limited Duration			107,367

At February 28, 2009, the shares owned by an affiliate of the Advisor of the Funds were as follows:

	Shares
Defined Opportunity	8,517
Floating Rate Income	7,877
Limited Duration	6,021

Transactions in capital shares, with respect to Senior Floating Rate and Senior Floating Rate II, were as follows:

	Six Months Ended		Year Ended	
	February 28, 2009		August 31, 2007	
Senior Floating Rate	Shares	Amount	Shares	Amount
Shares sold	1,837,725	\$11,319,841	4,490,899	\$ 36,601,922
Shares issued to shareholders in reinvestment of dividends	113,657	699,508	182,375	1,499,356
Total issued	1,951,382	12,019,349	4,673,274	38,101,278
Shares tendered	(7,128,513)	(45,714,474)	(13,412,544)	(111,603,956)
Net decrease	(5,177,131)	\$(33,695,125)	(8,739,270)	\$(73,502,678)

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

Senior Floating Rate II	Shares	Amount	Shares	Amount
Shares sold	1,881,424	\$12,488,536	2,834,064	\$ 25,451,600
Shares issued to shareholders in reinvestment of dividends and distributions	36,466	240,166	41,005	365,615
Total issued	1,917,890	12,728,702	2,875,069	25,817,215
Shares tendered	(4,462,356)	(30,809,007)	(7,873,162)	(71,267,903)
Net decrease	(2,544,466)	\$(18,080,305)	(4,998,093)	\$(45,450,688)

7. Commitments:

Certain Funds may invest in floating rate loans. In connection with these investments, the Funds may also enter into unfunded corporate loans (commitments). Commitments may obligate the Funds to furnish temporary financing to a borrower until permanent financing can be arranged. In connection with these commitments, the Funds earn a commitment fee, typically set as a percentage of the commitment amount. Such fee income, which is classified in the Statements of Operations as facility and other fees, is recognized ratably over the commitment period. As of February 28, 2009 the Funds had the following unfunded loan commitments:

Defined Opportunity

Borrower	Unfunded Commitment (000)	Value of Underlying Loans (000)
Bausch & Lomb, Inc	\$ 100	\$ 85
Smurfit Stone	\$ 315	\$ 296

Floating Rate Income

Underlying Borrower	Unfunded Commitment (000)	Value of Underlying Loans (000)
Smurfit Corp	\$ 420	\$ 395

8. Short-Term Borrowings:

On May 16, 2008, Diversified Income and Floating Rate Income renewed their revolving credit and security agreement funded by a commercial paper asset securitization program with Citicorp North America, Inc. (Citicorp) as agent, certain secondary backstop lenders, and certain asset securitization

conduits as lenders (the Lenders). The agreement was renewed for one year and at the time of renewal had a maximum limit of \$91 million for Diversified Income and \$155 million for Floating Rate Income.

SEMI-ANNUAL REPORT FEBRUARY 28, 2009 57

Notes to Financial Statements (concluded)

Under the Citicorp program, the conduits will fund advances to the Funds through the issuance of highly rated commercial paper. The Funds have granted a security interest in substantially all of their assets to, and in favor of, the Lenders. The interest rate on the Funds' borrowings is based on the interest rate carried by the commercial paper plus a program fee. In addition, each Fund pays a liquidity fee to the secondary backstop lenders and the agent. These amounts are shown on the Statements of Operations as borrowing costs.

Under the agreement, the Funds are subject to certain conditions and covenants, which include among other things limitations on asset declines over prescribed time periods. As a result of the decline in net assets attributable to market conditions, certain terms of the facility were renegotiated effective December 5, 2008, which included a reduction of the maximum limits to \$50 million and \$103 million for Diversified Income and Floating Rate Income, respectively, waivers of certain financial covenants by the Lenders, and an increase in program and liquidity fees under the facility.

For the six months ended February 28, 2009, the daily weighted average interest rates were as follows:

	Daily Weighted Average Interest Rate
Diversified Income	1.96%
Floating Rate Income	1.71%

Defined Opportunity is a party to a senior committed secured, 364-day revolving line of credit and a separate security agreement (the Agreement) with State Street Bank and Trust Company (SSB) dated April 9, 2008. The Agreement has a maximum limit of \$67.5 million. Defined Opportunity has granted a security interest in substantially all of its assets to SSB. For the six months ended February 28, 2009, the weighted average annual interest rate was 0.76%.

9. Capital Loss Carryforward:

As of August 31, 2008, the Funds had capital loss carryforward available to offset future realized capital gains through the indicated expiration date:

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

Expires	Diversified	Floating	Limited	Senior	Senior
August 31	Income	Rate	Duration	Floating	Floating
		Income		Rate	Rate II
2009				\$ 64,746,799	\$ 1,546,632
2010				87,904,309	864,375
2011				53,409,203	17,719,049
2012				34,221,818	6,383,383
2013		\$ 691,829		56,166,095	
2014	\$1,755,694			945,546	
2015	2,237,399			2,561,691	
2016	1,444,704	475,453	\$21,933,927	31,419,599	4,923,144
Total	\$5,437,797	\$1,167,282	\$21,933,927	\$331,375,060	\$31,436,583

10. Subsequent Events:

On March 5, 2009, the Diversified Income and Floating Rate Income terminated their revolving credit agreement with Citicorp and entered into a senior committed secured, 364-day revolving line of credit and a separate security agreement (the Agreement) with State Street Bank and Trust Company (SSB). The Agreement has a maximum commitment of \$50 million for Diversified Income and \$103 million for Floating Rate Income. The Funds have a granted security interest in substantially all of their assets to SSB.

The Funds paid net investment income dividends on March 31, 2009 to shareholders of record on March 16, 2009 in the following amounts:

	Common Dividend Per Share
Defined Opportunity	\$0.082500
Diversified Income	\$0.115000
Floating Rate Income	\$0.104835
Limited Duration	\$0.090000

Defined Opportunity renewed its revolving line of credit and security agreement with SSB effective April 8, 2009. The maximum commitment was reduced from \$67.5 million to \$55 million.

SEMI-ANNUAL REPORT FEBRUARY 28, 2009 63

Schedule of Investments (concluded)

Master Senior Floating Rate LLC

Effective September 1, 2008, the Master LLC adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 clarifies the definition of fair value, establishes a framework for measuring fair values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstance, to the extent observable inputs are not available (including the Master LLC's own assumption used in determining the fair value of investments) The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Master LLC's policy regarding valuation of investments and other significant

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following table summarizes the inputs used as of February 28, 2009 in determining the fair valuation of the Master LLC's investments:

Valuation Inputs	Investments in Securities Assets		Other Financial Instruments*		
			Assets	Liabilities	
	Level 1	\$	189,671		
Level 2		265,071,284	\$	392,652	(70,980)
Level 3		119,538,655			
Total		\$384,799,610	\$	392,652	(70,980)

* Other financial instruments are foreign currency exchange contracts and swaps, which are valued at the unrealized appreciation/depreciation on the instrument.

The following is a reconciliation of investments for unobservable inputs (Level 3) that were used in determining fair value:

		Investments in Securities Assets
Balance as of August 31, 2008	\$	43,445,695
Accrued discounts/premiums		472,149
Realized loss		(10,368,113)
Change in unrealized appreciation/depreciation ¹		(76,313,399)
Net sales		(26,377,340)
Net transfers in Level 3		188,679,663
Balance as of February 28, 2009	\$	119,538,655

¹ Included in the related net change in unrealized appreciation/depreciation on the Statement of Operations.

See Notes to Financial Statements.

SEMI-ANNUAL REPORT FEBRUARY 28, 2009 67

Notes to Financial Statements (Unaudited)

Master Senior Floating Rate LLC

1. Organization and Significant Accounting Policies:

Master Senior Floating Rate LLC (the "Master LLC") is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), and is organized as a Delaware limited liability company. The Limited Liability Company Agreement permits the Board of Directors (the "Board") to issue nontransferable interests in the Master LLC, subject to certain limitations. The Master LLC's financial statements are prepared in conformity with accounting principles generally accepted in the United States of America, which may require the use of management accruals and estimates. Actual results may differ from these estimates.

The following is a summary of significant accounting policies followed by the Master LLC:

Valuation of Investments: The Master LLC values most of its bond investments on the basis of last available bid price or current market quotations provided by dealers or pricing services selected under the supervision of the Board. Floating rate loan interests are valued at the mean between the last available bid prices from one or more brokers or dealers as obtained from pricing services. In determining the value of a particular investment, pricing services may use certain information with respect to transactions in such investments, quotations from dealers, pricing matrixes, market transactions in comparable investments, various relationships observed in the market between investments, and calculated yield measures based on valuation technology commonly employed in the market for such investments. Swap agreements are valued by quoted fair values received daily by the

Master LLC's pricing service or through brokers. Short-term securities with maturities less than 60 days are valued at amortized cost, which approximates market value.

Equity investments traded on a recognized securities exchange or the NASDAQ Global Market System are valued at the last reported sale price that day or the NASDAQ official closing price, if applicable. For equity investments traded on more than one exchange, the last reported sale price on the exchange where the stock is primarily traded is used. Equity investments traded on a recognized exchange for which there were no sales on that day are valued at the last available bid price. If no bid price is available, the prior day's price will be used, unless it is determined that such prior day's price no longer reflects the fair value of the security.

In the event that application of these methods of valuation results in a price for an investment which is deemed not to be representative of the market value of such investment, the investment will be valued by, under the direction of, or in accordance with, a method approved by the Board as reflecting fair value (Fair Value Assets). When determining the price for Fair Value Assets, the Advisor and/or sub-advisor seeks to determine the price that the Master LLC might reasonably expect to receive from the current sale of that asset in an arm's-length transaction. Fair value determinations shall be based upon all available factors that the Advisor and/or sub-advisor deems relevant. The pricing of all Fair Value Assets is subsequently reported to the Board or a committee thereof.

Derivative Financial Instruments: The Master LLC may engage in various portfolio investment strategies both to increase the return of the Master LLC and to hedge, or protect, its exposure to interest rate movements and movements in the securities markets. Losses may arise if the value of the contract decreases due to an unfavorable change in the price of the underlying security, or if the counterparty does not perform under the contract.

Credit default swaps The Master LLC may enter into credit default swaps for investment purposes or to manage their credit risk. The Master LLC enters into credit default agreements to provide a measure of protection against the default of an issuer (as buyer of protection) and/or gain credit exposure to an issuer to which it is not otherwise exposed (as seller of protection). Credit default swaps are agreements in which one party pays fixed periodic payments to a counterparty in consideration for a guarantee from the counterparty to make a specific payment should a negative credit event take place (e.g. bankruptcy, failure to pay, obligation accelerators, repudiation, moratorium or restructuring). The Master LLC may either buy or sell (write) credit default swaps. As a buyer, the Master LLC will either receive from the seller an amount equal to the notional amount of the swap and deliver the referenced security or underlying securities comprising of an index or receive a net settlement of cash equal to the notional amount of the swap less the recovery value of the security or underlying securities comprising of an index. As a seller (writer), the Master LLC will either

pay the buyer an amount equal to the notional amount of the swap and take delivery of the referenced security or underlying securities comprising of an index or pay a net settlement of cash equal to the notional amount of the swap less the recovery value of the security or underlying securities comprising of an index. In the event of default by the counterparty, the Master LLC may recover amounts paid under the agreement either partially or in total by offsetting any payables and/or receivables with collateral held or pledged.

The Master LLC may utilize credit default swaps for the purpose of reducing the interest rate sensitivity of the portfolio and decreasing the Master LLC's exposure to interest rate risk.

Forward Foreign Currency Exchange Contracts The Master LLC may enter into forward foreign currency exchange contracts as a hedge against either specific transactions or portfolio positions. Forward foreign currency exchange contracts, when used by the Master LLC, help to manage the overall exposure to the foreign currency backing some of the investments held by the Master LLC. The contract is marked-to-market daily and the change in market value is recorded by the Master LLC as an unrealized gain or loss. When the contract is closed, the Master LLC records a realized gain or loss equal to the difference between the value at the time it was opened and the value at the time it was closed.

Foreign Currency Transactions: Foreign currency amounts are translated into United States dollars on the following basis: (i) market value of investment securities, assets and liabilities at the current rate of exchange; and (ii) purchases and sales of investment securities, income and expenses at the rates of exchange prevailing on the respective dates of such transactions.

68 SEMI-ANNUAL REPORT FEBRUARY 28, 2009

Notes to Financial Statements (continued)

Master Senior Floating Rate LLC

The Master LLC reports foreign currency related transactions as components of realized gains for financial reporting purposes, whereas such components are treated as ordinary income for federal income tax purposes.

Floating Rate Loans: The Master LLC invests in floating rate loans, which are generally non-investment grade, made by banks, other financial institutions and privately and publicly offered corporations. Floating rate loans generally pay interest at rates that are periodically predetermined by reference to a base lending rate plus a premium. The base lending rates are generally (i) the lending rate offered by one or more European banks, such as LIBOR (London InterBank Offered Rate), (ii) the prime rate offered by one or more U.S. banks or (iii) the certificate of deposit rate. The Master LLC considers these investments to be investments in debt securities for

purposes of its investment policies.

The Master LLC earns and/or pays facility and other fees on floating rate loans. Other fees earned/paid include commitment, amendment, consent, commissions and prepayment penalty fees. Facility, amendment and consent fees are typically amortized as premium and/or accreted as discount over the term of the loan. Commitment, commission and various other fees are recorded as income or expense. Prepayment penalty fees are recorded as gains or losses. When the Master LLC buys a floating rate loan it may receive a facility fee and when it sells a floating rate loan it may pay a facility fee. On an ongoing basis, a Master LLC may receive a commitment fee based on the undrawn portion of the underlying line of credit portion of a floating rate loan. In certain circumstances, a Master LLC may receive a prepayment penalty fee upon the prepayment of a floating rate loan by a borrower. Other fees received by a Master LLC may include covenant waiver fees and covenant modification fees.

The Master LLC may invest in multiple series or tranches of a loan. A different series or tranche may have varying terms and carry different associated risks.

Floating rate loans are usually freely callable at the issuer's option. The Master LLC may invest in such loans in the form of participations in loans (Participations) and assignments of all or a portion of loans from third parties. Participations typically will result in the Master LLC having a contractual relationship only with the lender, not with the borrower. The Master LLC will have the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the Participation and only upon receipt by the lender of the payments from the borrower.

In connection with purchasing Participations, the Master LLC generally will have no right to enforce compliance by the borrower with the terms of the loan agreement relating to the loans, nor any rights of offset against the borrower, and the Master LLC may not benefit directly from any collateral supporting the loan in which it has purchased the Participation.

As a result, the Master LLC will assume the credit risk of both the borrower and the lender that is selling the Participation. The Master LLC's investments in loan participation interests involve the risk of insolvency of the financial intermediaries who are parties to the transactions. In the event of

the insolvency of the lender selling the Participation, the Master LLC may be treated as a general creditor of the lender and may not benefit from any offset between the lender and the borrower.

Segregation and Collateralization: In cases in which the 1940 Act and the interpretive positions of the Securities and Exchange Commission (SEC) require that the Master LLC segregates assets in connection with certain investments (e.g., swaps and forward foreign currency contracts), the Master LLC will, consistent with certain interpretive letters issued by the SEC, designate on its books and records cash or other liquid securities

having a market value at least equal to the amount that would otherwise be required to be physically segregated. Furthermore, based on requirements and agreements with certain exchanges and third party broker-dealers, the Master LLC may also be required to deliver or deposit securities as collateral for certain investments (e.g., swaps).

Investment Transactions and Investment Income: With respect to the Master LLC, Investment transactions are recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on security transactions are determined on the identified cost basis. Dividend income is recorded on the ex-dividend dates. Dividends from foreign securities where the ex-dividend date may have passed are subsequently recorded when the Master LLC has determined the ex-dividend date. Interest income is recognized on the accrual basis. The Master LLC amortizes all premiums and discounts on debt securities.

Income Taxes: The Master LLC is classified as a partnership for federal income tax purposes. As such, each investor in the Master LLC is treated as owner of its proportionate share of the net assets, income, expenses and realized and unrealized gains and losses of the Master LLC. Therefore, no federal income tax provision is required. It is intended that the Master LLC's assets will be managed so an investor in the Master LLC can satisfy the requirements of Subchapter M of the Internal Revenue Code.

The Master LLC files US federal and various state and local tax returns. No income tax returns are currently under examination. The statute of limitations on the Master LLC's US federal tax returns remains open for each of the four years ended August 31, 2008. The statutes of limitations on the Master LLC's state and local tax returns may remain open for an additional year depending upon the jurisdiction.

Recent Accounting Pronouncement: In March 2008, Statement of Financial Accounting Standards No. 161, Disclosures about Derivative Instruments and Hedging Activities – an amendment of FASB Statement No. 133 (FAS 161), was issued. FAS 161 is intended to improve financial reporting for derivative instruments by requiring enhanced disclosure that enables investors to understand how and why an entity uses derivatives, how derivatives are accounted for, and how derivative instruments affect an entity's results of operations and financial position. FAS 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. The impact on the Master LLC's financial statement disclosures, if any, is currently being assessed.

SEMI-ANNUAL REPORT FEBRUARY 28, 2009 69

Notes to Financial Statements (continued)

Master Senior Floating Rate LLC

Other: Expenses directly related to the Master LLC are charged to that Master LLC. Other operating expenses shared by several funds are pro-rated among those funds on the basis of relative net assets or other appropriate methods.

2. Transactions with Affiliates:

The Master LLC entered into an Investment Advisory Agreement with BlackRock Advisors, LLC (the Advisor) to provide investment advisory and administration services. As of January 31, 2009, The PNC Financial Services Group, Inc. (PNC) and Bank of America Corporation (BAC) are the largest stockholders of BlackRock, Inc. (BlackRock). BAC became a stockholder of BlackRock following its acquisition of Merrill Lynch & Co., Inc. (Merrill Lynch) on January 1, 2009. Prior to that date, both PNC and Merrill Lynch were considered affiliates of the Master LLC under the 1940 Act. Subsequent to the acquisition, PNC remains an affiliate, but due to the restructuring of Merrill Lynch's ownership interest of BlackRock, BAC is not deemed to be an affiliate under the 1940 Act.

The Advisor is responsible for the management of the Master LLC's portfolio and provides the necessary personnel, facilities, equipment and certain other services necessary to the operations of the Master LLC. For such services, the Master LLC pays the Advisor a monthly fee at an annual rate of 0.95% of the average daily value of the Master LLC's net assets.

The Advisor has entered into a separate sub-advisory agreement with BlackRock Financial Management, Inc. (BFM), an affiliate the Advisor, under which the Advisor pays BFM for services it provides, monthly fee that is a percentage of the investment advisory fee paid by the Master LLC to the Advisor.

For the six months ended February 28, 2009, the Master LLC reimbursed the Advisor \$4,863 for certain accounting services, which are included in accounting services in the Statement of Operations.

Certain officers and/or directors of the Master LLC are officers and/or directors of BlackRock, Inc. or its affiliates. The Master LLC reimburses the Advisor for compensation to the Master LLC's Chief Compliance Officer.

3. Investments:

Purchases and sales (including paydowns) of investments, excluding short-term securities, for the six months ended February 28, 2009 were \$61,781,412 and \$133,239,614, respectively.

4. Commitments:

The Master LLC may invest in floating rate loans. In connection with these investments, the Master LLC may also enter into unfunded corporate loan (commitments). Commitments may obligate the Master LLC to furnish temporary financing to a borrower until permanent financing can be

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

arranged. In connection with these commitments, the Master LLC earns a commitment fee, typically set as a percentage of the commitment amount.

Such fee income, which is classified in the Statement of Operations as facility and other fees, is recognized ratably over the commitment period.

As of February 28, 2009 the Master LLC had the following unfunded loan commitments:

Borrower	(000)	Unfunded Commitment	Value of Underlying Loan	(000)
Bausch & Lomb, Inc	\$		200	\$ 170
Smurfit Corp	\$		803	\$ 790

5. Short-Term Borrowings:

The Master LLC, along with certain other funds managed by the Manager and its affiliates, is a party to a \$500 million credit agreement with a group of lenders, which expired November 2008 and was subsequently renewed until November 2009. The Master LLC may borrow under the credit agreement to fund shareholder redemptions and for other lawful purposes other than for leverage. The Master LLC may borrow up to the maximum amount allowable under the Master LLC's current Prospectus and Statement of Additional Information, subject to various other legal, regulatory or contractual limits. The Master LLC paid its pro rata share of a 0.02% upfront fee on the aggregate commitment amount based on its net assets as of October 31, 2008. The Master LLC pays a commitment fee of 0.08% per annum based on the Master LLC's pro rata share of the unused portion of the credit agreement, which is included in miscellaneous in the Statement of Operations. Amounts borrowed under the credit agreement bear interest at a rate equal to the higher of (a) federal funds effective rate and (b) reserve adjusted one month LIBOR, plus, in each case, the higher of (i) 1.50% and (ii) 50% of the CDX Index (as defined in the credit agreement) in effect from time to time. The Master LLC did not borrow under the credit agreement during the six months ended February 28, 2009.

6. Market and Credit Risk:

In the normal course of business, the Master LLC invests in securities and enters into transactions where risks exist due to fluctuations in the market (market risk) or failure of the issuer of a security to meet all its obligations (credit risk). The value of securities held by the Master LLC may decline in response to certain events, including those directly involving the issuers whose securities are owned by the Master LLC; conditions affecting the general economy; overall market changes; local, regional or global political, social or economic instability; and currency and interest rate and price fluctuations. Similar to credit risk, the Master LLC may be exposed to coun-

terparty risk, or the risk that an entity with which the Master LLC has unsettled or open transactions may default. Financial assets, which potentially expose the Master LLC to credit and counterparty risks, consist principally of investments and cash due from counterparties. The extent of the Master LLCs' exposure to credit and counterparty risks with respect to these financial assets is approximated by their value recorded in the Master LLCs' Statement of Assets and Liabilities.

Availability of Quarterly Schedule of Investments

The Funds file their complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. The Funds Forms N-Q are available on the SEC's website at <http://www.sec.gov> and may also be reviewed and copied at the SEC's Public Reference

Room in Washington, DC. Information on the operation of the Public Reference Room may be obtained by calling (800) SEC-0330. The Funds Forms N-Q may also be obtained upon request and without charge by calling (800) 441-7762.

Electronic Delivery

Electronic copies of most financial reports are available on the Funds' websites or shareholders can sign up for e-mail notifications of quarterly statements, annual and semi-annual reports by enrolling in the Funds' electronic delivery program.

Shareholders Who Hold Accounts with Investment Advisors, Banks or Brokerages:

Please contact your financial advisor to enroll. Please note that not all

investment advisors, banks or brokerages may offer this service.

General Information

The Funds will mail only one copy of shareholder documents, including annual and semi-annual reports and proxy statements, to shareholders with multiple accounts at the same address. This practice is commonly called **householding** and it is intended to reduce expenses and eliminate duplicate mailings of shareholder documents. Mailings of your shareholder documents may be **household**ed indefinitely unless you instruct us otherwise. If you do not want the mailing of these documents to be combined with those for other members of your household, please contact the Funds at (800) 441-7762.

Quarterly performance, semi-annual and annual reports and other information regarding the Funds may be found on BlackRock's website, which can be accessed at <http://www.blackrock.com>. This reference to BlackRock's website is intended to allow investors public access to information regarding the Funds and does not, and is not intended to, incorporate BlackRock's website into this report.

SEMI-ANNUAL REPORT FEBRUARY 28, 2009 73

Additional Information (concluded)

BlackRock Privacy Principles

BlackRock is committed to maintaining the privacy of its current and former fund investors and individual clients (collectively, **Clients**) and to safeguarding their non-public personal information. The following information is provided to help you understand what personal information BlackRock collects, how we protect that information and why in certain cases we share such information with select parties.

If you are located in a jurisdiction where specific laws, rules or regulations require BlackRock to provide you with additional or different privacy-related rights beyond what is set forth below, then BlackRock will comply with those specific laws, rules or regulations.

BlackRock obtains or verifies personal non-public information from and about you from different sources, including the following: (i) information we receive from you or, if applicable, your financial intermediary, on applications, forms or other documents; (ii) information about your transactions with us, our affiliates, or others; (iii) information we receive from a consumer reporting agency; and (iv) from visits to our websites.

BlackRock does not sell or disclose to non-affiliated third parties any non-public personal information about its Clients, except as permitted by law or as is necessary to respond to regulatory requests or to service Client accounts. These non-affiliated third parties are required to protect the

Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSRS

confidentiality and security of this information and to use it only for its intended purpose.

We may share information with our affiliates to service your account or to provide you with information about other BlackRock products or services that may be of interest to you. In addition, BlackRock restricts access to non-public personal information about its Clients to those BlackRock employees with a legitimate business need for the information. BlackRock maintains physical, electronic and procedural safeguards that are designed to protect the non-public personal information of its Clients, including procedures relating to the proper storage and disposal of such information.

(iv) Potential Material Conflicts of Interest

BlackRock and its affiliates (collectively, herein BlackRock) has built a professional working environment, firm-wide compliance culture and compliance procedures and systems designed to protect against potential incentives that may favor one account over another. BlackRock has adopted policies and procedures that address the allocation of investment opportunities, execution of portfolio transactions, personal trading by employees and other potential conflicts of interest that are designed to ensure that all client accounts are treated equitably over time. Nevertheless, BlackRock furnishes investment management and advisory services to numerous clients in addition to the Fund, and BlackRock may, consistent with applicable law, make investment recommendations to other clients or accounts (including accounts which are hedge funds or have performance or higher fees paid to BlackRock, or in which portfolio managers have a personal interest in the receipt of such fees), which may be the same as or different from those made to the Fund. In addition, BlackRock, its affiliates and significant shareholders and any officer, director, stockholder or employee may or may not have an interest in the securities whose purchase and sale BlackRock recommends to the Fund. BlackRock, or any of its affiliates or significant shareholders, or any officer, director, stockholder, employee or any member of their families may take different actions than those recommended to the Fund by BlackRock with respect to the same securities. Moreover, BlackRock may refrain from rendering any advice or services concerning securities of companies of which any of BlackRock s (or its affiliates or significant shareholders) officers, directors or employees are directors or officers, or companies as to which BlackRock or any of its affiliates or significant shareholders or the officers, directors and employees of any of them has any substantial economic interest or possesses material non-public information. Each portfolio manager also may manage accounts whose investment strategies may at times be opposed to the strategy utilized for a fund. In this connection, it should be noted that Mr. Keenan currently manages certain accounts that are subject to performance fees. In addition, a portfolio manager may assist in managing certain hedge funds and may be entitled to receive a portion of any incentive fees earned on such funds and a portion of such incentive fees may be voluntarily or involuntarily deferred. Additional portfolio managers may in the future manage other such accounts or funds and may be entitled to receive incentive fees.

As a fiduciary, BlackRock owes a duty of loyalty to its clients and must treat each client fairly. When BlackRock purchases or sells securities for more than one account, the trades must be allocated in a manner consistent with its fiduciary duties. BlackRock attempts to allocate investments in a fair and equitable manner among client accounts, with no account receiving preferential treatment. To this end, BlackRock has adopted a policy that is intended to ensure that investment opportunities are allocated fairly and equitably among client accounts over time. This policy also seeks to achieve reasonable efficiency in client transactions and provide BlackRock with sufficient flexibility to allocate investments in a manner that is consistent with the particular investment discipline and client base.

(a)(3) As of May 8, 2009:

Portfolio Manager Compensation Overview

BlackRock s financial arrangements with its portfolio managers, its competitive compensation and its

career path emphasis at all levels reflect the value senior management places on key resources.

Compensation may include a variety of components and may vary from year to year based on a number of

factors. The principal components of compensation include a base salary, a performance-based discretionary bonus, participation in various benefits programs and one or more of the incentive compensation programs established by BlackRock such as its Long-Term Retention and Incentive Plan and Restricted Stock Program.

Base compensation. Generally, portfolio managers receive base compensation based on their seniority and/or their position with the firm. Senior portfolio managers who perform additional management functions within the portfolio management group or within BlackRock may receive additional compensation for serving in these other capacities.

Discretionary Incentive Compensation

Discretionary incentive compensation is a function of several components: the performance of BlackRock, Inc., the performance of the portfolio manager's group within BlackRock, the investment performance, including risk-adjusted returns, of the firm's assets under management or supervision by that portfolio manager relative to predetermined benchmarks, and the individual's seniority, role within the portfolio management team, teamwork and contribution to the overall performance of these portfolios and BlackRock. In most cases, including for the portfolio managers of the Fund, these benchmarks are the same as the benchmark or benchmarks against which the performance of the Fund or other accounts managed by the portfolio managers are measured. BlackRock's Chief Investment Officers determine the benchmarks against which the performance of funds and other accounts managed by each portfolio manager is compared and the period of time over which performance is evaluated. With respect to the portfolio managers, such benchmarks for the Fund include the following:

Portfolio Manager	Benchmarks Applicable to Each Manager
Leland T. Hart	A combination of market-based indices (e.g., CSFB Leveraged Loan Index, CSFB High Yield II Value Index), certain customized indices and certain fund industry peer groups.
James E. Keenan	A combination of market-based indices (e.g., The Barclays Capital U.S. Corporate High Yield 2% Issuer Cap Index), certain customized indices and certain fund industry peer groups.
C. Adrian Marshall	A combination of market-based indices (e.g., CSFB Leveraged Loan Index, CSFB High Yield II Value Index), certain customized indices and certain fund industry peer groups.

BlackRock's Chief Investment Officers make a subjective determination with respect to the portfolio managers' compensation based on the performance of the funds and other accounts managed by each portfolio manager relative to the various benchmarks noted above. Performance is measured on both a pre-tax and after-tax basis over various time periods including 1, 3, 5 and 10-year periods, as applicable.

Distribution of Discretionary Incentive Compensation

Discretionary incentive compensation is distributed to portfolio managers in a combination of cash and BlackRock, Inc. restricted stock units which vest ratably over a number of years. The BlackRock, Inc. restricted stock units, if properly vested, will be settled in BlackRock, Inc. common stock. Typically, the

cash bonus, when combined with base salary, represents more than 60% of total compensation for the portfolio managers. Paying a portion of annual bonuses in stock puts compensation earned by a portfolio manager for a given year at risk based on BlackRock's ability to sustain and improve its performance over future periods.

Long-Term Retention and Incentive Plan (LTIP) The LTIP is a long-term incentive plan that seeks to reward certain key employees. Prior to 2006, the plan provided for the grant of awards that were expressed as an amount of cash that, if properly vested and subject to the attainment of certain performance goals, will be settled in cash and/or in BlackRock, Inc. common stock. Beginning in 2006, awards are granted under the LTIP in the form of BlackRock, Inc. restricted stock units that, if properly vested and subject to the attainment of certain performance goals, will be settled in BlackRock, Inc. common stock. Messrs. Keenan and Marshall have each received awards under the LTIP.

Deferred Compensation Program A portion of the compensation paid to eligible BlackRock employees may be voluntarily deferred into an account that tracks the performance of certain of the firm's investment products. Each participant in the deferred compensation program is permitted to allocate his deferred amounts among the various investment options. Messrs. Keenan and Marshall have each participated in the deferred compensation program.

Other compensation benefits. In addition to base compensation and discretionary incentive compensation, portfolio managers may be eligible to receive or participate in one or more of the following:

Incentive Savings Plans BlackRock, Inc. has created a variety of incentive savings plans in which BlackRock employees are eligible to participate, including a 401(k) plan, the BlackRock Retirement Savings Plan (RSP), and the BlackRock Employee Stock Purchase Plan (ESPP). The employer contribution components of the RSP include a company match equal to 50% of the first 6% of eligible pay contributed to the plan capped at \$4,000 per year, and a company retirement contribution equal to 3-5% of eligible compensation. The RSP offers a range of investment options, including registered investment companies managed by the firm. BlackRock contributions follow the investment direction set by participants for their own contributions or, absent employee investment direction, are invested into a balanced portfolio. The ESPP allows for investment in BlackRock common stock at a 5% discount on the fair market value of the stock on the purchase date. Annual participation in the ESPP is limited to the purchase of 1,000 shares or a dollar value of \$25,000. Each portfolio manager except Mr. Hart is eligible to participate in these plans.

United Kingdom-based portfolio managers are also eligible to participate in broad-based plans offered generally to BlackRock employees, including broad-based retirement, health and other employee benefit plans. For example, BlackRock has created a variety of incentive savings plans in which BlackRock employees are eligible to participate, including a Group Personal Pension Plan (GPPP) and the BlackRock Employee Stock Purchase Plan (ESPP). The employer contribution to the GPPP is between 6% to 15% (dependent on service related entitlement) of eligible pay capped at £150,000 per annum. The GPPP offers a range of investment options, including several collective investment funds managed by the firm. BlackRock contributions follow the investment direction set by participants for their own contributions or, in the absence of an investment election being made, are invested into a passive balanced managed fund. The ESPP allows for investment in BlackRock common stock at a 5% discount on the fair market value of the stock on the purchase date. Annual participation in the ESPP is limited to the purchase of 1,000 shares or a dollar value of \$25,000. Mr. Hart is eligible to participate in these plans.

(a)(4) *Beneficial Ownership of Securities.*

Portfolio Manager

Dollar Range of Equity

	Securities Beneficially Owned
Leland T. Hart	None
James E. Keenan	None
