2 SEMI-ANNUAL I	REPORT OCTOBER 31, 2009

Dear Shareholder

Over the past 12 months, we have witnessed a seismic shift in market sentiment from fear and pessimism during the worst economic decline and crisis

of confidence in financial markets since The Great Depression to increasing optimism amid emerging signs of recovery. The period began in the midst of an

intense deterioration in global economic activity and financial markets in the final months of 2008 and the early months of 2009. The collapse of confi-

dence resulted in massive government policy intervention on a global scale in the financial system and the economy. The tide turned dramatically in March

2009, however, on the back of new US government initiatives, as well as better-than-expected economic data and upside surprises in corporate earnings.

Not surprisingly, global equity markets endured extreme volatility over the past 12 months, starting with steep declines and heightened risk aversion in the

early part of the reporting period, which eventually gave way to an impressive rally that began in March. Although there have been fits and starts along the

way and a few modest corrections, the new bull market has pushed all major US indices well into positive territory for 2009. The experience in international

markets was similar to that in the United States. In particular, emerging markets (which were less affected by the global credit crunch and are experiencing

faster economic growth rates when compared to the developed world) have posted impressive gains since the rally began.

In fixed income markets, the flight-to-safety premium in Treasury securities prevailed during the equity market downturn, which drove yields sharply lower,

but concerns about deficit spending, debt issuance, inflation and dollar weakness have kept Treasury yields range bound in recent months. As economic

and market conditions began to improve in early 2009, near-zero interest rates on risk-free assets prompted many investors to reallocate money from cash

investments into higher-yielding and riskier non-Treasury assets. The high yield sector was the greatest beneficiary of this move, having decisively outpaced

all other taxable asset classes since the start of 2009. Similarly, the municipal bond market is on pace for its best performance year ever in 2009, following

one of its worst years in 2008. Investor demand remains strong for munis, helping to create a highly favorable technical backdrop. Municipal bond mutual

funds are seeing record inflows, reflecting the renewed investor interest in the asset class.

As a result of the rebound in sentiment and global market conditions, most major benchmark indexes are now in positive territory for both the

6- and 12-month periods.

Total Returns as of October 31, 2009	6-month	12-month
US equities (S&P 500 Index)	20.04%	9.80%
Small cap US equities (Russell 2000 Index)	16.21	6.46
International equities (MSCI Europe, Australasia, Far East Index)	31.18	27.71
US Treasury securities (BofA Merrill Lynch 10-Year US Treasury Index*)	(0.79)	8.12
Taxable fixed income (Barclays Capital US Aggregate Bond Index)	5.61	13.79
Tax-exempt fixed income (Barclays Capital Municipal Bond Index)	4.99	13.60
High yield bonds (Barclays Capital US Corporate High Yield 2% Issuer Capped Index)	27.72	48.65

* Formerly a Merrill Lynch index.

The market environment has visibly improved since the beginning of the year, but a great deal of uncertainty and risk remain. Through periods of market

turbulence, as ever, BlackRock s full resources are dedicated to the management of our clients assets. For additional market perspective and investment

insight, visit the most recent issue of our award-winning Shareholder® magazine at www.blackrock.com/shareholdermagazine. As always, we thank you

for entrusting BlackRock with your investments, and we look forward to continuing to serve you in the months and years ahead.

Announcement to Shareholders

On December 1, 2009, BlackRock, Inc. and Barclays Global Investors, N.A. combined to form one of the world's preeminent investment management firms.

The new company, operating under the BlackRock name, manages \$3.19 trillion in assets** and offers clients worldwide a full complement of active man-

agement, enhanced and index investment strategies and products, including individual and institutional separate accounts, mutual funds and other pooled

investment vehicles, and the industry-leading iShares platform of exchange traded funds.

** Data is as of September 30, 2009, is subject to change, and is based on a pro forma estimate of assets under management and other data at BlackRock, Inc.

and Barclays Global Investors.

THIS PAGE NOT PART OF YOUR FUND REPORT 3

Trust Summary as of October 31, 2009 BlackRock Investment Quality Municipal Trust Inc.

Investment Objective

BlackRock Investment Quality Municipal Trust Inc. (BKN) (the Trusts)eks to provide high current income which, in the opinion of bond counsel to the

issuer, is exempt from regular federal income tax consistent with the preservation of capital.

No assurance can be given that the Trust s investment objective will be achieved.

Performance

For the six months ended October 31, 2009, the Trust returned 23.85% based on market price and 15.88% based on net asset value (NAV). For the same period, the closed-end Lipper General Municipal Debt Funds (Leveraged) category posted an average return of 16.28% on a market price basis and 14.93% on a NAV basis. All returns reflect reinvestment of dividends. During the period, the Trust moved from a discount to a premium to NAV, which accounts for the difference between performance based on price and performance based on NAV. During the period, the Trust maintained heavy exposure to A and BBB-rated credits. Additionally, the Trust was positioned with a longer duration relative to its Lipper peers, and its holdings primarily comprised longer-dated bonds. These factors benefited total return as credit spreads narrowed and there was a combined curve flattening with an overall rally in prices. On a sector basis, the Trust s significant holdings in housing and health contributed positively as these sectors outperformed. Lastly, fund management was active in the new-issue market, adding attractively-structured bonds at a discount to where similar credits were trading in the secondary market. Conversely, the Trust held fewer discount-coupon bonds, which saw the most price appreciation as municipal yields fell during the period; this detracted from results. Moreover, the Trust s dividend to the shareholder was below the average of its Lipper peers. The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market,

economic or other conditions. These

views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT

4

Trust Summary as of October 31, 2009 BlackRock Long-Term Municipal Advantage Trust

Investment Objective

BlackRock Long-Term Municipal Advantage Trust (BTA) (the Trusts) eks to provide current income which, in the opinion of bond counsel to the issuer, is

exempt from regular federal income tax.

No assurance can be given that the Trust s investment objective will be achieved.

Performance

For the six months ended October 31, 2009, the Trust returned 16.37% based on market price and 16.69% based on NAV. For the same period, the

closed-end Lipper General Municipal Debt Funds (Leveraged) category posted an average return of 16.28% on a market price basis and 14.93% on a

NAV basis. All returns reflect reinvestment of dividends. The Trust's discount to NAV, which widened during the period, accounts for the difference between

performance based on price and performance based on NAV. Positive performance factors included concentrations in education, health, tobacco and

corporate-related debt. Renewed risk appetite was also beneficial, given the Trust s focus on lower-rated credits. In addition, the Trust s long duration stance

and emphasis on longer-dated bonds were significant positive contributors as yields on the long end of the curve fell substantially. Negative factors included

less exposure to the tax-backed and essential services sectors.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These

views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT			OCTOBER 31, 20	009	5	

Trust Summary as of October 31, 2009 BlackRock Municipal 2020 Term Trust

Investment Objective

BlackRock Municipal 2020 Term Trust (BKK) (the Trusts) to provide current income exempt from regular federal income tax and to return \$15 per

share (the initial public offering price) on or about December 31, 2020.

No assurance can be given that the Trust s investment objective will be achieved.

Performance

Info

For the six months ended October 31, 2009, the Trust returned 17.06% based on market price and 17.08% based on NAV. For the same period, the

closed-end Lipper General Municipal Debt Funds (Leveraged) category posted an average return of 16.28% on a market price basis and 14.93% on a

NAV basis. All returns reflect reinvestment of dividends. The Trust s premium to NAV, which remained substantially unchanged during the period, accounts for

the difference between performance based on price and performance based on NAV. The Trust s allocation to lower-rated issues with longer maturities bene-

fited performance as the high yield sector outperformed, with credit spreads contracting as the overall market improved and yields declined. Conversely, the

Trust s short-duration bias detracted from performance in an environment where yields fell. The Trust is managed to meet a 2020 termination date, and as

such, maintains a generally shorter duration than that of its Lipper category, which comprises longer-duration funds. Accordingly, the Trust did not fully bene-

fit from the price appreciation that occurred amongst longer-dated securities.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These

views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT			2009		7

Trust Summary as of October 31, 2009 BlackRock Pennsylvania Strategic Municipal Trust

Investment Objective

BlackRock Pennsylvania Strategic Municipal Trust (BPS) (the Trusts) eks to provide monthly income which, in the opinion of bond counsel to the issuer,

is exempt from regular federal and Pennsylvania income taxes.

No assurance can be given that the Trust s investment objective will be achieved.

Performance

Info

For the six months ended October 31, 2009, the Trust returned 24.45% based on market price and 16.96% based on NAV. For the same period, the

closed-end Lipper Pennsylvania Municipal Debt Funds category posted an average return of 16.92% on a market price basis and 12.05% on a NAV basis.

All returns reflect reinvestment of dividends. The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance

based on price and performance based on NAV. A higher concentration in interest-rate-sensitive bonds benefited Trust performance as rates steadily

declined through the period. Certain sector allocations also contributed to the Trust s performance, specifically the long-term care and continuing care retire-

ment communities sector, bonds escrowed to maturity, and US territories (i.e., Puerto Rico, Guam and the Virgin Islands). Conversely, low exposure to both

the corporate and non-investment-grade credit sectors detracted from the Trust s performance as credit spreads tightened and these issues outperformed.

The Trust s moderate cash level had no impact on performance.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These

views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT			OCTOBER	31 2009	

Trust Summary as of October 31, 2009 BlackRock Strategic Municipal Trust

Investment Objective

BlackRock Strategic Municipal Trust (BSD) (the Trusts) eks to provide high current income, which, in the opinion of bond counsel to the issuer, is

exempt from regular federal income tax, consistent with the preservation of capital.

No assurance can be given that the Trust s investment objective will be achieved.

Performance

For the six months ended October 31, 2009, the Trust returned 20.81% based on market price and 16.91% based on NAV. For the same period, the

closed-end Lipper General Municipal Debt Funds (Leveraged) category posted an average return of 16.28% on a market price basis and 14.93% on a

NAV basis. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which narrowed during the period, accounts for the difference between

performance based on price and performance based on NAV. Positive performance factors included concentrations in education, health, transportation and

corporate-related debt. Renewed risk appetite was also beneficial, given the Trust s focus on lower-rated credits. In addition, the Trust s long duration stance

and emphasis on longer-dated bonds were significant positive contributors as yields on the long end of the curve fell substantially. Negative factors included

less exposure to the tax-backed, essential services and tobacco sectors. The Trust s cash reserves had no impact on performance.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These

views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT			2009		9

The Benefits and Risks of Leveraging

The Trusts may utilize leverage to seek to enhance the yield and NAV of their Common Shares. However, these objectives cannot be achieved in all interest rate environments.

To leverage, all the Trusts, except for BTA, issue Preferred Shares, which pay dividends at prevailing short-term interest rates, and invest the proceeds in long-term municipal bonds. In general, the concept of leveraging is based on the premise that the cost of assets to be obtained from leverage will be based on short-term interest rates, which normally will be lower than the income earned by each Trust on its longer-term portfolio investments. To the extent that the total assets of each Trust (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, each Trust s Common Shareholders will benefit from the incremental net income.

To illustrate these concepts, assume a Trust s Common Shares capitalization is \$100 million and it issues Preferred Shares for an additional \$50 million, creating a total value of \$150 million available for investment in long-term municipal bonds. If prevailing short-term interest rates are 3% and longterm interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Trust pays dividends on the \$50 million of Preferred Shares based on the lower short-term interest rates. At the same time, the securities purchased by the Trust with assets received from Preferred Shares issuance earn the income based on long-term interest rates. In this case, the dividends paid to Preferred Shareholders are significantly lower than the income earned on the Trust s long-term investments, and therefore the Common Shareholders are the beneficiaries of the incremental net income.

If short-term interest rates rise, narrowing the differential between shortterm and long-term interest rates, the incremental net income pickup on the Common Shares will be reduced or eliminated completely. Furthermore, if prevailing short-term interest rates rise above long-term interest rates of 6%, the yield curve has a negative slope. In this case, the Trust pays dividends on the higher short-term interest rates whereas the Trust s total portfolio earns income based on lower long-term interest rates.

Furthermore, the value of the Trusts portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the redemption value of the Trusts Preferred Shares do not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Trusts NAV positively or negatively in addition to the impact on Trust performance from leverage from Preferred Shares discussed above.

The Trusts may also leverage their assets through the use of tender option bond (TOB) programs, as described in Note 1 of the Notes to Financial Statements. TOB investments generally will provide the Trusts with economic benefits in periods of declining short-term interest rates, but expose the Trusts to risks during periods of rising short-term interest rates similar to those associated with Preferred Shares issued by the Trusts, as described above. Additionally, fluctuations in the market value of municipal bonds deposited into the TOB trust may adversely affect each Trust s NAVs per share.

The use of leverage may enhance opportunities for increased income to the Trusts and Common Shareholders, but as described above, it also creates risks as short- or long-term interest rates fluctuate. Leverage also will generally cause greater changes in the Trusts NAV, market price and dividend rate than a comparable portfolio without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, the Trusts net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, each Trust s net income will be less than if leverage had not been used, and therefore the amount available for distribution to Common Shareholders will be reduced. Each Trust may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause a Trust to incur losses. The use of leverage may limit each Trust s ability to invest in certain types of securities or use certain types of hedging strategies, such as in the case of certain restrictions imposed by ratings agencies that rate preferred shares issued by the Trusts. Each Trust will incur expenses in connection with the use of leverage, all of which are borne by Common Shareholders and may reduce income to the Common Shares.

Under the Investment Company Act of 1940, the Trusts are permitted to issue Preferred Shares in an amount of up to 50% of their total managed assets at the time of issuance. Under normal circumstances, each Trust anticipates that the total economic leverage from Preferred Shares and/or TOBs will not exceed 50% of its total managed assets at the time such leverage is incurred. As of October 31, 2009, the Trusts had economic leverage from Preferred Shares and/or TOBs as a percentage of their total managed assets as follows:

Percent of	
Leverage	
38%	BKN
37%	BTA
39%	ВКК
38%	BFK
38%	BPS
38%	BSD

Derivative Financial Instruments

The Trusts may invest in various derivative instruments, including financial futures contracts, as specified in Note 2 of the Notes to Financial Statements, which constitute forms of economic leverage. Such instruments are used to obtain exposure to a market without owning or taking physical custody of securities or to hedge market and/or interest rate risks. Such derivative instruments involve risks, including the imperfect correlation between the value of a derivative instrument and the underlying asset and illiquidity of the derivative instrument. The Trusts ability to successfully use a derivative instrument depends on the investment advisor s ability to accu-

rately predict pertinent market movements, which cannot be assured. The use of derivative instruments may result in losses greater than if they had not been used, may require the Trusts to sell or purchase portfolio securities at inopportune times or for distressed values, may limit the amount of appreciation the Trusts can realize on an investment or may cause the Trusts to hold a security that they might otherwise sell. The Trusts investments in these instruments are discussed in detail in the Notes to Financial Statements.

yield as of report date.

(c) US government securities, held in escrow, are used to pay interest on this security as

well as to retire the bond in full at the date indicated, typically at a premium to par.

(d) When-issued security.

		Unrealized
Counterparty	Value	Depreciation
Citibank NA	\$3,940,051	\$ (27,578)
Morgan Stanley Capital Services Inc.	\$5,659,860	\$ (115,920)
(e) Security exempt from registration under Rule 144A of the Securities Act of 1933.		
These securities may be resold in transactions exempt from registration to qualifi	ed	
institutional investors.		
(f) Security is collateralized by Municipal or US Treasury Obligations.		
(g) Issuer filed for bankruptcy and/or is in default of interest payments.		
(h) Non-income producing security.		
(i) Security represents a be	eneficial interest in a trust. The coll	lateral deposited into the
trust is federally tax-exempt revenue bonds issued by various state or local gover	rn-	
ments, or their respective agencies or authorities. The security is subject to rema	ırket-	
ing prior to its stated maturity and is subject to mandatory redemption at maturity.		
(j) Securities represent bond	ds transferred to a tender option bo	ond trust in exchange for
which the Trust acquired residual interest certificates. These securities serve as	col-	
lateral in a financing transaction. See Note 1 of the Notes to Financial Statements	S	
for details of municipal bonds transferred to tender option bond trusts.		
(k) Investments in companie	es considered to be an affiliate of th	he Trust, for purposes of
Section 2(a)(3) of the Investment Company Act of 1940, were as follows:		
	Net	

	Net	
Affiliate	Activity	Income
FFI Institutional Tax-Exempt Fund	\$(4,699,449)	\$ 16,128
(I) Represents the current yield as of report date.		

See Notes to Financial Statements.

14 SEMI-ANNUAL REPORT OCTOBER 31, 2009

Schedule of Investments (concluded) BlackRock Investment Quality Municipal Trust Inc. (BKN)

Fair Value Measurements Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments) The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust s policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements. The following table summarizes the inputs used as of October 31, 2009 in determining the fair valuation of the Trust s investments:

	Investments in
Valuation Inputs	Securities
	Assets
Level 1 Short-Term Securities	\$ 6,700,551
Level 2 Long-Term Investments	355,874,764
Level 3	
Total	\$362,575,315
¹ See above Schedule of Investments for values in each state or	
political subdivision.

(Cost \$243,267,919) 158.9%		227,637,202
Short-Term Securities	Shares	
FFI Institutional Tax-Exempt Fund, 0.23% (f)(g)	2,200,175	2,200,175

Total Short-Term Securities	
(Cost \$2,200,175) 1.6%	2,200,175
Total Investments (Cost \$245,468,094*) 160.5%	229,837,377
Liabilities in Excess of Other Assets (1.3)%	(1,631,347)
Liability for Trust Certificates, Including Interest	
Expense and Fees Payable (59.2)%	(85,005,873)
Net Assets 100.0%	\$143,200,157
* The cost and unrealized appreciation (depreciation) of investments as of October 31,	

2009, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$160,453,848
Gross unrealized appreciation	\$ 2,670,216
Gross unrealized depreciation	(18,001,687)
Net unrealized depreciation	\$ (15,331,471)

(a) When-issued security.

Counterparty	Value	Depreciation
Citibank NA	\$ 688,538	\$ (4,343)
JPMorgan Securities, Inc.	\$ 925,376	\$ (14,602)
Jeffries & Co.	\$ 645,522	\$ (10,842)
Merrill Lynch & Co.	\$ 281,062	\$ (415)
Morgan Stanley Capital Services, Inc.	\$2,380,663	\$ (38,988)

(b) Issuer filed for bankruptcy and/or is in default of interest payments.

(c) Non-income producing security.

(d) Represents a step-up bond that pays an initial coupon rate for the first period and then a higher coupon rate for the following periods. Rate shown reflects the current yield as of report date.

(e) Securities represent bonds transferred to a tender option bond trust in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to tender option bond trusts.

(f) Investments in companies considered to be an affiliate of the Trust, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

	Net	
Affiliate	Activity	Income
FFI Institutional Tax-Exempt Fund	\$799,990	\$ 4,862

(g) Represents the current yield as of report date.

Fair Value Measurements Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical assets and liabilities

Unrealized

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments) The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust s policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements. The following table summarizes the inputs used as of October 31, 2009 in determining the fair valuation of the Trust s investments:

	Investments in
Valuation Inputs	Securities
	Assets
Level 1 Short-Term Securities	\$ 2,200,175
Level 2 Long-Term Investments	227,637,202
Level 3	
Total	\$ 229,837,377
¹ See above Schedule of Investments for values in each state or	
political subdivision.	

See Notes to Financial Statements.
