Item 5. Other Events.

On April 26, 2002, the Registrant issued the following press release announcing operating results on an unaudited basis for the third quarter and nine months of fiscal year 2002 ended March 31, 2002:

FOR IMMEDIATE RELEASE

Friday, April 26, 2002

PRECISION OPTICS CORPORATION ANNOUNCES  
THIRD QUARTER RESULTS

GARDNER, Massachusetts - Precision Optics Corporation, Inc. (Nasdaq: POCI) today announced operating results on an unaudited basis for the third quarter and nine months of fiscal year 2002 ended March 31, 2002.

OPERATING RESULTS

Revenues for the quarter were \$358,896, compared to \$1,133,984 for the same period in fiscal year 2001, a decrease of 68.4%. Revenues increased 11%

## Edgar Filing: PRECISION OPTICS CORPORATION INC - Form 8-K

sequentially from the quarter ended December 31, 2001. Net loss was \$1,140,950, or \$0.11 per share, compared to \$1,110,948 or \$0.11 per share, for the same period last year. The weighted average common shares outstanding were 10,503,908 compared to 10,498,908 for the same period last year.

For the nine months ended March 31, 2002, revenues were \$1,173,306 compared to \$2,800,817 for the same period last year, a decrease of 58.1%. Net loss, including charges for asset impairment, restructuring and inventory write-down totaling \$4,652,628 as previously announced in earlier press releases dated November 8, 2001 and January 29, 2002, was \$8,642,180, or \$0.82 per share, compared to \$2,402,833 or \$0.23 per share, for the same period last year. The weighted average common shares outstanding were 10,503,908 compared to 10,464,586 for the same period last year.

The revenue decrease from the prior year for the third quarter was due primarily to lower sales of medical products (down 59%) and lower sales of non-medical products (down 89%). For the quarter ended March 31, 2002, medical sales were lower due primarily to significantly lower shipments of stereo endoscopes and related products, and non-medical sales were lower due primarily to lower sales of Dense Wavelength Division Multiplexing (DWDM) filters and filter test equipment.

The revenue decrease from the prior year for the nine months ended March 31, 2002 was due to lower sales of medical products (down 59%), and lower sales of non-medical products (down 54%). For the nine months ended March 31, 2002, medical sales were lower due primarily to lower sales of stereo endoscopes and related products. Non-medical sales were lower due primarily to lower sales of DWDM filters. DWDM filter sales represented 9% of total revenues during the nine months ended March 31, 2002 compared to 15.5% for the corresponding period of the prior year (representing a reduction in filter sales of approximately 75%).

### OUTLOOK

The asset impairment, restructuring and workforce reduction measures implemented earlier in the fiscal year, and other cost saving measures, are expected to result in a reduction in future annual expenses. During the quarter ended March 31, 2002, total recurring operating expenses (excluding

inventory purchases) were approximately \$1.2 million (or 46%) lower than the \$2.6 million for the quarter ended June 30, 2001, which was prior to implementation of these cost reduction initiatives. Going forward, these cost reduction measures are expected to result in expense savings of at least \$4 million per year, of which approximately \$3.2 million per year represent actual cash savings.

For the quarter ended March 31, 2002, cash and cash equivalents decreased by approximately \$1,009,000, a 23% sequential decrease in cash usage from the previous quarter ended December 31, 2001. A further reduction in the rate of cash usage is anticipated during the quarter ending June 30, 2002.

Capital equipment expenditures during the nine months ended March 31, 2002 were approximately \$73,000, down 98% from the \$3.3 million for the same period last year. It is anticipated that the level of capital spending for the balance of fiscal year 2002 and for the foreseeable future will continue to be substantially lower than last year.

For the quarter ended March 31, 2002, research and development expenses were approximately \$503,000, down 42.7% from the \$879,000 for the quarter ended March

## Edgar Filing: PRECISION OPTICS CORPORATION INC - Form 8-K

31, 2001. It is anticipated that the quarterly level of R&D expenses for the balance of fiscal year 2002 and for the foreseeable future will be substantially lower than last year.

The Company is pursuing advances on several fronts in the medical area and certain non-medical applications. Among these initiatives are improvements in medical instrument lens coatings, a new 30 degree line of sight version of the successful 5 mm Laparoscope, and other new products. The Company also recently announced several major successes related to its medical instrument business:

- The first production shipment of autoclavable endoscopes in March 2002.
- Receipt of new orders for stereo endoscopes and related products.
- Receipt of new orders for the development and production of a relay lens system for use in medical digital photo microscopy.

As a result of these new orders for medical products, the Company anticipates that its sales in the quarter ending June 30, 2002, will be significantly higher than the quarter ended March 31, 2002.

RECENT ACHIEVEMENTS OF ISO 9001 AND CE MARK CERTIFICATION, AS RECENTLY ANNOUNCED, ARE ALSO EXPECTED TO SUPPORT INCREASED FUTURE SALES OPPORTUNITIES, BOTH FOREIGN AND DOMESTIC, FOR THE COMPANY'S MEDICAL PRODUCTS.

### ABOUT PRECISION OPTICS

Precision Optics Corporation, a leading manufacturer of optical thin films and optical instruments since 1984, designs and manufactures high-quality optical thin film coatings, medical instruments, and other advanced optical systems. Major applications for the Company's thin film coatings have included DWDM filters used to increase the bandwidth capacity of fiber-optic telecommunications networks. The Company's medical instrumentation line includes laparoscopes, arthroscopes and endocouplers and a world-class 3-D endoscope for use in minimally invasive surgical procedures. Precision Optics Corporation is certified to the ISO 9001 Quality Standard, and complies with the FDA Good Manufacturing Practices and the European Union Medical Device Directive for CE Marking of its medical products. The Company's Internet Website is [www.info@poci.com](http://www.info@poci.com).
