NOTES TO CONSOLIDATED INTERIM FINANCIAL STATEMENTS (UNAUDITED)

For the Three and Nine Months Ended September 30, 2015 and 2014

1. GENERAL

As used in this document, "Holdings" means Everest Reinsurance Holdings, Inc., a Delaware company and direct subsidiary of Everest Underwriting Group (Ireland) Limited ("Holdings Ireland"); "Group" means Everest Re Group, Ltd. (Holdings Ireland's parent); "Bermuda Re" means Everest Reinsurance (Bermuda), Ltd., a subsidiary of Group; "Everest Re" means Everest Reinsurance Company and its subsidiaries, a subsidiary of Holdings (unless the context otherwise requires); "Mt. Logan Re" means Mt. Logan Re Ltd., a subsidiary of Group; and the "Company" means Holdings and its subsidiaries.

Effective July 13, 2015, the Company sold all of the outstanding shares of capital stock of a wholly-owned subsidiary entity, Mt. McKinley Insurance Company ("Mt. McKinley"), to Clearwater Insurance Company. The operating results of Mt. McKinley through July 13, 2015 are included within the Company's financial statements.

2. BASIS OF PRESENTATION

The unaudited consolidated financial statements of the Company for the three and nine months ended September 30, 2015 and 2014 include all adjustments, consisting of normal recurring accruals, which, in the opinion of management, are necessary for a fair statement of the results on an interim basis. Certain financial information, which is normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"), has been omitted since it is not required for interim reporting purposes. The December 31, 2014 consolidated balance sheet data was derived from audited financial statements, but does not include all disclosures required by GAAP. The results for the three and nine months ended September 30, 2015 and 2014 are not necessarily indicative of the results for a full year. These financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto for the years ended December 31, 2014, 2013 and 2012 included in the Company's most recent Form 10-K filing.

All intercompany accounts and transactions have been eliminated.

Application of Recently Issued Accounting Standard Changes

No accounting standards or guidance have been issued recently that would have a material impact on the Company's financial statements or financial reporting process.

3. INVESTMENTS

The amortized cost, market value and gross unrealized appreciation and depreciation of available for sale, fixed maturity, equity security investments, carried at market value and other-than-temporary impairments ("OTTI") in accumulated other comprehensive income ("AOCI") are as follows for the periods indicated:

| (Dollars in thousands) | At September 30, 2015 | | | | OTTI in AOCI (a) |

^(a) Represents the amount of OTTI recognized in AOCI. Amount includes unrealized gains and losses on impaired securities relating to changes in the value of such securities subsequent to the impairment measurement date.

The amortized cost and market value of fixed maturity securities are shown in the following tables by contractual maturity. Mortgage-backed securities are generally more likely to be prepaid than other fixed maturity securities. As the stated maturity of such securities may not be indicative of actual maturities, the totals for mortgage-backed and asset-backed securities are shown separately.

The Company frequently reviews all of its fixed maturity, available for sale securities for declines in market value and focuses its attention on securities whose fair value has fallen below 80% of their amortized cost at the time of review. The Company then assesses whether the decline in value is temporary or other-than-temporary. In making its assessment, the Company evaluates the current market and interest rate environment as well as specific issuer information. Generally, a change in a security's value caused by a change in the market, interest rate or foreign exchange environment does not constitute an other-than-temporary impairment, but rather a temporary decline in market value. Temporary declines in market value are recorded as unrealized losses in accumulated other comprehensive income (loss). If the Company determines that the decline is other-than-temporary and the Company does not have the intent to sell the security; and it is more likely than not that the Company will not have to sell the

security before recovery of its cost basis, the carrying value of the investment is written down to fair value. The fair value adjustment that is credit or foreign exchange related is recorded in net realized capital gains (losses) in the Company's consolidated statements of operations and comprehensive income (loss). The fair value adjustment that is non-credit related is recorded as a component of other comprehensive income (loss), net of tax, and is included in accumulated other comprehensive income (loss) in the Company's consolidated balance sheets. The Company's assessments are based on the issuers current and expected future financial position, timeliness with respect to interest and/or principal payments, speed of repayments and any applicable credit enhancements or breakeven constant default rates on mortgage-backed and asset-backed securities, as well as relevant information provided by rating agencies, investment advisors and analysts.

7

The majority of the Company's equity securities available for sale at market value are primarily comprised of mutual fund investments whose underlying securities consist of fixed maturity securities. When a fund's value reflects an unrealized loss, the Company assesses whether the decline in value is temporary or other-than-temporary. In making its assessment, the Company considers the composition of its portfolios and their related markets, reports received from the portfolio managers and discussions with portfolio managers. If the Company determines that the declines are temporary and it has the ability and intent to continue to hold the investments, then the declines are recorded as unrealized losses in accumulated other comprehensive income (loss). If declines are deemed to be other-than-temporary, then the carrying value of the investment is written down to fair value and recorded in net realized capital gains (losses) in the Company's consolidated statements of operations and comprehensive income (loss).

Retrospective adjustments are employed to recalculate the values of asset-backed securities. All of the Company's asset-backed and mortgage-backed securities have a pass-through structure. Each acquisition lot is reviewed to recalculate the effective yield. The recalculated effective yield is used to derive a book value as if the new yield were applied at the time of acquisition. Outstanding principal factors from the time of acquisition to the adjustment date are used to calculate the prepayment history for all applicable securities. Conditional prepayment rates, computed with life to date factor histories and weighted average maturities, are used in the calculation of projected prepayments for pass-through security types.

The tables below display the aggregate market value and gross unrealized depreciation of fixed maturity and equity securities, by security type and contractual maturity, in each case subdivided according to length of time that individual securities had been in a continuous unrealized loss position for the periods indicated:

The aggregate market value and gross unrealized losses related to investments in an unrealized loss position at September 30, 2015 were \$1,858,842 thousand and \$85,173 thousand, respectively. The market value of securities for the single issuer whose securities comprised the largest unrealized loss position at September 30, 2015, did not exceed 0.3% of the overall market value of the Company's fixed maturity securities. In addition, as indicated on the above table, there was no significant concentration of unrealized losses in any one market sector. The \$58,072 thousand of unrealized losses related to fixed maturity securities that have been in an unrealized loss position for less than one year were primarily comprised of domestic and foreign corporate securities and foreign government securities. The majority of these unrealized losses are attributable to unrealized losses in the energy sector, \$36,358 thousand, as falling oil prices disrupted the market values for this sector, particularly for oil exploration, production and servicing companies and unrealized foreign exchange losses, \$11,313 thousand, as the U.S. dollar has strengthened against other currencies. The \$27,101 thousand of unrealized losses related to fixed maturity securities in an unrealized loss position for more than one year related primarily to domestic and foreign corporate securities, foreign government securities and agency residential mortgage-backed securities. The majority of these unrealized losses are attributable to unrealized foreign exchange losses, \$13,322 thousand, as the U.S. dollar has strengthened against other currencies and unrealized losses in the energy sector, \$5,056 thousand, as falling oil prices disrupted the market values for this sector, particularly for oil exploration, production and servicing companies. The Company did not have any sub-prime or alt-A loans with gross unrealized depreciation at September 30, 2015. In all instances, there were no projected cash flow shortfalls to recover the full book value of the investments and the related interest obligations. The mortgage-backed securities still have excess credit coverage and are current on interest and principal payments.

The Company, given the size of its investment portfolio and capital position, does not have the intent to sell these securities; and it is more likely than not that the Company will not have to sell the security before recovery of its cost basis. In addition, all securities currently in an unrealized loss position are current with respect to principal and interest payments.

The aggregate market value and gross unrealized losses related to investments in an unrealized loss position at December 31, 2014 were \$1,892,146 thousand and \$90,458 thousand, respectively. The market value of securities for the single issuer whose securities comprised the largest unrealized loss position at December 31, 2014, did not exceed 0.3% of the overall market value of the Company's fixed maturity securities. In addition, as indicated on the above table, there was no significant concentration of unrealized losses in any one market sector. The \$72,254 thousand of unrealized losses related to fixed maturity securities that have been in an unrealized loss position for less than one year were primarily comprised of domestic and foreign corporate securities. The majority of these unrealized losses are attributable to unrealized losses in the energy sector, \$53,772 thousand, as falling oil prices disrupted the market values for this sector, particularly for oil exploration, production and servicing companies during the fourth quarter of 2014 and unrealized foreign exchange losses, \$7,298 thousand, as the U.S. dollar has strengthened against other currencies. The \$18,204 thousand of unrealized losses related to fixed maturity securities in an unrealized loss position for more than one year related primarily to agency residential mortgage-backed securities, foreign and domestic corporate securities and foreign government securities. Of these unrealized losses, \$16,680 thousand were related to securities that were rated investment grade by at least one nationally recognized statistical rating organization. The Company did not have any sub-prime or alt-A loans with gross unrealized depreciation at December 31, 2014. In all instances, there were no projected cash flow shortfalls to recover the full book value of the investments and the related interest obligations. The mortgage-backed securities still have excess credit coverage and are current on interest and principal payments.

Other invested assets, at fair value, are comprised of common shares of the Company's ultimate parent, Group. At September 30, 2015, the Company held 9,719,971 shares of Group representing 18% of the total outstanding shares.

The Company records results from limited partnership investments on the equity method of accounting with changes in value reported through net investment income. Due to the timing of receiving financial information from these partnerships, the results are generally reported on a one month or quarter lag. If the Company determines there has been a significant decline in value of a limited partnership during this lag period, a loss will be recorded in the period in which the Company identifies the decline.

The Company had contractual commitments to invest up to an additional \$245,663 thousand in limited partnerships at September 30, 2015. These commitments will be funded when called in accordance with the partnership agreements, which have investment periods that expire, unless extended, through 2019.

The Company recorded as net realized capital gains (losses) in the consolidated statements of operations and comprehensive income (loss) both fair value re-measurements and write-downs in the value of securities deemed to be impaired on an other-than-temporary basis as displayed in the table above. The Company had no other-than-temporary impaired securities where the impairment had both a credit and non-credit component.

On July 13, 2015, the Company sold Mt. McKinley, a Delaware domiciled insurance company and wholly-owned subsidiary of the Company to Clearwater Insurance Company, a Delaware domiciled insurance company. The purchase price of \$20,156 thousand was based upon the statutory book value of Mt. McKinley as of the closing date. The Company recognized a pre-tax realized gain of \$94,704 thousand on the sale of Mt. McKinley.

4. FAIR VALUE

GAAP guidance regarding fair value measurements address how companies should measure fair value when they are required to use fair value measures for recognition or disclosure purposes under GAAP and provides a common definition of fair value to be used throughout GAAP. It defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly fashion between market participants at the measurement date. In addition, it establishes a three-level valuation hierarchy for the disclosure of fair value measurements. The valuation hierarchy is based on the transparency of inputs to the valuation of an asset or liability. The level in the hierarchy within which a given fair value measurement falls is determined based on the lowest level input that is significant to the measurement, with Level 1 being the highest priority and Level 3 being the lowest priority.

The levels in the hierarchy are defined as follows:

Level 1: Inputs to the valuation methodology are observable inputs that reflect unadjusted quoted prices for identical assets or liabilities in an active market;

Level 2: Inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument;

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The Company's fixed maturity and equity securities are primarily managed by third party investment asset managers. The investment asset managers obtain prices from nationally recognized pricing services. These services seek to utilize market data and observations in their evaluation process. They use pricing applications that vary by asset class and incorporate available market information and when fixed maturity securities do not trade on a daily basis the services will apply available information through processes such as benchmark curves, benchmarking of like securities, sector groupings and matrix pricing. In addition, they use model processes, such as the Option Adjusted Spread model to develop prepayment and interest rate scenarios for securities that have prepayment features.

In limited instances where prices are not provided by pricing services or in rare instances when a manager may not agree with the pricing service, price quotes on a non-binding basis are obtained from investment brokers. The investment asset managers do not make any changes to prices received from either the pricing services or the investment brokers. In addition, the investment asset managers have procedures in place to review the reasonableness

of the prices from the service providers and may request verification of the prices. In addition, the Company continually performs analytical reviews of price changes and tests the prices on a random basis to an independent pricing source. No material variances were noted during these price validation procedures. In limited situations, where financial markets are inactive or illiquid, the Company may use its own assumptions about future cash flows and risk-adjusted discount rates to determine fair value. Due to the unavailability of prices for one private placement security, the Company

12

valued the security at \$6,125 thousand at September 30, 2015 and made no such adjustments at December 31, 2014

The Company internally manages a small public equity portfolio which had a fair value at September 30, 2015 and December 31, 2014 of \$114,519 thousand and \$96,890 thousand, respectively, and all prices were obtained from publically published sources.

Equity securities denominated in U.S. currency with quoted prices in active markets for identical assets are categorized as level 1 since the quoted prices are directly observable. Equity securities traded on foreign exchanges are categorized as level 2 due to the added input of a foreign exchange conversion rate to determine fair or market value. The Company uses foreign currency exchange rates published by nationally recognized sources.

All categories of fixed maturity securities listed in the tables below are generally categorized as level 2, since a particular security may not have traded but the pricing services are able to use valuation models with observable market inputs such as interest rate yield curves and prices for similar fixed maturity securities in terms of issuer, maturity and seniority. For foreign government securities and foreign corporate securities, the fair values provided by the third party pricing services in local currencies, and where applicable, are converted to U.S. dollars using currency exchange rates from nationally recognized sources.

The fixed maturities with fair values categorized as level 3 result when prices are not available from the nationally recognized pricing services. The asset managers will then obtain non-binding price quotes for the securities from brokers. The single broker quotes are provided by market makers or broker-dealers who are recognized as market participants in the markets in which they are providing the quotes. The prices received from brokers are reviewed for reasonableness by the third party asset managers and the Company. If the broker quotes are for foreign denominated securities, the quotes are converted to U.S. dollars using currency exchange rates from nationally recognized sources. Historically, most of the level 3 fixed maturities have resulted from new issuances and the third party prices services have not yet included the issuance in their data base. Generally, in subsequent measurement periods, the issuances will be included in the data base and the fair value will transfer to level 2.

The composition and valuation inputs for the presented fixed maturities categories are as follows:

U.S. Treasury securities and obligations of U.S. government agencies and corporations are primarily comprised of U.S. Treasury bonds and the fair value is based on observable market inputs such as quoted prices, reported trades, quoted prices for similar issuances or benchmark yields;

Obligations of U.S. states and political subdivisions are comprised of state and municipal bond issuances and the fair values are based on observable market inputs such as quoted market prices, quoted prices for similar securities, benchmark yields and credit spreads;

Corporate securities are primarily comprised of U.S. corporate and public utility bond issuances and the fair values are based on observable market inputs such as quoted market prices, quoted prices for similar securities, benchmark yields and credit spreads;

Asset-backed and mortgage-backed securities fair values are based on observable inputs such as quoted prices, reported trades, quoted prices for similar issuances or benchmark yields and cash flow models using observable inputs such as prepayment speeds, collateral performance and default spreads;

Foreign government securities are comprised of global non-U.S. sovereign bond issuances and the fair values are based on observable market inputs such as quoted market prices, quoted prices for similar securities and models with observable inputs such as benchmark yields and credit spreads and then, where applicable, converted to U.S. dollars using an exchange rate from a nationally recognized source;

Foreign corporate securities are comprised of global non-U.S. corporate bond issuances and the fair values are based on observable market inputs such as quoted market prices, quoted prices for similar securities and models with observable inputs such as benchmark yields and credit spreads and then, where applicable, converted to U.S. dollars using an exchange rate from a nationally recognized source.

Other invested assets, at fair value, are categorized as Level 1, Quoted Prices in Active Markets for Identical Assets, since the securities are shares of the Company's parent, which are actively traded on an exchange and the price is based on a quoted price.

The following table presents the fair value measurement levels for all assets, which the Company has recorded at fair value (fair and market value) as of the period indicated:

5. CAPITAL TRANSACTIONS

On July 9, 2014, the Company renewed its shelf registration statement on Form S-3ASR with the Securities and Exchange Commission (the "SEC"), as a Well Known Seasoned Issuer. This shelf registration statement can be used by Group to register common shares, preferred shares, debt securities, warrants, share purchase contracts and share purchase units; by Holdings to register debt securities and by Everest Re Capital Trust III ("Capital Trust III") to register trust preferred securities.

6. CONTINGENCIES

In the ordinary course of business, the Company is involved in lawsuits, arbitrations and other formal and informal dispute resolution procedures, the outcomes of which will determine the Company's rights and obligations under insurance and reinsurance agreements. In some disputes, the Company seeks to enforce its rights under an agreement or to collect funds owing to it. In other matters, the Company is resisting attempts by others to collect funds or enforce alleged rights. These disputes arise from time to time and are ultimately resolved through both informal and formal means, including negotiated resolution, arbitration and litigation. In all such matters, the Company believes that its positions are legally and commercially reasonable. The Company considers the statuses of these proceedings when determining its reserves for unpaid loss and loss adjustment expenses.

Aside from litigation and arbitrations related to these insurance and reinsurance agreements, the Company is not a party to any other material litigation or arbitration.

The Company has entered into separate annuity agreements with The Prudential Insurance of America ("The Prudential") and an additional unaffiliated life insurance company in which the Company has either purchased annuity contracts or become the assignee of annuity proceeds that are meant to settle claim payment obligations in the future. In both instances, the Company would become contingently liable if either The Prudential or the unaffiliated life insurance company were unable to make payments related to the respective annuity contract.

The table below presents the estimated cost to replace all such annuities for which the Company was contingently liable for the periods indicated:

| | At September 30, 2015 | At December 31, 2014 |

8. CREDIT FACILITY - EXPIRED

Effective August 15, 2011, the Company entered into a three year, \$150,000 thousand unsecured revolving credit facility, referred to as the "Holdings Credit Facility", which expired on August 15, 2014. The Company decided not to renew the Holdings Credit Facility at expiration.

9. REINSURANCE AND TRUST AGREEMENTS

A subsidiary of the Company, Everest Re, has established a trust agreement, which effectively uses Everest Re's investments as collateral, as security for assumed losses payable to a non-affiliated ceding company. At September 30, 2015, the total amount on deposit in the trust account was \$306,214 thousand.

On April 24, 2014, the Company entered into two collateralized reinsurance agreements with Kilimanjaro Re Limited ("Kilimanjaro"), a Bermuda based special purpose reinsurer, to provide the Company with catastrophe reinsurance coverage. These agreements are multi-year reinsurance contracts which cover specified named storm and earthquake events. The first agreement provides up to \$250,000 thousand of reinsurance coverage from named storms in specified states of the Southeastern United States. The second agreement provides up to \$200,000 thousand of reinsurance coverage from named storms in specified states of the Southeast, Mid-Atlantic and Northeast regions of the United States and Puerto Rico as well as reinsurance coverage from earthquakes in specified states of the Southeast, Mid-Atlantic, Northeast and West regions of the United States, Puerto Rico and British Columbia.

On November 18, 2014, the Company entered into a collateralized reinsurance agreement with Kilimanjaro Re to provide the Company with catastrophe reinsurance coverage. This agreement is a multi-year reinsurance contract which covers specified earthquake events. The agreement provides up to \$500,000 thousand of reinsurance coverage from earthquakes in the United States, Puerto Rico and Canada.

Kilimanjaro has financed the various property catastrophe reinsurance coverage by issuing catastrophe bonds to unrelated, external investors. On April, 24, 2014, Kilimanjaro issued \$450,000 thousand of variable rate notes ("Series 2014-1 Notes"). On November 18, 2014, Kilimanjaro issued \$500,000 thousand of variable rate notes ("Series 2014-2 Notes"). The proceeds from the issuance of the Series 2014-1 Notes and the Series 2014-2 Notes are held in reinsurance trust throughout the duration of the applicable reinsurance agreements and invested solely in US government money market funds with a rating of at least "AAAm" by Standard & Poor's.

10. SENIOR NOTES

The table below displays Holdings' outstanding senior notes. Market value is based on quoted market prices, but due to limited trading activity, these senior notes are considered Level 2 in the fair value hierarchy.

| (Dollars in thousands) | Date Issued | Date Due | Principal Amounts | September 30, 2015 | | December 31, 2014 | |
|------------------------|-------------|------------|-------------------|-----------------------------------|--------------|-----------------------------------|--------------|

On June 5, 2014, Holdings issued \$400,000 thousand of 30 year senior notes at 4.868%, which will mature on June 1, 2044. Interest will be paid semi-annually on June 1 and December 1 of each year. The proceeds from the issuance have been used in part to pay off the \$250,000 thousand of 5.40% senior notes which matured on October 15, 2014.

Interest expense incurred in connection with these senior notes is as follows for the periods indicated:

| (Dollars in thousands) | Three Months Ended | | Nine Months Ended | |

11. LONG TERM SUBORDINATED NOTES

The table below displays Holdings' outstanding fixed to floating rate long term subordinated notes. Market value is based on quoted market prices, but due to limited trading activity, these subordinated notes are considered Level 2 in the fair value hierarchy.

| (Dollars in thousands) | Date Issued | Original Principal Amount | Maturity Date | | September 30, 2015 | | December 31, 2014 | |

subordinated
notes

During the fixed rate interest period from May 3, 2007 through May 14, 2017, interest will be at the annual rate of 6.6%, payable semi-annually in arrears on November 15 and May 15 of each year, commencing on November 15, 2007, subject to Holdings' right to defer interest on one or more occasions for up to ten consecutive years. During the floating rate interest period from May 15, 2017 through maturity, interest will be based on the 3 month LIBOR plus 238.5 basis points, reset quarterly, payable quarterly in arrears on February 15, May 15, August 15 and November 15 of each year, subject to Holdings' right to defer interest on one or more occasions for up to ten consecutive years. Deferred interest will accumulate interest at the applicable rate compounded semi-annually for periods prior to May 15, 2017, and compounded quarterly for periods from and including May 15, 2017.

20

Holdings can redeem the long term subordinated notes prior to May 15, 2017, in whole but not in part at the applicable redemption price, which will equal the greater of (a) 100% of the principal amount being redeemed and (b) the present value of the principal payment on May 15, 2017 and scheduled payments of interest that would have accrued from the redemption date to May 15, 2017 on the long term subordinated notes being redeemed, discounted to the redemption date on a semi-annual basis at a discount rate equal to the treasury rate plus an applicable spread of either 0.25% or 0.50%, in each case plus accrued and unpaid interest. Holdings may redeem the long term subordinated notes on or after May 15, 2017, in whole or in part at 100% of the principal amount plus accrued and unpaid interest; however, redemption on or after the scheduled maturity date and prior to May 1, 2047 is subject to a replacement capital covenant. This covenant is for the benefit of certain senior note holders and it mandates that Holdings receive proceeds from the sale of another subordinated debt issue, of at least similar size, before it may redeem the subordinated notes. Effective upon the maturity of the Company's 5.40% senior notes on October 15, 2014, the Company's 4.868% senior notes, due on June 1, 2044, have become the Company's long term indebtedness that ranks senior to the long term subordinated notes.

On March 19, 2009, Group announced the commencement of a cash tender offer for any and all of the 6.60% fixed to floating rate long term subordinated notes. Upon expiration of the tender offer, the Company had reduced its outstanding debt by \$161,441 thousand.

Interest expense incurred in connection with these long term subordinated notes is as follows for the periods indicated:

| | Three Months Ended September 30, | | Nine Months Ended September 30, | |
|---------------------------|-------------------------------------|----------|------------------------------------|-----------|

12. SEGMENT REPORTING

The U.S. Reinsurance operation writes property and casualty reinsurance and specialty lines of business, including Marine, Aviation, Surety and Accident and Health ("A&H") business, on both a treaty and facultative basis, through reinsurance brokers, as well as directly with ceding companies primarily within the U.S. The International operation writes non-U.S. property and casualty reinsurance through Everest Re's branches in Canada, Singapore and through offices in Brazil, Miami and New Jersey. The Insurance operation writes property and casualty insurance directly and through general agents, brokers and surplus lines brokers within the U.S.

These segments are managed independently, but conform with corporate guidelines with respect to pricing, risk management, control of aggregate catastrophe exposures, capital, investments and support operations. Management generally monitors and evaluates the financial performance of these operating segments based upon their underwriting results.

Underwriting results include earned premium less losses and LAE incurred, commission and brokerage expenses and other underwriting expenses. Underwriting results are measured using ratios, in particular loss, commission and brokerage and other underwriting expense ratios, which, respectively, divide incurred losses, commissions and brokerage and other underwriting expenses by premiums earned.

The Company does not maintain separate balance sheet data for its operating segments. Accordingly, the Company does not review and evaluate the financial results of its operating segments based upon balance sheet data.

| Assumed losses and LAE | 4,041 | 4,104 | 15,062 | 10,487 |

(a) Ceded losses and LAE include the Mt. McKinley loss portfolio transfer that constitutes losses ceded under retroactive reinsurance and therefore, in accordance with FASB guidance, amortization of deferred gain on retroactive reinsurance is reflected in other income on the consolidated statements of operations and comprehensive income (loss). Upon the sale of Mt. McKinley, the value of the remaining deferred gain on retroactive reinsurance was included in the calculation of the realized gain on sale of subsidiary.

Everest Re sold net assets of its UK branch to Bermuda Re and provided Bermuda Re with a reserve indemnity agreement allowing for indemnity payments of up to 90% of 25.0 million of the excess of 2002 and prior reserves, provided that any recognition of profit from the reserves for 2002 and prior underwriting years is taken into account.

Effective February 27, 2013, Group established a new subsidiary, Mt. Logan Re, which is a Class 3 insurer based in Bermuda. Effective July 1, 2013, Mt. Logan Re established separate segregated accounts for its business activity, which will invest in a diversified set of catastrophe exposures.

The following table summarizes the premiums and losses that are ceded by the Company to Mt. Logan Re and assumed by the Company from Mt. Logan Re.

The Company did not make any contributions to the qualified pension benefit plan for the three and nine months ended September 30, 2015 and 2014.

15. INCOME TAXES

The Company is domiciled in the United States and has subsidiaries domiciled within the United States with significant branches in Canada and Singapore. The Company's non-U.S. branches are subject to income taxation at varying rates in their respective domiciles.

For interim reporting periods, the company is generally required to use the annualized effective tax rate ("AETR") method, as prescribed by ASC 740-270, Interim Reporting, to calculate its income tax provision. Under this method, the AETR is applied to the interim year-to-date pre-tax income to determine the income tax expense or benefit for the year-to-date period. The income tax expense or benefit for a quarter represents the difference between the year-to-date income tax expense or benefit for the current year-to-date period less such amount for the immediately preceding year-to-date period. Management considers the impact of all known events in its estimation of the Company's annual pre-tax income and AETR.

16. DISPOSITIONS

On July 13, 2015, the Company closed its agreement to sell all of the outstanding shares of capital stock of Mt. McKinley, a Delaware domiciled insurance company and wholly-owned subsidiary of the Company to Clearwater Insurance Company, a Delaware domiciled insurance company. The purchase price of \$20,156 thousand was based upon the statutory book value of Mt. McKinley as of the closing date. The Company recognized a pre-tax realized gain of \$94,704 thousand on the sale of Mt. McKinley.

The transaction met the criteria for Held for Sale accounting. In accordance with the guidance, the table below details the assets and liabilities associated with the business classified as Held for Sale at the time of closing.

17. SUBSEQUENT EVENTS

The Company has entered into two collateralized reinsurance agreements with Kilimanjaro to provide the Company with catastrophe reinsurance coverage. Kilimanjaro has funded the catastrophe reinsurance coverage through the issuance of two classes of catastrophe reinsurance bonds in an aggregate amount of \$625,000 thousand.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION

Industry Conditions.

The worldwide reinsurance and insurance businesses are highly competitive, as well as cyclical by product and market. As such, financial results tend to fluctuate with periods of constrained availability, high rates and strong profits followed by periods of abundant capacity, low rates and constrained profitability. Competition in the types of reinsurance and insurance business that we underwrite is based on many factors, including the perceived overall financial strength of the reinsurer or insurer, ratings of the reinsurer or insurer by A.M. Best and/or Standard & Poor's, underwriting expertise, the jurisdictions where the reinsurer or insurer is licensed or otherwise authorized, capacity and coverages offered, premiums charged, other terms and conditions of the reinsurance and insurance business offered, services offered, speed of claims payment and reputation and experience in lines written. Furthermore, the market impact from these competitive factors related to reinsurance and insurance is generally not consistent across lines of business, domestic and international geographical areas and distribution channels.

We compete in the U.S. and international reinsurance and insurance markets with numerous global competitors. Our competitors include independent reinsurance and insurance companies, subsidiaries or affiliates of established worldwide insurance companies, reinsurance departments of certain insurance companies, domestic and international underwriting operations, including underwriting syndicates at Lloyd's and certain government sponsored risk transfer vehicles. Some of these competitors have greater financial resources than we do and have established long term and continuing business relationships, which can be a significant competitive advantage. In addition, the lack of strong barriers to entry into the reinsurance business and recently, the securitization of reinsurance and insurance risks through capital markets provide additional sources of potential reinsurance and insurance capacity and competition.

Worldwide insurance and reinsurance market conditions continued to be very competitive, particularly in the property catastrophe and casualty reinsurance lines of business. Generally, there was ample insurance and reinsurance capacity relative to demand, as well as, additional capital from the capital markets through insurance linked financial instruments. These financial instruments such as side cars, catastrophe bonds and collateralized reinsurance funds, provide capital markets with access to insurance and reinsurance risk exposure. The capital markets demand for these products is being primarily driven by the current low interest environment and the desire to achieve greater risk diversification and potentially higher returns on their investments. This increased competition is generally having a negative impact on rates, terms and conditions; however, the impact varies widely by market and coverage.

Rates tend to fluctuate by specific region and products, particularly areas recently impacted by large catastrophic events. During the second and third quarters of 2013, Canada experienced historic flooding in Alberta and Toronto, which resulted in higher catastrophe rates in these areas during 2014. Although there were flooding and wind storm events in Europe and Asia in the latter part of 2013, the overall 2013 catastrophe losses for the industry were lower than average. This lower level of losses, combined with increased competition resulted in downward pressure on rates in certain geographical areas during 2014. Catastrophe results during 2014 and through the third quarter of 2015 were also below historical averages, which could have a negative impact on worldwide regional catastrophe markets for the balance of 2015.

Overall, we believe that given our size, strong ratings, distribution system, reputation, expertise and capital market vehicle activity the current marketplace conditions provide profit opportunities. We continue to employ our strategy of targeting business that offers the greatest profit potential, while maintaining balance and diversification in our overall portfolio.

Revenues.

Premiums. Gross written premiums decreased by 0.3% to \$1,448.7 million for the three months ended September 30, 2015, compared to \$1,453.4 million for the three months ended September 30, 2014, reflecting a \$123.7 million, or 11.2%, decrease in our reinsurance business, partially offset by a \$119.0 million, or 33.6%, increase in our insurance business. The decline in reinsurance premiums were due mainly to decreases in treaty casualty and treaty property lines of business and a negative impact of approximately \$31.4 million from the year over year movement in foreign exchange rates. The rise in insurance premiums was primarily due to the strategic initiative to expand our insurance operation resulting in increases in most lines of business. Gross written premiums increased by 0.1% to \$3,764.9 million for the

29

nine months ended September 30, 2015, compared to \$3,762.7 million for the nine months ended September 30, 2014, reflecting a \$245.2 million, or 27.7%, increase in our insurance business, partially offset by a \$243.0 million, or 8.4%, decrease in our reinsurance business. The rise in insurance premiums was primarily due to increases in most lines of business, as we have focused on expanding the insurance operations. The decline in reinsurance premiums were due mainly to decreases in treaty casualty and treaty property lines of business, reductions in quota share agreements and a negative impact of approximately \$70.0 million from the year over year movement in foreign exchange rates.

Net written premiums decreased by 2.1% to \$599.1 million for the three months ended September 30, 2015, compared to \$611.9 million for the three months ended September 30, 2014, and decreased by 1.5% to \$1,580.0 million for the nine months ended September 30, 2015 compared to \$1,604.3 million for the nine months ended September 30, 2014. The difference between the change in gross written premiums compared to the change in net written premiums is primarily due to varying utilization of reinsurance mainly related to quota share contracts. Premiums earned decreased by 4.1% to \$546.1 million for the three months ended September 30, 2015, compared to \$569.6 million for the three months ended September 30, 2014, and increased by 1.8% to \$1,588.5 million for the nine months ended September 30, 2015, compared to \$1,560.8 million for the nine months ended September 30, 2014. The change in premiums earned relative to net written premiums is the result of timing; premiums are earned ratably over the coverage period whereas written premiums are recorded at the initiation of the coverage period.

Net Investment Income. Net investment income decreased by 24.1% to \$63.4 million for the three months ended September 30, 2015, compared with net investment income of \$83.4 million for the three months ended September 30, 2014, and decreased by 4.2% to \$206.9 million for nine months ended September 30, 2015, compared with net investment income of \$215.9 million for the nine months ended September 30, 2014. Net pre-tax investment income, as a percentage of average invested assets, was 3.1% for the three months ended September 30, 2015, compared to 3.8% for the three months ended September 30, 2014 and was 3.3% for the nine months ended September 30, 2015 compared to 3.4% for the nine months ended September 30, 2014. The decline in income and yield was primarily the result of a decrease in our limited partnership income combined with lower income on fixed income securities.

Net Realized Capital Gains (Losses). Net realized capital losses were \$121.7 million and \$0.2 million for the three months ended September 30, 2015 and 2014, respectively. The \$121.7 million was comprised of \$185.6 million of losses from fair value re-measurements on equity securities and other invested assets, \$20.3 million of losses from sales on our fixed maturity and equity securities and \$10.5 million of other-than-temporary impairments, partially offset by a \$94.7 million gain on the sale of a subsidiary. The net realized capital losses of \$0.2 million for the three months ended September 30, 2014 was comprised of \$1.4 million of losses from sales on our fixed maturity and equity securities, partially offset by \$1.2 million of gains from fair value re-measurements on fixed maturity, equity securities and other invested assets.

Net realized capital losses were \$49.2 million and net realized capital gains were \$120.9 million for the nine months ended September 30, 2015 and 2014, respectively. The \$49.2 million was comprised of \$56.1 million of losses from fair value re-measurements on fixed maturity securities, equity securities and other invested assets, \$44.3 million of losses from sales on our fixed maturity and equity securities and \$43.4 million of other-than-temporary impairments, partially offset by a \$94.7 million gain on the sale of a subsidiary. The net realized capital gains of \$120.9 million for the nine months ended September 30, 2014 were the result of \$124.1 million of gains from fair value re-measurements on fixed maturity, equity securities and other invested assets, partially offset by \$3.0 million of net realized capital losses from sales on our fixed maturity and equity securities and \$0.2 million of other-than-temporary impairments.

Other Income (Expense). We recorded other income of \$10.8 million and \$39.0 million for the three and nine months ended September 30, 2015, respectively. We recorded other expense of \$3.7 million and \$15.6 million for the three and nine months ended September 30, 2014, respectively. The changes were primarily the result of fluctuations in foreign currency exchange rates for the corresponding periods.

Incurring losses and LAE decreased by 2.6% to \$370.8 million for the three months ended September 30, 2015 compared to \$380.6 million for the three months ended September 30, 2014, primarily due to decreases in current year attritional losses of \$21.3 million resulting primarily from the impact of the decline in premiums earned, partially offset by a \$21.6 million loss from the explosion at the Chinese port of Tianjin. Current year catastrophe losses were \$17.2 million for the three months ended September 30, 2015, primarily related to the 2015 Chilean earthquake (\$17.4 million). The current year catastrophe losses of \$14.7 million for the three months ended September 30, 2014 were due to the Hurricane Odile (\$9.9 million) and the 2014 Chilean earthquake (\$4.8 million).

Incurring losses and LAE increased by 2.3% to \$1,002.5 million for the nine months ended September 30, 2015 compared to \$980.1 million for the nine months ended September 30, 2014, primarily due to increases in current year attritional losses of \$16.9 million resulting primarily from a \$21.6 million loss from the explosion at the Chinese port of Tianjin. Current year catastrophe losses were \$35.3 million for the nine months ended September 30, 2015 and related to the 2015 Chilean earthquake (\$17.4 million), Northern Chile storms (\$9.8 million) and the New South Wales storms (\$8.0 million). The current year catastrophe losses of \$35.1 million for the nine months ended September 30, 2014 were due to the Japan snowstorm (\$13.2 million), the 2014 Chilean earthquake (\$12.1 million) and Hurricane Odile (9.9 million).

31

Commission, Brokerage, Taxes and Fees. Commission, brokerage, taxes and fees decreased by 8.9% to \$72.2 million for the three months ended September 30, 2015 compared to \$79.2 million for the three months ended September 30, 2014. The quarter over quarter decline was mainly due to the decline in earned premiums. Commission, brokerage, taxes and fees increased slightly to \$241.6 million for the nine months ended September 30, 2015 compared to \$240.6 million for the nine months ended September 30, 2014. The year over year change was primarily due to the impact of the increase in premiums earned.

Other Underwriting Expenses. Other underwriting expenses were \$57.0 million and \$50.6 million for the three months ended September 30, 2015 and 2014, respectively, and \$157.1 million and \$137.0 million for the nine months ended September 30, 2015 and 2014, respectively. The increases in other underwriting expenses were mainly due to the costs to expand the insurance operations and higher employee benefit costs.

Corporate Expenses. Corporate expenses, which are general operating expenses that are not allocated to segments, were \$1.6 million and \$4.6 million for the three months ended September 30, 2015 and 2014, respectively, and \$5.0 million and \$5.4 million for the nine months ended September 30, 2015 and 2014, respectively. The decreases were due to non-recurring employee benefit charges incurred during the third quarter of 2014.

Interest, Fees and Bond Issue Cost Amortization Expense. Interest, fees and other bond amortization expense was \$8.9 million and \$12.3 million for the three months ended September 30, 2015 and 2014, respectively, and \$26.6 million and \$28.5 million for the nine months ended September 30, 2015 and 2014, respectively. The decreases were primarily due to the combination of the maturity of \$250.0 million of senior notes in October 2014 and the issuance of \$400.0 million of senior notes in June, 2014.

Income Tax Expense (Benefit). Income tax benefit was \$7.1 million and income tax expense was \$21.7 million for the three months ended September 30, 2015 and 2014, respectively, and income tax expense was \$107.3 million and \$145.5 million for the nine months ended September 30, 2015 and 2014, respectively. Income tax expense is primarily a function of the geographic location of the Company's pre-tax income and the statutory tax rates in those jurisdictions, as affected by tax-exempt investment income. Variations in the income tax expense generally result from changes in the relative levels of pre-tax income, including the impact of catastrophe losses and net capital gains (losses), among jurisdictions with different tax rates. The changes in income tax expense/(benefit) for the three and nine months ended September 30, 2015 compared to 2014 were primarily due to higher net realized capital losses.

Net Income (Loss).

Our net loss was \$4.7 million and our net income was \$100.1 million for the three months ended September 30, 2015 and 2014, respectively, and net income was \$245.1 million and \$344.8 million for the nine months ended September 30, 2015 and 2014, respectively. The changes were primarily driven by the financial component fluctuations explained above.

Ratios.

Our combined ratio increased by 1.9 points to 91.5% for the three months ended September 30, 2015, compared to 89.6% for the three months ended September 30, 2014, and increased by 1.2 points to 88.2% for the nine months ended September 30, 2015, compared to 87.0% for the nine months ended September 30, 2014. The loss ratio component increased by 1.1 points and 0.3 points for the three and nine months ended September 30, 2015, respectively, over the same period last year primarily due to \$21.6 million of losses from the explosion at the Chinese port of Tianjin. The commission and brokerage ratio components decreased 0.7 points and 0.2 points for the three and nine months ended September 30, 2015, respectively, over the same period last year, primarily due to changes in the mix of business and changes related to affiliated quota share agreements. The other underwriting expense ratio components increased 1.5 points and 1.1 points for the three and nine months ended September 30, 2015, respectively, over the same period last year mainly due to the growth in the insurance operations.

Stockholder's Equity.

Stockholders' equity increased by \$214.5 million to \$4,787.3 million at September 30, 2015 from \$4,572.7 million at December 31, 2014, principally as a result of \$245.1 million of net income, \$10.3 million of share-based compensation transactions and \$4.8 million of net benefit plan obligation adjustments, partially offset by \$44.6 million of net foreign currency translation adjustments and \$0.9 million of net unrealized depreciation on investments, net of tax.

Consolidated Investment Results

Net Investment Income.

Net investment income decreased 24.1% to \$63.4 million for the three months ended September 30, 2015 compared to \$83.4 million for the three months ended September 30, 2014, and decreased by 4.2% to \$206.9 million for the nine months ended September 30, 2015 compared to \$215.9 million for the nine months ended September 30, 2014. These decreases were primarily due to a decrease in income from our limited partnership investments and lower income on the fixed income portfolio, partially offset by an increase in dividends from Parent's shares and interest income received from the Parent on the affiliated note receivable.

The following table shows the components of net investment income for the periods indicated:

| (Dollars in millions) | Three Months Ended September 30, | | Nine Months Ended September 30, | |

Net realized capital losses were \$121.7 million and \$0.2 million for the three months ended September 30, 2015 and 2014, respectively. For the three months ended September 30, 2015, we recorded \$185.6 million of net realized capital losses due to fair value re-measurements on equity securities and other invested assets, \$20.3 million of net realized capital losses from sales of fixed maturity and equity securities and \$10.5 million of other-than-temporary impairments, partially offset by a \$94.7 million gain on the sale of a subsidiary. The fixed maturity and equity sales for the three months ended September 30, 2015 related primarily to adjusting the portfolios for overall market changes and individual credit shifts. For the three months ended September 30, 2014, we recorded \$1.4 million of net realized

capital losses from sales of fixed maturity and equity securities, partially offset by \$1.2 million of net realized capital gains due to fair value re-measurements on fixed maturity, equity securities and other invested assets.

Net realized capital losses were \$49.2 million and net realized capital gains were \$120.9 million for the nine months ended September 30, 2015 and 2014, respectively. For the nine months ended September 30, 2015, we recorded \$56.1 million of net realized capital losses due to fair value re-measurements on fixed maturity securities, equity securities and other invested assets, \$44.3 million of net realized capital losses from sales of fixed maturity and equity securities, \$43.4 million of other-than-temporary impairments, partially offset by a \$94.7 million gain on the sale of a subsidiary. The fixed maturity and equity sales for the nine months ended September 30, 2015 related primarily to adjusting the portfolios for overall market

changes and individual credit shifts. For the nine months ended September 30, 2014, we recorded \$124.1 million of net realized capital gains due to fair value re-measurements on fixed maturity, equity securities and other invested assets, partially offset by \$3.0 million of net realized capital losses from sales of fixed maturity and equity securities and \$0.2 million of other-than-temporary impairments.

Segment Results.

The U.S. Reinsurance operation writes property and casualty reinsurance and specialty lines of business, including Marine, Aviation, Surety and A&H business, on both a treaty and facultative basis, through reinsurance brokers, as well as directly with ceding companies primarily within the U.S. The International operation writes non-U.S. property and casualty reinsurance through Everest Re's branches in Canada, Singapore and through offices in Brazil, Miami and New Jersey. The Insurance operation writes property and casualty insurance directly and through general agents, brokers and surplus lines brokers within the U.S.

These segments are managed independently, but conform with corporate guidelines with respect to pricing, risk management, control of aggregate catastrophe exposures, capital, investments and support operations. Management generally monitors and evaluates the financial performance of these operating segments based upon their underwriting results.

Underwriting results include earned premium less losses and LAE incurred, commission and brokerage expenses and other underwriting expenses. We measure our underwriting results using ratios, in particular loss, commission and brokerage and other underwriting expense ratios, which respectively, divide incurred losses, commissions and brokerage and other underwriting expenses by premiums earned.

Our loss and LAE reserves are our best estimate of our ultimate liability for unpaid claims. We re-evaluate our estimates on an ongoing basis, including all prior period reserves, taking into consideration all available information and, in particular, recently reported loss claim experience and trends related to prior periods. Such re-evaluations are recorded in incurred losses in the period in which the re-evaluation is made.

The following discusses the underwriting results for each of our segments for the periods indicated:

Premiums. Gross written premiums decreased by 11.5% to \$601.6 million for the three months ended September 30, 2015 from \$679.9 million for the three months ended September 30, 2014, primarily due to a decrease in treaty casualty and treaty property lines of business resulting from cancellation of some contracts. Net written premiums decreased by 18.8% to \$247.4 million for the three months ended September 30, 2015 compared to \$304.4 million for the three months ended September 30, 2014. The difference between the change in gross written premiums compared to the change in net written premiums was due to a varying utilization of reinsurance primarily related to affiliated quota share contracts. Premiums earned decreased 14.6% to \$235.3 million for the three months ended September 30, 2015 compared to \$275.5 million for the three months ended September 30, 2014. The change in premiums earned relative to net written premiums is primarily the result of timing; premiums are earned ratably over the coverage period whereas written premiums are recorded at the initiation of the coverage period.

Gross written premiums decreased by 2.9% to \$1,615.3 million for the nine months ended September 30, 2015 from \$1,663.3 million for the nine months ended September 30, 2014, primarily due to a decline in treaty casualty and treaty property lines of business resulting from cancellation of some contracts. Net written premiums decreased by 12.7% to \$672.8 million for the nine months ended September 30, 2015 compared to \$771.1 million for the nine months ended September 30, 2014. The difference between the change in gross written premiums compared to the change in net written premiums is primarily due to a varying utilization of reinsurance primarily related to affiliated quota share contracts. Premiums earned decreased 1.9% to \$726.1 million for the nine months ended September 30, 2015 compared to \$740.0 million for the nine months ended September 30, 2014. The change in premiums earned relative to net written premiums is primarily the result of timing; premiums are earned ratably over the coverage period whereas written premiums are recorded at the initiation of the coverage period.

Incurred losses decreased by 13.0% to \$109.1 million for the three months ended September 30, 2015 compared to \$125.5 million for the three months ended September 30, 2014, primarily due to a decrease in current year attritional losses of \$17.1 million related to the decline in earned premiums, partially offset by \$6.7 million of losses related to the explosion at the Chinese port of Tianjin. The \$0.1 million of current year catastrophe losses for the three months ended September 30, 2015 were due to the New South Wales storms. There were no current year catastrophe losses for the three months ended September 30, 2014.

Incurred losses decreased by 9.2% to \$337.1 million for the nine months ended September 30, 2015 compared to \$371.1 million for the nine months ended September 30, 2014, primarily resulting from a decrease in current year attritional losses of \$12.3 due to the impact of the decline in earned premiums partially offset by \$6.7 million of losses related to the explosion at the Chinese port of Tianjin, favorable development of \$12.6 million on prior years' attritional losses in 2015 compared to 2014 mainly related to treaty casualty and marine lines of business and favorable development of \$6.1 million on prior years' catastrophe losses in 2015 compared to 2014 mainly related to U.S. Storms. The \$0.1 million of current year catastrophe losses for the nine months ended September 30, 2015 were due to the New South Wales storms. The \$3.2 million of current year catastrophe losses for the nine months ended September 30, 2014 related to the Japan snowstorm.

Segment Expenses. Commission and brokerage decreased by 4.6% to \$48.9 million for the three months ended September 30, 2015 compared to \$51.2 million for the three months ended September 30, 2014. Commission and brokerage decreased by 1.9% to \$141.9 million for the nine months ended September 30, 2015 compared to \$144.7 million for the nine months ended September 30, 2014. This decrease was primarily due to the impact of the decrease in premiums earned and changes related to the affiliated quota share contracts.

Segment other underwriting expenses increased to \$13.7 million for the three months ended September 30, 2015 from \$12.1 million for the three months ended September 30, 2014. Segment other underwriting expenses increased to \$37.1 million for the nine months ended September 30, 2015 from \$33.1 million for the nine months ended September 30, 2014. The increases were primarily due to the impact of changes in the mix of business and higher employee benefit costs.

Premiums. Gross written premiums decreased by 10.8% to \$374.1 million for the three months ended September 30, 2015 compared to \$419.5 million for the three months ended September 30, 2014, primarily due to the decline in Latin American and Asian business and the negative impact of approximately \$29.9 million from the movement of foreign exchange rates. Net written premiums decreased by 6.3% to \$148.0 million for the three months ended September 30, 2015 compared to \$157.9 million for the three months ended September 30, 2014. The difference between the change in gross written premiums compared to the change in net written premiums is primarily due to varying utilization of reinsurance related to the quota share contracts. Premiums earned decreased 7.2% to \$135.1 million for the three months ended September 30, 2015 compared to \$145.7 million for the three months ended September 30, 2014. The change in premiums earned relative to net written premiums is primarily the result of timing; premiums are earned ratably over the coverage period whereas written premiums are recorded at the initiation of the coverage period.

Gross written premiums decreased by 16.1% to \$1,019.4 million for the nine months ended September 30, 2015 compared to \$1,214.3 million for the nine months ended September 30, 2014, primarily due to the decline in Latin American and Asian business, reductions in premiums related to quota share agreements and the negative impact of approximately \$65.1 million from the movement of foreign exchange rates. Net written premiums decreased by 6.6% to \$417.1 million for the nine months ended September 30, 2015 compared to \$446.6 million for the nine months ended September 30, 2014. The difference between the change in gross written premiums compared to the change in net written premiums is primarily due to varying utilization of reinsurance related to the quota share contracts. Premiums earned decreased 1.1% to \$433.8 million for the nine months ended September 30, 2015 compared to \$438.4 million for the nine months ended September 30, 2014. The change in premiums earned relative to net written

premiums is primarily the result of timing; premiums are earned ratably over the coverage period whereas written premiums are recorded at the initiation of the coverage period.

Incurred losses and LAE increased by 13.0% to \$128.5 million for the three months ended September 30, 2015 compared to \$113.7 million for the three months ended September 30, 2014, primarily due to the increase in current year attritional losses of \$4.4 million, mainly related to \$14.9 million of losses from the explosion at the Chinese port of Tianjin, partially offset by the impact of the decline in earned premiums. Losses also increased due to favorable

development in 2014 on both prior years' attritional and prior years' catastrophe losses which did not recur or recur to the same level in 2015. The \$17.0 million of current year catastrophe losses for the three months ended September 30, 2015 were entirely related to the 2015 Chilean earthquake. The \$14.7 million of current year catastrophe losses for the three months ended September 30, 2014 were due to Hurricane Odile (\$9.9 million) and the 2014 Chilean earthquake (\$4.8 million).

Incurred losses and LAE increased by 18.8% to \$339.9 million for the nine months ended September 30, 2015 compared to \$286.2 million for the nine months ended September 30, 2014, primarily due to the increase in current year attritional losses of \$41.2 million, mainly related to \$14.9 million of losses from the explosion at the Chinese port of Tianjin. Losses also increased due to favorable development in 2014 on both prior years' attritional and prior years' catastrophe losses which did not recur or recur to the same level in 2015. The \$35.1 million of current year catastrophe losses for the nine months ended September 30, 2015 were due to the 2015 Chilean earthquake (\$17.4 million), Northern Chile storms (\$9.8 million) and the New South Wales storms (\$7.9 million). The \$32.0 million of current year catastrophe losses for the nine months ended September 30, 2014 were due to the 2014 Chilean earthquake (\$12.1 million), the Japan snowstorm (\$10.0 million) and Hurricane Odile (\$9.9 million).

Segment Expenses. Commission and brokerage increased 17.5% to \$27.9 million for the three months ended September 30, 2015 compared to \$23.8 million for the three months ended September 30, 2014 and increased 16.0% to \$93.2 million for the nine months ended September 30, 2015 compared to \$80.3 million for the nine months ended September 30, 2014. The variances were primarily due to the impact of changes in the mix of business and changes in affiliated quota share agreements.

Segment other underwriting expenses increased slightly to \$9.1 million for the three months ended September 30, 2015 compared to \$8.8 million for the three months ended September 30, 2014, and increased slightly to \$25.3 million for the nine months ended September 30, 2015 compared to \$24.7 million for the nine months ended September 30, 2014.

Premiums. Gross written premiums increased by 33.6% to \$473.0 million for the three months ended September 30, 2015 compared to \$354.0 million for the three months ended September 30, 2014. This increase was primarily driven by increases in various lines of business as the company focused on expanding its insurance operations. Net written premiums increased by 36.2% to \$203.7 million for the three months ended September 30, 2015 compared to \$149.5 million for the three months ended September 30, 2014, which is consistent with the change in gross written premiums. Premiums earned increased 18.3% to \$175.6 million for the three months ended September 30, 2015 compared to \$148.4 million for the three months ended September 30, 2014. The change in premiums earned relative to net written premiums is the result of timing; premiums are earned ratably over the coverage period whereas written premiums are recorded at the initiation of the coverage period.

Gross written premiums increased by 27.7% to \$1,130.2 million for the nine months ended September 30, 2015 compared to \$885.0 million for the nine months ended September 30, 2014. This increase was primarily driven by an increase in various lines of business as the company focused on expanding its insurance operations. Net written premiums increased by 26.8% to \$490.1 million for the nine months ended September 30, 2015 compared to \$386.7 million for the nine months ended September 30, 2014, which is consistent with the change in gross written premiums. Premiums earned increased 12.1% to \$428.7 million for the nine months ended September 30, 2015 compared to \$382.4 million for the nine months ended September 30, 2014. The change in premiums earned relative to net written premiums is the result of timing; premiums are earned ratably over the coverage period whereas written premiums are recorded at the initiation of the coverage period.

Incurred losses and LAE decreased by 5.8% to \$133.2 million for the three months ended September 30, 2015 compared to \$141.4 million for the three months ended September 30, 2014, mainly due to a decrease of \$8.6 million in current year attritional losses related to impacts from affiliated quota share agreements. There were no current year catastrophe losses for the three months ended September 30, 2015 and 2014.

Incurred losses and LAE increased by 0.8% to \$325.5 million for the nine months ended September 30, 2015 compared to \$322.8 million for the nine months ended September 30, 2014, mainly due to an increase of \$14.5 million in prior years' attritional losses related primarily to run-off excess casualty business, partially offset by a decline of \$12.0 million in current year attritional losses related to impacts from affiliated quota share agreements. There were no current year catastrophe losses for the nine months ended September 30, 2015 and 2014.

Segment Expenses. Commission and brokerage decreased to (\$4.7) million for the three months ended September 30, 2015 compared to \$4.2 million for the three months ended September 30, 2014 and decreased to \$6.5 million for the nine months ended September 30, 2015 compared to \$15.5 million for the nine months ended September 30, 2014. These decreases were primarily driven by changes in the mix of business and impacts from affiliated quota share agreements.

Segment other underwriting expenses increased to \$34.1 million for the three months ended September 30, 2015 compared to \$29.7 million for the three months ended September 30, 2014. Segment other underwriting expenses increased to \$94.7 million for the nine months ended September 30, 2015 compared to \$79.3 million for the nine months ended September 30, 2014. The increases were primarily due to the impact of the increases in premiums earned and increased focus on the insurance operations.

Market Sensitive Instruments.

The SEC's Financial Reporting Release #48 requires registrants to clarify and expand upon the existing financial statement disclosure requirements for derivative financial instruments, derivative commodity instruments and other financial instruments (collectively, "market sensitive instruments"). We do not generally enter into market sensitive instruments for trading purposes.

Our current investment strategy seeks to maximize after-tax income through a high quality, diversified, taxable and tax-preferenced fixed maturity portfolio, while maintaining an adequate level of liquidity. Our mix of taxable and tax-preferenced investments is adjusted periodically, consistent with our current and projected operating results, market conditions and our tax position. The fixed maturity securities in the investment portfolio are comprised of non-trading available for sale securities. Additionally, we have invested in equity securities.

The overall investment strategy considers the scope of present and anticipated Company operations. In particular, estimates of the financial impact resulting from non-investment asset and liability transactions, together with our capital structure and other factors, are used to develop a net liability analysis. This analysis includes estimated payout characteristics for which our investments provide liquidity. This analysis is considered in the development of specific investment strategies for asset allocation, duration and credit quality. The change in overall market sensitive risk exposure principally reflects the asset changes that took place during the period.

Interest Rate Risk. Our \$9.4 billion investment portfolio, at September 30, 2015, is principally comprised of fixed maturity securities, which are generally subject to interest rate risk and some foreign currency exchange rate risk, and some equity securities, which are subject to price fluctuations and some foreign exchange rate risk. The overall economic impact of the foreign exchange risks on the investment portfolio is partially mitigated by changes in the dollar value of foreign currency denominated liabilities and their associated income statement impact.

Interest rate risk is the potential change in value of the fixed maturity securities portfolio, including short-term investments, from a change in market interest rates. In a declining interest rate environment, it includes prepayment risk on the \$790.7 million of mortgage-backed securities in the \$5,384.4 million fixed maturity portfolio. Prepayment risk results from potential accelerated principal payments that shorten the average life and thus the expected yield of the security.

The table below displays the potential impact of market value fluctuations and after-tax unrealized appreciation on our fixed maturity portfolio (including \$382.2 million of short-term investments) for the period indicated based on upward and downward parallel and immediate 100 and 200 basis point shifts in interest rates. For legal entities with a U.S. dollar functional currency, this modeling was performed on each security individually. To generate appropriate price estimates for mortgage-backed securities, changes in prepayment expectations under different interest rate environments were taken into account. For legal entities with non-U.S. dollar functional currency, the effective duration of the involved portfolio of securities was used as a proxy for the market value change under the various interest rate change scenarios.

We had \$7,878.1 million and \$7,843.9 million of gross reserves for losses and LAE as of September 30, 2015 and December 31, 2014, respectively. These amounts are recorded at their nominal value, as opposed to present value, which would reflect a discount adjustment to reflect the time value of money. Since losses are paid out over a period of time, the present value of the reserves is less than the nominal value. As interest rates rise, the present value of the reserves decreases and, conversely, as interest rates decline, the present value increases. These movements are the opposite of the interest rate impacts on the fair value of investments. While the difference between present value and nominal value is not reflected in our financial statements, our financial results will include investment income over time from the investment portfolio until the claims are paid. Our loss and loss reserve obligations have an expected duration that is reasonably consistent with our fixed income portfolio.

Equity Risk. Equity risk is the potential change in fair and/or market value of the common stock and preferred stock portfolios arising from changing prices. Our equity investments consist of a diversified portfolio of individual securities. The primary objective of the equity portfolio is to obtain greater total return relative to bonds over time through market appreciation and income.

The table below displays the impact on fair/market value and after-tax change in fair/market value of a 10% and 20% change in equity prices up and down for the periods indicated.

| (Dollars in millions) | Impact of Percentage Change in Equity Fair/Market Values | | | | |
|---|--|------------|------------|------------|------------|
| | At September 30, 2015 | | | | |
| | -20% | -10% | 0% | 10% | 20% |
| Fair/Market Value of the Equity Portfolio | \$ 959.5 | \$ 1,079.4 | \$ 1,199.3 | \$ 1,319.3 | \$ 1,439.2 |
| After-tax Change in Fair/Market Value | (155.9) | (78.0) | - | 78.0 | 155.9 |

Foreign Exchange Risk. Foreign currency risk is the potential change in value, income and cash flow arising from adverse changes in foreign currency exchange rates. Each of our non-U.S. ("foreign") operations maintains capital in the currency of the country of its geographic location consistent with local regulatory guidelines. Each foreign operation may conduct business in its local currency, as well as the currency of other countries in which it operates. The primary foreign currency exposures for these foreign operations are the Singapore and Canadian Dollars. We mitigate foreign exchange exposure by generally matching the currency and duration of our assets to our corresponding operating liabilities. In accordance with FASB guidance, we translate the assets, liabilities and income

of non-U.S. dollar functional currency legal entities to the U.S. dollar. This translation amount is reported as a component of other comprehensive income. As of September 30, 2015, there has been no material change in exposure to foreign exchange rates as compared to December 31, 2014.

SAFE HARBOR DISCLOSURE

This report contains forward-looking statements within the meaning of the U.S. federal securities laws. We intend these forward-looking statements to be covered by the safe harbor provisions for forward-looking statements in the federal securities laws. In some cases, these statements can be identified by the use of forward-looking words such as "may", "will", "should", "could", "anticipate", "estimate", "expect", "plan", "believe", "predict", "potential" and "intend". Forward-looking statements contained in this report include information regarding our reserves for losses and LAE, the adequacy of our provision for uncollectible balances, estimates of our catastrophe exposure, the effects of catastrophic events on our financial statements and the ability of our subsidiaries to pay dividends.

Forward-looking statements only reflect our expectations and are not guarantees of performance. These statements involve risks, uncertainties and assumptions. Actual events or results may differ materially from our expectations. Important factors that could cause our actual events or results to be materially different from our expectations include those discussed under the caption ITEM 1A, "Risk Factors" in the Company's most recent 10-K filing. We undertake no obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or otherwise.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market Risk Instruments. See "Market Sensitive Instruments" in PART I – ITEM 2.

ITEM 4. CONTROLS AND PROCEDURES

As of the end of the period covered by this report, our management carried out an evaluation, with the participation of the Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")). Based on their evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act are recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Our management, with the participation of the Chief Executive Officer and Chief Financial Officer, also conducted an evaluation of our internal control over financial reporting to determine whether any changes occurred during the quarter covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. Based on that evaluation, there has been no such change during the quarter covered by this report.

PART II

ITEM 1. LEGAL PROCEEDINGS

In the ordinary course of business, the Company is involved in lawsuits, arbitrations and other formal and informal dispute resolution procedures, the outcomes of which will determine the Company's rights and obligations under insurance and reinsurance agreements. In some disputes, the Company seeks to enforce its rights under an agreement or to collect funds owing to it. In other matters, the Company is resisting attempts by others to collect funds or enforce alleged rights. These disputes arise from time to time and are ultimately resolved through both informal and formal means, including negotiated resolution, arbitration and litigation. In all such matters, the Company believes that its positions are legally and commercially reasonable. The Company considers the statuses of these proceedings when determining its reserves for unpaid loss and loss adjustment expenses.

Aside from litigation and arbitrations related to these insurance and reinsurance agreements, the Company is not a party to any other material litigation or arbitration.
