Form 10-Q
May 14, 2003

**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549**

FORM 10-Q

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934**

For the Quarterly Period Ended March 31, 2003

Commission File Number 0-23078

MAPINFO CORPORATION

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of
Incorporation or organization)

06-1166630

(I.R.S. Employer
Identification No.)

**One Global View
Troy, New York 12180**

(Address of principal executive offices and zip code)

Registrant's telephone number, including area code: **(518) 285-6000**

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant is an accelerated filer (as defined in Exchange Act Rule 12b-2). *Yes No

* The registrant is not required to determine whether it is an accelerated filer until the completion of its fiscal year ending September 30, 2003.

The number of shares outstanding of the registrant's common stock, \$.002 par value per share, as of May 6, 2003 was 15,405,362.

The Company acquired furniture and fixtures of \$733 thousand and \$-0- in the six months ended March 31, 2003 and 2002, respectively, under capital lease obligations.

See accompanying notes.

MapInfo Corporation and Subsidiaries
Notes to Financial Statements

(unaudited)

1. Basis of Presentation

In the opinion of management, the accompanying balance sheets and related income statements and statements of cash flows include all adjustments (consisting only of normal recurring items) necessary for their fair presentation. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Actual results could differ from those estimates. The results of operations for the interim period are not necessarily indicative of the results of operations for the full year.

The September 30, 2002 balance sheet data was derived from audited financial statements, but does not include all disclosures required by generally accepted accounting principles.

2. Earnings Per Share (EPS)

The following table represents the reconciliation of the basic and diluted earnings per share amounts for the three and six months ended March 31, 2003 and 2002.

Edgar Filing: MAPINFO CORP - Form 10-Q

	Three months Ended March 31,		Six months Ended March 31,	
	2003	2002	2003	2002
	(In thousands, except per share data)			
Net income (loss)	\$ (742)	\$ (348)	\$ (2,631)	\$ (1,935)
Weighted average shares for basic EPS	15,240	15,010	15,192	14,971
Effect of dilutive stock options	-	-	-	-
Weighted average shares and assumed exercise of stock options for diluted EPS	15,240	15,010	15,192	14,971
Basic EPS	\$ (0.05)	\$ (0.02)	\$ (0.17)	\$ (0.13)
Diluted EPS	\$ (0.05)	\$ (0.02)	\$ (0.17)	\$ (0.13)

The impact of stock options for the three and six months ended March 31, 2003 and March 31, 2002 was anti-dilutive and therefore was excluded from the calculation. If the impact of stock options had not been anti-dilutive, the effect of dilutive stock options would have been 10 thousand shares and 40 thousand shares for the three and six months ended March 31, 2003, and 398 thousand shares and 448 thousand shares for the three and six months ended March 31, 2002, respectively. Potentially dilutive stock options of 2,470 thousand shares and 2,203 thousand shares were anti-dilutive for the three and six months ended March 31, 2003, and 848 thousand shares and 847 thousand shares were anti-dilutive for the three and six months ended March 31, 2002, respectively.

MapInfo Corporation and Subsidiaries

3. Comprehensive Income

Comprehensive loss was as follows:

	Three months Ended March 31,		Six months Ended March 31,	
	2003	2002	2003	2002
	(In thousands)		(In thousands)	
Net income (loss)	\$ (742)	\$ (348)	\$ (2,631)	\$ (1,935)

Change in accumulated translation adjustments	322	(191)	251	(217)
	<u> </u>	<u> </u>	<u> </u>	<u> </u>
Total comprehensive income (loss)	\$ (420)	\$ (539)	\$ (2,380)	\$ (2,152)
	<u> </u>	<u> </u>	<u> </u>	<u> </u>

4. Derivative Instruments and Hedging Activities

In order to reduce exposure to movements in interest rates, in January 2003, the Company entered into an interest rate swap agreement to convert its variable rate mortgage loan to a fixed rate. The agreement involves the exchange of fixed and floating interest rate payments over the 10-year life of the loan. Under SFAS No. 133, this contract will not require "special" or "hedge" accounting. The variable interest rate on the mortgage loan is the 30-day LIBOR rate plus 2.25%. The interest rate swap has fixed the effective interest rate that the Company will pay at 6.82%. The impact of the fluctuations in interest rates on the interest rate swap agreement will be naturally offset by the opposite impact on the related mortgage debt. The Company records the payments or receipts on the agreement as adjustments to interest expense.

5. Segment Information

The Company's operations involve the design, development, marketing, licensing and support of software and data products, application development tools, and industry-specific solutions, together with a range of consulting, training and technical support services.

The Company conducts business globally and is managed geographically. In addition, the Company has organized its sales, marketing and certain engineering activities in three Strategic Business Units, discussed below. The Company's management relies on an internal management accounting system. This system includes revenue and cost information by geographic location. Revenues are attributed to a geographic location based on the origination of the order from the customer. The Company's management makes financial decisions and allocates resources based on the information it receives from this internal system. Based on the criteria set forth in SFAS No. 131, the Company has reportable segments by geography: the Americas, EAME (Europe, Africa and the Middle East) and Asia-Pacific, as well as by business unit: location-based intelligence ("LBI"), predictive analytics, (formerly analytical customer-relationship management - "aCRM"), and location-based services ("LBS").

MapInfo Corporation and Subsidiaries
Notes to Financial Statements - Continued

(unaudited)

5. Segment Information (continued)

Geographic Segments

Edgar Filing: MAPINFO CORP - Form 10-Q

Summarized financial information by geographic segment for the three and six months ended March 31, 2003 and 2002, as taken from the internal management accounting system discussed above, is as follows:

	Three Months Ended March 31,		Six Months Ended March 31,	
	2003	2002	2003	2002
Net revenues:	(In thousands)		(In thousands)	
Americas	\$ 14,631	\$ 12,784	\$ 25,242	\$ 25,555
EAME	9,139	7,982	16,631	15,045
Asia-Pacific	3,333	2,712	6,092	5,670
Total net revenues	\$ 27,103	\$ 23,478	\$ 47,965	\$ 46,270
Operating income (loss):				
Americas	\$ 1,629	\$ 2,941	\$ 2,134	\$ 4,861
EAME	2,822	2,318	4,419	3,886
Asia-Pacific	1,344	570	2,349	1,204
Corporate adjustments:				
R&D	(3,578)	(3,722)	(7,073)	(7,370)
Marketing	(1,786)	(1,800)	(3,578)	(3,748)
G&A	(1,915)	(936)	(2,922)	(1,988)
Total operating income (loss)	\$ (1,484)	\$ (629)	\$ (4,671)	\$ (3,155)

The operating income by segment above differs from the amounts presented under accounting principles generally accepted in the United States of America because the Company does not allocate certain costs for research and development, marketing, and general and administrative activities to the geographic locations. The table above reconciles the operating income (loss) by geographic segment to operating loss as reported on the Income Statements by including adjustments for certain unallocated costs.

Strategic Business Units

The Company has organized its sales, marketing, and certain engineering activities into three Strategic Business Units ("SBUs"). The three SBUs are: Location Based Intelligence ("LBI"), Predictive Analytics and Location Based Services ("LBS"). The SBUs were designed to focus the Company's primary operating resources (sales, marketing and certain engineering functions) on specific customer needs.

MapInfo Corporation and Subsidiaries
Notes to Financial Statements - Continued

(unaudited)

5. Segment Information (continued)

The Company's financial reporting systems present various data for management reporting purposes, including SBU-specific internal profit and loss statements, on a basis not consistent with accounting principles generally accepted in the United States of America. This information relating to the SBUs was not available prior to April 1, 2002. In addition, assets are not allocated to SBUs for internal financial reporting.

The accounting methodology for each income statement category is noted below:

Net Revenues - Net Revenues are recorded based on sales to SBU defined customers with the following exception: Predictive Analytics revenues are only recorded in the Americas. Predictive Analytics revenues in EAME and Asia-Pacific are recorded as LBI revenues.

Cost of Revenues - Cost of revenues are allocated to the SBUs based on the product and services revenues generated by each SBU.

Research and Development (R&D)

- R&D resources that are engaged in projects directly related to and managed by SBU management are recorded within the SBU. The corporate R&D initiatives support all three SBUs. Corporate R&D costs are allocated to the SBUs based on the SBU's core product revenue relative to total company core product revenue.

Selling and Marketing (S&M)

- Each SBU has its own S&M departments. All selling costs within the Company are directly charged to the appropriate SBU. Marketing costs directly managed by the SBU are recorded within the SBU. Product management costs are allocated to the SBUs based on the SBU's core product revenue relative to total company core product revenue. All other marketing costs are classified as corporate costs and are allocated to the SBUs based on the percentage of the SBU's total revenues relative to total company revenues.

General and Administrative (G&A)

- G&A costs, which include executive management, finance, accounting, information technology, human resources and amortization of intangible assets, are allocated to the SBUs based on the SBU's headcount relative to total company headcount.

MapInfo Corporation and Subsidiaries
Notes to Financial Statements - Continued

(unaudited)

5. Segment Information (continued)

As discussed above, segment information relating to the SBUs was not available for the three and six months ended March 31, 2002. Summarized financial information by SBU operating segment for the three and six months ended March 31, 2003, as taken from the internal management accounting system discussed above, is as follows:

	Three months ended March 31, 2003	Six months ended March 31, 2003
Revenue:	(In thousands)	
LBI	\$ 20,693	\$ 38,759
Predictive Analytics	6,096	8,778

LBS	(1,367)	(2,938)
	<hr/>	<hr/>
Total operating loss	\$ (1,484)	\$ (4,671)
	<hr/>	<hr/>

6. Commitments and Contingencies

In December 2001, the Company entered into a mortgage loan and other related agreements with a commercial bank to finance construction of a 150,000 square foot office building in Troy, New York and the related land lease. The financing arrangement provided for approximately \$14.0 million in construction financing and was convertible into a term loan upon completion of the construction. During the first quarter of fiscal year 2003, the Company borrowed \$4.6 million under this construction mortgage loan, bringing the total principal balance to \$15.1 million, and converted the entire mortgage to a ten-year term loan. Principal and interest, at a rate of LIBOR plus 2.25%, is payable monthly.

In January 2003, the Company borrowed \$3.0 million under a one-year revolving credit facility with a commercial bank. In March 2003, the Company converted this obligation into a forty-two month term loan. Principal outstanding under this term loan is payable monthly in forty-two equal installments along with interest at a rate of LIBOR plus 1.75%.

MapInfo Corporation and Subsidiaries
Notes to Financial Statements - Continued

(unaudited)

6. Commitments and Contingencies (continued)

Legal Proceedings

On August 5, 2002, the Company filed an action against Spatial Re-Engineering Consultants ("SRC"), a former MapInfo reseller, in the United States District Court for the Northern District of New York to collect approximately \$100 thousand in receivables owed by SRC to the Company under contractual obligations. SRC answered and asserted fifteen counterclaims against the Company, seeking a total of \$11.0 million dollars in damages. The counterclaims include allegations of breach of contract and copyright infringement. The District Court dismissed one counterclaim upon the Company's motion and SRC voluntarily withdrew a second counterclaim; thirteen counterclaims remain. In its pleadings on the remaining counterclaims SRC seeks a total of \$9.0 million. However, in its computation of damages made pursuant to court rules, SRC has alleged general damages of \$5.1 million, plus an unspecified amount of special damages. The Company is vigorously defending against all remaining counterclaims. The case is scheduled for court-ordered mediation in summer 2003.

7. Goodwill and Purchased Intangible Assets

In applying SFAS No. 142, the Company has performed the annual reassessment and impairment of goodwill tests required as of December 31, 2002. As a result of these annual tests, there was no indication of impairment.

The components of purchased intangible assets are as follows (in thousands):

March 31, 2003	Gross	Accumulated Amortization	Net	Amortization Period
Technology intangibles	\$ 2,620	\$ 1,450	\$ 1,170	3 -5 years
Customer intangibles	4,250	2,081	2,169	5-10 years
Trademarks	555	-	555	Indefinite
Other	346	135	211	3-5 years

	<hr/>	<hr/>	<hr/>	

MapInfo Corporation and Subsidiaries
Notes to Financial Statements - Continued

(unaudited)

7. Goodwill and Purchased Intangible Assets (continued)

Amortization of purchased intangible assets for the three months ended March 31, 2003 and March 31, 2002 was \$325 thousand and \$286 thousand, respectively. Amortization of purchased intangible assets for the six months ended March 31, 2003 and March 31, 2002 was \$523 thousand and \$559 thousand, respectively.

The estimated future amortization expense of purchased intangible assets is as follows (in thousands):

Fiscal year	Amount
2003	\$ 1,127
2004	1,122
2005	656
2006	433
2007	387

8. Stock Based Compensation

The Company has two stock-based employee compensation plans, which are described more fully in Note 12 of the Notes to Consolidated Financial Statements in the Company's Form 10-K for the fiscal year ended September 30, 2002. SFAS No. 123, Accounting for Stock-Based Compensation, requires the measurement of the fair value of stock options or warrants granted to employees to be included in the statement of operations or, alternatively, disclosed in the notes to consolidated financial statements. The Company accounts for stock-based compensation of employees under the intrinsic value method of Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees, and related interpretations and has elected the disclosure-only alternative under SFAS No. 123. The Company does not intend to adopt the transition provisions of SFAS No. 148, Accounting for Stock-Based Compensation-Transition and Disclosure.

9. Recent Accounting Pronouncements

In June 2002, the Financial Accounting Standards Board (the "FASB") issued Statement No. 146, "Accounting for Costs Associated with Exit or Disposal Activities" ("SFAS No. 146"), which replaces Emerging Issues Task Force ("EITF") Issue No. 94-3, "Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)." Under SFAS No. 146, liabilities for costs associated with an exit or disposal activity are to be recognized when the liability is incurred. Under EITF Issue No. 94-3, liabilities related to exit or disposal activities were recognized when an entity committed to an exit plan. In addition, SFAS No. 146 establishes that the objective for the initial measurement of the liability is fair value. SFAS No. 146 is effective for exit or disposal activities initiated after December 31, 2002. The Company does not expect this statement to have a material impact on its financial statements.

In November 2002, the FASB issued Interpretation No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others" ("FIN 45"). FIN 45 elaborates on the disclosures to be made by a guarantor in its interim and annual financial statements about its obligations under certain guarantees that it has issued. It also clarifies that a guarantor is required to recognize, at the inception of a guarantee, a liability for the fair value of the obligation undertaken in issuing the guarantee. FIN 45 does not prescribe a specific approach for subsequently measuring the guarantor's recognized liability over the term of the related guarantee. It also incorporates without change, the guidance in FASB Interpretation No. 34, "Disclosure of Indirect Guarantees of Indebtedness of Others", which is being superseded. The initial recognition and initial measurement provisions of FIN 45 are

MapInfo Corporation and Subsidiaries
Notes to Financial Statements - Continued

9. Recent Accounting Pronouncements (continued)

applicable on a prospective basis to guarantees issued or modified after December 31, 2002, irrespective of the guarantor's fiscal year-end. The adoption of this statement does not have a material impact on the Company's financial statements. The disclosure requirements in FIN 45 are effective for financial statements of interim or annual periods ending after December 15, 2002. Subject to certain limitations, the Company provides indemnification to its customers against any damages, liabilities, costs and expenses arising out of any claim that a MapInfo product infringes upon the intellectual property right of a third party. To date, the Company has not paid any amounts to customers pursuant to these indemnification provisions.

In December 2002, the FASB issued FAS No. 148 "Accounting for Stock Based Compensation-Transition and Disclosure - an amendment of FAS 123". This Statement amends FAS 123, "Accounting for Stock-Based Compensation" to provide alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation. In addition, this Statement amends the disclosure requirements of Statement 123 to require prominent disclosures in both annual and interim financial statements about the method used on reported results. The Statement has varying effective dates commencing with interim periods beginning after December 15, 2002. The adoption of SFAS No. 148 did not have a material impact on the Company's financial position or results of operations.

In January 2003, the FASB issued FASB Interpretation No. 46, "Consolidation of Variable Interest Entities" ("FIN 46"). This interpretation explains how to identify variable interest entities and how an enterprise assesses its interest in a variable interest entity to decide whether to consolidate that entity. This interpretation requires existing unconsolidated variable interest entities to be consolidated by their primary beneficiaries if the entities do not effectively disperse risks among parties involved. Variable interest entities that effectively disperse risks will not be consolidated unless a single party holds an interest or combination of interest that effectively recombines risks that were previously dispersed. This interpretation applies immediately to variable interest entities created after January 31, 2003, and to variable interest entities in which an enterprise obtains an interest after that date. It applies in the first fiscal year or interim period beginning after June 15, 2003, to variable interest entities in which an enterprise holds a variable interest that it acquired before February 1, 2003. The adoption of FIN 46 is not expected to have a material effect on the Company's financial position or results of operations.

10. Acquisition

On January 6, 2003 the Company acquired substantially all of the assets and assumed certain liabilities of Thompson Site Selection Research, Inc., ("Thompson"), a privately held company headquartered in Ann Arbor, Michigan. Thompson is a provider of location-based analytical services and business intelligence software for the retail, restaurant and real estate sectors. The Company expects the acquisition to strengthen its presence in these sectors. The purchase price was \$13.5 million, including acquisition-related costs. In addition, the Company may pay up to \$6.0 million in contingent consideration to Thompson based on Thompson's profitability over the next two years. The purchase was financed with \$9.9 million in cash on hand, \$3.0 million in borrowings under the Company's bank credit facility, and \$556 thousand in cash on hand, that was paid in April 2003, which was the result of the closing balance sheet working capital adjustment. The total of Thompson's net assets acquired by the Company was \$2.6 million. Goodwill recorded as a result of the acquisition totaled \$7.9 million. Intangibles assets acquired, other than goodwill, totaled \$3.0 million. Of the \$3.0 million of acquired intangible assets, \$555 thousand was assigned to registered trademarks that are not subject to amortization. The remaining \$2.4 million of acquired intangible assets have a weighted-average useful life of approximately 6 years. The intangible assets that make up the \$2.4 million include: technology intangibles of \$1.2 million (6-year weighted average useful life), customer intangibles of \$1.1 million (7-year weighted average useful life), and other assets of \$185 thousand (3-year weighted average useful life). The acquisition is being accounted for as a purchase and, accordingly the Company has included the results of operations in the financial statements effective January 6, 2003. Ninety-three employees of Thompson became employees of MapInfo upon the acquisition.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Results of Operations

Overview

MapInfo Corporation ("MapInfo" or the "Company") designs, develops, licenses, markets and supports location-based software and data products, application development tools and industry-focused solutions. The Company also provides related consulting, training and technical support services. Products and services are sold through multiple distribution channels, including a corporate account sales force, a telemarketing sales group, and an indirect channel of value-added resellers and distributors. The Company's products are translated into 20 languages and sold in 60 countries throughout the world. MapInfo markets its products worldwide through sales offices in North America, the United Kingdom, Germany, and Australia, and in the rest of Europe and the Asia-Pacific region through exclusive and non-exclusive distribution relationships.

In support of its profitability objectives, the Company reduced operating costs during the second quarter of fiscal year 2003. A total of \$4.8 million in annualized operating cost savings were realized during the quarter on the Company's base business, excluding Thompson. As a result of these reductions, actual total company headcount, excluding 93 employees that were added as a result of the Thompson acquisition (discussed above) was 631 compared to 681 at September 30, 2002.

Forward-Looking Statements

This Form 10-Q, including this Management's Discussion and Analysis of Financial Condition and Results of Operations, contains forward-looking statements regarding future events and our future results that are based on current expectations, estimates, forecasts, and projections about the industries in which MapInfo operates and the beliefs and assumptions of the Company's management. In this Management's Discussion and Analysis of Financial Condition and Results of Operations, any statements that are not statements of historical fact may be deemed to be forward-looking statements, including but not limited to statements as to the sufficiency of funds to meet operating

requirements for the next 12 months, as to the Company's expansion of facilities in Troy, New York and the projected vacancy rate of those facilities, as to the impact of the Company's operating-cost reduction measures, as to the intended use of the common stock repurchased under the common stock repurchase program, as to the potential impact of certain accounting pronouncements on the Company's future financial reports and results and as to the impact of the Thompson acquisition. Without limiting the foregoing, the words "believes," "anticipates," "plans," "expects," and similar expressions are intended to identify forward-looking statements. Readers are cautioned that these forward-looking statements are only predictions and are subject to risks, uncertainties and assumptions that are difficult to predict. Therefore, actual results may differ materially and adversely from those expressed in any forward-looking statements. Readers should review carefully the risks and uncertainties identified below under the caption "Outlook: Issues and Risks". We undertake no obligation to revise or update publicly any forward-looking statements for any reason.

Critical Accounting Policies and Estimates

The Company's discussion and analysis of its financial condition and results of operation are based on its consolidated financial statements, prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires management to make estimates and judgments that affect the amounts reported for assets, liabilities, revenues and expenses, and the disclosure of contingent liabilities. Management evaluates these estimates, including those related to product returns, bad debts, inventories, investments, intangible assets, goodwill, income taxes, restructuring, contingencies and litigation, on an on-going basis. The estimates are based on historical experience and on various assumptions that management believes are reasonable. When the basis for carrying values of assets and liabilities are not apparent from other sources, they are determined from these estimates. The Company's actual results may differ from these estimates under different conditions or assumptions.

The Company believes the following critical accounting policies affect its more significant judgments and estimates used in the preparation of its consolidated financial statements:

- The Company records reductions to revenue for estimated product returns. The Company maintains an allowance for doubtful accounts for estimated losses resulting from the inability of its customers to make required payments. If the financial condition of MapInfo's customers were to deteriorate, resulting in their inability to make payments, an additional allowance might be recognized.
- The Company recognizes revenue in accordance with Statement of Position ("SOP") 97-2, "Software Revenue Recognition", and SOP 98-9, "Software Revenue Recognition with Respect to Certain Transactions". In accordance with SOP 97-2, the Company recognizes revenue when persuasive evidence of an arrangement exists, delivery of the product has occurred, no significant obligations remain, the fee is fixed or determinable and collectibility is probable. Revenue earned on software arrangements involving multiple elements is allocated to each element based on the relative fair value of each element. In general, revenue related to postcontract customer support is deferred and recognized ratably over the term of the agreement. Revenue from customer training, support and other services is recognized upon completion of the service performed.
- MapInfo writes down its inventory for estimated obsolescence or unmarketable inventory equal to the difference between the cost of inventory and the estimated market value. Estimated market value is based upon management's assumptions about future demand and market conditions. If actual market conditions are less favorable than those projected by management, additional inventory write-downs may be necessary.
- Other intangible assets are amortized on a straight-line basis over the estimated useful lives of three to ten years, with the exception of certain trademarks, which have been determined to have an indefinite useful life and therefore are not subject to amortization. The Company reviews its intangible assets for impairment

whenever events or changes in circumstances indicate that the carrying value of the assets may not be recoverable. Management's determination of impairment is based on its estimates of future cash flows. If an intangible asset is considered to be impaired, the amount of the impairment will equal the excess of the carrying value over the fair value of the asset.

- Effective October 1, 2001, the Company adopted Statement of Financial Accounting Standard No. 142, "Goodwill and Other Intangible Assets" ("SFAS 142"). In accordance with SFAS 142, the Company does not amortize goodwill. The Company tests goodwill for impairment on an annual basis or when a triggering event occurs and writes down goodwill if it is determined that the asset has been impaired.
- MapInfo holds minority interests in companies having operations or technology in areas within its strategic focus. The Company records an investment impairment charge when an investment has experienced a decline in value that the Company believes is not temporary. Future adverse changes in market conditions or poor operating results of underlying investments could result in losses or an inability to recover the carrying value of the investments that may not be reflected in an investment's current carrying value. This may require an impairment charge in the future.
- The Company has established a valuation allowance to reserve a portion of the net deferred tax assets representing foreign tax credit carryforwards. There is no valuation allowance recorded against the Company's remaining net deferred tax assets as the Company believes it is more likely than not that all remaining future tax benefits will be realized against future taxable income. However, the amount of deferred tax assets considered realizable could be reduced in the future if estimates of future taxable income are reduced.

Net Revenues

For the second quarter of fiscal 2003, revenues increased 15% or \$3.6 million to \$27.1 million from \$23.5 million in the same period a year ago. The January 6, 2003 acquisition of Thompson accounted for \$3.3 million of the revenue increase during the second quarter. Approximately \$2.9 million of the \$3.6 million increase was attributable to increased revenues from services, primarily due to Thompson, which added \$2.5 million in services revenue in the second quarter. Software revenues increased by \$712 thousand, or 6%, while data revenues were flat compared to the second quarter of the prior year. On a geographic basis, revenues in the Americas increased \$1.8 million or 14% compared to the same period a year ago, inclusive of Thompson revenue of \$3.3 million. Excluding Thompson, Americas revenue decreased compared to prior year due to slowing in the rate of new customer acquisition, that the Company believes is a result of overall reduced IT spending in the American economy. Europe revenues increased \$1.2 million, or 14% and revenues in Asia-Pacific increased \$621 thousand, or 23%, when compared to the same period a year ago. The strengthening of foreign currencies against the U.S. dollar added \$1.2 million to second quarter 2003 revenue compared to the prevailing exchange rates in the comparable period from the prior year. On a strategic business unit basis, revenue attributed to the Location Based Intelligence ("LBI") business unit was \$20.7 million, revenue attributed to the Predictive Analytics (formerly aCRM) business unit, inclusive of Thompson, was \$6.1 million and revenue attributed to the Location Based Services ("LBS") business unit was \$314 thousand for the second quarter of fiscal year 2003. Approximately \$3.3 million of the revenues attributed to the Predictive Analytics segment were due to Thompson.

For the first half of fiscal 2003, revenues increased 4% or \$1.7 million to \$48.0 compared to \$46.3 million in the prior year. The acquisition of Thompson in January 2003 resulted in revenue of \$3.3 million in fiscal 2003. The increase was mainly attributable to Thompson offset by \$2.1 decrease in data revenue, which was primarily the result of reduced spending from telecommunication companies in the Americas. Revenues in Europe and Asia Pacific increased 11% and 7%, respectively. The strengthening of foreign currencies against the U.S. dollar added \$1.8 million to revenue for the first half of fiscal 2003 compared to the prevailing exchange rates in the prior year

comparable period. On a strategic business unit basis, revenue attributed to the LBI business unit was \$38.8 million, revenue attributed to the Predictive Analytics business unit, inclusive of Thompson, was \$8.8 million and revenue attributed to the LBS business unit was \$428 thousand for the first half of fiscal year 2003. The Company has experienced a slower rate of adoption of its LBS technology than previously anticipated due to delays in customer implementations.

Cost of Revenues, Operating Expenses and Income Taxes

Cost of revenues as a percentage of revenues increased to 30.0% in the second quarter of 2003 from 26.6% in the same period a year ago. As a result, the gross profit margin decreased to 70.0% from 73.4%. For the first half of fiscal 2003, cost of revenues increased to 29.1% of revenues from 27.0% in the prior year. As a result, the gross profit margin decreased to 70.9% from 73.0%. The lower margins are primarily attributable to increased services revenue, which generate a lower gross profit margin, due to the Thompson acquisition.

Research and development (R&D) expenses increased 2% to \$5.2 million in the second quarter of fiscal 2003 from \$5.1 million in the prior year period. For the first half of fiscal 2003 R&D expenses decreased 2% to \$10.1 million from \$10.3 million in fiscal year 2002. Thompson's R&D expenses were \$250 thousand in the quarter and year-to-date. Offsetting the increase due to Thompson, were decreases in R&D expenses primarily the result of headcount reductions beginning in the third quarter of the prior fiscal year. R&D headcount, excluding Thompson, was 192 at the end of the second quarter of fiscal 2003 compared to 201 at the end of the second quarter in the prior year. As a percentage of revenues, R&D expenses decreased to 19.3% in the second quarter of fiscal 2003 compared to 21.8% in the prior year comparable period. R&D expenses were 21.0% of revenues in the first half of fiscal 2003 compared to 22.2% in 2002.

Selling and marketing expenses increased 11% in the second quarter of fiscal year 2003 to \$10.5 million from \$9.4 million in the second quarter of fiscal 2002. For the first half of fiscal 2003 selling and marketing expenses increased 3% to \$20.3 million from \$19.8 million in fiscal year 2002. Thompson's selling and marketing expenses were \$853 thousand for the second quarter and year-to-date. The increase in selling and marketing expenses was due primarily to the acquisition of Thompson, offset by headcount reductions and to cost savings in Japan where the Company closed its sales office during the second quarter of the prior fiscal year. Selling and marketing headcount, excluding Thompson, was 226 at the end of the second quarter of fiscal 2003 compared to 261 at the end of the second quarter in the prior year. As a percentage of revenues, selling and marketing expenses in the second quarter decreased to 38.6% from 40.2% a year ago. Selling and marketing expenses were 42.4% of revenues in the first half of fiscal 2003 compared to 42.8% in 2002.

General and administrative (G&A) expenses increased by 44% to \$4.8 million in the second quarter of fiscal 2003 from \$3.3 million in 2002. For the first half of fiscal 2003 G&A expenses increased 20% to \$8.3 million from \$6.9 million in fiscal year 2002. Thompson's G&A expenses were \$259 thousand for the second quarter and the first half of fiscal year 2003. The increase in G&A expenses was mainly attributable to severance and restructuring costs of \$926 thousand incurred during the second quarter of fiscal year 2003 and Thompson. G&A headcount, excluding Thompson, was 107 at the end of the second quarter of fiscal 2003 compared to 128 at the end of the second quarter in the prior year. As a percentage of revenues, G&A expenses in the second quarter increased to 17.5% from 14.1% in prior year period. G&A expenses were 17.3% of revenues in the first half of fiscal 2003 compared to 14.9% in 2002.

During the second quarter of fiscal year 2003, the Company reduced operating costs on its base business, excluding Thompson. Severance and restructuring costs of approximately \$1.7 million were recorded in the quarter. Of the \$1.7

million in severance and restructuring costs, \$152 thousand related to R&D, \$475 thousand related to sales and marketing, \$926 thousand related to G&A and \$120 thousand related to services. This resulted in the reduction of thirty-six regular employees, primarily in North America. As a result of these reductions and attrition, actual total company headcount, excluding Thompson headcount of 93, was 631 at March 31, 2003 compared to 681 at September 30, 2002.

Other income in the second quarter of fiscal 2003 of \$389 thousand was \$333 thousand higher than the second quarter of the prior year. The favorable variance was due to the Alps equity income in Japan of \$301 thousand in the current year versus \$63 thousand in the prior year and a foreign exchange gain in the second quarter of fiscal 2003 of \$311 thousand versus a foreign exchange loss in the prior year of \$191 thousand. In addition, the prior year also included an additional investment reserve of \$200 thousand versus zero in the current year. These increases were offset by a decrease in interest income of \$348 thousand in 2003 resulting from decreased interest rates and an increase in interest expense of \$230 thousand, primarily due to the mortgage financing and other debt that did not exist in the prior year. Other income for the first half of fiscal year 2003 of \$427 thousand was \$249 thousand higher than the prior year. This was mainly attributable to the increase in Alps equity income in Japan of approximately \$460 thousand, and foreign exchange gain in the current year of \$225 thousand versus foreign exchange losses of \$215 thousand in the prior year. The prior year also included an increase to the investment reserves of \$300 thousand versus zero in the current year. Offsetting the positive effects noted above, were the decrease in interest income of \$462 thousand, an increase in interest expense of \$369 thousand and an increase in other expense of \$122 thousand.

The effective income tax rate for the quarter ended March 31, 2003 was 32% compared to 39% in the quarter ended March 31, 2002. The effective income tax rate for the first half of fiscal 2003 was 38% versus 35% in the prior year comparable period. During the second quarter of fiscal year 2003, the Company revised its estimated effective tax rate from 40% to 38% for the total fiscal year 2003. Accordingly, the effective tax rate in the second quarter of fiscal year 2003 was 32%.

Financial Condition

The Company's cash and short-term investments totaled \$29.3 million at March 31, 2003 compared to \$36.1 million at September 30, 2002. The Company's investment portfolio consisted primarily of short-term, investment grade marketable securities.

MapInfo's long-term debt at March 31, 2003 totaled \$18.8 million, which consisted of \$15.0 million in mortgage payable, \$3.0 million in term loan payable, and \$733 thousand in capital lease financing. Additionally, the Company has a \$6.0 million credit facility with a bank that expires on March 31, 2004. As of March 31, 2003, there were no outstanding borrowings under this credit facility.

Net cash used for operating activities was \$452 thousand for the first half of fiscal 2003 compared to cash generated from operations of \$2.1 million for the same period in fiscal 2002. Cash used for operating activities in the first half of fiscal 2003 resulted primarily from, among other things, the net loss and increases in accounts receivable, offset by depreciation and amortization. Net cash used for investing activities was \$14.1 million due primarily to the Thompson acquisition of \$12.1 million and fixed asset additions of \$1.6 million (including \$904 thousand related to the Company's new facility in Troy, New York). Net cash from financing activities was \$8.4 million primarily due to mortgage proceeds of \$4.6 million, term loan proceeds of \$3.0 and proceeds from the exercise of stock options of \$1.0 million.

In July 2002, the Board of Directors authorized the Company to repurchase from time to time up to \$10.0 million of the Company's Common Stock on the open market or in negotiated transactions. The repurchase program will remain in effect until September 30, 2004, unless discontinued earlier by the Board of Directors. The Company intends to use the repurchased shares for issuance upon exercise of employee stock options, purchases under the Company's stock purchase plan, or other corporate purposes. The repurchase program will be funded using the Company's working capital. The Company purchased 7,855 shares under this program during the first half of fiscal year 2003. Under this repurchase program, the Company has purchased a total of 257,857 shares totaling approximately \$1.5 million to date.

Management believes existing cash and short-term investments together with funds generated from operations and available financing will be sufficient to meet the Company's operating and capital requirements, including any remaining purchase price payments for the acquisition of Thompson, for the next twelve months. Factors that could adversely affect the Company's financial condition include a decrease in revenues, higher than anticipated costs associated with the new facility in Troy, New York, the stock repurchase program, and failure to achieve anticipated cost savings.

New Accounting Standards

In June 2002, the Financial Accounting Standards Board (the "FASB") issued Statement No. 146, "Accounting for Costs Associated with Exit or Disposal Activities" ("SFAS No. 146"), which replaces Emerging Issues Task Force ("EITF") Issue No. 94-3, "Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)." Under SFAS No. 146, liabilities for costs associated with an exit or disposal activity are to be recognized when the liability is incurred. Under EITF Issue 94-3, liabilities related to exit or disposal activities were recognized when an entity committed to an exit plan. In addition, SFAS No. 146 establishes that the objective for the initial measurement of the liability is fair value. SFAS No. 146 is effective for exit or disposal activities initiated after December 31, 2002. The Company does not expect this statement to have a material impact on its financial statements.

In November 2002, the FASB issued Interpretation No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others" ("FIN 45"). FIN 45 elaborates on the disclosures to be made by a guarantor in its interim and annual financial statements about its obligations under certain guarantees that it has issued. It also clarifies that a guarantor is required to recognize, at the inception of a guarantee, a liability for the fair value of the obligation undertaken in issuing the guarantee. FIN 45 does not prescribe a specific approach for subsequently measuring the guarantor's recognized liability over the term of the related guarantee. It also incorporates without change, the guidance in FASB Interpretation No. 34, "Disclosure of Indirect Guarantees of Indebtedness of Others", which is being superseded. The initial recognition and initial measurement provisions of FIN 45 are applicable on a prospective basis to guarantees issued or modified after December 31, 2002, irrespective of the guarantor's fiscal year-end. The adoption of this statement does not have a material impact on the Company's financial statements. The disclosure requirements in FIN 45 are effective for financial statements of interim or annual periods ending after December 15, 2002. Subject to certain limitations, the Company provides indemnification to its customers against any damages, liabilities, costs and expenses arising out of any claim that a MapInfo product infringes upon the intellectual property right of a third party. To date, the Company has not paid any amounts to customers pursuant to these indemnification provisions.

In December 2002, the FASB issued FAS No. 148 "Accounting for Stock Based Compensation-Transition and Disclosure - an amendment of FAS 123". This Statement amends FAS 123, "Accounting for Stock-Based Compensation", to provide alternative methods of transition for a voluntary change to the fair value based method of

accounting for stock-based employee compensation. In addition, this Statement amends the disclosure requirements of Statement 123 to require prominent disclosures in both annual and interim financial statements about the method used on reported results. The Statement has varying effective dates commencing with interim periods beginning after December 15, 2002. The Company has adopted FAS No. 148 effective January 1, 2003.

In January 2003, the FASB issued FASB Interpretation No. 46, "Consolidation of Variable Interest Entities" ("FIN 46"). This interpretation explains how to identify variable interest entities and how an enterprise assesses its interest in a variable interest entity to decide whether to consolidate that entity. This interpretation requires existing unconsolidated variable interest entities to be consolidated by their primary beneficiaries if the entities do not effectively disperse risks among parties involved. Variable interest entities that effectively disperse risks will not be consolidated unless a single party holds an interest or combination of interest that effectively recombines risks that were previously dispersed. This interpretation applies immediately to variable interest entities created after January 31, 2003, and to variable interest entities in which an enterprise obtains an interest after that date. It applies in the first fiscal year or interim period beginning after June 15, 2003, to variable interest entities in which an enterprise holds a variable interest that it acquired before February 1, 2003. The adoption of FIN 46 is not expected to have a material effect on the Company's financial position or results of operations.

Outlook: Issues and Risks

In addition to the other information in this Quarterly Report on Form 10-Q, the following issues and risks, among others, should be considered in evaluating MapInfo's outlook and future.

Effect of reduced demand and uncertainties in the telecommunications industry. The telecommunications industry is experiencing consolidation of industry participants. As a result, the Company's operating results could become increasingly dependent on a smaller number of telecommunication customers. Also, recent declines in capital spending by telecommunications companies may result in a lengthening of customers' decision cycles and a reduction in orders. Revenues from telecommunication customers accounted for approximately 21% of the Company's net revenues in the second quarter and 19% during the first half of fiscal year 2003. Significant further reductions in orders from the telecommunication industry could have a material adverse effect on MapInfo's operating results and financial condition.

Effects of economic slowdown. The stock market decline and broad economic slowdown have affected the demand for software products and related services, lengthened sales cycles and decreased technology spending for many of the Company's customers and potential customers. These events adversely impacted the Company's revenues since 2001, particularly in the United States, and could have a material effect on the Company in the future, including without limitation, on the Company's future revenues and earnings.

Risks associated with cost reduction measures.

During the second quarter of fiscal year 2003, the Company restructured its operations, including decreasing headcount on its base business, excluding Thompson, by approximately thirty-six employees. During restructuring operations in fiscal year 2002, the Company had decreased headcount by approximately ninety employees. The restructuring and reductions in force could have an adverse impact on the Company's business, including its ability to attract and retain customers or employees, and the timing of release of new products and services. The Company cannot provide any assurance that restructuring will achieve the desired financial benefits, nor can the Company provide any assurance that the reduction in headcount will not have an adverse impact on its business or future

operating results.

Risks associated with the reorganization of sales, marketing and engineering activities.

During fiscal year 2002, the Company reorganized its sales, marketing, and certain engineering functions into business units and reorganized its remaining engineering activities for the purpose of increased operational efficiency. Such reorganization and restructuring could have an adverse impact on the Company's business and its ability to retain its employees. The Company cannot provide any assurance that reorganizing will achieve the desired financial benefits, nor can the Company provide any assurance that the changes will not have an adverse impact on its business or future operating results.

New products and technological change

. The mapping software and information business is characterized by extremely rapid technological change, evolving industry standards, and frequent new product introductions. These conditions require continuous expenditures on product research and development to enhance existing products and to create new products. The Company believes that the timely development of new products and continuing enhancements to existing products is essential to maintain its competitive position in the marketplace. During recent years, the Company began to increasingly focus on its Predictive Analytics and LBS businesses and introduced a number of new or substantially updated releases of products, including Routing J Server, *TargetPro*®, *miAware*™, *MapInfo Professional*® for Microsoft® SQL Server™ and MapInfo Discovery™. The Company's future success depends, in part, upon customer and market acceptance of these new products and initiatives. Any failure to achieve acceptance of these and other new product offerings could have a material adverse effect on the Company's business and results of operations. There can be no assurance that the Company will successfully complete the development of new or enhanced products or successfully manage transitions from one product release to the next.

Competition.

The Company encounters significant competition in the market for business mapping systems worldwide. Some of the Company's competition may have significant name recognition, as well as substantially greater capital resources, marketing experience, research and development staffs and production facilities than the Company. Increased competition may lead to pricing pressures that could adversely affect the Company's gross margins. Prices of software in Europe and Asia are generally higher than in the Americas to cover localization costs and higher costs of distribution. Such price uplifts could erode in the future.

Reliance on third parties.

The Company relies in part on resellers and independent developers for the development of specialized data products that use MapInfo software. Failure by such resellers or independent developers to continue to develop such data products, or changes in the contractual arrangements with such resellers or independent developers, could have a material adverse effect on the Company's business and results of operations.

Risks associated with international operations. Revenues outside the United States represented approximately 56% of total Company revenues in the second quarter of fiscal 2003 and approximately 58% of total Company revenues in the first half of fiscal 2003. The international portion of the Company's business is subject to a number of inherent risks, including the difficulties in building and managing international operations, reliance on financial commitments

from certain international distributors, difficulties in localizing products and translating documentation into foreign languages, fluctuations in import/export duties and quotas, and regulatory, economic, or political changes in international markets. The Company's operating results are also affected by exchange rates. Approximately 41% of the Company's revenues in the second quarter of fiscal 2003, and approximately 40% of the Company's revenues in the first half of fiscal 2003 were denominated in foreign currencies. Changes in international business conditions could have a material adverse effect on the Company's business and results of operations.

Prices. Future prices the Company is able to obtain for its products may decrease from previous levels depending upon market or competitive pressures or distribution channel factors. Any decrease could have a material adverse effect on the Company's business and results of operations.

Intellectual property rights.

The Company regards its software as proprietary and attempts to protect it with a combination of copyright, trademark and trade secret protections, employee and third-party non-disclosure agreements, patents and other methods of protection. Despite these precautions, it may be possible for unauthorized third parties to copy certain portions of the Company's products, reverse engineer or obtain and use information the Company regards as proprietary. In addition, the Company's shrink-wrap licenses, under which the Company licenses its products, may be unenforceable under the laws of certain jurisdictions. Also, the laws of some foreign countries do not protect the Company's proprietary rights to the same extent as the laws of the United States. Any misappropriation of the Company's intellectual property could have a material adverse effect on the Company's business and results of operations. Furthermore, there can be no assurance that third parties will not assert infringement claims against the Company in the future with respect to current or future products. Any such assertion could require the Company to enter into royalty arrangements or result in costly litigation.

Cost of revenues. Cost of revenues varies with the mix of technology development and licensing fees, product revenues, services revenues and services utilization rates, as well as with the distribution channel mix. Changes in the revenue mix, as well as the distribution model, may affect cost of revenues as a percentage of net revenues in the future.

Risks associated with distribution channels. The Company primarily markets and distributes its products in North America, Europe and Australia through the Company's telesales, outside sales force and through third-party resellers. In the rest of the Asia-Pacific region, the Company's products are marketed and distributed through exclusive and non-exclusive distribution relationships. While the Company has contractual agreements with such resellers and distributors, these entities are not employees of the Company and the Company, accordingly, cannot control their continued performance. There can be no assurance that the Company will be able to retain its current resellers and distributors, that the resellers and distributors will perform to the Company's expectations, or that the Company will be able to expand its distribution channels by entering into arrangements with new resellers and distributors in the Company's current markets or in new markets.

Variability of quarterly operating results.

The Company's quarterly operating results may vary significantly from quarter to quarter, depending upon factors such as the introduction and market acceptance of new products and new versions of existing products, the ability to reduce expenses or increase revenues at a level sufficient to offset increases in expenses, the level of technology spending, and the activities of competitors. Because a high percentage of the Company's expenses are relatively fixed

in the near term, minor variations in the timing of orders and shipments can cause significant variations in quarterly operating results. The Company operates with little or no backlog and has no long-term contracts; substantially all of its product revenues in each quarter result from software and data licenses issued in that quarter. Accordingly, the Company's ability to accurately forecast future revenues and income for any period is necessarily limited. Also, the Company could experience reduced revenues from telecommunications and Internet companies as a result of decreased spending in those industries.

Potential volatility of stock price. There has been, and will likely continue to be, significant volatility in the market price of securities of technology companies, including the Company. Factors such as announcements of new products by the Company or its competitors, litigation involving the Company, quarterly fluctuations in the Company's financial results or other software companies' financial results, shortfalls in the Company's actual financial results compared to results previously forecasted by stock market analysts, the Company's stock repurchase program, and general conditions in the software industry and conditions in the financial markets could cause the market price of the Company's Common Stock to fluctuate substantially. These market fluctuations may adversely affect the price of the Company's Common Stock. Such a decline could adversely impact the ability of the Company to attract and retain employees, acquire other companies or businesses and raise capital.

Risks associated with acquisitions and investments. The Company has made a number of acquisitions and investments, including its acquisition of Thompson in January 2003, and will continue to review future acquisition opportunities. No assurances can be given that acquisition candidates will continue to be available on terms and conditions acceptable to the Company. Acquisitions, including the Thompson acquisition, involve numerous risks, including, among other things, possible decreases in capital resources or dilution to existing shareholders, difficulties and expenses incurred in connection with the acquisitions and the subsequent assimilation of the operations and services or products of the acquired companies, the difficulty of operating new businesses, the diversion of management's attention from other business concerns, a limited ability to predict future operating results of an acquired business and the potential loss of key employees and customers of the acquired company. In the event that the operations of an acquired business do not meet expectations, the Company may be required to restructure the acquired business or write-off the value of some or all of the assets of the acquired business. There can be no assurance that Thompson or any other acquisition will be successfully integrated into the Company's operations or will have the intended financial or strategic results.

Risks associated with expansion of facilities.

In October 2002, the Company completed the construction of a 150,000 square foot facility in Troy, New York. The Company also occupies a 60,000 square foot facility, adjacent to the newly constructed facility, which is currently leased through 2006. The 60,000 square foot facility principally houses the Company's U.S.-based research and development organization. The 150,000 square foot facility was occupied in October 2002 and houses the Company's corporate offices and the U.S. sales, marketing and administrative organizations. Approximately 30-35% of the newly constructed office space is vacant, and the Company is seeking to sublease this vacant space. The Company is also examining its options concerning the consolidation of office space in Troy, New York. There can be no assurance the Company will grow at a rate sufficient to fully utilize the Troy office space or will be able to sublease excess office space.

Reliance on attracting and retaining key employees. The Company's continued success will depend in large part on its ability to attract and retain highly qualified technical, managerial, sales and marketing, executive, and other personnel. Competition for such personnel is intense. There can be no assurance that the Company will be able to continue to attract or retain such personnel. Loss of key personnel or changes in management could have an adverse

impact on the Company.

Risks associated with litigation. See Part II, Item I of this Quarterly Report on Form 10-Q. There can be no assurance the Company will not be adversely affected by this proceeding or other proceedings to which the Company might be a party in the future.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Foreign Currency

. The Company exports products to diverse geographic locations. Most of the Company's international revenues through subsidiaries are denominated in foreign currencies. In total, the strengthening of certain foreign currencies against the U.S. dollar improved second quarter and first half of fiscal 2003 revenue growth by approximately \$1.2 million or 5 percentage points and \$1.8 million or 4 percentage points, respectively. To date, foreign currency fluctuations have not had a material effect on the Company's operating results or financial condition. The Company's exposure is mitigated, in part, by the fact that it incurs certain operating costs in the same foreign currencies in which revenues are denominated.

Interest Rates. The Company is exposed to fluctuations in interest rates. A significant portion of the Company's cash is invested in short-term interest-bearing securities. Assuming an average investment level in short-term interest-bearing securities of \$23.2 million (which approximates the average amount invested in these securities during the first half of fiscal year 2003) each 1-percentage point decrease in the applicable interest rate would result in a \$232 thousand decrease in annual investment income. To date, interest rate fluctuations have not had a material impact on the Company's operating results or financial condition.

In order to reduce exposure to movements in interest rates, in January 2003, the Company entered into an interest rate swap agreement to convert its variable rate mortgage loan to a fixed rate. The agreement involves the exchange of fixed and floating interest rate payments over the 10-year life of the loan. Under SFAS No. 133, this contract will not require "special" or "hedge" accounting. The variable interest rate on the mortgage loan is the 30-day LIBOR rate plus 2.25%. The interest rate swap has fixed the effective interest rate that MapInfo will pay at 6.82%. The impact of the fluctuations in interest rates on the interest rate swap agreement will be naturally offset by the opposite impact on the related mortgage debt. The Company records the payments or receipts on the agreement as adjustments to interest expense.

Item 4. Controls and Procedures

a. Evaluation of disclosure controls and procedures.

Based on their evaluation as of a date within 90 days of the filing date of this Quarterly Report on Form 10-Q, the Company's principal executive officer and principal financial officer have concluded that the Company's disclosure controls and procedures (as defined in Rules 13a-14(c) and 15d-14(c) under the Securities Exchange Act of 1934 (the "Exchange Act")) are effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms.

b. Changes in internal controls.

There were no significant changes in the Company's internal controls or in other factors that could significantly affect these controls subsequent to the date of their evaluation. There were no significant deficiencies or material weaknesses, and therefore there were no corrective actions taken.

MapInfo Corporation
Part II. Other Information

Item 1. Legal Proceedings

On August 5, 2002, the Company filed an action against Spatial Re-Engineering Consultants ("SRC"), a former MapInfo reseller, in the United States District Court for the Northern District of New York to collect approximately \$100 thousand in receivables owed by SRC to the Company under contractual obligations. SRC answered and asserted fifteen counterclaims against the Company, seeking a total of \$11.0 million dollars in damages. The counterclaims include allegations of breach of contract and copyright infringement. The District Court dismissed one counterclaim upon the Company's motion and SRC voluntarily withdrew a second counterclaim; thirteen counterclaims remain. In its pleadings on the remaining counterclaims SRC seeks a total of \$9.0 million. However, in its computation of damages made pursuant to court rules, SRC has alleged general damages of \$5.1 million, plus an unspecified amount of special damages. The Company is vigorously defending against all remaining counterclaims. The case is scheduled for court-ordered mediation in summer 2003.

Reference is made to the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2002 for a description of this legal proceeding.

Item 4. Submission of Matters to a Vote of Security Holders

At the Company's Annual Meeting of Stockholders held on February 12, 2003, the following proposals were adopted by the vote specified below:

	<u>For</u>	<u>Against</u>	<u>Withheld</u>	<u>Abstentions</u>
<u>Election of Directors:</u>				
Mark P. Cattini	11,135,018		2,475,303	
John C. Cavalier	11,157,016		2,453,305	
George C. McNamee	12,562,431		1,047,890	
Robert P. Schechter	12,898,272		712,049	
Joni Kahn	12,562,347		1,047,974	
Quinn H. Tran	12,564,013		1,046,308	

<u>Approval of the Company's 2002 Stock Incentive Plan</u>	5,442,655	4,220,033	128,516
--	-----------	-----------	---------

The Company's 2002 Stock Incentive Plan will replace the 1993 Stock Incentive Plan, which expires on November 23, 2003.

<u>Amendment to the 1993 Employee Stock Purchase Plan</u>	9,063,957	669,368	57,879
---	-----------	---------	--------

The shares authorized under the 1993 Employee Stock Purchase Plan were increased from 1,312,500 to 1,712,500 shares.

<u>Ratification of PricewaterhouseCoopers LLP</u>	12,759,971	813,930	36,420
---	------------	---------	--------

The stockholders ratified the selection of Pricewaterhouse Coopers as the Company's Independent Public Accountants for the current fiscal year.

Item 6. Exhibits and Reports on Form 8-K

(a) Exhibits

See Exhibit Index attached hereto, which Exhibit Index is incorporated herein by reference.

(b) Reports on Form 8-K

On January 6, 2003, MapInfo filed a report on Form 8-K under Item 5 reporting its acquisition of substantially all of the assets of Thompson Site Selection Research, Inc. and announcing its preliminary financial results for the quarter ended December 31, 2002.

On April 24, 2003, MapInfo furnished a current report on Form 8-K under Item 9, containing a copy of its earnings release for the period ended March 31, 2003 (including financial statements) pursuant to Item 12 (Results of Operations and Financial Condition).

Signature

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

accounting officer)

CHIEF EXECUTIVE OFFICER CERTIFICATION

I, Mark P. Cattini, President and Chief Executive Officer of MapInfo Corporation certify that:

- 1) I have reviewed this Quarterly Report on Form 10-Q of MapInfo Corporation (the "Registrant");
- 2) Based on my knowledge, this Quarterly Report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this Quarterly Report;
- 3) Based on my knowledge, the financial statements, and other financial information included in this Quarterly Report, fairly present in all material respects the financial condition, results of operations and cash flows of the Registrant as of, and for, the periods presented in this Quarterly Report;
- 4) The Registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the Registrant and we have:
 - a) designed such disclosure controls and procedures to ensure that material information relating to the Registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this Quarterly Report is being prepared;
 - b) evaluated the effectiveness of the Registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this Quarterly Report (the "Evaluation Date"); and
 - c) presented in this Quarterly Report our conclusions about the effectiveness of the disclosure controls and procedures based on

our evaluation as of the Evaluation Date;

- 5) The Registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the Registrant's auditors and the audit committee of Registrant's board of directors (or persons performing the equivalent functions):
- a) all significant deficiencies in the design or operation of internal controls which could adversely affect the Registrant's ability to record, process, summarize and report financial data and have identified for the Registrant's auditors any material weaknesses in internal controls; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the Registrant's internal controls; and
- 6) The Registrant's other certifying officers and I have indicated in this Quarterly Report whether there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

Dated: May 14, 2003
