Forward-Looking Statements

This Form 10-K contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Our actual results could differ materially from those set forth in each forward-looking statement. Certain factors that might cause such a difference are discussed in this report, including in the section entitled "Forward-Looking Statements" on Page 51 of this Form 10-K.

Item 1. Business

The Company

Home Properties, Inc. ("Home Properties" or the "Company") is a self-administered and self-managed real estate investment trust ("REIT") that owns, operates, acquires, develops and rehabilitates apartment communities. The Company's properties are regionally focused, primarily in selected Northeast, Mid-Atlantic and Southeast Florida markets along the East Coast of the United States. The Company was formed in November 1993 to continue and expand the operations of Home Leasing Corporation ("Home Leasing"). The Company completed an initial public offering of 5,408,000 shares of common stock (the "IPO") on August 4, 1994.

The Company conducts its business through Home Properties, L.P. (the "Operating Partnership"), a New York limited partnership and a management company – Home Properties Resident Services, Inc. ("HPRS"), which is a Maryland corporation. At December 31, 2009, the Company held 74.7% (71.7% at December 31, 2008) of the limited partnership units in the Operating Partnership ("UPREIT Units").

Home Properties, through its affiliates described above, as of December 31, 2009, operated 107 communities with 36,947 apartment units. Of these, 35,797 units in 105 communities are owned outright (the "Owned Properties"), 868 units in one community are managed and partially owned by the Company as general partner, and 282 units in one community are managed for other owners (collectively, the "Managed Properties").

The Owned Properties and the Managed Properties (collectively, the "Properties") are concentrated in the following market areas:

Market Area	Apts. Owned	Apts. Managed		Apt. Totals
		As General Partner	Apts. Fee Managed	
Suburban Washington, D.C.	9,333	-	-	9,333
Baltimore, MD	7,814	-	282	8,096
Suburban New York City	6,967	-	-	6,967
Philadelphia, PA	5,603	-	-	5,603
Boston, MA	2,382	-	-	2,382
Chicago, IL	2,242	-	-	2,242
Southeast Florida	836	-	-	836
Portland, ME	620	-	-	620
Columbus, OH	-	868	-	868
Total Number of Units	35,797	868	282	36,947
Total Number of Communities	105	1	1	107

The Company's mission is to maximize long-term shareholder value by acquiring, repositioning, developing and managing market-rate apartment communities while enhancing the quality of life for its residents and providing employees with opportunities for growth and accomplishment. Our vision is to be a prominent owner and manager of market-rate apartment communities, located in selected high barrier, high growth, East Coast markets. The areas we have targeted for growth are the suburbs of Baltimore, Boston, New York City, Philadelphia and Washington, D.C. We expect to maintain or grow portfolios in markets that profitably support our mission as economic conditions permit.

The Company's long-term business strategies include: (i) aggressively managing and improving its communities to achieve increased net operating income; (ii) acquiring additional apartment communities with attractive returns at prices that provide a positive spread over the Company's long-term cost of capital; (iii) developing new apartment communities on raw land, on land adjacent to existing owned communities, and where there are density opportunities to replace existing garden apartments with mid- or high-rise structures; (iv) disposing of properties that have reached their potential, are less efficient to operate, or are located in markets where growth has slowed to a pace below the markets targeted for acquisition; and (v) maintaining a strong and flexible capital structure with cost-effective access to the capital markets.

Structure

The Company was formed in November 1993 as a Maryland corporation and is the general partner of the Operating Partnership. On December 31, 2009, it held a 74.7% partnership interest in the Operating Partnership comprised of: 1) a 1.0% interest as sole general partner; and 2) a 73.7% limited partner interest through its wholly owned subsidiary, Home Properties I, LLC, which owns 100% of Home Properties Trust, which is the limited partner. The holders of the remaining 25.3% of the UPREIT Units are certain individuals and entities who received UPREIT Units as consideration for their interests in entities owning apartment communities purchased by the Operating Partnership, including certain officers and directors of the Company.

The Operating Partnership is a New York limited partnership formed in December 1993. Holders of UPREIT Units in the Operating Partnership may redeem an UPREIT Unit for one share of the Company's common stock or cash equal to the fair market value at the time of the redemption, at the option of the Company. Management expects that it will continue to utilize UPREIT Units as a form of consideration for a portion of its acquisition properties when it is economical to do so.

HPRS is wholly owned by the Operating Partnership, and as a result, the accompanying consolidated financial statements include the accounts of both companies. HPRS is a taxable REIT subsidiary under the Tax Relief Extension Act of 1999.

In September 1997, Home Properties Trust ("QRS") was formed as a Maryland real estate trust and as a qualified REIT subsidiary. The QRS is wholly owned by Home Properties I, LLC which is owned 100% by the Company. The QRS is a limited partner of the Operating Partnership and holds all of the Company's interest in the Operating Partnership, except for the 1% held directly by the Company as sole general partner.

The Company currently has approximately 1,100 employees and its executive offices are located at 850 Clinton Square, Rochester, New York 14604. Its telephone number is (585) 546-4900.

Operating Strategies

The Company will continue to focus on enhancing long-term investment returns by: (i) developing new apartments and acquiring apartment communities and repositioning those apartment communities for long-term growth at prices that provide a positive spread over the Company's long-term cost of capital; (ii) recycling assets by disposing of properties in low growth markets and those that have reached their potential or are less efficient to operate due to size or remote location; (iii) balancing its decentralized property management philosophy with the efficiencies of centralized support functions and accountability including rent optimization and volume purchasing; (iv) enhancing the quality of living for the Company's residents by improving the service and physical amenities available at each community every year; (v) adopting new technology so that the time and cost spent on administration can be minimized while the time spent attracting and serving residents can be maximized; (vi) continuing to utilize its written

"Pledge" of customer satisfaction that is the foundation on which the Company has built its brand recognition; and (vii) focusing on reducing expenses while constantly improving the level of service to residents. Due to current economic conditions, in the short term, the Company does not anticipate adding any new development projects to its pipeline in 2010.

The Company has a strategy of acquiring and repositioning mature C to B- apartment properties. Since its 1994 IPO, the Company has acquired and repositioned 197 communities, containing more than 54,000 units. The rehabilitation and revitalization process requires a minimum 10% return on repositioning investments. It is expected

that capital expenditures on repositioning investments will increase from 2009 levels, but remain below the Company's historic levels as potential residents may not prefer an upgraded apartment at a higher monthly rent in this current economic environment. Fewer capital expenditures will enable the Company to preserve capital. Extensive experience and expertise in repositioning has helped the Company build significant internal design and construction management skills. The complete repositioning of a community can take place over a five to seven year period. The comprehensive process typically begins with improvements in landscaping, signage and common areas. Exterior improvements increase curb appeal and marketability of the property. Deferred maintenance is corrected which can include new HVAC systems, roofs, balconies and windows. At many properties, community centers and swimming pools are added or upgraded. Apartment interiors are renovated when residents move out, with the most significant investments made in upgrading kitchens and baths. Complete remodeling of dated kitchens and bathrooms typically include new appliances, flooring, counters, cabinets, lighting, tile, fixtures, sinks, bathtubs and toilets. It may include the removal of kitchen walls to open up the living area. Where feasible, in-unit washers and dryers are added. Repositioning efforts upgrade properties that were C to B- level when acquired to the B to B+ level, which, over time, significantly increases the property's rental income, net operating income and market value.

Acquisition and Sale Strategies

The Company's strategy is to grow primarily through acquisitions in the suburbs of major metropolitan markets that have significant barriers to new construction, limited new apartment supply, easy access to the Company's headquarters and enough apartments available for acquisition to achieve a critical mass. Targeted markets also possess other characteristics, including acquisition opportunities below replacement costs, a mature housing stock, high average single-family home prices, a favorable supply/demand relationship, stable or moderate job growth, reduced vulnerability to economic downturns and large prime renter populations including immigrants, young adults in their twenties and early thirties, and seniors over age 55. The Company currently expects that its growth will be focused primarily within suburban sub-markets of selected metropolitan areas within the Northeast and Mid-Atlantic regions of the United States where it has already established a presence. The largest metropolitan areas the Company will focus on include Baltimore, Boston, New York City, Philadelphia and Washington, D.C. The Company may expand into new markets that possess the characteristics described above although it has no current plans to do so. Continued geographic specialization is expected to have a greater impact on operating efficiencies versus widespread accumulation of properties. The Company will continue to pursue the acquisition of individual properties as well as multi-property portfolios. It may also consider strategic investments in other apartment companies, as well as strategic alliances, such as joint ventures. The Company did not target any acquisitions in 2009. The Company now believes that it will have the opportunity to make acquisitions during 2010 and has projected \$100 to \$150 million in purchases for the year.

During 2009, the Company completed the sale of five communities with a total of 1,333 units for an aggregate consideration of \$108.3 million, at a weighted average expected first-year capitalization rate of 7.8%. Capitalization rate ("cap rate") is defined as the rate of interest used to convert the first year expected net operating income ("NOI") less a 3% management fee into a single present value. NOI is defined by the Company as rental income and property other income less operating and maintenance expenses. The Company used the net proceeds from those properties of approximately \$64.6 million, which were expected to produce a weighted average unleveraged internal rate of return ("IRR") of 6.2%, to pay down debt. IRR is defined as the discount rate at which the present value of the future cash flows of the investment is equal to the cost of the investment.

The Company has not specifically targeted additional communities for sale in 2010 but will continue to evaluate the sale of its communities. Typically, a property will be targeted for sale if management is of the opinion that it has reached its potential or if it is located in a slower growth market or is less efficient to operate.

Financing and Capital Strategies

The Company intends to continue to adhere to the following financing policies: (i) maintaining a ratio of debt-to-total market capitalization (total debt of the Company as a percentage of the value (using the Company's internally calculated Net Asset Value ("NAV" per share) of outstanding diluted common stock (including the common stock equivalents of the UPREIT Units) plus total debt) of approximately 55% or less; (ii) utilizing primarily fixed rate debt; (iii) varying debt maturities to avoid significant exposure to interest rate changes upon refinancing; and (iv) maintaining a line of credit so that it can respond quickly to acquisition opportunities.

Specific to 2009, and in response to the constrictions in the credit market, the Company pursued certain initiatives as follows: 1) The Company replaced the \$140 million existing unsecured line of credit with a new \$175 million facility which matures August 31, 2011. Pricing was more expensive, and moved from interest at 0.75% over the one-month LIBOR to a spread today of 3.00% with a LIBOR floor of 1.5%. In addition, up-front and on-going fees add another approximate 75 basis points to pricing. 2) During 2009, the Company had increased the level of the value of unencumbered properties in relationship to the total property portfolio from 19% to 20%. This higher level adds flexibility, allowing the Company to place secured financing on unencumbered assets if desired. 3) The Company benefits from its multifamily focus as the Government Sponsored Enterprises ("GSEs") Fannie Mae and Freddie Mac are still very active lending to apartment owners. The Company refinanced debt maturing in 2010 early, reducing the level of secured loans maturing in 2010 from \$334 million to \$146 million. 4) The Company initiated an At-The-Market ("ATM") equity offering program through which it may sell up to 3.7 million shares of common stock, not to exceed \$150 million of gross proceeds. Including trades which closed the first few days of January, 2010, the Company issued 1,041,200 shares generating net proceeds of \$47 million.

For 2010, plans include increasing the level of the value of unencumbered properties to over 21% of the portfolio, maintaining the debt-to-total market capitalization ratio at a level equal to or slightly less than the level at December 31, 2009 and issuing the remainder of the dollar value authorized under the ATM program at levels above NAV.

On December 31, 2009, the Company's debt was approximately \$2.3 billion and the debt-to-total market capitalization ratio was 51.1% based on the year-end closing price of the Company's common stock of \$47.71. The weighted average interest rate on the Company's mortgage debt as of December 31, 2009 was 5.6% and the weighted average maturity was approximately five and one-half years. Debt maturities are staggered, ranging from May 2010, through November 2034. As of December 31, 2009, the Company had an unsecured line of credit facility from M&T Bank (acting as lead bank) of \$175 million. This facility is available for acquisition and other corporate purposes and bears interest at rates ranging from 2.50% to 3.25% over the one-month LIBOR rate, increasing at higher levels of outstanding indebtedness, with a LIBOR floor of 1.50%. The one-month LIBOR was 0.23% at December 31, 2009 resulting in an effective rate of 4.75% for the Company. As of December 31, 2009, there was \$53.5 million outstanding on the line of credit.

Management expects to continue to fund a portion of its continued growth by taking advantage of its UPREIT structure and using UPREIT Units as currency in acquisition transactions. During 2007, the Company issued \$36.3 million worth of UPREIT Units as partial consideration for three acquired properties. During 2008 and 2009, no UPREIT Units were used as consideration for acquired properties. It is difficult to predict the level of demand from sellers for this type of transaction. In periods when the Company's stock price is trading at a discount to estimated NAV, it is unlikely that management would engage in UPREIT transactions.

During periods when the Company's shares are trading at a premium to its estimate of NAV, it is unlikely that management would engage in share repurchases. In such circumstances, it is more likely that management would pursue issuing equity in order to raise capital to be used to pay down existing indebtedness. This should be neutral to both earnings per share and NAV, increase the level of unencumbered assets and better position the Company to fund future acquisition and development pipeline needs.

In 1997, the Company's Board of Directors approved a stock repurchase program under which the Company can repurchase shares of its outstanding common stock and UPREIT Units. Shares or units may be repurchased through the open market or in privately-negotiated transactions. The Company's strategy is to opportunistically repurchase shares at a discount to its underlying NAV, thereby continuing to build value for long-term shareholders. At December 31, 2009, there was approval remaining to purchase 2,291,160 shares. The 2010 guidance assumes no

additional share repurchases.

Competition

The Company's properties are primarily located in developed areas where there are other multifamily properties which directly compete for residents. There is also competition from single family homes and condominiums for sale or rent. The competitive environment may have a detrimental effect on the Company's ability to lease apartments at existing and at newly developed properties, as well as on rental rates.

In addition, the Company competes with other real estate investors in seeking property for acquisition and development. These competitors include pension and investment funds, insurance companies, private investors, local owners and developers, and other apartment REITs. This competition could increase prices for properties that the Company would like to purchase and impact the Company's ability to achieve its long-term growth targets.

The Company believes, however, that it is well-positioned to compete effectively for both residents and properties as a result of its:

- focus on service and resident satisfaction, as evidenced by both The Home Properties Pledge, which provides a money-back service guarantee and lease flexibility, and by its resident turnover ratio which is consistently below the industry average;
- ability to issue UPREIT Units in purchase transactions, which provides sellers with the opportunity to defer taxes; and
 - unique repositioning strategy that differentiates the Company from its competitors.

Market Environment

The markets in which Home Properties operates could be characterized long term as stable, with moderate levels of job growth. During 2009 and expected to continue through 2010, many regions of the United States are experiencing varying degrees of economic recession resulting in negative job growth for both the country as a whole and the Company's markets.

For 2007, the Company's markets experienced slightly stronger job growth of 1.0% compared to 0.9% for the country. With the current recession which started in 2008, job losses became the norm. The Company's markets still compare favorably for 2009 with job losses of 2.1% compared to 3.6% for the country. In addition, the unemployment rate for the Company's markets of 8.1% trails the country average of 9.7%. The Northern VA/DC market stands out for the Company as it experienced only slightly negative job growth of 0.5% for 2009, with one of the lowest unemployment rates of 6.2% at December 31, 2009. This market represents 26.1% of the total apartment unit count and produces 29.2% of the property NOI. These two favorable comparisons help explain why the Company's markets helped the Company outperform all of its public company multifamily peers on a measurement of same store NOI in 2009, and is expected to be at the top for this measurement in 2010. The information on the "Market Demographics and Multifamily Supply and Demand" tables on Pages 8 and 9 were compiled by the Company from the sources indicated on the tables. The methods used include estimates and, while the Company feels that the estimates are reasonable, there can be no assurance that the estimates are accurate. There can also be no assurance that the historical information included on the table will be consistent with future trends.

New construction in the Company's markets is low relative to the existing multifamily housing stock and compared to other regions of the country. In 2009, Home Properties' markets represented 27.4% of the total estimated existing U.S. multifamily housing stock, but only 17.0% of the country's estimated new supply of multifamily housing units.

An analysis of multifamily supply compared to multifamily demand can indicate whether a particular market is tightening, softening or in equilibrium. The fourth to last column in the "Multifamily Supply and Demand" table on Page 9 reflects current estimated net new multifamily supply as a percentage of new multifamily demand for the Company's markets and the United States. In our 2007 report, this percentage was more favorable for the Company at 57% compared to 111% for the country. This suggested that in the Company's markets, new supply was meeting only 57% of the estimated new demand, versus the country where new supply was in excess of estimated new demand. In

2009, job losses have reduced household formations, resulting in both the Company's markets and the country experiencing reduced demand. Fortunately, new supply has also gone down during 2009, but at a much smaller pace than reduced demand. The comparison of this metric is still favorable for the Company's markets relative to the country, with reduced supply equal to 15.4% of reduced demand for the Company versus reduced supply of only 4.0% of reduced demand for the entire United States.

(1)-(5) see footnotes prior page

(6) Estimated 2009 New Supply of Multifamily = Multifamily permits (2009 figures U.S. Census Bureau, Mfg. & Constr. Div., 5+ permits only) adjusted by the average % of permits resulting in a construction start (estimated at 95%).

(7) Estimated 2009 Multifamily Obsolescence = 0.5% of Estimated 2009 Multifamily Housing Stock.

(8) Estimated 2009 Net New Multifamily Supply = Estimated 2009 New Supply of Multifamily - Estimated 2009 Multifamily Obsolescence.

(9) Estimated 2009 New Multifamily Household Demand = Trailing 12 month job growth (Nonfarm, not seasonally adjusted payroll employment figures) (12/31/2008-12/31/2009) multiplied by the expected % of new household formations resulting from new jobs (66.7%) and the % of multifamily households in each market (based on Claritas estimates).

(10) Expected Excess Demand = Estimated 2009 New Multifamily Household Demand - Estimated 2009 Net New Multifamily Supply.

(11) Expected Excess Revenue Growth = Expected Excess Demand divided by 2009 Multifamily Housing Stock. This percentage is expected to reflect the relative impact that changes in the supply and demand for multifamily housing units will have on occupancy rates and/or rental rates in each market, beyond the impact caused by broader economic factors, such as inflation and interest rates.

Environmental Matters

As a current or prior owner, operator and developer of real estate, the Company is subject to various federal, state and local environmental laws, regulations and ordinances and also could be liable to third parties as a result of environmental contamination or noncompliance at its properties. See the discussion under the caption, "We may incur costs due to environmental contamination or non-compliance" in Item 1A, Risk Factors, for information concerning the potential effect of environmental regulations on the Company's operations.

Available Information

The Company's annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and other reports required by Sections 13(a) and 15(d) of the Securities Exchange Act of 1934, as amended, are electronically filed with the Securities and Exchange Commission ("SEC"). The public may read and copy any materials the Company files with the SEC at the SEC's Public Reference Room at 100 F Street NE, Washington, DC 20549-2521. Please call the SEC at 1-800-SEC-0330 for further information on the operation of the Public Reference Room. The SEC maintains a Web site at www.sec.gov that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC, which are available without charge.

Company Web Site

The Company maintains an Internet Web site at www.homeproperties.com. The Company provides free-of-charge access to its reports filed with the SEC, and any amendments thereto, through this Web site. These reports are available as soon as reasonably practicable after the reports are filed electronically with the SEC and are found under "Investors/SEC Filings." In addition, paper copies of annual and periodic reports filed with the SEC may be obtained at no charge by contacting the Corporate Secretary, Home Properties, Inc., 850 Clinton Square, Rochester, New York 14604.

Current copies of the Company's Code of Business Conduct and Ethics, Code of Ethics for Senior Financial Officers, Corporate Governance Guidelines and Charters for the Audit, Compensation, Corporate Governance/Nominating and Real Estate Investment Committees of the Board of Directors are also available on the Company's Web site under the heading "Investors/Corporate Overview/Governance Documents Highlights." Copies of these documents are also available at no charge upon request addressed to the Corporate Secretary at Home Properties, Inc., 850 Clinton Square, Rochester, New York 14604.

The reference to our Web site does not incorporate by reference the information contained in the Web site and such information should not be considered a part of this report.

Item 1A. Risk Factors

As used in this section, references to "we" or "us" or "our" refer to the Company, the Operating Partnership, and HPRS, taken as a whole.

Our business is subject to uncertainties and risks. Please carefully consider the risk factors described below, which apply to Home Properties, the Operating Partnership, and HPRS, in addition to other risks and factors set forth elsewhere in this Form 10-K. Additional risks and uncertainties not presently known to us or that we currently deem immaterial may also impair our business or prospects. The risk factors we describe contain or refer to certain forward-looking statements. You should review the explanation of the limitations of forward-looking statements contained in the section entitled "Forward-Looking Statements" on Page 51 of this Form 10-K.

Real Estate Investment Risks

We are subject to risks that are part of owning residential real estate.

Real property investments are subject to varying degrees of risk. If our communities do not generate revenues sufficient to meet operating expenses, debt service and capital expenditures, our cash flow and ability to make distributions to our stockholders will be adversely affected. A multifamily apartment community's revenues and value may be adversely affected by general economic conditions (including unemployment); local economic

conditions; local real estate considerations (such as oversupply of or reduced demand for apartments); the perception by prospective residents of the safety, convenience and attractiveness of the communities or neighborhoods in which they are located and the quality of local schools and other amenities; and increased operating costs (including real estate taxes and utilities). Certain significant fixed expenses are generally not reduced when circumstances cause a reduction in income from the investment.

We depend on rental income for cash flow to pay expenses and make distributions.

We are dependent on rental income from our multifamily properties to pay operating expenses, debt service and capital expenditures, and in order to generate cash to enable us to make distributions to our stockholders. If we are unable to attract and retain residents or if our residents are unable, due to an adverse change in the economic condition of the region or otherwise, to pay their rental obligations, our ability to make expected distributions will be adversely affected. In addition, the weather and other factors outside of our control can result in an increase in the operating expenses for which we are responsible.

The current economic crisis might negatively impact our occupancy rates, our residents' ability to pay rent and our ability to raise rents.

In 2008, 2009 and continuing into 2010, problems in the financial system have caused consumer confidence to plunge and unemployment to soar. Increasing job losses typically slow household formations, which could affect occupancy. In addition, continued job losses and weak economic conditions might negatively impact our current residents' ability to pay rent and would likely continue to impact our ability to raise rents.

Attractive acquisitions may not be available and acquisitions we may be able to make may fail to meet expectations.

In 2010, we plan to selectively acquire apartment communities that meet our investment criteria. We expect that other real estate investors, including insurance companies, pension funds, other REITs and other well-capitalized investors will compete with us to acquire existing properties and to develop new properties. This competition could increase prices for properties of the type we would likely pursue and adversely affect our growth and profitability. If we are able to make acquisitions, there are risks that those acquisitions will fail to meet our expectations. Our estimates of future income, expenses and the costs of improvements or redevelopment that are necessary to allow us to operate an acquired property as originally intended may prove to be inaccurate.

Real estate investments are relatively illiquid, and we may not be able to respond to changing conditions quickly.

Real estate investments are relatively illiquid and, therefore, we have limited ability to adjust our portfolio quickly in response to changes in economic or other conditions. In addition, the prohibition in the Internal Revenue Code (the "Code") on REITs holding property for sale and related regulations may affect our ability to sell properties without adversely affecting distributions to stockholders. A significant number of our properties were acquired using UPREIT Units and are subject to certain agreements which may restrict our ability to sell such properties in transactions that would create current taxable income to the former owners.

Current economic conditions may make it difficult for us to sell apartment communities on favorable terms.

We periodically sell apartment communities that no longer meet our strategic objectives. The uncertainty in the credit markets and the economy in general could negatively impact our ability to make dispositions or may adversely affect the price we receive since buyers may experience increased borrowing costs or an inability to obtain financing.

Competition could limit our ability to lease apartments or increase or maintain rents.

Our apartment communities compete with other housing alternatives to attract residents, including other rental apartments, condominiums and single-family homes that are available for rent, as well as new and existing condominiums and single-family homes for sale. Competitive residential housing in a particular area could adversely affect our ability to lease apartment units and to increase or maintain rental rates.

Repositioning and development risks could affect our profitability.

A key component of our strategy is to acquire properties and to reposition them for long-term growth. In addition, we have developed and are in the process of developing new apartment units. We plan to continue to selectively expand our development activities. Development projects generally require various governmental and other approvals, which have no assurance of being received. Our repositioning and development activities generally entail certain risks, including the following:

- funds may be expended and management's time devoted to projects that may not be completed due to a variety of factors, including without limitation, the inability to obtain necessary zoning or other approvals;
- construction costs of a project may exceed original estimates, possibly making the project economically unfeasible or the economic return on a repositioned property less than anticipated;
- projects may be delayed due to delays in obtaining necessary zoning and other approvals, adverse weather conditions, labor shortages, or other unforeseen complications;
- occupancy rates and rents at a completed development project or at a repositioned property may be less than anticipated; and
 - the operating expenses at a completed development may be higher than anticipated.

These risks may reduce the funds available for distribution to our stockholders. Further, the repositioning and development of properties is also subject to the general risks associated with real estate investments.

Short-term leases expose us to the effects of declining market conditions.

Virtually all of the leases for our properties are short-term leases (generally, one year or less). Typically, our residents can leave after the end of a one-year lease term. As a result, our rental revenues are impacted by declines in market conditions more quickly than if our leases were for longer terms.

A significant uninsured property or liability loss could adversely affect us in a material way.

The Company carries comprehensive liability, fire, extended and rental loss insurance for each of our properties. There are however certain types of extraordinary losses, such as losses for terrorism and natural catastrophes, for which the Company may not have insurance coverage. If an uninsured loss occurred, we could lose our investment in, and cash flow from, the affected property, and could be required to repay any indebtedness secured by that property and related taxes and other charges.

Insurance costs and policy deductibles expose us to unpredictable expenses which may be material.

The Company's general liability, property and workers' compensation policies provide for deductibles and self-insured retention amounts. These deductibles and self-insured retention amounts expose the Company to potential uninsured losses. Management believes that this exposure is justified by savings in insurance premium amounts and, in some cases, was necessary in order for the Company to secure coverage. Depending on the level of claims experienced, insurance coverage may become difficult to obtain at the current premium and expense levels.

Changes in applicable laws, or noncompliance with applicable laws, could adversely affect our operations or expose us to liability.

We must operate our properties in compliance with numerous federal, state and local laws and regulations, including landlord tenant laws and other laws generally applicable to business operations. Noncompliance with laws could expose us to liability.

Compliance with changes in: (i) laws increasing the potential liability for environmental conditions existing on properties or the restrictions on discharges or other conditions; (ii) rent control or rent stabilization laws; or (iii) other governmental rules and regulations or enforcement policies affecting the use and operation of our communities, including changes to building codes and fire and life-safety codes, may result in lower revenue growth or significant unanticipated expenditures.

We may incur costs and increased expenses to repair property damage resulting from inclement weather.

In every market except Florida, we are exposed to risks associated with inclement winter weather, including increased costs for the removal of snow and ice. In addition, in Southeast Florida, we have exposure to severe storms which could also increase the need for maintenance and repair of our communities in that region.

We may incur costs due to environmental contamination or non-compliance.

Under various federal, state and local environmental laws, regulations and ordinances, we may be required, regardless of knowledge or responsibility, to investigate and remediate the effects of hazardous or toxic substances at our properties and may be held liable under these laws or common law to a governmental entity or to third parties for property, personal injury or natural resources damages and for investigation and remediation costs incurred as a result of the contamination. These damages and costs may be substantial. The presence of such substances, or the failure to properly remediate the contamination, may adversely affect our ability to borrow against, sell or rent the affected property.

The development, construction and operation of our communities are subject to regulations and permitting under various federal, state and local laws, regulations and ordinances, which regulate matters including wetlands protection, storm water runoff and wastewater discharge. Noncompliance with such laws and regulations may subject us to fines and penalties. We do not currently anticipate that we will incur any material liabilities as a result of noncompliance with these laws.

Certain federal, state and local laws, regulations and ordinances govern the removal, encapsulation or disturbance of asbestos containing materials ("ACMs") when such materials are in poor condition or in the event of renovation or demolition of a building. These laws and the common law may impose liability for release of ACMs and may allow third parties to seek recovery from owners or operators of real properties for personal injury associated with exposure to ACMs. ACMs are present at several of our communities. We implement an operations and maintenance program at each of the communities at which ACMs are detected. We do not currently anticipate that we will incur any material liabilities as a result of the presence of ACMs at our communities.

We are aware that some of our communities have or may have lead paint and have implemented an operations and maintenance program at each of those communities to contain, remove or test for lead paint to limit the exposure of our residents. We do not currently anticipate that we will incur any material liabilities as a result of the presence of lead paint at our communities.

All of the Owned Properties and all of the communities that we are currently developing have been subjected to at least a Phase I or similar environmental assessment, which generally does not involve invasive techniques such as soil or ground water sampling. These assessments, together with subsurface assessments conducted on some of our properties, have not revealed, and we are not otherwise aware of, any environmental conditions that we believe would have a material adverse effect on our business, assets, financial condition or results of operation. There is no assurance that Phase I assessments would reveal all environmental liabilities or that environmental conditions not known to the Company may exist now or in the future which would result in liability to the Company for remediation or fines, either under existing laws and regulations or future changes to such requirements.

Mold growth may occur when excessive moisture accumulates in buildings or on building materials, particularly if the moisture problem remains undiscovered or is not addressed over a period of time. Although the occurrence of mold at multifamily and other structures, and the need to remediate such mold, is not a new phenomenon, there has been increased awareness in recent years that certain molds may in some instances lead to adverse health effects, including allergic or other reactions. There have been only limited cases of mold identified to us. We do not currently anticipate that we will incur any material liabilities relating to mold.

Additionally, we occasionally have been involved in managing, leasing and operating various properties for third parties. Consequently, we may be considered to have been an operator of such properties and, therefore, potentially liable for removal or remediation costs or other potential costs which could relate to hazardous or toxic substances. We are not aware of any material environmental liabilities with respect to properties managed by us for such third parties.

We may incur increased energy and other costs resulting from the climate change regulations.

The current concerns about climate change have resulted in various treaties, laws and regulations which are intended to limit carbon emissions. The Company believes these laws being enacted or proposed may cause energy and waste removal costs at our properties to increase, but we do not expect the direct impact of these increases to be material to our results of operations. Increased costs relating to energy either would be the responsibility of our residents directly or in large part may be passed through by us to our residents through the utility recovery programs. We may be able to pass increased waste removal costs on to our residents in the form of increased rental rates. If this is not possible in the current economic environment, it is still not expected that these additional costs would affect the Company's financial performance in any material way.

Financing and compliance requirements could limit our income and the ability to raise rents.

As a requirement relating to some of our financing, or, in some instances, relating to zoning or other municipal approvals, we have committed to make some of the apartments in a community available to households whose income does not exceed certain thresholds and/or to limit rent increases. As of December 31, 2009, approximately 10% of our apartment units were under some form of such limitations. These commitments typically expire after a period of time, and may limit our ability to raise rents aggressively and, in consequence, can also limit increases in the value of the communities subject to these restrictions.

Real Estate Financing Risks

The current instability in the credit markets could adversely affect our ability to obtain financing or re-financing at favorable rates.

As of December 31, 2009, we had approximately \$2.11 billion of mortgage debt, a significant portion of which is subject to balloon payments. We do not expect to have cash flows from operations to make all of these balloon payments. The mortgage debt matures as follows:

2010	\$ 146 million
2011	299 million
2012	127 million
2013	205 million
2014	96 million
Thereafter	1,240 million

In addition, in 2006, the Company issued \$200 million of exchangeable notes with a coupon rate of 4.125%. The outstanding principal balance of the notes is \$140 million. Holders of the notes may require the Company to repurchase the notes on November 1, 2011. Based on the fact that the current stock price for the Company's Common Stock is well below the exchange rate on the notes, we anticipate that the holders will exercise their repurchase rights.

Our ability to refinance these obligations and to obtain new financing could be negatively impacted by the instability and tightening in the credit and capital markets which has led to an increase in spreads and pricing of secured and

unsecured debt. Our established relationship with our lenders, including Fannie Mae and Freddie Mac, have provided some insulation to us from the turmoil being experienced by many other real estate companies. The Company has benefited from borrowing from Fannie Mae and Freddie Mac, but there are no assurances that these entities will remain in existence and will lend to the Company in the future. The Company has experienced more restrictive loan to value and debt service coverage ratio limits and an expansion in credit spreads. Continued turmoil in the capital markets could negatively impact the Company's ability to make acquisitions, develop communities, obtain new financing, and refinance existing borrowing at competitive rates. If we cannot refinance or extend the maturity of some of our current debt, the properties that are mortgaged could be foreclosed upon. This could adversely affect our cash flow and, consequently, the amount available for distribution to our stockholders. In order to finance the repurchase of the exchangeable notes, we might be forced to sell some of the properties at otherwise unacceptable prices or to issue equity at prices that would dilute the interests of our current stockholders.

The Company in part relies on its line of credit to meet its short-term liquidity requirements.

As of December 31, 2009, the Company had an unsecured line of credit agreement with M&T Bank, as administrative agent and lead bank, of \$175 million which expires August 31, 2011, with an optional one-year extension. The credit facility succeeds the \$140 million credit facility that matured on September 1, 2009. The Company had \$53.5 million outstanding under the credit facility on December 31, 2009.

The credit agreement relating to the line of credit requires the Company to maintain certain financial covenants, ratios and measurements. A default in these requirements, if uncured, could result in a termination of the line of credit and a requirement that we repay outstanding amounts, which could adversely affect our liquidity and increase our financing costs.

Rising interest rates could adversely affect operations and cash flow.

As of December 31, 2009, approximately 89% of our debt was at fixed rates. This limits our exposure to changes in interest rates. Prolonged interest rate increases, however, could negatively affect our ability to make acquisitions, to dispose of properties at favorable prices, to develop properties and to refinance existing borrowings at acceptable rates.

There is no legal limit on the amount of debt we can incur.

The Board of Directors has adopted a policy of limiting our indebtedness to approximately 55% of our total market capitalization (with the equity component of total market capitalization based on the per share NAV presented to our Board of Directors at its most recent Board meeting), but our organizational documents do not contain any limitation on the amount or percentage of indebtedness we may incur. Accordingly, the Board of Directors could alter or eliminate its current policy on borrowing. If this policy were changed, we could become more highly leveraged, resulting in an increase in debt service that could adversely affect our ability to make expected distributions to stockholders and increase the risk of default on our indebtedness. Our NAV fluctuates based on a number of factors. Our line of credit agreement limits the amount of indebtedness we may incur.

Federal Income Tax Risks

There is no assurance that we will continue to qualify as a REIT.

We believe that we have been organized and have operated in such manner so as to qualify as a REIT under the Internal Revenue Service Code, commencing with our taxable year ended December 31, 1994. A REIT generally is not taxed at the corporate level on income it currently distributes to its shareholders as long as it distributes currently at least 90% of its taxable income (excluding net capital gains). No assurance can be provided, however, that we have qualified or will continue to qualify as a REIT or that new legislation, Treasury Regulations, administrative

interpretations or court decisions will not significantly change the tax laws with respect to our qualification as a REIT or the federal income tax consequences of such qualification.

We are required to make certain distributions to qualify as a REIT, and there is no assurance that we will have the funds necessary to make the distributions.

In order to continue to qualify as a REIT, we currently are required each year to distribute to our stockholders at least 90% of our taxable income (excluding net capital gains). In addition, we will be subject to a 4% nondeductible excise tax on the amount, if any, by which certain distributions made by us with respect to the calendar year are less than the sum of 85% of our ordinary income, 95% of our capital gain net income for that year, and any undistributed taxable income from prior periods. We intend to make distributions to our stockholders to comply with the 90% distribution requirement and to avoid the nondeductible excise tax and will rely for this purpose on distributions from the Operating Partnership. However, differences in timing between taxable income and cash available for distribution could require us to borrow funds or to issue additional equity to enable us to meet the 90% distribution requirement (and, therefore, to maintain our REIT qualification) and to avoid the nondeductible excise tax. The Operating Partnership is required to pay (or reimburse us, as its general partner, for) certain taxes and other liabilities and expenses that we incur, including any taxes that we must pay in the event we were to fail to qualify as a REIT. In addition, because we are unable to retain earnings (resulting from REIT distribution requirements), we will generally be required to refinance debt that matures with additional debt or equity. There can be no assurance that any of these sources of funds, if available at all, would be available to meet our distribution and tax obligations.

Our failure to qualify as a REIT would have adverse consequences.

If we fail to qualify as a REIT, we will be subject to federal income tax (including any applicable alternative minimum tax) on our taxable income at regular corporate rates. In addition, unless entitled to relief under certain statutory provisions, we will be disqualified from treatment as a REIT for the four taxable years following the year during which REIT qualification is lost. The additional tax burden on us would significantly reduce the cash available for distribution by us to our stockholders. Our failure to qualify as a REIT could reduce materially the value of our common stock and would cause all our distributions to be taxable as ordinary income to the extent of our current and accumulated earnings and profits (although, subject to certain limitations under the Code, corporate distributees may be eligible for the dividends received deduction with respect to these distributions).

The Operating Partnership intends to qualify as a partnership but there is no guaranty that it will qualify.

We believe that the Operating Partnership qualifies as a partnership for federal income tax purposes. No assurance can be provided, however, that the Internal Revenue Service (the "IRS") will not challenge its status as a partnership for federal income tax purposes, or that a court would not sustain such a challenge. If the IRS were to be successful in treating the Operating Partnership as an entity that is taxable as a corporation, we would cease to qualify as a REIT because the value of our ownership interest in the Operating Partnership would exceed 5% of our assets and because we would be considered to hold more than 10% of the voting securities of another corporation. Also, the imposition of a corporate tax on the Operating Partnership would reduce significantly the amount of cash available for distribution to its limited partners. Finally, the classification of the Operating Partnership as a corporation would cause its limited partners to recognize gain (upon the event that causes the Operating Partnership to be classified as a corporation) at least equal to their "negative capital accounts" (and possibly more, depending upon the circumstances).

Other Risks

The ability of our stockholders to effect a change of control is limited by certain provisions of our Articles of Incorporation as well as by Maryland law and our Executive Retention Plan.

Our Articles of Amendment and Restatement of the Articles of Incorporation, as amended (the "Articles of Incorporation"), authorize the Board of Directors to issue up to a total of 80 million shares of common stock, 10 million shares of excess stock and 10 million shares of preferred stock and to establish the rights and preferences of any shares issued. Further, under the Articles of Incorporation, the stockholders do not have cumulative voting rights.

In order for us to maintain our qualification as a REIT, not more than 50% in value of our outstanding stock may be owned, directly or indirectly, by five or fewer individuals (as defined in the Code to include certain entities) at any time during the last half of its taxable year. We have limited ownership of the issued and outstanding shares of common stock by any single stockholder to 8.0% of the aggregate value of our outstanding shares.

The percentage ownership limit described above, the issuance of preferred stock in the future and the absence of cumulative voting rights could have the effect of: (i) delaying or preventing a change of control of us even if a change in control were in the stockholders' interest; (ii) deterring tender offers for our common stock that may be beneficial to the stockholders; or (iii) limiting the opportunity for stockholders to receive a premium for their common stock that might otherwise exist if an investor attempted to assemble a block of our common stock in excess of the percentage ownership limit or otherwise to effect a change of control of us.

As a Maryland corporation, we are subject to the provisions of the Maryland General Corporation Law. Maryland law imposes restrictions on some business combinations and requires compliance with statutory procedures before some mergers and acquisitions may occur, which may delay or prevent offers to acquire us or increase the difficulty of completing any offers, even if they are in our stockholders' best interests. In addition, other provisions of the Maryland General Corporation Law permit the Board of Directors to make elections and to take actions without stockholder approval (such as classifying our Board such that the entire Board is not up for re-election annually) that, if made or taken, could have the effect of discouraging or delaying a change in control.

Also, to assure that our management has appropriate incentives to focus on our business and properties in the face of a change of control situation, we have adopted an executive retention plan which provides some key employees with salary, bonus and some benefits continuation in the event of a change of control.

Potential conflicts of interest could affect some directors' decisions.

Unlike persons acquiring common stock, certain of our directors, who constitute less than a majority of the Board of Directors, own a significant portion of their interest in us through UPREIT Units. As a result of their status as holders of UPREIT Units, those directors and other limited partners may have interests that conflict with stockholders with respect to business decisions affecting us and the Operating Partnership. In particular, those directors may suffer different or more adverse tax consequences than us upon the sale or refinancing of some of the properties as a result of unrealized gain attributable to those properties. Thus, those directors and the stockholders may have different objectives regarding the appropriate pricing and timing of any sale or refinancing of properties. In addition, those directors, as limited partners of the Operating Partnership, have the right to approve certain fundamental transactions such as the sale of all or substantially all of the assets of the Operating Partnership, merger or consolidation or dissolution of the Operating Partnership and certain amendments to the Operating Partnership Agreement.

The future sale of shares under our At-The-Market offering and other programs may negatively impact our stock price.

In December 2009, the Company filed a Prospectus Supplement pursuant to a previously filed registration statement. Pursuant to the Prospectus Supplement, the Company may sell up to 3.7 million common shares from time to time in "at the market offerings" or negotiated transactions (not to exceed \$150 million of gross proceeds). Prior to December 31, 2009, the Company issued 871,600 common shares under this offering. Sales of substantial amounts of shares of common stock in the public market or the perception that such sales might occur could adversely affect the market price of the common stock.

As of December 31, 2009, the Operating Partnership has issued and outstanding approximately 11.7 million UPREIT Units held by persons other than us or the QRS. The UPREIT Units may be exchanged on a one-for-one basis for shares of Common Stock under certain circumstances. In addition, Home Properties has granted options to purchase shares of stock to certain directors, officers and employees of Home Properties, of which, as of December 31, 2009, 3.2 million options remained outstanding and unexercised.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

As of December 31, 2009, the Owned Properties consisted of 105 multifamily residential communities containing 35,797 apartment units. In 2009, the Company sold five communities with a total of 1,333 units in three transactions for total consideration of \$108.3 million.

The Owned Properties are generally located in established markets in suburban neighborhoods and are well maintained and well leased. Average physical occupancy at the Owned Properties was 94.8% for 2009. Occupancy is defined as total possible rental income, net of vacancy; as a percentage of total possible rental income. Total possible rental income is determined by valuing occupied units at contract rates and vacant units at market rents. The Owned Properties are typically two- and three-story garden style apartment buildings in landscaped settings and a majority are of brick or other masonry construction. The Company believes that its strategic focus on appealing to middle income residents and the quality of the services it provides to such residents results in lower resident turnover. Average turnover at the Owned Properties was approximately 40% for 2009, which is significantly below the national average of approximately 52% for garden style apartments.

Resident leases are generally for a one year term. Security deposits equal to one month's rent or less are generally required.

Certain of the Owned Properties collateralize mortgage loans. See Schedule III contained herein (Pages 84 to 86).

The table on the following pages illustrates certain of the important characteristics of the Owned Properties as of December 31, 2009.

Communities Wholly Owned and Managed by Home Properties

Regional Area		# Of Apts	Age In Years	Year Acq/De Ft	Average Apt Size (Sq Ft)	(2)	(3)	(3)	Avg Mo Rent Rate per Apt	Avg Mo Rent Rate per Apt	12/31/2009 Total Cost (000)

- (1) "Core Communities" represents the 34,768 apartment units owned consistently throughout 2009 and 2008.
- (2) "Resident Turnover" reflects, on an annual basis, the number of moveouts, divided by the total number of apartment units.
- (3) "Average % Occupancy" is the average physical occupancy for the years ended December 31, 2009 and 2008.
- (4) For communities acquired during 2008, this is the average occupancy from the date of acquisition.
- (5) Trexler Park West construction was completed in 2008.

Property Development

The Company has the ability to develop new market-rate communities. It plans to engage in development activity only in markets in which it currently is doing business to add net asset value and supplement future earnings and growth. It expects to develop new apartment communities on raw land and on land adjacent to existing Owned Properties, as well as to increase the density of units at some communities currently owned.

1200 East West Highway is in Silver Spring, Maryland and was under construction during 2008 and 2009. It is a 14-story high rise with 247 apartments and 10,600 square feet of retail or nonresidential space that is expected to be completed in the second quarter of 2010 at a total cost of \$82 million. Initial occupancy is expected in March, 2010 with stabilization anticipated after a one-year lease-up period. The costs associated with construction in progress for this development were \$73 million as of December 31, 2009.

The Courts at Huntington Station, just south of Old Town Alexandria in Fairfax County, Virginia was also under construction during 2008 and 2009. It is a podium design, with 421 units, adjacent to the Huntington Metro station and consists of four, four-story buildings. Construction on Phase I (202 units) is expected to be completed during the second quarter of 2010, with initial occupancy expected in April, 2010 and the lease-up period is projected to last eleven months. Construction on Phase II (219 units) has commenced and is scheduled to be complete in the second quarter of 2011, reaching stabilized occupancy a year later. Total costs are estimated at \$127 million, with \$80 million construction in progress for this development as of December 31, 2009.

The Company had three projects in the pre-construction phase during 2009:

- Ripley Street, an approximately 300-unit high rise, is located in Silver Spring, Maryland. The earliest time that construction potentially could start is during the second quarter of 2011, with a total cost projected of \$106 million. The pre-construction costs for this project, consisting mostly of land value, were \$19 million as of December 31, 2009.
 - Cobblestone Square, an approximately 300-unit garden apartment community, is located in Fredericksburg, Virginia. Certain approvals are required before construction could potentially begin either later in 2010 or early 2011, with total costs projected of \$53 million. The pre-construction costs, consisting mostly of land value, were \$13 million as of December 31, 2009.
- Falkland Chase, located in Silver Spring, Maryland, currently has 450 garden apartments constructed between 1936 and 1939. The Company is planning on redeveloping the North parcel, which will be renamed Falkland North. The Company is in the very early stages of design and approval, and currently projects to redevelop this parcel into approximately 1,100 units. Construction is expected to start at the earliest during 2012, with at a total cost projected of \$315 million. As this is a large project, the Company may decide to pursue a joint venture partner. The pre-construction costs associated with this project were \$2 million and are included in other assets as of December 31, 2009.

Property Management

As of December 31, 2009, the Managed Properties consist of two multifamily communities, one 868 unit community managed as general partner in Columbus, Ohio and one fee-managed 282 unit community in Annapolis, Maryland.

The Company may pursue the management of additional properties not owned by the Company, but will only do so when such additional properties can be effectively and efficiently managed in conjunction with other properties owned or managed by Home Properties, or where the Company views the properties as potential acquisitions in desirable

markets.

23

Supplemental Property Information

At December 31, 2009, none of our properties have an individual net book value equal to or greater than ten percent of the total assets of the Company or would have accounted for ten percent or more of the Company's aggregate gross revenues for 2009. There is no resident who has one or more leases which, in the aggregate, account for more than 10% of the aggregate gross revenues for the year ended December 31, 2009.

Item 3. Legal Proceedings

The Company is subject to a variety of legal actions for personal injury or property damage arising in the ordinary course of its business, most of which are covered by insurance. Various claims of employment and resident discrimination are also periodically brought. While the resolution of these matters cannot be predicted with certainty, management believes that the final outcome of such legal proceedings and claims will not have a material adverse effect on the Company's liquidity, financial position or results of operations.

Item 4. Submission of Matters to Vote of Security Holders

None.

Item 4A. Executive Officers

The following table sets forth, as of February 19, 2010, the nine executive officers of the Company, together with their respective ages, positions and offices.

Name	Age	Position
Edward J. Pettinella	58	President and Chief Executive Officer of Home Properties and HPRS
David P. Gardner	54	Executive Vice President and Chief Financial Officer of Home Properties and HPRS
Ann M. McCormick	53	Executive Vice President, General Counsel and Secretary of Home Properties and HPRS
Lisa M. Critchley	48	Senior Vice President, Human Resources of Home Properties
Scott A. Doyle	48	Senior Vice President, Strategic Property Management of Home Properties and HPRS
Donald R. Hague	58	Senior Vice President, Development of Home Properties
Robert J. Luken	45	Senior Vice President, Chief Accounting Officer and Treasurer of Home Properties and HPRS
Bernard J. Quinn	53	Senior Vice President, Property Management Operations of Home Properties
John E. Smith	59	Senior Vice President and Chief Investment Officer of Home Properties and HPRS

Edward J. Pettinella has served as President and Chief Executive Officer of the Company since January 1, 2004. He is also a director. He joined the Company in 2001 as an Executive Vice President and director. He is also the President and Chief Executive Officer of HPRS. From 1997 until February 2001, Mr. Pettinella served as President, Charter One Bank of New York and Executive Vice President of Charter One Financial, Inc. From 1980 through 1997, Mr. Pettinella served in several managerial capacities for Rochester Community Savings Bank, Rochester, NY, including the positions of Chief Operating Officer and Chief Financial Officer. Mr. Pettinella serves on the Board of Directors of Rochester Business Alliance, United Way of Greater Rochester, The Lifetime Healthcare Companies, National Multi Housing Council and Syracuse University School of Business and is a member of the Board of Governors of the

National Association of Real Estate Investment Trusts. He is also a member of Urban Land Institute. Mr. Pettinella is a graduate of the State University at Geneseo and holds an MBA Degree in finance from Syracuse University.

David P. Gardner has served as Executive Vice President since 2004 and a Vice President and Chief Financial Officer of the Company since its inception. He holds the same titles in HPRS. Mr. Gardner joined Home Leasing in 1984 as Vice President and Controller. In 1989, he was named Treasurer of Home Leasing and Chief Financial Officer in December 1993. From 1977 until joining Home Leasing, Mr. Gardner was an accountant at Cortland L. Brovitz & Co. Mr. Gardner is a graduate of the Rochester Institute of Technology.

Ann M. McCormick has served as Executive Vice President since 2004 and a Vice President, General Counsel and Secretary of the Company since its inception. She holds the same titles in HPRS. Mrs. McCormick joined Home Leasing in 1987 and was named Vice President, Secretary and General Counsel in 1991. Prior to joining Home Leasing, she was an associate with the law firm of Nixon Peabody LLP. Mrs. McCormick is a graduate of Colgate University and holds a Juris Doctor from Cornell University.

Lisa M. Critchley has served as Senior Vice President since joining the Company in June 2007. Prior to joining the Company, she was employed by ALSTOM Signaling, Inc. as Director of Human Resources since 2004. She was an Assistant Dean at the William E. Simon School of Business Administration from 1999 until 2004. Mrs. Critchley is a graduate of St. John Fisher College and holds an MBA from the E. Phillip Saunders College of Business of the Rochester Institute of Technology.

Scott A. Doyle has served as Senior Vice President since 2000, and, from 1997 until 2000, was a Vice President of the Company. He holds the same title in HPRS. He joined Home Properties in 1996 as a Regional Property Manager. Mr. Doyle is a Certified Property Manager (CPM) as designated by the Institute of Real Estate Management. Prior to joining Home Properties, he worked with CMH Properties, Inc., Rivercrest Realty Associates and Arcadia Management Company. He is a graduate of State University at Plattsburgh, New York.

Donald R. Hague has served as Senior Vice President since January 1, 2008. He joined the Company in 2006 as a Vice President. From 2000 until 2006, Mr. Hague was a Vice President of KSI Services, Inc. Prior to that, he worked with The Evans Company and was a partner in a land development and homebuilding company. He is a graduate of Davidson College and holds an MBA from George Washington University.

Robert J. Luken has served as Senior Vice President since 2004, and as Chief Accounting Officer since January, 2005. He has been the Company's Treasurer since 2000 and became a Vice President in 1997. He holds the same title in HPRS. He joined the Company in 1996, serving as its Controller. Prior to joining the Company, he was the Controller of Bell Corp. and an Audit Supervisor for PricewaterhouseCoopers LLP. Mr. Luken is a graduate of St. John Fisher College and holds an MBA from the William E. Simon Graduate School of Business Administration of the University of Rochester. He is a Certified Public Accountant. He is on the Board of Directors of The Bell Company, LLC.

Bernard J. Quinn has served as Senior Vice President since 2009 and Vice President since 2000. Prior to joining Home Properties, Mr. Quinn was a Regional Property Manager for Millcreek Realty Co. Home Properties purchased Millcreek's Philadelphia portfolio in 1997. Mr. Quinn is a graduate of Villanova University.

John E. Smith has served as Chief Investment Officer of the Company since January, 2006, and as Senior Vice President since 2001. From 1998 until 2001, he was a Vice President of the Company. He holds the same title in HPRS. Prior to joining the Company in 1997, Mr. Smith was general manager for Direct Response Marketing, Inc. and Executive Vice President for The Equity Network, Inc. Mr. Smith was Director of Investment Properties at Hunt Commercial Real Estate for 20 years. He has been a Certified Commercial Investment Member (CCIM) since 1982, a New York State Certified Instructor and has taught accredited commercial real estate courses at various institutions in four states.

PART II

Item 5. Market for the Registrant's Common Stock and Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information, Holders and Dividends

The Common Stock has been traded on the New York Stock Exchange ("NYSE") under the symbol "HME" since July 28, 1994. The following table sets forth for the previous two years the quarterly high and low sales prices per share reported on the NYSE, as well as all dividends paid with respect to the common stock.

	High	Low	Dividends
2009			
First Quarter	\$41.16	\$23.35	\$0.67
Second Quarter	\$39.95	\$29.71	\$0.67
Third Quarter	\$44.89	\$29.86	\$0.67
Fourth Quarter	\$49.23	\$37.55	\$0.67
2008			
First Quarter	\$52.22	\$39.17	\$0.66
Second Quarter	\$54.21	\$47.11	\$0.66
Third Quarter	\$60.39	\$46.81	\$0.66
Fourth Quarter	\$57.76	\$24.93	\$0.67

As of February 19, 2010, the Company had approximately 3,523 shareholders of record, 34,966,801 common shares (plus 11,595,743 UPREIT Units convertible into 11,595,743 common shares) were outstanding, and the closing price was \$45.56. It is the Company's policy to pay dividends. The Company has historically paid dividends on a quarterly basis in the months of February, May, August and November.

On February 13, 2010, the Board of Directors declared a dividend of \$0.58 per share for the quarter ended December 31, 2009. The dividend is payable March 5, 2010 to shareholders of record on March 1, 2010.

Performance Graph

The following graph compares the cumulative return on the Company's common stock during the five year period ended December 31, 2009 to the cumulative return of the NAREIT All Equity REIT Index and the Standard and Poor's 500 Index for the same period. The total return assumes that dividends were reinvested quarterly at the same price as provided under the Company's Dividend Reinvestment and Direct Stock Purchase Plan and is based on a \$100 investment on December 31, 2004. Stockholders should note that past performance does not predict future results.

	12/31/2004	12/31/2005	12/31/2006	12/31/2007	12/31/2008	12/31/2009
HME	\$100.00	\$100.87	\$153.72	\$122.36	\$117.24	\$149.02
NAREIT Equity	\$100.00	\$112.17	\$151.49	\$127.72	\$79.54	\$101.80
S&P 500	\$100.00	\$104.91	\$121.48	\$128.15	\$80.74	\$102.11

Certain of our future filings with the SEC may "incorporate information by reference," including this Form 10-K. Unless we specifically state otherwise, this Performance Graph shall not be deemed to be incorporated by reference and shall not constitute soliciting material or otherwise be considered filed under the Securities Act of 1933, as amended, or the Securities Exchange Act of 1934, as amended.

Issuer Purchases of Equity Securities

In 1997, the Company's Board of Directors (the "Board") approved a stock repurchase program under which the Company may repurchase shares of its outstanding common stock and UPREIT Units ("Company Program"). The shares/units may be repurchased through open market or privately negotiated transactions at the discretion of Company management. The Board's action does not establish a specific target stock price or a specific timetable for share repurchase. In addition, participants in the Company's Stock Benefit Plan can use common stock of the Company that they already own to pay all or a portion of the exercise price payable to the Company upon the exercise of an option. In such event, the common stock used to pay the exercise price is returned to authorized but unissued status, and for purposes of this table is deemed to have been repurchased by the Company. At December 31, 2009, the Company had authorization to repurchase 2,291,160 shares of common stock and UPREIT Units under the Company Program.

The following table summarizes the total number of shares (units) repurchased by the Company during the quarter ended December 31, 2009:

Period	Total shares/units purchased (1)	Average price per share/unit	Maximum shares/units available under the Company Program(2)
Balance October 1, 2009:			2,291,160
October, 2009	-	-	2,291,160
November, 2009	5,083	\$44.35	2,291,160
December, 2009	3,440	46.07	2,291,160
Balance December 31, 2009:	8,523	\$45.05	2,291,160

(1) During the quarter ended December 31, 2009, and as permitted by the Company's Stock Benefit Plan, 8,523 shares of common stock already owned by option holders were used by those holders to pay the exercise price associated with their option exercise. These shares were returned to the status of authorized but unissued shares.

(2) During the quarter ended December 31, 2009, there were no shares (units) repurchased and no Board approved increases under the Company Program.

Edgar Filing: HOME PROPERTIES INC - Form 10-K

Item 6.

Selected Financial and Operating Information

The following table sets forth selected financial and operating data on a historical basis for the Company and should be read in conjunction with the financial statements appearing elsewhere in this Form 10-K (amounts in thousands, except per share and unit data).

	2009	2008	2007	2006	2005
Revenues:					
Rental income	\$462,086	\$452,142	\$434,475	\$378,704	\$336,962

Total apartment units owned at end of period	35,797	37,130	37,496	36,954	43,432

- (1) Other income includes property other income, interest income and other income.
- (2) Cumulative redeemable preferred stock was redeemable solely at the option of the Company.
- (3) Pursuant to the revised definition of Funds From Operations ("FFO") adopted by the Board of Governors of the National Association of Real Estate Investment Trusts ("NAREIT"), FFO is defined as net income (computed in accordance with accounting principles generally accepted in the United States of America ("GAAP")) excluding gains or losses from sales of property, noncontrolling interest, extraordinary items and cumulative effect of change in accounting principle plus depreciation from real property including adjustments for unconsolidated partnerships and joint ventures less dividends from non-convertible preferred shares. Because of the limitations of the FFO definition as published by NAREIT as set forth above, the Company has made certain interpretations in applying the definition. The Company believes all adjustments not specifically provided for are consistent with the definition.

In addition to presenting FFO in accordance with the NAREIT definition, we also disclose FFO after a specific and defined supplemental adjustment to exclude losses from early extinguishments of debt associated with the sales of real estate. The adjustment to exclude losses from early extinguishments of debt results when the sale of real estate encumbered by debt requires us to pay the extinguishment costs prior to the debt's stated maturity and to write-off unamortized loan costs at the date of the extinguishment. Such costs are excluded from the gains on sales of real estate reported in accordance with GAAP. However, we view the losses from early extinguishments of debt associated with the sales of real estate as an incremental cost of the sale transactions because we extinguished the debt in connection with the consummation of the sale transactions and we had no intent to extinguish the debt absent such transactions. We believe that this supplemental adjustment more appropriately reflects the results of our operations exclusive of the impact of our sale transactions.

Although our FFO as adjusted clearly differs from NAREIT's definition of FFO, and may not be comparable to that of other REITs and real estate companies, we believe it provides a meaningful supplemental measure of our operating performance because we believe that, by excluding the effects of the losses from early extinguishments of debt associated with the sales of real estate, management and investors are presented with an indicator of our operating performance that more closely achieves the objectives of the real estate industry in presenting FFO.

Neither FFO nor FFO as adjusted should be considered as an alternative to net income (determined in accordance with GAAP) as an indication of our performance. Neither FFO nor FFO as adjusted represents cash generated from operating activities determined in accordance with GAAP, and neither is a measure of liquidity or an indicator of our ability to make cash distributions. We believe that to further understand our performance, FFO and FFO as adjusted should be compared with our reported net income and considered in addition to cash flows in accordance with GAAP, as presented in our consolidated financial statements.

FFO and FFO as adjusted fall within the definition of "non-GAAP financial measure" set forth in Item 10(e) of Regulation S-K and as a result the Company is required to include in this report a statement disclosing the reasons why management believes that presentation of this measure provides useful information to investors. Management believes that in order to facilitate a clear understanding of the combined historical operating results of the Company, FFO and FFO as adjusted should be considered in conjunction with net income as presented in the consolidated financial statements included elsewhere herein. Management believes that by excluding gains or losses related to dispositions of property and excluding real estate depreciation (which can vary among owners of similar assets in similar condition based on historical cost accounting and useful life estimates), FFO and FFO as adjusted can help one compare the operating performance of a company's real estate between periods or as compared to different companies. In addition, FFO as adjusted by the Company ties the losses on early extinguishment of debt to the real estate which was sold triggering the extinguishment. The Company also uses these measures to compare its performance to that of its peer group. FFO and FFO as adjusted do not represent cash generated from operating

activities in accordance with GAAP and is not necessarily indicative of cash available to fund cash needs. Neither FFO nor FFO as adjusted should be considered as an alternative to net income as an indication of the Company's performance or to cash flow as a measure of liquidity.

(3)

(continued)

The following table sets forth the calculation of FFO and FFO as adjusted for the previous five years, beginning with "net income attributable to common shareholders" from the Company's audited financial statements prepared in accordance with GAAP (in thousands):

	2009	2008	2007	2006	2005
Net income attributable to common shareholders	\$34,419	\$66,081	\$56,605	\$104,766	\$75,233
Convertible preferred dividends (a)	-	-	-	-	880
Real property depreciation and amortization (b)	118,480	114,260	110,536	99,420	97,686
Noncontrolling interest	12,659	27,124	22,712	43,199	37,190
Gain on disposition of property	(24,314)	(51,560)	(42,126)	(110,514)	(73,383)
FFO – Basic and Diluted, as defined by NAREIT	141,244	155,905	147,727	136,871	137,606
Loss from early extinguishment of debt in connection with sale of real estate	4,927	1,413	890	9,770	-
FFO – Basic and Diluted, as adjusted by the Company	\$146,171	\$157,318	\$148,617	\$146,641	\$137,606
Weighted average common shares/units outstanding:					
Basic	45,274.4	45,200.4	46,520.7	47,262.7	47,714.3
Diluted (a)	45,405.7	45,541.3	47,185.2	47,902.4	48,411.3
FFO – Diluted, as adjusted by the Company per share/unit (a)	\$3.22	\$3.45	\$3.15	\$3.06	\$2.84

(a) The calculation of FFO and FFO per share assumes the conversion of dilutive common stock equivalents and convertible preferred stock. Therefore, the convertible preferred dividends are added to FFO, and the common stock equivalent is included in both the basic and diluted weighted average common shares/units outstanding.

(b) For 2005 only, includes amounts passed through from unconsolidated investments.

All REITs may not be using the same definition for FFO. Accordingly, the above presentation may not be comparable to other similarly titled measures of FFO of other REITs.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

Management's Discussion and Analysis of Financial Condition and Results of Operations is intended to facilitate an understanding of the Company's business and results of operations. It should be read in conjunction with the Consolidated Financial Statements, the accompanying Notes to Consolidated Financial Statements and the selected financial data included elsewhere in this Form 10-K. This Form 10-K, including the following discussion, contains forward-looking statements regarding future events or trends as described more fully under "Forward-Looking Statements" on Page 51. Actual results could differ materially from those projected in such statements as a result of the risk factors described in Item 1A, "Risk Factors," of this Form 10-K.

The Company is engaged in the ownership, management, acquisition, rehabilitation and development of residential apartment communities primarily in selected Northeast, Mid-Atlantic and Southeast Florida markets. As of December 31, 2009, the Company operated 107 apartment communities with 36,947 apartments. Of this total, the Company owned 105 communities, consisting of 35,797 apartments, managed as general partner one partnership that owned 868 apartments, and fee managed one property with 282 apartments for a third party.

Executive Summary

The Company operated during 2009 in a declining economic environment. For historical reference, from 2004 through 2007, both the Company's markets and the country as a whole experienced positive job growth; 1.0%, 1.1%, 1.2% and 1.0% for the Company, and 1.7%, 1.5%, 1.7% and 0.9% for the country, respectively. An increase in job growth leads to household formations, which creates an increase in demand for rental housing. In addition, during 2006 and continuing through most of 2009, the rising home mortgage interest rates and subsequent sub-prime lending crisis issues made it more difficult for residents who may have considered purchasing a home. After years of home ownership being the number one reason our residents gave for moving out of our apartment communities, it dropped to number two in 2007 and number three in both 2008 and 2009. In the three-year period from 2004 to 2006, home purchases represented, on average, over 19% of our move-outs. In 2007 and 2008, we experienced the first significant drop in years, with move out for home purchase declining to 15.5% and 12.0%, respectively. During 2009, we have seen stabilization of this measurement, with the percentage staying at the same 12.0% level as experienced in 2008. The government program of providing a tax credit for certain qualified buyers seems to have provided a floor, such that we do not anticipate this level going down in 2010. As referenced in our Market Demographics table on Page 8 of this report, job growth for our markets declined in 2009 with 2.1% negative growth over 2008, on top of a 1.2% decline in 2008. As there is usually a lag between job loss and its effect on household formation, this decline did not create a measurable decreased demand for our apartments until very late in 2008. This reduced demand put pressure on our ability in 2009 to raise rents and maintain occupancy, which will continue into 2010 with an unemployment rate of 8.1% in our markets at December 31, 2009, and no catalyst in the near term for increasing employment.

The reason for using rent concessions, and the ultimate level of those concessions, had been consistent historically with concessions in 2006 and 2007 at just slightly over 90 basis points. During late 2007, the Company started converting to a new property management operating system ("MRI") that wasn't fully rolled out until late spring 2008. The Company implemented a Lease Rent Options ("LRO") program that no longer uses concessions to set market rents. Concessions continued in the legacy operating system but were phased out during 2008 upon converting properties to the new program. Under the new program rents are set to market daily, based on apartment availability, local supply of and demand for units, and pricing. Therefore, concessions dropped considerably in 2008 to 37 basis points of rent potential, with a further drop in 2009 to 29 basis points. Rent concessions are still used, but sparingly,

in specific locations for specific units.
