VANECK VECTORS™ GLOBAL SPIN-OFF ETF***SUMMARY INFORMATION****INVESTMENT OBJECTIVE**

VanEck Vectors™ Global Spin-Off ETF (the Fund) seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the Horizon Kinetics Global Spin-Off Index (the Spin-Off Index).

FUND FEES AND EXPENSES

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund (Shares).

Shareholder Fees (*fees paid directly from your investment*) None
Annual Fund Operating Expenses
(expenses that you pay each year as a percentage of the value of your investment)

Management Fee	0.50%
Other Expenses	4.57%

Total Annual Fund Operating Expenses ^(a)	5.07%
Fee Waivers and Expense Reimbursement ^(a)	-4.52%

Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement ^(a)	0.55%
--	-------

^(a) Van Eck Associates Corporation (the Adviser) has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, trading expenses, taxes and extraordinary expenses) from exceeding 0.55% of the Fund's average daily net assets per year until at least February 1, 2018. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

EXPENSE EXAMPLE

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling Shares of the Fund.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5% annual return and that the Fund's operating expenses remain the same (except that the example incorporates the fee waiver and/or expense reimbursement arrangement for only the first year). Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

YEAR EXPENSES

1	\$	56
3	\$	1,115
5	\$	2,172
10	\$	4,807

PORTFOLIO TURNOVER

The Fund will pay transaction costs, such as commissions, when it purchases and sells securities (or turns over its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, may affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 58% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund normally invests at least 80% of its total assets in securities that comprise the Fund's benchmark index. The Spin-Off Index is comprised of securities of companies that have been spun-off from a parent company and are domiciled and listed in the U.S. or developed markets of Western Europe and Asia. To be considered a spin-off company, the initial distribution of a component security must have been distributed to shareholders of the distributing company (the

Market
Vectors
Global
Spin-Off
ETF.

VANECK VECTORS™ GLOBAL SPIN-OFF ETF (continued)

parent company) without any action having to be taken by the parent company shareholders. Additionally, the parent company must have distributed at least 80% of the component security to shareholders of the parent company, and shares of the component security must not have been publicly traded prior to the distribution. Such companies may include small- and medium-capitalization companies, foreign issuers and real estate investment trusts (REITs). As of December 31, 2016, the Spin-Off Index included 95 securities of companies with a market capitalization range of approximately \$485 million to \$102 billion and a weighted average market capitalization of \$5.3 billion. These amounts are subject to change. The Fund's 80% investment policy is non-fundamental and may be changed without shareholder approval upon 60 days' prior written notice to shareholders.

The Fund, using a passive or indexing investment approach, attempts to approximate the investment performance of the Index by investing in a portfolio of securities that generally replicates the Spin-Off Index. Unlike many investment companies that try to beat the performance of a benchmark index, the Fund does not try to beat the Spin-Off Index and does not seek temporary defensive positions when markets decline or appear overvalued. Indexing may eliminate the chance that the Fund will substantially outperform the Spin-Off Index but also may reduce some of the risks of active management, such as poor security selection. Indexing seeks to achieve lower costs and better after-tax performance by keeping portfolio turnover low in comparison to actively managed investment companies.

The Fund is classified as a non-diversified fund and, therefore, may invest a greater percentage of its assets in a particular issuer. The Fund may concentrate its investments in a particular industry or group of industries to the extent that the Spin-Off Index concentrates in an industry or group of industries. As of September 30, 2016, each of the consumer discretionary, real estate, information technology and industrials sectors represented a significant portion of the Spin-Off Index.

PRINCIPAL RISKS OF INVESTING IN THE FUND

Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's Shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Therefore, you should consider carefully the following risks before investing in the Fund, each of which could significantly and adversely affect the value of an investment in the Fund.

Risk of Investing in Spun-Off Companies. Companies may be spun-off from a parent company for any number of reasons, including that they possess one or several unattractive characteristics in the view of the parent company, such as low growth prospects, high capital requirements or an unfavorable capitalization structure. Investments in spun-off companies are subject to the risk that any of these characteristics will adversely affect the value of investments in the spun-off companies. There can be no assurance that a spun-off company will be financially independent or profitable, especially where the company represented a non-core or non-competitive business line of the parent company at the time of the spin-off. The Fund may invest in spun-off companies that have operated for less than three years (unseasoned companies). Investments in unseasoned companies are more speculative and entail greater risk than investments in companies with a more established operating record because, among other things, unseasoned companies tend to have a greater degree of change in earnings and business prospects, high levels of debt and limited product lines, markets and financial or managerial resources. The securities of unseasoned companies may have limited liquidity, which can result in their being priced higher or lower than might otherwise be the case. Certain spun-off companies with significant operating history may nonetheless share some of the characteristics of

unseasoned companies.

Equity Securities Risk. The value of the equity securities held by the Fund may fall due to general market and economic conditions, perceptions regarding the markets in which the issuers of securities held by the Fund participate, or factors relating to specific issuers in which the Fund invests. Equity securities are subordinated to preferred securities and debt in a company's capital structure with respect to priority in right to a share of corporate income, and therefore will be subject to greater dividend risk than preferred securities or debt instruments. In addition, while broad market measures of equity securities have historically generated higher average returns than fixed income securities, equity securities have generally also experienced significantly more volatility in those returns, although under certain market conditions fixed income securities may have comparable or greater price volatility.

Risk of Investing in Foreign Securities. The Fund invests in securities of issuers located in countries whose economies are heavily dependent upon trading with key partners. Any reduction in this trading may have an adverse impact on the Fund's investments. Investments in the securities of foreign issuers involve risks beyond those associated with investments in U.S. securities. These additional risks include greater market volatility, the availability of less reliable financial information, higher transactional and custody costs, taxation by foreign governments, decreased market liquidity and political instability. Because certain foreign securities markets may be limited in size, the activity of large traders may have an undue influence on the prices of securities that trade in such markets. Because the Fund may invest in securities denominated in foreign currencies

and some of the income received by the Fund may be in foreign currencies, changes in currency exchange rates may negatively impact the Fund's return. The risks of investing in emerging market countries are greater than risks associated with investments in foreign developed countries.

Foreign Currency Risk. Because the Fund's assets may be invested in securities denominated in foreign currencies, the income received by the Fund from these investments will generally be in foreign currencies. The Fund's exposure to foreign currencies and changes in the value of foreign currencies versus the U.S. dollar may result in reduced returns for the Fund. Moreover, the Fund may incur costs in connection with conversions between U.S. dollars and foreign currencies. The value of certain foreign countries' currencies may be subject to a high degree of fluctuation. This fluctuation may be due to changes in interest rates, investors' expectations concerning inflation and interest rates, the country's debt levels and trade deficit, the effects of monetary policies issued by the United States, foreign governments, central banks or supranational entities, the imposition of currency controls or other national or global political or economic developments. The economies of certain emerging market countries can be significantly affected by currency devaluations. Certain emerging market countries may also have managed currencies which are maintained at artificial levels relative to the U.S. dollar rather than at levels determined by the market. This type of system could lead to sudden and large adjustments in the currency, which in turn, can have a negative effect on the Fund and its investments.

Special Risk Considerations of Investing in European Issuers. The Fund may invest in securities issued by European issuers and, accordingly, may be subject to the risk of investing in such issuers. Investment in securities of issuers in Europe involves risks and special considerations not typically associated with investment in the U.S. securities markets. The Economic and Monetary Union of the European Union (EU) requires member countries to comply with restrictions on inflation rates, deficits, interest rates, debt levels and fiscal and monetary controls, each of which may significantly affect every country in Europe. Decreasing imports or exports, changes in governmental or EU regulations on trade, changes in the exchange rate of the euro, the default or threat of default by an EU member country on its sovereign debt, and/or an economic recession in an EU member country may have a significant adverse effect on the economies of EU member countries and on major trading partners outside Europe. The European financial markets have recently experienced volatility and have been adversely affected by concerns about economic downturns, credit rating downgrades, rising government debt levels and possible default on or restructuring of government debt in several European countries, including Greece, Ireland, Italy, Portugal and Spain. These events have adversely affected the value and exchange rate of the euro and may continue to significantly affect the economies of every country in Europe, including EU member countries that do not use the euro and non-EU member countries. In addition, in a referendum held on June 23, 2016, voters in the United Kingdom voted to leave the EU, creating economic and political uncertainty in its wake. Significant uncertainty exists regarding the timing of the United Kingdom's withdrawal from the EU and the effects such withdrawal will have on the euro, European economies and global markets.

Special Risk Considerations of Investing in Asian Issuers. The Fund may invest in securities issued by Asian issuers and, accordingly, may be subject to the risk of investing in such issuers. Investment in securities of issuers in Asia involves risks and special considerations not typically associated with investment in the U.S. securities markets. Certain Asian economies have experienced over-extension of credit, currency devaluations and restrictions, high unemployment, high inflation, decreased exports and economic recessions. Economic events in any one Asian country can have a significant effect on the entire Asian region as well as on major trading partners outside Asia, and any adverse effect on some or all of the Asian countries and regions in which the Fund invests. The securities markets in some Asian economies are relatively underdeveloped and may subject the Fund to higher action costs or greater uncertainty than investments in more developed securities markets. Such risks may adversely affect the value of the Fund's investments.

Risk of Investing in Depositary Receipts. The Fund may invest in depositary receipts which involve similar risks to those associated with investments in foreign securities. Depositary receipts are receipts listed on U.S. or foreign exchanges issued by banks or trust companies that entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares. Investments in depositary receipts may be less liquid than the underlying shares in their primary trading market and, if not included in the Spin-Off Index, may negatively affect the Fund's ability to replicate the performance of the Spin-Off Index.

Risk of Investing in the Information Technology Sector. To the extent that the information technology sector continues to represent a significant portion of the Fund, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the information technology sector. Information technology companies face intense competition, both domestically and internationally, which may have an adverse effect on profit margins. Information technology companies may have limited product lines, markets, financial resources or personnel. The products of information technology companies may face product obsolescence due to rapid technological developments and frequent new product introduction, unpredictable changes in growth rates and competition for the services of qualified personnel. Companies in the information

VANECK VECTORS™ GLOBAL SPIN-OFF ETF (continued)

technology sector are heavily dependent on patent protection and the expiration of patents may adversely affect the profitability of these companies.

Risk of Investing in the Real Estate Industry. To the extent that the real estate industry continues to represent a significant portion of the Fund, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the real estate industry. Real estate is highly sensitive to general and local economic conditions and developments, and characterized by intense competition and periodic overbuilding. Adverse economic, business or political developments affecting real estate could have a major effect on the value of the Fund's investments.

Risk of Investing in REITs. Investing in REITs exposes investors to the risks of owning real estate directly, as well as to risks that relate specifically to the way in which REITs are organized and operated. Operating REITs requires specialized management skills and the Fund indirectly bears management expenses along with the direct expenses of the Fund. REITs are also subject to certain provisions under federal tax law and the failure of a company to qualify as a REIT could have adverse consequences for the Fund.

Risk of Investing in the Consumer Discretionary Sector. To the extent that the consumer discretionary sector continues to represent a significant portion of the Fund, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the consumer discretionary sector. Companies engaged in the consumer discretionary sector are subject to fluctuations in supply and demand. These companies may also be adversely affected by changes in consumer spending as a result of world events, political and economic conditions, commodity price volatility, changes in exchange rates, imposition of import controls, increased competition, depletion of resources and labor relations.

Risk of Investing in the Industrials Sector. To the extent that the industrials sector continues to represent a significant portion of the Fund, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the industrials sector. Companies in the industrials sector may be adversely affected by changes in government regulation, world events and economic conditions. In addition, companies in the industrials sector may be adversely affected by environmental damages, product liability claims and exchange rates.

Risk of Investing in Small- and Medium-Capitalization Companies. Small- and medium-capitalization companies may be more volatile and more likely than large-capitalization companies to have narrower product lines, fewer financial resources, less management depth and experience and less competitive strength. In addition, these companies often have greater price volatility, lower trading volume and less liquidity than larger, more established companies. Returns on investments in securities of small-capitalization and medium-capitalization companies could trail the returns on investments in securities of large-capitalization companies.

Market Risk. The prices of the securities in the Fund are subject to the risks associated with investing in the securities market, including general economic conditions and sudden and unpredictable drops in value. An investment in the Fund may lose money.

Operational Risk. The Fund is exposed to operational risk arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or system failures. The Fund seeks to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and

may be inadequate for those risks that they are intended to address.

Index Tracking Risk. The Fund's return may not match the return of the Spin-Off Index for a number of reasons. For example, the Fund incurs a number of operating expenses not applicable to the Spin-Off Index and incurs costs associated with buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Spin-Off Index, which are not factored into the return of the Spin-Off Index. Transaction costs, including brokerage costs, will decrease the Fund's net asset value (NAV) to the extent not offset by the transaction fee payable by an Authorized Participant (AP). Market disruptions and regulatory restrictions could have an adverse effect on the Fund's ability to adjust its exposure to the required levels in order to track the Spin-Off Index. Errors in the Spin-Off Index data, the Spin-Off Index computations and/or the construction of the Spin-Off Index in accordance with its methodology may occur from time to time and may not be identified and corrected by the Spin-Off Index provider for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. In addition, the Fund may not be able to invest in certain securities included in the Spin-Off Index, or invest in them in the exact proportions in which they are represented in the Spin-Off Index, due to legal restrictions or limitations imposed by the governments of certain countries, a lack of liquidity on stock exchanges in which such securities trade, potential adverse tax consequences or other regulatory reasons. The Fund is expected to value certain of its investments based on fair value prices. To the extent the Fund calculates its NAV based on fair value prices and the value of the Spin-Off Index is based on securities' closing prices on local foreign markets (*i.e.*, the value of the Spin-Off Index is not based on fair value prices), the Fund's ability to track the Spin-Off Index may be adversely

affected. In addition, any issues the Fund encounters with regard to currency convertibility (including the cost of borrowing funds, if any) and repatriation may also increase Spin-Off Index tracking risk. For tax efficiency purposes, the Fund may sell certain securities to realize losses causing it to deviate from the performance of the Spin-Off Index. In light of the factors discussed above, the Fund's return may deviate significantly from the return of the Spin-Off Index.

Authorized Participant Concentration Risk. The Fund may have a limited number of financial institutions that act as APs, none of which are obligated to engage in creation or redemption transactions. To the extent that those APs exit the business, or are unable to or choose not to process creation and/or redemption orders, and no other AP is able to step forward to create and redeem, there may be a significantly diminished trading market for Shares or Shares may trade like closed-end funds at a discount (or premium) to NAV and possibly face trading halts and/or de-listing. The AP concentration risk may be heightened in scenarios where APs have limited or diminished access to the capital required to post collateral.

No Guarantee of Active Trading Market. While Shares are listed on NYSE Arca, Inc. (NYSE Arca), there can be no assurance that an active trading market for the Shares will be maintained. Further, secondary markets may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods in times of market stress because market makers and APs may step away from making a market in the Shares and in executing creation and redemption orders, which could cause a material deviation in the Fund's market price from its NAV.

Trading Issues. Trading in Shares on NYSE Arca may be halted due to market conditions or for reasons that, in the view of NYSE Arca, make trading in Shares inadvisable. In addition, trading in Shares on NYSE Arca is subject to trading halts caused by extraordinary market volatility pursuant to NYSE Arca's circuit breaker rules. There can be no assurance that the requirements of NYSE Arca necessary to maintain the listing of the Fund will continue to be met or will remain unchanged.

Replication Management Risk. An investment in the Fund involves risks similar to those of investing in any fund of equity securities traded on an exchange, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in security prices. However, because the Fund is not actively managed, unless a specific security is removed from the Spin-Off Index, the Fund generally would not sell a security because the security's issuer was in financial trouble. Therefore, the Fund's performance could be lower than funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers.

Fund Shares Trading, Premium/Discount Risk and Liquidity of Fund Shares. The market prices of the Shares may fluctuate in response to the Fund's NAV, the intraday value of the Fund's holdings and supply and demand for Shares. The Adviser cannot predict whether Shares will trade above, below, or at their most recent NAV. Disruptions to creations and redemptions, the existence of market volatility or potential lack of an active trading market for Shares (including through a trading halt), as well as other factors, may result in Shares trading at a significant premium or discount to NAV or to the intraday value of the Fund's holdings. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses. The securities held by the Fund may be traded in markets that close at a different time than NYSE Arca. Liquidity in those securities may be reduced after the applicable closing times. Accordingly, during the time when NYSE Arca is open but after the applicable market closing, fixing or settlement times, bid-ask spreads on NYSE Arca and the resulting premium or discount to the Shares' NAV may widen. Additionally, in stressed market conditions, the market for the Fund's Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings.

Non-Diversified Risk. The Fund is classified as a non-diversified fund under the Investment Company Act of 1940, as amended (the 1940 Act). Therefore, the Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in obligations of a single issuer. As a result, the gains and losses on a single investment may have a greater impact on the Fund's NAV and may make the Fund more volatile than more diversified funds.

Concentration Risk. The Fund's assets may be concentrated in a particular sector or sectors or industry or group of industries to the extent the Spin-Off Index concentrates in a particular sector or sectors or industry or group of industries. To the extent that the Fund is concentrated in a particular sector or sectors or industry or group of industries, the Fund will be subject to the risk that economic, political or other conditions that have a negative effect on that sector or sectors or industry or group of industries will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

PERFORMANCE

The bar chart that follows shows how the Fund performed for the calendar year shown. The table below the bar chart shows the Fund's average annual returns (before and after taxes). The bar chart and table provide an indication of the risks of investing in the Fund by showing the Fund's performance and by showing how the Fund's average annual returns for the one

VANECK VECTORS™ GLOBAL SPIN-OFF ETF (continued)

year and since inception periods compared with the Fund's benchmark index and a broad measure of market performance. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily indicative of how the Fund will perform in the future. Updated performance information is available online at www.vaneck.com.

Annual Total Returns (%) Calendar Year

Best Quarter: 11.71% 3Q 16

Worst Quarter: 2.59% 1Q 16

Average Annual Total Returns for the Periods Ended December 31, 2016

The after-tax returns presented in the table below are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your specific tax situation and may differ from those shown below. After-tax returns are not relevant to investors who hold Shares of the Fund through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

	Past One Year	Since Inception (6/9/2015)
VanEck Vectors Global Spin-Off ETF (return before taxes)	22.98%	5.48%
VanEck Vectors Global Spin-Off ETF (return after taxes on distributions)	22.18%	4.93%
VanEck Vectors Global Spin-Off ETF (return after taxes on distributions and sale of Fund Shares)	13.01%	3.97%
Horizon Kinetics Global Spin-Off Index (reflects no deduction for fees, expenses or taxes)	23.55%	6.05%
S&P 500® Index (reflects no deduction for fees, expenses or taxes)	11.96%	7.12%

PORTFOLIO MANAGEMENT

Investment Adviser. Van Eck Associates Corporation.

Portfolio Managers. The following individuals are primarily and jointly responsible for the day-to-day management of the Fund's portfolio:

Name	Title with Adviser	Date Began Managing the Fund
Hao-Hung (Peter) Liao	Portfolio Manager	June 2015
George Chao	Portfolio Manager	June 2015

PURCHASE AND SALE OF FUND SHARES

For important information about the purchase and sale of Fund Shares, tax information and payments to broker-dealers and other financial intermediaries, please turn to Summary Information About Purchases and Sales of Fund Shares, Taxes and Payments to Broker-Dealers and Other Financial Intermediaries on page 20 of this Prospectus.

VANECK VECTORS™ MORNINGSTAR INTERNATIONAL MOAT ETF***SUMMARY INFORMATION****INVESTMENT OBJECTIVE**

VanEck Vectors™ Morningstar International Moat ETF (the Fund) seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the Morningstar® Global ex-US Moat Focus IndexSM (the ex-US Moat Focus Index).

FUND FEES AND EXPENSES

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund (Shares).

Shareholder Fees (*fees paid directly from your investment*) None

Annual Fund Operating Expenses

(*expenses that you pay each year as a percentage of the value of your investment*)

Management Fee	0.50%
Other Expenses	1.12%
Total Annual Fund Operating Expenses ^(a)	1.62%
Fee Waivers and Expense Reimbursement ^(a)	-1.06%

Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement ^(a)	0.56%
--	-------

^(a) Van Eck Associates Corporation (the Adviser) has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, trading expenses, taxes and extraordinary expenses) from exceeding 0.56% of the Fund's average daily net assets per year until at least February 1, 2018. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

EXPENSE EXAMPLE

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling Shares of the Fund.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5% annual return and that the Fund's operating expenses remain the same (except that the example incorporates the fee waiver and/or expense reimbursement arrangement for only the first year). Although your actual costs may be higher or lower, based on these

assumptions, your costs would be:

YEAR EXPENSES

1	\$	57
3	\$	407
5	\$	781
10	\$	1,832

PORTFOLIO TURNOVER

The Fund will pay transaction costs, such as commissions, when it purchases and sells securities (or turns over its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, may affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 168% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund normally invests at least 80% of its total assets in securities that comprise the Fund's benchmark index. The ex-US Moat Focus Index is comprised of securities issued by companies that Morningstar, Inc. (Morningstar) determines have sustainable competitive advantages based on a proprietary methodology that considers quantitative and qualitative factors

* Prior to
 May 1, 2016,
 the Fund's
 name was
 Market
 Vectors
 Morningstar
 International
 Moat ETF.

VANECK VECTORS™ MORNINGSTAR INTERNATIONAL MOAT ETF (continued)

(wide and narrow moat companies). Wide moat companies are those that Morningstar believes will maintain its competitive advantage(s) for at least 20 years. Narrow moat companies are those that Morningstar believes will maintain its competitive advantage(s) for at least 10 years. Wide and narrow moat companies are selected from the universe of companies represented in the Morningstar® Global Markets ex-US IndexSM (the Parent Index), a broad market index representing 97% of developed ex-US and emerging markets market capitalization. The ex-US Moat Focus Index targets a select group of equity securities of wide and narrow moat companies, which are those companies that, according to Morningstar's equity research team, are attractively priced as of each ex-US Moat Focus Index review. Morningstar utilizes a momentum screen, in which momentum represents a security's 12-month price change. A momentum signal is used to exclude 20% of the wide and narrow moat stocks in the Parent Index with the worst 12-month momentum based on a 12-month price change of each stock. Out of the companies in the Parent Index that Morningstar determines are wide or narrow moat companies and display 12-month momentum in the top 80%, Morningstar selects companies to be included in the ex-US Moat Focus Index as determined by the ratio of the issuer's common stock price to Morningstar's estimate of fair value. Morningstar's fair value estimates are calculated using standardized, proprietary valuation models. Wide and narrow moat companies may include medium-capitalization companies. The Fund's 80% investment policy is non-fundamental and may be changed without shareholder approval upon 60 days' prior written notice to shareholders.

As of December 31, 2016, the ex-US Moat Focus Index included 79 securities of companies with a market capitalization range of between approximately \$1.28 billion and \$231.87 billion and a weighted average market capitalization of \$29.38 billion. These amounts are subject to change.

The Fund, using a passive or indexing investment approach, attempts to approximate the investment performance of the ex-US Moat Focus Index by investing in a portfolio of securities that generally replicates the ex-US Moat Focus Index. Unlike many investment companies that try to beat the performance of a benchmark index, the Fund does not try to beat the ex-US Moat Focus Index and does not seek temporary defensive positions when markets decline or appear overvalued. Indexing may eliminate the chance that the Fund will substantially outperform the ex-US Moat Focus Index but also may reduce some of the risks of active management, such as poor security selection. Indexing seeks to achieve lower costs and better after-tax performance by keeping portfolio turnover low in comparison to actively managed investment companies.

The Fund is classified as a non-diversified fund and, therefore, may invest a greater percentage of its assets in a particular issuer. The Fund may concentrate its investments in a particular industry or group of industries to the extent that the ex-US Moat Focus Index concentrates in an industry or group of industries. As of September 30, 2016, the ex-US Moat Focus Index was concentrated in the financial services sector, and the consumer discretionary sector represented a significant portion of the ex-US Moat Focus Index.

PRINCIPAL RISKS OF INVESTING IN THE FUND

Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's Shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Therefore, you should consider carefully the following risks before investing in the Fund, each of which could significantly and adversely affect the value of an investment in the Fund.

Equity Securities Risk. The value of the equity securities held by the Fund may fall due to general market and economic conditions, perceptions regarding the markets in which the issuers of securities held by the Fund participate, or factors relating to specific issuers in which the Fund invests. Equity securities are subordinated to preferred securities and debt in a company's capital structure with respect to priority in right to a share of corporate income, and therefore will be subject to greater dividend risk than preferred securities or debt instruments. In addition, while broad market measures of equity securities have historically generated higher average returns than fixed income securities, equity securities have generally also experienced significantly more volatility in those returns, although under certain market conditions fixed income securities may have comparable or greater price volatility. Morningstar may be incorrect in its assessment of the competitive advantages of the companies selected for inclusion in the ex-US Moat Focus Index, and the securities issued by such companies may underperform Morningstar's expectations and have an adverse effect on the Fund's overall performance. There can also be no assurance that wide or narrow moat companies will have sustainable competitive advantages for any period of time. Competitive advantages for wide and narrow moat companies may erode in a relatively short period of time due to, among other reasons, changes in laws and regulations, intellectual property rights, economic and political conditions and technological developments.

Risk of Investing in the Financial Services Sector. To the extent that the Fund continues to be concentrated in the financial services sector, the Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the financial services sector. Companies in the financial services sector may be subject to extensive government

regulation that affects the scope of their activities, the prices they can charge and the amount of capital they must maintain. The profitability of companies in the financial services sector may be adversely affected by increases in interest rates, by loan losses, which usually increase in economic downturns, and by credit rating downgrades. In addition, the financial services sector is undergoing numerous changes, including continuing consolidations, development of new products and structures and changes to its regulatory framework. Furthermore, some companies in the financial services sector perceived as benefitting from government intervention in the past may be subject to future government-imposed restrictions on their businesses or face increased government involvement in their operations. Increased government involvement in the financial services sector, including measures such as taking ownership positions in financial institutions, could result in a dilution of the Fund's investments in financial institutions. Recent developments in the credit markets may cause companies operating in the financial services sector to incur large losses, experience declines in the value of their assets and even cease operations.

Risk of Investing in the Consumer Discretionary Sector. To the extent that the consumer discretionary sector continues to represent a significant portion of the Fund, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the consumer discretionary sector. Companies engaged in the consumer discretionary sector are subject to fluctuations in supply and demand. These companies may also be adversely affected by changes in consumer spending as a result of world events, political and economic conditions, commodity price volatility, changes in exchange rates, imposition of import controls, increased competition, depletion of resources and labor relations.

Risk of Investing in Medium-Capitalization Companies. Medium-capitalization companies may be more volatile and more likely than large-capitalization companies to have narrower product lines, fewer financial resources, less management depth and experience and less competitive strength. In addition, these companies often have greater price volatility, lower trading volume and less liquidity than larger, more established companies. Returns on investments in securities of medium-capitalization companies could trail the returns on investments in securities of large-capitalization companies.

Risk of Investing in Foreign Securities. The Fund invests in securities of issuers located in countries whose economies are heavily dependent upon trading with key partners. Any reduction in this trading may have an adverse impact on the Fund's investments. Investments in the securities of foreign issuers involve risks beyond those associated with investments in U.S. securities. These additional risks include greater market volatility, the availability of less reliable financial information, higher transactional and custody costs, taxation by foreign governments, decreased market liquidity and political instability. Because certain foreign securities markets may be limited in size, the activity of large traders may have an undue influence on the prices of securities that trade in such markets. Because the Fund may invest in securities denominated in foreign currencies and some of the income received by the Fund may be in foreign currencies, changes in currency exchange rates may negatively impact the Fund's return. The risks of investing in emerging market countries are greater than risks associated with investments in foreign developed countries.

Foreign Currency Risk. Because the Fund's assets may be invested in securities denominated in foreign currencies, the income received by the Fund from these investments will generally be in foreign currencies. The Fund's exposure to foreign currencies and changes in the value of foreign currencies versus the U.S. dollar may result in reduced returns for the Fund. Moreover, the Fund may incur costs in connection with conversions between U.S. dollars and foreign currencies. The value of certain foreign countries' currencies may be subject to a high degree of fluctuation. This fluctuation may be due to changes in interest rates, investors' expectations concerning inflation and interest rates, the country's debt levels and trade deficit, the effects of monetary policies issued by the United States, foreign governments, central banks or supranational entities, the imposition of currency controls or other national or global political or economic developments. The economies of certain emerging market countries can be significantly affected

by currency devaluations. Certain emerging market countries may also have managed currencies which are maintained at artificial levels relative to the U.S. dollar rather than at levels determined by the market. This type of system could lead to sudden and large adjustments in the currency, which in turn, can have a negative effect on the Fund and its investments.

Risk of Investing in Emerging Market Issuers. Investments in securities of emerging market issuers are exposed to a number of risks that may make these investments volatile in price or difficult to trade. Emerging markets are more likely than developed markets to experience problems with the clearing and settling of trades, as well as the holding of securities by local banks, agents and depositories. Political risks may include unstable governments, nationalization, restrictions on foreign ownership, laws that prevent investors from getting their money out of a country and legal systems that do not protect property rights as well as the laws of the United States. Market risks may include economies that concentrate in only a few industries, securities issues that are held by only a few investors, liquidity issues and limited trading capacity in local exchanges and the possibility that markets or issues may be manipulated by foreign nationals who have inside information.

Special Risk Considerations of Investing in European Issuers. The Fund may invest in securities issued by European issuers and, accordingly, may be subject to the risk of investing in such issuers. Investment in securities of issuers in Europe involves risks and special considerations not typically associated with investment in the U.S. securities markets. The Economic

VANECK VECTORS™ MORNINGSTAR INTERNATIONAL MOAT ETF (continued)

and Monetary Union of the European Union (EU) requires member countries to comply with restrictions on inflation rates, deficits, interest rates, debt levels and fiscal and monetary controls, each of which may significantly affect every country in Europe. Decreasing imports or exports, changes in governmental or EU regulations on trade, changes in the exchange rate of the euro, the default or threat of default by an EU member country on its sovereign debt, and/or an economic recession in an EU member country may have a significant adverse effect on the economies of EU member countries and on major trading partners outside Europe. The European financial markets have recently experienced volatility and have been adversely affected by concerns about economic downturns, credit rating downgrades, rising government debt levels and possible default on or restructuring of government debt in several European countries, including Greece, Ireland, Italy, Portugal and Spain. These events have adversely affected the value and exchange rate of the euro and may continue to significantly affect the economies of every country in Europe, including EU member countries that do not use the euro and non-EU member countries. In addition, in a referendum held on June 23, 2016, voters in the United Kingdom voted to leave the EU, creating economic and political uncertainty in its wake. Significant uncertainty exists regarding the timing of the United Kingdom's withdrawal from the EU and the effects such withdrawal will have on the euro, European economies and global markets.

Special Risk Considerations of Investing in Asian Issuers. The Fund may invest in securities issued by Asian issuers and, accordingly, may be subject to the risk of investing in such issuers. Investment in securities of issuers in Asia involves risks and special considerations not typically associated with investment in the U.S. securities markets. Certain Asian economies have experienced over-extension of credit, currency devaluations and restrictions, high unemployment, high inflation, decreased exports and economic recessions. Economic events in any one Asian country can have a significant effect on the entire Asian region as well as on major trading partners outside Asia, and any adverse effect on some or all of the Asian countries and regions in which the Fund invests. The securities markets in some Asian economies are relatively underdeveloped and may subject the Fund to higher action costs or greater uncertainty than investments in more developed securities markets. Such risks may adversely affect the value of the Fund's investments.

Special Risk Considerations of Investing in Australian Issuers. Investments in Australian issuers may subject the Fund to regulatory, political, currency, security, and economic risk specific to Australia. The Australian economy is heavily dependent on exports from the agricultural and mining sectors. This makes the Australian economy susceptible to fluctuations in the commodity markets. Australia is also dependent on trading with key trading partners.

Risk of Investing in Depositary Receipts. The Fund may invest in depositary receipts which involve similar risks to those associated with investments in foreign securities. Depositary receipts are receipts listed on U.S. or foreign exchanges issued by banks or trust companies that entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares. Investments in depositary receipts may be less liquid than the underlying shares in their primary trading market and, if not included in the Index, may negatively affect the Fund's ability to replicate the performance of the Index.

Risk of Cash Transactions. Unlike other exchange-traded funds (ETFs), the Fund expects to effect its creations and redemptions partially for cash, rather than in-kind securities. Therefore, it may be required to sell portfolio securities and subsequently recognize gains on such sales that the Fund might not have recognized if it were to distribute portfolio securities in kind. As such, investments in Shares may be less tax-efficient than an investment in a conventional ETF.

Market Risk. The prices of the securities in the Fund are subject to the risks associated with investing in the securities market, including general economic conditions and sudden and unpredictable drops in value. An investment in the Fund may lose money.

Operational Risk. The Fund is exposed to operational risk arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or system failures. The Fund seeks to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate for those risks that they are intended to address.

High Portfolio Turnover Risk. The Fund may engage in active and frequent trading of its portfolio securities. High portfolio turnover may result in increased transaction costs to the Fund, including brokerage commissions, dealer mark-ups and other transaction costs on the sale of the securities and on reinvestment in other securities.

Index Tracking Risk. The Fund's return may not match the return of the ex-US Moat Focus Index for a number of reasons. For example, the Fund incurs a number of operating expenses not applicable to the ex-US Moat Focus Index and incurs costs associated with buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the ex-US Moat Focus Index, which are not factored into the return of the ex-US Moat Focus Index. Transaction costs, including brokerage costs, will decrease the Fund's net asset value (NAV) to the extent not offset by the transaction fee payable by an Authorized Participant (AP). Market disruptions and regulatory restrictions could have an adverse effect on the Fund's ability to adjust its exposure to the required levels in order to track the ex-US Moat Focus

Index. Errors in the ex-US Moat Focus Index data, the ex-US Moat Focus Index computations and/or the construction of the ex-US Moat Focus Index in accordance with its methodology may occur from time to time and may not be identified and corrected by the ex-US Moat Focus Index provider for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. In addition, the Fund may not be able to invest in certain securities included in the ex-US Moat Focus Index, or invest in them in the exact proportions in which they are represented in the ex-US Moat Focus Index, due to legal restrictions or limitations imposed by the governments of certain countries, a lack of liquidity on stock exchanges in which such securities trade, potential adverse tax consequences or other regulatory reasons. The Fund is expected to value certain of its investments based on fair value prices. To the extent the Fund calculates its NAV based on fair value prices and the value of the ex-US Moat Focus Index is based on securities closing prices on local foreign markets (*i.e.*, the value of the ex-US Moat Focus Index is not based on fair value prices), the Fund's ability to track the ex-US Moat Focus Index may be adversely affected. In addition, any issues the Fund encounters with regard to currency convertibility (including the cost of borrowing funds, if any) and repatriation may also increase ex-US Moat Focus Index tracking risk. The Fund may also need to rely on borrowings to meet redemptions, which may lead to increased expenses. For tax efficiency purposes, the Fund may sell certain securities to realize losses, causing it to deviate from the performance of the ex-US Moat Focus Index. In light of the factors discussed above, the Fund's return may deviate significantly from the return of the ex-US Moat Focus Index.

Authorized Participant Concentration Risk. The Fund may have a limited number of financial institutions that act as APs, none of which are obligated to engage in creation or redemption transactions. To the extent that those APs exit the business, or are unable to or choose not to process creation and/or redemption orders, and no other AP is able to step forward to create and redeem, there may be a significantly diminished trading market for Shares or Shares may trade like closed-end funds at a discount (or premium) to NAV and possibly face trading halts and/or de-listing. The AP concentration risk may be heightened in scenarios where APs have limited or diminished access to the capital required to post collateral.

No Guarantee of Active Trading Market. While Shares are listed on NYSE Arca, Inc. (NYSE Arca), there can be no assurance that an active trading market for the Shares will be maintained. Further, secondary markets may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods in times of market stress because market makers and APs may step away from making a market in the Shares and in executing creation and redemption orders, which could cause a material deviation in the Fund's market price from its NAV.

Trading Issues. Trading in Shares on NYSE Arca may be halted due to market conditions or for reasons that, in the view of NYSE Arca, make trading in Shares inadvisable. In addition, trading in Shares on NYSE Arca is subject to trading halts caused by extraordinary market volatility pursuant to NYSE Arca's circuit breaker rules. There can be no assurance that the requirements of NYSE Arca necessary to maintain the listing of the Fund will continue to be met or will remain unchanged.

Replication Management Risk. An investment in the Fund involves risks similar to those of investing in any fund of equity securities traded on an exchange, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in security prices. However, because the Fund is not actively managed, unless a specific security is removed from the ex-US Moat Focus Index, the Fund generally would not sell a security because the security's issuer was in financial trouble. Therefore, the Fund's performance could be lower than funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers.

Fund Shares Trading, Premium/Discount Risk and Liquidity of Fund Shares. The market prices of the Shares may fluctuate in response to the Fund's NAV, the intraday value of the Fund's holdings and supply and demand for

Shares. The Adviser cannot predict whether Shares will trade above, below, or at their most recent NAV. Disruptions to creations and redemptions, the existence of market volatility or potential lack of an active trading market for Shares (including through a trading halt), as well as other factors, may result in Shares trading at a significant premium or discount to NAV or to the intraday value of the Fund's holdings. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses. The securities held by the Fund may be traded in markets that close at a different time than NYSE Arca. Liquidity in those securities may be reduced after the applicable closing times. Accordingly, during the time when NYSE Arca is open but after the applicable market closing, fixing or settlement times, bid-ask spreads on NYSE Arca and the resulting premium or discount to the Shares' NAV may widen. Additionally, in stressed market conditions, the market for the Fund's Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings.

Non-Diversified Risk. The Fund is classified as a non-diversified fund under the Investment Company Act of 1940, as amended (the 1940 Act). Therefore, the Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in a single issuer. As a result, the gains and losses on a single investment may have a greater impact on the Fund's NAV and may make the Fund more volatile than more diversified funds.

VANECK VECTORS™ MORNINGSTAR INTERNATIONAL MOAT ETF (continued)

Concentration Risk. The Fund's assets may be concentrated in a particular sector or sectors or industry or group of industries to the extent the ex-US Moat Focus Index concentrates in a particular sector or sectors or industry or group of industries. To the extent that the Fund continues to be concentrated in the financial services sector, the Fund will be subject to the risk that economic, political or other conditions that have a negative effect on that sector will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

PERFORMANCE

The bar chart that follows shows how the Fund performed for the calendar year shown. The table below the bar chart shows the Fund's average annual returns (before and after taxes). The bar chart and table provide an indication of the risks of investing in the Fund by showing the Fund's performance and by showing how the Fund's average annual returns for the one year and since inception periods compared with the Fund's benchmark index and a broad measure of market performance. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily indicative of how the Fund will perform in the future. Updated performance information is available online at www.vaneck.com.

Annual Total Returns (%) Calendar Year

Best Quarter: 8.04% 3Q 16

Worst Quarter: -4.86% 2Q 16

Average Annual Total Returns for the Periods Ended December 31, 2016

The after-tax returns presented in the table below are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your specific tax situation and may differ from those shown below. After-tax returns are not relevant to investors who hold Shares of the Fund through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

	Past One Year	Since Inception (7/13/2015)
VanEck Vectors Morningstar International Moat ETF (return before taxes)	5.12%	-3.90%
VanEck Vectors Morningstar International Moat ETF (return after taxes on distributions)	4.51%	-4.43%
VanEck Vectors Morningstar International Moat ETF (return after taxes on distributions and sale of Fund Shares)	2.89%	-3.17%
Morningstar® Global ex-US Moat Focus Index SM (reflects no deduction for fees, expenses or taxes)	5.77%	-2.80%
S&P 500® Index (reflects no deduction for fees, expenses or taxes)	11.96%	6.78%

Investment Adviser. Van Eck Associates Corporation.

Portfolio Managers. The following individuals are primarily and jointly responsible for the day-to-day management of the Fund's portfolio:

Name	Title with Adviser	Date Began Managing the Fund
Hao-Hung (Peter) Liao	Portfolio Manager	July 2015
George Chao	Portfolio Manager	July 2015

PURCHASE AND SALE OF FUND SHARES

For important information about the purchase and sale of Fund Shares, tax information and payments to broker-dealers and other financial intermediaries, please turn to Summary Information About Purchases and Sales of Fund Shares, Taxes and Payments to Broker-Dealers and Other Financial Intermediaries on page 20 of this Prospectus.

VANECK VECTORS™ MORNINGSTAR WIDE MOAT ETF***SUMMARY INFORMATION****INVESTMENT OBJECTIVE**

VanEck Vectors™ Morningstar Wide Moat ETF (the Fund) seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the Morningstar® Wide Moat Focus IndexSM (the Wide Moat Focus Index).

FUND FEES AND EXPENSES

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund (Shares).

Shareholder Fees (*fees paid directly from your investment*) None

Annual Fund Operating Expenses

(*expenses that you pay each year as a percentage of the value of your investment*)

Management Fee	0.45%
Other Expenses	0.05%
Total Annual Fund Operating Expenses ^(a)	0.50%
Fee Waivers and Expense Reimbursement ^(a)	-0.01%

Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement ^(a)	0.49%
--	-------

^(a) Van Eck Associates Corporation (the Adviser) has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, trading expenses, taxes and extraordinary expenses) from exceeding 0.49% of the Fund's average daily net assets per year until at least February 1, 2018. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

EXPENSE EXAMPLE

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling Shares of the Fund.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5% annual return and that the Fund's operating expenses remain the same (except that the example incorporates the fee waiver and/or expense reimbursement arrangement for only the first year). Although your actual costs may be higher or lower, based on these

assumptions, your costs would be:

YEAR EXPENSES

1	\$	50
3	\$	159
5	\$	279
10	\$	627

PORTFOLIO TURNOVER

The Fund will pay transaction costs, such as commissions, when it purchases and sells securities (or turns over its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, may affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 178% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund normally invests at least 80% of its total assets in securities that comprise the Fund's benchmark index. The Wide Moat Focus Index is comprised of securities issued by companies that Morningstar, Inc. (Morningstar) determines to have sustainable competitive advantages based on a proprietary methodology that considers quantitative and qualitative factors (wide moat companies). Wide moat companies are selected from the universe of companies represented in the

* Prior to
 May 1,
 2016, the
 Fund's name
 was Market
 Vectors
 Morningstar
 Wide Moat
 ETF.

Morningstar® US Market IndexSM, a broad market index representing 97% of U.S. market capitalization. The Wide Moat Focus Index targets a select group of wide moat companies: those that according to Morningstar's equity research team are attractively priced as of each Wide Moat Focus Index review. Out of the companies in the Morningstar US Market Index that Morningstar determines are wide moat companies, Morningstar selects companies to be included in the Wide Moat Focus Index as determined by the ratio of Morningstar's estimate of fair value of the issuer's common stock to the price. Morningstar's equity research fair value estimates are calculated using a standardized, proprietary valuation model. Wide moat companies may include medium-capitalization companies. The Fund's 80% investment policy is non-fundamental and may be changed without shareholder approval upon 60 days prior written notice to shareholders.

As of December 31, 2016, the Wide Moat Focus Index included 50 securities of companies with a market capitalization range of between approximately \$2.64 billion to \$483.16 billion and a weighted average market capitalization of \$82.10 billion. These amounts are subject to change.

The Fund, using a passive or indexing investment approach, attempts to approximate the investment performance of the Wide Moat Focus Index by investing in a portfolio of securities that generally replicates the Wide Moat Focus Index. Unlike many investment companies that try to beat the performance of a benchmark index, the Fund does not try to beat the Wide Moat Focus Index and does not seek temporary defensive positions when markets decline or appear overvalued. Indexing may eliminate the chance that the Fund will substantially outperform the Wide Moat Focus Index but also may reduce some of the risks of active management, such as poor security selection. Indexing seeks to achieve lower costs and better after-tax performance by keeping portfolio turnover low in comparison to actively managed investment companies.

The Fund is classified as a non-diversified fund and, therefore, may invest a greater percentage of its assets in a particular issuer. The Fund may concentrate its investments in a particular industry or group of industries to the extent that the Wide Moat Focus Index concentrates in an industry or group of industries. As of September 30, 2016, the Wide Moat Focus Index was concentrated in the health care sector and each of consumer discretionary, industrials, information technology and financial services sectors represented a significant portion of the Wide Moat Focus Index.

PRINCIPAL RISKS OF INVESTING IN THE FUND

Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's Shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Therefore, you should consider carefully the following risks before investing in the Fund, each of which could significantly and adversely affect the value of an investment in the Fund.

Risk of Investing in the Health Care Sector. To the extent that the Fund continues to be concentrated in the health care sector, the Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the health care sector. Companies in the health care sector may be affected by extensive government regulation, restrictions on government reimbursement for medical expenses, rising costs of medical products and services, pricing pressure, an increased emphasis on outpatient services, limited number of products, industry innovation, changes in technologies and other market developments. Many health care companies are heavily dependent on patent protection. The expiration of patents may adversely affect the profitability of these companies. Many health care companies are subject to extensive litigation based on product liability and similar claims. Health care companies are subject to competitive forces that may make it difficult to raise prices and, in fact, may result in

price discounting. Many new products in the health care sector may be subject to regulatory approvals. The process of obtaining such approvals may be long and costly. Companies in the health care sector may be thinly capitalized and may be susceptible to product obsolescence.

Risk of Investing in the Consumer Discretionary Sector. To the extent that the consumer discretionary sector continues to represent a significant portion of the Fund, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the consumer discretionary sector. Companies engaged in the consumer discretionary sector are subject to fluctuations in supply and demand. These companies may also be adversely affected by changes in consumer spending as a result of world events, political and economic conditions, commodity price volatility, changes in exchange rates, imposition of import controls, increased competition, depletion of resources and labor relations.

Risk of Investing in the Industrials Sector. To the extent that the industrial sector continues to represent a significant portion of the Fund, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the industrials sector. Companies in the industrials sector may be adversely affected by changes in government regulation, world events and economic conditions. In addition, companies in the industrials sector may be adversely affected by environmental damages, product liability claims and exchange rates. The stock prices of companies in the industrials sector are affected by supply and demand both for their specific product or service and for industrial sector products in general. The products of manufacturing companies may face product obsolescence due to rapid technological

VANECK VECTORS™ MORNINGSTAR WIDE MOAT ETF (continued)

developments and frequent new product introduction. In addition, the industrials sector may also be adversely affected by changes or trends in commodity prices, which may be influenced or characterized by unpredictable factors.

Risk of Investing in the Information Technology Sector. To the extent that the information technology sector continues to represent a significant portion of the Fund, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the information technology sector. Information technology companies face intense competition, both domestically and internationally, which may have an adverse effect on profit margins. Information technology companies may have limited product lines, markets, financial resources or personnel. The products of information technology companies may face product obsolescence due to rapid technological developments and frequent new product introduction, unpredictable changes in growth rates and competition for the services of qualified personnel. Companies in the information technology sector are heavily dependent on patent protection and the expiration of patents may adversely affect the profitability of these companies.

Risk of Investing in the Financial Services Sector. To the extent that the financial services sector continues to represent a significant portion of the Fund, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the financial services sector. Companies in the financial services sector may be subject to extensive government regulation that affects the scope of their activities, the prices they can charge and the amount of capital they must maintain. The profitability of companies in the financial services sector may be adversely affected by increases in interest rates, by loan losses, which usually increase in economic downturns, and by credit rating downgrades. In addition, the financial services sector is undergoing numerous changes, including continuing consolidations, development of new products and structures and changes to its regulatory framework. Furthermore, some companies in the financial services sector perceived as benefitting from government intervention in the past may be subject to future government-imposed restrictions on their businesses or face increased government involvement in their operations. Increased government involvement in the financial services sector, including measures such as taking ownership positions in financial institutions, could result in a dilution of the Fund's investments in financial institutions. Recent developments in the credit markets may cause companies operating in the financial services sector to incur large losses, experience declines in the value of their assets and even cease operations.

Risk of Investing in Medium-Capitalization Companies. Medium-capitalization companies may be more volatile and more likely than large-capitalization companies to have narrower product lines, fewer financial resources, less management depth and experience and less competitive strength. In addition, these companies often have greater price volatility, lower trading volume and less liquidity than larger more established companies. Returns on investments in securities of medium-capitalization companies could trail the returns on investments in securities of large-capitalization companies

Equity Securities Risk. The value of the equity securities held by the Fund may fall due to general market and economic conditions, perceptions regarding the markets in which the issuers of securities held by the Fund participate, or factors relating to specific issuers in which the Fund invests. Equity securities are subordinated to preferred securities and debt in a company's capital structure with respect to priority in right to a share of corporate income, and therefore will be subject to greater dividend risk than preferred securities or debt instruments. In addition, while broad market measures of equity securities have historically generated higher average returns than fixed income securities, equity securities have generally also experienced significantly more volatility in those returns, although under certain market conditions fixed income securities may have comparable or greater price volatility. Morningstar may be incorrect in its assessment of the competitive advantages of the companies selected for inclusion in the Wide Moat

Focus Index, and the securities issued by such companies may underperform Morningstar's expectations and have an adverse effect on the Fund's overall performance. There can also be no assurance that wide moat companies will have sustainable competitive advantages for any period of time. Competitive advantages for wide moat companies may erode in a relatively short period of time due to, among other reasons, changes in laws and regulations, intellectual property rights, economic and political conditions and technological developments.

Market Risk. The prices of the securities in the Fund are subject to the risks associated with investing in the securities market, including general economic conditions and sudden and unpredictable drops in value. An investment in the Fund may lose money.

Operational Risk. The Fund is exposed to operational risk arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or system failures. The Fund seeks to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate for those risks that they are intended to address.

High Portfolio Turnover Risk. The Fund may engage in active and frequent trading of its portfolio securities. High portfolio turnover may result in increased transaction costs to the Fund, including brokerage commissions, dealer mark-ups and other transaction costs on the sale of the securities and on reinvestment in other securities.

Index Tracking Risk. The Fund's return may not match the return of the Wide Moat Focus Index for a number of reasons. For example, the Fund incurs a number of operating expenses not applicable to the Wide Moat Focus Index and incurs costs associated with buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Wide Moat Focus Index, which are not factored into the return of the Wide Moat Focus Index. Transaction costs, including brokerage costs, will decrease the Fund's net asset value (NAV) to the extent not offset by the transaction fee payable by an Authorized Participant (AP). Market disruptions and regulatory restrictions could have an adverse effect on the Fund's ability to adjust its exposure to the required levels in order to track the Wide Moat Focus Index. Errors in the Wide Moat Focus Index data, the Wide Moat Focus Index computations and/or the construction of the Wide Moat Focus Index in accordance with its methodology may occur from time to time and may not be identified and corrected by the Wide Moat Focus Index provider for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. In addition, the Fund may not be able to invest in certain securities included in the Wide Moat Focus Index, or invest in them in the exact proportions in which they are represented in the Wide Moat Focus Index, due to legal restrictions or limitations imposed by the governments of certain countries, a lack of liquidity on stock exchanges in which such securities trade, potential adverse tax consequences or other regulatory reasons. To the extent the Fund calculates its NAV based on fair value prices and the value of the Wide Moat Focus Index is based on securities' closing prices (*i.e.*, the value of the Wide Moat Focus Index is not based on fair value prices), the Fund's ability to track the Wide Moat Focus Index may be adversely affected. For tax efficiency purposes, the Fund may sell certain securities, and such sale may cause the Fund to realize a loss and deviate from the performance of Wide Moat Focus Index. In light of the factors discussed above, the Fund's return may deviate significantly from the return of the Wide Moat Focus Index.

Authorized Participant Concentration Risk. The Fund may have a limited number of financial institutions that act as APs, none of which are obligated to engage in creation or redemption transactions. To the extent that those APs exit the business, or are unable to or choose not to process creation and/or redemption orders, and no other AP is able to step forward to create and redeem, there may be a significantly diminished trading market for Shares or Shares may trade like closed-end funds at a discount (or premium) to NAV and possibly face trading halts and/or de-listing. The AP concentration risk may be heightened in scenarios where APs have limited or diminished access to the capital required to post collateral.

No Guarantee of Active Trading Market. While Shares are listed on NYSE Arca, Inc. (NYSE Arca), there can be no assurance that an active trading market for the Shares will be maintained. Further, secondary markets may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods in times of market stress because market makers and APs may step away from making a market in the Shares and in executing creation and redemption orders, which could cause a material deviation in the Fund's market price from its NAV.

Trading Issues. Trading in Shares on NYSE Arca may be halted due to market conditions or for reasons that, in the view of NYSE Arca, make trading in Shares inadvisable. In addition, trading in Shares on NYSE Arca is subject to trading halts caused by extraordinary market volatility pursuant to NYSE Arca's circuit breaker rules. There can be no assurance that the requirements of NYSE Arca necessary to maintain the listing of the Fund will continue to be met or will remain unchanged.

Replication Management Risk. An investment in the Fund involves risks similar to those of investing in any fund of equity securities traded on an exchange, such as market fluctuations caused by such factors as economic and political

developments, changes in interest rates and perceived trends in security prices. However, because the Fund is not actively managed, unless a specific security is removed from the Wide Moat Focus Index, the Fund generally would not sell a security because the security's issuer was in financial trouble. Therefore, the Fund's performance could be lower than funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers.

Fund Shares Trading, Premium/Discount Risk and Liquidity of Fund Shares. The market prices of the Shares may fluctuate in response to the Fund's NAV, the intraday value of the Fund's holdings and supply and demand for Shares. The Adviser cannot predict whether Shares will trade above, below, or at their most recent NAV. Disruptions to creations and redemptions, the existence of market volatility or potential lack of an active trading market for Shares (including through a trading halt), as well as other factors, may result in Shares trading at a significant premium or discount to NAV or to the intraday value of the Fund's holdings. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses. The securities held by the Fund may be traded in markets that close at a different time than NYSE Arca. Liquidity in those securities may be reduced after the applicable closing times. Accordingly, during the time when NYSE Arca is open but after the applicable market closing, fixing or settlement times, bid-ask spreads on NYSE Arca and the resulting premium or

VANECK VECTORS™ MORNINGSTAR WIDE MOAT ETF (continued)

discount to the Shares' NAV may widen. Additionally, in stressed market conditions, the market for the Fund's Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings.

Non-Diversified Risk. The Fund is classified as a non-diversified fund under the Investment Company Act of 1940, as amended (the 1940 Act). Therefore, the Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in a single issuer. As a result, the gains and losses on a single investment may have a greater impact on the Fund's NAV and may make the Fund more volatile than more diversified funds.

Concentration Risk. The Fund's assets may be concentrated in a particular sector or sectors or industry or group of industries to the extent the Wide Moat Focus Index concentrates in a particular sector or sectors or industry or group of industries. To the extent that the Fund continues to be concentrated in the health care sector, the Fund will be subject to the risk that economic, political or other conditions that have a negative effect on this sector will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

PERFORMANCE

The bar chart that follows shows how the Fund performed for the calendar years shown. The table below the bar chart shows the Fund's average annual returns (before and after taxes). The bar chart and table provide an indication of the risks of investing in the Fund by showing the Fund's performance from year to year and by showing how the Fund's average annual returns for the one year and since inception periods compared with the Fund's benchmark index and a broad measure of market performance. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily indicative of how the Fund will perform in the future. Updated performance information is available online at www.vaneck.com.

Annual Total Returns (%) Calendar Years

Best Quarter: 10.93 3Q 13

Worst Quarter: -8.81 3Q 15

Average Annual Total Returns for the Periods Ended December 31, 2016

The after-tax returns presented in the table below are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your specific tax situation and may differ from those shown below. After-tax returns are not relevant to investors who hold Shares of the Fund through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

	Past One Year	Since Inception (4/24/2012)
--	--------------------------	--

Edgar Filing: VanEck Vectors ETF Trust - Form 497

VanEck Vectors Morningstar Wide Moat ETF (return before taxes)	21.73%	13.81%
VanEck Vectors Morningstar Wide Moat ETF (return after taxes on distributions)	21.12%	13.41%
VanEck Vectors Morningstar Wide Moat ETF (return after taxes on distributions and sale of Fund Shares)	12.30%	10.96%
Morningstar® Wide Moat Focus Index SM (reflects no deduction for fees, expenses or taxes)	22.37%	14.38%

PORTFOLIO MANAGEMENT

Investment Adviser. Van Eck Associates Corporation.

Portfolio Managers. The following individuals are jointly and primarily responsible for the day-to-day management of the Fund's portfolio:

Name	Title with Adviser	Date Began Managing the Fund
Hao-Hung (Peter) Liao	Portfolio Manager	April 2012
George Chao	Portfolio Manager	April 2012

PURCHASE AND SALE OF FUND SHARES

For important information about the purchase and sale of Fund Shares, tax information and payments to broker-dealers and other financial intermediaries, please turn to Summary Information About Purchases and Sales of Fund Shares, Taxes and Payments to Broker-Dealers and Other Financial Intermediaries on page 20 of this Prospectus.

SUMMARY INFORMATION ABOUT PURCHASES AND SALES OF FUND SHARES, TAXES AND PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

PURCHASE AND SALE OF FUND SHARES

The Funds issue and redeem Shares at NAV only in a large specified number of Shares each called a Creation Unit, or multiples thereof. A Creation Unit consists of 50,000 Shares.

Individual Shares of a Fund may only be purchased and sold in secondary market transactions through brokers. Shares of the Funds are listed on NYSE Arca, Inc. (NYSE Arca) and because Shares trade at market prices rather than NAV, Shares of the Funds may trade at a price greater than or less than NAV.

TAX INFORMATION

Each Fund's distributions are taxable and will generally be taxed as ordinary income or capital gains.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

The Adviser and its related companies may pay broker-dealers or other financial intermediaries (such as a bank) for the sale of the Fund Shares and related services. These payments may create a conflict of interest by influencing your broker-dealer or other intermediary or its employees or associated persons to recommend the Fund over another investment. Ask your financial adviser or visit your financial intermediary's website for more information.

ADDITIONAL INFORMATION ABOUT THE FUNDS INVESTMENT STRATEGIES AND RISKS

PRINCIPAL INVESTMENT STRATEGIES

The Adviser anticipates that, generally, each Fund will hold all of the securities that comprise its Index in proportion to their weightings in such Index. However, under various circumstances, it may not be possible or practicable to purchase all of those securities in those weightings. In these circumstances, a Fund may purchase a sample of securities in its Index. There also may be instances in which the Adviser may choose to underweight or overweight a security in a Fund's Index, purchase securities not in the Fund's Index that the Adviser believes are appropriate to substitute for certain securities in such Index or utilize various combinations of other available investment techniques in seeking to replicate as closely as possible, before fees and expenses, the price and yield performance of the Fund's Index. Each Fund may sell securities that are represented in its Index in anticipation of their removal from its Index or purchase securities not represented in its Index in anticipation of their addition to such Index. Each Fund may also, in order to comply with the tax diversification requirements of the Internal Revenue Code of 1986, as amended (the Internal Revenue Code), temporarily invest in securities not included in its Index that are expected to be highly correlated with the securities included in its Index.

FUNDAMENTAL AND NON-FUNDAMENTAL POLICIES

Each Fund's investment objective and each of its other investment policies are non-fundamental policies that may be changed by the Board of Trustees without shareholder approval, except as noted in this Prospectus or the Statement of Additional Information (SAI) under the section entitled Investment Policies and Restrictions Investment Restrictions.

RISKS OF INVESTING IN THE FUNDS

The following section provides additional information regarding certain of the principal risks identified under Principal Risks of Investing in the Fund in each Fund's Summary Information section along with additional risk information. The risks listed below are applicable to each Fund unless otherwise noted.

Investors in the Funds should be willing to accept a high degree of volatility in the price of the Funds' Shares and the possibility of significant losses. An investment in the Funds involves a substantial degree of risk. An investment in the Funds is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Therefore, you should consider carefully the following risks before investing in the Funds, each of which could significantly and adversely affect the value of an investment in a Fund.

Risk of Investing in the Health Care Sector. (VanEck Vectors Morningstar Wide Moat ETF only.) To the extent that the health care sector continues to represent at least a significant portion of the Fund, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the health care sector. Companies in the health care sector may be affected by extensive government regulation, restrictions on government reimbursement for medical expenses, rising costs of medical products and services, pricing pressure, an increased emphasis on outpatient services, limited number of products, industry innovation, changes in technologies and other market developments. Many health care companies are heavily dependent on patent protection. The expiration of patents may adversely affect the profitability of these companies. Many health care companies are subject to extensive litigation based on product liability and similar claims. Health care companies are subject to competitive forces that may make it difficult to raise prices and, in fact, may result in price discounting. Many new products in the health care sector may be subject to regulatory approvals. The process of obtaining such approvals may be long and costly.

Companies in the health care sector may be thinly capitalized and may be susceptible to product obsolescence.

Risk of Investing in the Information Technology Sector. (VanEck Vectors Global Spin-Off ETF and VanEck Vectors Morningstar Wide Moat ETF only.) To the extent that the information technology sector continues to represent at least a significant portion of a Fund, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the information technology sector. Information technology companies face intense competition, both domestically and internationally, which may have an adverse effect on profit margins. Information technology companies may have limited product lines, markets, financial resources or personnel. The products of information technology companies may face product obsolescence due to rapid technological developments and frequent new product introduction, unpredictable changes in growth rates and competition for the services of qualified personnel. Companies in the information technology sector are heavily dependent on patent protection and the expiration of patents may adversely affect the profitability of these companies.

Risk of Investing in the Consumer Discretionary Sector. To the extent that the consumer discretionary sector continues to represent at least a significant portion of a Fund, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the consumer discretionary sector. Companies engaged in the consumer discretionary sector are subject to fluctuations in supply and demand. These companies may also be adversely affected by changes in consumer spending as a result of world events, political and economic conditions, commodity price volatility, changes in exchange rates, imposition of import controls, increased competition, depletion of resources and labor relations.

ADDITIONAL INFORMATION ABOUT THE FUNDS INVESTMENT STRATEGIES AND RISKS
(continued)

Risk of Investing in the Financial Services Sector. (VanEck Vectors Morningstar International Moat ETF and VanEck Vectors Morningstar Wide Moat ETF only.) To the extent that the financial services sector continues to represent at least a significant portion of a Fund, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the financial services sector. Companies in the financial services sector may be subject to extensive government regulation that affects the scope of their activities, the prices they can charge and the amount of capital they must maintain. The profitability of companies in the financial services sector may be adversely affected by increases in interest rates, by loan losses, which usually increase in economic downturns, and by credit rating downgrades. In addition, the financial services sector is undergoing numerous changes, including continuing consolidations, development of new products and structures and changes to its regulatory framework. Furthermore, some companies in the financial services sector perceived as benefitting from government intervention in the past may be subject to future government-imposed restrictions on their businesses or face increased government involvement in their operations. Increased government involvement in the financial services sector, including measures such as taking ownership positions in financial institutions, could result in a dilution of each Fund's investments in financial institutions. Recent developments in the credit markets may cause companies operating in the financial services sector to incur large losses, experience declines in the value of their assets and even cease operations.

Risk of Investing in the Industrials Sector. (VanEck Vectors Global Spin-Off ETF and VanEck Vectors Morningstar Wide Moat ETF only.) To the extent that the industrials sector continues to represent at least a significant portion of a Fund, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the industrials sector. Companies in the industrials sector may be adversely affected by changes in government regulation, world events and economic conditions. In addition, companies in the industrials sector may be adversely affected by environmental damages, product liability claims and exchange rates. The stock prices of companies in the industrials sector are affected by supply and demand both for their specific product or service and for industrial sector products in general. The products of manufacturing companies may face product obsolescence due to rapid technological developments and frequent new product introduction. In addition, the industrials sector may also be adversely affected by changes or trends in commodity prices, which may be influenced or characterized by unpredictable factors.

Risk of Investing in Foreign Securities. (VanEck Vectors Global Spin-Off ETF and VanEck Vectors Morningstar International Moat ETF only.) Each Fund invests in securities of issuers located in countries whose economies are heavily dependent upon trading with key partners. Any reduction in this trading may have an adverse impact on a Fund's investments. Investments in the securities of foreign issuers involve risks beyond those associated with investments in U.S. securities. These additional risks include greater market volatility, the availability of less reliable financial information, higher transactional and custody costs, taxation by foreign governments, decreased market liquidity and political instability. Because many foreign securities markets may be limited in size, the activity of large traders may have an undue influence on the prices of securities that trade in such markets. Certain foreign markets that have historically been considered relatively stable may become volatile in response to changed conditions or new developments. Increased interconnectivity of world economies and financial markets increases the possibility that adverse developments and conditions in one country or region will affect the stability of economies and financial markets in other countries or regions. Because each Fund may invest in securities denominated in foreign currencies and some of the income received by each Fund may be in foreign currency, changes in currency exchange rates may negatively impact each Fund's return. The risks of investing in emerging market countries are greater than risks associated with investments in foreign developed countries.

Foreign issuers are often subject to less stringent requirements regarding accounting, auditing, financial reporting and record keeping than are U.S. issuers, and therefore, not all material information may be available or reliable. Securities exchanges or foreign governments may adopt rules or regulations that may negatively impact a Fund's ability to invest in foreign securities or may prevent each Fund from repatriating its investments. In addition, each Fund may not receive shareholder communications or be permitted to vote the securities that it holds, as the issuers may be under no legal obligation to distribute shareholder communications.

Certain foreign markets may rely heavily on particular industries or foreign capital and are more vulnerable to diplomatic developments, the imposition of economic sanctions against a particular country or countries, organizations, entities and/or individuals, changes in international trade patterns, trade barriers, and other protectionist or retaliatory measures. Economic sanctions could, among other things, effectively restrict or eliminate each Fund's ability to purchase or sell securities or groups of securities for a substantial period of time, and may make each Fund's investments in such securities harder to value. The imposition of such sanctions could impair the market value of the securities of such foreign issuers or otherwise adversely affect each Fund's operations.

Also, certain issuers located in foreign countries in which each Fund invests may operate in, or have dealings with, countries subject to sanctions and/or embargoes imposed by the U.S. Government and the United Nations and/or countries identified

by the U.S. Government as state sponsors of terrorism. As a result, an issuer may sustain damage to its reputation if it is identified as an issuer which operates in, or has dealings with, such countries. Each Fund, as an investor in such issuers, will be indirectly subject to those risks.

Because each Fund may invest in securities denominated in foreign currencies and some of the income received by the Fund from these investments may be in foreign currencies, changes in currency exchange rates may negatively impact the Fund's return. The values of the currencies of the countries in which the Fund may invest may be subject to a high degree of fluctuation due to changes in interest rates, the effects of monetary policies issued by the United States, foreign governments, central banks or supranational entities, the imposition of currency controls or other national or global political or economic developments. Therefore, the Fund's exposure to foreign currencies may result in reduced returns to the Fund. Moreover, the Fund may incur costs in connection with conversions between U.S. dollars and foreign currencies. The Fund may, but is not obligated to, invest in derivative instruments to lock in certain currency exchange rates from time to time.

Risk of Investing in Spun-Off Companies. (VanEck Vectors Global Spin-Off ETF only.) Companies may be spun-off from a parent company for any number of reasons, including that they possess one or several unattractive characteristics in the view of the parent company, such as low growth prospects, high capital requirements or an unfavorable capitalization structure. Investments in spun-off companies are subject to the risk that any of these characteristics will adversely affect the value of investments in the spun-off companies. There can be no assurance that a spun-off company will be financially independent or profitable, especially where the company represented a non-core or non-competitive business line of the parent company at the time of the spin-off. The Fund may invest in spun-off companies that are unseasoned companies. Investments in unseasoned companies are more speculative and entail greater risk than investments in companies with a more established operating record because, among other things, unseasoned companies tend to have a greater degree of change in earnings and business prospects, high levels of debt and limited product lines, markets and financial or managerial resources. The securities of unseasoned companies may have limited liquidity, which can result in their being priced higher or lower than might otherwise be the case. Certain spun-off companies with significant operating history may nonetheless share some of the characteristics of unseasoned companies.

Special Risk Considerations of Investing in European Issuers. (VanEck Vectors Global Spin-Off ETF and VanEck Morningstar International Moat ETF only.) Each Fund may invest in securities issued by European issuers and, accordingly, may be subject to the risk of investing in such issuers. Investment in securities of issuers in Europe involves risks and special considerations not typically associated with investment in the U.S. securities markets. The European Union (EU) requires member countries to comply with restrictions on inflation rates, deficits, interest rates, debt levels and fiscal and monetary controls, each of which may significantly affect every country in Europe. Decreasing imports or exports, changes in governmental or EU regulations on trade, changes in the exchange rate of the euro, the default or threat of default by an EU member country on its sovereign debt, and/or an economic recession in an EU member country may have a significant adverse effect on the economies of EU member countries and on major trading partners outside Europe. The European financial markets have recently experienced volatility and have been adversely affected by concerns about economic downturns, credit rating downgrades, rising government debt levels and possible default on or restructuring of government debt in several European countries, including Greece, Ireland, Italy, Portugal and Spain. A default or debt restructuring by any European country would adversely impact holders of that country's debt, and sellers of credit default swaps linked to that country's creditworthiness (which may be located in countries other than those listed in the previous sentence). These events have adversely affected the value and exchange rate of the euro and may continue to significantly affect the economies of every country in Europe, including EU member countries that do not use the euro and non-EU member countries. In addition, in a referendum held on June 23, 2016, voters in the United Kingdom recently voted to leave the EU, creating economic

and political uncertainty in its wake. Significant uncertainty exists regarding the timing of the United Kingdom's withdrawal from the EU and the effects such withdrawal will have on the euro, European economies and the global markets.

Responses to the financial problems by European governments, central banks and others, including austerity measures and reforms, may not work, may result in social unrest and may limit future growth and economic recovery or have other unintended consequences. Further defaults or restructurings by governments and other entities of their debt could have additional adverse effects on economies, financial markets and asset valuations around the world. In addition, one or more countries may abandon the euro and/or withdraw from the EU. The impact of these actions, especially if they occur in a disorderly fashion, is not clear but could be significant and far-reaching.

Special Risk Considerations of Investing in Asian Issuers. (VanEck Vectors Global Spin-Off ETF and VanEck Morningstar International Moat ETF only.) Each Fund may invest in securities issued by Asian issuers and, accordingly, may be subject to the risk of investing in such issuers. Investment in securities of issuers in Asia involves risks and special considerations not typically associated with investment in the U.S. securities markets. Certain Asian economies have experienced over-extension of credit, currency devaluations and restrictions, high unemployment, high inflation, decreased exports and economic

ADDITIONAL INFORMATION ABOUT THE FUNDS INVESTMENT STRATEGIES AND RISKS
(continued)

recessions. Economic events in any one Asian country can have a significant effect on the entire Asian region as well as on major trading partners outside Asia, and any adverse effect on some or all of the Asian countries and regions in which the Fund invests. The securities markets in some Asian economies are relatively underdeveloped and may subject a Fund to higher action costs or greater uncertainty than investments in more developed securities markets. Such risks may adversely affect the value of a Fund's investments. Governments of many Asian countries have implemented significant economic reforms in order to liberalize trade policy, promote foreign investment in their economies, reduce government control of the economy and develop market mechanisms. There can be no assurance these reforms will continue or that they will be effective. Despite recent reform and privatizations, significant regulation of investment and industry is still pervasive in many Asian countries and may restrict foreign ownership of domestic corporations and repatriation of assets, which may adversely affect a Fund's investments. Governments in some Asian countries are authoritarian in nature, have been installed or removed as a result of military coups or have periodically used force to suppress civil dissent. Disparities of wealth, the pace and success of democratization, and ethnic, religious and racial disaffection have led to social turmoil, violence and labor unrest in some countries. Unanticipated or sudden political or social developments may result in sudden and significant investment losses. Investing in certain Asian countries involves risk of loss due to expropriation, nationalization, or confiscation of assets and property or the imposition of restrictions on foreign investments and on repatriation of capital invested.

Special Risk Considerations of Investing in Australian Issuers (VanEck Vectors Morningstar International Moat ETF only.) Investment in Australian issuers may subject the Fund to regulatory, political, currency, security, and economic risk specific to Australia. The Australian economy is heavily dependent on exports from the agricultural and mining sectors. As a result, the Australian economy is susceptible to fluctuations in the commodity markets. The Australian economy is also becoming increasingly dependent on its growing services industry. The Australian economy is dependent on trading with key trading partners, including the United States, China, Japan, Singapore and certain European countries. Reduction in spending on Australian products and services, or changes in any of the economies, may cause an adverse impact on the Australian economy.

Additionally, Australia is located in a part of the world that has historically been prone to natural disasters, such as hurricanes and droughts, and is economically sensitive to environmental events. Any such event may adversely impact the Australian economy, causing an adverse impact on the value of the Fund.

Risk of Commodity Exposure. The agricultural and mining sectors of Australia's economy account for the majority of its exports. Australia is susceptible to fluctuations in the commodity markets and, in particular, in the price and demand for agricultural products and natural resources. Any negative changes in these sectors could have an adverse impact on the Australian economy.

Risk of Investing in the Real Estate Industry. (VanEck Vectors Global Spin-Off ETF only.) Companies in the real estate industry include companies that invest in real estate, such as REITs and real estate management and development companies. To the extent the real estate industry continues to represent at least a significant portion of the Fund, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the real estate industry. Companies that invest in real estate are subject to the risks of owning real estate directly as well as to risks that relate specifically to the way that such companies operate, including management risk (such companies are dependent upon the management skills of a few key individuals and may have limited financial resources). Adverse economic, business or political developments affecting real estate could have a major effect on the values of the Fund's investments. Investing in real estate is subject to such risks as decreases in real estate values,

overbuilding, increased competition and other risks related to local or general economic conditions, increases in operating costs and property taxes, changes in zoning laws, casualty or condemnation losses, possible environmental liabilities, regulatory limitations on rent, possible lack of availability of mortgage financing, market saturation, fluctuations in rental income and the value of underlying properties and extended vacancies of properties. Certain real estate securities have a relatively small market capitalization, which may tend to increase the volatility of the market price of these securities. Real estate securities have limited diversification and are, therefore, subject to risks inherent in operating and financing a limited number of projects. Real estate securities are also subject to heavy cash flow dependency and defaults by borrowers or tenants.

Risk of Investing in REITs. (VanEck Vectors Global Spin-Off ETF only.) Investing in REITs exposes investors to the risks of owning real estate directly, as well as to risks that relate specifically to the way in which REITs are organized and operated. REITs generally invest directly in real estate, in mortgages or in some combination of the two. Operating REITS requires specialized management skills and the Fund indirectly bears management expenses along with the direct expenses of the Fund. Individual REITs may own a limited number of properties and may concentrate in a particular region or property type. Individual REITs may also be subject to heavy cash flow dependency, default by borrowers or tenants and self-liquidation. REITs also must satisfy specific requirements of the Internal Revenue Code, in order to qualify for tax-free pass-through income. The failure of a company to qualify as a REIT could have adverse consequences for the Fund, including significantly

reducing the return to the Fund on its investment in such company. In addition, REITs, like ETFs, have expenses, including management and administration fees, that are paid by their shareholders. As a result, shareholders will absorb their proportionate share of duplicate levels of fees when the Fund invests in REITs.

Risk of Investing in Emerging Market Issuers. (VanEck Vectors Morningstar International Moat ETF only.) The Fund may invest its assets in securities of emerging market issuers. Investment in securities of emerging market issuers involves risks not typically associated with investments in securities of issuers in more developed countries that may negatively affect the value of your investment in the Fund. Such heightened risks may include, among others, expropriation and/or nationalization of assets, restrictions on and government intervention in international trade, confiscatory taxation, political instability, including authoritarian and/or military involvement in governmental decision making, armed conflict, the impact on the economy as a result of civil war, crime (including drug violence) and social instability as a result of religious, ethnic and/or socioeconomic unrest. Issuers in certain emerging market countries are subject to less stringent requirements regarding accounting, auditing, financial reporting and record keeping than are issuers in more developed markets, and therefore, all material information may not be available or reliable. Emerging markets are also more likely than developed markets to experience problems with the clearing and settling of trades, as well as the holding of securities by local banks, agents and depositories. Low trading volumes and volatile prices in less developed markets may make trades harder to complete and settle, and governments or trade groups may compel local agents to hold securities in designated depositories that may not be subject to independent evaluation. Local agents are held only to the standards of care of their local markets. In general, the less developed a country's securities markets are, the greater the likelihood of custody problems. Additionally, each of the factors described below could have a negative impact on the Fund's performance and increase the volatility of the Fund.

Securities Markets. Securities markets in emerging market countries are underdeveloped and are often considered to be less correlated to global economic cycles than those markets located in more developed countries. Securities markets in emerging market countries are subject to greater risks associated with market volatility, lower market capitalization, lower trading volume, illiquidity, inflation, greater price fluctuations, uncertainty regarding the existence of trading markets, governmental control and heavy regulation of labor and industry. These factors, coupled with restrictions on foreign investment and other factors, limit the supply of securities available for investment by the Fund. This will affect the rate at which the Fund is able to invest in emerging market countries, the purchase and sale prices for such securities and the timing of purchases and sales. Emerging markets can experience high rates of inflation, deflation and currency devaluation. The prices of certain securities listed on securities markets in emerging market countries have been subject to sharp fluctuations and sudden declines, and no assurance can be given as to the future performance of listed securities in general. Volatility of prices may be greater than in more developed securities markets. Moreover, securities markets in emerging market countries may be closed for extended periods of time or trading on securities markets may be suspended altogether due to political or civil unrest. Market volatility may also be heightened by the actions of a small number of investors. Brokerage firms in emerging market countries may be fewer in number and less established than brokerage firms in more developed markets. Since the Fund may need to effect securities transactions through these brokerage firms, the Fund is subject to the risk that these brokerage firms will not be able to fulfill their obligations to the Fund. This risk is magnified to the extent the Fund effects securities transactions through a single brokerage firm or a small number of brokerage firms. In addition, the infrastructure for the safe custody of securities and for purchasing and selling securities, settling trades, collecting dividends, initiating corporate actions, and following corporate activity is not as well developed in emerging market countries as is the case in certain more developed markets.

Political and Economic Risk. Certain emerging market countries have historically been subject to political instability and their prospects are tied to the continuation of economic and political liberalization in the region. Instability may result from factors such as government or military intervention in decision making, terrorism, civil unrest, extremism

or hostilities between neighboring countries. Any of these factors, including an outbreak of hostilities could negatively impact the Fund's returns. Limited political and democratic freedoms in emerging market countries might cause significant social unrest. These factors may have a significant adverse effect on an emerging market country's economy.

Many emerging market countries may be heavily dependent upon international trade and, consequently, may continue to be negatively affected by trade barriers, exchange controls, managed adjustments in relative currency values and other protectionist measures imposed or negotiated by the countries with which it trades. They also have been, and may continue to be, adversely affected by economic conditions in the countries with which they trade.

In addition, commodities (such as oil, gas and minerals) represent a significant percentage of certain emerging market countries' exports and these economies are particularly sensitive to fluctuations in commodity prices. Adverse economic events in one country may have a significant adverse effect on other countries of this region. In addition, most emerging market countries have experienced, at one time or another, severe and persistent levels of inflation, including,

ADDITIONAL INFORMATION ABOUT THE FUNDS INVESTMENT STRATEGIES AND RISKS
(continued)

in some cases, hyperinflation. This has, in turn, led to high interest rates, extreme measures by governments to keep inflation in check, and a generally debilitating effect on economic growth.

Although inflation in many countries has lessened, there is no guarantee it will remain at lower levels. The political history of certain emerging market countries has been characterized by political uncertainty, intervention by the military in civilian and economic spheres, and political corruption. Such events could reverse favorable trends toward market and economic reform, privatization, and removal of trade barriers, and result in significant disruption in securities markets in the region.

Also, from time to time, certain issuers located in emerging market countries in which the Fund invests may operate in, or have dealings with, countries subject to sanctions and/or embargoes imposed by the U.S. Government and the United Nations and/or countries identified by the U.S. Government as state sponsors of terrorism. As a result, an issuer may sustain damage to its reputation if it is identified as an issuer which operates in, or has dealings with, such countries. The Fund, as an investor in such issuers, will be indirectly subject to those risks.

The economies of one or more countries in which the Fund may invest may be in various states of transition from a planned economy to a more market oriented economy. The economies of such countries differ from the economies of most developed countries in many respects, including levels of government involvement, states of development, growth rates, control of foreign exchange and allocation of resources. Economic growth in these economies may be uneven both geographically and among various sectors of their economies and may also be accompanied by periods of high inflation. Political changes, social instability and adverse diplomatic developments in these countries could result in the imposition of additional government restrictions, including expropriation of assets, confiscatory taxes or nationalization of some or all of the property held by the underlying issuers of securities included in the ex-US Moat Focus Index. There is no guarantee that the governments of these countries will not revert back to some form of planned or non-market oriented economy, and such governments continue to be active participants in many economic sectors through ownership positions and regulation. The allocation of resources in such countries is subject to a high level of government control. Such countries' governments may strictly regulate the payment of foreign currency denominated obligations and set monetary policy. Through their policies, these governments may provide preferential treatment to particular industries or companies. The policies set by the government of one of these countries could have a substantial effect on that country's economy.

Investment and Repatriation Restrictions. The government in an emerging or frontier market country may restrict or control to varying degrees the ability of foreign investors to invest in securities of issuers located or operating in such emerging market countries. These restrictions and/or controls may at times limit or prevent foreign investment in securities of issuers located or operating in emerging market countries and may inhibit the Fund's ability to track its Index. In addition, the Fund may not be able to buy or sell securities or receive full value for such securities. Moreover, certain emerging market countries may require governmental approval or special licenses prior to investments by foreign investors and may limit the amount of investments by foreign investors in a particular industry and/or issuer; may limit such foreign investment to a certain class of securities of an issuer that may have less advantageous rights than the classes available for purchase by domiciliaries of such emerging market countries; and/or may impose additional taxes on foreign investors. A delay in obtaining a required government approval or a license would delay investments in those emerging market countries, and, as a result, the Fund may not be able to invest in certain securities while approval is pending. The government of certain emerging market countries may also withdraw or decline to renew a license that enables the Fund to invest in such country. These factors make investing in issuers

located or operating in emerging market countries significantly riskier than investing in issuers located or operating in more developed countries, and any one of them could cause a decline in the value of the Fund's Shares.

Additionally, investments in issuers located in certain emerging market countries may be subject to a greater degree of risk associated with governmental approval in connection with the repatriation of investment income, capital or the proceeds of sales of securities by foreign investors. Moreover, there is the risk that if the balance of payments in an emerging or frontier market country declines, the government of such country may impose temporary restrictions on foreign capital remittances. Consequently, the Fund could be adversely affected by delays in, or a refusal to grant, required governmental approval for repatriation of capital, as well as by the application to the Fund of any restrictions on investments. Furthermore, investments in emerging market countries may require the Fund to adopt special procedures, seek local government approvals or take other actions, each of which may involve additional costs to the Fund.

Available Disclosure About Emerging Market Issuers. Issuers located or operating in emerging market countries are not subject to the same rules and regulations as issuers located or operating in more developed countries. Therefore, there may be less financial and other information publicly available with regard to issuers located or operating in

emerging market countries and such issuers are not subject to the uniform accounting, auditing and financial reporting standards applicable to issuers located or operating in more developed countries.

Foreign Currency Considerations. The Fund's assets that are invested in equity securities of issuers in emerging market countries will generally be denominated in foreign currencies, and the income received by the Fund from these investments will be principally in foreign currencies. The value of an emerging or frontier market country's currency may be subject to a high degree of fluctuation. This fluctuation may be due to changes in interest rates, the effects of monetary policies issued by the United States, foreign governments, central banks or supranational entities, the imposition of currency controls or other national or global political or economic developments. The economies of certain emerging market countries can be significantly affected by currency devaluations. Certain emerging market countries may also have managed currencies which are maintained at artificial levels relative to the U.S. dollar rather than at levels determined by the market. This type of system can lead to sudden and large adjustments in the currency which, in turn, can have a disruptive and negative effect on foreign investors.

The Fund's exposure to an emerging market country's currency and changes in value of such foreign currencies versus the U.S. dollar may reduce the Fund's investment performance and the value of your investment in the Fund. Meanwhile, the Fund will compute and expects to distribute its income in U.S. dollars, and the computation of income will be made on the date that the income is earned by the Fund at the foreign exchange rate in effect on that date. Therefore, if the value of the respective emerging or frontier market country's currency falls relative to the U.S. dollar between the earning of the income and the time at which the Fund converts the relevant emerging or frontier market country's currency to U.S. dollars, the Fund may be required to liquidate certain positions in order to make distributions if the Fund has insufficient cash in U.S. dollars to meet distribution requirements under the Internal Revenue Code. The liquidation of investments, if required, could be at disadvantageous prices or otherwise have an adverse impact on the Fund's performance.

Certain emerging market countries also restrict the free conversion of their currency into foreign currencies, including the U.S. dollar. There is no significant foreign exchange market for many such currencies and it would, as a result, be difficult for the Fund to engage in foreign currency transactions designed to protect the value of the Fund's interests in securities denominated in such currencies. Furthermore, if permitted, the Fund may incur costs in connection with conversions between U.S. dollars and an emerging or frontier market country's currency. Foreign exchange dealers realize a profit based on the difference between the prices at which they are buying and selling various currencies. Thus, a dealer normally will offer to sell a foreign currency to the Funds at one rate, while offering a lesser rate of exchange should the Fund desire immediately to resell that currency to the dealer. The Fund will conduct its foreign currency exchange transactions either on a spot (*i.e.*, cash) basis at the spot rate prevailing in the foreign currency exchange market, or through entering into forward, futures or options contracts to purchase or sell foreign currencies.

Operational and Settlement Risk. In addition to having less developed securities markets, emerging market countries have less developed custody and settlement practices than certain developed countries. Rules adopted under the 1940 Act permit the Fund to maintain its foreign securities and cash in the custody of certain eligible non-U.S. banks and securities depositories. Banks in emerging market countries that are eligible foreign sub-custodians may be recently organized or otherwise lack extensive operating experience. In addition, in certain emerging market countries there may be legal restrictions or limitations on the ability of the Fund to recover assets held in custody by a foreign sub-custodian in the event of the bankruptcy of the sub-custodian. Because settlement systems in emerging market countries may be less organized than in other developed markets, there may be a risk that settlement may be delayed and that cash or securities of the Fund may be in jeopardy because of failures of or defects in the systems. Under the laws in many emerging market countries, the Fund may be required to release local shares before receiving cash payment or may be required to make cash payment prior to receiving local shares, creating a risk that the Fund may

surrender cash or securities without ever receiving securities or cash from the other party. Settlement systems in emerging market countries also have a higher risk of failed trades and back to back settlements may not be possible.

The Fund may not be able to convert a foreign currency to U.S. dollars in time for the settlement of redemption requests. In the event of a redemption request from an Authorized Participant (AP), the Fund will be required to deliver U.S. dollars to the AP on the settlement date. In the event that the Fund is not able to convert the foreign currency to U.S. dollars in time for settlement, which may occur as a result of the delays described above, the Fund may be required to liquidate certain investments and/or borrow money in order to fund such redemption. The liquidation of investments, if required, could be at disadvantageous prices or otherwise have an adverse impact on the Fund's performance (*e.g.*, by causing the Fund to overweight foreign currency denominated holdings and underweight other holdings which were sold to fund redemptions). In addition, the Fund will incur interest expense on any borrowings and the borrowings will cause the Fund to be leveraged, which may magnify gains and losses on its investments.

ADDITIONAL INFORMATION ABOUT THE FUNDS INVESTMENT STRATEGIES AND RISKS
(continued)

In certain frontier and emerging market countries, the marketability of quoted shares may be limited due to the restricted opening hours of stock exchanges, and a narrow range of investors and a relatively high proportion of market value may be concentrated in the hands of a relatively small number of shareholders. In addition, because certain frontier and emerging market countries' stock exchanges on which the Fund's portfolio securities may trade are open when the NYSE Arca is closed, the Fund may be subject to heightened risk associated with market movements. Trading volume may be lower on certain frontier and emerging market countries' stock exchanges than on more developed securities markets and equities may be generally less liquid. The infrastructure for clearing, settlement and registration on the primary and secondary markets of certain frontier and emerging market countries are less developed than in certain other markets and under certain circumstances this may result in the Fund experiencing delays in settling and/or registering transactions in the markets in which it invests, particularly if the growth of foreign and domestic investment in certain frontier and emerging market countries places an undue burden on such investment infrastructure. Such delays could affect the speed with which the Fund can transmit redemption proceeds and may inhibit the initiation and realization of investment opportunities at optimum times.

Certain issuers in emerging market countries may utilize share blocking schemes. Share blocking refers to a practice, in certain foreign markets, where voting rights related to an issuer's securities are predicated on these securities being blocked from trading at the custodian or sub-custodian level for a period of time around a shareholder meeting. These restrictions have the effect of barring the purchase and sale of certain voting securities within a specified number of days before and, in certain instances, after a shareholder meeting where a vote of shareholders will be taken. Share blocking may prevent the Fund from buying or selling securities for a period of time. During the time that shares are blocked, trades in such securities will not settle. The blocking period can last up to several weeks. The process for having a blocking restriction lifted can be quite onerous with the particular requirements varying widely by country. In addition, in certain countries, the block cannot be removed. As a result of the ramifications of voting ballots in markets that allow share blocking, the Adviser, on behalf of the Fund, reserves the right to abstain from voting proxies in those markets.

Corporate and Securities Laws. Securities laws in emerging market countries are relatively new and unsettled and, consequently, there is a risk of rapid and unpredictable change in laws regarding foreign investment, securities regulation, title to securities and shareholder rights. Accordingly, foreign investors may be adversely affected by new or amended laws and regulations. In addition, the systems of corporate governance to which emerging market issuers are subject may be less advanced than those systems to which issuers located in more developed countries are subject, and therefore, shareholders of issuers located in emerging market countries may not receive many of the protections available to shareholders of issuers located in more developed countries. In circumstances where adequate laws and shareholder rights exist, it may not be possible to obtain swift and equitable enforcement of the law. In addition, the enforcement of systems of taxation at federal, regional and local levels in emerging market countries may be inconsistent and subject to sudden change.

Participation Notes. (VanEck Vectors Morningstar International Moat ETF only.) Participation notes (P-Notes) are issued by banks or broker-dealers and are designed to offer a return linked to the performance of a particular underlying equity security or market. P-Notes can have the characteristics or take the form of various instruments, including, but not limited to, certificates or warrants. The holder of a P-Note that is linked to a particular underlying security is entitled to receive any dividends paid in connection with the underlying security. However, the holder of a P-Note generally does not receive voting rights as it would if it directly owned the underlying security. P-Notes constitute direct, general and unsecured contractual obligations of the banks or broker-dealers that issue them, which

therefore subject the Fund to counterparty risk, as discussed below.

Investments in P-Notes involve certain risks in addition to those associated with a direct investment in the underlying foreign securities or foreign securities markets whose return they seek to replicate. For instance, there can be no assurance that the trading price of a P-Note will equal the value of the underlying foreign security or foreign securities market that it seeks to replicate. As the purchaser of a P-Note, the Fund is relying on the creditworthiness of the counterparty issuing the P-Note and has no rights under a P-Note against the issuer of the underlying security. Therefore, if such counterparty were to become insolvent, the Fund would lose its investment. The risk that the Fund may lose its investments due to the insolvency of a single counterparty may be amplified to the extent the Fund purchases P-Notes issued by one issuer or a small number of issuers. P-Notes also include transaction costs in addition to those applicable to a direct investment in securities. In addition, the Fund's use of P-Notes may cause the Fund's performance to deviate from the performance of the portion of the Index to which the Fund is gaining exposure through the use of P-Notes.

Due to liquidity and transfer restrictions, the secondary markets on which P-Notes are traded may be less liquid than the markets for other securities, which may lead to the absence of readily available market quotations for securities in the Fund's

portfolio and may cause the value of the P-Notes to decline. The ability of the Fund to value its securities becomes more difficult and the Adviser's judgment in the application of fair value procedures may play a greater role in the valuation of the Fund's securities due to reduced availability of reliable objective pricing data. Consequently, while such determinations will be made in good faith, it may nevertheless be more difficult for the Fund to accurately assign a daily value to such securities.

Risk of Investing in Depositary Receipts (VanEck Vectors Global Spin-Off ETF and VanEck Vectors Morningstar International Moat ETF only.) A Fund may invest in depositary receipts (including ADRs) which involve similar risks to those associated with investments in foreign securities. Depositary receipts are receipts listed on U.S. or foreign exchanges issued by banks or trust companies that entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares. The issuers of certain depositary receipts are under no obligation to distribute shareholder communications to the holders of such receipts, or to pass through to them any voting rights with respect to the deposited securities. Investments in depositary receipts may be less liquid than the underlying shares in their primary trading market and, if not included in a Fund's Index, may negatively affect a Fund's ability to replicate the performance of its Index. In addition, investments in depositary receipts that are not included in a Fund's Index may increase tracking error.

Risk of Investing in Small- and Medium-Capitalization Companies. (VanEck Vectors Global Spin-Off ETF only.) The Fund may invest in small- and medium-capitalization companies and, therefore, will be subject to certain risks associated with small- and medium-capitalization companies. These companies are often subject to less analyst coverage and may be in early and less predictable periods of their corporate existences, with little or no record of profitability. In addition, these companies often have greater price volatility, lower trading volume and less liquidity than larger more established companies. These companies tend to have smaller revenues, narrower product lines, less management depth and experience, smaller shares of their product or service markets, fewer financial resources and less competitive strength than large-capitalization companies. Returns on investments in securities of small- and medium-capitalization companies could trail the returns on investments in securities of larger companies.

Risk of Investing in Medium-Capitalization Companies. (VanEck Vectors Morningstar International Moat ETF and VanEck Vectors Morningstar Wide Moat ETF only.) A Fund may invest in medium-capitalization companies and, therefore, will be subject to certain risks associated with medium-capitalization companies. These companies are often subject to less analyst coverage and may be in early and less predictable periods of their corporate existences, with little or no record of profitability. In addition, these companies often have greater price volatility, lower trading volume and less liquidity than larger more established companies. These companies tend to have smaller revenues, narrower product lines, less management depth and experience, smaller shares of their product or service markets, fewer financial resources and less competitive strength than large-capitalization companies. Returns on investments in securities of medium-capitalization companies could trail the returns on investments in securities of large-capitalization companies.

Risk of Cash Transactions. (VanEck Vectors Morningstar International Moat ETF only.) Unlike other ETFs, VanEck Vectors Morningstar International Moat ETF effects its creations and redemptions partially for cash, rather than in-kind securities. As a result, an investment in the Fund may be less tax-efficient than an investment in a more conventional ETF. Other ETFs generally are able to make in-kind redemptions and avoid realizing gains in connection with transactions designed to raise cash to meet redemption requests. Because the Fund currently intends to effect a portion of redemptions for cash, rather than in-kind distributions, it may be required to sell portfolio securities in order to obtain the cash needed to distribute redemption proceeds, which involves transaction costs. If the Fund recognizes gain on these sales, this generally will cause the Fund to recognize gain it might not otherwise have recognized if it were to distribute portfolio securities in-kind, or to recognize such gain sooner than would otherwise be required. The

Fund generally intends to distribute these gains to shareholders to avoid being taxed on this gain at the Fund level and otherwise comply with the special tax rules that apply to it. This strategy may cause shareholders to be subject to tax on gains they would not otherwise be subject to, or at an earlier date than, if they had made an investment in a different ETF.

Equity Securities Risk. The value of the equity securities held by a Fund may fall due to general market and economic conditions, perceptions regarding the markets in which the issuers of securities held by a Fund participate, or factors relating to specific issuers in which a Fund invests. For example, an adverse event, such as an unfavorable earnings report, may result in a decline in the value of equity securities of an issuer held by a Fund; the price of the equity securities of an issuer may be particularly sensitive to general movements in the securities markets; or a drop in the securities markets may depress the price of most or all of the equities securities held by a Fund. In addition, the equity securities of an issuer in a Fund's portfolio may decline in price if the issuer fails to make anticipated dividend payments. Equity securities are subordinated to preferred securities and debt in a company's capital structure with respect to priority in right to a share of corporate income, and therefore will be subject to greater dividend risk than preferred securities or debt instruments. In addition, while broad market measures of equity securities have historically generated higher average returns than fixed income securities, equity securities have generally also experienced significantly more volatility in those returns, although under certain market

ADDITIONAL INFORMATION ABOUT THE FUNDS INVESTMENT STRATEGIES AND RISKS
(continued)

conditions fixed income securities may have comparable or greater price volatility. A change in the financial condition, market perception or the credit rating of an issuer of securities included in a Fund's index may cause the value of its securities to decline.

With respect to VanEck Vectors Morningstar International Moat ETF and VanEck Vectors Morningstar Wide Moat ETF, Morningstar may be incorrect in its assessment of the competitive advantages of the companies selected for inclusion in the ex-US Moat Focus Index and/or Wide Moat Focus Index, and the securities issued by such companies may underperform Morningstar's expectations and have an adverse effect on a Fund's overall performance. There can also be no assurance that wide or narrow moat companies will have sustainable competitive advantages for any period of time. Competitive advantages for wide and narrow moat companies may erode in a relatively short period of time due to, among other reasons, changes in laws and regulations, intellectual property rights, economic and political conditions and technological developments.

Market Risk. The prices of the securities in each Fund are subject to the risks associated with investing in the securities market, including general economic conditions and sudden and unpredictable drops in value. Overall securities values could decline generally or could underperform other investments. An investment in a Fund may lose money.

Operational Risk. Each Fund is exposed to operational risk arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of a Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or system failures. Each Fund seeks to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate for those risks that they are intended to address.

High Portfolio Turnover Risk. (VanEck Vectors Morningstar International Moat ETF and VanEck Vectors Morningstar Wide Moat ETF only.) The Fund may engage in active and frequent trading of its portfolio securities. High portfolio turnover may result in increased transaction costs to the Fund, including brokerage commissions, dealer mark-ups and other transaction costs on the sale of the securities and on reinvestment in other securities.

Index Tracking Risk. Each Fund's return may not match the return of its Index for a number of reasons. For example, each Fund incurs a number of operating expenses not applicable to its Index and incurs costs associated with buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of its Index, which are not factored into the return of its Index. Transaction costs, including brokerage costs, will decrease a Fund's net asset value (NAV) to the extent not offset by the transaction fee payable by an AP. Market disruptions and regulatory restrictions could have an adverse effect on a Fund's ability to adjust its exposure to the required levels in order to track its Index. There is no assurance that an Index Provider or any agents that may act on their behalf will compile an Index accurately, or that an Index will be determined, composed or calculated accurately. Errors in respect of the quality, accuracy and completeness of the data used to compile an Index may occur from time to time and may not be identified and corrected by the Index Providers for a period of time or at all, particularly where the indices are less commonly used as benchmarks by funds or managers. Therefore, gains, losses or costs associated with errors of an Index Provider or its agents will generally be borne by a Fund and its shareholders. For example, during a period where a Fund's Index contains incorrect constituents, a Fund would have market exposure to such constituents and would be underexposed to a Index's other constituents. Such errors may negatively or positively impact a Fund and its shareholders. Any gains due to an Index Provider's or others' errors will be kept by a Fund and its

shareholders and any losses resulting from an Index Provider's or others' errors will be borne by a Fund and its shareholders. In addition, a Fund may not be able to invest in certain securities included in its Index, or invest in them in the exact proportions in which they are represented in its Index, due to legal restrictions or limitations imposed by the governments of certain countries, a lack of liquidity in stock exchanges on which such securities trade, potential adverse tax consequences or other regulatory reasons. Moreover, a Fund may be delayed in purchasing or selling securities included in its Index. In addition, any issues a Fund encounters with regard to currency convertibility (including the cost of borrowing funds, if any) and repatriation may also increase the index tracking risk. VanEck Vectors Morningstar International Moat ETF may also need to rely on borrowings to meet redemptions, which may lead to increased expenses. For tax efficiency purposes, a Fund may sell certain securities to realize a loss and deviate from the performance of its Index.

VanEck Vectors Global Spin-Off ETF and VanEck Vectors Morningstar International Moat ETF are expected to fair value certain of the foreign securities or other assets they hold. To the extent a Fund calculates its NAV based on fair value prices and the value of its Index is based on securities' closing prices on local foreign markets (*i.e.*, the value of its Index is not based on fair value prices) or if a Fund otherwise calculates its NAV based on prices that differ from those used in calculating its Index, a Fund's ability to track its Index may be adversely affected. The need to comply with the tax diversification and other requirements of the Internal Revenue Code may also impact a Fund's ability to replicate the performance of its Index. In addition, if a Fund utilizes depositary receipts and other derivative instruments that are not included in its Index, its return may not correlate as well with the returns of its Index as would be the case if a Fund purchased all the securities in its Index.

directly. Actions taken in response to proposed corporate actions could result in increased tracking error. In light of the factors discussed above, a Fund's return may deviate significantly from the return of its Index.

Index tracking risk may be heightened during times of increased market volatility or other unusual market conditions. Errors in the construction or calculation of a Fund's Index may occur from time to time. Any such errors may not be identified or corrected by a Fund's Provider for some period of time, which may have an adverse effect on a Fund and its shareholders.

Replication Management Risk. Unlike many investment companies, the Funds are not actively managed. Therefore, unless a specific security is removed from its Index, a Fund generally would not sell a security because the security's issuer is in financial trouble. If a specific security is removed from a Fund's Index, the Fund may be forced to sell such security at an inopportune time or for prices other than at current market values. An investment in a Fund involves risks similar to those of investing in any fund of equity securities traded on an exchange, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in security prices. Each Fund's Index may not contain the appropriate or a diversified mix of securities for any particular economic cycle. The timing of changes in the securities of a Fund's portfolio in seeking to replicate its Index could have a negative effect on the Fund. Unlike with an actively managed fund, the Adviser does not use techniques or defensive strategies designed to lessen the effects of market volatility or to reduce the impact of periods of market decline. This means that, based on market and economic conditions, a Fund's performance could be lower than funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers.

Authorized Participant Concentration Risk. A Fund may have a limited number of financial institutions that act as APs, none of which are obligated to engage in creation or redemption transactions. To the extent that those APs exit the business, or are unable to or choose not to process creation and/or redemption orders, and no other AP is able to step forward to create and redeem, there may be a significantly diminished trading market for Shares or Shares may trade like closed-end funds at a discount (or premium) to NAV and possibly face trading halts and/or de-listing. The AP concentration risk may be heightened in scenarios where APs have limited or diminished access to the capital required to post collateral.

No Guarantee of Active Trading Market. While Shares are listed on NYSE Arca, there can be no assurance that an active trading market for the Shares will be maintained. Further, secondary markets may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods in times of market stress because market makers and APs may step away from making a market in the Shares and in executing creation and redemption orders, which could cause a material deviation in a Fund's market price from its NAV. Van Eck Securities Corporation, the distributor of the Shares (the Distributor), does not maintain a secondary market in the Shares. Investors purchasing and selling shares in the secondary market may not experience investment results consistent with those experienced by those APs creating and redeeming directly with a Fund.

Decisions by market makers or APs to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying value of a Fund's portfolio securities and the Fund's market price. This reduced effectiveness could result in Fund Shares trading at a discount to its NAV and also in greater than normal intraday bid/ask spreads for Fund Shares.

Trading Issues. Trading in Shares on an Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. In addition, trading in Shares on an Exchange is subject to trading halts caused by extraordinary market volatility pursuant to the relevant Exchange's circuit breaker rules. There

can be no assurance that the requirements of an Exchange necessary to maintain the listing of a Fund will continue to be met or will remain unchanged.

Fund Shares Trading, Premium/Discount Risk and Liquidity of Fund Shares. Disruptions to creations and redemptions, the existence of market volatility or potential lack of an active trading market for Shares (including through a trading halt), as well as other factors, may result in Shares trading at a significant premium or discount to NAV or to the intraday value of a Fund's holdings. The NAV of the Shares will fluctuate with changes in the market value of a Fund's securities holdings. The market prices of Shares will fluctuate, in some cases materially, in accordance with changes in NAV and the intraday value of a Fund's holdings, as well as supply and demand on the NYSE Arca. The Adviser cannot predict whether Shares will trade below, at or above their NAV. Given the fact that Shares can be created and redeemed by APs in Creation Units, the Adviser believes that large discounts or premiums to the NAV of Shares should not be sustained in the long-term. While the creation/redemption feature is designed to make it likely that Shares normally will trade close to the value of a Fund's holdings, market prices are not expected to correlate exactly to the Fund's NAV due to timing reasons, supply and demand imbalances and other factors. The price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares may be closely related to, but not necessarily identical to, the same forces influencing the prices of the securities of a Fund's portfolio of investments trading individually or in the aggregate at any point

ADDITIONAL INFORMATION ABOUT THE FUNDS INVESTMENT STRATEGIES AND RISKS (continued)

in time. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses or receive significantly less than the underlying value of the Shares that were bought or sold. Any of these factors, discussed above and further below, may lead to the Shares trading at a premium or discount to a Fund's NAV. In addition, because certain of a Fund's underlying securities trade on exchanges that are closed when the NYSE Arca (*i.e.*, the exchange that Shares of the Fund trade on) is open, there are likely to be deviations between the expected value of an underlying security and the closing security's price (*i.e.*, the last quote from its closed foreign market) resulting in premiums or discounts to NAV that may be greater than those experienced by other ETFs. In addition, the securities held by a Fund may be traded in markets that close at a different time than NYSE Arca. Liquidity in those securities may be reduced after the applicable closing times. Accordingly, during the time when NYSE Arca is open but after the applicable market closing, fixing or settlement times, bid/ask spreads and the resulting premium or discount to the Shares' NAV may widen. Additionally, in stressed market conditions, the market for a Fund's Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings.

When you buy or sell Shares of a Fund through a broker, you will likely incur a brokerage commission or other charges imposed by brokers. In addition, the market price of Shares, like the price of any exchange-traded security, includes a bid/ask spread charged by the market makers or other participants that trade the particular security. The spread of a Fund's Shares varies over time based on the Fund's trading volume and market liquidity and may increase if the Fund's trading volume, the spread of the Fund's underlying securities, or market liquidity decrease. In times of severe market disruption, including when trading of a Fund's holdings may be halted, the bid/ask spread may increase significantly. This means that Shares may trade at a discount to the Fund's NAV, and the discount is likely to be greatest during significant market volatility.

Non-Diversified Risk. Each Fund is a separate investment portfolio of VanEck Vectors ETF Trust (the Trust), which is an open-end investment company registered under the 1940 Act. Each Fund is classified as a non-diversified fund under the 1940 Act. As a result, each Fund is subject to the risk that it will be more volatile than a diversified fund because the Fund may invest its assets in a smaller number of issuers or may invest a larger proportion of its assets in a single issuer. Moreover, the gains and losses on a single investment may have a greater impact on a Fund's NAV and may make the Fund more volatile than more diversified funds.

Concentration Risk. A Fund's assets will be concentrated in a particular sector or sectors or industry or group of industries to the extent that its Index concentrates in a particular sector or sectors or industry or group of industries. The securities of many or all of the companies in the same sector or industry may decline in value due to developments adversely affecting such sector or industry. By concentrating its assets in a particular sector or sectors or industry or group of industries, a Fund is subject to the risk that economic, political or other conditions that have a negative effect on that sector or sectors or industry or group of industries will negatively impact a Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

ADDITIONAL NON-PRINCIPAL INVESTMENT STRATEGIES

Each Fund may invest in securities not included in its respective Index, money market instruments, including repurchase agreements or other funds which invest exclusively in money market instruments, convertible securities, structured notes (notes on which the amount of principal repayment and interest payments are based on the movement of one or more specified factors, such as the movement of a particular stock or stock index) and certain derivatives.

Depository receipts not included in a Fund's Index may be used by a Fund in seeking performance that corresponds to its respective Index and in managing cash flows, and may count towards compliance with the Fund's 80% policy. Each Fund may also invest, to the extent permitted by the 1940 Act, in other affiliated and unaffiliated funds, such as open-end or closed-end management investment companies, including other exchange-traded funds (ETFs). None of the Funds employs a temporary defensive strategy, and none of the Funds invests as part of a temporary defensive strategy to protect against potential stock market declines.

BORROWING MONEY

Each Fund may borrow money from a bank up to a limit of one-third of the market value of its assets. Each Fund has entered into a credit facility to borrow money for temporary, emergency or other purposes, including the funding of shareholder redemption requests, trade settlements and as necessary to distribute to shareholders any income required to maintain such Fund's status as a regulated investment company. To the extent that a Fund borrows money, it will be leveraged; at such times, the Fund will appreciate or depreciate in value more rapidly than its Index. Leverage generally has the effect of increasing the amount of loss or gain a Fund might realize, and may increase volatility in the value of a Fund's investments.

LENDING PORTFOLIO SECURITIES

Each Fund may lend its portfolio securities to brokers, dealers and other financial institutions desiring to borrow securities to complete transactions and for other purposes. In connection with such loans, a Fund receives liquid collateral equal to at least 102% of the value of the portfolio securities being loaned. This collateral is marked-to-market on a daily basis. Although a Fund will receive collateral in connection with all loans of its securities holdings, the Fund would be exposed to a risk of loss should a borrower fail to return the borrowed securities (*e.g.*, the Fund would have to buy replacement securities and the loaned securities may have appreciated beyond the value of the collateral held by the Fund) or become insolvent. A Fund may pay fees to the party arranging the loan of securities. In addition, a Fund will bear the risk of loss of any cash collateral that it invests.

ADDITIONAL NON-PRINCIPAL RISKS

Risk of Investing in Other Funds. (VanEck Vectors Global Spin-Off ETF only.) The Fund may invest in shares of other funds, including ETFs that track the Spin-Off Index. As a result, the Fund will indirectly be exposed to the risks of an investment in the underlying funds. Shares of other funds have many of the same risks as direct investments in common stocks or bonds. In addition, the market value of the Fund's shares is expected to rise and fall as the value of the underlying index or bond rises and falls. The market value of such funds' shares may differ from the net asset value of the particular fund. As a shareholder in a fund (as with ETFs), the Fund would bear its ratable share of that entity's expenses. At the same time, the Fund would continue to pay its own investment management fees and other expenses. As a result, the Fund and its shareholders will be absorbing duplicate levels of fees with respect to investments in other funds, including ETFs. Such fees will not, however, be counted towards the Fund's expense cap.

Risk of Investing in Derivatives. Derivatives are financial instruments whose values are based on the value of one or more reference assets or indicators, such as a security, currency, interest rate, or index. Certain Funds' use of derivatives involves risks different from, and possibly greater than, the risks associated with investing directly in securities and other more traditional investments. Moreover, although the value of a derivative is based on an underlying asset or indicator, a derivative typically does not carry the same rights as would be the case if a Fund invested directly in the underlying securities, currencies or other assets.

Derivatives are subject to a number of risks, such as potential changes in value in response to market developments or, in the case of over-the-counter derivatives, as a result of a counterparty's credit quality and the risk that a derivative transaction may not have the effect the Adviser anticipated. Derivatives also involve the risk of mispricing or improper valuation and the risk that changes in the value of a derivative may not achieve the desired correlation with the underlying asset or indicator. Derivative transactions can create investment leverage, may be highly volatile, and a Fund could lose more than the amount it invests. The use of derivatives may increase the amount and affect the timing and character of taxes payable by shareholders of a Fund.

Many derivative transactions are entered into over-the-counter without a central clearinghouse; as a result, the value of such a derivative transaction will depend on, among other factors, the ability and the willingness of a Fund's counterparty to perform its obligations under the transaction. If a counterparty were to default on its obligations, a Fund's contractual remedies against such counterparty may be subject to bankruptcy and insolvency laws, which could affect the Fund's rights as a creditor (*e.g.*, the Fund may not receive the net amount of payments that it is contractually entitled to receive). A liquid secondary market may not always exist for a Fund's derivative positions at any time.

Leverage Risk. To the extent that a Fund borrows money or utilizes certain derivatives, it may be leveraged. Leveraging generally exaggerates the effect on NAV of any increase or decrease in the market value of a Fund's

portfolio securities.

TAX ADVANTAGED PRODUCT STRUCTURE

Unlike many conventional mutual funds which are only bought and sold at closing NAVs, the Shares of the Funds have been designed to be tradable in a secondary market on an intra-day basis and to be created and redeemed principally in-kind, except for VanEck Vectors Morningstar International Moat ETF whose shares are created and redeemed partially for cash, in Creation Units at each day's market close. These in-kind arrangements are designed to mitigate the adverse effects on a Fund's portfolio that could arise from frequent cash purchase and redemption transactions that affect the NAV of the Fund. Moreover, in contrast to conventional mutual funds, where frequent redemptions can have an adverse tax impact on taxable shareholders because of the need to sell portfolio securities which, in turn, may generate taxable gain, the in-kind redemption

TAX ADVANTAGED PRODUCT STRUCTURE (continued)

mechanism of the Funds, to the extent used, generally is not expected to lead to a tax event for shareholders whose Shares are not being redeemed.

PORTFOLIO HOLDINGS

A description of each Fund's policies and procedures with respect to the disclosure of the Fund's portfolio securities is available in the Fund's SAI.

MANAGEMENT OF THE FUNDS

Board of Trustees. The Board of Trustees of the Trust has responsibility for the general oversight of the management of the Funds, including general supervision of the Adviser and other service providers, but is not involved in the day-to-day management of the Trust. A list of the Trustees and the Trust officers, and their present positions and principal occupations, is provided in the Funds' SAI.

Investment Adviser. Under the terms of an Investment Management Agreement between the Trust and Van Eck Associates Corporation with respect to each Fund (the "Investment Management Agreement"), Van Eck Associates Corporation serves as the adviser to each Fund and, subject to the supervision of the Board of Trustees, is responsible for the day-to-day investment management of the Funds. As of December 31, 2016, the Adviser managed approximately \$37.97 billion in assets. The Adviser has been an investment adviser since 1955 and also acts as adviser or sub-adviser to mutual funds, other exchange-traded funds, other pooled investment vehicles and separate accounts. The Adviser's principal business address is 666 Third Avenue, 9th Floor, New York, New York 10017. A discussion regarding the Board of Trustees' approval of the Investment Management Agreement is available in the Trust's annual report for the period ended September 30, 2016.

For the services provided to each Fund under the Investment Management Agreement, each Fund pays the Adviser monthly fees based on a percentage of each Fund's average daily net assets at the annual rate of 0.45% (with respect to VanEck Vectors Morningstar Wide Moat ETF) and 0.50% (with respect to VanEck Vectors Global Spin-Off ETF and VanEck Vectors Morningstar International Moat ETF). From time to time, the Adviser may waive all or a portion of its fee. Until at least February 1, 2018, the Adviser has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of each Fund (excluding acquired fund fees and expenses, interest expense, trading expenses, taxes and extraordinary expenses) from exceeding 0.49% (with respect to VanEck Vectors Morningstar Wide Moat ETF), 0.55% (with respect to VanEck Vectors Global Spin-Off ETF) and 0.56% (with respect to VanEck Vectors Morningstar International Moat ETF), of its average daily net assets per year.

Each Fund is responsible for all of its expenses, including the investment advisory fees, costs of transfer agency, custody, legal, audit and other services, interest, taxes, any distribution fees or expenses, offering fees or expenses and extraordinary expenses.

Manager of Managers Structure. With respect to VanEck Vectors Global Spin-Off ETF and VanEck Vectors Morningstar International Moat ETF, the Adviser and the Trust may rely on an exemptive order (the "Order") from the

SEC that permits the Adviser to enter into investment sub-advisory agreements with unaffiliated sub-advisers without obtaining shareholder approval. The Adviser, subject to the review and approval of the Board of Trustees, may select one or more sub-advisers for the Fund and supervise, monitor and evaluate the performance of each sub-adviser.

The Order also permits the Adviser, subject to the approval of the Board of Trustees, to replace sub-advisers and amend investment sub-advisory agreements, including applicable fee arrangements, without shareholder approval whenever the Adviser and the Board of Trustees believe such action will benefit the Fund and its shareholders. The Adviser thus would have the responsibility (subject to the oversight of the Board of Trustees) to recommend the hiring and replacement of sub-advisers as well as the discretion to terminate any sub-adviser and reallocate the Fund's assets for management among any other sub-adviser(s) and itself. This means that the Adviser would be able to reduce the sub-advisory fees and retain a larger portion of the management fee, or increase the sub-advisory fees and retain a smaller portion of the management fee. The Adviser would compensate each sub-adviser out of its management fee.

Administrator, Custodian and Transfer Agent. Van Eck Associates Corporation is the administrator for the Funds (the Administrator), and The Bank of New York Mellon is the custodian of the Funds' assets and provides transfer agency and

fund accounting services to the Funds. The Administrator is responsible for certain clerical, recordkeeping and/or bookkeeping services which are provided pursuant to the Investment Management Agreement.

Distributor. Van Eck Securities Corporation is the distributor of the Shares. The Distributor will not distribute Shares in less than Creation Units, and does not maintain a secondary market in the Shares. The Shares are traded in the secondary market.

PORTFOLIO MANAGERS

The portfolio managers who currently share joint responsibility for the day-to-day management of each Fund's portfolio are Hao Hung (Peter) Liao and George Chao. Mr. Liao has been employed by the Adviser since the summer of 2004. Mr. Chao has been employed by the Adviser since December 2007. Prior to joining the Adviser, he served as Controller of Operations Administrations Division and Corporate Safety (September 2006 to December 2007) for United Airlines. Messrs. Liao and Chao also serve as portfolio managers for certain other investment companies and pooled investment vehicles advised by the Adviser. See the Funds' SAI for additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers and their respective ownership of Shares of each Fund.

SHAREHOLDER INFORMATION

DETERMINATION OF NAV

The NAV per Share for each Fund is computed by dividing the value of the net assets of the Fund (*i.e.*, the value of its total assets less total liabilities) by the total number of Shares outstanding. Expenses and fees, including the management fee, are accrued daily and taken into account for purposes of determining NAV. The NAV of each Fund is determined each business day as of the close of trading (ordinarily 4:00 p.m., Eastern time) on the New York Stock Exchange.

The values of each Fund's portfolio securities are based on the securities' closing prices on the markets on which the securities trade, when available. Due to the time differences between the United States and certain countries in which certain Funds invest, securities on these exchanges may not trade at times when Shares of the Fund will trade. In the absence of a last reported sales price, or if no sales were reported, and for other assets for which market quotes are not readily available, values may be based on quotes obtained from a quotation reporting system, established market makers or by an outside independent pricing service. Debt instruments with remaining maturities of more than 60 days are valued at the evaluated mean price provided by an outside independent pricing service. If an outside independent pricing service is unable to provide a valuation, the instrument is valued at the mean of the highest bid and the lowest asked quotes obtained from one or more brokers or dealers selected by the Adviser. Prices obtained by an outside independent pricing service may use information provided by market makers or estimates of market values obtained from yield data related to investments or securities with similar characteristics and may use a computerized grid matrix of securities and its evaluations in determining what it believes is the fair value of the portfolio securities. Short-term debt instruments having a maturity of 60 days or less are valued at amortized cost. Any assets or liabilities denominated in currencies other than the U.S. dollar are converted into U.S. dollars at the current market rates on the date of valuation as quoted by one or more sources. If a market quotation for a security or other asset is not readily available or the Adviser believes it does not otherwise accurately reflect the market value of the security or asset at the time a Fund calculates its NAV, the security or asset will be fair valued by the Adviser in accordance with the Trust's valuation policies and procedures approved by the Board of Trustees. Each Fund may also use fair value pricing in a variety of circumstances, including but not limited to, situations when the value of a security in the Fund's portfolio has been materially affected by events occurring after the close of the market on which the security is principally traded (such as a corporate action or other news that may materially affect the price of a security) or trading in a security has been suspended or halted. In addition, each Fund that holds foreign equity securities currently expects that it will fair value certain of the foreign equity securities held by the Fund each day the Fund calculates its NAV, except those securities principally traded on exchanges that close at the same time the Fund calculates its NAV.

Accordingly, a Fund's NAV is expected to reflect certain portfolio securities' fair values rather than their market prices at the time the exchanges on which they principally trade close. Fair value pricing involves subjective judgments and it is possible that a fair value determination for a security or other asset is materially different than the value that could be realized upon the sale of such security or asset. In addition, fair value pricing could result in a difference between the prices used to calculate a Fund's NAV and the prices used by such Fund's Index. This may adversely affect a Fund's ability to track its Index. With respect to securities that are principally traded on foreign exchanges, the value of a Fund's portfolio securities may change on days when you will not be able to purchase or sell your Shares.

INTRADAY VALUE

The trading prices of the Funds' Shares in the secondary market generally differ from the Funds' daily NAV and are affected by market forces such as the supply of and demand for Fund Shares and underlying securities held by each

Fund, economic conditions and other factors. Information regarding the intraday value of the Funds' Shares (IIV) is disseminated every 15 seconds throughout each trading day by NYSE Arca or by market data vendors or other information providers. The IIV is based on the current market value of the securities and/or cash required to be deposited in exchange for a Creation Unit. The IIV does not necessarily reflect the precise composition of the current portfolio of securities held by each Fund at a particular point in time or the best possible valuation of the current portfolio. Therefore, the IIV should not be viewed as a real-time update of the Funds' NAV, which is computed only once a day. The IIV is generally determined by using current market quotations and/or price quotations obtained from broker-dealers and other market intermediaries that may trade in the portfolio securities held by each Fund and valuations based on current market rates. The quotations and/or valuations of certain Fund holdings may not be updated during U.S. trading hours if such holdings do not trade in the United States. Each Fund is not involved in, or responsible for, the calculation or dissemination of the IIV and makes no warranty as to its accuracy.

RULE 144A AND OTHER UNREGISTERED SECURITIES

An AP (*i.e.*, a person eligible to place orders with the Distributor to create or redeem Creation Units of a Fund) that is not a qualified institutional buyer, as such term is defined under Rule 144A of the Securities Act of 1933, as amended (Securities Act), will not be able to receive, as part of a redemption, restricted securities eligible for resale under Rule 144A or other unregistered securities.

BUYING AND SELLING EXCHANGE-TRADED SHARES

The Shares of the Funds are listed on NYSE Arca. If you buy or sell Shares in the secondary market, you will incur customary brokerage commissions and charges and may pay some or all of the spread, which is any difference between the bid price and the ask price. The spread varies over time for a Fund's Shares based on a Fund's trading volume and market liquidity, and is generally lower if the Funds have high trading volume and market liquidity, and generally higher if the Funds have little trading volume and market liquidity (which is often the case for funds that are newly launched or small in size). In times of severe market disruption or low trading volume in a Fund's Shares, this spread can increase significantly. It is anticipated that the Shares will trade in the secondary market at prices that may differ to varying degrees from the NAV of the Shares. During periods of disruptions to creations and redemptions or the existence of extreme market volatility, the market prices of Shares are more likely to differ significantly from the Shares' NAV.

The Depository Trust Company (DTC) serves as securities depository for the Shares. (The Shares may be held only in book-entry form; stock certificates will not be issued.) DTC, or its nominee, is the record or registered owner of all outstanding Shares. Beneficial ownership of Shares will be shown on the records of DTC or its participants (described below). Beneficial owners of Shares are not entitled to have Shares registered in their names, will not receive or be entitled to receive physical delivery of certificates in definitive form and are not considered the registered holder thereof. Accordingly, to exercise any rights of a holder of Shares, each beneficial owner must rely on the procedures of: (i) DTC; (ii) DTC Participants, *i.e.*, securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations, some of whom (and/or their representatives) own DTC; and (iii) Indirect Participants, *i.e.*, brokers, dealers, banks and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly, through which such beneficial owner holds its interests. The Trust understands that under existing industry practice, in the event the Trust requests any action of holders of Shares, or a beneficial owner desires to take any action that DTC, as the record owner of all outstanding Shares, is entitled to take, DTC would authorize the DTC Participants to take such action and that the DTC Participants would authorize the Indirect Participants and beneficial owners acting through such DTC Participants to take such action and would otherwise act upon the instructions of beneficial owners owning through them. As described above, the Trust recognizes DTC or its nominee as the owner of all Shares for all purposes. For more information, see the section entitled "Book Entry Only System" in the Funds' SAI.

The NYSE Arca is open for trading Monday through Friday and is closed on weekends and the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. Because non-U.S. exchanges may be open on days when a Fund does not price its Shares, the value of the securities in the Fund's portfolio may change on days when shareholders will not be able to purchase or sell a Fund's Shares.

The right of redemption may be suspended or the date of payment postponed (1) for any period during which the NYSE Arca is closed (other than customary weekend and holiday closings); (2) for any period during which trading on the NYSE Arca is suspended or restricted; (3) for any period during which an emergency exists as a result of which disposal of the Shares of a Fund or determination of its NAV is not reasonably practicable; or (4) in such other circumstance as is permitted by the SEC.

Market Timing and Related Matters. The Funds impose no restrictions on the frequency of purchases and redemptions. Frequent purchases and redemptions of Fund Shares may attempt to take advantage of a potential arbitrage opportunity presented by a lag between a change in the value of a Fund's portfolio securities after the close of the primary markets for a Fund's portfolio securities and the reflection of that change in a Fund's NAV ("market timing").

The Board of Trustees considered the nature of each Fund (*i.e.*, a fund whose shares are expected to trade intraday), that the Adviser monitors the trading activity of APs for patterns of abusive trading, that the Funds reserve the right to reject orders that may be disruptive to the management of or otherwise not in the Funds' best interests, and that each Fund may fair value certain of its securities. Given this structure, the Board of Trustees determined that it is not necessary to impose restrictions on the frequency of purchases and redemptions for the Funds at the present time.

DISTRIBUTIONS

Net Investment Income and Capital Gains. As a shareholder of a Fund, you are entitled to your share of such Fund's distributions of net investment income and net realized capital gains on its investments. Each Fund pays out substantially all of its net earnings to its shareholders as distributions.

Each Fund typically earns income dividends from stocks and interest from debt securities. These amounts, net of expenses, are typically passed along to Fund shareholders as dividends from net investment income. The Fund realizes capital gains or losses whenever it sells securities. Net capital gains are distributed to shareholders as capital gain distributions.

Net investment income, if any, is typically distributed to shareholders at least annually and net realized capital gains, if any, are also typically distributed to shareholders at least annually. Dividends may be declared and paid more frequently to

SHAREHOLDER INFORMATION (continued)

improve index tracking or to comply with the distribution requirements of the Internal Revenue Code. In addition, in situations where a Fund acquires investment securities after the beginning of a dividend period, a Fund may elect to distribute at least annually amounts representing the full dividend yield net of expenses on the underlying investment securities, as if the Fund owned the underlying investment securities for the entire dividend period. If the Fund so elects, some portion of each distribution may result in a return of capital, which, for tax purposes, is treated as a return of your investment in Shares. Record shareholders will be notified regarding the portion of the distribution which represents a return of capital.

Distributions in cash may be reinvested automatically in additional Shares of a Fund only if the broker through which you purchased Shares makes such option available.

TAX INFORMATION

As with any investment, you should consider how your Fund investment will be taxed. The tax information in this Prospectus is provided as general information. You should consult your own tax professional about the tax consequences of an investment in a Fund, including the possible application of foreign, state and local taxes. Unless your investment in a Fund is through a tax-exempt entity or tax-deferred retirement account, such as a 401(k) plan, you need to be aware of the possible tax consequences when: (i) the Fund makes distributions, (ii) you sell Shares in the secondary market or (iii) you create or redeem Creation Units.

Taxes on Distributions. As noted above, each Fund expects to distribute net investment income, if any, at least annually and any net realized long-term or short-term capital gains, if any, annually. Each Fund may also pay a special distribution at any time to comply with U.S. federal tax requirements.

In general, your distributions are subject to U.S. federal income tax when they are paid, whether you take them in cash or reinvest them in the Fund. Distributions of net investment income, including any net short-term gains, if any, are generally taxable as ordinary income. Whether distributions of capital gains represent long-term or short-term capital gains is determined by how long the Fund owned the investments that generated them, rather than how long you have owned your Shares. Distributions of net short-term capital gains in excess of net long term capital losses, if any, are generally taxable as ordinary income. Distributions of net long-term capital gains in excess of net short-term capital losses, if any, that are properly reported as capital gain dividends are generally taxable as long-term capital gains. Long-term capital gains of a non-corporate shareholder are generally taxable at a maximum rate of 15% or 20%, depending on whether the shareholder's income exceeds certain threshold amounts.

The Funds may receive dividends, the distribution of which a Fund may report as qualified dividends. In the event that a Fund receives such a dividend and designates the distribution of such dividend as a qualified dividend, the dividend may be taxed at the maximum capital gains rates of 15% or 20%, provided holding period and other requirements are met at both the shareholder and the Fund level. There can be no assurance that any significant portion of a Fund's distributions will be eligible for qualified dividend treatment.

Distributions in excess of a Fund's current and accumulated earnings and profits are treated as a tax-free return of your investment to the extent of your basis in the Shares, and generally as capital gain thereafter. A return of capital, which for tax purposes is treated as a return of your investment, reduces your basis in Shares, thus reducing any loss or increasing any gain on a subsequent taxable disposition of Shares. A distribution will reduce a Fund's NAV per Share and may be taxable to you as ordinary income or capital gain even though, from an economic standpoint, the

distribution may constitute a return of capital.

Dividends, interest and gains from non-U.S. investments of a Fund may give rise to withholding and other taxes imposed by foreign countries. Tax conventions between certain countries and the United States may, in some cases, reduce or eliminate such taxes.

If more than 50% of a Fund's total assets at the end of its taxable year consist of foreign securities, the Fund may elect to pass through to its investors certain foreign income taxes paid by the Fund, with the result that each investor will (i) include in gross income, even though not actually received, the investor's pro rata share of the Fund's foreign income taxes, and (ii) either deduct (in calculating U.S. taxable income) or credit (in calculating U.S. federal income), subject to certain holding period and other limitations, the investor's pro rata share of the Fund's foreign income taxes. It is expected that more than 50% of VanEck Vectors Morningstar International Moat ETF's assets will consist of foreign securities.

Backup Withholding. Each Fund may be required to withhold a percentage of your distributions and proceeds if you have not provided a taxpayer identification number or social security number or otherwise established a basis for exemption from backup withholding. The backup withholding rate for individuals is currently 28%. This is not an additional tax and may be refunded, or credited against your U.S. federal income tax liability, provided certain required information is furnished to the Internal Revenue Service (IRS).

Taxes on the Sale or Cash Redemption of Exchange Listed Shares. Currently, any capital gain or loss realized upon a sale of Shares is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as a short-term capital gain or loss if held for one year or less. However, any capital loss on a sale of Shares held for six months or less is treated as long-term capital loss to the extent that capital gain dividends were paid with respect to such Shares. The ability to deduct capital losses may be limited. To the extent that a Fund shareholder's Shares are redeemed for cash, this is normally treated as a sale for tax purposes.

Taxes on Creations and Redemptions of Creation Units. A person who exchanges securities for Creation Units generally will recognize a gain or loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time of exchange and the sum of the exchanger's aggregate basis in the securities surrendered and the amount of any cash paid for such Creation Units. A person who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the sum of the aggregate market value of the securities received. The IRS, however, may assert that a loss realized upon an exchange of primarily securities for Creation Units cannot be deducted currently under the rules governing wash sales, or on the basis that there has been no significant change in economic position. Persons exchanging securities for Creation Units or redeeming Creation Units should consult their own tax adviser with respect to whether wash sale rules apply and when a loss might be deductible and the tax treatment of any creation or redemption transaction.

Under current U.S. federal income tax laws, any capital gain or loss realized upon a redemption (or creation) of Creation Units is generally treated as long-term capital gain or loss if the Shares (or securities surrendered) have been held for more than one year and as a short-term capital gain or loss if the Shares (or securities surrendered) have been held for one year or less.

If you create or redeem Creation Units, you will be sent a confirmation statement showing how many Shares you created or sold and at what price.

Medicare Tax. An additional 3.8% Medicare tax is imposed on certain net investment income (including ordinary dividends and capital gain distributions received from a Fund and net gains from redemptions or other taxable dispositions of Fund Shares) of U.S. individuals, estates and trusts to the extent that such person's modified adjusted gross income (in the case of an individual) or adjusted gross income (in the case of an estate or trust) exceeds certain threshold amounts.

Non-U.S. Shareholders. If you are not a citizen or resident alien of the United States or if you are a non-U.S. entity, the Funds' ordinary income dividends (which include distributions of net short-term capital gains) will generally be subject to a 30% U.S. withholding tax, unless a lower treaty rate applies or unless such income is effectively connected with a U.S. trade or business.

As part of the Foreign Account Tax Compliance Act, (FATCA), a Fund may be required to withhold 30% on certain types of U.S. sourced income (*e.g.*, dividends, interest, and other types of passive income) and after January 1, 2019, proceeds from the sale or other disposition of property producing U.S. sourced income and certain capital gain dividends to (i) foreign financial institutions (FFIs), including non-U.S. investment funds, unless they agree to collect and disclose to the IRS information regarding their direct and indirect U.S. account holders and (ii) certain nonfinancial foreign entities (NFFE), unless they certify certain information regarding their direct and indirect U.S. owners. To avoid possible withholding, FFIs will need to enter into agreements with the IRS which state that they will provide the IRS information, including the names, account numbers and balances, addresses and taxpayer identification numbers of U.S. account holders and comply with due diligence procedures with respect to the identification of U.S. accounts as well as agree to withhold tax on certain types of withholdable payments made to

non-compliant foreign financial institutions or to applicable foreign account holders who fail to provide the required information to the IRS, or similar account information and required documentation to a local revenue authority, should an applicable intergovernmental agreement be implemented. NFFEs will need to provide certain information regarding each substantial U.S. owner or certifications of no substantial U.S. ownership, unless certain exceptions apply, or agree to provide certain information to the IRS.

While some parts of the FATCA rules have not been finalized, a Fund may be subject to the FATCA withholding obligation, and also will be required to perform due diligence reviews to classify foreign entity investors for FATCA purposes. Investors are required to agree to provide information necessary to allow a Fund to comply with the FATCA rules. If a Fund is required to withhold amounts from payments pursuant to FATCA, investors will receive distributions that are reduced by such withholding amounts.

Non-U.S. shareholders are advised to consult their tax advisors with respect to the particular tax consequences to them of an investment in the Funds, including the possible applicability of the U.S. estate tax.

The foregoing discussion summarizes some of the consequences under current U.S. federal income tax law of an investment in a Fund. It is not a substitute for personal tax advice. Consult your own tax advisor about the potential tax consequences of an investment in a Fund under all applicable tax laws.

INDEX PROVIDERS

The Spin-Off Index is published by Horizon Kinetics, LLC (Horizon Kinetics). The ex-US Moat Focus Index and Wide Moat Focus Index are published by Morningstar. The Morningstar® name and logo are registered trademarks of Morningstar. Morningstar® Global ex-US Moat Focus IndexSM and Morningstar® Wide Moat Focus Index SM are service marks of Morningstar. Morningstar is a leading provider of independent investment research in North America, Europe, Australia, and Asia. Morningstar offers an extensive line of internet, software, and print-based products and services for individuals, financial advisors, and institutions. The ex-US Moat Focus Index and Wide Moat Focus Index are rooted in Morningstar's proprietary research and are based on a transparent, rules-based methodology. Presently, Morningstar has developed and is maintaining a number of indexes in addition to the ex-US Moat Focus Index and Wide Moat Focus Index.

Horizon Kinetics and Morningstar are each referred to herein as an Index Provider and, together, the Index Providers. The Index Providers do not sponsor, endorse, or promote the Funds and bear no liability with respect to the Funds or any security.

HORIZON KINETICS GLOBAL SPIN-OFF INDEX

The Spin-Off Index is a rules-based, equal-weighted index intended to track the performance of listed, publicly-held spin-offs that are domiciled and trade in the U.S. or developed markets of Western Europe and Asia.

In order for a company to be eligible for inclusion in the Spin-Off Index, the initial distribution of the component security must have been distributed to shareholders of the distributing company (the parent company) without any action having to be taken by the parent company shareholders. Spin-offs conducted in the form of share exchanges and initial public offerings are not eligible for inclusion in the Spin-Off Index. Additionally, the parent company must have distributed at least 80% of the component security to shareholders of the parent company, and shares of the component security must not have been publicly traded prior to the distribution. Companies that are separated to effect a merger or acquisition of the spun-off entity immediately following the distribution are excluded from the Spin-Off Index. Constituents are eligible for inclusion for a period of five years starting from the Spin-Off Index's first Reconstitution Date (as defined below) following the distribution of shares. In limited instances, the primary business of the company (what would typically be considered the parent company) is listed as the spun-off company due to tax or other legal considerations. The Index Provider may use its discretion in classifying which is the spun-off entity in these situations.

Component securities of the Spin-Off Index must have a market capitalization of at least \$500 million and a minimum average daily value traded for trailing 20 days of \$0.5 million. Shorter periods for average daily value traded will be considered for spin-offs that occur within 20 days of the Reconstitution Date at the discretion of the Index Provider. The component security must be domiciled and listed in the U.S. or the developed markets in Western Europe and Asia. Country of domicile is defined as the country where the company is headquartered. The component security must be an operating company and not a closed-end fund, an exchange traded fund (ETF) or a limited partnership. The Index Provider will, in most cases, use the screening system described herein for determining the composition of the Spin-Off Index. In addition, the Index Provider may screen issuers for certain factors or characteristics that the Index Provider believes, in its discretion, should cause those issuers to be included or excluded from the Index. As of December 31, 2016, the Spin-Off Index included 95 securities of companies with a market capitalization range of approximately \$485 million to \$102 billion and a weighted average market capitalization of \$5.3 billion. These amounts are subject to change.

The Spin-Off Index has a quarterly review in March, June, September and December of each year. The Spin-Off Index is reconstituted and rebalanced to equal-weight quarterly. Component changes are made after the close of the last trading day of March, June, September and December, and become effective at the open of the following trading day (Reconstitution Date). Constituents are first eligible for inclusion after the close of the securities' first day of regular-way trading. Components of the Spin-Off Index may change before the regularly scheduled review period if a component is deemed ineligible due to a specific corporate action.

The Index Provider is responsible for setting policy, determining index composition, and administering the indices. The Index Provider reserves the right to use qualitative judgment to include, exclude, adjust, or postpone the inclusion of a stock. Continued index membership of a constituent is not necessarily subject to the guidelines provided herein. A stock may be considered for exclusion by the Index Provider on the basis of corporate governance, accounting policies, lack of transparency or lack of representation, despite meeting all the criteria provided herein.

MORNINGSTAR® GLOBAL EX-US MOAT FOCUS INDEXSM

The ex-US Moat Focus Index is a rules-based index intended to offer exposure to companies that the Index Provider determines to have sustainable competitive advantages based on a proprietary methodology that considers quantitative and qualitative factors (wide and narrow moat companies). Wide moat companies are those that the Index Provider's equity research team believes will maintain its competitive advantage(s) for at least 20 years. Narrow moat companies are those that the Index Provider's equity research team believes will maintain its competitive advantage(s) for at least 10 years. Wide and narrow moat companies are selected from the universe of companies represented in the Morningstar® Global Markets ex-US IndexSM (the Parent Index), a broad market index representing 97% of developed ex-US and emerging markets market capitalization. The ex-US Moat Focus Index targets a select group of equity securities of wide and narrow moat companies: those that according to Morningstar's equity research team are attractively priced based on the of the issuer's common stock price to the Index Provider's equity research team's estimate of fair value at the time of each ex-US Moat Focus Index review. The Index Provider's equity research team's fair value estimates are calculated using a standardized, proprietary valuation model.

A selection committee, comprising members of Morningstar's equity research team, makes the final determination of whether a company is a wide or narrow moat company. Only those companies with one or more of the identifiable competitive advantages, as determined by the Index Provider's equity research team and agreed to by the selection committee, are wide or narrow moat companies. The quantitative factors used to identify competitive advantages include historical and projected returns on invested capital relative to cost of capital. The qualitative factors used to identify competitive advantages include customer switching cost (*i.e.*, the costs of customers switching to competitors), internal cost advantages, intangible assets (*e.g.*, intellectual property and brands), network effects (*i.e.*, whether products or services become more valuable as the number of customers grows) and efficient scale (*i.e.*, whether the company effectively serves a limited market that potential rivals have little incentive to enter into).

The Index Provider's equity research team uses a standardized, proprietary valuation model to assign fair values to potential ex-US Moat Focus Index constituents' common stock. The Index Provider's equity research team estimates the issuer's future free cash flows and then calculates an enterprise value using weighted average costs of capital as the discount rate. The Index Provider's equity research team then assigns each issuer's common stock a fair value by adjusting the enterprise value to account for net debt and other adjustments.

The Index Provider utilizes a momentum screen, in which momentum represents a security's 12-month price change. A momentum signal is used to exclude 20% of the wide and narrow moat stocks in the Parent Index with the worst 12-month momentum based on a 12-month price change of each stock. A buffer rule is applied to the current ex-US Moat Focus Index constituents. Those that are ranked in the top 150% of the number of stocks eligible for the ex-US Moat Focus Index, as measured by current market price/fair value will remain in the ex-US Moat Focus Index at the time of reconstitution and those that fall outside of the top 150% are excluded from the Index. The maximum weight of an individual country or sector in the ex-US Moat Focus Index is capped at 10% more than its corresponding weight in the Parent Index at the time of reconstitution, or 40%, whichever is higher.

As of December 31, 2016, the ex-US Moat Focus Index included 79 securities of companies with a market capitalization range of between approximately \$1.28 billion and \$231.87 billion and a weighted average market capitalization of \$29.38 billion. These amounts are subject to change.

The ex-US Moat Focus Index employs a staggered rebalance methodology. The ex-US Moat Focus Index is divided into two equally-weighted sub-portfolios, each is reconstituted and rebalanced semi-annually on alternating quarters. Each sub-portfolio will contain 50 equally-weighted securities at its semi-annual reconstitution and weights will vary

with market prices until the next reconstitution date. Due to the staggered rebalance methodology, constituents and weightings may vary between sub-portfolios. Each sub-portfolio is reweighted to 50% of the total ex-US Moat Focus Index every six months. Adjustments to one sub-portfolio are performed after the close of business on the third Friday of March and September and adjustments to the other sub-portfolio are performed after the close of business on the third Friday of June and December and are effective on the following Monday. If the Monday is a market holiday, reconstitution and rebalancing occurs on the Tuesday immediately following.

Rebalancing data, including constituent weights and related information, is posted on the Index Provider's website at the end of each quarter-end month. Target weights of the constituents are not otherwise adjusted between quarters except in the event of certain types of corporate actions.

MORNINGSTAR® WIDE MOAT FOCUS INDEXSM

The Wide Moat Focus Index is a rules-based index intended to offer exposure to companies that the Index Provider determines have sustainable competitive advantages based on a proprietary methodology that considers quantitative and qualitative factors (wide moat companies). Wide moat companies are selected from the universe of companies represented in the Morningstar® US Market IndexSM, a broad market index representing 97% of U.S. market capitalization. The Wide Moat Focus Index targets a select group of wide moat companies: those that according to Morningstar's equity research team are attractively priced as of each Wide Moat Focus Index review. Out of the companies in the Morningstar US Market Index that the Index Provider determines are wide moat companies, the Index Provider selects companies to be included in the Wide Moat Focus Index as determined by the ratio of the Index Provider's estimate of fair value of the issuer's common stock to the price. The Index Provider's equity research team's fair value estimates are calculated using a standardized, proprietary valuation model.

A selection committee, comprising members of Morningstar's equity research team, makes the final determination of whether a company is a wide moat company. Only those companies with one or more of the identifiable competitive advantages, as determined by the Index Provider's equity research team and agreed to by the selection committee, are wide moat companies. The quantitative factors used to identify competitive advantages include historical and projected returns on invested capital relative to cost of capital. The qualitative factors used to identify competitive advantages include customer switching cost (*i.e.*, the costs of customers switching to competitors), internal cost advantages, intangible assets (*e.g.*, intellectual property and brands), network effects (*i.e.*, whether products or services become more valuable as the number of customers grows) and efficient scale (*i.e.*, whether the company effectively serves a limited market that potential rivals have little incentive to enter into).

The Index Provider's equity research team uses a standardized, proprietary valuation model to assign fair values to potential Wide Moat Focus Index constituents' common stock. The Index Provider's equity research team estimates the issuer's future free cash flows and then calculates an enterprise value using weighted average costs of capital as the discount rate. The Index Provider's equity research team then assigns each issuer's common stock a fair value by adjusting the enterprise value to account for net debt and other adjustments.

A buffer rule is applied to the current Wide Moat Focus Index constituents. Those that are ranked in the top 150% of stocks representing the lowest current market price/fair value price eligible for inclusion in the Wide Moat Focus Index will remain in the Wide Moat Focus Index at the time of reconstitution and those that fall outside of the top 150% are excluded from the Index. The maximum weight of an individual sector in the Wide Moat Focus Index is capped at 10% more than its corresponding weight in the Morningstar US Market Index at the time of reconstitution, or 40%, whichever is higher.

As of December 31, 2016, the Wide Moat Focus Index included 50 securities of companies with a market capitalization range of between approximately \$2.64 billion to \$483.16 billion and a weighted average market capitalization of \$82.10 billion. These amounts are subject to change.

The Wide Moat Focus Index employs a staggered rebalance methodology. The Wide Moat Focus Index is divided into two equally-weighted sub-portfolios, and each is reconstituted and rebalanced semi-annually on alternating quarters. Each sub-portfolio will contain 40 equally-weighted securities at its semi-annual reconstitution and weights will vary with market prices until the next reconstitution date. Due to the staggered rebalance methodology, constituents and weightings may vary between sub-portfolios. Each sub-portfolio is reweighted to 50% of the total Wide Moat Focus Index every six months. Adjustments to one sub-portfolio are performed after the close of business on the third Friday of March and September and adjustments to the other sub-portfolio are performed after the close of business on the

third Friday of June and December, and all adjustments are effective on the following Monday. If the Monday is a market holiday, reconstitution and rebalancing occurs on the Tuesday immediately following.

Rebalancing data, including constituent weights and related information, is posted on the Index Provider's website at the end of each quarter-end month. Target weights of the constituents are not otherwise adjusted between quarters except in the event of certain types of corporate actions.

LICENSE AGREEMENTS AND DISCLAIMERS

The Adviser has entered into a licensing agreement with Horizon Kinetics to use the Horizon Kinetics Global Spin-Off Index. The VanEck Vectors Global Spin-Off ETF is entitled to use the Spin-Off Index pursuant to a sub-licensing arrangement with the Adviser.

The VanEck Vectors Global Spin-Off ETF is not sponsored, endorsed, sold or promoted by Horizon Kinetics. Horizon Kinetics makes no representation or warranty, express or implied, to the owners of the VanEck Vectors Global Spin-Off ETF or any member of the public regarding the advisability of investing in securities generally or in the VanEck Vectors Global Spin-Off ETF.

The Adviser has entered into licensing agreements with Morningstar to use the Morningstar® Global ex-US Moat Focus IndexSM and Morningstar® Wide Moat Focus IndexSM. MOAT FOCUS INDEX OR ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL MORNINGSTAR HAVE ANY LIABILITY FOR ANY SPECIAL, PUNITIVE, INDIRECT, OR CONSEQUENTIAL DAMAGES (INCLUDING LOST PROFITS), EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

FINANCIAL HIGHLIGHTS

The financial highlights tables which follow are intended to help you understand the Funds' financial performance for the past five years or as indicated. Certain information reflects financial results for a single Fund share. The total returns in the table represent that rate that an investor would have earned (or lost) on an investment in a Fund (assuming reinvestment of all dividends and distributions). This information has been audited by Ernst & Young LLP, the Trust's independent registered public accounting firm, whose report, along with the Funds' financial statements, are included in the Funds' Annual Report, which is available upon request.

FINANCIAL HIGHLIGHTS (continued)**For a share outstanding throughout each period:**

	Global Spin-Off ETF	
	For the Year Ended September 30, 2016	For the Period June 9, 2015(a) through September 30, 2015
Net asset value, beginning of period	\$ 16.98	\$ 19.78
Income from investment operations:		
Net investment income	0.39	0.05
Net realized and unrealized gain (loss) on investments	3.53	(2.85)
Total from investment operations	3.92	(2.80)
Less:		
Dividends from net investment income	(0.11)	
Net asset value, end of period	\$ 20.79	\$ 16.98
Total return (b)	23.22%	(14.16)% ^(c)

PREMIUM/DISCOUNT INFORMATION

Information regarding how often the closing trading price of the Shares of each Fund was above (*i.e.*, at a premium) or below (*i.e.*, at a discount) the NAV of the Fund for the most recently completed year and the most recently completed quarter(s), as well as for each of the four previous calendar quarters, when available, can be found at www.vaneck.com.

GENERAL INFORMATION

CONTINUOUS OFFERING

The method by which Creation Units are created and traded may raise certain issues under applicable securities laws. Because new Creation Units are issued and sold by the Trust on an ongoing basis, a distribution, as such term is used in the Securities Act may occur at any point. Broker dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery and liability provisions of the Securities Act.

For example, a broker dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent Shares, and sells such Shares directly to customers, or if it chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary market demand for Shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a categorization as an underwriter.

Broker dealers who are not underwriters but are participating in a distribution (as contrasted to ordinary secondary trading transactions), and thus dealing with Shares that are part of an unsold allotment within the meaning of Section 4(3)(C) of the Securities Act, would be unable to take advantage of the prospectus delivery exemption provided by Section 4(3) of the Securities Act. This is because the prospectus delivery exemption in Section 4(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. As a result, broker dealer firms should note that dealers who are not underwriters but are participating in a distribution (as contrasted with ordinary secondary market transactions) and thus dealing with the Shares that are part of an overallotment within the meaning of Section 4(3)(A) of the Securities Act would be unable to take advantage of the prospectus delivery exemption provided by Section 4(3) of the Securities Act. Firms that incur a prospectus delivery obligation with respect to Shares are reminded that, under Rule 153 of the Securities Act, a prospectus delivery obligation under Section 5(b)(2) of the Securities Act owed to an exchange member in connection with a sale on NYSE Arca is satisfied by the fact that the prospectus is available at NYSE Arca upon request. The prospectus delivery mechanism provided in Rule 153 is only available with respect to transactions on an exchange.

In addition, certain affiliates of the Funds and the Adviser may purchase and resell Fund shares pursuant to this Prospectus.

OTHER INFORMATION

The Trust was organized as a Delaware statutory trust on March 15, 2001. Its Declaration of Trust currently permits the Trust to issue an unlimited number of Shares of beneficial interest. If shareholders are required to vote on any matters, each Share outstanding would be entitled to one vote. Annual meetings of shareholders will not be held except as required by the 1940 Act and other applicable law. Each Fund may liquidate and terminate at any time and for any reason, including as a result of the termination of the applicable license agreement between the Adviser and the applicable Index Provider, without shareholder approval. See the Funds' SAI for more information concerning the Trust's form of organization. Section 12(d)(1) of the 1940 Act restricts investments by investment companies in the securities of other investment companies, including Shares of a Fund. Registered investment companies are permitted to invest in the Funds beyond the limits set forth in Section 12(d)(1) subject to certain terms and conditions set forth in an SEC exemptive order issued to the Trust, including that such investment companies enter into an agreement with the Funds.

The Prospectus, SAI and any other Fund communication do not create any contractual obligations between the Fund's shareholders and the Trust, the Fund, the Adviser and/or the Trustees. Further, shareholders are not intended third-party beneficiaries of any contracts entered into by (or on behalf of) the Fund, including contracts with the Adviser or other parties who provide services to the Fund.

Dechert LLP serves as counsel to the Trust, including the Funds. Ernst & Young LLP serves as the Trust's independent registered public accounting firm and audits the Funds' financial statements annually.

ADDITIONAL INFORMATION

This Prospectus does not contain all the information included in the Registration Statement filed with the SEC with respect to the Funds' Shares. Information about the Funds can be reviewed and copied at the SEC's Public Reference Room and information on the operation of the Public Reference Room may be obtained by calling the SEC at 1.202.551.8090. The Funds' Registration Statement, including this Prospectus, the Funds' SAI and the exhibits may be examined at the offices of the SEC (100 F Street, NE, Washington, DC 20549) or on the EDGAR database at the SEC's website (<http://www.sec.gov>), and copies may be obtained, after paying a duplicating fee, by electronic request at the following email address: publicinfo@sec.gov, or by writing the SEC's Public Reference Section, Washington, DC 20549-1520. These documents and other information concerning the Trust also may be inspected at the offices of NYSE Arca (20 Broad Street, New York, New York 10005).

The SAI for the Funds, which has been filed with the SEC, provides more information about the Funds. The SAI for the Funds is incorporated herein by reference and is legally part of this Prospectus. Additional information about the Funds' investments is available in each Fund's annual and semi-annual reports to shareholders. In each Fund's annual report, you will find a discussion of the market conditions and investment strategies that significantly affected the Fund's performance during its last fiscal year. The SAI and the Funds' annual and semi-annual reports may be obtained without charge by writing to the Funds at Van Eck Securities Corporation, the Funds' distributor, at 666 Third Avenue, 9th Floor, New York, New York 10017 or by calling the distributor at the following number: Investor Information: 800.826.2333.

Shareholder inquiries may be directed to the Funds in writing to 666 Third Avenue, 9th Floor, New York, New York 10017 or by calling 800.826.2333.

The Funds' SAI is available at www.vaneck.com.

(Investment Company Act file no. 811-10325)

Edgar Filing: VanEck Vectors ETF Trust - Form 497

For more detailed information about the Funds, see the SAI dated February 1, 2017, as supplemented, which is incorporated by reference into this Prospectus. Additional information about the Funds' investments will be available in each Fund's annual and semi-annual reports to shareholders. In each Fund's annual report, you will find a discussion of the market conditions and investment strategies that significantly affected the Fund's performance during its last fiscal year.

Call VanEck at 800.826.2333 to request, free of charge, the annual or semi-annual reports, the SAI, or other information about the Funds or to make shareholder inquiries. You may also obtain the SAI or a Fund's annual or semi-annual reports, when available, by visiting the VanEck website at www.vaneck.com.

Information about the Funds (including the SAI) can also be reviewed and copied at the SEC Public Reference Room in Washington, D.C. Information about the operation of the Public Reference Room may be obtained by calling 202.551.8090.

Reports and other information about the Funds are available on the EDGAR Database on the SEC's internet site at <http://www.sec.gov>. In addition, copies of this information may be obtained, after paying a duplicating fee, by electronic request at the following email address: publicinfo@sec.gov, or by writing the SEC's Public Reference Section, Washington, DC 20549-0102.

VANECK VECTORS™ BIOTECH ETF***SUMMARY INFORMATION****INVESTMENT OBJECTIVE**

VanEck Vectors™ Biotech ETF (the Fund) seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the MVIS™ US Listed Biotech 25 Index (the Biotech Index).

FUND FEES AND EXPENSES

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund (Shares).

Shareholder Fees (*fees paid directly from your investment*) None
Annual Fund Operating Expenses
(expenses that you pay each year as a percentage of the value of your investment)

Management Fee	0.35%
Other Expenses	0.05%

Total Annual Fund Operating Expenses ^(a)	0.40%
Fee Waivers and Expense Reimbursement ^(a)	-0.05%

Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement ^(a)	0.35%
--	-------

^(a) Van Eck Associates Corporation (the Adviser) has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, trading expenses, taxes and extraordinary expenses) from exceeding 0.35% of the Fund's average daily net assets per year until at least February 1, 2018. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

EXPENSE EXAMPLE

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling Shares of the Fund.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5% annual return and that the Fund's operating expenses remain the same (except that the example incorporates the fee waiver and/or expense reimbursement arrangement for only the first year). Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

YEAR EXPENSES

1	\$	36
3	\$	123
5	\$	219
10	\$	500

PORTFOLIO TURNOVER

The Fund will pay transaction costs, such as commissions, when it purchases and sells securities (or turns over its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, may affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 41% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund normally invests at least 80% of its total assets in securities that comprise the Fund's benchmark index. The Biotech Index includes common stocks and depositary receipts of U.S. exchange-listed companies in the biotechnology sector. Such companies may include medium-capitalization companies and foreign companies that are listed on a U.S. exchange. Companies are considered to be in the biotechnology sector if they derive at least 50% of their revenues from (or,

* Prior to May 1, 2016, the Fund's name was Market Vectors Biotech ETF.

VANECK VECTORSTM BIOTECH ETF (continued)

in certain circumstances, have at least 50% of their assets related to) biotechnology. The biotechnology sector includes companies engaged primarily in research (including research contractors) and development as well as production, marketing and sales of drugs based on genetic analysis and diagnostic equipment (excluding pharmacies). Of the largest 50 stocks in the biotechnology sector by full market capitalization, the top 25 by free-float market capitalization (*i.e.*, includes only shares that are readily available for trading in the market) and three month average daily trading volume are included in the Biotech Index. As of December 31, 2016, the Biotech Index included 25 securities of companies with a market capitalization range of approximately \$2.50 billion to \$108.77 billion and a weighted average market capitalization of \$2.13 billion. These amounts are subject to change. The Fund's 80% investment policy is non-fundamental and may be changed without shareholder approval upon 60 days' prior written notice to shareholders.

The Fund, using a passive or indexing investment approach, attempts to approximate the investment performance of the Biotech Index by investing in a portfolio of securities that generally replicates the Biotech Index. Unlike many investment companies that try to beat the performance of a benchmark index, the Fund does not try to beat the Biotech Index and does not seek temporary defensive positions when markets decline or appear overvalued. Indexing may eliminate the chance that the Fund will substantially outperform the Biotech Index but also may reduce some of the risks of active management, such as poor security selection. Indexing seeks to achieve lower costs and better after-tax performance by keeping portfolio turnover low in comparison to actively managed investment companies.

The Fund is classified as a non-diversified fund and, therefore, may invest a greater percentage of its assets in a particular issuer. The Fund may concentrate its investments in a particular industry or group of industries to the extent that the Biotech Index concentrates in an industry or group of industries. As of September 30, 2016, the Biotech Index was concentrated in the biotechnology sector, and the health care sector represented a significant portion of the Biotech Index.

PRINCIPAL RISKS OF INVESTING IN THE FUND

Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's Shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Therefore, you should consider carefully the following risks before investing in the Fund, each of which could significantly and adversely affect the value of an investment in the Fund.

Risk of Investing in the Biotechnology Sector. The success of biotechnology companies is highly dependent on the development, procurement and/or marketing of drugs. The values of biotechnology companies are also dependent on the development, protection and exploitation of intellectual property rights and other proprietary information, and the profitability of biotechnology companies may be affected significantly by such things as the expiration of patents or the loss of, or the inability to enforce, intellectual property rights. The research and development and other costs associated with developing or procuring new drugs, products or technologies and the related intellectual property rights can be significant, and the results of such research and expenditures are unpredictable. The Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the biotechnology sector. Moreover, the process for obtaining regulatory approval by the U.S. Food and Drug Administration or other governmental regulatory authorities is long and costly and there can be no assurance that the necessary approvals will be obtained or maintained. Companies in the biotechnology sector may also be subject to

expenses and losses from extensive litigation based on intellectual property, product liability and similar claims. Companies in the biotechnology sector may be adversely affected by government regulation and changes in reimbursement rates. Healthcare providers, principally hospitals, that transact with companies in the biotechnology sector, often rely on third party payors, such as Medicare, Medicaid and other government sponsored programs, private health insurance plans and health maintenance organizations to reimburse all or a portion of the cost of healthcare related products or services.

A biotechnology company's valuation can often be based largely on the potential or actual performance of a limited number of products. A biotechnology company's valuation can also be greatly affected if one of its products proves unsafe, ineffective or unprofitable. Such companies may also be characterized by thin capitalization and limited markets, financial resources or personnel. The stock prices of companies in the biotechnology sector have been and will likely continue to be extremely volatile, particularly when their products are up for regulatory approval and/or under regulatory scrutiny. Some of the companies in the Biotech Index are engaged in other lines of business unrelated to biotechnology, and they may experience problems with these lines of business which could adversely affect their operating results. The operating results of these companies may fluctuate as a result of these additional risks and events in the other lines of business. In addition, a company's ability to engage in new activities may expose it to business risks with which it has less experience than it has with the business risks associated with its traditional businesses. Despite a company's possible success in traditional biotechnology activities, there can be no assurance that the other lines of business in which these companies are engaged will not have an adverse effect on a company's business or financial condition.

Certain companies in which the Fund may invest are non-U.S. issuers whose securities are listed on U.S. exchanges. These securities involve risks beyond those associated with investments in U.S. securities, including greater market volatility, higher transactional costs, the possibility that the liquidity of such securities could be impaired because of future political and/or economic developments, taxation by foreign governments, political instability, the possibility that foreign governmental restrictions may be adopted which might adversely affect such securities and that the selection of such securities may be more difficult because there may be less publicly available information concerning such non-U.S. issuers or the accounting, auditing and financial reporting standards, practices and requirements applicable to non-U.S. issuers may differ from those applicable to U.S. issuers.

Equity Securities Risk. The value of the equity securities held by the Fund may fall due to general market and economic conditions, perceptions regarding the markets in which the issuers of securities held by the Fund participate, or factors relating to specific issuers in which the Fund invests. Equity securities are subordinated to preferred securities and debt in a company's capital structure with respect to priority in right to a share of corporate income, and therefore will be subject to greater dividend risk than preferred securities or debt instruments. In addition, while broad market measures of equity securities have historically generated higher average returns than fixed income securities, equity securities have generally also experienced significantly more volatility in those returns, although under certain market conditions fixed income securities may have comparable or greater price volatility.

Risk of Investing in the Health Care Sector. To the extent that the health care sector continues to represent a significant portion of the Fund, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the health care sector. Companies in the health care sector may be affected by extensive government regulation, restrictions on government reimbursement for medical expenses, rising costs of medical products and services, pricing pressure, an increased emphasis on outpatient services, limited number of products, industry innovation, changes in technologies and other market developments. Many health care companies are heavily dependent on patent protection and are subject to extensive litigation based on product liability and similar claims.

Risk of Investing in Depositary Receipts. The Fund may invest in depositary receipts which involve similar risks to those associated with investments in foreign securities. Depositary receipts are receipts listed on U.S. exchanges issued by banks or trust companies that entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares. Investments in depositary receipts may be less liquid than the underlying shares in their primary trading market and, if not included in the Biotech Index, may negatively affect the Fund's ability to replicate the performance of the Biotech Index.

Risk of Investing in Medium-Capitalization Companies. Medium-capitalization companies may be more volatile and more likely than large-capitalization companies to have narrower product lines, fewer financial resources, less management depth and experience and less competitive strength. In addition, these companies often have greater price volatility, lower trading volume and less liquidity than larger more established companies. Returns on investments in securities of medium-capitalization companies could trail the returns on investments in securities of large-capitalization companies.

Issuer-Specific Changes Risk. The value of individual securities or particular types of securities in the Fund's portfolio can be more volatile than the market as a whole and can perform differently from the value of the market as a whole, especially if the Fund's portfolio is concentrated in a country, group of countries, region, market, industry, group of industries, sector or asset class. The value of securities of smaller issuers can be more volatile than that of larger issuers.

Market Risk. The prices of the securities in the Fund are subject to the risks associated with investing in the securities market, including general economic conditions and sudden and unpredictable drops in value. An investment in the Fund may lose money.

Operational Risk. The Fund is exposed to operational risk arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or system failures. The Fund seeks to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate for those risks that they are intended to address.

Index Tracking Risk. The Fund's return may not match the return of the Biotech Index for a number of reasons. For example, the Fund incurs a number of operating expenses not applicable to the Biotech Index and incurs costs associated with buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Biotech Index, which are not factored into the return of the Biotech Index. Transaction costs, including brokerage costs, will decrease the Fund's net asset value (NAV) to the extent not offset by the transaction fee payable by an Authorized Participant (AP). Market disruptions and regulatory restrictions could have an adverse effect on the Fund's ability to adjust its exposure to the required levels in order to track the Biotech Index. Errors in the Biotech Index data, the Biotech Index computations and/or the construction of the Biotech Index in accordance with its methodology may occur from

VANECK VECTORS™ BIOTECH ETF (continued)

time to time and may not be identified and corrected by the Biotech Index provider for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. In addition, the Fund may not be able to invest in certain securities included in the Biotech Index, or invest in them in the exact proportions in which they are represented in the Biotech Index, due to legal restrictions or limitations imposed by the governments of certain countries, a lack of liquidity on stock exchanges in which such securities trade, potential adverse tax consequences or other regulatory reasons. To the extent the Fund calculates its NAV based on fair value prices and the value of the Biotech Index is based on securities closing prices (*i.e.*, the value of the Biotech Index is not based on fair value prices), the Fund's ability to track the Biotech Index may be adversely affected. For tax efficiency purposes, the Fund may sell certain securities, and such sale may cause the Fund to realize a loss and deviate from the performance of the Biotech Index. In light of the factors discussed above, the Fund's return may deviate significantly from the return of the Biotech Index.

Authorized Participant Concentration Risk. The Fund may have a limited number of financial institutions that act as APs, none of which are obligated to engage in creation or redemption transactions. To the extent that those APs exit the business, or are unable to or choose not to process creation and/or redemption orders, and no other AP is able to step forward to create and redeem, there may be a significantly diminished trading market for Shares or Shares may trade like closed-end funds at a discount (or premium) to NAV and possibly face trading halts and/or de-listing. The AP concentration risk may be heightened in scenarios where APs have limited or diminished access to the capital required to post collateral.

No Guarantee of Active Trading Market. While Shares are listed on The NASDAQ Stock Market LLC (NASDAQ), there can be no assurance that an active trading market for the Shares will be maintained. Further, secondary markets may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods in times of market stress because market makers and APs may step away from making a market in the Shares and in executing creation and redemption orders, which could cause a material deviation in the Fund's market price from its NAV.

Trading Issues. Trading in Shares on NASDAQ may be halted due to market conditions or for reasons that, in the view of NASDAQ, make trading in Shares inadvisable. In addition, trading in Shares on NASDAQ is subject to trading halts caused by extraordinary market volatility pursuant to NASDAQ's circuit breaker rules. There can be no assurance that the requirements of NASDAQ necessary to maintain the listing of the Fund will continue to be met or will remain unchanged.

Replication Management Risk. An investment in the Fund involves risks similar to those of investing in any fund of equity securities traded on an exchange, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in security prices. However, because the Fund is not actively managed, unless a specific security is removed from the Biotech Index, the Fund generally would not sell a security because the security's issuer was in financial trouble. Therefore, the Fund's performance could be lower than funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers.

Fund Shares Trading, Premium/Discount Risk and Liquidity of Fund Shares. The market prices of the Shares may fluctuate in response to the Fund's NAV, the intraday value of the Fund's holdings and supply and demand for Shares. The Adviser cannot predict whether Shares will trade above, below, or at their most recent NAV. Disruptions to creations and redemptions, the existence of market volatility or potential lack of an active trading market for Shares

(including through a trading halt), as well as other factors, may result in Shares trading at a significant premium or discount to NAV or to the intraday value of the Fund's holdings. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses. The securities held by the Fund may be traded in markets that close at a different time than NASDAQ. Liquidity in those securities may be reduced after the applicable closing times. Accordingly, during the time when NASDAQ is open but after the applicable market closing, fixing or settlement times, bid-ask spreads on NASDAQ and the resulting premium or discount to the Shares' NAV may widen. Additionally, in stressed market conditions, the market for the Fund's Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings.

Non-Diversified Risk. The Fund is classified as a non-diversified fund under the Investment Company Act of 1940, as amended (the 1940 Act). Therefore, the Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in a single issuer. As a result, the gains and losses on a single investment may have a greater impact on the Fund's NAV and may make the Fund more volatile than more diversified funds. The Fund may be particularly vulnerable to this risk because the Biotech Index is comprised of securities of a very limited number of issuers.

Concentration Risk. The Fund's assets may be concentrated in a particular sector or sectors or industry or group of industries to the extent the Biotech Index concentrates in a particular sector or sectors or industry or group of industries. To the extent that the Fund continues to be concentrated in the biotechnology sector, the Fund will be subject to the risk that

economic, political or other conditions that have a negative effect on that sector will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

PERFORMANCE

The bar chart that follows shows how the Fund performed for the calendar years shown. The table below the bar chart shows the Fund's average annual returns (before and after taxes). The bar chart and table provide an indication of the risks of investing in the Fund by showing the Fund's performance from year to year and by showing how the Fund's average annual returns for the one year, five year and since inception periods compared with the Fund's benchmark index and a broad measure of market performance. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily indicative of how the Fund will perform in the future. Updated performance information is available online at www.vaneck.com.

Annual Total Returns (%) Calendar Years

Best Quarter: 21.78 1Q 12

Worst Quarter: -18.19 1Q 16

Average Annual Total Returns for the Periods Ended December 31, 2016

The after-tax returns presented in the table below are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your specific tax situation and may differ from those shown below. After-tax returns are not relevant to investors who hold Shares of the Fund through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

	Past One Year	Past Five Years	Since Inception (12/20/2011)
VanEck Vectors Biotech ETF (return before taxes)	-15.04%	24.35%	25.01%
VanEck Vectors Biotech ETF (return after taxes on distributions)	-15.15%	24.28%	24.93%
VanEck Vectors Biotech ETF (return after taxes on distributions and sale of Fund Shares)	-8.51%	20.12%	20.70%
MVIS US Listed Biotech 25 Index (reflects no deduction for fees, expenses or taxes)	-14.95%	24.55%	25.21%
S&P 500® Index (reflects no deduction for fees, expenses or taxes)	11.96%	14.66%	14.88%

PORTFOLIO MANAGEMENT

Investment Adviser. Van Eck Associates Corporation.

Portfolio Managers. The following individuals are jointly and primarily responsible for the day-to-day management of the Fund's portfolio:

VANECK VECTORS™ ENVIRONMENTAL SERVICES ETF***SUMMARY INFORMATION****INVESTMENT OBJECTIVE**

VanEck Vectors™ Environmental Services ETF (the Fund) seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the NYSE Arca Environmental Services Index (the Environmental Services Index).

FUND FEES AND EXPENSES

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund (Shares).

Shareholder Fees (*fees paid directly from your investment*) None

Annual Fund Operating Expenses

(*expenses that you pay each year as a percentage of the value of your investment*)

Management Fee	0.50%
Other Expenses	0.43%
Total Annual Fund Operating Expenses ^(a)	0.93%
Fee Waivers and Expense Reimbursement ^(a)	-0.38%

Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement ^(a)	0.55%
--	-------

^(a) Van Eck Associates Corporation (the Adviser) has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, trading expenses, taxes and extraordinary expenses) from exceeding 0.55% of the Fund's average daily net assets per year until at least February 1, 2018. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

EXPENSE EXAMPLE

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling Shares of the Fund.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5% annual return and that the Fund's operating expenses remain the same (except that the example incorporates the fee waiver and/or expense reimbursement arrangement for only the first year). Although your actual costs may be higher or lower, based on these

assumptions, your costs would be:

YEAR EXPENSES

1	\$	56
3	\$	258
5	\$	478
10	\$	1,108

PORTFOLIO TURNOVER

The Fund will pay transaction costs, such as commissions, when it purchases and sells securities (or turns over its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, may affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 40% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund normally invests at least 80% of its total assets in common stocks and American depositary receipts (ADRs) of companies involved in the environmental services industry. The Environmental Services Index is comprised of companies that engage in business activities that may benefit from the global increase in demand for consumer waste disposal, removal and

* Prior to May 1, 2016, the Fund's name was Market Vectors Environmental Services ETF.

VANECK VECTORS™ ENVIRONMENTAL SERVICES ETF (continued)

storage of industrial by-products, and the management of associated resources and includes securities of companies that are involved in management, removal and storage of consumer waste and industrial by-products and related environmental services, including waste collection, transfer and disposal services, recycling services, soil remediation, wastewater management and environmental consulting services. Such companies may include small- and medium-capitalization companies. As of December 31, 2016, the Environmental Services Index included 22 securities of companies with a market capitalization range of approximately \$215.28 million to \$31.34 billion and a weighted average market capitalization of \$8.66 billion. These amounts are subject to change. The Fund's 80% investment policy is non-fundamental and may be changed without shareholder approval upon 60 days' prior written notice to shareholders.

The Fund, using a passive or indexing investment approach, attempts to approximate the investment performance of the Environmental Services Index by investing in a portfolio of securities that generally replicates the Environmental Services Index. Unlike many investment companies that try to beat the performance of a benchmark index, the Fund does not try to beat the Environmental Services Index and does not seek temporary defensive positions when markets decline or appear overvalued. Indexing may eliminate the chance that the Fund will substantially outperform the Environmental Services Index but also may reduce some of the risks of active management, such as poor security selection. Indexing seeks to achieve lower costs and better after-tax performance by keeping portfolio turnover low in comparison to actively managed investment companies. The Fund will normally invest at least 80% of its assets in securities that comprise the Environmental Services Index.

The Fund is classified as a non-diversified fund and, therefore, may invest a greater percentage of assets in a particular issuer. The Fund may concentrate its investments in a particular industry or group of industries to the extent that the Environmental Services Index concentrates in an industry or group of industries. As of September 30, 2016, the Environmental Services Index was concentrated in the industrials sector (which includes as a sub-industry the environmental services industry).

PRINCIPAL RISKS OF INVESTING IN THE FUND

Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's Shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Therefore, you should consider carefully the following risks before investing in the Fund, each of which could significantly and adversely affect the value of an investment in the Fund.

Risk of Investing in the Environmental Services Industry. Companies in the environmental services industry are engaged in a variety of activities related to environmental services and consumer and industrial waste management. These companies may be adversely affected by a decrease in demand for waste disposal, removal or storage of industrial by-products, and the management of associated resources. The Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the environmental services industry. Competitive pressures may have a significant effect on the financial condition of such companies. These prices may fluctuate substantially over short periods of time so the Fund's Share price may be more volatile than other types of investments. These companies must comply with various regulations and the terms of their operating permits and licenses. Failure to comply with or to renew permits and licenses or changes in government regulations can adversely impact their operations. Waste management companies are also affected by demand cycles, world events, increased

outsourcing and economic conditions. In addition, these companies are subject to liability for environmental damage claims.

Certain companies in which the Fund may invest are non-U.S. issuers whose securities are listed on U.S. exchanges. These securities involve risks beyond those associated with investments in U.S. securities, including greater market volatility, higher transactional costs, the possibility that the liquidity of such securities could be impaired because of future political and/or economic developments, taxation by foreign governments, political instability and the possibility that foreign governmental restrictions may be adopted which might adversely affect such securities.

Equity Securities Risk. The value of the equity securities held by the Fund may fall due to general market and economic conditions, perceptions regarding the markets in which the issuers of securities held by the Fund participate, or factors relating to specific issuers in which the Fund invests. Equity securities are subordinated to preferred securities and debt in a company's capital structure with respect to priority in right to a share of corporate income, and therefore will be subject to greater dividend risk than preferred securities or debt instruments. In addition, while broad market measures of equity securities have historically generated higher average returns than fixed income securities, equity securities have generally also experienced significantly more volatility in those returns, although under certain market conditions fixed income securities may have comparable or greater price volatility.

Risk of Investing in the Industrials Sector. To the extent that the Fund continues to be concentrated in the industrials sector, the Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the industrials sector. Companies in the industrials sector may be adversely affected by changes in government regulation, world events and economic conditions. In addition, companies in the industrials sector may be adversely affected by environmental damages, product liability claims and exchange rates.

Risk of Investing in ADRs. ADRs are issued by U.S. banks or trust companies that entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares. The Fund's investments in ADRs may be less liquid than the underlying shares in their primary trading market and, if not included in the Environmental Services Index, may negatively affect the Fund's ability to replicate the performance of the Environmental Services Index. In addition, investments in ADRs that are not included in the Environmental Services Index may increase tracking error.

Risk of Investing in Small- and Medium-Capitalization Companies. Small- and medium-capitalization companies may be more volatile and more likely than large-capitalization companies to have narrower product lines, fewer financial resources, less management depth and experience and less competitive strength. In addition, these companies often have greater price volatility, lower trading volume and less liquidity than larger more established companies. Returns on investments in securities of small- and medium-capitalization companies could trail the returns on investments in securities of large-capitalization companies.

Issuer-Specific Changes Risk. The value of individual securities or particular types of securities in the Fund's portfolio can be more volatile than the market as a whole and can perform differently from the value of the market as a whole, especially if the Fund's portfolio is concentrated in a country, group of countries, region, market, industry, group of industries, sector or asset class. The value of securities of smaller issuers can be more volatile than that of larger issuers.

Market Risk. The prices of the securities in the Fund are subject to the risks associated with investing in the securities market, including general economic conditions and sudden and unpredictable drops in value. An investment in the Fund may lose money.

Operational Risk. The Fund is exposed to operational risk arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or system failures. The Fund seeks to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate for those risks that they are intended to address.

Index Tracking Risk. The Fund's return may not match the return of the Environmental Services Index for a number of reasons. For example, the Fund incurs a number of operating expenses not applicable to the Environmental Services Index and incurs costs associated with buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Environmental Services Index, which are not factored into the return of the Environmental Services Index. Transaction costs, including brokerage costs, will decrease the Fund's net asset value (NAV) to the extent not offset by the transaction fee payable by an Authorized Participant (AP). Market disruptions and regulatory restrictions could have an adverse effect on the Fund's ability to adjust its exposure to the required levels in order to track the Environmental Services Index. Errors in the Environmental Services Index data, the Environmental Services Index computations and/or the construction of the Environmental Services Index in accordance with its methodology may occur from time to time and may not be identified and corrected by the Environmental Services Index provider for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. In addition, the Fund may not be able to invest in certain securities included in the Environmental

Services Index, or invest in them in the exact proportions in which they are represented in the Environmental Services Index, due to legal restrictions or limitations imposed by the governments of certain countries, a lack of liquidity on stock exchanges in which the securities trade, potential adverse tax consequences or other regulatory reasons. To the extent the Fund calculates its NAV based on fair value prices and the value of the Environmental Services Index is based on securities' closing prices (*i.e.*, the value of the Environmental Services Index is not based on fair value prices), the Fund's ability to track the Environmental Services Index may be adversely affected. For tax efficiency purposes, the Fund may sell certain securities, and such sale may cause the Fund to realize a loss and deviate from the performance of the Environmental Services Index. In light of the factors discussed above, the Fund's return may deviate significantly from the return of the Environmental Services Index.

Authorized Participant Concentration Risk. The Fund may have a limited number of financial institutions that act as APs, none of which are obligated to engage in creation or redemption transactions. To the extent that those APs exit the business, or are unable to or choose not to process creation and/or redemption orders, and no other AP is able to step forward to create and redeem, there may be a significantly diminished trading market for Shares or Shares may trade like closed-end funds at a discount (or premium) to NAV and possibly face trading halts and/or de-listing. The AP concentration risk may be heightened in scenarios where APs have limited or diminished access to the capital required to post collateral.

VANECK VECTORS™ ENVIRONMENTAL SERVICES ETF (continued)

No Guarantee of Active Trading Market. While Shares are listed on NYSE Arca, Inc. (NYSE Arca), there can be no assurance that an active trading market for the Shares will be maintained. Further, secondary markets may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods in times of market stress because market makers and APs may step away from making a market in the Shares and in executing creation and redemption orders, which could cause a material deviation in the Fund's market price from its NAV.

Trading Issues. Trading in Shares on NYSE Arca may be halted due to market conditions or for reasons that, in the view of NYSE Arca, make trading in Shares inadvisable. In addition, trading in Shares on NYSE Arca is subject to trading halts caused by extraordinary market volatility pursuant to NYSE Arca's circuit breaker rules. There can be no assurance that the requirements of NYSE Arca necessary to maintain the listing of the Fund will continue to be met or will remain unchanged.

Replication Management Risk. An investment in the Fund involves risks similar to those of investing in any fund of equity securities traded on an exchange, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in security prices. However, because the Fund is not actively managed, unless a specific security is removed from the Environmental Services Index, the Fund generally would not sell a security because the security's issuer was in financial trouble. Therefore, the Fund's performance could be lower than funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers.

Fund Shares Trading, Premium/Discount Risk and Liquidity of Fund Shares. The market prices of the Shares may fluctuate in response to the Fund's NAV, the intraday value of the Fund's holdings and supply and demand for Shares. The Adviser cannot predict whether Shares will trade above, below, or at their most recent NAV. Disruptions to creations and redemptions, the existence of market volatility or potential lack of an active trading market for Shares (including through a trading halt), as well as other factors, may result in Shares trading at a significant premium or discount to NAV or to the intraday value of the Fund's holdings. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses. The securities held by the Fund may be traded in markets that close at a different time than NYSE Arca. Liquidity in those securities may be reduced after the applicable closing times. Accordingly, during the time when NYSE Arca is open but after the applicable market closing, fixing or settlement times, bid-ask spreads on NYSE Arca and the resulting premium or discount to the Shares' NAV may widen. Additionally, in stressed market conditions, the market for the Fund's Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings.

Non-Diversified Risk. The Fund is classified as a non-diversified fund under the Investment Company Act of 1940, as amended (the 1940 Act). Therefore, the Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in a single issuer. As a result, the gains and losses on a single investment may have a greater impact on the Fund's NAV and may make the Fund more volatile than more diversified funds. The Fund may be particularly vulnerable to this risk because the Environmental Services Index is comprised of securities of a very limited number of issuers.

Concentration Risk. The Fund's assets may be concentrated in a particular sector or sectors or industry or group of industries to the extent the Environmental Services Index concentrates in a particular sector or sectors or industry or group of industries. To the extent that the Fund continues to be concentrated in the industrials sector (which includes as a sub-industry the environmental services industry), the Fund will be subject to the risk that economic, political or

other conditions that have a negative effect on that sector or sub-industry will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

PERFORMANCE

The bar chart that follows shows how the Fund performed for the calendar years shown. The table below the bar chart shows the Fund's average annual returns (before and after taxes). The bar chart and table provide an indication of the risks of investing in the Fund by comparing the Fund's performance from year to year and by showing how the Fund's average annual returns for the one year, five year and ten year periods compared with the Fund's benchmark index and a broad measure of market performance. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after income taxes) is not necessarily indicative of how the Fund will perform in the future. Updated performance information is available online at www.vaneck.com.

Annual Total Returns (%) Calendar Years**Best Quarter:** 25.65 2Q 09**Worst Quarter:** -21.21 4Q 08**Average Annual Total Returns for the Periods Ended December 31, 2016**

The after-tax returns presented in the table below are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your specific tax situation and may differ from those shown below. After-tax returns are not relevant to investors who hold Shares of the Fund through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

	Past One Year	Past Five Years	Past Ten Years
VanEck Vectors Environmental Services ETF (return before taxes)	30.00%	11.45%	6.60%
VanEck Vectors Environmental Services ETF (return after taxes on distributions)	29.61%	11.11%	6.35%
VanEck Vectors Environmental Services ETF (return after taxes on distributions and sale of Fund Shares)	16.98%	9.06%	5.29%
NYSE Arca Environmental Services Index (reflects no deduction for fees, expenses or taxes)	30.70%	12.00%	7.14%

PURCHASE AND SALE OF FUND SHARES

For important information about the purchase and sale of Fund Shares, tax information and payments to broker-dealers and other financial intermediaries, please turn to Summary Information About Purchases and Sales of Fund Shares, Taxes and Payments to Broker-Dealers and Other Financial Intermediaries on page 41 of this Prospectus.

VANECK VECTORS™ GAMING ETF***SUMMARY INFORMATION****INVESTMENT OBJECTIVE**

VanEck Vectors™ Gaming ETF (the Fund) seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the MVIS™ Global Gaming Index (the Gaming Index).

FUND FEES AND EXPENSES

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund (Shares).

Shareholder Fees (*fees paid directly from your investment*) None

Annual Fund Operating Expenses

(*expenses that you pay each year as a percentage of the value of your investment*)

Management Fee	0.50%
Other Expenses	0.43%

Total Annual Fund Operating Expenses ^(a)	0.93%
Fee Waivers and Expense Reimbursement ^(a)	-0.26%

Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement ^(a)	0.67%
--	-------

^(a) Van Eck Associates Corporation (the Adviser) has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, trading expenses, taxes and extraordinary expenses) from exceeding 0.65% of the Fund's average daily net assets per year until at least February 1, 2018. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

EXPENSE EXAMPLE

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling Shares of the Fund.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5% annual return and that the Fund's operating expenses remain the same (except that the example incorporates the fee waiver and/or expense reimbursement arrangement for only the first year). Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

YEAR EXPENSES

1	\$	68
3	\$	270
5	\$	489
10	\$	1,119

PORTFOLIO TURNOVER

The Fund will pay transaction costs, such as commissions, when it purchases and sells securities (or turns over its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, may affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 29% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund normally invests at least 80% of its total assets in securities that comprise the Fund's benchmark index. The Gaming Index includes common stocks and depositary receipts of companies that generate at least 50% of their revenues from (or, in certain circumstances, have at least 50% of their assets related to) gaming. This includes casinos and casino hotels, sports betting (including internet gambling and racetracks) and lottery services as well as gaming services, gaming technology and

* Prior to May 1, 2016, the Fund's name was Market Vectors Gaming ETF.

gaming equipment. Such companies may include small- and medium-capitalization companies and foreign companies that are listed on a U.S. or foreign exchanges. As of December 31, 2016, the Gaming Index included 39 securities of companies with a market capitalization range of approximately \$889.43 million to \$42.45 billion and a weighted average market capitalization of \$303.55 million. These amounts are subject to change. The Fund's 80% investment policy is non-fundamental and may be changed without shareholder approval upon 60 days' prior written notice to shareholders.

The Fund, using a passive or indexing investment approach, attempts to approximate the investment performance of the Gaming Index by investing in a portfolio of securities that generally replicates the Gaming Index. Unlike many investment companies that try to beat the performance of a benchmark index, the Fund does not try to beat the Gaming Index and does not seek temporary defensive positions when markets decline or appear overvalued. Indexing may eliminate the chance that the Fund will substantially outperform the Gaming Index but also may reduce some of the risks of active management, such as poor security selection. Indexing seeks to achieve lower costs and better after-tax performance by keeping portfolio turnover low in comparison to actively managed investment companies.

The Fund is classified as a non-diversified fund and, therefore, may invest a greater percentage of its assets in a particular issuer. The Fund may concentrate its investments in a particular industry or group of industries to the extent that the Gaming Index concentrates in an industry or group of industries. As of September 30, 2016, the Gaming Index was concentrated in the consumer discretionary sector (which includes as a sub-industry the gaming industry).

PRINCIPAL RISKS OF INVESTING IN THE FUND

Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's Shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Therefore, you should consider carefully the following risks before investing in the Fund, each of which could significantly and adversely affect the value of an investment in the Fund.

Risk of Investing in the Gaming Industry. Companies in the gaming industry include those engaged in casino operations, race track operations, sports and horse race betting operations, online gaming operations and/or the provision of related equipment and technologies. The Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the gaming industry. Companies in the gaming industry are highly regulated, and state and Federal legislative or regulatory changes and licensing issues (as well as the laws of other countries) can significantly impact their ability to operate in certain jurisdictions, the activities in which such companies are allowed to engage and the profitability of companies in the industry. Companies in the gaming industry often face similar obstacles, issues and regulatory burdens. As a result, the securities of gaming companies owned by the Fund may react similarly to, and move in unison with, one another. The gaming industry may also be negatively affected by changes in economic conditions, consumer tastes and discretionary income levels, intense competition and technological developments. In addition, the gaming industry is characterized by the use of various forms of intellectual property, which are dependent upon patented technologies, trademarked brands and proprietary information. Companies operating in the gaming industry are subject to the risk of significant litigation regarding intellectual property rights, which may adversely affect and financially harm companies in which the Fund may invest. Furthermore, certain jurisdictions may impose additional restrictions on securities issued by gaming companies organized or operated in such jurisdictions that may be held by the Fund.

Equity Securities Risk. The value of the equity securities held by the Fund may fall due to general market and economic conditions, perceptions regarding the markets in which the issuers of securities held by the Fund participate, or factors relating to specific issuers in which the Fund invests. Equity securities are subordinated to preferred securities and debt in a company's capital structure with respect to priority in right to a share of corporate income, and therefore will be subject to greater dividend risk than preferred securities or debt instruments. In addition, while broad market measures of equity securities have historically generated higher average returns than fixed income securities, equity securities have generally also experienced significantly more volatility in those returns, although under certain market conditions fixed income securities may have comparable or greater price volatility.

Risk of Investing in the Consumer Discretionary Sector. To the extent that the Fund continues to be concentrated in the consumer discretionary sector, the Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the consumer discretionary sector. Companies engaged in the consumer discretionary sector are subject to fluctuations in supply and demand. These companies may also be adversely affected by changes in consumer spending as a result of world events, political and economic conditions, commodity price volatility, changes in exchange rates, imposition of import controls, increased competition, depletion of resources and labor relations.

Risk of Investing in Foreign Securities. The Fund invests in securities of issuers located in countries whose economies are heavily dependent upon trading with key partners. Any reduction in this trading may have an adverse impact on the Fund's

VANECK VECTORS™ GAMING ETF (continued)

investments. Investments in the securities of foreign issuers involve risks beyond those associated with investments in U.S. securities. These additional risks include greater market volatility, the availability of less reliable financial information, higher transactional and custody costs, taxation by foreign governments, decreased market liquidity and political instability. Because certain foreign securities markets may be limited in size, the activity of large traders may have an undue influence on the prices of securities that trade in such markets.

Foreign Currency Risk. Because the Fund's assets may be invested in securities denominated in foreign currencies, the income received by the Fund from these investments will generally be in foreign currencies. The Fund's exposure to foreign currencies and changes in the value of foreign currencies versus the U.S. dollar may result in reduced returns for the Fund. Moreover, the Fund may incur costs in connection with conversions between U.S. dollars and foreign currencies. The value of certain foreign countries' currencies may be subject to a high degree of fluctuation. This fluctuation may be due to changes in interest rates, investors' expectations concerning inflation and interest rates, the country's debt levels and trade deficit, the effects of monetary policies issued by the United States, foreign governments, central banks or supranational entities, the imposition of currency controls or other national or global political or economic developments. The economies of certain emerging market countries can be significantly affected by currency devaluations. Certain emerging market countries may also have managed currencies which are maintained at artificial levels relative to the U.S. dollar rather than at levels determined by the market. This type of system could lead to sudden and large adjustments in the currency, which in turn, can have a negative effect on the Fund and its investments.

Special Risk Considerations of Investing in Chinese Issuers. Investing in securities of Chinese companies involves certain risks and considerations not typically associated with investing in securities of U.S. issuers, including, among others, (i) more frequent (and potentially widespread) trading suspensions and government interventions with respect to Chinese issuers, (ii) currency revaluations and other currency exchange rate fluctuations or blockage, (iii) the nature and extent of intervention by the Chinese government in the Chinese securities markets, whether such intervention will continue and the impact of such intervention or its discontinuation, (iv) the risk of nationalization or expropriation of assets, (v) the risk that the Chinese government may decide not to continue to support economic reform programs, (vi) limitations on the use of brokers, (vii) higher rates of inflation, (viii) greater political, economic and social uncertainty, (ix) market volatility caused by any potential regional or territorial conflicts or natural disasters and (x) the risk of increased trade tariffs, embargoes and other trade limitations. In addition, the economy of China differs, often unfavorably, from the U.S. economy in such respects as structure, general development, government involvement, wealth distribution, rate of inflation, growth rate, interest rates, allocation of resources and capital reinvestment, among others. The Chinese central government has historically exercised substantial control over virtually every sector of the Chinese economy through administrative regulation and/or state ownership and actions of the Chinese central and local government authorities continue to have a substantial effect on economic conditions in China. In addition, previously the Chinese government has from time to time taken actions that influence the prices at which certain goods may be sold, encourage companies to invest or concentrate in particular industries, induce mergers between companies in certain industries and induce private companies to publicly offer their securities to increase or continue the rate of economic growth, control the rate of inflation or otherwise regulate economic expansion. The Chinese government may do so in the future as well, potentially having a significant adverse effect on economic conditions in China.

Risk of Investing in Depositary Receipts. The Fund may invest in depositary receipts which involve similar risks to those associated with investments in foreign securities. Depositary receipts are receipts listed on U.S. or foreign exchanges issued by banks or trust companies that entitle the holder to all dividends and capital gains that are paid out

on the underlying foreign shares. Investments in depositary receipts may be less liquid than the underlying shares in their primary trading market and, if not included in the Gaming Index, may negatively affect the Fund's ability to replicate the performance of the Gaming Index.

Risk of Investing in Small- and Medium-Capitalization Companies. Small- and medium-capitalization companies may be more volatile and more likely than large-capitalization companies to have narrower product lines, fewer financial resources, less management depth and experience and less competitive strength. In addition, these companies often have greater price volatility, lower trading volume and less liquidity than larger more established companies. Returns on investments in securities of small- and medium-capitalization companies could trail the returns on investments in securities of large-capitalization companies.

Risk of Cash Transactions. Unlike other exchange-traded funds (ETFs), the Fund expects to effect its creations and redemptions partially for cash, rather than in-kind securities. Therefore, it may be required to sell portfolio securities and subsequently recognize gains on such sales that the Fund might not have recognized if it were to distribute portfolio securities in kind. As such, investments in Shares may be less tax-efficient than an investment in a conventional ETF.

Market Risk. The prices of the securities in the Fund are subject to the risks associated with investing in the securities market, including general economic conditions and sudden and unpredictable drops in value. An investment in the Fund may lose money.

Operational Risk. The Fund is exposed to operational risk arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or system failures. The Fund seeks to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate for those risks that they are intended to address.

Index Tracking Risk. The Fund's return may not match the return of the Gaming Index for a number of reasons. For example, the Fund incurs a number of operating expenses not applicable to the Gaming Index and incurs costs associated with buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Gaming Index, which are not factored into the return of the Gaming Index. Transaction costs, including brokerage costs, will decrease the Fund's net asset value (NAV) to the extent not offset by the transaction fee payable by an Authorized Participant ("AP"). Market disruptions and regulatory restrictions could have an adverse effect on the Fund's ability to adjust its exposure to the required levels in order to track the Gaming Index. Errors in the Gaming Index data, the Gaming Index computations and/or the construction of the Gaming Index in accordance with its methodology may occur from time to time and may not be identified and corrected by the Gaming Index provider for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. In addition, the Fund may not be able to invest in certain securities included in the Gaming Index, or invest in them in the exact proportions in which they are represented in the Gaming Index, due to legal restrictions or limitations imposed by the governments of certain countries, a lack of liquidity on stock exchanges in which such securities trade, potential adverse tax consequences or other regulatory reasons. The Fund is expected to value certain of its investments based on fair value prices. To the extent the Fund calculates its NAV based on fair value prices and the value of the Gaming Index is based on securities' closing prices on local foreign markets (*i.e.*, the value of the Gaming Index is not based on fair value prices), the Fund's ability to track the Gaming Index may be adversely affected. For tax efficiency purposes, the Fund may sell certain securities, and such sale may cause the Fund to realize a loss and deviate from the performance of the Gaming Index. In light of the factors discussed above, the Fund's return may deviate significantly from the return of the Gaming Index.

Authorized Participant Concentration Risk. The Fund may have a limited number of financial institutions that act as APs, none of which are obligated to engage in creation or redemption transactions. To the extent that those APs exit the business, or are unable to or choose not to process creation and/or redemption orders, and no other AP is able to step forward to create and redeem, there may be a significantly diminished trading market for Shares or Shares may trade like closed-end funds at a discount (or premium) to NAV and possibly face trading halts and/or de-listing. The AP concentration risk may be heightened in scenarios where APs have limited or diminished access to the capital required to post collateral.

No Guarantee of Active Trading Market. While Shares are listed on NYSE Arca, Inc. (NYSE Arca), there can be no assurance that an active trading market for the Shares will be maintained. Further, secondary markets may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods in times of market stress because market makers and APs may step away from making a market in the Shares and in executing creation and redemption orders, which could cause a material deviation in the Fund's market price from its NAV.

Trading Issues. Trading in Shares on NYSE Arca may be halted due to market conditions or for reasons that, in the view of NYSE Arca, make trading in Shares inadvisable. In addition, trading in Shares on NYSE Arca is subject to

trading halts caused by extraordinary market volatility pursuant to NYSE Arca's circuit breaker rules. There can be no assurance that the requirements of NYSE Arca necessary to maintain the listing of the Fund will continue to be met or will remain unchanged.

Replication Management Risk. An investment in the Fund involves risks similar to those of investing in any fund of equity securities traded on an exchange, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in security prices. However, because the Fund is not actively managed, unless a specific security is removed from the Gaming Index, the Fund generally would not sell a security because the security's issuer was in financial trouble. Therefore, the Fund's performance could be lower than funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers.

Fund Shares Trading, Premium/Discount Risk and Liquidity of Fund Shares. The market prices of the Shares may fluctuate in response to the Fund's NAV, the intraday value of the Fund's holdings and supply and demand for Shares. The Adviser cannot predict whether Shares will trade above, below, or at their most recent NAV. Disruptions to creations and redemptions, the existence of market volatility or potential lack of an active trading market for Shares (including through a

VANECK VECTORS™ GAMING ETF (continued)

trading halt), as well as other factors, may result in Shares trading at a significant premium or discount to NAV or to the intraday value of the Fund's holdings. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses. The securities held by the Fund may be traded in markets that close at a different time than NYSE Arca. Liquidity in those securities may be reduced after the applicable closing times. Accordingly, during the time when NYSE Arca is open but after the applicable market closing, fixing or settlement times, bid-ask spreads on NYSE Arca and the resulting premium or discount to the Shares' NAV may widen. Additionally, in stressed market conditions, the market for the Fund's Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings.

Non-Diversified Risk. The Fund is classified as a non-diversified fund under the Investment Company Act of 1940, as amended (the "1940 Act"). Therefore, the Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in a single issuer. As a result, the gains and losses on a single investment may have a greater impact on the Fund's NAV and may make the Fund more volatile than more diversified funds.

Concentration Risk. The Fund's assets may be concentrated in a particular sector or sectors or industry or group of industries to the extent the Gaming Index concentrates in a particular sector or sectors or industry or group of industries. To the extent that the Fund continues to be concentrated in the consumer discretionary sector (which includes as a sub-industry the gaming industry), the Fund will be subject to the risk that economic, political or other conditions that have a negative effect on that sector or sub-industry will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

PERFORMANCE

The bar chart that follows shows how the Fund performed for the calendar years shown. The table below the bar chart shows the Fund's average annual returns (before and after taxes). The bar chart and table provide an indication of the risks of investing in the Fund by comparing the Fund's performance from year to year and by showing how the Fund's average annual returns for the one year, five year and since inception periods compared with the Fund's benchmark index and a broad measure of market performance. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after income taxes) is not necessarily indicative of how the Fund will perform in the future. Updated performance information is available online at www.vaneck.com.

VANECK VECTORS™ GENERIC DRUGS ETF***SUMMARY INFORMATION****INVESTMENT OBJECTIVE**

VanEck Vectors™ Generic Drugs ETF (the Fund) seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the Indxx Global Generics & New Pharma Index (the Generic Drugs Index).

FUND FEES AND EXPENSES

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund (Shares).

Shareholder Fees (*fees paid directly from your investment*) None

Annual Fund Operating Expenses

(*expenses that you pay each year as a percentage of the value of your investment*)

Management Fee	0.50%
Other Expenses	5.20%

Total Annual Fund Operating Expenses ^(a)	5.70%
Fee Waivers and Expense Reimbursement ^(a)	-5.15%

Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement ^(b)	0.55%
--	-------

^(a) Van Eck Associates Corporation (the Adviser) has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, trading expenses, taxes and extraordinary expenses) from exceeding 0.55% of the Fund's average daily net assets per year until at least February 1, 2018. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

EXPENSE EXAMPLE

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling Shares of the Fund.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5% annual return and that the Fund's operating expenses remain the same (except that the example incorporates the fee waiver and expense reimbursement arrangement for only the first year). Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

YEAR EXPENSES

1	\$	56
3	\$	1,239
5	\$	2,405
10	\$	5,249

PORTFOLIO TURNOVER

The Fund will pay transaction costs, such as commissions, when it purchases and sells securities (or turns over its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, may affect the Fund's performance. During the period January 12, 2016 (the Fund's commencement of operations), through September 30, 2016, the Fund's portfolio turnover rate was 47% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund normally invests at least 80% of its total assets in securities that comprise the Fund's benchmark index. The Generic Drugs Index includes exchange-listed companies, on a global basis, that derive a significant proportion (as determined by Indxx, LLC (Indxx)) of their revenues (or that have the potential to derive a significant proportion of their revenues) from the generic drug industry, or that have a primary business focus on the generic drug industry. A company is

* Prior to May 1, 2016, the Fund's name was Market Vectors Generic Drugs ETF.

deemed to derive a significant proportion of its revenue from the generic drug industry if (i), according to a public filing, it generates a majority of its revenue from the sale of generic drugs, (ii), in the absence of a revenue segment breakdown, it has stated its primary business to be the development and production of generic drugs or (iii) has a drug pipeline composed of generic drug filings. The universe of companies in the generic drug industry is determined based on proprietary research and analysis conducted by Indxx. Indxx uses a variety of publicly available sources for such analysis, including financial statements and other reports published by companies to determine whether the company is actively engaged in the generic drug industry. Products of these companies are pharmaceuticals that are identical, or bioequivalent in the dosage form, safety, strength, quality and intended usage to brand name pharmaceuticals. Such companies may include small- and medium-capitalization companies and U.S., foreign and emerging market issuers. American depositary receipts (ADRs) and global depositary receipts (GDRs) are eligible for inclusion in the Generic Drugs Index. As of December 31, 2016, the Generic Drugs Index included 78 securities of companies with a minimum market capitalization of \$660 million and a weighted average market capitalization of \$10.31 billion. These amounts are subject to change. Effective after market close on March 17, 2017, the Generic Drugs Index will remove from its existing portfolio any companies that are not part of the 40 largest companies (by market capitalization) eligible for inclusion in the Generic Drugs Index. The Fund's 80% investment policy is non-fundamental and may be changed without shareholder approval upon 60 days' prior written notice to shareholders.

The Fund, using a passive or indexing investment approach, attempts before fees and expenses to approximate the investment performance of the Generic Drugs Index by investing in a portfolio of securities that generally replicates the Generic Drugs Index. Unlike many investment companies that try to beat the performance of a benchmark index, the Fund does not try to beat the Generic Drugs Index and does not seek temporary defensive positions when markets decline or appear overvalued. Indexing may eliminate the chance that the Fund will substantially outperform the Generic Drugs Index but also may reduce some of the risks of active management, such as poor security selection. Indexing seeks to achieve lower costs and better after-tax performance by keeping portfolio turnover low in comparison to actively managed investment companies.

The Fund is classified as a non-diversified fund and, therefore, may invest a greater percentage of its assets in a particular issuer. The Fund may concentrate its investments in a particular industry or group of industries to the extent that the Generic Drugs Index concentrates in an industry or group of industries. As of September 30, 2016, the Generic Drugs Index was concentrated in the pharmaceutical sector, and each of the biotechnology and life sciences tools and services sectors represented a significant portion of the Generic Drugs Index.

PRINCIPAL RISKS OF INVESTING IN THE FUND

Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's Shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Therefore, you should consider carefully the following risks before investing in the Fund, each of which could significantly and adversely affect the value of an investment in the Fund.

Risk of Investing in the Pharmaceutical Sector. The success of companies in the pharmaceutical sector that produce generic drugs is highly dependent on the development, procurement and marketing of these drugs. Many companies that produce generic drugs compete with large, well-financed pharmaceutical companies with more experienced development and marketing groups. Moreover, brand-name companies continually seek new ways to delay the introduction of generic products and/or decrease the impact of generic competition, such as filing new patents on drugs whose original patent production is about to expire, developing patented controlled-release products, changing

product claims and labeling, or developing and marketing as over-the-counter products those branded products that are about to face generic competition. The research and other costs associated with developing or procuring generic drugs and the related intellectual property rights can be significant, and the results of such research and expenditures are unpredictable. The Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the pharmaceutical sector. In addition, pharmaceutical companies that produce generic drugs may be susceptible to product obsolescence and face intense competition from less costly generic products. There is also the risk that pharmaceutical companies will be unable to obtain sufficient supplies or raw materials needed to create generic drugs. Such a shortage may also cause difficulties or delays in producing generic drugs, which would materially adversely affect a pharmaceutical company. Additionally, prices for existing generic drugs generally decline over time, although this may vary. Price deflation on existing generic drugs may have an adverse effect on profits for all companies that produce generic drugs. Companies in the pharmaceutical sector that produce generic drugs may also be subject to expenses and losses from extensive litigation based on intellectual property, product liability and similar claims. Companies in the pharmaceutical sector may be adversely affected by government regulation, restrictions on reimbursement rates, industry innovation, changes in technologies and other market developments. Companies in the pharmaceutical sector may be adversely affected by government regulation, corporate actions, such as mergers and

VANECK VECTORS™ GENERIC DRUGS ETF (continued)

acquisitions, restrictions on reimbursement rates, industry innovation, changes in technologies and other market developments. The ability of many pharmaceutical companies to commercialize current and any future products depends in part on the extent to which reimbursement for the cost of such products and related treatments are available from third party payors, such as Medicare, Medicaid and other government sponsored programs, private health insurance plans and health maintenance organizations.

Risk of Investing in the Biotechnology Sector. The success of biotechnology companies is highly dependent on the development, procurement and/or marketing of drugs. To the extent that the biotechnology sector continues to represent a significant portion of the Fund, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the biotechnology sector. Companies operating in the biotechnology sector are subject to similar risks of companies operating in the pharmaceutical sector, as discussed in more detail above. Additionally, a biotechnology company's valuation can often be based largely on the potential or actual performance of a limited number of products. A biotechnology company's valuation can also be greatly affected if one of its products proves unsafe, ineffective or unprofitable.

Equity Securities Risk. The value of the equity securities held by the Fund may fall due to general market and economic conditions, perceptions regarding the markets in which the issuers of securities held by the Fund participate, or factors relating to specific issuers in which the Fund invests. Equity securities are subordinated to preferred securities and debt in a company's capital structure with respect to priority in right to a share of corporate income, and therefore will be subject to greater dividend risk than preferred securities or debt instruments. In addition, while broad market measures of equity securities have historically generated higher average returns than fixed income securities, equity securities have generally also experienced significantly more volatility in those returns, although under certain market conditions fixed income securities may have comparable or greater price volatility.

Special Risk Considerations of Investing in Indian Issuers. Investment in securities of Indian issuers involves risks not typically associated with investments in securities of issuers in more developed countries that may negatively affect the value of your investment in the Fund. Such heightened risks include, among others, greater government control over the economy, political and legal uncertainty, currency fluctuations or blockage of foreign currency exchanges and the risk of nationalization or expropriation of assets. Issuers in India are subject to less stringent requirements regarding accounting, auditing and financial reporting than are issuers in more developed markets, and therefore, all material information may not be available or reliable. In addition, religious and border disputes persist in India. India has experienced civil unrest and hostilities with neighboring countries, including Pakistan, and the Indian government has confronted separatist movements in several Indian states. India has also experienced acts of terrorism that have targeted foreigners, which have had a negative impact on tourism, an important sector of the Indian economy. The Indian securities markets are smaller than securities markets in more developed economies and are subject to greater price volatility.

Indian stock exchanges have also experienced problems such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers that have affected the market price and liquidity of the securities of Indian companies. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, from time to time, disputes have occurred between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment.

Special Risk Considerations of Investing in Asian Issuers. The Fund may invest in securities issued by Asian issuers and, accordingly, may be subject to the risk of investing in such issuers. Investment in securities of issuers in Asia involves risks and special considerations not typically associated with investment in the U.S. securities markets. Certain Asian economies have experienced over-extension of credit, currency devaluations and restrictions, high unemployment, high inflation, decreased exports and economic recessions. Economic events in any one Asian country can have a significant effect on the entire Asian region as well as on major trading partners outside Asia, and any adverse effect on some or all of the Asian countries and regions in which the Fund invests. The securities markets in some Asian economies are relatively underdeveloped and may subject the Fund to higher action costs or greater uncertainty than investments in more developed securities markets. Such risks may adversely affect the value of the Fund's investments.

Risk of Investing in Depositary Receipts. The Fund may invest in depositary receipts which involve similar risks to those associated with investments in foreign securities. Depositary receipts are receipts listed on U.S. or foreign exchanges issued by banks or trust companies that entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares. Investments in depositary receipts may be less liquid than the underlying shares in their primary trading market and, if not included in the Generic Drugs Index, may negatively affect the Fund's ability to replicate the performance of the Generic Drugs Index.

Risk of Investing in Foreign Securities. The Fund invests in securities of issuers located in countries whose economies are heavily dependent upon trading with key partners. Any reduction in this trading may have an adverse impact on the Fund's investments. Investments in the securities of foreign issuers involve risks beyond those associated with investments in U.S. securities. These additional risks include greater market volatility, the availability of less reliable financial information, higher transactional and custody costs, taxation by foreign governments, decreased market liquidity and political instability. Because certain foreign securities markets may be limited in size, the activity of large traders may have an undue influence on the prices of securities that trade in such markets. The risks of investing in emerging market countries are greater than risks associated with investments in foreign developed countries.

Risk of Investing in Emerging Market Issuers. Investments in securities of emerging market issuers are exposed to a number of risks that may make these investments volatile in price or difficult to trade. Emerging markets are more likely than developed markets to experience problems with the clearing and settling of trades, as well as the holding of securities by local banks, agents and depositories. Political risks may include unstable governments, nationalization, restrictions on foreign ownership, laws that prevent investors from getting their money out of a country and legal systems that do not protect property rights as well as the laws of the United States. Market risks may include economies that concentrate in only a few industries, securities issues that are held by only a few investors, liquidity issues, limited trading capacity in local exchanges and the possibility that markets or issues may be manipulated by foreign nationals who have inside information.

Foreign Currency Risk. Because the Fund's assets may be invested in securities denominated in foreign currencies, the income received by the Fund from these investments will generally be in foreign currencies. The Fund's exposure to foreign currencies and changes in the value of foreign currencies versus the U.S. dollar may result in reduced returns for the Fund. Moreover, the Fund may incur costs in connection with conversions between U.S. dollars and foreign currencies. The value of certain foreign countries' currencies may be subject to a high degree of fluctuation. This fluctuation may be due to changes in interest rates, investors' expectations concerning inflation and interest rates, the country's debt levels and trade deficit, the effects of monetary policies issued by the United States, foreign governments, central banks or supranational entities, the imposition of currency controls or other national or global political or economic developments. The economies of certain emerging market countries can be significantly affected by currency devaluations.

Risk of Investing in Small- and Medium-Capitalization Companies. Small- and medium-capitalization companies may be more volatile and more likely than large-capitalization companies to have narrower product lines, fewer financial resources, less management depth and experience and less competitive strength. In addition, these companies often have greater price volatility, lower trading volume and less liquidity than larger more established companies. Returns on investments in securities of small-capitalization and medium-capitalization companies could trail the returns on investments in securities of large-capitalization companies.

Market Risk. The prices of the securities in the Fund are subject to the risks associated with investing in the securities market, including general economic conditions and sudden and unpredictable drops in value. An investment in the Fund may lose money.

Operational Risk. The Fund is exposed to operational risk arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or system failures. The Fund seeks to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate for those risks that they are intended to address.

Index Tracking Risk. The Fund's return may not match the return of the Generic Drugs Index for a number of reasons. For example, the Fund incurs a number of operating expenses not applicable to the Generic Drugs Index and incurs costs associated with buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Generic Drugs Index, which are not factored into the return of the Generic Drugs Index. Transaction costs, including brokerage costs, will decrease the Fund's net asset value (NAV) to the extent not offset by the transaction fee payable by an Authorized Participant (AP). Market disruptions and regulatory restrictions could have an adverse effect on the Fund's ability to adjust its exposure to the required levels in order to track the Generic Drugs Index. Errors in the Generic Drugs Index data, the Generic Drugs Index computations and/or the construction of the Generic Drugs Index in accordance with its methodology may occur from time to time and may not be identified and corrected by the Generic Drugs Index provider for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. In addition, the Fund may not be able to invest in certain securities included in the Generic Drugs Index, or invest in them in the exact proportions in which they are represented in the Generic Drugs Index, due to legal restrictions or limitations imposed by the governments of certain countries, a lack of liquidity on stock exchanges in which such securities trade, potential adverse tax consequences or other regulatory reasons. The Fund is expected to value certain of its investments based on fair value prices. To the extent the Fund calculates its NAV based on fair value prices and the value of the Generic Drugs Index is

VANECK VECTORS™ GENERIC DRUGS ETF (continued)

based on securities' closing prices on local foreign markets (*i.e.*, the value of the Generic Drugs Index is not based on fair value prices), the Fund's ability to track the Generic Drugs Index may be adversely affected. In addition, any issues the Fund encounters with regard to currency convertibility (including the cost of borrowing funds, if any) and repatriation may also increase the index tracking risk. The Fund may also need to rely on borrowings to meet redemptions, which may lead to increased expenses. For tax efficiency purposes, the Fund may sell certain securities, and such sale may cause the Fund to realize a loss and deviate from the performance of the Generic Drugs Index. In light of the factors discussed above, the Fund's return may deviate significantly from the return of the Generic Drugs Index.

Replication Management Risk. An investment in the Fund involves risks similar to those of investing in any fund of equity securities traded on an exchange, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in security prices. However, because the Fund is not actively managed, unless a specific security is removed from the Generic Drugs Index, the Fund generally would not sell a security because the security's issuer was in financial trouble. Therefore, the Fund's performance could be lower than funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers.

Risk of Cash Transactions. Unlike other exchange-traded funds (ETFs), the Fund expects to effect its creations and redemptions partially for cash, rather than in-kind securities. Therefore, it may be required to sell portfolio securities and subsequently recognize gains on such sales that the Fund might not have recognized if it were to distribute portfolio securities in kind. As such, investments in Shares may be less tax-efficient than an investment in a conventional ETF.

Authorized Participant Concentration Risk. The Fund may have a limited number of financial institutions that act as APs, none of which are obligated to engage in creation or redemption transactions. To the extent that those APs exit the business, or are unable to or choose not to process creation and/or redemption orders, and no other AP is able to step forward to create and redeem, there may be a significantly diminished trading market for Shares or Shares may trade like closed-end funds at a discount (or premium) to NAV and possibly face trading halts and/or de-listing. The AP concentration risk may be heightened in scenarios where APs have limited or diminished access to the capital required to post collateral.

No Guarantee of Active Trading Market. While Shares are listed on The NASDAQ Stock Market LLC (NASDAQ), there can be no assurance that an active trading markets for the Shares will be maintained. Further, secondary markets may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods in times of market stress because market makers and APs may step away from making a market in the Shares and in executing creation and redemption orders, which could cause a material deviation in the Fund's market price from its NAV.

Trading Issues. Trading in Shares on NASDAQ may be halted due to market conditions or for reasons that, in the view of NASDAQ, make trading in Shares inadvisable. In addition, trading in Shares on NASDAQ is subject to trading halts caused by extraordinary market volatility pursuant to NASDAQ's circuit breaker rules. There can be no assurance that the requirements of NASDAQ necessary to maintain the listing of the Fund will continue to be met or will remain unchanged.

Fund Shares Trading, Premium/Discount Risk and Liquidity of Fund Shares. The market prices of the Shares may fluctuate in response to the Fund's NAV, the intraday value of the Fund's holdings and supply and demand for Shares. The Adviser cannot predict whether Shares will trade above, below, or at their most recent NAV. Disruptions to creations and redemptions, the existence of market volatility or potential lack of an active trading market for Shares (including through a trading halt), as well as other factors, may result in Shares trading at a significant premium or discount to NAV or to the intraday value of the Fund's holdings. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses. The securities held by the Fund may be traded in markets that close at a different time than NASDAQ. Liquidity in those securities may be reduced after the applicable closing times. Accordingly, during the time when NASDAQ is open but after the applicable market closing, fixing or settlement times, bid-ask spreads on NASDAQ and the resulting premium or discount to the Shares' NAV may widen. Additionally, in stressed market conditions, the market for the Fund's Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings.

Non-Diversified Risk. The Fund is classified as a non-diversified fund under the Investment Company Act of 1940, as amended (the "1940 Act"). Therefore, the Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in obligations of a single issuer. As a result, the gains and losses on a single investment may have a greater impact on the Fund's NAV and may make the Fund more volatile than more diversified funds.

Concentration Risk. The Fund's assets may be concentrated in a particular sector or sectors or industry or group of industries to the extent the Generic Drugs Index concentrates in a particular sector or sectors or industry or group of industries. To the extent that the Fund continues to be concentrated in the pharmaceutical sector, the Fund will be subject to

the risk that economic, political or other conditions that have a negative effect on that sector will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

PERFORMANCE

The Fund commenced operations on January 12, 2016 and therefore does not have a performance history for a full calendar year. The Fund's financial performance for the Fund's first fiscal period is included in the Financial Highlights section of the Prospectus. Visit www.vaneck.com for current performance figures.

PORTFOLIO MANAGEMENT

Investment Adviser. Van Eck Associates Corporation.

Portfolio Managers. The following individuals are primarily and jointly responsible for the day-to-day management of the Fund's portfolio:

Name	Title with Adviser	Date Began Managing the Fund
Hao-Hung (Peter) Liao	Portfolio Manager	January 2016
George Chao	Portfolio Manager	January 2016

PURCHASE AND SALE OF FUND SHARES

For important information about the purchase and sale of Fund Shares, tax information, and payments to broker-dealers and other financial intermediaries, please turn to Summary Information about Purchases and Sales of Fund Shares, Taxes and Payments to Broker-Dealers and Other Financial Intermediaries on page 41 of this Prospectus.

VANECK VECTORS™ PHARMACEUTICAL ETF***SUMMARY INFORMATION****INVESTMENT OBJECTIVE**

VanEck Vectors™ Pharmaceutical ETF (the Fund) seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the MVIS™ US Listed Pharmaceutical 25 Index (the Pharmaceutical Index).

FUND FEES AND EXPENSES

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund (Shares).

Shareholder Fees (*fees paid directly from your investment*) None

Annual Fund Operating Expenses

(*expenses that you pay each year as a percentage of the value of your investment*)

Management Fee	0.35%
Other Expenses	0.06%

Total Annual Fund Operating Expenses ^(a)	0.41%
Fee Waivers and Expense Reimbursement ^(a)	-0.06%

Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement ^(a)	0.35%
--	-------

^(a) Van Eck Associates Corporation (the Adviser) has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, trading expenses, taxes and extraordinary expenses) from exceeding 0.35% of the Fund's average daily net assets per year until at least February 1, 2018. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

EXPENSE EXAMPLE

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling Shares of the Fund.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5% annual return and that the Fund's operating expenses remain the same (except that the example incorporates the fee waiver and/or expense reimbursement arrangement for only the first year). Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

YEAR EXPENSES

1	\$	36
3	\$	126
5	\$	224
10	\$	512

PORTFOLIO TURNOVER

The Fund will pay transaction costs, such as commissions, when it purchases and sells securities (or turns over its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, may affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 25% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund normally invests at least 80% of its total assets in securities that comprise the Fund's benchmark index. The Pharmaceutical Index includes common stocks and depositary receipts of U.S. exchange-listed companies in the pharmaceutical sector. Such companies may include medium-capitalization companies and foreign companies that are listed on a U.S. exchange. Companies are considered to be in the pharmaceutical sector if they derive at least 50% of their revenues from (or, in certain circumstances, have at least 50% of their assets related to) pharmaceuticals. The pharmaceutical

* Prior to May 1, 2016, the Fund's name was Market Vectors Pharmaceutical ETF.

sector includes companies engaged primarily in research (including research contractors) and development as well as production, marketing and sales of pharmaceuticals (excluding pharmacies). Of the largest 50 stocks in the pharmaceutical sector by full market capitalization, the top 25 by free-float market capitalization (*i.e.*, includes only shares that are readily available for trading in the market) and three month average daily trading volume are included in the Pharmaceutical Index. As of December 31, 2016, the Pharmaceutical Index included 25 securities of companies with a market capitalization range of approximately \$2.73 billion to \$313.43 billion and a weighted average market capitalization of \$4.40 billion. These amounts are subject to change. The Fund's 80% investment policy is non-fundamental and may be changed without shareholder approval upon 60 days' prior written notice to shareholders.

The Fund, using a passive or indexing investment approach, attempts to approximate the investment performance of the Pharmaceutical Index by investing in a portfolio of securities that generally replicates the Pharmaceutical Index. Unlike many investment companies that try to beat the performance of a benchmark index, the Fund does not try to beat the Pharmaceutical Index and does not seek temporary defensive positions when markets decline or appear overvalued. Indexing may eliminate the chance that the Fund will substantially outperform the Pharmaceutical Index but also may reduce some of the risks of active management, such as poor security selection. Indexing seeks to achieve lower costs and better after-tax performance by keeping portfolio turnover low in comparison to actively managed investment companies.

The Fund is classified as a non-diversified fund and, therefore, may invest a greater percentage of its assets in a particular issuer. The Fund may concentrate its investments in a particular industry or group of industries to the extent that the Pharmaceutical Index concentrates in an industry or group of industries. As of September 30, 2016, the Pharmaceutical Index was concentrated in the pharmaceutical sector, and the health care sector represented a significant portion of the Pharmaceutical Index.

PRINCIPAL RISKS OF INVESTING IN THE FUND

Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's Shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Therefore, you should consider carefully the following risks before investing in the Fund, each of which could significantly and adversely affect the value of an investment in the Fund.

Risk of Investing in the Pharmaceutical Sector. The success of companies in the pharmaceutical sector is highly dependent on the development, procurement and marketing of drugs. The values of pharmaceutical companies are also dependent on the development, protection and exploitation of intellectual property rights and other proprietary information, and the profitability of pharmaceutical companies may be significantly affected by such things as the expiration of patents or the loss of, or the inability to enforce, intellectual property rights. The research and other costs associated with developing or procuring new drugs and the related intellectual property rights can be significant, and the results of such research and expenditures are unpredictable. The Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the pharmaceutical sector. In addition, pharmaceutical companies may be susceptible to product obsolescence. Many pharmaceutical companies face intense competition from new products and less costly generic products. Moreover, the process for obtaining regulatory approval by the U.S. Food and Drug Administration (FDA) or other governmental regulatory authorities is long and costly and there can be no assurance that the necessary approvals will be obtained or maintained.

Companies in the pharmaceutical sector may also be subject to expenses and losses from extensive litigation based on intellectual property, product liability and similar claims. Companies in the pharmaceutical sector may be adversely affected by government regulation and changes in reimbursement rates. The ability of many pharmaceutical companies to commercialize current and any future products depends in part on the extent to which reimbursement for the cost of such products and related treatments are available from third party payors, such as Medicare, Medicaid and other government sponsored programs, private health insurance plans and health maintenance organizations.

The international operations of many pharmaceutical companies expose them to risks associated with instability and changes in economic and political conditions, foreign currency fluctuations, changes in foreign regulations and other risks inherent to international business. Such companies also may be characterized by thin capitalization and limited markets, financial resources or personnel, as well as dependence on wholesale distributors. A pharmaceutical company's valuation can be adversely affected if one of its products proves unsafe, ineffective or unprofitable. The stock prices of companies in the pharmaceutical sector have been and will likely continue to be extremely volatile, in part due to the prevalence of merger and acquisition activity in the pharmaceutical sector. Some of the companies in the Pharmaceutical Index are engaged in other lines of business unrelated to pharmaceuticals, and they may experience problems with these lines of business which could adversely affect their operating results. The operating results of these companies may fluctuate as a result of these additional

VANECK VECTORS™ PHARMACEUTICAL ETF (continued)

risks and events in the other lines of business. In addition, a company's ability to engage in new activities may expose it to business risks with which it has less experience than it has with the business risks associated with its traditional businesses. Despite a company's possible success in traditional pharmaceutical activities, there can be no assurance that the other lines of business in which these companies are engaged will not have an adverse effect on a company's business or financial condition.

Certain companies in which the Fund may invest are non-U.S. issuers whose securities are listed on U.S. exchanges. These securities involve risks beyond those associated with investments in U.S. securities, including greater market volatility, higher transactional costs, the possibility that the liquidity of such securities could be impaired because of future political and/or economic developments, taxation by foreign governments, political instability, the possibility that foreign governmental restrictions may be adopted which might adversely affect such securities and that the selection of such securities may be more difficult because there may be less publicly available information concerning such non-U.S. issuers or the accounting, auditing and financial reporting standards, practices and requirements applicable to non-U.S. issuers may differ from those applicable to U.S. issuers.

Equity Securities Risk. The value of the equity securities held by the Fund may fall due to general market and economic conditions, perceptions regarding the markets in which the issuers of securities held by the Fund participate, or factors relating to specific issuers in which the Fund invests. Equity securities are subordinated to preferred securities and debt in a company's capital structure with respect to priority in right to a share of corporate income, and therefore will be subject to greater dividend risk than preferred securities or debt instruments. In addition, while broad market measures of equity securities have historically generated higher average returns than fixed income securities, equity securities have generally also experienced significantly more volatility in those returns, although under certain market conditions fixed income securities may have comparable or greater price volatility.

Risk of Investing in the Health Care Sector. To the extent that the health care sector continues to represent a significant portion of the Fund, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the health care sector. Companies in the health care sector may be affected by extensive government regulation, restrictions on government reimbursement for medical expenses, rising costs of medical products and services, pricing pressure, an increased emphasis on outpatient services, limited number of products, industry innovation, changes in technologies and other market developments. Many health care companies are heavily dependent on patent protection and are subject to extensive litigation based on product liability and similar claims.

Risk of Investing in Depositary Receipts. The Fund may invest in depositary receipts which involve similar risks to those associated with investments in foreign securities. Depositary receipts are receipts listed on U.S. exchanges issued by banks or trust companies that entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares. Investments in depositary receipts may be less liquid than the underlying shares in their primary trading market and, if not included in the Pharmaceutical Index, may negatively affect the Fund's ability to replicate the performance of the Pharmaceutical Index.

Special Risk Considerations of Investing in European Issuers. The Fund may invest in securities issued by European issuers and, accordingly, may be subject to the risk of investing in such issuers. Investment in securities of issuers in Europe involves risks and special considerations not typically associated with investment in the U.S. securities markets. The Economic and Monetary Union of the European Union (EU) requires member countries to comply with restrictions on inflation rates, deficits, interest rates, debt levels and fiscal and monetary controls, each of

which may significantly affect every country in Europe. Decreasing imports or exports, changes in governmental or EU regulations on trade, changes in the exchange rate of the euro, the default or threat of default by an EU member country on its sovereign debt, and/or an economic recession in an EU member country may have a significant adverse effect on the economies of EU member countries and on major trading partners outside Europe. The European financial markets have recently experienced volatility and have been adversely affected by concerns about economic downturns, credit rating downgrades, rising government debt levels and possible default on or restructuring of government debt in several European countries, including Greece, Ireland, Italy, Portugal and Spain. These events have adversely affected the value and exchange rate of the euro and may continue to significantly affect the economies of every country in Europe, including EU member countries that do not use the euro and non-EU member countries. In addition, in a referendum held on June 23, 2016, voters in the United Kingdom voted to leave the EU, creating economic and political uncertainty in its wake. Significant uncertainty exists regarding the timing of the United Kingdom's withdrawal from the EU and the effects such withdrawal will have on the euro, European economies and global markets.

Risk of Investing in Foreign Securities. The Fund invests in securities of issuers located in countries whose economies are heavily dependent upon trading with key partners. Any reduction in this trading may have an adverse impact on the Fund's investments. Investments in the securities of foreign issuers involve risks beyond those associated with investments in U.S. securities. These additional risks include greater market volatility, the availability of less reliable financial information, higher

transactional and custody costs, taxation by foreign governments, decreased market liquidity and political instability. Because certain foreign securities markets may be limited in size, the activity of large traders may have an undue influence on the prices of securities that trade in such markets.

Risk of Investing in Medium-Capitalization Companies. Medium-capitalization companies may be more volatile and more likely than large-capitalization companies to have narrower product lines, fewer financial resources, less management depth and experience and less competitive strength. In addition, these companies often have greater price volatility, lower trading volume and less liquidity than larger, more established companies. Returns on investments in securities of medium-capitalization companies could trail the returns on investments in securities of large-capitalization companies.

Issuer-Specific Changes Risk. The value of individual securities or particular types of securities in the Fund's portfolio can be more volatile than the market as a whole and can perform differently from the value of the market as a whole, especially if the Fund's portfolio is concentrated in a country, group of countries, region, market, industry, group of industries, sector or asset class. The value of securities of smaller issuers can be more volatile than that of larger issuers.

Market Risk. The prices of the securities in the Fund are subject to the risks associated with investing in the securities market, including general economic conditions and sudden and unpredictable drops in value. An investment in the Fund may lose money.

Operational Risk. The Fund is exposed to operational risk arising from a number of factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or system failures. The Fund seeks to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate for those risks that they are intended to address.

Index Tracking Risk. The Fund's return may not match the return of the Pharmaceutical Index for a number of reasons. For example, the Fund incurs a number of operating expenses not applicable to the Pharmaceutical Index and incurs costs associated with buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Pharmaceutical Index, which are not factored into the return of the Pharmaceutical Index. Transaction costs, including brokerage costs, will decrease the Fund's net asset value (NAV) to the extent not offset by the transaction fee payable by an Authorized Participant (AP). Market disruptions and regulatory restrictions could have an adverse effect on the Fund's ability to adjust its exposure to the required levels in order to track the Pharmaceutical Index. Errors in the Pharmaceutical Index data, the Pharmaceutical Index computations and/or the construction of the Pharmaceutical Index in accordance with its methodology may occur from time to time and may not be identified and corrected by the Pharmaceutical Index provider for a period of time or at all, which may have an adverse impact on the Fund and its shareholders. In addition, the Fund may not be able to invest in certain securities included in the Pharmaceutical Index, or invest in them in the exact proportions in which they are represented in the Pharmaceutical Index, due to legal restrictions or limitations imposed by the governments of certain countries, a lack of liquidity on stock exchanges in which such securities trade, potential adverse tax consequences or other regulatory reasons. To the extent the Fund calculates its NAV based on fair value prices and the value of the Pharmaceutical Index is based on securities' closing prices (*i.e.*, the value of the Pharmaceutical Index is not based on fair value prices), the Fund's ability to track the Pharmaceutical Index may be adversely affected. For tax efficiency purposes, the Fund may sell certain securities, and such sale may cause the Fund to realize a loss and deviate from the performance of the Pharmaceutical Index. In light of the factors discussed above, the Fund's return may deviate significantly from the return of the Pharmaceutical Index.

Authorized Participant Concentration Risk. The Fund may have a limited number of financial institutions that act as APs, none of which are obligated to engage in creation or redemption transactions. To the extent that those APs exit the business, or are unable to or choose not to process creation and/or redemption orders, and no other AP is able to step forward to create and redeem, there may be a significantly diminished trading market for Shares or Shares may trade like closed-end funds at a discount (or premium) to NAV and possibly face trading halts and/or de-listing. The AP concentration risk may be heightened in scenarios where APs have limited or diminished access to the capital required to post collateral.

No Guarantee of Active Trading Market. While Shares are listed on The NASDAQ Stock Market LLC (NASDAQ), there can be no assurance that an active trading market for the Shares will be maintained. Further, secondary markets may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods in times of market stress because market makers and APs may step away from making a market in the Shares and in executing creation and redemption orders, which could cause a material deviation in the Fund's market price from its NAV.

Trading Issues. Trading in Shares on NASDAQ may be halted due to market conditions or for reasons that, in the view of NASDAQ, make trading in Shares inadvisable. In addition, trading in Shares on NASDAQ is subject to trading halts caused by

VANECK VECTORS™ PHARMACEUTICAL ETF (continued)

extraordinary market volatility pursuant to NASDAQ's circuit breaker rules. There can be no assurance that the requirements of NASDAQ necessary to maintain the listing of the Fund will continue to be met or will remain unchanged.

Replication Management Risk. An investment in the Fund involves risks similar to those of investing in any fund of equity securities traded on an exchange, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in security prices. However, because the Fund is not actively managed, unless a specific security is removed from the Pharmaceutical Index, the Fund generally would not sell a security because the security's issuer was in financial trouble. Therefore, the Fund's performance could be lower than funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers.

Fund Shares Trading, Premium/Discount Risk and Liquidity of Fund Shares. The market prices of the Shares may fluctuate in response to the Fund's NAV, the intraday value of the Fund's holdings and supply and demand for Shares. The Adviser cannot predict whether Shares will trade above, below, or at their most recent NAV. Disruptions to creations and redemptions, the existence of market volatility or potential lack of an active trading market for Shares (including through a trading halt), as well as other factors, may result in Shares trading at a significant premium or discount to NAV or to the intraday value of the Fund's holdings. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses. The securities held by the Fund may be traded in markets that close at a different time than NASDAQ. Liquidity in those securities may be reduced after the applicable closing times. Accordingly, during the time when NASDAQ is open but after the applicable market closing, fixing or settlement times, bid-ask spreads on NASDAQ and the resulting premium or discount to the Shares' NAV may widen. Additionally, in stressed market conditions, the market for the Fund's Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings.

Non-Diversified Risk. The Fund is classified as a non-diversified fund under the Investment Company Act of 1940, as amended (the 1940 Act). Therefore, the Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in a single issuer. As a result, the gains and losses on a single investment may have a greater impact on the Fund's NAV and may make the Fund more volatile than more diversified funds. The Fund may be particularly vulnerable to this risk because the Pharmaceutical Index is comprised of securities of a very limited number of issuers.

Concentration Risk. The Fund's assets may be concentrated in a particular sector or sectors or industry or group of industries to the extent the Pharmaceutical Index concentrates in a particular sector or sectors or industry or group of industries. To the extent that the Fund continues to be concentrated in the pharmaceutical sector, the Fund will be subject to the risk that economic, political or other conditions that have a negative effect on that sector will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

PERFORMANCE

The bar chart that follows shows how the Fund performed for the calendar years shown. The table below the bar chart shows the Fund's average annual returns (before and after taxes). The bar chart and table provide an indication of the risks of investing in the Fund by showing the Fund's performance from year to year and by showing how the Fund's average annual returns for the one year, five year and since inception periods compared with the Fund's benchmark

index and a broad measure of market performance. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily indicative of how the Fund will perform in the future. Updated performance information is available online at www.vaneck.com.

Annual Total Returns (%) Calendar Years

28

Best Quarter: 13.37 1Q 13**Worst Quarter:** -11.59 1Q 16**Average Annual Total Returns for the Periods Ended December 31, 2016**

The after-tax returns presented in the table below are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your specific tax situation and may differ from those shown below. After-tax returns are not relevant to investors who hold Shares of the Fund through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

	Past One Year	Past Five Years	Since Inception (12/20/2011)
VanEck Vectors Pharmaceutical ETF (return before taxes)	-17.76%	10.04%	10.21%
VanEck Vectors Pharmaceutical ETF (return after taxes on distributions)	-18.50%	9.33%	9.51%
VanEck Vectors Pharmaceutical ETF (return after taxes on distributions and sale of Fund Shares)	-9.94%	7.82%	7.96%

PORTFOLIO MANAGEMENT

Investment Adviser. Van Eck Associates Corporation.

Portfolio Managers. The following individuals are jointly and primarily responsible for the day-to-day management of the Fund's portfolio:

Name	Title with Adviser	Date Began Managing the Fund
Hao-Hung (Peter) Liao	Portfolio Manager	December 2011
George Chao	Portfolio Manager	December 2011

PURCHASE AND SALE OF FUND SHARES

For important information about the purchase and sale of Fund Shares, tax information and payments to broker-dealers and other financial intermediaries, please turn to Summary Information About Purchases and Sales of Fund Shares, Taxes and Payments to Broker-Dealers and Other Financial Intermediaries on page 41 of this Prospectus.

VANECK VECTORS™ RETAIL ETF***SUMMARY INFORMATION****INVESTMENT OBJECTIVE**

VanEck Vectors™ Retail ETF (the Fund) seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the MVIS™ US Listed Retail 25 Index (the Retail Index).

FUND FEES AND EXPENSES

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund (Shares).

Shareholder Fees (*fees paid directly from your investment*) None

Annual Fund Operating Expenses

(*expenses that you pay each year as a percentage of the value of your investment*)

Management Fee	0.35%
Other Expenses	0.08%

Total Annual Fund Operating Expenses ^(a)	0.43%
Fee Waivers and Expense Reimbursement ^(a)	-0.08%

Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement ^(a)	0.35%
--	-------

^(a) Van Eck Associates Corporation (the Adviser) has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, trading expenses, taxes and extraordinary expenses) from exceeding 0.35% of the Fund's average daily net assets per year until at least February 1, 2018. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

EXPENSE EXAMPLE

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling Shares of the Fund.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5% annual return and that the Fund's operating expenses remain the same (except that the example incorporates the fee waiver and/or expense reimbursement arrangement for only the first year). Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

YEAR EXPENSES

1	\$	36
3	\$	130
5	\$	233
10	\$	534

PORTFOLIO TURNOVER

The Fund will pay transaction costs, such as commissions, when it purchases and sells securities (or turns over its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, may affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 9% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund normally invests at least 80% of its total assets in securities that comprise the Fund's benchmark index. The Retail Index includes common stocks and depositary receipts of U.S. exchange-listed companies that derive at least 50% of their revenues from (or, in certain circumstances, have at least 50% of their assets related to) retail. This includes companies engaged primarily in retail distribution; wholesalers; online, direct mail and TV retailers; multi-line retailers; specialty retailers,

* Prior to May 1, 2016, the Fund's name was Market Vectors Retail ETF.
