Item 1.01 Conflict Minerals Disclosure and Report

Conflict Minerals Disclosure

Advanced Semiconductor Engineering, Inc. (“ASE”, “we”, “our”, “us”) is the world’s largest independent provider of semiconductor packaging and testing services based on 2013 revenues. Our services include semiconductor packaging, production of interconnect materials, front-end engineering testing, wafer probing and final testing services, as well as integrated solutions for electronic manufacturing services in relation to computers, peripherals, communications, industrial, automotive, and storage and server applications. We utilize gold, tantalum, tin and tungsten in certain of our activities.

Following a reasonable country of origin inquiry and due diligence on the sources of the gold, tantalum, tin and tungsten that we use, we are unable to determine the origin of all of these minerals in our products. A description of our reasonable country of origin inquiry and due diligence procedures is contained in our Conflict Minerals Report which we have filed as Exhibit 1.02 to this specialized disclosure report. The Conflict Minerals Report is also available at <http://www.aseglobal.com/en/Csr/SupplyChain.asp>. The website and information accessible through it are not incorporated into this specialized disclosure report.

Item 1.02 Exhibit

See Exhibit 1.02 to this specialized disclosure report, incorporated herein by reference.

Item 2.01 Exhibits

Exhibit 1.02 – Conflict Minerals Report
