REGISTRATION STATEMENT PURSUANT TO SECTION 12(b) or (g) OF THE SECURITIES EXCHANGE ACT OF 1934

OR

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2009

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

OR

SHELL COMPANY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Date of event requiring this shell company report _____

For the transition period from _____ to _____

Commission file number 1-12874

TEEKAY CORPORATION

(Exact name of Registrant as specified in its charter)

Republic of The Marshall Islands

(Jurisdiction of incorporation or organization)

4th floor, Belvedere Building, 69 Pitts Bay Road, Hamilton, HM 08, Bermuda

(Address of principal executive offices)

Roy Spires

4th Floor, Belvedere Building, 69 Pitts Bay Road, Hamilton, HM 08, Bermuda

Telephone: (441) 298-2530 Fax: (441) 292-3931

(Contact Information for Company Contact Person)

Securities registered or to be registered pursuant to Section 12(b) of the Act.

Title of each class

Name of each exchange on which registered

Common Stock, par value of \$0.001 per share

New York Stock Exchange

Securities registered or to be registered pursuant to Section 12(g) of the Act.

None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act.

None

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report.

72,694,345 shares of Common Stock, par value of \$0.001 per share.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Edgar Filing: TEEKAY CORP - Form 20-F

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer

Accelerated Filer

Non-Accelerated Filer

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP

International Financial Reporting Standards as issued by the International Accounting Standards Board

Other

If Other has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow:

Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

PART I

This Annual Report should be read in conjunction with the consolidated financial statements and accompanying notes included in this report.

Unless otherwise indicated, references in this Annual Report to Teekay, we, us and our and similar terms refer to Teekay Corporation and its subsidiaries.

In addition to historical information, this Annual Report contains forward-looking statements that involve risks and uncertainties. Such forward-looking statements relate to future events and our operations, objectives, expectations, performance, financial condition and intentions. When used in this Annual Report, the words expect, intend, plan, believe, anticipate, estimate and variations of such words and similar expressions are intended to identify forward-looking statements. Forward-looking statements in this Annual Report include, in particular, statements regarding:

- our future financial condition or results of operations and future revenues and expenses;
- tanker market conditions and fundamentals, including the balance of supply and demand in these markets and spot tanker charter rates and oil production;
- offshore, liquefied natural gas (or *LNG*) and liquefied petroleum gas (or *LPG*) market conditions and fundamentals, including the balance of supply and demand in these markets;
- our future growth prospects;
- our expected benefits of the OMI acquisition;
- the sufficiency of our working capital for short-term liquidity requirements;
- future capital expenditure commitments and the financing requirements for such commitments;
- estimated costs and timing of implementation of the EU Directive to burn only low sulphur fuel, and our ability to timely comply with this Directive;
- delivery dates of and financing for newbuildings, and the commencement of service of newbuildings under long-term time-charter contracts;
- potential newbuildings order cancellations;
- construction and delivery delays in the tanker industry generally;
- the future valuation of goodwill;
- the adequacy of restricted cash deposits to fund capital lease obligations;
- our compliance with covenants under our credit facilities;
- our ability to fulfill our debt obligations;
- compliance with financing agreements and the expected effect of restrictive covenants in such agreements;
- declining market values of our vessels and the effect on our liquidity;
- operating expenses, availability of crew and crewing costs, number of off-hire days, drydocking requirements and durations and the adequacy and cost of insurance;
- our ability to capture some of the value from the volatility of the spot tanker market and from market imbalances by utilizing forward freight agreements;
- the ability of the counterparties to our derivative contracts to fulfill their contractual obligations;
- our ability to maximize the use of our vessels, including the re-deployment or disposition of vessels no longer under long-term contracts;
- the cost of, and our ability to comply with, governmental regulations and maritime self-regulatory organization standards applicable to our business;
- the impact of future regulatory changes or environmental liabilities;
- taxation of our company and of distributions to our stockholders;
- the expected life-spans of our vessels;
- the expected impact of heightened environmental and quality concerns of insurance underwriters, regulators and charterers;

Table of Contents

anticipated funds for liquidity needs and the sufficiency of cash flows;
our hedging activities relating to foreign exchange, interest rate, spot market and bunker fuel risks;
the effectiveness of our risk management policies and procedures;
the growth of global oil demand;
the recent economic downturn and financial crisis in the global market, including disruptions in the global credit and stock markets and potential negative effects of any reoccurrence of such disruptions on our customers' ability to charter our vessels and pay for our services;
our exemption from tax on our U.S. source international transportation income;
the potential benefits to us of renegotiated contract for the *Foinaven* floating production, storage and offloading (or *FPSO*) unit;
our ability to competitively pursue new *FPSO* projects;
our competitive positions in our markets;
our business strategy and other plans and objectives for future operations; and
our ability to pay dividends on our common stock.

Forward-looking statements involve known and unknown risks and are based upon a number of assumptions and estimates that are inherently subject to significant uncertainties and contingencies, many of which are beyond our control. Actual results may differ materially from those expressed or implied by such forward-looking statements. Important factors that could cause actual results to differ materially include, but are not limited to, those factors discussed below in Item 3: Key Information Risk Factors and other factors detailed from time to time in other reports we file with the U.S. Securities and Exchange Commission (or *SEC*).

We do not intend to revise any forward-looking statements in order to reflect any change in our expectations or events or circumstances that may subsequently arise. You should carefully review and consider the various disclosures included in this Annual Report and in our other filings made with the SEC that attempt to advise interested parties of the risks and factors that may affect our business, prospects and results of operations.

Item 1. Identity of Directors, Senior Management and Advisors

Not applicable.

Item 2. Offer Statistics and Expected Timetable

Not applicable.

Item 3. Key Information

Selected Financial Data

Set forth below is selected consolidated financial and other data of Teekay for fiscal years 2009, 2008, 2007, 2006, and 2005, which have been derived from our consolidated financial statements. The data below should be read in conjunction with the consolidated financial statements and the notes thereto and the Report of Independent Registered Public Accounting Firm therein with respect to fiscal years 2009, 2008, and 2007 (which are included herein) and Item 5. Operating and Financial Review and Prospects.

Table of Contents

Our consolidated financial statements are prepared in accordance with United States generally accepted accounting principles (or *GAAP*).

	2005	2006	2007	2008	2009
	(in thousands, except share and per common share data and ratios)				
Income Statement Data:					
Revenues	\$ 1,958,479	\$ 2,015,871	\$ 2,387,625	\$ 3,229,443	\$ 2,172,049
Total operating expenses ⁽¹⁾	(1,319,937)	(1,601,528)	(2,028,595)	(2,969,324)	(2,002,261)
Income from vessel operations	638,542	414,343	359,030	260,119	169,788

Capital stock and additional paid-in capital	471,784	596,712	628,786	642,911	656,193
Non-controlling interest	287,432	461,887	544,339	583,938	855,580
Total equity	2,526,250	2,981,034	3,200,293	2,652,405	3,095,670
Number of outstanding shares of common stock	71,375,593	72,831,923	72,772,529	72,512,291	72,694,345

Other Financial Data:

Net revenues ⁽³⁾	\$ 1,537,721	\$ 1,493,816	\$ 1,856,552	\$ 2,471,055	\$ 1,877,958
EBITDA ⁽⁴⁾	860,079	657,196	592,016	96,554	791,291
Adjusted EBITDA ⁽⁴⁾	707,882	630,408	660,485	892,616	563,217
Total debt to total capitalization ^{(5) (6)}	49.1%	57.9%	65.7%	68.5%	62.7%
Net debt to total net capitalization ⁽⁶⁾ ⁽⁷⁾	42.7%	50.8%	60.9%	61.9%	57.4%
Capital expenditures:					
Vessel and equipment purchases ⁽⁸⁾	\$ 555,142	\$ 442,470	\$ 910,304	\$ 716,765	\$ 495,214

(1) Total operating expenses include the following:

	2005	2006	2007	2008	2009
	(in thousands)				
Gain (loss) on sale of vessels and equipment, net of write-downs	\$ 139,184	\$ 1,341	\$ 16,531	\$ 50,267	\$ (12,629)
Unrealized (losses) gains on derivative instruments			(143)	(8,325)	14,915
Restructuring charges	(2,882)	(8,929)		(15,629)	(14,444)
Goodwill impairment charge				(334,165)	
	\$ 136,302	\$ (7,588)	\$ 16,388	\$ (307,852)	\$ (12,158)

Table of Contents

- (2) In January 2009, we adopted an amendment to Financial Accounting Standards Board (or *FASB*) Accounting Standards Codification (or *ASC*) 810, *Consolidations*, which requires us to change the portion of net income (loss) that is attributable to the non-controlling interest. This change was not applied retroactively, please read Item 18 Financial Statements: Note 1 Adoption of New Accounting Pronouncements to see the pro forma net income attributable to the stockholders of Teekay Corporation had we not adopted FASB ASC 810.
- (3) Consistent with general practice in the shipping industry, we use net revenues (defined as revenues less

voyage expenses) as a measure of equating revenues generated from voyage charters to revenues generated from time-charterers, which assists us in making operating decisions about the deployment of our vessels and their performance. Under time-charterers the charterer pays the voyage expenses, which are all expenses unique to a particular voyage, including any bunker fuel expenses, port fees, cargo loading and unloading expenses, canal tolls, agency fees and commissions, whereas under voyage-charter contracts the ship-owner pays these expenses. Some voyage expenses are fixed, and the remainder can be estimated. If we, as the ship-owner, pay the voyage expenses, we

typically pass the approximate amount of these expenses on to our customers by charging higher rates under the contract or billing the expenses to them. As a result, although revenues from different types of contracts may vary, the net revenues after subtracting voyage expenses, which we call net revenues, are comparable across the different types of contracts. We principally use net revenues, a non-GAAP financial measure, because it provides more meaningful information to us than revenues, the most directly comparable GAAP financial measure. Net revenues are also widely used by investors and analysts in the shipping industry for comparing financial performance between companies and to industry averages. The following table

reconciles net revenues with revenues.

	2005	2006	2007 (in thousands)	2008	2009
Revenues	\$ 1,958,479	\$ 2,015,871	\$ 2,387,625	\$ 3,229,443	\$ 2,172,049
Voyage expenses	(420,758)	(522,055)	(531,073)	(758,388)	(294,091)
Net revenues	\$ 1,537,721	\$ 1,493,816	\$ 1,856,552	\$ 2,471,055	\$ 1,877,958

(4) EBITDA represents earnings before interest, taxes, depreciation and amortization. Adjusted EBITDA represents EBITDA before restructuring charges, unrealized foreign exchange loss (gain), loss (gain) on sale of vessels and equipment net of write-downs, goodwill impairment charge, amortization of in-process revenue contracts, unrealized (gains) losses on derivative instruments, realized losses (gains) on interest rate swaps and share of realized and unrealized (gains) losses on interest rate swaps in non-consolidated

joint ventures.
EBITDA and
Adjusted
EBITDA are used
as supplemental
financial
measures by
management and
by external users
of our financial
statements, such
as investors, as
discussed below.

Financial and operating performance. EBITDA and Adjusted EBITDA assist our management and security holders by increasing the comparability of our fundamental performance from period to period and against the fundamental performance of other companies in our industry that provide EBITDA or Adjusted EBITDA-based information. This increased comparability is achieved by excluding the potentially disparate effects between periods or companies of interest expense, taxes, depreciation or amortization (or other items in determining Adjusted EBITDA), which items are affected by various and possibly changing financing methods, capital structure and historical cost basis and which items may significantly affect net income between periods. We believe that including EBITDA and Adjusted EBITDA as a financial and operating measure benefits security holders in (a) selecting between investing in us and other investment alternatives and (b) monitoring our ongoing financial and operational strength and health in assessing whether to continue to hold our equity, or debt securities, as applicable.

Liquidity. EBITDA and Adjusted EBITDA allow us to assess the ability of assets to generate cash sufficient to service debt, pay dividends and undertake capital expenditures. By eliminating the cash flow effect resulting from our existing capitalization and other items such as drydocking expenditures, working capital changes and foreign currency exchange gains and losses (which may vary very significantly from period to period), EBITDA and Adjusted EBITDA provide a consistent measure of our ability to generate cash over the long term. Management uses this information as a significant factor in determining (a) our proper capitalization (including assessing how much debt to incur and whether changes to the capitalization should be made) and (b) whether to undertake material capital expenditures and how to finance them, all in light of our dividend policy. Use of EBITDA and Adjusted EBITDA as liquidity measures also permits security holders to assess the fundamental ability of our business to generate cash sufficient to meet cash needs, including dividends on shares of our common stock and repayments under debt instruments.

Neither EBITDA nor Adjusted EBITDA should be considered as an alternative to net income, operating income, cash flow from operating activities or any other measure of financial performance or liquidity presented in accordance with GAAP. EBITDA and Adjusted EBITDA exclude some, but not all, items that affect net income and operating income, and these measures may vary among other companies. Therefore, EBITDA and Adjusted EBITDA as presented below may not be comparable to similarly titled measures of other companies.

Table of Contents

The following table reconciles our historical consolidated EBITDA and Adjusted EBITDA to net income, and our historical consolidated Adjusted EBITDA to net operating cash flow.

	2005	2006	2007	2008	2009
	(in thousands)				
Income statement data:					
Reconciliation of EBITDA and Adjusted EBITDA to Net income					
Net income (loss)	\$ 580,091	\$ 309,583	\$ 72,446	\$ (459,894)	\$ 209,777

Realized losses (gains) on interest rate swaps and foreign exchange contracts	12,537	(1,149)	(4,647)	32,445	127,936
Unrealized losses (gains) on interest rate swaps in non-consolidated joint ventures				32,959	(34,854)
Adjusted EBITDA	707,882	630,408	660,485	892,616	563,217

(5) Total capitalization represents total debt and total equity.

(6) Until February 16, 2006, we had \$143.7 million of Premium Equity Participating Security Units due May 18, 2006 (or *Equity Units*) outstanding. If these Equity Units were presented as equity, our total debt to total capitalization would have been 46.2% as of December 31, 2005 and our net debt to total capitalization would have been 39.5% as

of December 31, 2005. We believe that this presentation as equity for the purposes of these calculations is consistent with the requirement that each Equity Unit holder purchase for \$25 a specified fraction of a share of our common stock on February 16, 2006.

- (7) Net debt represents total debt less cash, cash equivalents and restricted cash. Total net capitalization represents net debt and total equity.
- (8) Excludes vessels purchased in connection with our acquisitions of Teekay Petrojarl ASA (or *Teekay Petrojarl*) in 2006, and 50% of OMI Corporation (or *OMI*) in 2007. Please read Item 5 Operating and Financial Review and Prospects. The expenditures for

vessels and
equipment
exclude
non-cash
investing
activities Please

Risk Factors

The cyclical nature of the tanker industry may lead to volatile changes in charter rates, which may adversely affect our earnings.

Historically, the tanker industry has been cyclical, experiencing volatility in profitability due to changes in the supply of, and demand for, tanker capacity and changes in the supply of and demand for oil and oil products. If the tanker market is depressed, our earnings may decrease, particularly with respect to our spot tanker segment, a subset of our conventional tanker segment, which accounted for approximately 24% and 43% of our net revenues during 2009 and 2008, respectively. The cyclical nature of the tanker industry may cause significant increases or decreases in the revenue we earn from our vessels and may also cause significant increases or decreases in the value of our vessels. The factors affecting the supply of and demand for tankers are outside of our control, and the nature, timing and degree of changes in industry conditions are unpredictable.

Table of Contents

Factors that influence demand for tanker capacity include:

- demand for oil and oil products;
- supply of oil and oil products;
- regional availability of refining capacity;
- global and regional economic conditions;
- the distance oil and oil products are to be moved by sea; and
- changes in seaborne and other transportation patterns.

Factors that influence the supply of tanker capacity include:

- the number of newbuilding deliveries;
- the scrapping rate of older vessels;
- conversion of tankers to other uses;
- the number of vessels that are out of service; and
- environmental concerns and regulations.

Changes in demand for transportation of oil over longer distances and in the supply of tankers to carry that oil may materially affect our revenues, profitability and cash flows.

Changes in the oil and natural gas markets could result in decreased demand for our vessels and services.

Demand for our vessels and services in transporting oil, petroleum products and LNG depend upon world and regional oil and natural gas markets. Any decrease in shipments of oil, petroleum products or LNG in those markets could have a material adverse effect on our business, financial condition and results of operations. Historically, those markets have been volatile as a result of the many conditions and events that affect the price, production and transport of oil, petroleum products and LNG, and competition from alternative energy sources. A slowdown of the U.S. and world economies may result in reduced consumption of oil, petroleum products and natural gas and decreased demand for our vessels and services, which would reduce vessel earnings.

Changes in the spot tanker market may result in significant fluctuations in the utilization of our vessels and our profitability.

During 2009 and 2008, we derived approximately 24% and 43%, respectively, of our net revenues from the vessels in our spot tanker segment (which includes vessels operating under charters with an initial term of less than three years), a subset of our conventional tanker segment. Our spot tanker segment consists of conventional crude oil tankers and product carriers operating on the spot tanker market or subject to time charters, or contracts of affreightment priced on a spot-market basis or fixed-rate contracts with a term less than three years. Part of our conventional Aframax and Suezmax tanker fleets and our large and medium product tanker fleets are among the vessels included in our spot tanker segment. Our shuttle tankers may also trade in the spot tanker market when not otherwise committed to perform under time-charters or contracts of affreightment. Due to activity in the spot-charter market, declining spot rates in a given period generally will result in corresponding declines in operating results for that period.

The spot-charter market is highly volatile and fluctuates based upon tanker and oil supply and demand. The successful operation of our vessels in the spot-charter market depends upon, among other things, obtaining profitable spot charters and minimizing, to the extent possible, time spent waiting for charters and time spent traveling unladen to pick up cargo. During 2009, there have been periods when spot rates have declined below the operating cost of vessels. Before rebounding somewhat in the fourth quarter of 2009, spot tanker rates declined to multi-year lows in the third quarter of 2009, primarily due to the ongoing effects of reduced global oil demand coupled with tanker fleet growth. Future spot rates may not be sufficient to enable our vessels trading in the spot tanker market to operate profitably or to provide sufficient cash flow to service our debt obligations.

Reduction in oil produced from offshore oil fields could harm our shuttle tanker and FPSO businesses.

As at December 31, 2009, we had 35 vessels operating in our shuttle tanker fleet and five FPSO units operating in our FPSO fleet. A majority of our shuttle tankers and all of our FPSOs units earn revenue that depends upon the volume of oil we transport or the volume of oil produced from offshore oil fields. Oil production levels are affected by several factors, all of which are beyond our control, including:

- geologic factors, including general declines in production that occur naturally over time;
- the rate of technical developments in extracting oil and related infrastructure and implementation costs; and

operator decisions based on revenue compared to costs from continued operations.

Factors that may affect an operator's decision to initiate or continue production include: changes in oil prices; capital budget limitations; the availability of necessary drilling and other governmental permits; the availability of qualified personnel and equipment; the quality of drilling prospects in the area; and regulatory changes. In addition, the volume of oil we transport may be adversely affected by extended repairs to oil field installations or suspensions of field operations as a result of oil spills, operational difficulties, strikes, employee lockouts or other labor unrest. The rate of oil production at fields we service may decline from existing or future levels, and may be terminated, all of which could harm our business and operating results. In addition, if such a reduction or termination occurs, the spot tanker market rates, if any, in the conventional oil tanker trades at which we may be able to redeploy the affected shuttle tankers may be lower than the rates previously earned by the vessels under contracts of affreightment, which would also harm our business and operating results.

Table of Contents***The redeployment risk of FPSO units is high given their lack of alternative uses and significant costs.***

FPSO units are specialized vessels that have very limited alternative uses and high fixed costs. In addition, FPSO units typically require substantial capital investments prior to being redeployed to a new field and production service agreement. Unless extended, certain of our FPSO production service agreements will expire during the next 10 years. Our clients may also terminate certain of our FPSO production service agreements prior to their expiration under specified circumstances. Any idle time prior to the commencement of a new contract or our inability to redeploy the vessels at acceptable rates may have an adverse effect on our business and operating results.

The duration of many of our shuttle tanker and FSO contracts is the life of the relevant oil field or is subject to extension by the field operator or vessel charterer. If the oil field no longer produces oil or is abandoned or the contract term is not extended, we will no longer generate revenue under the related contract and will need to seek to redeploy affected vessels.

Two of our shuttle tanker contracts have a life-of-field duration, which means that the contract continues until oil production at the field ceases. If production terminates for any reason, we no longer will generate revenue under the related contract. Other shuttle tanker and floating storage and off-take (or FSO) contracts under which our vessels operate are subject to extensions beyond their initial term. The likelihood of these contracts being extended may be negatively affected by reductions in oil field reserves, low oil prices generally or other factors. If we are unable to promptly redeploy any affected vessels at rates at least equal to those under the contracts, if at all, our operating results will be harmed. Any potential redeployment may not be under long-term contracts, which may affect the stability of our business and operating results.

Charter rates for conventional oil and product tankers may fluctuate substantially over time and may be lower when we are attempting to recharter conventional oil or product tankers, which could adversely affect our operating results. Any changes in charter rates for LNG or LPG carriers, shuttle tankers or FSO or FPSO units could also adversely affect redeployment opportunities for those vessels.

Our ability to recharter our conventional oil and product tankers following expiration of existing time-charter contracts and the rates payable upon any renewal or replacement charters will depend upon, among other things, the state of the conventional tanker market. Conventional oil and product tanker trades are highly competitive and have experienced significant fluctuations in charter rates based on, among other things, oil, refined petroleum product and vessel demand. For example, an oversupply of conventional oil tankers can significantly reduce their charter rates. There also exists some volatility in charter rates for LNG and LPG carriers, shuttle tankers and FSO and FPSO units, which could also adversely affect redeployment opportunities for those vessels. As of December 31, 2009, we have 23 time-charter contracts covering our conventional tankers two time-charters covering our FPSO units, 10 time-charters covering our shuttle tankers and one time-charter covering an LNG carrier that expire during the next three years.

Over time, the value of our vessels may decline, which could adversely affect our operating results.

Vessel values for oil and product tankers, LNG and LPG carriers and FPSO and FSO units can fluctuate substantially over time due to a number of different factors. Vessel values may decline substantially from existing levels. If operation of a vessel is not profitable, or if we cannot re-deploy a chartered vessel at attractive rates upon charter termination, rather than continue to incur costs to maintain and finance the vessel, we may seek to dispose of it. Our inability to dispose of the vessel at a reasonable value could result in a loss on its sale and adversely affect our results of operations and financial condition. Further, if we determine at any time that a vessel's future useful life and earnings require us to impair its value on our financial statements, we may need to recognize a significant charge against our earnings.

Our growth depends on continued growth in demand for LNG and LPG and LNG and LPG shipping as well as offshore oil transportation, production, processing and storage services.

A significant portion of our growth strategy focuses on continued expansion in the LNG and LPG shipping sectors and on expansion in the shuttle tanker, FSO and FPSO sectors.

Expansion of the LNG and LPG shipping sectors depends on continued growth in world and regional demand for LNG and LPG and LNG and LPG shipping and the supply of LNG and LPG. Demand for LNG and LPG and LNG and LPG shipping could be negatively affected by a number of factors, such as increases in the costs of natural gas derived from LNG relative to the cost of natural gas generally, increases in the production of natural gas in areas

linked by pipelines to consuming areas, increases in the price of LNG and LPG relative to other energy sources, the availability of new energy sources, and negative global or regional economic or political conditions. Reduced demand for LNG or LPG and LNG or LPG shipping would have a material adverse effect on future growth of our liquefied gas segment, and could harm that segment's results. Growth of the LNG and LPG markets may be limited by infrastructure constraints and community and environmental group resistance to new LNG and LPG infrastructure over concerns about the environment, safety and terrorism. If the LNG or LPG supply chain is disrupted or does not continue to grow, or if a significant LNG or LPG explosion, spill or similar incident occurs, it could have a material adverse effect on growth and could harm our business, results of operations and financial condition.

Expansion of the shuttle tanker, FSO and FPSO sectors depends on continued growth in world and regional demand for these offshore services, which could be negatively affected by a number of factors, such as:

- decreases in the actual or projected price of oil, which could lead to a reduction in or termination of production of oil at certain fields we service or a reduction in exploration for or development of new offshore oil fields;

- increases in the production of oil in areas linked by pipelines to consuming areas, the extension of existing, or the development of new, pipeline systems in markets we may serve, or the conversion of existing non-oil pipelines to oil pipelines in those markets;

- decreases in the consumption of oil due to increases in its price relative to other energy sources, other factors making consumption of oil less attractive or energy conservation measures;

Table of Contents

availability of new, alternative energy sources; and negative global or regional economic or political conditions, particularly in oil consuming regions, which could reduce energy consumption or its growth.

Reduced demand for offshore marine transportation, production, processing or storage services would have a material adverse effect on our future growth and could harm our business, results of operations and financial condition.

The intense competition in our markets may lead to reduced profitability or expansion opportunities.

Our vessels operate in highly competitive markets. Competition arises primarily from other vessel owners, including major oil companies and independent companies. We also compete with owners of other size vessels. Our market share is insufficient to enforce any degree of pricing discipline in the markets in which we operate and our competitive position may erode in the future. Any new markets that we enter could include participants that have greater financial strength and capital resources than we have. We may not be successful in entering new markets.

One of our objectives is to enter into additional long-term, fixed-rate time charters for our LNG and LPG carriers, shuttle tankers, FSO and FPSO units. The process of obtaining new long-term time charters is highly competitive and generally involves an intensive screening process and competitive bids, and often extends for several months. We expect substantial competition for providing services for potential LNG, LPG, shuttle tanker, FSO and FPSO projects from a number of experienced companies, including state-sponsored entities and major energy companies. Some of these competitors have greater experience in these markets and greater financial resources than do we. We anticipate that an increasing number of marine transportation companies, including many with strong reputations and extensive resources and experience will enter the LNG and LPG transportation, shuttle tanker, FSO and FPSO sectors. This increased competition may cause greater price competition for time charters. As a result of these factors, we may be unable to expand our relationships with existing customers or to obtain new customers on a profitable basis, if at all, which would have a material adverse effect on our business, results of operations and financial condition.

The loss of any key customer or its inability to pay for our services could result in a significant loss of revenue in a given period.

We have derived, and believe that we will continue to derive, a significant portion of our revenues from a limited number of customers. One customer accounted for 16% or \$346.6 million, of our consolidated revenues during 2009 (14% or \$443.5 million 2008 and 20% or \$472.3 million 2007). The loss of any significant customer or a substantial decline in the amount of services requested by a significant customer, or the inability of a significant customer to pay for our services, could have a material adverse effect on our business, financial condition and results of operations.

A recurrence of recent adverse economic conditions, including disruptions in the global credit markets, could adversely affect our results of operations.

The recent economic downturn and financial crisis in the global markets produced illiquidity in the capital markets, market volatility, heightened exposure to interest rate and credit risks and reduced access to capital markets in 2008 and the first half of 2009. We may face restricted access to the capital markets or secured debt lenders, such as our revolving credit facilities in the future. The decreased access to such resources could have a material adverse effect on our business, financial condition and results of operations.

Our operations are subject to substantial environmental and other regulations, which may significantly increase our expenses.

Our operations are affected by extensive and changing international, national and local environmental protection laws, regulations, treaties and conventions in force in international waters, the jurisdictional waters of the countries in which our vessels operate, as well as the countries of our vessels' registration, including those governing oil spills, discharges to air and water, and the handling and disposal of hazardous substances and wastes. Many of these requirements are designed to reduce the risk of oil spills and other pollution. In addition, we believe that the heightened environmental, quality and security concerns of insurance underwriters, regulators and charterers will lead to additional regulatory requirements, including enhanced risk assessment and security requirements and greater inspection and safety requirements on vessels. We expect to incur substantial expenses in complying with these laws and regulations, including expenses for vessel modifications and changes in operating procedures.

These requirements can affect the resale value or useful lives of our vessels, require a reduction in cargo capacity, ship modifications or operational changes or restrictions, lead to decreased availability of insurance coverage for

environmental matters or result in the denial of access to certain jurisdictional waters or ports, or detention in, certain ports. Under local, national and foreign laws, as well as international treaties and conventions, we could incur material liabilities, including cleanup obligations, in the event that there is a release of petroleum or other hazardous substances from our vessels or otherwise in connection with our operations. We could also become subject to personal injury or property damage claims relating to the release of or exposure to hazardous materials associated with our operations. In addition, failure to comply with applicable laws and regulations may result in administrative and civil penalties, criminal sanctions or the suspension or termination of our operations, including, in certain instances, seizure or detention of our vessels. For further information about regulations affecting our business and related requirements on us, please read Item 4. Information on the Company C. Regulations.

We may be unable to make or realize expected benefits from acquisitions, and implementing our strategy of growth through acquisitions may harm our financial condition and performance.

A principal component of our strategy is to continue to grow by expanding our business both in the geographic areas and markets where we have historically focused as well as into new geographic areas, market segments and services. We may not be successful in expanding our operations and any expansion may not be profitable. Our strategy of growth through acquisitions involves business risks commonly encountered in acquisitions of companies, including:

- interruption of, or loss of momentum in, the activities of one or more of an acquired company's businesses and our businesses;
- additional demands on members of our senior management while integrating acquired businesses, which would decrease the time they have to manage our existing business, service existing customers and attract new customers;
- difficulties in integrating the operations, personnel and business culture of acquired companies;

Table of Contents

difficulties of coordinating and managing geographically separate organizations;
adverse effects on relationships with our existing suppliers and customers, and those of the companies acquired;
difficulties entering geographic markets or new market segments in which we have no or limited experience;
and
loss of key officers and employees of acquired companies.

Acquisitions may not be profitable to us at the time of their completion and may not generate revenues sufficient to justify our investment. In addition, our acquisition growth strategy exposes us to risks that may harm our results of operations and financial condition, including risks that we may: fail to realize anticipated benefits, such as cost-savings, revenue and cash flow enhancements and earnings accretion; decrease our liquidity by using a significant portion of our available cash or borrowing capacity to finance acquisitions; incur additional indebtedness, which may result in significantly increased interest expense or financial leverage, or issue additional equity securities to finance acquisitions, which may result in significant shareholder dilution; incur or assume unanticipated liabilities, losses or costs associated with the business acquired; or incur other significant charges, such as impairment of goodwill or other intangible assets, asset devaluation or restructuring charges.

The strain that growth places upon our systems and management resources may harm our business.

Our growth has placed and we believe it will continue to place significant demands on our management, operational and financial resources. As we expand our operations, we must effectively manage and monitor operations, control costs and maintain quality and control in geographically dispersed markets. In addition, our three publicly-traded subsidiaries have increased our complexity and placed additional demands on our management. Our future growth and financial performance will also depend on our ability to recruit, train, manage and motivate our employees to support our expanded operations and continue to improve our customer support, financial controls and information systems. These efforts may not be successful and may not occur in a timely or efficient manner. Failure to effectively manage our growth and the system and procedural transitions required by expansion in a cost-effective manner could have a material adverse affect on our business.

Our insurance may not be sufficient to cover losses that may occur to our property or as a result of our operations.

The operation of oil and product tankers, LNG and LPG carriers, FSO and FPSO units is inherently risky. Although we carry hull and machinery (marine and war risk) and protection and indemnity insurance, all risks may not be adequately insured against, and any particular claim may not be paid. In addition, we do not generally carry insurance on our vessels covering the loss of revenues resulting from vessel off-hire time based on its cost compared to our off-hire experience. Any significant off-hire time of our vessels could harm our business, operating results and financial condition. Any claims relating to our operations covered by insurance would be subject to deductibles, and since it is possible that a large number of claims may be brought, the aggregate amount of these deductibles could be material. Certain of our insurance coverage is maintained through mutual protection and indemnity associations and as a member of such associations we may be required to make additional payments over and above budgeted premiums if member claims exceed association reserves.

We may be unable to procure adequate insurance coverage at commercially reasonable rates in the future. For example, more stringent environmental regulations have led in the past to increased costs for, and in the future may result in the lack of availability of, insurance against risks of environmental damage or pollution. A catastrophic oil spill or marine disaster could result in losses that exceed our insurance coverage, which could harm our business, financial condition and operating results. Any uninsured or underinsured loss could harm our business and financial condition. In addition, our insurance may be voidable by the insurers as a result of certain of our actions, such as our ships failing to maintain certification with applicable maritime self-regulatory organizations.

Changes in the insurance markets attributable to terrorist attacks may also make certain types of insurance more difficult for us to obtain. In addition, the insurance that may be available may be significantly more expensive than our existing coverage.

Marine transportation is inherently risky, and an incident involving significant loss of or environmental contamination by any of our vessels could harm our reputation and business.

Our vessels and their cargoes are at risk of being damaged or lost because of events such as:
marine disaster;

bad weather;
mechanical failures;
grounding, fire, explosions and collisions;
piracy;
human error; and
war and terrorism.

An accident involving any of our vessels could result in any of the following:

death or injury to persons, loss of property or environmental damage or pollution;
delays in the delivery of cargo;
loss of revenues from or termination of charter contracts;
governmental fines, penalties or restrictions on conducting business;

Table of Contents

higher insurance rates; and

damage to our reputation and customer relationships generally.

Any of these results could have a material adverse effect on our business, financial condition and operating results.

Our operating results are subject to seasonal fluctuations.

We operate our conventional tankers in markets that have historically exhibited seasonal variations in demand and, therefore, in charter rates. This seasonality may result in quarter-to-quarter volatility in our results of operations. Tanker markets are typically stronger in the winter months as a result of increased oil consumption in the northern hemisphere. In addition, unpredictable weather patterns in these months tend to disrupt vessel scheduling, which historically has increased oil price volatility and oil trading activities in the winter months. As a result, our revenues have historically been weaker during the fiscal quarters ended June 30 and September 30, and stronger in our fiscal quarters ended March 31 and December 31.

Due to harsh winter weather conditions, oil field operators in the North Sea typically schedule oil platform and other infrastructure repairs and maintenance during the summer months. Because the North Sea is our primary existing offshore oil market, this seasonal repair and maintenance activity contributes to quarter-to-quarter volatility in our results of operations, as oil production typically is lower in the fiscal quarters ended June 30 and September 30 in this region compared with production in the fiscal quarters ended March 31 and December 31. Because a significant portion of our North Sea shuttle tankers operate under contracts of affreightment, under which revenue is based on the volume of oil transported, the results of our shuttle tanker operations in the North Sea under these contracts generally reflect this seasonal production pattern. When we redeploy affected shuttle tankers as conventional oil tankers while platform maintenance and repairs are conducted, the overall financial results for our North Sea shuttle tanker operations may be negatively affected if the rates in the conventional oil tanker markets are lower than the contract of affreightment rates. In addition, we seek to coordinate some of the general drydocking schedule of our fleet with this seasonality, which may result in lower revenues and increased drydocking expenses during the summer months.

We expend substantial sums during construction of newbuildings and the conversion of tankers to FPSOs or FSOs without earning revenue and without assurance that they will be completed.

We are typically required to expend substantial sums as progress payments during construction of a newbuilding, but we do not derive any revenue from the vessel until after its delivery. In addition, under some of our time charters if our delivery of a vessel to a customer is delayed, we may be required to pay liquidated damages in amounts equal to or, under some charters, almost double the hire rate during the delay. For prolonged delays, the customer may terminate the time charter and, in addition to the resulting loss of revenues, we may be responsible for additional substantial liquidated charges.

Substantially all of our newbuilding financing commitments have been pre-arranged. However, if we were unable to obtain financing required to complete payments on any of our newbuilding orders, we could effectively forfeit all or a portion of the progress payments previously made. As of December 31, 2009, we had 11 newbuildings on order with deliveries scheduled between June 2010 and January 2012. As of December 31, 2009, progress payments made towards these newbuildings, excluding payments made by our joint venture partners, totaled \$183.1 million.

In addition, conversion of tankers to FPSO and FSO units expose us to a numbers of risks, including lack of shipyard capacity and the difficulty of completing the conversion in a timely and cost effective manner. During conversion of a vessel, we do not earn revenue from it. In addition, conversion projects may not be successful.

We make substantial capital expenditures to expand the size of our fleet. Depending on whether we finance our expenditures through cash from operations or by issuing debt or equity securities, our financial leverage could increase or our stockholders could be diluted.

We regularly evaluate and pursue opportunities to provide the marine transportation requirements for various projects, and we have currently submitted bids to provide transportation solutions for LNG and LPG projects. We may submit additional bids from time to time. The award process relating to LNG and LPG transportation opportunities typically involves various stages and takes several months to complete. If we bid on and are awarded contracts relating to any LNG and LPG project, we will need to incur significant capital expenditures to build the related LNG and LPG carriers.

To fund the remaining portion of existing or future capital expenditures, we will be required to use cash from operations or incur borrowings or raise capital through the sale of debt or additional equity securities. Our ability to

obtain bank financing or to access the capital markets for future offerings may be limited by our financial condition at the time of any such financing or offering as well as by adverse market conditions resulting from, among other things, general economic conditions and contingencies and uncertainties that are beyond our control. Our failure to obtain the funds for necessary future capital expenditures could have a material adverse effect on our business, results of operations and financial condition. Even if we are successful in obtaining necessary funds, incurring additional debt may significantly increase our interest expense and financial leverage, which could limit our financial flexibility and ability to pursue other business opportunities. Issuing additional equity securities may result in significant stockholder dilution and would increase the aggregate amount of cash required to pay quarterly dividends.

Exposure to currency exchange rate and interest rate fluctuations results in fluctuations in our cash flows and operating results.

Substantially all of our revenues are earned in U.S. Dollars, although we are paid in Euros, Australian Dollars, Norwegian Kroner and British Pounds under some of our charters. A portion of our operating costs are incurred in currencies other than U.S. Dollars. This partial mismatch in operating revenues and expenses leads to fluctuations in net income due to changes in the value of the U.S. dollar relative to other currencies, in particular the Norwegian Kroner, the Australian Dollar, the Canadian Dollar, the Singapore Dollar, the Japanese Yen, the British Pound and the Euro. We also make payments under two Euro-denominated term loans. If the amount of these and other Euro-denominated obligations exceeds our Euro-denominated revenues, we must convert other currencies, primarily the U.S. Dollar, into Euros. An increase in the strength of the Euro relative to the U.S. Dollar would require us to convert more U.S. Dollars to Euros to satisfy those obligations.

Table of Contents

Because we report our operating results in U.S. Dollars, changes in the value of the U.S. Dollar relative to other currencies also result in fluctuations of our reported revenues and earnings. Under U.S. accounting guidelines, all foreign currency-denominated monetary assets and liabilities, such as cash and cash equivalents, accounts receivable, restricted cash, accounts payable, long-term debt and capital lease obligations, are revalued and reported based on the prevailing exchange rate at the end of the period. This revaluation historically has caused us to report significant non-monetary foreign currency exchange gains or losses each period. For 2009 and 2008, we had foreign exchange (losses) gains of \$(20.9) million and \$24.7 million, respectively. The primary source of these gains and losses is our Euro-denominated term loans.

Many seafaring employees are covered by collective bargaining agreements and the failure to renew those agreements or any future labor agreements may disrupt operations and adversely affect our cash flows.

A significant portion of our seafarers are employed under collective bargaining agreements. We may become subject to additional labor agreements in the future. We may suffer to labor disruptions if relationships deteriorate with the seafarers or the unions that represent them. Our collective bargaining agreements may not prevent labor disruptions, particularly when the agreements are being renegotiated. Salaries are typically renegotiated annually or bi-annually for seafarers and annually for onshore operational staff and may increase our cost of operation. Any labor disruptions could harm our operations and could have a material adverse effect on our business, results of operations and financial condition.

We may be unable to attract and retain qualified, skilled employees or crew necessary to operate our business.

Our success depends in large part on our ability to attract and retain highly skilled and qualified personnel. In crewing our vessels, we require technically skilled employees with specialized training who can perform physically demanding work. Competition to attract and retain qualified crew members is intense. If crew costs increase, and we are not able to increase our rates to customers to compensate for any crew cost increases, our financial condition and results of operations may be adversely affected. Any inability we experience in the future to hire, train and retain a sufficient number of qualified employees could impair our ability to manage, maintain and grow our business.

Terrorist attacks, piracy, increased hostilities or war could lead to further economic instability, increased costs and disruption of business.

Terrorist attacks, piracy and the current conflicts in Iraq and Afghanistan and other current and future conflicts, may adversely affect our business, operating results, financial condition, and ability to raise capital and future growth. Continuing hostilities in the Middle East may lead to additional armed conflicts or to further acts of terrorism and civil disturbance in the United States or elsewhere, which may contribute further to economic instability and disruption of oil production and distribution, which could result in reduced demand for our services.

In addition, oil facilities, shipyards, vessels, pipelines and oil fields could be targets of future terrorist attacks and our vessels could be targets of pirates or hijackers. Any such attacks could lead to, among other things, bodily injury or loss of life, vessel or other property damage, increased vessel operational costs, including insurance costs, and the inability to transport oil to or from certain locations. Terrorist attacks, war, piracy, hijacking or other events beyond our control that adversely affect the distribution, production or transportation of oil to be shipped by us could entitle customers to terminate the charters and impact the use of shuttle tankers under contracts of affreightment, which would harm our cash flow and business.

Acts of piracy on ocean-going vessels have recently increased in frequency, which could adversely affect our business.

Acts of piracy have historically affected ocean-going vessels trading in regions of the world such as the South China Sea and in the Gulf of Aden off the coast of Somalia. Throughout 2009, the frequency of piracy incidents increased significantly, particularly in the Gulf of Aden and Indian Ocean. If these piracy attacks result in regions in which our vessels are deployed being named on the Joint War Committee Listed Areas, war risk insurance premiums payable for such coverage can increase significantly and such insurance coverage may be more difficult to obtain. The cost of these premium increases is usually passed on to our customers. In addition, crew costs, including costs which may be incurred to the extent we employ onboard security guards, could increase in such circumstances. We may not be adequately insured to cover losses from these incidents, which could have a material adverse effect on us. In addition, detention hijacking as a result of an act of piracy against our vessels, or an increase in cost or unavailability of

insurance for our vessels, could have a material adverse impact on our business, financial condition and results of operations.

Our substantial operations outside the United States expose us to political, governmental and economic instability, which could harm our operations.

Because our operations are primarily conducted outside of the United States, they may be affected by economic, political and governmental conditions in the countries where we engage in business or where our vessels are registered. Any disruption caused by these factors could harm our business, including by reducing the levels of oil exploration, development and production activities in these areas. We derive some of our revenues from shipping oil from politically unstable regions. Conflicts in these regions have included attacks on ships and other efforts to disrupt shipping. Hostilities or other political instability in regions where we operate or where we may operate could have a material adverse effect on the growth of our business, results of operations and financial condition and ability to make cash distributions. In addition, tariffs, trade embargoes and other economic sanctions by the United States or other countries against countries in Southeast Asia or elsewhere as a result of terrorist attacks, hostilities or otherwise may limit trading activities with those countries, which could also harm our business and ability to make cash distributions. Finally, a government could requisition one or more of our vessels, which is most likely during war or national emergency. Any such requisition would cause a loss of the vessel and could harm our cash flow and financial results.

Maritime claimants could arrest our vessels, which could interrupt our cash flow.

Crew members, suppliers of goods and services to a vessel, shippers of cargo and other parties may be entitled to a maritime lien against that vessel for unsatisfied debts, claims or damages. In many jurisdictions, a maritime lienholder may enforce its lien by arresting a vessel through foreclosure proceedings. The arrest or attachment of one or more of our vessels could interrupt our cash flow and require us to pay large sums of funds to have the arrest or attachment lifted. In addition, in some jurisdictions, such as South Africa, under the sister ship theory of liability, a claimant may arrest both the vessel that is subject to the claimant's maritime lien and any associated vessel, which is any vessel owned or controlled by the same owner. Claimants could try to assert sister ship liability against one vessel in our fleet for claims relating to another of our ships.

Table of Contents***Declining market values of our vessels could adversely affect our liquidity and result in breaches of our financing agreements.***

Market values of vessels fluctuate depending upon general economic and market conditions affecting relevant markets and industries and competition from other shipping companies and other modes of transportation. In addition, as vessels become older, they generally decline in value. Declining vessel values of our tankers could adversely affect our liquidity by limiting our ability to raise cash by refinancing vessels. Declining vessel values could also result in a breach of loan covenants and events of default under certain of our credit facilities that require us to maintain certain loan-to-value ratios. If we are unable to pledge additional collateral in the event of a decline in vessel values, the lenders under these facilities could accelerate our debt and foreclose on our vessels pledged as collateral for the loans. As of December 31, 2009, the total outstanding debt under credit facilities with this type of covenant tied to conventional tanker values was \$211.8 million.

Climate change and greenhouse gas restrictions may adversely impact our operations and markets.

Due to concern over the risk of climate change, a number of countries have adopted, or are considering the adoption of, regulatory frameworks to reduce greenhouse gas emissions. These regulatory measures include, among others, adoption of cap and trade regimes, carbon taxes, increased efficiency standards, and incentives or mandates for renewable energy. Compliance with changes in laws, regulations and obligations relating to climate change could increase our costs related to operating and maintaining our vessels and require us to install new emission controls, acquire allowances or pay taxes related to our greenhouse gas emissions, or administer and manage a greenhouse gas emissions program. Revenue generation and strategic growth opportunities may also be adversely affected.

Adverse effects upon the oil and gas industry relating to climate change may also adversely affect demand for our services. Although we do not expect that demand for oil and gas will lessen dramatically over the short term, in the long term climate change may reduce the demand for oil and gas or increased regulation of greenhouse gases may create greater incentives for use of alternative energy sources. Any long-term material adverse effect on the oil and gas industry could have a significant financial and operational adverse impact on our business that we cannot predict with certainty at this time.

We have substantial debt levels and may incur additional debt.

As of December 31, 2009, our consolidated debt and capital lease obligations totaled \$5.2 billion and we had the capacity to borrow an additional \$1.5 billion under our credit facilities. These facilities may be used by us for general corporate purposes. Our consolidated debt and capital lease obligations could increase substantially. We will continue to have the ability to incur additional debt, subject to limitations in our credit facilities. Our level of debt could have important consequences to us, including:

- our ability to obtain additional financing, if necessary, for working capital, capital expenditures, acquisitions or other purposes may be impaired or such financing may not be available on favorable terms;
- we will need a substantial portion of our cash flow to make principal and interest payments on our debt, reducing the funds that would otherwise be available for operations, future business opportunities and dividends to stockholders;
- our debt level may make us more vulnerable than our competitors with less debt to competitive pressures or a downturn in our industry or the economy generally; and
- our debt level may limit our flexibility in obtaining additional financing, pursuing other business opportunities and responding to changing business and economic conditions.

Our ability to service our debt will depend on certain financial, business and other factors, many of which are beyond our control.

Our ability to service our debt will depend upon, among other things, our future financial and operating performance, which will be affected by prevailing economic conditions and financial, business, regulatory and other factors, many of which are beyond our control. In addition, we rely on distributions and other intercompany cash flows from our subsidiaries to repay our obligations. Financing arrangements between some of our subsidiaries and their respective lenders contain restrictions on distributions from such subsidiaries.

If we are unable to generate sufficient cash flow to service our debt service requirements, we may be forced to take actions such as:

restructuring or refinancing our debt;
seeking additional debt or equity capital;
seeking bankruptcy protection;
reducing distributions;
reducing or delaying our business activities, acquisitions, investments or capital expenditures; or
selling assets.

Such measures might not be successful and might not enable us to service our debt. In addition, any such financing, refinancing or sale of assets might not be available on economically favorable terms. In addition, our credit agreements and the indenture governing the notes may restrict our ability to implement some of these measures.

Table of Contents***Financing agreements containing operating and financial restrictions may restrict our business and financing activities.***

The operating and financial restrictions and covenants in our revolving credit facilities, term loans and in any of our future financing agreements could adversely affect our ability to finance future operations or capital needs or to pursue and expand our business activities. For example, these financing arrangements restrict our ability to:

- pay dividends;
- incur or guarantee indebtedness;
- change ownership or structure, including mergers, consolidations, liquidations and dissolutions;
- grant liens on our assets;
- sell, transfer, assign or convey assets;
- make certain investments; and
- enter into a new line of business.

Our ability to comply with covenants and restrictions contained in debt instruments may be affected by events beyond our control, including prevailing economic, financial and industry conditions. If market or other economic conditions deteriorate, we may fail to comply with these covenants. If we breach any of the restrictions, covenants, ratios or tests in the financing agreements, our obligations may become immediately due and payable, and the lenders' commitment under our credit facilities, if any, to make further loans may terminate. A default under financing agreements could also result in foreclosure on any of our vessels and other assets securing related loans.

U.S. tax authorities could treat us as a passive foreign investment company, which could have adverse U.S. federal income tax consequences to U.S. holders.

A foreign entity taxed as a corporation for U.S. federal income tax purposes will be treated as a passive foreign investment company (or PFIC) for U.S. federal income tax purposes if at least 75.0 percent of its gross income for any taxable year consists of certain types of passive income, or at least 50.0 percent of the average value of the entity's assets produce or are held for the production of those types of passive income. For purposes of these tests, passive income includes dividends, interest, and gains from the sale or exchange of investment property and rents and royalties, other than rents and royalties that are received from unrelated parties in connection with the active conduct of a trade or business. By contrast, income derived from the performance of services does not constitute passive income.

There are legal uncertainties involved in determining whether the income derived from our time chartering activities constitutes rental income or income derived from the performance of services, including the decision in *Tidewater Inc. v. United States*, 565 F.3d 299 (5th Cir. 2009), which held that income derived from certain time-chartering activities should be treated as rental income rather than services income for purposes of a foreign sales corporation provision of the U.S. Internal Revenue Code of 1986, as amended (or the Code), and a recent unofficial IRS pronouncement issued to provide guidance to IRS field employees and examiners, which cites the *Tidewater* decision favorably in support of the conclusion that income derived by foreign taxpayers from time-chartering vessels engaged in the exploration for, or exploitation of, natural resources on the Outer Continental Shelf in the Gulf of Mexico is characterized as leasing or rental income for purposes of the income sourcing provisions of the Code. However, we believe that the nature of our time chartering activities, as well as our time charter contracts, differ in certain material respects from those at issue in *Tidewater*. Consequently, based on our current assets and operations, we intend to take the position that we are not now and have never been a PFIC. No assurance can be given, however, that the IRS or a court of law, will accept our position, or that we would not constitute a PFIC for any future taxable year if there were to be changes in our assets, income or operations.

If the IRS were to determine that we are or have been a PFIC for any taxable year, U.S. holders of our common stock will face adverse U.S. federal income tax consequences. Under the PFIC rules, unless those U.S. holders timely make certain elections available under the Code, such holders would be liable to pay tax at ordinary income tax rates plus interest upon certain distributions and upon any gain from the disposition of our common stock, as if such distribution or gain had been recognized ratably over the U.S. holder's holding period. Please read Item 10. Additional Information-Material U.S. Federal Income Tax Considerations United States Federal Income Taxation of U.S. Holders Consequences of Possible PFIC Classification.

The preferential tax rates applicable to qualified dividend income are temporary, and the absence of legislation extending the term would cause our dividends to be taxed at ordinary graduated tax rates.

Certain of our distributions may be treated as qualified dividend income eligible for preferential rates of U.S. federal income tax to U.S. individual stockholders (and certain other U.S. stockholders). In the absence of legislation extending the term for these preferential tax rates or providing for some other treatment, all dividends received by such U.S. taxpayers in tax years after December 31, 2010 or later will be taxed at ordinary graduated tax rates. Please read Item 10. Additional Information Material U.S. Federal Income Tax Considerations United States Federal Income Taxation of U.S. Holders Distributions.

Changes in the ownership of our stock may cause us and certain of our subsidiaries to be unable to claim an exemption from United States tax on our United States source income.

Changes in the ownership of our stock may cause us to be unable to claim an exemption from U.S. federal income tax under Section 883 of the United States Internal Revenue Code (or the *Code*). If we were not exempt from tax under Section 883 of the Code, we or our subsidiaries that are currently claiming exemptions will be subject to U.S. federal income tax on shipping income attributable to our subsidiaries transportation of cargoes to or from the U.S. to the extent it is treated as derived from U.S. sources. Certain of our subsidiaries currently are unable to claim this exemption and, as a result, we estimate that they will be subject to less than \$500,000 of U.S. federal income tax annually. To the extent we or our other subsidiaries are subject to U.S. federal income tax on shipping income from U.S. sources, our net income and cash flow will be reduced by the amount of such tax. We cannot give any assurance that future changes and shifts in ownership of our stock will not preclude us or our other subsidiaries from being able to satisfy an exemption under Section 883. Please read Item 4. Information on the Company Taxation of the Company United States Taxation.

Table of Contents***We may be subject to taxes, which could affect our operating results.***

We or our subsidiaries are subject to tax in certain jurisdictions in which we or our subsidiaries are organized, own assets or have operations, which reduces our operating results. In computing our tax obligations in these jurisdictions, we are required to take various tax accounting and reporting positions on matters that are not entirely free from doubt and for which we have not received rulings from the governing authorities. We cannot assure you that upon review of these positions, the applicable authorities will agree with our positions. A successful challenge by a tax authority could result in additional tax imposed on us or our subsidiaries, further reducing our operating results. In addition, changes in our operations or ownership could result in additional tax being imposed on us or on our subsidiaries in jurisdictions in which operations are conducted. Also, jurisdictions in which we or our subsidiaries are organized, own assets or have operations may change their tax laws, or we may enter into new business transactions relating to such jurisdictions, which could result in increased tax liability and reduce our operating results.

Item 4. Information on the Company**A. Overview, History and Development****Overview**

We are a leading provider of international crude oil and petroleum product transportation services. Over the past decade, we have undergone a major transformation from being primarily an owner of ships in the cyclical spot tanker business to being a growth-oriented asset manager in the Marine Midstream sector. This transformation has included our expansion into the liquefied natural gas (or *LNG*) and liquefied petroleum gas (or *LPG*) shipping sectors through our publicly-listed subsidiary Teekay LNG Partners L.P. (NYSE: TGP) (or *Teekay LNG*), further growth of our operations in the offshore production, storage and transportation sector through our publicly-listed subsidiary Teekay Offshore Partners L.P. (NYSE: TOO) (or *Teekay Offshore*), through our 100% ownership interest in Teekay Petrojarl AS, and expansion of our conventional tanker business through our publicly-listed subsidiary, Teekay Tankers Ltd. (NYSE: TNK) (or *Teekay Tankers*). With an owned and in-chartered fleet of over 150 vessels, offices in 16 countries and approximately 6,300 seagoing and shore-based employees, Teekay provides comprehensive marine services to the world's leading oil and gas companies, helping them seamlessly link their upstream energy production to their downstream processing operations. Our goal is to create the industry's leading asset management company, focused on the Marine Midstream sector.

Our shuttle tanker and FSO segment and FPSO segment includes our shuttle tanker operations, floating storage and off-take (or *FSO*) units, and our floating production, storage and offloading (or *FPSO*) units, which primarily operate under long-term fixed-rate contracts. As of December 31, 2009, our shuttle tanker fleet, including newbuildings on order, had a total cargo capacity of approximately 4.7 million deadweight tones (or *dwt*), which represented more than 50% of the total world shuttle tanker fleet. Please read Item 4 Information on the Company: Our Fleet.

Our liquefied gas segment includes our LNG and LPG carriers. Substantially all of our LNG and LPG carriers are subject to long-term, fixed-rate time-charter contracts. As of December 31, 2009, this fleet, including newbuildings on order, had a total cargo carrying capacity of approximately 3.1 million cubic meters. Please read Item 4 Information on the Company: Our Fleet.

Our conventional tanker segment includes our conventional crude oil tankers and product carriers. In order to provide investors with additional information about our conventional tanker segment, we have divided this operating segment into the fixed-rate tanker segment and the spot tanker segment. As of December 31, 2009, our Aframax tankers in the spot tanker sub-segment, which had a total cargo capacity of approximately 4.4 million dwt, represented approximately 7% of the total tonnage of the world Aframax fleet. Please read Item 4 Information on the Company: Our Fleet.

Our fixed-rate tanker segment includes our conventional crude oil and product tankers on long-term fixed-rate time-charter contracts. Please read Item 4 Information on the Company: Our Fleet .

The Teekay organization was founded in 1973. We are incorporated under the laws of the Republic of The Marshall Islands as Teekay Corporation and maintain our principal executive headquarters at 4th floor, Belvedere Building, 69 Pitts Bay Road, Hamilton, HM 08, Bermuda. Our telephone number at such address is (441) 298-2530. Our principal operating office is located at Suite 2000, Bentall 5, 550 Burrard Street, Vancouver, British Columbia, Canada, V6C 2K2. Our telephone number at such address is (604) 683-3529.

Recent Business Acquisitions

Acquisition of 50% of OMI Corporation

On June 8, 2007, we and A/S Dampskibsselskabet TORM (or *TORM*) acquired, through a jointly-owned subsidiary all of the outstanding shares of OMI Corporation (or *OMI*). Our 50% share of the acquisition price was approximately \$1.1 billion. We funded our portion of the acquisition with a combination of cash and borrowings under existing revolving credit facilities and a new \$700 million credit facility.

OMI was an international owner and operator of tankers, with a total fleet of approximately 3.5 million dwt comprised of 13 Suezmax tankers (seven of which it owned and six of which were chartered-in) and 32 product tankers, 28 of which it owned and four of which were chartered-in. In addition, OMI had two product tankers under construction, which were delivered in 2009.

Acquisition of Petrojarl ASA

During 2006, we acquired 64.7% of the outstanding shares of Petrojarl ASA (or *Petrojarl*), which was listed on the Oslo Stock Exchange, for \$536.8 million. Petrojarl is a leading independent operator of FPSO units in the North Sea. On December 1, 2006, we renamed the company Teekay Petrojarl AS (or *Teekay Petrojarl*). We financed our acquisition of Petrojarl through a combination of bank financing and cash balances. In June and July 2008, we acquired the remaining 35.3% interest (26.5 million common shares) in Teekay Petrojarl for a total purchase price of \$304.9 million. As a result of these transactions, we own 100% of Teekay Petrojarl.

Table of Contents**Equity Offerings by Subsidiaries***Equity Offerings by Teekay Tankers Ltd.*

On December 18, 2007, our subsidiary Teekay Tankers completed its initial public offering of 11.5 million shares of its Class A common stock at a price of \$19.50 per share for net proceeds of approximately \$208.0 million. We owned the remaining capital stock of Teekay Tankers, including its outstanding shares of Class B common stock, which entitle the holders to five votes per share, subject to a 49% aggregate Class B Common Stock voting power maximum. On June 24, 2009, Teekay Tankers completed a follow-on public offering of 7.0 million common shares at a price of \$9.80 per share, for gross proceeds of \$68.6 million. As a result of this offering, our ownership of Teekay Tankers was reduced from 54.0% to 42.2%. Teekay Tankers used the total net offering proceeds of approximately \$65.6 million to acquire a 2003-built Suezmax tanker from Teekay for \$57.0 million and to repay a portion of its outstanding debt under its revolving credit facility.

As of December 31, 2009, Teekay Tankers owned nine Aframax tankers, which it acquired from Teekay upon the closing of the initial public offering, and three Suezmax tankers it acquired from Teekay in April 2008 and June 2009. Teekay Tankers is expected to grow through the acquisition of additional crude oil and product tanker assets from third parties and from us. Please read Item 18 - Financial Statements: Note 5 Equity Offerings by Subsidiaries.

During April 2010, Teekay Tankers completed a follow-on public offering of 7.7 million common shares at a price of \$12.25 per share, for gross proceeds of \$94.3 million. The underwriters subsequently exercised their over-allotment option to purchase an additional 1,079,500 common shares, providing additional gross proceeds of \$13.2 million. Teekay purchased 2,612,244 unregistered common shares at the April 2010 offering price. As a result, our ownership of Teekay Tankers has been reduced from 42.2% to 37.1%. We maintain voting control of Teekay Tankers and continue to consolidate this subsidiary. Teekay Tankers used the net offering proceeds and borrowings under its revolving credit facility to acquire three oil tankers from Teekay. Please read Item 18 Financial Statements: Note 24(c) Subsequent Events.

Equity Offerings by Teekay Offshore Partners L.P.

On December 19, 2006, our subsidiary Teekay Offshore sold as part of its initial public offering 8.1 million of its common units, representing limited partner interests, at \$21.00 per unit for net proceeds of \$155.3 million.

During June 2008, Teekay Offshore, completed a follow-on public offering by issuing an additional 7.4 million of its common units to the public and 3.3 million common units to Teekay in a concurrent private placement at a price of \$20.00 per unit for net proceeds of \$198.8 million. In connection with the follow-on public offering, we contributed \$4.2 million to Teekay Offshore to maintain our 2% general partner interest in it. During July 2008, the underwriters exercised their over-allotment option and purchased 375,000 common units at \$20.00 per unit for proceeds of \$7.2 million, net of commissions.

During August 2009, Teekay Offshore completed a follow-on public offering of 7.475 million common units (including 975,000 units issued upon the exercise in full of the underwriter's overallotment option) at a price of \$14.32 per unit, for total gross proceeds of \$107.0 million (including the general partner's \$2.2 million proportionate capital contribution). As a result, our ownership of Teekay Offshore was reduced from 50.0% to 40.5% (including our 2% general partner interest), and we recorded an increase to retained earnings of \$26.9 million, which represents the Company's dilution gain from the issuance of units. The total net offering proceeds were used to reduce amounts outstanding under one of Teekay Offshore's revolving credit facilities.

Teekay Offshore owns 51% of Teekay Offshore Operating L.P. (or *OPCO*), including its 0.01% general partner interest and an additional 25% limited partnership interest it acquired from us upon the closing of the June 2008 public offering. As of December 31, 2009, OPCO owned and operated a fleet of 33 of our shuttle tankers (including 8 chartered-in vessels and 5 vessels owned by 50% owned joint ventures), 4 of our FSO units, and 11 of our conventional Aframax tankers. In addition, Teekay Offshore has direct ownership interests in two of our shuttle tankers (including one through a 50%-owned joint venture), one FSO and one FPSO. As of December 31, 2009, we indirectly own 49% of OPCO and 40.5% of Teekay Offshore, including our 2% general partner interest. As a result, we effectively own 69.6% of OPCO. Please read Item 18 Financial Statements: Note 5 Equity Offerings by Subsidiaries.

During March 2010, Teekay Offshore completed a public offering of 5.06 million common units (including 660,000 units issued upon the exercise in full of the underwriter's over-allotment option) at a price of \$19.48 per unit, for gross proceeds of \$100.6 million (including the general partner's \$2.0 million proportionate capital contribution). Teekay Offshore used the total net proceeds from the offering to repay to us the vendor financing of \$60.0 million for the acquisition from us of the *Petrojarl Varg* FPSO unit and to finance a portion of the acquisition of the *Falcon Spirit*, an FSO unit, from us for \$43.4 million. Teekay's ownership in Teekay Offshore reduced to 35.9% as a result of a public offering in March 2010. We maintain control of Teekay Offshore by virtue of our control of the general partner and continue to consolidate this subsidiary. Please read Item 18 Financial Statements: Note 24(b) Subsequent Events.

Equity Offerings by Teekay LNG Partners L.P.

During May 2007, our subsidiary Teekay LNG completed a follow-on public offering of 2.3 million common units at a price of \$38.13 per unit, for net proceeds of \$84.2 million.

During April 2008, Teekay LNG completed a follow-on public offering of 5.0 million of its common units at a price of \$28.75 per unit, for net proceeds of \$137.6 million. Subsequently the underwriters exercised their over-allotment option and purchased 375,000 common units resulting in an additional \$10.8 million in gross proceeds to Teekay LNG. Concurrently with the follow-on public offering, we acquired 1.74 million common units of Teekay LNG at the same public offering price for a total cost of \$50.0 million.

Table of Contents

During March 2009, Teekay LNG completed a follow-on public offering of 4.0 million common units at a price of \$17.60 per unit, for gross proceeds of approximately \$71.8 million. Teekay LNG used the total net proceeds from the offerings to prepay amounts outstanding on two of its revolving credit facilities.

During November 2009, Teekay LNG completed a follow-on public offering of 3.5 million of its common units at a price of \$24.40 per unit, for gross proceeds of \$87.1 million (including the general partner's 2% proportionate capital contribution). Subsequently the underwriters exercised their over-allotment option and purchased 450,650 common units resulting in an additional \$11.2 million (including the general partner's 2% proportionate capital contribution) in gross proceeds to Teekay LNG. Teekay LNG used the total net proceeds from the offering to prepay amounts outstanding under one or more of its revolving credit facilities.

As a result of the above transactions, we own a 49.2% interest in Teekay LNG, including its 2% general partner interest. We maintain control of Teekay LNG by virtue of our control of the general partner and continue to consolidate this subsidiary. Please read Item 18 Financial Statements: Note 5 Equity Offerings by Subsidiaries.

B. Operations

Our organization is divided into the following key areas: the shuttle tanker and FSO segment (included in our Teekay Navion Shuttle Tankers and Offshore business unit), the FPSO segment (included in our Teekay Petrojarl business unit), the liquefied gas segment (included in our Teekay Gas Services business unit), the conventional tanker segment, consisting of spot tanker sub-segment and fixed-rate tanker sub-segment (both included in our Teekay Tanker Services business unit). These centers of expertise work closely with customers to ensure a thorough understanding of our customers' requirements and to develop tailored solutions.

Teekay Navion Shuttle Tankers and Offshore; and Teekay Petrojarl provide marine transportation, processing and storage services to the offshore oil industry, including shuttle tanker, FSO and FPSO services. Our expertise and partnerships with third parties allow us to create solutions for customers producing crude oil from offshore installations.

Teekay Gas Services provides gas transportation services, primarily under long-term fixed-rate contracts to major energy and utility companies. These services currently include the transportation of LNG and LPG.

Teekay Tanker Services is responsible for the commercial management of our conventional crude oil and product tanker transportation services. We offer a full range of shipping solutions through our worldwide network of commercial offices.

Shuttle Tanker and FSO Segment and FPSO Segment

The main services our shuttle tanker and FSO segment and our FPSO segment provide to customers are:

- offloading and transportation of cargo from oil field installations to onshore terminals via dynamically positioned, offshore loading shuttle tankers;
- floating storage for oil field installations via FSO units; and
- floating production, processing and storage services via FPSO units.

Shuttle Tankers

A shuttle tanker is a specialized ship designed to transport crude oil and condensates from offshore oil field installations to onshore terminals and refineries. Shuttle tankers are equipped with sophisticated loading systems and dynamic positioning systems that allow the vessels to load cargo safely and reliably from oil field installations, even in harsh weather conditions. Shuttle tankers were developed in the North Sea as an alternative to pipelines. The first cargo from an offshore field in the North Sea was shipped in 1977, and the first dynamically positioned shuttle tankers were introduced in the early 1980s. Shuttle tankers are often described as "floating pipelines" because these vessels typically shuttle oil from offshore installations to onshore facilities in much the same way a pipeline would transport oil along the ocean floor.

Our shuttle tankers are primarily subject to long-term, fixed-rate time-charter contracts or bareboat charter contracts for a specific offshore oil field, where a vessel is hired for a fixed period of time, or under contracts of affreightment for various fields, where we commit to be available to transport the quantity of cargo requested by the customer from time to time over a specified trade route within a given period of time. The number of voyages performed under these contracts of affreightment normally depends upon the oil production of each field. Competition for charters is based primarily upon price, availability, the size, technical sophistication, age and condition of the vessel and the reputation

of the vessel's manager. Technical sophistication of the vessel is especially important in harsh operating environments such as the North Sea. Although the size of the world shuttle tanker fleet has been relatively unchanged in recent years, conventional tankers can be converted into shuttle tankers by adding specialized equipment to meet customer requirements. Shuttle tanker demand may also be affected by the possible substitution of sub-sea pipelines to transport oil from offshore production platforms.

As of December 31, 2009, there were approximately 75 vessels in the world shuttle tanker fleet (including 18 newbuildings), the majority of which operate in the North Sea. Shuttle tankers also operate in Brazil, Canada, Russia, Australia and Africa. As of December 31, 2009, we owned 31 shuttle tankers (including four newbuildings) and chartered-in an additional eight shuttle tankers. Other shuttle tanker owners include Knutsen OAS Shipping AS, JJ Uglund Group and Transpetro, which as of December 31, 2009 controlled small fleets of 3 to 15 shuttle tankers each. We believe that we have significant competitive advantages in the shuttle tanker market as a result of the quality, type and dimensions of our vessels combined with our market share in the North Sea.

Table of Contents*FSO Units*

FSO units provide on-site storage for oil field installations that have no storage facilities or that require supplemental storage. An FSO unit is generally used in combination with a jacked-up fixed production system, floating production systems that do not have sufficient storage facilities or as supplemental storage for fixed platform systems, which generally have some on-board storage capacity. An FSO unit is usually of similar design to a conventional tanker, but has specialized loading and offtake systems required by field operators or regulators. FSO units are moored to the seabed at a safe distance from a field installation and receive the cargo from the production facility via a dedicated loading system. An FSO unit is also equipped with an export system that transfers cargo to shuttle or conventional tankers. Depending on the selected mooring arrangement and where they are located, FSO units may or may not have any propulsion systems. FSO units are usually conversions of older single-hull conventional oil tankers. These conversions, which include installation of a loading and offtake system and hull refurbishment, can generally extend the lifespan of a vessel as an FSO unit by up to 20 years over the normal conventional tanker lifespan of 25 years.

Our FSO units are generally placed on long-term, fixed-rate time-charters or bareboat charters as an integrated part of the field development plan, which provides more stable cash flow to us. Under a bareboat charter, the customer pays a fixed daily rate for a fixed period of time for the full use of the vessel and is responsible for all crewing, management and navigation of the vessel and related expenses.

As of December 2009, there were approximately 90 FSO units operating and five FSO units on order in the world fleet. As at December 31, 2009, we had six FSO units. The major markets for FSO units are Asia, the Middle East, West Africa, South America and the North Sea. Our primary competitors in the FSO market are conventional tanker owners, who have access to tankers available for conversion, and oil field services companies and oil field engineering and construction companies who compete in the floating production system market. Competition in the FSO market is primarily based on price, expertise in FSO operations, management of FSO conversions and relationships with shipyards, as well as the ability to access vessels for conversion that meet customer specifications.

FPSO Units

FPSO units are offshore production facilities that are typically ship-shaped and store processed crude oil in tanks located in the hull of the vessel. FPSO units are typically used as production facilities to develop marginal oil fields or deepwater areas remote from existing pipeline infrastructure. Of four major types of floating production systems, FPSO units are the most common type. Typically, the other types of floating production systems do not have significant storage and need to be connected into a pipeline system or use an FSO unit for storage. FPSO units are less weight-sensitive than other types of floating production systems and their extensive deck area provides flexibility in process plant layouts. In addition, the ability to utilize surplus or aging tanker hulls for conversion to an FPSO unit provides a relatively inexpensive solution compared to the new construction of other floating production systems. A majority of the cost of an FPSO comes from its top-side production equipment and thus FPSO units are expensive relative to conventional tankers. An FPSO unit carries on-board all the necessary production and processing facilities normally associated with a fixed production platform. As the name suggests, FPSO units are not fixed permanently to the seabed but are designed to be moored at one location for long periods of time. In a typical FPSO unit installation, the untreated wellstream is brought to the surface via subsea equipment on the sea floor that is connected to the FPSO unit by flexible flow lines called risers. The risers carry oil, gas and water from the ocean floor to the vessel, which processes it onboard. The resulting crude oil is stored in the hull of the vessel and subsequently transferred to tankers either via a buoy or tandem loading system for transport to shore.

Traditionally for large field developments, the major oil companies have owned and operated new, custom-built FPSO units. FPSO units for smaller fields have generally been provided by independent FPSO contractors under life-of-field production contracts, where the contract's duration is for the useful life of the oil field. FPSO units have been used to develop offshore fields around the world since the late 1970s. As of December 2009 there were approximately 159 FPSO units operating and 31 FPSO units on order in the world fleet. At December 31, 2009, we had five FPSO units. Most independent FPSO contractors have backgrounds in marine energy transportation, oil field services or oil field engineering and construction. The major independent FPSO contractors are SBM Offshore N.V., MODEC, Prosafe SE, BW Offshore, Sevan Marine ASA, Bluewater and Maersk.

During 2009, a total of approximately 47% of our net revenues were earned by the vessels in our shuttle tankers and FSO segment and FPSO segment, compared to approximately 37% in 2008 and 47% in 2007. Please read Item 5 Operating and Financial Review and Prospects: Results of Operations.

Liquefied Gas Segment

The vessels in our liquefied gas segment compete in the LNG and LPG markets. LNG carriers are usually chartered to carry LNG pursuant to time-charter contracts with durations between 20 and 25 years, and with charter rates payable to the owner on a monthly basis. LNG shipping historically has been transacted with these long-term, fixed-rate time-charter contracts. LNG projects require significant capital expenditures and typically involve an integrated chain of dedicated facilities and cooperative activities. Accordingly, the overall success of an LNG project depends heavily on long-range planning and coordination of project activities, including marine transportation. Most shipping requirements for new LNG projects continue to be provided on a long-term basis, though the level of spot voyages (typically consisting of a single voyage) and short-term time-charters of less than 12 months duration have grown in the past few years.

In the LNG markets, we compete principally with other private and state-controlled energy and utilities companies, which generally operate captive fleets, and independent ship owners and operators. Many major energy companies compete directly with independent owners by transporting LNG for third parties in addition to their own LNG. Given the complex, long-term nature of LNG projects, major energy companies historically have transported LNG through their captive fleets. However, independent fleet operators have been obtaining an increasing percentage of charters for new or expanded LNG projects as major energy companies have continued to divest non-core businesses. Major operators of LNG carriers are Malaysian International Shipping, NYK Line, Qatar Gas Transport (Nakilat), Shell Group and Mitsui O.S.K.

LNG carriers transport LNG internationally between liquefaction facilities and import terminals. After natural gas is transported by pipeline from production fields to a liquefaction facility, it is supercooled to a temperature of approximately negative 260 degrees Fahrenheit. This process reduces its volume to approximately 1 / 600th of its volume in a gaseous state. The reduced volume facilitates economical storage and transportation by ship over long distances, enabling countries with limited natural gas reserves or limited access to long-distance transmission pipelines to meet their demand for natural gas. LNG carriers include a sophisticated containment system that holds and insulates the LNG so it maintains its liquid form. The LNG is transported overseas in specially built tanks on double-hulled ships to a receiving terminal, where it is offloaded and stored in heavily insulated tanks. In regasification facilities at the receiving terminal, the LNG is returned to its gaseous state (or *regasified*) and then shipped by pipeline for distribution to natural gas customers.

Table of Contents

LPG carriers are mainly chartered to carry LPG on time charters of three to five years, on contracts of affreightment or spot voyage charters. The two largest consumers of LPG are residential users and the petrochemical industry. Residential users, particularly in developing regions where electricity and gas pipelines are not developed, do not have fuel switching alternatives and generally are not LPG price sensitive. The petrochemical industry, however, has the ability to switch between LPG and other feedstock fuels depending on price and availability of alternatives.

Most new LNG carriers, including all of our vessels, are being built with a membrane containment system. These systems consist of insulation between thin primary and secondary barriers and are designed to accommodate thermal expansion and contraction without overstressing the membrane. New LNG carriers are generally expected to have a lifespan of approximately 40 years. New LPG carriers are generally expected to have a lifespan of approximately 30 to 35 years. Unlike the oil tanker industry, there are currently no regulations that require the phase-out from trading of LNG and LPG carriers after they reach a certain age. As at December 31, 2009, there were approximately 338 vessels in the world LNG fleet, with an average age of approximately 10 years, and an additional 43 LNG carriers under construction or on order for delivery through 2012. As of December 31, 2009, the worldwide LPG tanker fleet consisted of approximately 1,149 vessels with an average age of approximately 16 years and approximately 136 additional LPG vessels were on order for delivery through 2013. LPG carriers range in size from approximately 500 to approximately 70,000 cubic meters (or cbm). Approximately 55% (in terms of vessel numbers) of the worldwide fleet is less than 5,000 cbm.

Our liquefied gas segment primarily consists of LNG and LPG carriers subject to long-term, fixed-rate time-charter contracts. As at December 31, 2009, we had 15 LNG carriers, as well as an additional four newbuilding LNG carriers on order which were scheduled to commence operations upon delivery under long-term fixed-rate time-charters and in which our interest is 33%. In addition, as at December 31, 2009, we had six LPG carriers, of which three are under construction.

During 2009, approximately 13% of our net revenues were earned by the vessels in our liquefied gas segment, compared to approximately 9% in 2008, and 9% in 2007. Please read Item 5 Operating and Financial Review and Prospects: Results of Operations.

Conventional Tanker Segment**a) Spot Tanker Sub-Segment**

The vessels in our spot tanker segment compete primarily in the Aframax and Suezmax tanker markets. In these markets, international seaborne oil and other petroleum products transportation services are provided by two main types of operators: captive fleets of major oil companies (both private and state-owned) and independent ship-owner fleets. Many major oil companies and other oil trading companies, the primary charterers of our vessels, also operate their own vessels and transport their own oil and oil for third-party charterers in direct competition with independent owners and operators. Competition for charters in the Aframax and Suezmax spot charter market is intense and is based upon price, location, the size, age, condition and acceptability of the vessel, and the reputation of the vessel's manager.

We compete principally with other owners in the spot-charter market through the global tanker charter market. This market is comprised of tanker broker companies that represent both charterers and ship-owners in chartering transactions. Within this market, some transactions, referred to as market cargoes, are offered by charterers through two or more brokers simultaneously and shown to the widest possible range of owners; other transactions, referred to as private cargoes, are given by the charterer to only one broker and shown selectively to a limited number of owners whose tankers are most likely to be acceptable to the charterer and are in position to undertake the voyage.

Certain of our vessels in the spot tanker segment operate pursuant to pooling arrangements. Under a pooling arrangement, different vessel owners pool their vessels, which are managed by a pool manager, to improve utilization and reduce expenses. In general, revenues generated by the vessels operating in a pool, less related voyage expenses (such as fuel and port charges) and pool administrative expenses, are pooled and allocated to the vessel owners according to a pre-determined formula. As of December 31, 2009, we participated in three main pooling arrangements. These include an Aframax tanker pool, an LR2 tanker pool and a Suezmax tanker pool (the Gemini Pool). As of December 31, 2009, 18 of our Aframax tankers operated in the Aframax tanker pool, four of our LR2 tankers operated in the LR2 tanker pool and 13 of our Suezmax tankers operated in the Gemini Pool. Each of these

pools is either solely or jointly managed by us.

Our competition in the Aframax (80,000 to 119,999 dwt) market is also affected by the availability of other size vessels that compete in that market. Suezmax (120,000 to 199,999 dwt) vessels and Panamax (55,000 to 79,999 dwt) vessels can compete for many of the same charters for which our Aframax tankers compete. Similarly, Aframax tankers and Very Large Crude Carriers (200,000 to 319,999 dwt) (or *VLCCs*) can compete for many of the same charters for which our Suezmax vessels compete. Because *VLCCs* comprise a substantial portion of the total capacity of the market, movements by such vessels into Suezmax trades or of Suezmax vessels into Aframax trades would heighten the already intense competition.

We believe that we have competitive advantages in the Aframax and Suezmax tanker market as a result of the quality, type and dimensions of our vessels and our market share in the Indo-Pacific and Atlantic Basins. As of December 31, 2009, our Aframax tanker fleet (excluding Aframax-size shuttle tankers and newbuildings) had an average age of approximately 11 years and our Suezmax tanker fleet (excluding Suezmax-size shuttle tankers and newbuildings) had an average age of approximately six years. This compares to an average age for the world oil tanker fleet of approximately 11.4 years, for the world Aframax tanker fleet of approximately 8.2 years and for the world Suezmax tanker fleet of approximately 8.7 years.

As of December 31, 2009, other large operators of Aframax tonnage (including newbuildings on order) included Malaysian International Shipping Corporation (approximately 63 Aframax vessels), Sovcomflot (approximately 41 vessels), Aframax International Pool (approximately 41 Aframax vessels) and the Sigma Pool (approximately 31 vessels). Other large operators of Suezmax tonnage (including newbuildings on order) included Sovcomflot (approximately 21 vessels), the Blue Fin Pool (approximately 16 vessels), Delta Tankers (approximately 13 vessels) and the Stena Sonangol Pool (approximately 13 vessels).

Table of Contents

We have chartering staff located in Tokyo, Japan; Singapore; London, England; Houston, Texas; and Stamford, Connecticut. Each office serves our clients headquartered in that office's region. Fleet operations, vessel positions and charter market rates are monitored around the clock. We believe that monitoring such information is critical to making informed bids on competitive brokered business.

During 2009, approximately 24% of our net revenues were earned by the vessels in our spot tanker segment, compared to approximately 43% in 2008 and 33% in 2007. Please read Item 5 Operating and Financial Review and Prospects: Results of Operations.

b) Fixed-Rate Tanker Sub-Segment

The vessels in our fixed-rate tanker segment primarily consist of Aframax and Suezmax tankers that are employed on long-term time-charters. We consider contracts that have an original term of less than three years in duration to be short term. The only difference between the vessels in the spot tanker segment and the fixed-rate tanker segment is the duration of the contracts under which they are employed. Charters of more than three years are not as common as short-term charters and voyage charters for conventional tankers. During 2009, approximately 16% of our net revenues were earned by the vessels in the fixed-rate tanker segment, compared to approximately 11% in 2008 and 10% in 2007. Please read Item 5 Operating and Financial Review and Prospects: Results of Operations.

Our Fleet

As at December 31, 2009, our fleet (excluding vessels managed for third parties) consisted of 158 vessels, including chartered-in vessels, and newbuildings on order. The following table summarizes our fleet as at December 31, 2009:

	Number of Vessels			Total
	Owned Vessels	Chartered-in Vessels	Newbuildings	
Shuttle Tanker and FSO Segment				
Shuttle Tankers	25 ⁽¹⁾	8 ⁽²⁾	4	37
FSO Units	5 ⁽³⁾			5
Total Shuttle Segment	30	8	4	42
FPSO Segment				
Shuttle Tankers	2 ⁽¹⁾			2
FSO Unit	1 ⁽³⁾			1
FPSO Units	5 ⁽⁴⁾			5
Total FPSO Segment	8			8
Liquefied Gas Segment				
LNG Carriers	15 ⁽⁶⁾		4 ⁽⁷⁾	19
LPG Carriers	3		3	6
Total Liquefied Gas Segment	18		7	25

Total Spot Tanker Segment	26	18		44
Fixed-Rate Tanker Segment				
Conventional Tankers	32 ⁽⁵⁾	7		39
Total Fixed-Rate Tanker Segment	32	7		39
Total	114	33	11	158

The following footnotes indicate the vessels in the table above that are owned or chartered-in by non-wholly owned subsidiaries of Teekay Corporation or have been or will be offered to Teekay LNG, Teekay Offshore or Teekay Tankers:

- (1) Includes 25 vessels owned by OPCO (including five through 50% controlled subsidiaries) and two vessels owned by Teekay Offshore (including one through a 50% controlled subsidiary).
- (2) All eight vessels chartered-in by OPCO.
- (3) Includes four FSO units owned by OPCO (including one through an 89% subsidiary) and one FSO unit owned by Teekay Offshore.
- (4) Includes four FPSO units owned by Teekay

Petrojarl.
Teekay is required to offer to sell to Teekay Offshore any of these units that are servicing contracts in excess of three years in length. One FPSO is owned by Teekay Offshore. Certain of our FPSO contracts include the services of shuttle tankers and an FSO unit, and as such, these vessels are included in the FPSO segment.

- (5) Includes eight vessels owned by Teekay LNG, two vessels owned by OPCO, and five vessels owned by Teekay Tankers.
- (6) Includes nine LNG carriers owned by Teekay LNG, a 70% interest in two LNG carriers, and 40% interest in four LNG carriers.
- (7) Includes Teekay's 33% interest in four LNG

newbuildings.

Teekay is required to offer to sell these vessels to Teekay LNG.

- (8) Includes one Suezmax tanker that Teekay is required to offer Teekay Tankers.
- (9) Includes six vessels owned by Teekay Offshore, all of which are chartered to Teekay and five vessels owned by Teekay Tankers.
- (10) Includes one product tanker owned by Teekay Tankers.

Table of Contents

Our vessels are of Australian, Bahamian, Cayman Islands, Liberian, Marshall Islands, Norwegian, Norwegian International Ship, Russian, and Spanish registry.

Many of our Aframax and Suezmax vessels and some of our shuttle tankers have been designed and constructed as substantially identical sister ships. These vessels can, in many situations, be interchanged, providing scheduling flexibility and greater capacity utilization. In addition, spare parts and technical knowledge can be applied to all the vessels in the particular series, thereby generating operating efficiencies.

As of December 31, 2009, we had 11 vessels under construction. Please read Item 5 Operating and Financial Review and Prospects: Management's Discussion and Analysis of Financial Condition and Results of Operations, and Item 18 Financial Statements: Notes 16(a) and 16(b) Commitments and Contingencies Vessels Under Construction and Joint Ventures.

Please read Item 18 Financial Statements: Note 8 Long-Term Debt for information with respect to major encumbrances against our vessels.

Safety, Management of Ship Operations and Administration

Safety and environmental compliance are our top operational priorities. We operate our vessels in a manner intended to protect the safety and health of our employees, the general public and the environment. We seek to manage the risks inherent in our business and are committed to eliminating incidents that threaten the safety and integrity of our vessels, such as groundings, fires, collisions and petroleum spills. In 2008, we introduced the Quality Assurance and Training Officers (or *QATO*) Program to conduct rigorous internal audits of our processes and provide our seafarers with onboard training. In 2007, we introduced a behavior-based safety program called Safety in Action to improve the safety culture in our fleet. We are also committed to reducing our emissions and waste generation.

Key performance indicators facilitate regular monitoring of our operational performance. Targets are set on an annual basis to drive continuous improvement, and indicators are reviewed monthly to determine if remedial action is necessary to reach the targets.

Teekay Corporation, through certain of its subsidiaries, assists our operating subsidiaries in managing their ship operations. All vessels are operated under Teekay's comprehensive and integrated Marine Operations Management System (or *MOMS*) that complies with the International Safety Management Code (or *ISM Code*), the International Standards Organization's (or *ISO*) 9001 for Quality Assurance, ISO 14001 for Environment Management Systems, and Occupational Health and Safety Advisory Services (or *OHSAS*) 18001. MOMS is certified by Det Norske Veritas (or *DNV*), the Norwegian classification society. It has also been separately approved by the Australian and Spanish Flag administrations. Although certification is valid for five years, compliance with the above mentioned standards is confirmed on a yearly basis by a rigorous auditing procedure that includes both internal audits as well as external verification audits by DNV and certain flag states.

Teekay Corporation provides, through certain of its subsidiaries, expertise in various functions critical to the operations of our operating subsidiaries. We believe this arrangement affords a safe, efficient and cost-effective operation. Teekay subsidiaries also provide to us access to human resources, financial and other administrative functions pursuant to administrative services agreements.

Ship management services are provided by the Teekay Marine Services division, a subsidiary of Teekay Corporation, located in various offices around the world. These include such critical ship management functions as:

- vessel maintenance (including repairs and drydocking) and certification;
- crewing by competent seafarers;
- procurement of stores, bunkers and spare parts;
- management of emergencies and incidents;
- supervision of shipyard and projects during new-building and conversions;
- insurance; and
- financial management services.

Integrated onboard and onshore systems support the management of maintenance, inventory control and procurement, crew management and training and assist with budgetary controls.

Teekay Corporation's day-to-day focus on cost efficiencies is applied to all aspects of our operations. We believe that the generally uniform design of some of our existing and new-building vessels and the adoption of common

equipment standards provides operational efficiencies, including with respect to crew training and vessel management, equipment operation and repair, and spare parts ordering. In addition, in 2003, Teekay Corporation and two other shipping companies established a purchasing alliance, Teekay Bergesen Worldwide (or *TBW*), which leverages the purchasing power of the combined fleets, mainly in such commodity areas as lube oils, paints and other chemicals.

Risk of Loss and Insurance

The operation of any ocean-going vessel carries an inherent risk of catastrophic marine disasters, death or injury of persons and property losses caused by adverse weather conditions, mechanical failures, human error, war, terrorism, piracy and other circumstances or events. In addition, the transportation of crude oil, petroleum products, LNG and LPG is subject to the risk of spills and to business interruptions due to political circumstances in foreign countries, hostilities, labor strikes and boycotts. The occurrence of any of these events may result in loss of revenues or increased costs.

Table of Contents

We carry hull and machinery (marine and war risks) and protection and indemnity insurance coverage to protect against most of the accident-related risks involved in the conduct of our business. Hull and machinery insurance covers loss of or damage to a vessel due to marine perils such as collisions, grounding and weather. Protection and indemnity insurance indemnifies us against liabilities incurred while operating vessels, including injury to our crew or third parties, cargo loss and pollution. The current available amount of our coverage for pollution is \$1 billion per vessel per incident. We also carry insurance policies covering war risks (including piracy and terrorism) and, for some of our LNG carriers, loss of revenues resulting from vessel off-hire due to marine casualty. We believe that our current insurance coverage is adequate to protect against most of the accident-related risks involved in the conduct of our business and that we maintain appropriate levels of environmental damage and pollution insurance coverage. However, we cannot assure that all covered risks are adequately insured against, that any particular claim will be paid or that we will be able to procure adequate insurance coverage at commercially reasonable rates in the future. In addition, more stringent environmental regulations have resulted in increased costs for, and may result in the lack of availability of, insurance against risks of environmental damage or pollution.

We use in our operations a thorough risk management program that includes, among other things, computer-aided risk analysis tools, maintenance and assessment programs, a seafarers' competence training program, seafarers' workshops and membership in emergency response organizations.

Operations Outside of the United States

Because our operations are primarily conducted outside of the United States, we are affected by currency fluctuations and by changing economic, political and governmental conditions in the countries where we engage in business or where our vessels are registered.

Past political conflicts in that region, particularly in the Arabian Gulf, have included attacks on tankers, mining of waterways and other efforts to disrupt shipping in the area. Vessels trading in the region have also been subject to acts of piracy. In addition to tankers, targets of terrorist attacks could include oil pipelines, LNG facilities and offshore oil fields. The escalation of existing, or the outbreak of future, hostilities or other political instability in this region or other regions where we operate could affect our trade patterns, increase insurance costs, increase tanker operational costs and otherwise adversely affect our operations and performance. In addition, tariffs, trade embargoes, and other economic sanctions by the United States or other countries against countries in the Indo-Pacific Basin or elsewhere as a result of terrorist attacks or otherwise may limit trading activities with those countries, which could also adversely affect our operations and performance.

Customers

We have derived, and believe that we will continue to derive, a significant portion of our revenues from a limited number of customers. Our customers include major energy and utility companies, major oil traders, large oil and LNG consumers and petroleum product producers, government agencies, and various other entities that depend upon marine transportation. One customer, an international oil company, accounted for 16% (\$346.6 million) of our consolidated revenues during 2009 (14% or \$443.5 million in 2008 and 20% or \$472.3 million in 2007). No other customer accounted for more than 10% of our consolidated revenues during 2009, 2008, or 2007. The loss of any significant customer or a substantial decline in the amount of services requested by a significant customer could have a material adverse effect on our business, financial condition and results of operations.

Classification, Audits and Inspections

The hull and machinery of all of our vessels have been classed by one of the major classification societies: Det Norske Veritas, Lloyd's Register of Shipping or American Bureau of Shipping. In addition, the processing facilities of our FPSO units are classed by Det Norske Veritas. The classification society certifies that the vessel has been built and maintained in accordance with the rules of that classification society. Each vessel is inspected by a classification society surveyor annually, with either the second or third annual inspection being a more detailed survey (an *Intermediate Survey*) and the fifth annual inspection being the most comprehensive survey (a *Special Survey*). The inspection cycle resumes after each Special Survey. Vessels also may be required to be drydocked at each Intermediate and Special Survey for inspection of the underwater parts of the vessel in addition to a more detailed inspection of hull and machinery. Many of our vessels have qualified with their respective classification societies for drydocking every five years in connection with the Special Survey and are no longer subject to drydocking at

Intermediate Surveys. To qualify, we were required to enhance the resiliency of the underwater coatings of each vessel hull and to mark the hull to facilitate underwater inspections by divers.

The vessel's flag state, or the vessel's classification society if nominated by the flag state, also inspect our vessels to ensure they comply with applicable rules and regulations of the country of registry of the vessel and the international conventions of which that country is a signatory. Port state authorities, such as the U.S. Coast Guard and the Australian Maritime Safety Authority, also inspect our vessels when they visit their ports. Many of our customers also regularly inspect our vessels as a condition to chartering.

We believe that our relatively new, well-maintained and high-quality vessels provide us with a competitive advantage in the current environment of increasing regulation and customer emphasis on quality of service.

Our vessels are also regularly inspected by our seafaring staff which perform much of the necessary routine maintenance. Shore-based operational and technical specialists also inspect our vessels at least twice a year. Upon completion of each inspection, action plans are developed to address any items requiring improvement. All action plans are monitored until they are completed. The objectives of these inspections are to ensure:

- adherence to our operating standards;
- the structural integrity of the vessel is being maintained;
- machinery and equipment is being maintained to give full reliability in service;
- we are optimizing performance in terms of speed and fuel consumption; and
- the vessel's appearance will support our brand and meet customer expectations.

To achieve the vessel structural integrity objective, we use a comprehensive Structural Integrity Management System we developed. This system is designed to closely monitor the condition of our vessels and to ensure that structural strength and integrity are maintained throughout a vessel's life.

We believe that the heightened environmental and quality concerns of insurance underwriters, regulators and charterers will generally lead to greater inspection and safety requirements on all vessels in the oil tanker and LNG and LPG carrier markets and will accelerate the scrapping of older vessels throughout these markets.

Table of Contents

Properties

Other than our vessels, we do not have any material property.

Organizational Structure

Our organizational structure includes, among others, our interests in Teekay Offshore and Teekay LNG. These limited partnerships were set up primarily to hold our assets that generate long-term fixed-rate cash flows. The strategic rationale for establishing these entities was to:

- illuminate higher value of fixed-rate cash flows to Teekay investors;
- realize advantages of a lower cost of equity when investing in new offshore or LNG projects;
- enhance returns to Teekay through fee-based revenue and ownership of the limited partnership's incentive distribution rights, which entitle the holder to disproportionate distributions of available cash as cash distribution levels to unit holders increase; and
- access to capital to grow each of our businesses in offshore, LNG, and conventional tankers.

The following chart provides an overview of our organizational structure as at December 31, 2009. Please read Exhibit 8.1 to this Annual Report for a list of our significant subsidiaries as at December 31, 2009.

- (1) The partnership is controlled by its general partner. Teekay Corporation has a 100% beneficial ownership in the general partner. However in certain limited cases, approval of a majority of the common unit holders is required to approve certain actions.

- (2) Proportion of voting power held is 51.6%.

- (3) Including our 100% interest in Teekay Petrojarl.

Teekay Offshore is a Marshall Islands limited partnership formed by us in 2006 as part of our strategy to expand our operations in the offshore oil marine transportation, processing and storage sectors. Teekay Offshore owns 51% of OPCO, including its 0.01% general partner interest. OPCO owns and operates a fleet of 33 of our shuttle tankers (including eight chartered-in vessels), four of our FSO units, and 11 of our conventional Aframax tankers. In addition, Teekay Offshore has direct ownership interests in two of our shuttle tankers, one of our FSO units and one of our FPSO units. All of OPCO's vessels operate under long-term, fixed-rate contracts. We directly own 49% of OPCO and 40.5% of Teekay Offshore, including its 2% general partner interest. As a result, we effectively own 69.6% of OPCO.

Teekay Offshore also has rights to participate in certain FPSO opportunities relating to Teekay Petrojarl. Pursuant to an omnibus agreement we entered into in connection with Teekay Offshore's initial public offering in 2006, we have also agreed to offer to Teekay Offshore existing FPSO units of Teekay Petrojarl that are servicing contracts in excess of three years in length. Teekay's ownership in Teekay Offshore reduced to 35.9% as a result of a public offering in March 2010. Please read Item 18 Financial Statements: Note 24(b) Subsequent Events.

Table of Contents

Teekay LNG is a Marshall Islands limited partnership formed by us in 2005 as part of our strategy to expand our operations in the LNG shipping sector. Teekay LNG provides LNG, LPG and crude oil marine transportation service under long-term, fixed-rate contracts with major energy and utility companies through its fleet of 15 LNG carriers, six LPG carriers (including three newbuildings), and eight Suezmax tankers. In March 2010, Teekay sold two additional Suezmax tankers and one Handymax product tanker to Teekay LNG, all of which operate under long-term, fixed-rate contracts.

In December 2007, we added Teekay Tankers to our structure. Teekay Tankers is a Marshall Islands corporation formed by us to facilitate the growth of our conventional tanker business. As at December 31, 2009 Teekay Tankers owned a fleet of nine of our double-hull Aframax tankers and three double-hull Suezmax tankers, which trade in the spot tanker market and short- or medium-term, fixed-rate time-charter market. Teekay Tanker's primary objective is to grow through the acquisition of conventional tanker assets from third parties and from us. We have offered to Teekay Tankers the opportunity to purchase up to four Suezmax-class oil tankers, of which two were acquired by Teekay Tankers in April 2008, one in June 2009 and one which was acquired in April 2010. Through a wholly-owned subsidiary, we provide Teekay Tankers with commercial, technical, administrative, and strategic services under a long-term management agreement. In exchange, Teekay Tankers has agreed to pay us both a market-based fee and a performance fee under certain circumstances to motivate us to increase Teekay Tankers' cash available for distribution to its stockholders. In April 2010, Teekay Tankers completed a follow-on public offering of 7.7 million common shares at a price of \$12.25 per share. Teekay Tankers used the net offering proceeds and borrowings under a revolving credit facility for the balance to acquire from us two Suezmax tankers and one Aframax tanker for aggregate consideration of approximately \$168.7 million.

Teekay has entered into an omnibus agreement with Teekay LNG, Teekay Offshore and related parties governing, among other things, when Teekay, Teekay LNG, and Teekay Offshore may compete with each other and certain rights of first offer on LNG carriers, oil tankers, shuttle tankers, FSO units and FPSO units. In addition, Teekay Tankers has agreed that we may pursue business opportunities attractive to both parties.

C. Regulations***General***

Our business and the operation of our vessels are significantly affected by international conventions and national, state and local laws and regulations in the jurisdictions in which our vessels operate, as well as in the country or countries of their registration. Because these conventions, laws and regulations change frequently, we cannot predict the ultimate cost of compliance or their impact on the resale price or useful life of our vessels. Additional conventions, laws, and regulations may be adopted that could limit our ability to do business or increase the cost of our doing business and that may materially adversely affect our operations. We are required by various governmental and quasi-governmental agencies to obtain permits, licenses and certificates with respect to our operations. Subject to the discussion below and to the fact that the kinds of permits, licenses and certificates required for the operations of the vessels we own will depend on a number of factors, we believe that we will be able to continue to obtain all permits, licenses and certificates material to the conduct of our operations.

International Maritime Organization (or IMO)

The IMO is the United Nations' agency for maritime safety. IMO regulations relating to pollution prevention for oil tankers have been adopted by many of the jurisdictions in which our tanker fleet operates. Under IMO regulations and subject to limited exceptions, a tanker must be of double-hull construction, be of a mid-deck design with double-side construction or be of another approved design ensuring the same level of protection against oil pollution. All of our tankers are double hulled.

Many countries, but not the United States, have ratified and follow the liability regime adopted by the IMO and set out in the International Convention on Civil Liability for Oil Pollution Damage, 1969, as amended (or *CLC*). Under this convention, a vessel's registered owner is strictly liable for pollution damage caused in the territorial waters of a contracting state by discharge of persistent oil (e.g. crude oil, fuel oil, heavy diesel oil or lubricating oil), subject to certain defenses. The right to limit liability to specified amounts that are periodically revised is forfeited under the CLC when the spill is caused by the owner's actual fault or when the spill is caused by the owner's intentional or reckless conduct. Vessels trading to contracting states must provide evidence of insurance covering the limited

liability of the owner. In jurisdictions where the CLC has not been adopted, various legislative regimes or common law governs, and liability is imposed either on the basis of fault or in a manner similar to the CLC.

IMO regulations also include the International Convention for Safety of Life at Sea (or *SOLAS*), including amendments to *SOLAS* implementing the International Security Code for Ports and Ships (or *ISPS*), the *ISM Code*, the International Convention on Load Lines of 1966, and, specifically with respect to LNG and LPG carriers, the International Code for Construction and Equipment of Ships Carrying Liquefied Gases in Bulk (the *IGC Code*). The IMO Marine Safety Committee has also published guidelines for vessels with dynamic positioning (*DP*) systems, which would apply to shuttle tankers and *DP*-assisted FSO units and FPSO units. *SOLAS* provides rules for the construction of and equipment required for commercial vessels and includes regulations for safe operation. Flag states which have ratified the convention and the treaty generally employ the classification societies, which have incorporated *SOLAS* requirements into their class rules, to undertake surveys to confirm compliance.

SOLAS and other IMO regulations concerning safety, including those relating to treaties on training of shipboard personnel, lifesaving appliances, radio equipment and the global maritime distress and safety system, are applicable to our operations. Non-compliance with IMO regulations, including *SOLAS*, the *ISM Code*, *ISPS*, the *IGC Code* for LNG and LPG carriers, and the specific requirements for shuttle tankers, FSO units and FPSO units under the NPD (Norway) and HSE (United Kingdom) regulations, may subject us to increased liability or penalties, may lead to decreases in available insurance coverage for affected vessels and may result in the denial of access to or detention in some ports. For example, the U.S. Coast Guard and European Union authorities have indicated that vessels not in compliance with the *ISM Code* will be prohibited from trading in U.S. and European Union ports. The *ISM Code* requires vessel operators to obtain a safety management certification for each vessel they manage, evidencing the shipowner's development and maintenance of an extensive safety management system. Each of the existing vessels in our fleet is currently *ISM Code*-certified, and we expect to obtain safety management certificates for each newbuilding vessel upon delivery.

Table of Contents

LNG and LPG carriers are also subject to regulation under the IGC Code. Each LNG and LPG carrier must obtain a certificate of compliance evidencing that it meets the requirements of the IGC Code, including requirements relating to its design and construction. Each of our LNG and LPG carriers is currently IGC Code certified, and each of the shipbuilding contracts for our LNG newbuildings, and for the LPG newbuildings that we have agreed to acquire from Skaugen and Teekay Corporation, requires IGC Code compliance prior to delivery.

Annex VI to the IMO's International Convention for the Prevention of Pollution from Ships (or *Annex VI*) became effective on May 19, 2005. Annex VI sets limits on sulfur oxide and nitrogen oxide emissions from ship exhausts and prohibits emissions of ozone depleting substances, emissions of volatile compounds from cargo tanks and the incineration of specific substances. Annex VI also includes a world-wide cap on the sulfur content of fuel oil and allows for special areas to be established with more stringent controls on sulfur emissions. Annex VI came into force in the United States on January 8, 2009. We operate our vessels in compliance with Annex VI.

In addition, the IMO has proposed that all tankers of the size we operate that are built starting in 2012 contain ballast water treatment systems, and that all other such tankers install treatment systems by 2016. When this regulation becomes effective, we estimate that the installation of ballast water treatment systems on our tankers may cost between \$2 million and \$3 million per vessel.

European Union (or EU)

Like the IMO, the EU has adopted regulations phasing out single-hull tankers. All of our tankers are double-hulled. The EU has also adopted legislation that: bans manifestly sub-standard vessels (defined as vessels that have been detained twice by EU port authorities after July 2003) from European waters; creates obligations on the part of EU member port states to inspect at least 24% of vessels using these ports annually; provides for increased surveillance of vessels posing a high risk to maritime safety or the marine environment; and provides the European Union with greater authority and control over classification societies, including the ability to seek to suspend or revoke the authority of negligent societies. The EU is also considering the adoption of criminal sanctions for certain pollution events, including improper cleaning of tanks.

The EU Directive 33/2005 (or the *Directive*) came into force on January 1, 2010. Under this legislation, vessels are required to burn fuel with sulphur content below 0.1% while berthed or anchored in an EU port. Currently, the only grade of fuel meeting this low sulphur content requirement is low sulphur marine gas oil (or *LSMGO*). Certain modifications are necessary in order to optimize operation on LSMGO of equipment originally designed to operate on Heavy Fuel Oil (or *HFO*). The cost of such modifications will increase the capital expenditures of the relevant vessels in our fleet, which we estimate will total approximately \$17.6 million. In addition, LSMGO is more expensive than HFO and this will impact the costs of operations. However, for vessels employed on fixed term business, all fuel costs, including any increases, are borne by the charterer. Our exposure to increased cost is in our spot trading vessels, although our competitors bear a similar cost increase as this is a regulatory item applicable to all vessels. Given that the manufacturers of the equipment necessary to modify the vessels have not been able to supply parts and modification kits, the EU has issued a recommendation that member states adopt a phase in period for the first eight months of 2010 for vessel owners that have demonstrated actions to comply with the Directive. However, certain EU countries, including Sweden and Italy, are required under their national laws to either ban or impose fines on non-compliant vessels. We expect all vessels in our fleet trading to the EU will become compliant within the first eight months of 2010.

North Sea

Our shuttle tankers primarily operate in the North Sea. In addition to the regulations imposed by the IMO and EU, countries having jurisdiction over North Sea areas impose regulatory requirements in connection with operations in those areas, including HSE in the United Kingdom and NPD in Norway. These regulatory requirements, together with additional requirements imposed by operators in North Sea oil fields, require that we make further expenditures for sophisticated equipment, reporting and redundancy systems on the shuttle tankers and for the training of seagoing staff. Additional regulations and requirements may be adopted or imposed that could limit our ability to do business or further increase the cost of doing business in the North Sea. In Brazil, Petrobras serves in a regulatory capacity, and has adopted standards similar to those in the North Sea.

In Norway, the Norwegian Pollution Control Authority requires the installation of volatile organic compound emissions (or *VOC equipment*) on most shuttle tankers serving the Norwegian continental shelf. Oil companies bear the cost to install and operate the VOC equipment onboard the shuttle tankers.

United States

The United States has enacted an extensive regulatory and liability regime for the protection and cleanup of the environment from oil spills, including discharges of oil cargoes, bunker fuels or lubricants, primarily through the Oil Pollution Act of 1990 (or *OPA 90*) and the Comprehensive Environmental Response, Compensation and Liability Act (or *CERCLA*). OPA 90 affects all owners, bareboat charterers, and operators whose vessels trade to the United States or its territories or possessions or whose vessels operate in United States waters, which include the U.S. territorial sea and 200-mile exclusive economic zone around the United States. CERCLA applies to the discharge of hazardous substances rather than oil and imposes strict joint and several liability upon the owners, operators or bareboat charterers of vessels for cleanup costs and damages arising from discharges of hazardous substances. We believe that petroleum products and LNG and LPG should not be considered hazardous substances under CERCLA, but additives to oil or lubricants used on LNG or LPG carriers and other vessels might fall within its scope.

Under OPA 90, vessel owners, operators and bareboat charters are responsible parties and are jointly, severally and strictly liable (unless the oil spill results solely from the act or omission of a third party, an act of God or an act of war and the responsible party reports the incident and reasonably cooperates with the appropriate authorities) for all containment and cleanup costs and other damages arising from discharges or threatened discharges of oil from their vessels. These other damages are defined broadly to include:

- natural resources damages and the related assessment costs;
- real and personal property damages;
- net loss of taxes, royalties, rents, fees and other lost revenues;

Table of Contents

lost profits or impairment of earning capacity due to property or natural resources damage;
net cost of public services necessitated by a spill response, such as protection from fire, safety or health hazards; and
loss of subsistence use of natural resources.

OPA 90 limits the liability of responsible parties in an amount it periodically updates. The liability limits do not apply if the incident was proximately caused by violation of applicable U.S. federal safety, construction or operating regulations, including IMO conventions to which the United States is a signatory, or by the responsible party's gross negligence or willful misconduct, or if the responsible party fails or refuses to report the incident or to cooperate and assist in connection with the oil removal activities. Liability under CERCLA is also subject to limits unless the incident is caused by gross negligence, willful misconduct or a violation of certain regulations. We currently maintain for each of our vessel's pollution liability coverage in the maximum coverage amount of \$1 billion per incident. A catastrophic spill could exceed the coverage available, which could harm our business, financial condition and results of operations.

Under OPA 90, with limited exceptions, all newly built or converted tankers delivered after January 1, 1994 and operating in U.S. waters must be double-hulled. All of our existing tankers are double-hulled.

OPA 90 also requires owners and operators of vessels to establish and maintain with the United States Coast Guard (or *Coast Guard*) evidence of financial responsibility in an amount at least equal to the relevant limitation amount for such vessels under the statute. The Coast Guard has implemented regulations requiring that an owner or operator of a fleet of vessels must demonstrate evidence of financial responsibility in an amount sufficient to cover the vessel in the fleet having the greatest maximum limited liability under OPA 90 and CERCLA. Evidence of financial responsibility may be demonstrated by insurance, surety bond, self-insurance, guaranty or an alternate method subject to approval by the Coast Guard. Under the self-insurance provisions, the shipowner or operator must have a net worth and working capital, measured in assets located in the United States against liabilities located anywhere in the world, that exceeds the applicable amount of financial responsibility. We have complied with the Coast Guard regulations by using self-insurance for certain vessels and obtaining financial guaranties from a third party for the remaining vessels. If other vessels in our fleet trade into the United States in the future, we expect to provide guaranties through self-insurance or obtain guaranties from third-party insurers.

OPA 90 and CERCLA permit individual U. S. states to impose their own liability regimes with regard to oil or hazardous substance pollution incidents occurring within their boundaries, and some states have enacted legislation providing for unlimited strict liability for spills. Several coastal states, such as California, Washington and Alaska require state-specific evidence of financial responsibility and vessel response plans. We intend to comply with all applicable state regulations in the ports where our vessels call.

Owners or operators of tankers operating in U.S. waters are required to file vessel response plans with the Coast Guard, and their tankers are required to operate in compliance with their Coast Guard approved plans. Such response plans must, among other things:

address a worst case scenario and identify and ensure, through contract or other approved means, the availability of necessary private response resources to respond to a worst case discharge ;
describe crew training and drills; and
identify a qualified individual with full authority to implement removal actions.

We have filed vessel response plans with the Coast Guard and have received its approval of such plans. In addition, we conduct regular oil spill response drills in accordance with the guidelines set out in OPA 90. The Coast Guard has announced it intends to propose similar regulations requiring certain vessels to prepare response plans for the release of hazardous substances.

OPA 90 and CERCLA do not preclude claimants from seeking damages resulting from the discharge of oil and hazardous substances under other applicable law, including maritime tort law. Such claims could include attempts to characterize the transportation of LNG or LPG aboard a vessel as an ultra-hazardous activity under a doctrine that would impose strict liability for damages resulting from that activity. The application of this doctrine varies by jurisdiction.

The United States Clean Water Act also prohibits the discharge of oil or hazardous substances in U.S. navigable waters and imposes strict liability in the form of penalties for unauthorized discharges. The Clean Water Act imposes

substantial liability for the costs of removal, remediation and damages and complements the remedies available under OPA 90 and CERCLA discussed above.

Our vessels that discharge certain effluents, including ballast water, in U.S. waters must obtain a Clean Water Act permit from the Environmental Protection Agency (or *EPA*) titled the Vessel General Permit and comply with a range of best management practices, reporting, inspections and other requirements. The Vessel General Permit incorporates Coast Guard requirements for ballast water exchange and includes specific technology-based requirements for vessels. Several U.S. states have added specific requirements to the Vessel General Permit and, in some cases, may require vessels to install ballast water treatment technology to meet biological performance standards. We believe that the EPA may add requirements related to ballast water treatment technology to the Vessel General Permit requirements between 2012 and 2016 to correspond with the IMO's adoption of similar requirements as discussed above. Since 2009, several environmental groups and industry associations have filed challenges in U.S. federal court to the EPA's issuance of the Vessel General Permit. These cases have not yet been resolved.

Table of Contents***Greenhouse Gas Regulation***

In February 2005, the Kyoto Protocol to the United Nations Framework Convention on Climate Change (or the *Kyoto Protocol*) entered into force. Pursuant to the Kyoto Protocol, adopting countries are required to implement national programs to reduce emissions of greenhouse gases. In December 2009, more than 27 nations, including the United States, entered into the Copenhagen Accord. The Copenhagen Accord is non-binding, but is intended to pave the way for a comprehensive, international treaty on climate change. The IMO is evaluating various mandatory measures to reduce greenhouse gas emissions from international shipping, which may include market-based instruments or a carbon tax. The European Union also has indicated that it intends to propose an expansion of an existing EU emissions trading regime to include emissions of greenhouse gases from vessels, and individual countries in the EU may impose additional requirements. In the United States, the EPA issued an endangerment finding regarding greenhouse gases under the Clean Air Act. While this finding in itself does not impose any requirements on our industry, it authorizes the EPA to regulate directly greenhouse gas emissions through a rule-making process. In addition, climate change initiatives are being considered in the United States Congress and by individual states. Any passage of new climate control legislation or other regulatory initiatives by the IMO, European Union, the United States or other countries or states where we operate that restrict emissions of greenhouse gases could have a significant financial and operational impact on our business that we cannot predict with certainty at this time.

Vessel Security

The ISPS was adopted by the IMO in December 2002 in the wake of heightened concern over worldwide terrorism and became effective on July 1, 2004. The objective of ISPS is to enhance maritime security by detecting security threats to ships and ports and by requiring the development of security plans and other measures designed to prevent such threats. The United States implemented ISPS with the adoption of the Maritime Transportation Security Act of 2002 (or *MTSA*), which requires vessels entering U.S. waters to obtain certification by the Coast Guard of plans to respond to emergency incidents there, including identification of persons authorized to implement the plans. Each of the existing vessels in our fleet currently complies with the requirements of ISPS and MTSA.

D. Taxation of the Company

The following discussion is a summary of the principal tax laws applicable to us. The following discussion of tax matters, as well as the conclusions regarding certain issues of tax law that are reflected in such discussion, are based on current law. No assurance can be given that changes in or interpretation of existing laws will not occur or will not be retroactive or that anticipated future factual matters and circumstances will in fact occur. Our views have no binding effect or official status of any kind, and no assurance can be given that the conclusions discussed below would be sustained if challenged by taxing authorities.

United States Taxation

The following discussion is based upon the provisions of the Internal Revenue Code of 1986, as amended (or the *Code*), applicable U.S. Treasury Regulations promulgated thereunder, judicial authority and administrative interpretations, as of the date of this Annual Report, all of which are subject to change, possibly with retroactive effect, or are subject to different interpretations.

Taxation of Operating Income. A significant portion of our gross income will be attributable to the transportation of crude oil and related products. For this purpose, gross income attributable to transportation (or *Transportation Income*) includes income derived from, or in connection with, the use (or hiring or leasing for use) of a vessel to transport cargo, or the performance of services directly related to the use of any vessel to transport cargo, and thus includes both time-charter or bareboat charter income.

Transportation Income that is attributable to transportation that begins or ends, but that does not both begin and end, in the United States (or *U.S. Source International Transportation Income*) will be considered to be 50.0% derived from sources within the United States. Transportation Income attributable to transportation that both begins and ends in the United States (or *U.S. Source Domestic Transportation Income*) will be considered to be 100.0% derived from sources within the United States. Transportation Income attributable to transportation exclusively between non-U.S. destinations will be considered to be 100% derived from sources outside the United States. Transportation Income derived from sources outside the United States generally will not be subject to U.S. federal income tax.

We have made special U.S. tax elections to treat as partnerships or disregarded as entities separate from us for U.S. federal income tax purposes some of our vessel-owning or vessel-operating subsidiaries that are potentially engaged in activities which could give rise to U.S. Source International Transportation Income. Other subsidiaries that are engaged in activities which could give rise to U.S. Source International Transportation Income rely on our ability to claim exemption under Section 883 of the Code (or the *Section 883 Exemption*).

The Section 883 Exemption. In general, the Section 883 Exemption provides that if a non-U.S. corporation satisfies the requirements of Section 883 of the Code and the Treasury Regulations thereunder (or the *Section 883 Regulations*), it will not be subject to the net basis and branch taxes or 4.0% gross basis tax described below on its U.S. Source International Transportation Income. The Section 883 Exemption only applies to U.S. Source International Transportation Income. As discussed below, we believe the Section 883 Exemption will apply and we will not be taxed on our U.S. Source International Transportation Income. The Section 883 Exemption does not apply to U.S. Source Domestic Transportation Income.

A non-U.S. corporation will qualify for the Section 883 Exemption if it is organized in a jurisdiction outside the United States that grants an equivalent exemption from tax to corporations organized in the United States (or an *Equivalent Exemption*), it satisfies one of three ownership tests (or the *Ownership Test*) described in the Final Section 883 Regulations and it meets certain substantiation, reporting and other requirements.

We are organized under the laws of the Republic of the Marshall Islands. The U.S. Treasury Department has recognized the Republic of the Marshall Islands as a jurisdiction that grants an Equivalent Exemption. Consequently, our U.S. Source International Transportation Income (including for this purpose, any such income earned by our subsidiaries that have properly elected to be treated as partnerships or disregarded as entities separate from us for U.S. federal income tax purposes) will be exempt from U.S. federal income taxation provided we meet the Ownership Test described in the Section 883 Regulations. We believe that we should satisfy the Ownership Test because our stock is primarily and regularly traded on an established securities market in the United States within the meaning of the Section 883 of the Code and the Treasury Regulations thereunder. We can give no assurance that any changes in the ownership of our stock subsequent to the date of this report will permit us to continue to qualify for the Section 883 exemption.

Table of Contents

The Net Basis Tax and Branch Profits Tax. If we earn U.S. Source International Transportation Income and the Section 883 Exemption does not apply, such income may be treated as effectively connected with the conduct of a trade or business in the United States (or *Effectively Connected Income*) if we have a fixed place of business in the United States and substantially all of our U.S. Source International Transportation Income is attributable to regularly scheduled transportation or, in the case of bareboat charter income, is attributable to a fixed place of business in the United States. Based on our current operations, none of our potential U.S. Source International Transportation Income is attributable to regularly scheduled transportation or is received pursuant to bareboat charters attributable to a fixed place of business in the United States. As a result, we do not anticipate that any of our U.S. Source International Transportation Income will be treated as Effectively Connected Income. However, there is no assurance that we will not earn income pursuant to regularly scheduled transportation or bareboat charters attributable to a fixed place of business in the United States in the future, which would result in such income being treated as Effectively Connected Income.

U.S. Source Domestic Transportation Income generally will be treated as Effectively Connected Income. However, we do not anticipate that any of our income has or will be U.S. Source Domestic Transportation Income.

Any income we earn that is treated as Effectively Connected Income would be subject to U.S. federal corporate income tax (the highest statutory rate currently is 35.0%). In addition, if we earn income that is treated as Effectively Connected Income, a 30.0% branch profits tax imposed under Section 884 of the Code generally would apply to such income, and a branch interest tax could be imposed on certain interest paid or deemed paid by us.

On the sale of a vessel that has produced Effectively Connected Income, we could be subject to the net basis corporate income tax and to the 30.0% branch profits tax with respect to our gain not in excess of certain prior deductions for depreciation that reduced Effectively Connected Income. Otherwise, we would not be subject to U.S. federal income tax with respect to gain realized on the sale of a vessel, provided the sale is considered to occur outside of the United States under U.S. federal income tax principles.

The 4.0% Gross Basis Tax. If the Section 883 Exemption does not apply and the net basis tax does not apply, we would be subject to a 4.0% U.S. federal income tax on the U.S. source portion of our gross U.S. Source International Transportation Income, without benefit of deductions. For 2009, we estimate the U.S. federal income tax on such U.S. Source International Transportation Income would have been approximately \$6 million. In addition, we estimate that our subsidiaries unable to claim the Section 883 Exemption will be subject to less than \$500,000 in the aggregate of U.S. federal income tax on the U.S. source portion of their U.S. Source International Transportation Income. The amount of such tax for which we or our subsidiaries may be liable for in any year will depend upon the amount of income we earn from voyages into or out of the United States in such year, however, which is not within our complete control.

Marshall Islands Taxation

We believe that neither we nor our subsidiaries will be subject to taxation under the laws of the Marshall Islands, or that distributions by our subsidiaries to us will be subject to any taxes under the laws of the Marshall Islands.

Other Taxation

We and our subsidiaries are subject to taxation in certain non- U.S. jurisdictions because we or our subsidiaries are either organized, or conduct business or operations, in such jurisdictions. We intend that our business and the business of our subsidiaries will be conducted and operated in a manner that minimizes taxes imposed upon us and our subsidiaries. However, we cannot assure this result as tax laws in these or other jurisdictions may change or we may enter into new business transactions relating to such jurisdictions, which could affect our tax liability. Please read Item 18 Financial Statements: Note 21 Income Taxes.

Item 4A. Unresolved Staff Comments

None.

Item 5. Operating and Financial Review and Prospects

The following discussion should be read in conjunction with the financial statements and notes thereto appearing elsewhere in this report.

Management's Discussion and Analysis of Financial Condition and Results of Operations**Overview**

Teekay Corporation (*Teekay* or *the Company*) is a leading provider of international crude oil and gas marine transportation services and also offer offshore oil production, storage and offloading services, primarily under long-term, fixed-rate contracts. Over the past decade, we have undergone a major transformation from being primarily an owner of ships in the cyclical spot tanker business to being a growth-oriented asset manager in the Marine Midstream sector. This transformation has included the expansion into the liquefied natural gas (or *LNG*) and liquefied petroleum gas (or *LPG*) shipping sectors through our publicly-listed subsidiary Teekay LNG Partners L.P. (*Teekay LNG*), further growth of our operations in the offshore production, storage and transportation sector through our publicly-listed subsidiary Teekay Offshore Partners L.P. (*Teekay Offshore*) and through Teekay Petrojarl AS (*Teekay Petrojarl*), and expansion of our conventional tanker business through our publicly-listed subsidiary Teekay Tankers Ltd. (*Teekay Tankers*). With a fleet of over 150 vessels, offices in 16 countries and approximately 6,300 seagoing and shore-based employees, Teekay provides comprehensive marine services to the world's leading oil and gas companies, helping them seamlessly link their upstream energy production to their downstream processing operations. Our goal is to create the industry's leading asset management company focused on the Marine Midstream space.

Table of Contents**SIGNIFICANT DEVELOPMENTS IN 2009 AND EARLY 2010****Public Offering of \$450 Million Senior Unsecured Notes**

In January 2010, we completed a public offering of \$450 million senior unsecured notes due 2020, which bear interest at a rate of 8.5% per year. We used a portion of the offering proceeds to repurchase the majority of our outstanding 8.875% senior notes due 2011, and the remainder to repay amounts outstanding under a term loan and a portion of outstanding debt under one of our revolving credit facilities. Please read Item 18 Financial Statements: Note 24(a) Subsequent Events.

Sale of Vessels to Teekay LNG

During August 2009, Teekay LNG completed the purchase of 99% of our 70% interest in two 155,000 cubic meter newbuilding LNG carriers (or the *Tangguh LNG Carriers*) for approximately \$70 million. The *Tangguh LNG Carriers*, which commenced operations in November 2008 and January 2009, provide transportation services to The *Tangguh Production Sharing Contractors*, a consortium led by a subsidiary of BP plc, to service the *Tangguh LNG* project in Indonesia. The vessels have been chartered at fixed rates, with inflation adjustments, for a period of 20 years. An Indonesian joint venture partner owns the remaining 30% interest in these vessels.

During March 2010, Teekay LNG acquired from us two 2009-built Suezmax tankers, the *Bermuda Spirit* and the *Hamilton Spirit*, and one 2007-built Handymax product tanker, the *Alexander Spirit*, for a total purchase price of \$160 million. Teekay LNG financed the purchase by assumption of \$126 million of existing debt related to two of the vessels and drew on one of its revolving credit facilities for the remainder. The *Bermuda Spirit* and the *Hamilton Spirit* are currently serving under 12-year fixed-rate contracts to Centrofin, an international owner of 28 vessels, and the *Alexander Spirit* is currently employed on a 10-year fixed-rate contract to Caltex Australia Petroleum Pty Ltd.

Public Offerings by Teekay LNG Partners L.P.

During March 2009, Teekay LNG completed a public offering of 4.0 million common units at a price of \$17.60 per unit, for gross proceeds of \$71.8 million (including the general partner's \$1.4 million proportionate capital contribution). As result of the offering, our ownership of Teekay LNG was reduced from 57.7% to 53.1% (including our 2% general partner interest). The total net proceeds from the offering of approximately \$68.5 million were used to repay amounts outstanding on two of Teekay LNG's revolving credit facilities.

During November 2009, Teekay LNG completed a public offering of 3.5 million common units at a price of \$24.40 per unit, for gross proceeds of \$87.1 million (including the general partner's \$1.7 million proportionate capital contribution). The underwriters partially exercised their over-allotment option and purchased an additional 450,600 million common units for an additional \$11.2 million in gross proceeds (including the general partner's \$0.3 million proportionate capital contribution). The total net proceeds from the offering were used to reduce amounts outstanding under one or more of Teekay LNG's revolving credit facilities. As a result of the offering including the underwriters' exercise of the over-allotment option, our ownership of Teekay LNG was reduced from 53.1% to 49.2% (including our 2% general partner interest). We maintained control of Teekay LNG by virtue of our control of the general partner and continue to consolidate this subsidiary.

Public Offerings by and Sale of Vessels to Teekay Tankers Ltd.

During June 2009, Teekay Tankers completed a public offering of 7.0 million shares of Class A Common Stock at a price of \$9.80 per share, for gross proceeds of \$68.6 million. Teekay Tankers used the total net offering proceeds of approximately \$65.6 million to acquire a 2003-built Suezmax tanker from Teekay for \$57.0 million and to repay a portion of its outstanding debt under its revolving credit facility. As a result of the offering, our ownership of Teekay Tankers was reduced from 54.0% to 42.2%. We maintained voting control of Teekay Tankers and continue to consolidate this subsidiary.

During April 2010, Teekay Tankers completed a public offering of 7.7 million common shares at a price of \$12.25 per share, for gross proceeds of \$94.3 million. The underwriters partially exercised their overallotment option and purchased an additional 1,079,500 common shares, for an additional gross proceeds of \$13.2 million. In connection with an existing agreement, Teekay agreed to offer to Teekay Tankers by June 18, 2010 the opportunity to purchase an additional Suezmax-class oil tanker at fair market value. The total net proceeds from the offering were used to acquire from Teekay this additional Suezmax tanker, the *Yamuna Spirit*, in addition to two other vessels: a Suezmax tanker, the *Kaveri Spirit*, and an Aframax tanker, the *Helga Spirit* for a total purchase price of \$168.7 million. As part

of the purchase price for these vessels, Teekay Tankers issued to us 2.6 million of unregistered common shares valued on a per-share basis at the public offering price of \$12.25. As a result of the offering, including the underwriters exercise of the over-allotment option, we own 37.1 % in Teekay Tankers.

Public Offerings by Teekay Offshore Partners L.P.

During August 2009, Teekay Offshore completed a public offering of 7.475 million common units (including 975,000 units issued upon the exercise in full of the underwriter s overallotment option) at a price of \$14.32 per unit for net proceeds of \$104.3 million. In connection with the public offering, we contributed \$2.2 million to Teekay Offshore to maintain our 2% general partner interest. The total net proceeds from the offering were used to reduce amounts outstanding under one of Teekay Offshore s revolving credit facilities. As a result of the above transactions, our ownership of Teekay Offshore was reduced from 50.0% to 40.5% (including our 2% general partner interest).

During March 2010, Teekay Offshore completed a public offering of 4.4 million common units at a price of \$19.48 per unit, for gross proceeds of \$87.5 million (including the general partner s \$1.7 million proportionate capital contribution). The underwriters concurrently exercised their overallotment option to purchase an additional 660,000 units on March 22, 2010, providing additional gross proceeds of \$13.1 million (including the general partner s \$0.3 million proportionate capital contribution). Teekay Offshore used the total net proceeds from the offering to repay the vendor financing of \$60.0 million for the acquisition from us of the FPSO unit, the *Petrojarl Varg* (as discussed below) and to finance a portion of the April 2010 acquisition of the FSO unit, the *Falcon Spirit*, from us for \$45.0 million. As a result of the above transactions, our ownership of Teekay Offshore was reduced from 40.5% to 35.9% (including our 2% general partner interest). We maintained control of Teekay Offshore by virtue of our control of the general partner and continue to consolidate this subsidiary.

Table of Contents**Sale of FPSO Unit to Teekay Offshore**

On September 10, 2009, Teekay Offshore acquired the *Petrojarl Varg* floating production, storage and offtake (or FPSO) unit from us for a purchase price of \$320 million. We provided vendor financing in the amount of \$220 million with the remainder financed by Teekay Offshore from its existing debt facilities. A new \$260 million revolving credit facility, secured by the *Petrojarl Varg* FPSO unit, was arranged and completed in November 2009. A portion of the new facility was drawn to repay \$160 million of the \$220 million vendor financing provided by us at the time of the *Petrojarl Varg* acquisition.

The fixed-rate contract with *Petrojarl Varg* FPSO unit operates under a fixed-rate contract, which was recently extended for four years with Talisman Energy on the Varg oil field in the North Sea, where the FPSO has been operating for over ten years. Talisman Energy also has options to extend the new contract for up to an additional nine years. The contract is comprised of a daily base time-charter rate plus an incentive component based on the operational performance of the FPSO, a tariff component based on the volume of oil produced and an annual adjustment for cost escalations. There is potential for additional upside from the tariff component if, as expected, nearby oil fields become operational and are tied into the *Petrojarl Varg*.

Long-term Charter to Caltex Australia Petroleum Pty Ltd.

In September 2009, we purchased a 2007-built, 40,000 deadweight tonne product tanker for approximately \$35 million. The vessel, renamed the *Alexander Spirit*, commenced a 10-year, fixed-rate time charter to Caltex Australia Petroleum Pty Ltd. on September 3, 2009. As discussed above, we sold the *Alexander Spirit* to Teekay LNG in March 2010.

Foinaven FPSO Contract Amendment

In March 2010, we signed an agreement with the Foinaven operator and Foinaven co-venturers to amend the operating contract for our *Foinaven* FPSO unit, which also includes transportation services provided by two shuttle tankers. The amended contract provides a commercial agreement which secures the provision of operating services for the Foinaven field until at least 2021 and includes operating performance incentives which increase the revenue generated by the *Foinaven* FPSO unit.

The amended contract, which applied from January 1, 2010, is comprised of the following components: a daily rate, part of which is earned based on agreed operating performance incentives (adjusted annually based on industry indices); a production tariff based on the volume of oil produced; and a supplemental tariff based on both the volume of oil produced and the annual average Brent Crude Oil price. As a result, the *Foinaven* FPSO unit is expected to generate incremental operating cash flow and net income of approximately \$30 million to \$40 million per annum over the anticipated life of the contract period.

Under the amended contract, we will also receive payments of approximately \$60 million, relating to the *Foinaven* FPSO unit's operations in previous years. The first installment of approximately \$30 million is payable by the end of April 2010 and the balance is expected to be payable in the third quarter of 2010. We expect to recognize approximately \$30 million in revenue in the first quarter of 2010 in conjunction with the signing of the amended agreement, and we expect the second \$30 million will be recognized in the second quarter of 2010 upon the completion of certain conditions.

OTHER SIGNIFICANT PROJECTS**Angola LNG Project**

We have a 33% interest in a consortium that will charter four newbuilding 160,400-cubic meter LNG carriers for a period of 20 years to the Angola LNG Project, which is being developed by subsidiaries of Chevron Corporation, Sociedade Nacional de Combustiveis de Angola EP, BP Plc, Total S.A., and Eni SpA. Final award of the charter contract was made in December 2007. The vessels will be chartered at fixed rates, with inflation adjustments, commencing in 2011. Mitsui & Co., Ltd. and NYK Bulkship (Europe) Ltd., have 34% and 33% interests in the consortium, respectively. In accordance with existing agreements, we are required to offer to Teekay LNG our 33% interest in these vessels and related charter contracts no later than 180 days before the scheduled delivery dates of the vessels. Deliveries of the vessels are scheduled between August 2011 and January 2012. Please read Item 1 Financial Statements: Note 16(b) Commitments and Contingencies Joint Ventures.

IMPORTANT FINANCIAL AND OPERATIONAL TERMS AND CONCEPTS

We use a variety of financial and operational terms and concepts when analyzing our performance. These include the following:

Revenues. Revenues primarily include revenues from voyage charters, pool arrangements, time-charters accounted for under operating and direct financing leases, contracts of affreightment and FPSO service contracts. Revenues are affected by hire rates and the number of days a vessel operates and the daily production volume on FPSO units. Revenues are also affected by the mix of business between time-charters, voyage charters, contracts of affreightment and vessels operating in pool arrangements. Hire rates for voyage charters are more volatile, as they are typically tied to prevailing market rates at the time of a voyage.

Forward Freight Agreements. We are exposed to freight rate risk for vessels in our spot tanker segment from changes in spot tanker market rates for vessels. In certain cases, we use forward freight agreements (or *FFAs*) to manage this risk. FFAs involve contracts to provide a fixed number of theoretical voyages at fixed rates, thus hedging a portion of our exposure to the spot-charter market. These agreements are recorded as assets or liabilities and measured at fair value. The Company has not designated these contracts as cash flow hedges for accounting purposes. Net gains and losses from FFAs are recorded within realized and unrealized gain (loss) on non-designated derivative instruments in the consolidated statements of income (loss).

Voyage Expenses. Voyage expenses are all expenses unique to a particular voyage, including any bunker fuel expenses, port fees, cargo loading and unloading expenses, canal tolls, agency fees and commissions. Voyage expenses are typically paid by the customer under time-charters and FPSO service contracts and by us under voyage charters and contracts of affreightment.

Table of Contents

Net Revenues. Net revenues represent revenues less voyage expenses. Because the amount of voyage expenses we incur for a particular charter depends upon the form of the charter, we use net revenues to improve the comparability between periods of reported revenues that are generated by the different forms of charters and contracts. We principally use net revenues, a non-GAAP financial measure, because it provides more meaningful information to us about the deployment of our vessels and their performance than revenues, the most directly comparable financial measure under United States generally accepted accounting principles (or *GAAP*).

Vessel Operating Expenses. Under all types of charters and contracts for our vessels, except for bareboat charters, we are responsible for vessel operating expenses, which include crewing, repairs and maintenance, insurance, stores, lube oils and communication expenses. We expect these expenses to increase as our fleet matures and to the extent that it expands.

Income from Vessel Operations. To assist us in evaluating our operations by segment, we analyze our income from vessel operations for each segment, which represents the income we receive from the segment after deducting operating expenses, but prior to the deduction of interest expense, realized and unrealized gains (losses) on non-designated derivative instruments, income taxes, foreign currency and other income and losses.

Drydocking. We must periodically drydock each of our vessels for inspection, repairs and maintenance and any modifications to comply with industry certification or governmental requirements. Generally, we drydock each of our vessels every two and a half to five years, depending upon the type of vessel and its age. In addition, a shipping society classification intermediate survey is performed on our LNG and LPG carriers between the second and third year of the five-year drydocking period. We capitalize a substantial portion of the costs incurred during drydocking and for the survey and amortize those costs on a straight-line basis from the completion of a drydocking or intermediate survey over the estimated useful life of the drydock. We expense as incurred costs for routine repairs and maintenance performed during drydocking that do not improve or extend the useful lives of the assets and annual class survey costs for our FPSO units. The number of drydockings undertaken in a given period and the nature of the work performed determine the level of drydocking expenditures.

Depreciation and Amortization. Our depreciation and amortization expense typically consists of:

- charges related to the depreciation and amortization of the historical cost of our fleet (less an estimated residual value) over the estimated useful lives of our vessels;
- charges related to the amortization of drydocking expenditures over the useful life of the drydock; and
- charges related to the amortization of intangible assets, including the fair value of the time-charters, contracts of affreightment, customer relationships and intellectual property where amounts have been attributed to those items in acquisitions; these amounts are amortized over the period in which the asset is expected to contribute to our future cash flows.

Time-Charter Equivalent (TCE) Rates. Bulk shipping industry freight rates are commonly measured in the shipping industry at the net revenues level in terms of time-charter equivalent (or *TCE*) rates, which represent net revenues divided by revenue days.

Revenue Days. Revenue days are the total number of calendar days our vessels were in our possession during a period, less the total number of off-hire days during the period associated with major repairs, drydockings or special or intermediate surveys. Consequently, revenue days represent the total number of days available for the vessel to earn revenue. Idle days, which are days when the vessel is available for the vessel to earn revenue, yet is not employed, are included in revenue days. We use revenue days to explain changes in our net revenues between periods.

Calendar-Ship-Days. Calendar-ship-days are equal to the total number of calendar days that our vessels were in our possession during a period. As a result, we use calendar-ship-days primarily in explaining changes in vessel operating expenses, time-charter hire expense and depreciation and amortization.

Restricted Cash Deposits. Under the terms of the tax leases for four of our LNG carriers, we are required to have on deposit with financial institutions an amount of cash that, together with interest earned on the deposit, will equal the remaining amounts owing under the leases, including the obligations to purchase the LNG carriers at the end of the lease periods, where applicable. During vessel construction, however, the amount of restricted cash approximates the accumulated vessel construction costs. These cash deposits are restricted to being used for capital lease payments and have been fully funded with term loans and loans from our joint venture partners. Please read Item 18 Financial

Statements: Note 10 Capital Leases and Restricted Cash.

ITEMS YOU SHOULD CONSIDER WHEN EVALUATING OUR RESULTS

You should consider the following factors when evaluating our historical financial performance and assessing our future prospects:

Our revenues are affected by cyclical nature in the tanker markets. The cyclical nature of the tanker industry causes significant increases or decreases in the revenue we earn from our vessels, particularly those we trade in the spot market. This affects the amount of dividends, if any, we pay on our common stock from period to period.

Tanker rates also fluctuate based on seasonal variations in demand. Tanker markets are typically stronger in the winter months as a result of increased oil consumption in the northern hemisphere but weaker in the summer months as a result of lower oil consumption in the northern hemisphere and increased refinery maintenance. In addition, unpredictable weather patterns during the winter months tend to disrupt vessel scheduling, which historically has increased oil price volatility and oil trading activities in the winter months. As a result, revenues generated by our vessels have historically been weaker during the quarters ended June 30 and September 30, and stronger in the quarters ended December 31 and March 31.

The size of our fleet continues to change. Our results of operations reflect changes in the size and composition of our fleet due to certain vessel deliveries and vessel dispositions. Please read Results of Operations below for further details about vessel dispositions and deliveries. Due to the nature of our business, we expect our fleet to continue to fluctuate in size and composition.

Table of Contents

Our vessel operating expenses are facing industry-wide cost pressures. The oil shipping industry is experiencing a global manpower shortage due to growth in the world fleet. This shortage resulted in significant crew wage increases during 2007, 2008, and to a lesser degree in 2009. We expect the trend of significant crew compensation increases to abate in the short term. However, this could change if market conditions adjust. In addition, factors such as pressure on raw material prices and changes in regulatory requirements could also increase operating expenditures. We have taken various measures throughout 2009 in an effort to reduce costs, improve operational efficiencies, and mitigate the impact of inflation and price increases and will continue this effort during 2010.

Our net income is affected by fluctuations in the fair value of our derivatives. Our interest rate swaps and some of our foreign currency forward contracts are not designated as hedges for accounting purposes. Although we believe these derivative instruments are economic hedges, the changes in their fair value are included in our statements of income (loss) as unrealized gains or losses on non-designated derivatives. The changes in fair value do not affect our cash flows or liquidity.

The amount and timing of drydockings of our vessels can affect our revenues between periods. Our vessels are offhire at various points of time due to scheduled and unscheduled maintenance. During the years ended December 31, 2009 and 2008, we incurred 650 and 840 off-hire days relating to drydocking, respectively. The financial impact from these periods of offhire, if material, is explained in further detail below in Results of Operations. Twenty-six vessels are scheduled for drydocking in 2010.

RESULTS OF OPERATIONS

In accordance with GAAP, we report gross revenues in our income statements and include voyage expenses among our operating expenses. However, ship-owners base economic decisions regarding the deployment of their vessels upon anticipated TCE rates, and industry analysts typically measure bulk shipping freight rates in terms of TCE rates. This is because under time-charter contracts and FPSO service contracts the customer usually pays the voyage expenses, while under voyage charters and contracts of affreightment the ship-owner usually pays the voyage expenses, which typically are added to the hire rate at an approximate cost. Accordingly, the discussion of revenue below focuses on net revenues and TCE rates of our four reportable segments where applicable.

We manage our business and analyze and report our results of operations on the basis of four segments: the shuttle tanker and FSO segment, the FPSO segment, the liquefied gas segment, and the conventional tanker segment. In order to provide investors with additional information about our conventional tanker segment, we have divided this operating segment into the fixed-rate tanker segment and the spot tanker segment. Please read Item 18 Financial Statements: Note 2 Segment Reporting.

Year Ended December 31, 2009 versus Year Ended December 31, 2008***Shuttle Tanker and FSO Segment***

Our shuttle tanker and FSO segment (which includes our *Teekay Navion Shuttle Tankers and Offshore* business unit) includes our shuttle tankers and FSO units. The shuttle tanker and FSO segment had four shuttle tankers under construction as at December 31, 2009. Please read Item 18 Financial Statements: Note 16 Commitments and Contingencies. We use these vessels to provide transportation and storage services to oil companies operating offshore oil field installations. All of these shuttle tankers provide transportation services to energy companies, primarily in the North Sea and Brazil. Our shuttle tankers service the conventional spot market from time to time. Spot rates during 2009 have experienced significant declines compared to 2008 as a result of the contraction in the global economy.

The following table presents our shuttle tanker and FSO segment's operating results and compares its net revenues (which is a non-GAAP financial measure) to revenues, the most directly comparable GAAP financial measure. The following table also provides a summary of the changes in calendar-ship-days by owned and chartered-in vessels for our shuttle tanker and FSO segment:

	Twelve Months Ended December 31,		%
(in thousands of U.S. dollars, except calendar-ship-days and percentages)	2009	2008	Change

Edgar Filing: TEEKAY CORP - Form 20-F

Revenues	583,320	705,461	(17.3)
Voyage expenses	86,499	171,599	(49.6)
Net revenues	496,821	533,862	(6.9)
Vessel operating expenses	170,312	173,067	(1.6)
Time-charter hire expense	113,786	134,100	(15.1)
Depreciation and amortization	122,630	117,198	4.6
General and administrative ⁽¹⁾	54,074	56,831	(4.9)
Loss (gain) on sale of vessels and equipment, net of write-downs	1,902	(3,771)	(150.4)
Restructuring charge	7,032	10,645	(33.9)
Income from vessel operations	27,085	45,792	(40.9)
Calendar-Ship-Days			
Owned Vessels	10,950	10,463	4.7
Chartered-in Vessels	2,727	3,765	(27.6)
Total	13,677	14,228	(3.9)

(1) Includes direct general and administrative expenses and indirect general and administrative expenses (allocated to the shuttle tanker and FSO segment based on estimated use of corporate resources). For further discussion, please read Other Operating Results General and Administrative.

Table of Contents

The average fleet size of our shuttle tanker and FSO segment (including vessels chartered-in) decreased during 2009 compared to 2008. This was primarily the due to a decline in the number of chartered-in shuttle tankers.

Net Revenues. Net revenues decreased to \$496.8 million for 2009, from \$533.9 million for 2008, primarily due to:

- a decrease of \$54.9 million due to fewer revenue days from shuttle tankers servicing contracts of affreightment and from trading in the conventional spot market, and lower spot rates achieved in the conventional spot market, compared the same period last year;
- a decrease from our FSO units of \$2.9 million primarily due to unfavorable exchange rates compared to the prior period;

- a decrease of \$2.5 million from the *Navion Saga* being offhire for 43 days in 2009 due to a scheduled drydock;

- a decrease of \$1.8 million due to a decrease in the recovery of certain Norwegian environmental taxes from our customers; and

- a decrease of \$1.5 million due to declining oil production at mature oil fields in the North Sea that are serviced by certain shuttle tankers on contracts of affreightment;

partially offset by

- an increase of \$14.1 million for 2009 due to rate increases on certain contracts of affreightment, partially offset by rate decreases in certain time-charter and bareboat contracts;

- an increase of \$5.3 million due to reduced non-reimbursable bunker costs resulting primarily from decreased voyage days, as compared to the same period last year;

- an increase of \$3.5 million due to a decrease in the number of offhire days resulting from scheduled drydockings primarily in the time-chartered fleet, and unexpected repairs compared to the same periods last year; and

- an increase of \$3.5 million due to reduced customer performance claims paid in 2009 under the terms of charter party agreements compared to 2008.

Vessel Operating Expenses. Vessel operating expenses decreased to \$170.3 million for 2009, from \$173.1 million for 2008, primarily due to:

- a decrease of \$2.9 million in repairs and maintenance costs performed for certain vessels in 2009 as compared to last year;

- a decrease of \$1.1 million primarily due to a reduction in projects during 2009 as compared to last year;

- a decrease of \$0.8 million in crew and manning costs as compared to last year, resulting primarily from cost savings initiatives that began in 2009; and

- a decrease of \$0.6 million in FSO unit operating expenses of primarily due to the offhire of one vessel in the third quarter of 2009;

partially offset by

- an increase of \$3.6 million due to an increase in the number of vessels drydocked, and the consumption and use of consumables, lube oil, and freight during 2009.

Time-Charter Hire Expense. Time-charter hire expense decreased to \$113.8 million for 2009, from \$134.1 million for 2008, primarily due to a decrease in the number of chartered-in vessels.

Depreciation and Amortization. Depreciation and amortization expense increased to \$122.6 million for 2009, from \$117.2 million for 2008, primarily due to higher amortization expense relating to capitalized drydock and vessel upgrade costs for certain of our shuttle tankers, partially offset by lower amortization on our FSO units.

(Loss) Gain on Sale of Vessels and Equipment Net of Write-downs. Loss on sale of vessels and equipment for 2009 of \$1.9 million was primarily due to a write-down of certain offshore vessel equipment.

Restructuring Charges. During the year ended December 31, 2009, we incurred restructuring charges of \$7.0 million relating to costs incurred for the reflagging of certain vessels, the closure of one of our offices in Norway, and global staffing changes.

FPSO Segment

Our FPSO segment (which includes our Teekay Petrojarl business unit) includes our FPSO units and other vessels used to service our FPSO contracts. We use these units and vessels to provide transportation, production, processing and storage services to oil companies operating offshore oil field installations. These services are typically provided under long-term fixed-rate time-charter contracts, contracts of affreightment or FPSO service contracts. Historically, the utilization of FPSO units and other vessels in the North Sea is higher in the winter months, as favorable weather conditions in the summer months provide opportunities for repairs and maintenance to our offshore oil platforms, which generally reduces oil production.

Table of Contents

The following table presents our FPSO segment's operating results and also provides a summary of the changes in calendar-ship-days for our FPSO segment:

(in thousands of U.S. dollars, except calendar-ship-days and percentages)	Twelve Months Ended December 31,		% Change
	2009	2008	
Revenues	390,576	383,752	1.8
Vessel operating expenses	197,480	216,998	(9.0)
Depreciation and amortization	102,316	91,734	11.5
General and administrative ⁽¹⁾	37,652	50,918	(26.1)
Goodwill impairment charge		334,165	(100.0)
Loss on sale of vessels and equipment, net of write-downs		12,019	(100.0)
Income (loss) from vessel operations	53,128	(322,082)	(116.5)
Calendar-Ship-Days			
Owned Vessels	3,101	3,205	(3.2)
Total	3,101	3,205	(3.2)

(1) Includes direct general and administrative expenses and indirect general and administrative expenses (allocated to the FPSO segment based on estimated use of corporate resources). For further discussion, please read Other Operating Results - General and Administrative.

The average fleet size of our FPSO segment (including vessels chartered-in) decreased during 2009 compared to 2008. This was the result of one shuttle tanker that was converted to an FSO unit and transferred to the shuttle tanker and FSO segment in the fourth quarter of 2009.

Revenues. Revenues increased to \$390.6 million for 2009, from \$383.8 million for 2008, primarily due to:

an increase of \$5.7 million, primarily from the delivery of a new FPSO unit in February 2008 (or the *FPSO Delivery*) and the *Petrojarl Varg* FPSO unit commencing a new four-year fixed-rate contract extension with Talisman Energy beginning in the third quarter of 2009, partially offset by lower revenues in other FPSO units due to lower oil production compared to the prior periods and the conversion of a shuttle tanker to an FSO unit; and

an increase of \$1.1 million, from the amortization of contract value liabilities relating to FPSO service contracts (as discussed below), which was recognized on the date of the acquisition by us of a controlling interest in Teekay Petrojarl.

As part of our acquisition of Teekay Petrojarl, we assumed certain FPSO service contracts that had terms that were less favorable than prevailing market terms at the time of acquisition. This contract value liability, which was recognized on the date of acquisition, is being amortized to revenue over the remaining firm period of the current FPSO contracts on a weighted basis based on the projected revenue to be earned under the contracts. The amount of amortization relating to these contracts included in revenue for 2009 was \$67.7 million (2008 \$66.6 million). Please read Item 18 Financial Statements: Note 6 Goodwill, Intangible Assets and In-Process Revenue Contracts.

Table of Contents

Vessel Operating Expenses. Vessel operating expenses decreased to \$197.5 million for 2009, from \$217.0 million for 2008, primarily due to:

- a decrease of \$18.2 million from decreases in service costs due to the timing of certain projects, cost saving initiatives, and the strengthening of the U.S. Dollar against the Norwegian Kroner; and
- a decrease of \$1.3 million from lower insurance charges.

Depreciation and Amortization. Depreciation and amortization expense increased to \$102.3 million for 2009, from \$91.7 million for 2008, primarily due to:

- an increase of \$5.6 million from the finalization of preliminary estimates of fair value assigned to certain assets included in our acquisition of Teekay Petrojarl; and
- an increase of \$5.0 million from the FPSO Delivery.

Loss on Sale of Vessels and Equipment Net of Write-downs. Loss on sale of vessels and equipment net of write-downs for 2009 was nil compared to the \$12.0 million impairment write-down of a 1986-built shuttle tanker in the prior year.

Goodwill Impairment Charge. There was no goodwill impairment charge in 2009. In the prior year, management concluded that the carrying value exceeded the fair value of goodwill by \$334.2 million in the FPSO segment as of December 31, 2008, and as a result this amount was recognized as an impairment loss in our consolidated statements of income (loss). Please read Item 18 Financial Statements: Note 6 Goodwill, Intangible Assets and In-Process Revenue Contracts.

Liquefied Gas Segment

Our liquefied gas segment (which includes our *Teekay Gas Services* business unit) consists of LNG and LPG carriers subject to long-term, fixed-rate time-charter contracts. We accepted delivery of two new LNG carriers between November 2008 and March 2009, and two new LPG carriers between April 2009 and November 2009. At December 31, 2009, we had one LPG carrier under construction and scheduled for delivery in June 2010. In addition, we have four LNG carriers under construction that are scheduled for delivery between August 2011 and January 2012, and two multi-gas carriers under construction are both scheduled for delivery in 2011. Upon delivery, all of these vessels will commence operation under long-term, fixed-rate time-charters. Please read Item 18 Financial Statements: Note 16(a) Commitments and Contingencies Vessels Under Construction and Note 16(b) - Commitments and Contingencies Joint Ventures.

The following table presents our liquefied gas segment's operating results and compares its net revenues (which is a non-GAAP financial measure) to revenues, the most directly comparable GAAP financial measure. The following table also provides a summary of the changes in calendar-ship-days by owned vessels for our liquefied gas segment:

(in thousands of U.S. dollars, except calendar-ship-days and percentages)	Twelve Months Ended		% Change
	December 31,		
	2009	2008	
Revenues	246,472	221,930	11.1
Voyage expenses	1,018	1,009	0.9
Net revenues	245,454	220,921	11.1
Vessel operating expenses	49,466	48,185	2.7
Depreciation and amortization	59,868	58,371	2.6
General and administrative ⁽¹⁾	21,245	23,072	(7.9)
Restructuring charge	4,177	634	558.8
Income from vessel operations	110,698	90,659	22.1

Calendar-Ship-Days Owned Vessels and Vessels under Direct Financing Lease	4,637	3,701	25.3
--	-------	-------	------

(1) Includes direct general and administrative expenses and indirect general and administrative expenses (allocated to the liquefied gas segment based on estimated use of corporate resources). For further discussion, please read Other Operating Results General and Administrative.

The increase in the average fleet size of our liquefied gas segment from 2008 to 2009 was primarily due to the delivery of two new LNG carriers in November 2008 and March 2009, respectively (collectively the *Tangguh LNG Deliveries*) and the delivery of two new LPG carriers in April 2009 and November 2009 respectively (collectively the *LPG Deliveries*).

Net Revenues. Net revenues increased to \$245.4 million for 2009, from \$220.9 million for 2008, primarily due to:

- an increase of \$35.6 million due to the commencement of the time-charters from the *Tangguh LNG Deliveries* and the *LPG Deliveries*;
- an increase of \$3.0 million due to the *Catalunya Spirit* being off-hire for 34.3 days during 2008 for repairs; and
- an increase of \$1.0 million due to the *Polar Spirit* being off-hire for 18.5 days during 2008 for a scheduled drydock;

Table of Contents

partially offset by

- a decrease of \$6.9 million due to lower net revenues from the *Arctic Spirit* as a result of a decrease in the time-charter rate;
- a decrease of \$3.8 million due to the effect on our Euro-denominated revenues from the weakening of the Euro against the U.S. Dollar compared to the same period last year;
- a decrease of \$2.1 million due to the *Madrid Spirit* being off-hire for 25.2 days during the third quarter of 2009 for a scheduled drydock; and
- a decrease of \$1.8 million due to the *Galicia Spirit* being off-hire for 27.6 days during the third quarter of 2009 for a scheduled drydock.

Vessel Operating Expenses. Vessel operating expenses increased to \$49.5 million for 2009, from \$48.2 million for 2008, primarily due to:

- an increase of \$6.0 million from the Tangguh LNG Deliveries;

partially offset by

- a decrease of \$4.1 million relating to lower crew manning, insurance, and repairs and maintenance costs; and
- a decrease of \$0.8 million due to the effect on our Euro-denominated vessel operating expenses from the weakening of the Euro against the U.S. Dollar compared to the same periods last year (a portion of our vessel operating expenses are denominated in Euros, which is primarily a function of the nationality of our crew; our Euro-denominated revenues currently generally approximate our Euro-denominated expenses and Euro-denominated loan and interest payments).

Depreciation and Amortization. Depreciation and amortization increased to \$59.9 million in 2009, from \$58.4 million in 2008, primarily due to:

- an increase of \$1.1 million from the delivery of the *Tangguh Sago* in March 2009 prior to the commencement of the time-charter contract in May 2009 accounted for as a direct financing lease;
- an increase of \$1.0 million from the LPG Deliveries;
- an increase of \$0.2 million due to the amortization of costs associated with vessel cost expenditures during 2008; and
- an increase of \$0.2 million relating to the amortization of drydock expenditures incurred during 2009;

partially offset by

- a decrease of \$1.3 million due to revised depreciation estimates for certain of our vessels.

Restructuring Charges. During 2009, we incurred restructuring charges of \$4.2 million relating to costs incurred for global staffing and office changes.

Conventional Tankers Segment**a) Fixed-Rate Tanker Segment**

Our fixed-rate tanker segment, a subset of our conventional tanker segment (which includes our *Teekay Tankers Services* business unit), includes conventional crude oil and product tankers on long-term, fixed-rate time charters. The following table presents our fixed-rate tanker segment's operating results and compares its net revenues (which is a non-GAAP financial measure) to revenues, the most directly comparable GAAP financial measure. The following table also provides a summary of the changes in calendar-ship-days by owned and chartered-in vessels for our fixed-rate tanker segment:

(in thousands of U.S. dollars, except calendar-ship-days and percentages)	Twelve Months Ended December 31,		% Change
	2009	2008	
Revenues	297,385	265,849	11.9
Voyage expenses	5,505	5,010	9.9
Net revenues	291,880	260,839	11.9
Vessel operating expenses	80,285	68,065	18.0

Time-charter hire expense	44,026	43,048	2.3
Depreciation and amortization	59,610	44,578	33.7
General and administrative ⁽¹⁾	27,949	20,740	34.8
Loss on sale of vessels and equipment, net of write-downs	14,044	14,149	
Restructuring charge	1,044	1,991	(47.6)
Income from vessel operations	64,922	68,268	(4.9)
Calendar-Ship-Days			
Owned Vessels	9,143	6,824	34.0
Chartered-in Vessels	2,068	2,363	(12.5)
Total	11,211	9,187	22.0

(1) Includes direct general and administrative expenses and indirect general and administrative expenses (allocated to the fixed-rate tanker segment based on estimated use of corporate resources). For further discussion, please read Other Operating Results General and Administrative.

Table of Contents

The average fleet size of our fixed-rate tanker segment (including vessels chartered-in) increased in 2009 compared to 2008. This increase was primarily the result of:

- the delivery of two new Aframax tankers during January and March 2008 (collectively, the *Aframax Deliveries*);
- the transfer of two product tankers from the spot tanker segment in April 2008 upon commencement of long-term time-charters (the *Product Tanker Transfers*);
- the delivery of two new Suezmax tankers in June 2009 (collectively, the *Suezmax Deliveries*);
- the transfer of one Suezmax tanker from the spot tanker segment in November 2009 (the *Suezmax Transfer*);
- the purchase of a product tanker which commenced a 10-year fixed-rate time charter to Caltex Australia Petroleum Pty Ltd. during September 2009; and
- the transfer of six Aframax tankers, on a net basis, from the spot tanker segment in 2008 and 2009 upon commencement of long-term time-charters (the *Aframax Transfers*).

The Aframax Transfers consist of the transfer of six owned vessels and one chartered-in vessel from the spot tanker segment, and the transfer of one chartered-in vessel to the spot tanker segment. The effect of the transaction is to increase the fixed tanker segment's net revenues, time-charter expenses, vessel operating expenses, and depreciation and amortization expenses.

Net Revenues. Net revenues increased to \$291.9 million for 2009, from \$260.8 million for 2008, primarily due to:

- an increase of \$31.3 million from the Aframax Transfers;
- an increase of \$12.8 million from the Suezmax Deliveries;
- an increase of \$4.1 million from the purchase of the new product tanker;
- an increase of \$2.8 million from the Product Tanker Transfers;
- an increase of \$1.9 million from the Suezmax Transfer;
- an increase of \$1.4 million from the Aframax Deliveries; and
- an increase of \$1.0 million as two of our Suezmax tankers were off-hire for 48 days for scheduled drydockings during 2008;

partially offset by

- a decrease of \$16.2 million from decreased revenues earned by the *Teide Spirit* and the *Toledo Spirit* (the time charters for both these vessels provide for additional revenues to us beyond the fixed hire rate when spot tanker market rates exceed threshold amounts; the time-charter for the *Toledo Spirit* also provides for a reduction in revenues to us when spot tanker market rates are below threshold amounts); and
- a decrease of \$6.3 million due to interest-rate adjustments to the daily charter rates under the time-charter contracts for five Suezmax tankers (however, under the terms of the capital lease for these vessels, we had corresponding decreases in our lease payments, which are reflected as decreases to interest expense; therefore, these and future interest rate adjustments do not and will not affect our cash flow or net (loss) income).

Vessel Operating Expenses. Vessel operating expenses increased to \$80.3 million for 2009, from \$68.1 million for 2008, primarily due to:

- an increase of \$9.6 million from the Aframax Transfers;
- an increase of \$2.5 million from the Suezmax Deliveries;
- an increase of \$2.3 million from the purchase of the new product tanker;
- an increase of \$1.4 million from the Product Tanker Transfers; and
- an increase of \$0.7 million from the Suezmax Transfer;

partially offset by

- a decrease of \$2.2 million due to the sale of a product tanker in the fourth quarter of 2009;
- a decrease of \$0.9 million due to the effect on our Euro-denominated vessel operating expenses from the weakening of the Euro against the U.S. Dollar compared to the same period last year; and
- a decrease of \$0.2 million relating to lower crew manning, insurance, and repairs and maintenance costs.

Table of Contents

Time-Charter Hire Expense. Time-charter hire expense increased to \$44.0 million for 2009, compared to \$43.0 million for 2008, primarily due to an increase in the average time-charter hire rates, partially offset by a decrease in the number of in-chartered Aframax vessel days.

Depreciation and Amortization. Depreciation and amortization expense increased to \$59.6 million for 2009, from \$44.6 million for 2008, primarily due to the Aframax Transfers, Suezmax Deliveries, Product Tanker Transfers, and an increase in capitalized drydocking expenditures being amortized.

Loss on Sale of Vessels and Equipment Net of Write-downs. Loss on sale of vessels and equipment for 2009, primarily relates to an impairment write-down taken on one of our older fixed-rate vessels which was sold in the fourth quarter of 2009 and a write-down of intangible assets.

Restructuring Charges. During 2009, we incurred restructuring charges of \$1.0 million relating to costs incurred for global staffing changes.

b) Spot Tanker Segment

Our spot tanker segment, a subset of our conventional tanker segment (which includes our *Teekay Tankers Services* business unit), consists of conventional crude oil tankers and product carriers operating on the spot tanker market or subject to time-charters or contracts of affreightment that are priced on a spot-market basis or are short-term, fixed-rate contracts. We consider contracts that have an original term of less than three years in duration to be short-term. Our conventional Aframax, Suezmax, and large and medium product tankers are among the vessels included in the spot tanker segment. We accepted delivery of five new Suezmax tankers in 2009, which are included in our spot tanker segment.

Our spot tanker market operations contribute to the volatility of our revenues, cash flow from operations and net income (loss). Historically, the tanker industry has been cyclical, experiencing volatility in profitability and asset values resulting from changes in the supply of, and demand for, vessel capacity. In addition, spot tanker markets historically have exhibited seasonal variations in charter rates. Spot tanker markets are typically stronger in the winter months as a result of increased oil consumption in the Northern Hemisphere and unpredictable weather patterns that tend to disrupt vessel scheduling.

The following table presents our spot tanker segment's operating results and compares its net revenues (which is a non-GAAP financial measure) to revenues, the most directly comparable GAAP financial measure. The following table also provides a summary of the changes in calendar-ship-days by owned and chartered-in vessels for our spot tanker segment:

(in thousands of U.S. dollars, except calendar-ship-days and percentages)	Twelve Months Ended December 31,		% Change
	2009	2008	
Revenues	654,296	1,652,451	(60.4)
Voyage expenses	201,069	580,770	(65.4)
Net revenues	453,227	1,071,681	(57.7)
Vessel operating expenses	104,574	133,633	(21.7)
Time-charter hire expense	271,509	434,941	(37.6)
Depreciation and amortization	92,752	106,921	(13.3)
General and administrative ⁽¹⁾	71,563	89,009	(19.6)
Gain on sale of vessels and equipment, net of write-downs	(3,317)	(72,664)	(95.4)
Restructuring charge	2,191	2,359	(7.1)
(Loss) income from vessel operations	(86,045)	377,482	(122.8)

Calendar-Ship-Days

Owned Vessels	11,802	13,623	(13.4)
Chartered-in Vessels	10,334	17,647	(41.4)
Total	22,136	31,270	(29.2)

(1) Includes direct general and administrative expenses and indirect general and administrative expenses (allocated to the spot tanker segment based on estimated use of corporate resources). For further discussion, please read Other Operating Results General and Administrative.

The number of calendar days for our spot tanker fleet decreased from 31,270 in 2008 to 22,136 in 2009, primarily due to:

- the transfer of two product tankers in April 2008 to the fixed tanker segment (or the *Spot Product Tanker Transfers*);
- the transfer of four Aframax tankers in November 2008 and two Aframax tankers in September 2009 to the fixed tanker segment (or the *Spot Aframax Tanker Transfers*);
- the sale of seven product tankers between March 2008 and May 2009 (or the *Spot Product Tanker Sales*);
- the sale of one Suezmax tanker in November 2008 (or the *Suezmax Tanker Sale*) and one Aframax tanker in November 2009;
- a net decrease in the number of chartered-in vessels, primarily from the sale of our 50% interest in the Swift Product Tanker Pool in November 2008, which included our interest in ten in-chartered intermediate product tankers; and
- the transfer of one Suezmax tanker in November 2009 to the fixed tanker segment;

Table of Contents

partially offset by

the delivery of seven new Suezmax tankers between May 2008 and December 2009 (or the *Suezmax Deliveries*); and

the delivery of one large product tanker in October 2008.

In addition, during February 2009, we sold and leased back one older Aframax tanker. This had the effect of decreasing the number of calendar days for our owned vessels and increasing the number of calendar-ship-days for our chartered-in vessels.

Tanker Market and TCE Rates

During the latter part of the fourth quarter of 2009, spot tanker rates recovered from the multi-year low rates of the previous quarter as a result of increased global oil demand, rising supply from both Organization of the Petroleum Exporting Nations (or *OPEC*) and non-OPEC sources, seasonal factors such as weather related vessel delays and an increase in floating storage volumes. Spot tanker rates remained strong during the first few weeks of 2010 largely due to severe winter weather conditions in the Northern Hemisphere which led to an increase in oil demand and caused weather-related delays. Subsequently, spot tanker rates have softened in late January and early February 2010 due to easing seasonal factors and an increase in available fleet capacity as a result of a reduction in global floating storage volumes.

In an update to its World Economic Outlook released in January 2010, the International Monetary Fund (or IMF) raised its global gross domestic product (or *GDP*) growth forecast for 2010 to 3.9% from 3.1%. The upward adjustment is a result of indications of a stronger and faster recovery of the global economy than was previously anticipated. The International Energy Agency (or *IEA*) has forecast that global oil demand in 2010 will average 86.5 million barrels per day (*mb/d*) in 2010 which represents a 1.6 million *mb/d* (or 1.8%) increase from 2009 when global oil demand contracted by 1.5% compared to 2008.

The following table outlines the TCE rates earned by the vessels in our spot tanker segment for 2009, 2008 and 2007 and excludes the realized results of synthetic time-charters (or *STCs*) and forward freight agreements (or *FFAs*), which we enter into at times as hedges against a portion of our exposure to spot tanker market rates or for speculative purposes.

(1) Spot fleet includes short-term time-charters and fixed-rate contracts of affreightment with a duration of less than 1 year and time-charter fleet includes short-term time-charters and fixed-rate contracts of affreightment with a duration of between 1-3 years.

(2) Includes the cost of spot in-charter vessels servicing fixed-rate contract of affreightment cargoes, the amortization of in-process revenue contracts and cost of fuel while offhire.

Net Revenues. Net revenues decreased to \$453.2 million for 2009, from \$1.07 billion for 2008, primarily due to:

- a decrease of \$384.0 million primarily from decreases in our average TCE rate during 2009 compared to the same periods in 2008;
- a decrease of \$146.0 million from a net decrease in the number of chartered-in vessels, excluding small product tankers discussed below;
- a decrease of \$68.1 million from the Spot Aframax Transfers and Spot Product Tanker Transfers;

a decrease of \$44.0 million from a net decrease in the number of chartered-in small product tankers primarily due to the sale of our interest in the Swift Tanker Pool in November 2008;
a decrease of \$26.7 million from the Spot Product Tanker Sales; and
a decrease of \$6.8 million from the Suezmax Tanker Sale;

Table of Contents

partially offset by

an increase of \$31.3 million from a change in the number of days our vessels were off-hire during 2009 due to regularly scheduled maintenance compared to 2008;

an increase of \$18.4 million from the Suezmax Deliveries; and

an increase of \$7.5 million from the delivery of one large product tanker.

Vessel Operating Expenses. Vessel operating expenses decreased to \$104.6 million for 2009, from \$133.6 million for 2008, primarily due to:

a decrease of \$17.1 million from lower crew manning, repairs, maintenance and consumables costs;

a decrease of \$12.0 million from the Spot Aframax Tanker Transfers; and

a decrease of \$10.2 million from the Spot Product Tanker Sales;

partially offset by

an increase of \$10.2 million from the Suezmax Deliveries; and

an increase of \$1.8 million from the product tanker that delivered in October 2008.

Time-Charter Hire Expense. Time-charter hire expense decreased to \$271.5 million for 2009, from \$435.0 million for 2008, primarily due to:

a decrease of \$124.7 million primarily from the decrease in the number of chartered-in vessels compared to the same period last year; and

a decrease of \$38.8 million from a decrease in the number of chartered-in small product tankers from the sale of the Swift Tanker Pool in November 2008.

Depreciation and Amortization. Depreciation and amortization expense decreased to \$92.8 million for 2009, from \$106.9 million for 2008, primarily due to:

a decrease of \$9.0 from the amortization of a non-compete agreement in the prior year, which was fully amortized by the end of 2008;

a decrease of \$6.9, from the Spot Aframax Tanker Transfers;

a decrease of \$5.7 million from the Spot Product Tanker Sales;

a decrease of \$1.9 million from the sale of an Aframax tanker in November 2009, which was written-down to fair value in the third quarter of 2009;

a decrease of \$1.2 million from the Spot Product Tanker Transfers; and

a decrease of \$1.1 million from the Suezmax Tanker Sale;

partially offset by

an increase of \$13.9 million from the Suezmax Tanker Deliveries and the delivery of one new product tanker in October 2008.

Gain on Sale of Vessels and Equipment Net of Write-downs. The gain on sale of vessels and equipment, net of write-downs for 2009 is primarily due to gains realized on the disposal of two product tankers during the second quarter of 2009, partially offset by certain write-downs. The write-downs were related to two older vessels that were written-down to their fair value and the write-down of intangible assets.

Restructuring Charges. During 2009, we incurred restructuring charges of \$2.2 million relating to costs incurred for global staffing changes.

Table of Contents**Other Operating Results**

The following table compares our other operating results for 2009 and 2008.

(in thousands of U.S. dollars, except percentages)	Twelve Months Ended		% Change
	2009	December 2008	
General and administrative	(212,483)	(240,570)	(11.7)
Interest expense	(141,448)	(290,933)	(51.4)
Interest income	19,999	97,111	(79.4)
Realized and unrealized gains (losses) on non-designated derivative instruments	140,046	(567,074)	(124.7)
Foreign exchange (loss) gain	(20,922)	24,727	(184.6)
Equity income (loss) from joint ventures	52,242	(36,085)	(244.8)
Income tax (expense) recovery	(22,889)	56,176	(140.7)
Other income (loss)	12,961	(3,935)	(429.4)

General and Administrative Expenses. General and administrative expenses decreased to \$212.5 million for 2009, from \$240.6 million for 2008, primarily due to:

- a decrease of \$30.9 million in compensation for shore-based employees and other personnel expenses primarily due to decreases in headcount and performance-based compensation costs;
- a decrease of \$15.7 million in corporate-related expenses;
- a decrease of \$8.7 million from lower travel costs; and
- a decrease of \$3.4 million relating to timing of seafarer training initiatives and lower crew training activity;

partially offset by

- an increase of \$30.4 million as there was a recovery recorded in the third quarter of 2008 relating to the reversal of accruals associated with our equity-based compensation and long-term incentive program for management.

Interest Expense. Interest expense decreased to \$141.4 million for 2009, from \$290.9 million for 2008, primarily due to:

- a decrease of \$95.2 million primarily due to repayments of debt drawn under long-term revolving credit facilities and term loans and decrease in interest rates relating to long-term debt;
- a decrease of \$35.1 million as the debt relating to Teekay Nakilat (III) was novated to the RasGas 3 Joint Venture on December 31, 2008 (the interest expense on this debt is not reflected in our 2009 consolidated interest expense as the RasGas 3 Joint Venture is accounted for using the equity method);
- a decrease of \$15.4 million from the scheduled loan payments on the LNG carrier *Catalunya Spirit*, and scheduled capital lease repayments on the LNG carrier *Madrid Spirit* (the *Madrid Spirit* is financed pursuant to a Spanish tax lease arrangement, under which we borrowed under a term loan and deposited the proceeds into a restricted cash account and entered into a capital lease for the vessel; as a result, this decrease in interest expense from the capital lease is offset by a corresponding decrease in the interest income from restricted cash);
- a decrease of \$4.7 million from declining interest rates on our five Suezmax tanker capital lease obligations; and
- a decrease of \$1.6 million due to the effect on our Euro-denominated debt from the weakening of the Euro against the U.S. Dollar during such period compared to the same period last year;

partially offset by

- an increase of \$2.5 million relating to debt to finance the purchase of the Tangguh LNG Carriers as the interest on this debt was capitalized in 2008 while the LNG carriers were under construction.

Realized and unrealized loss of \$702.4 million relating to interest rate swaps for the year ended December 31, 2008, was reclassified from interest expense to realized and unrealized gain (loss) on non-designated derivative instruments

to conform to the presentation adopted in the current period.

Interest Income. Interest income decreased to \$20.0 million for 2009, compared to \$97.1 million for 2008, primarily due to:

a decrease of \$33.5 million relating to interest-bearing advances made by us to the RasGas 3 Joint Venture for shipyard construction installment payments repaid on December 31, 2008, when the external debt was novated to the RasGas 3 Joint Venture;

a decrease of \$29.5 million primarily relating to lower interest rates on our bank account balances compared to the same periods last year;

Table of Contents

a decrease of \$13.4 million due to decreases in LIBOR rates relating to the restricted cash used to fund capital lease payments for the RasGas II LNG Carriers (please read Item 18 Financial Statements: Note 10 Capital Leases and Restricted Cash);

a decrease of \$0.4 million due to the effect on our Euro-denominated deposits from the weakening of the Euro against the U.S. Dollar compared to the same period last year; and

a decrease of \$0.3 million primarily from scheduled capital lease repayments on one of our LNG carriers which was funded from restricted cash deposits.

Realized and unrealized gain of \$176.6 million relating to interest rate swaps for the year ended December 31, 2008, was reclassified from interest income to realized and unrealized gain (loss) on non-designated derivative instruments to conform to the presentation adopted in the current period.

Realized and Unrealized Gains (Losses) on Non-designated Derivative Instruments. Net realized and unrealized gains on non-designated derivatives was \$140.0 million for the year ended December 31, 2009, compared to net realized and unrealized losses on non-designated derivatives of \$567.1 million for the same period last year, as detailed in the table below:

(in thousands of U.S. Dollars)	Year Ended December 31,	
	2009	2008
Realized (losses) gains relating to:		
Interest rate swaps	(127,936)	(39,949)
Foreign currency forward contracts	(8,984)	34,990
Bunkers, forward freight agreements (<i>FFAs</i>) and other	(1,293)	(32,971)
	(138,213)	(37,930)
Unrealized gains (losses) relating to:		
Interest rate swaps	258,710	(487,546)
Foreign currency forward contracts	14,797	(45,728)
Bunkers, <i>FFAs</i> and other	4,752	4,130
	278,259	(529,144)
Total realized and unrealized gains (losses) on non-designated derivative instruments	140,046	(567,074)

Foreign Exchange (Losses) Gains. Foreign exchange (loss) gain was a loss of \$(20.9) million for 2009, compared to a gain of \$24.7 million for 2008. The changes in our foreign exchange (losses) gains are primarily attributable to the revaluation of our Euro-denominated term loans at the end of each period for financial reporting purposes, and substantially all of the gains or losses are unrealized. Gains reflect a stronger U.S. Dollar against the Euro on the date of revaluation. Losses reflect a weaker U.S. Dollar against the Euro on the date of revaluation. As of the date of this report, our Euro-denominated revenues generally approximate our Euro-denominated operating expenses and our Euro-denominated interest and principal repayments.

Equity Income (Loss) from Joint Ventures. Equity income (loss) from joint ventures was \$52.2 million for the year ended December 31, 2009, compared to \$(36.1) million last year. The income or loss was primarily comprised of our share of the Angola LNG Project earnings (losses) and the operations of the four RasGas 3 LNG Carriers, which were delivered between May and July 2008. \$32.4 million of the equity income relates to our share of unrealized gains on interest rate swaps for 2009, compared to unrealized losses on interest rate swaps of \$33.0 million included in equity loss for 2008.

Income Tax (Expense) Recovery. Income tax expense was \$22.9 million for 2009, compared to a recovery of \$56.2 million for 2008. The increase to income tax expense of \$79.1 million for the year ended December 31, 2009, was primarily due to an increase in deferred income tax expense relating to unrealized foreign exchange translation gains for 2009.

Other (Loss) Income. Other income of \$13.0 million for 2009 was primarily comprised of leasing income of \$6.9 million from our volatile organic compound emissions equipment and \$3.8 million from amortization of option fees, partially offset by a loss on bond redemption of \$0.6 million.

Net Income (Loss). As a result of the foregoing factors, the we generated net income of \$209.8 million for 2009, compared to a net loss of \$459.9 million for 2008.

Table of Contents**Year Ended December 31, 2008 versus Year Ended December 31, 2007*****Shuttle Tanker and FSO Segment***

The following table presents our shuttle tanker and FSO segment's operating results and compares its net revenues (which is a non-GAAP financial measure) to revenues, the most directly comparable GAAP financial measure. The following table also provides a summary of the changes in calendar-ship-days by owned and chartered-in vessels for our shuttle segment:

(in thousands of U.S. dollars, except calendar-ship-days and percentages)	Twelve Months Ended December 31,		% Change
	2008	2007	
Revenues	705,461	642,047	9.9
Voyage expenses	171,599	117,571	46.0
Net revenues	533,862	524,476	1.8
Vessel operating expenses	173,067	127,691	35.5
Time-charter hire expense	134,100	160,993	(16.7)
Depreciation and amortization	117,198	104,936	11.7
General and administrative ⁽¹⁾	56,831	60,293	(5.7)
Gain on sale of vessels and equipment, net of write-downs	(3,771)	(16,531)	(77.2)
Restructuring charge	10,645		
Income from vessel operations	45,792	87,094	(47.4)
Calendar-Ship-Days			
Owned Vessels	10,463	11,015	(5.0)
Chartered-in Vessels	3,765	4,619	(18.5)
Total	14,228	15,634	(9.0)

(1) Includes direct general and administrative expenses and indirect general and administrative expenses (allocated to the shuttle tanker and FSO segment based on estimated use of corporate resources). For further

discussion,
please read
Other Operating
Results General
and
Administrative.

The average fleet size of our shuttle tanker and FSO segment (including vessels chartered-in) increased during 2008 compared to 2007. This was primarily the result of:

the transfer of the *Navion Saga* from the fixed-rate segment to the shuttle tanker and FSO segment in connection with the completion of its conversion to an FSO unit in May 2007; and
the delivery of two new shuttle tankers, the *Navion Bergen* and the *Navion Gothenburg*, in April and July 2007, respectively (collectively, the *Shuttle Tanker Deliveries*);

partially offset by

a decline in the number of chartered-in shuttle tankers; and
the sale of a 1987-built shuttle tanker in May 2007 (or the *Shuttle Tanker Disposition*).

Net Revenues. Net revenues increased 1.8% to \$533.9 million for 2008, from \$524.5 million for 2007, primarily due to:

an increase of \$10.1 million from the Shuttle Tanker Deliveries;
an increase of \$9.6 million due to more revenue days for shuttle tankers servicing contracts of affreightment and from shuttle tankers servicing contracts of affreightment in the conventional spot tanker market, earning a higher average daily charter rate, compared to the same period last year;
an increase of \$6.9 million from the transfer of the *Navion Saga* to the shuttle tanker and FSO segment; and
an increase of \$2.5 million due to the redeployment of one shuttle tanker from servicing contracts of affreightment to a time-charter effective October 2007, and earning a higher average daily charter rate than for the same periods last year;

partially offset by

a decrease of \$10.0 million, due to declining oil production at mature oil fields in the North Sea which are serviced by certain shuttle tankers on contracts of affreightment;
a decrease of \$3.9 million due to an increased number of offhire days resulting from an increase in scheduled drydockings and unexpected repairs performed compared to the same period last year;
a decrease of \$3.4 million due to customer performance claims under the terms of charter party agreements;
a decrease of \$3.0 million due to an increase in bunker costs which are not passed on to the charterer under certain contracts; and
a decrease of \$3.0 million due to redelivery of an in-chartered shuttle tanker in May 2008.

Vessel Operating Expenses. Vessel operating expenses increased 35.5% to \$173.1 million for 2008, from \$127.7 million for 2007, primarily due to:

an increase of \$33.2 million from increases in crew manning costs;
an increase of \$5.0 million relating to the transfer of the *Navion Saga* to the shuttle tanker and FSO segment;
an increase of \$4.4 million, from the acquisition of an in-chartered shuttle tanker, the *Navion Oslo*, which was delivered in late March 2008; and
an increase of \$0.5 million from increases in service costs and the price of consumables, freight and lubricants.

Table of Contents

Time-Charter Hire Expense. Time-charter hire expense decreased 16.7% to \$134.1 million for 2008, from \$161.0 million for 2007, primarily due to a decrease in the number of chartered-in vessels.

Depreciation and Amortization. Depreciation and amortization expense increased 11.7% to \$117.2 million for 2008, from \$105.0 million for 2007, primarily due to:

an increase of \$6.9 million relating to the transfer of the *Navion Saga* to the shuttle tanker and FSO segment;
and

an increase of \$2.8 million from the Shuttle Tanker Deliveries.

Gain on Sale of Vessels and Equipment – Net of Write-downs. Gain on sale of vessels and equipment for 2008 was a net gain of \$3.8 million, which was primarily due to a gain of \$3.7 million from the sale of equipment.

FPSO Segment

The following table presents our FPSO segment's operating results and also provides a summary of the changes in calendar-ship-days for our FPSO segment:

(in thousands of U.S. dollars, except calendar-ship-days and percentages)	Twelve Months Ended		% Change
	2008	2007	
Revenues	383,752	350,279	9.6
Vessel operating expenses	216,998	171,106	26.8
Depreciation and amortization	91,734	68,047	34.8
General and administrative ⁽¹⁾	50,918	40,173	26.7
Loss on sale of vessels and equipment, net of write-downs	12,019		
Goodwill impairment charge	334,165		
(Loss) income from vessel operations	(322,082)	70,953	(553.9)
Calendar-Ship-Days			
Owned Vessels	3,205	2,920	9.8
Total	3,205	2,920	9.8

(1) Includes direct general and administrative expenses and indirect general and administrative expenses (allocated to the FPSO segment based on estimated use of corporate resources). For further discussion,

please read
Other Operating
Results General
and
Administrative.

The average fleet size of our FPSO segment (including vessels chartered-in) increased during 2008 compared to 2007. This was primarily the result of the delivery of a new FPSO unit in February 2008 (or the *FPSO Delivery*).

Net Revenues. Net revenues increased 9.6% to \$383.8 million for 2008, from \$350.3 million for 2007, primarily due to:

an increase of \$40.4 million from the FPSO Delivery;

partially offset by

a decrease of \$11.3 million in revenues from the *Foinaven* FPSO due to lower oil production compared to the prior year and a production shutdown during August and September 2008.

As part of our acquisition of Teekay Petrojarl, we assumed certain FPSO service contracts that have terms that were less favorable than prevailing market terms at the time of acquisition. This contract value liability, which was recognized on the date of acquisition, is being amortized to revenue over the remaining firm period of the current FPSO contracts on a weighted basis based on the projected revenue to be earned under the contracts. The amount of amortization relating to these contracts included in revenue for 2008 was \$66.6 million (2007 \$66.6 million). Please read Item 18 Financial Statements: Note 6 Goodwill, Intangible Assets and In-Process Revenue Contracts.

Vessel Operating Expenses. Vessel operating expenses increased 26.8% to \$217.0 million for 2008, from \$171.1 million for 2007, primarily due to:

an increase of \$24.2 million from the FPSO Delivery;

an increase of \$13.9 million from increases in service costs and the price of consumables, freight and lubricants; and

an increase of \$7.3 million from increases in crew manning costs;

partially offset by

a decrease of \$1.8 million from lower insurance charges.

Depreciation and Amortization. Depreciation and amortization expense increased 34.8% to \$91.7 million for 2008, from \$68.0 million for 2007, primarily due to:

an increase of \$13.8 million from the refinement of preliminary estimates of fair value assigned to certain assets included in our acquisition of Teekay Petrojarl; and

an increase of \$9.9 million from the FPSO Delivery.

Table of Contents

Loss on Sale of Vessels and Equipment – Net of Write-downs. Loss on sale of vessels and equipment net of write-downs for 2008 was due to a \$12.0 million impairment write-down of a 1986-built shuttle tanker.

Goodwill Impairment Charge. Goodwill impairment charge was from a write-down of goodwill from the Teekay Petrojarl acquisition. Based on an impairment analysis, management concluded that the carrying value of goodwill in the FPSO segment exceeded its fair value by \$334.2 million as of December 31, 2008. As a result, an impairment loss of \$334.2 million has been recognized in our consolidated statement of income (loss) for the year ended December 31, 2008. Please read Item 18 - Financial Statements: Note 6 – Goodwill, Intangible Assets and In-Process Revenue Contracts.

Liquefied Gas Segment

The following table presents our liquefied gas segment's operating results and compares its net revenues (which is a non-GAAP financial measure) to revenues, the most directly comparable GAAP financial measure. The following table also provides a summary of the changes in calendar-ship-days by owned vessels for our liquefied gas segment:

(in thousands of U.S. dollars, except calendar-ship-days and percentages)	Twelve Months Ended December 31,		% Change
	2008	2007	
Revenues	221,930	166,981	32.9
Voyage expenses	1,009	109	825.7
Net revenues	220,921	166,872	32.4
Vessel operating expenses	48,185	30,239	59.3
Depreciation and amortization	58,371	46,018	26.8
General and administrative ⁽¹⁾	23,072	20,521	12.4
Restructuring charge	634		
Income from vessel operations	90,659	70,094	29.3
Calendar-Ship-Days			
Owned Vessels and Vessels under Direct Financing Lease	3,701	2,899	27.7

(1) Includes direct general and administrative expenses and indirect general and administrative expenses (allocated to the liquefied gas segment based on estimated use of corporate resources). For further discussion, please read

Other Operating
Results General
and
Administrative.

The increase in the average fleet size of our liquefied gas segment from 2007 to 2008 was primarily due to:
the delivery of one new LNG carrier in November 2008 (the *Tanggung Hiri*);
the delivery of two new LNG carriers in January and February 2007 (or the *RasGas II Deliveries*); and
our December 2007 acquisition of two 1993-built LNG vessels from a joint venture between Marathon Oil Corporation and ConocoPhillips (or the *Kenai LNG Carriers*).

Net Revenues. Net revenues increased 32.4% to \$220.9 million for 2008, from \$166.9 million for 2007, primarily due to:

an increase of \$38.3 million from the delivery of the Kenai LNG Carriers;
an increase of \$6.1 million from the RasGas II Deliveries;
an increase of \$5.5 million, due to the *Madrid Spirit* being off-hire during the first half of 2007 after sustaining damage to its engine boilers; and
an increase of \$4.7 million due to the effect on our Euro-denominated revenues of the strengthening of the Euro against the U.S. Dollar during 2008 compared to 2007;

partially offset by

a decrease of \$3.1 million, due to the *Catalunya Spirit* being off-hire for 34.3 days during the first half of 2008 for scheduled drydocking.

Vessel Operating Expenses. Vessel operating expenses increased 59.3% to \$48.2 million for 2008, from \$30.2 million for 2007, primarily due to:

an increase of \$10.8 million from the full year operations in 2008 of the Kenai LNG Carriers delivered in 2007;
an increase of \$2.3 million due to the effect on our Euro-denominated vessel operating expenses (primarily crewing costs) from the strengthening of the Euro against the U.S. Dollar during 2008 compared to 2007 (a portion of our vessel operating expenses are denominated in Euros, which is primarily a function of the nationality of our crew; our Euro-denominated revenues currently generally approximate our Euro-denominated expenses and Euro-denominated loan and interest payments);
an increase of \$1.2 million from the RasGas II Deliveries; and
an increase of \$0.7 million from the delivery of the *Tanggung Hiri*.

Depreciation and Amortization. Depreciation and amortization increased 26.8% to \$58.4 million in 2008, from \$46.0 million in 2007, primarily due to:

an increase of \$9.9 million from the delivery of the Kenai LNG Carriers;
an increase of \$1.2 million from the RasGas II Deliveries;

Table of Contents

an increase of \$0.6 million from the delivery of the *Tangguh Hiri*; and
 an increase of \$0.3 million relating to the amortization of drydock expenditures incurred during 2008.

Conventional Tanker Segment**a) Fixed-Rate Tanker Segment**

The following table presents our fixed-rate tanker segment, a subset of the conventional tanker segment, operating results and compares its net revenues (which is a non-GAAP financial measure) to revenues, the most directly comparable GAAP financial measure. The following table also provides a summary of the changes in calendar-ship-days by owned and chartered-in vessels for our fixed-rate tanker segment:

(in thousands of U.S. dollars, except calendar-ship-days and percentages)	Twelve Months Ended December 31,		% Change
	2008	2007	
Revenues	265,849	195,942	35.7
Voyage expenses	5,010	2,707	85.1
Net revenues	260,839	193,235	35.0
Vessel operating expenses	68,065	51,458	32.3
Time-charter hire expense	43,048	25,812	66.8
Depreciation and amortization	44,578	36,018	23.8
General and administrative ⁽¹⁾	20,740	18,221	13.8
Loss on sale of vessels and equipment, net of write-downs	14,149		
Restructuring charge	1,991		
Income from vessel operations	68,268	61,726	10.6
Calendar-Ship-Days			
Owned Vessels	6,824	5,390	26.6
Chartered-in Vessels	2,363	1,312	80.1
Total	9,187	6,702	37.1

(1) Includes direct general and administrative expenses and indirect general and administrative expenses (allocated to the fixed-rate tanker segment based on estimated use of corporate resources). For

further
discussion,
please read
Other Operating
Results General
and
Administrative.

The average fleet size of our fixed-rate tanker segment (including vessels chartered-in) increased by 37% in 2008 compared to 2007. This increase was primarily the result of:

- the acquisition of two Suezmax tankers from OMI Corporation on August 1, 2007 (collectively, the *OMI Acquisition*);
- the addition of two new chartered-in Aframax tankers in January 2008 as part of the multi-vessel transaction with ConocoPhillips, in which we acquired ConocoPhillips' rights in six double-hull Aframax tankers (collectively, the *ConocoPhillips Acquisition*);
- the delivery of two new Aframax tankers during January and March 2008 (collectively, the *Aframax Deliveries*);
- the transfer of two product tankers from the spot tanker segment in April 2008 upon commencement of long-term time-charters (the *Product Tanker Transfers*); and
- the transfer of four Aframax tankers, on a net basis during 2008, from the spot tanker segment upon commencement of long-term time-charters (the *Aframax Transfers*).

The Aframax Transfers comprise the transfer of three owned vessel and two chartered-in vessels from the spot tanker segment, and the transfer of one owned vessels to the spot tanker segment. The effect of the transaction is to increase the fixed tanker segment's net revenue and time-charter expenses, and to decrease its vessel operating expenses.

Net Revenues. Net revenues increased 35.0% to \$260.8 million for 2008, from \$193.2 million for 2007, primarily due to:

- an increase of \$17.6 million from the ConocoPhillips Acquisition;
- an increase of \$17.0 million from the OMI Acquisition;
- an increase of \$11.2 million from the Product Tanker Transfers;
- an increase of \$9.8 million from the Aframax Transfers;
- a increase of \$9.2 million from increased revenues earned by the *Teide Spirit* and the *Toledo Spirit* (the time charters for both these vessels provide for additional revenues to us beyond the fixed hire rate when spot tanker market rates exceed threshold amounts; the time-charter for the *Toledo Spirit* also provides for a reduction in revenues to us when spot tanker market rates are below threshold amounts); and
- an increase of \$8.6 million from the Aframax Deliveries;

partially offset by

- a decrease of \$3.3 million from lower charter rates earned on an in-chartered VLCC.

Table of Contents

Vessel Operating Expenses. Vessel operating expenses increased 32.3% to \$68.1 million for 2008, from \$51.5 million for 2007, primarily due to:

- an increase of \$7.9 million from the ConocoPhillips acquisition;
- an increase of \$4.6 million relating to higher crew manning and repairs, insurance, and maintenance and consumables;
- an increase of \$3.8 million from the Product Tanker Transfers;
- an increase of \$1.7 million due to full year operations in 2008 of the Suezmax tankers acquired in the OMI Acquisition; and
- an increase of \$1.0 million due to the effect on our Euro-denominated vessel operating expenses (primarily crewing costs for five of our Suezmax tankers) from the strengthening of the Euro against the U.S. Dollar during such period compared to the same period last year. A majority of our vessel operating expenses for five of our Suezmax tankers are denominated in Euros, which is primarily a function of the nationality of our crew (our Euro-denominated revenues currently generally approximate our Euro-denominated expenses and Euro-denominated loan and interest payments);

partially offset by

- a decrease of \$3.1 million from the Aframax Transfers.

Time-Charter Hire Expense. Time-charter hire expense increased 66.8% to \$43.0 million for 2008, compared to \$25.8 million for 2007, primarily due to:

- an increase of \$7.3 million from the ConocoPhillips acquisition.
- an increase of \$5.6 million from the Aframax Transfers; and
- an increase of \$4.9 million from the OMI Acquisition.

Depreciation and Amortization. Depreciation and amortization expense increased 23.8% to \$44.6 million for 2008, from \$36.0 million for 2007, primarily due to:

- an increase of \$5.1 million from the OMI Acquisition; and
- an increase of \$2.8 million from the Aframax Deliveries.

Loss on Sale of Vessels and Equipment Net of Write-downs. For 2008, we recorded a \$4.4 million impairment charge related to a 1990-built conventional tanker and a \$9.7 million write-down of certain intangible assets.

Restructuring Charges. During the year ended December 31, 2008, we incurred restructuring charges of \$1.3 million relating to costs incurred to change the crew of the *Samar Spirit* from Australian crew to International crew, and \$0.5 million relating to reorganization of certain business units.

b) Spot Tanker Segment

The following table presents our spot tanker segment, a subset of the conventional tanker segment, operating results and compares its net revenues (which is a non-GAAP financial measure) to revenues, the most directly comparable GAAP financial measure. The following table also provides a summary of the changes in calendar-ship-days by owned and chartered-in vessels for our spot tanker segment:

(in thousands of U.S. dollars, except calendar-ship-days and percentages)	Twelve Months Ended December 31,		% Change
	2008	2007	
Revenues	1,652,451	1,032,376	60.1
Voyage expenses	580,770	410,686	41.4
Net revenues	1,071,681	621,690	72.4
Vessel operating expenses	133,633	89,939	48.6
Time-charter hire expense	434,941	281,168	54.7
Depreciation and amortization	106,921	74,094	44.3
General and administrative ⁽¹⁾	89,009	107,326	(17.1)
Gain on sale of vessels and equipment, net of write-downs	(72,664)		

Restructuring charge	2,359		
Income from vessel operations	377,482	69,163	445.8
Calendar-Ship-Days			
Owned Vessels	13,623	11,764	15.8
Chartered-in Vessels	17,647	12,730	38.6
Total	31,270	24,494	27.7

(1) Includes direct general and administrative expenses and indirect general and administrative expenses (allocated to the spot tanker segment based on estimated use of corporate resources). For further discussion, please read Other Operating Results General and Administrative.

Table of Contents

The average fleet size of our spot tanker fleet increased 27.7% from 24,494 calendar days in 2007 to 31,270 calendar days in 2008, primarily due to:

- the acquisition of twelve owned and five chartered-in vessels from OMI Corporation on August 1, 2007 (collectively, the *OMI Acquisition*);
- the addition of two owned and two chartered-in Aframax tankers in January 2008 as part of the multi-vessel transaction with ConocoPhillips, in which we acquired ConocoPhillips' rights in six double-hull Aframax tankers (collectively, the *ConocoPhillips Acquisition*);
- the delivery of two new large product tankers in February and May 2007 (or the *Spot Tanker Deliveries*);
- the delivery of three new Suezmax tankers between May and October 2008 (or the *Suezmax Deliveries*); and
- a net increase in the number of chartered-in vessels, primarily Aframax and product tankers.

In addition, during April 2007 we sold and leased back two older Aframax tankers and during July 2007 we sold and leased back one Aframax tanker. This had the effect of decreasing the number of calendar ship days for our owned vessels and increasing the number of calendar ship days for our chartered-in vessels.

Net Revenues. Net revenues increased 72.4% to \$1.07 billion for 2008, from \$621.7 million for 2007, primarily due to:

- an increase of \$190.1 million primarily from an increase in our average TCE rate during 2008 compared to 2007;
- an increase of \$147.4 million from the OMI Acquisition;
- an increase of \$52.6 million from a net increase in the number of chartered-in vessels;
- an increase of \$42.0 million from the ConocoPhillips Acquisition;
- an increase of \$19.5 million from the Spot Tanker Deliveries and the Suezmax Deliveries; and
- an increase of \$17.0 million from the transfer of two Aframax tankers from the fixed-rate tanker segment in January 2008;

partially offset by

- a decrease of \$13.6 million from an increase in the number of days our vessels were off-hire due to regularly scheduled maintenance; and
- a decrease of \$5.0 million from the transfer of a Suezmax tanker to the offshore segment in May 2007 and the transfer of an Aframax tanker to the fixed-rate tanker segment in December 2007.

Vessel Operating Expenses. Vessel operating expenses increased 48.6% to \$133.6 million for 2008, from \$90.0 million for 2007, primarily due to:

- an increase of \$17.2 million from the ConocoPhillips Acquisition;
- an increase of \$11.3 million from higher crew manning repairs, maintenance and consumables costs, insurance costs, port expenses, safety inspections and non-recurring damages;
- an increase of \$10.1 million from the OMI Acquisition;
- an increase of \$4.8 million from the transfer of two Aframax tankers from the fixed-rate segment in January 2008; and
- an increase of \$4.3 million from the Spot Tanker Deliveries and the Suezmax Deliveries;

partially offset by

- a decrease of \$3.3 million from the transfer of a Suezmax tanker to the shuttle tanker and FSO segment in May 2007 and the transfer of an Aframax tanker to the fixed-rate tanker segment in December 2007.

Time-Charter Hire Expense. Time-charter hire expense increased 54.7% to \$434.9 million for 2008, from \$281.2 million for 2007, primarily due to:

- an increase of \$89.9 million from an increase in the number of chartered-in tankers and rates (excluding the OMI and ConocoPhillips vessels) compared to the same period in 2007;
- an increase of \$39.8 million from the OMI Acquisition;
- an increase of \$16.1 million from the ConocoPhillips Acquisition;
- an increase of \$6.9 million due to the sale and lease-back of three Aframax tankers during April and July 2007; and
- an increase of \$2.6 million from an increase in the average in-charter rate.

Depreciation and Amortization. Depreciation and amortization expense increased 44.3% to \$106.9 million for 2008, from \$74.1 million for 2007, primarily due to:

an increase of \$30.7 million from the OMI Acquisition;

an increase of \$6.3 million from the ConocoPhillips Acquisition; and

an increase of \$3.5 million from the Spot Tanker Deliveries and the Suezmax Deliveries;

Table of Contents

partially offset by

a decrease of \$2.8 million from the sale and lease-back of three Aframax tankers during April and July 2007; and

a decrease of \$2.2 million from the transfer of a Suezmax tanker to the shuttle tanker and FSO segment in May 2007 and the transfer of an Aframax to the fixed-rate tanker segment during December 2007.

Gain on Sale of Vessels and Equipment Net of Write-downs. Gain on sale of vessels and equipment of \$72.7 million for 2008 was due to:

a gain of \$52.2 million from the sale of vessels; and

a gain of \$44.4 million from the sale of our 50% interest in the Swift Tanker Pool;

partially offset by

a write-down of \$23.9 million from the impairment of two 1992-built Aframax tankers.

Other Operating Results

The following table compares our other operating results for 2008 and 2007.

(in thousands of U.S. dollars, except percentages)	Twelve Months Ended		% Change
	2008	2007	
General and administrative	(240,570)	(246,534)	(2.4)
Interest expense	(290,933)	(294,848)	(1.3)
Interest income	97,111	101,199	(4.0)
Realized and unrealized losses on non-designated derivative instruments	(567,074)	(45,322)	1,151.2
Foreign exchange gain (loss)	24,727	(61,571)	(140.2)
Equity loss from joint ventures	(36,085)	(12,404)	190.9
Income tax recovery	56,176	3,192	1,659.9
Other (loss) income	(3,935)	23,170	(117.0)

General and Administrative Expenses. General and administrative expenses decreased 2.4% to \$240.6 million for 2008, from \$246.5 million for 2007, primarily due to:

a decrease of \$42.2 million relating to the costs associated with our equity-based compensation and long-term incentive program for management; and

a decrease of \$2.8 million in office expenses and travel costs;

partially offset by

an increase of \$16.7 million in compensation for shore-based employees and other personnel expenses, primarily due to increase in headcount and compensation levels partially offset by the strengthening of the U.S. Dollar compared to other major currencies;

an increase of \$10.3 million in corporate-related expenses, including costs associated with Teekay Tankers becoming a public entity in December 2007;

an increase of \$8.0 million from the unrealized change in fair value of our hedge accounted foreign currency forward contracts; and

an increase of \$3.8 million in fleet overhead from the timing of seafarer training initiatives and higher training activity in the liquefied gas segment.

Interest Expense. Interest expense decreased 1.3% to \$290.9 million for 2008, from \$294.8 million for 2007, primarily due to:

a net decrease of \$13.8 million primarily due to repayments of debt drawn under long-term revolving credit facilities and term loans;

partially offset by

an increase of \$9.3 million relating to debt of Teekay Nakilat (III) used by the RasGas 3 Joint Venture to fund shipyard construction installment payments (this increase in interest expense from debt is offset by a corresponding increase in interest income from advances to the joint venture); and

an increase of \$0.6 million relating to debt from the delivery of the *Tanggung Hiri*.

Interest Income. Interest income decreased 4.0% to \$97.1 million for 2008, compared to \$101.2 million for 2007, primarily due to:

a decrease of \$8.9 million resulting from the repayment of interest-bearing loans we made to a 50% joint venture between us and TORM, which were used during the second quarter of 2007, together with comparable loans made by TORM, to acquire 100% of the outstanding shares of OMI; and
a decrease of \$2.4 million relating to a decrease in restricted cash used to fund capital lease payments for the RasGas II Deliveries (please read Item 18 Financial Statements: Note 10 Capital Leases and Restricted Cash);

Table of Contents

partially offset by

an increase of \$4.5 million relating to interest-bearing loans made by us to the RasGas 3 Joint Venture for shipyard construction installment payments.

Realized and Unrealized Losses on Non-designated Derivative Instruments. Net realized and unrealized losses on non-designated derivatives was \$(567.1) million for the year ended December 31, 2008, compared to net realized and unrealized losses on non-designated derivatives of \$(45.3) million for the same period last year, as detailed in the table below:

(in thousands of U.S. Dollars)	Year Ended December 31,	
	2008	2007
Realized (losses) gains relating to:		
Interest rate swaps	(39,949)	4,648
Foreign currency forward contracts	34,990	37,550
Bunkers, forward freight agreements (<i>FFAs</i>) and other	(32,971)	8,281
	(37,930)	50,479
Unrealized (losses) gains relating to:		
Interest rate swaps	(487,546)	(122,679)
Foreign currency forward contracts	(45,728)	23,512
Bunkers, <i>FFAs</i> and other	4,130	3,366
	(529,144)	(95,801)
Total realized and unrealized losses on non-designated derivative instruments	(567,074)	(45,322)

Foreign Exchange Gains (Losses). Foreign exchange gain (loss) was a gain of \$24.7 million for 2008, compared to a loss of \$61.6 million for 2007. The changes in our foreign exchange gains (losses) are primarily attributable to the revaluation of our Euro-denominated term loans at the end of each period for financial reporting purposes, and substantially all of the gains or losses are unrealized. Gains reflect a stronger U.S. Dollar against the Euro on the date of revaluation. Losses reflect a weaker U.S. Dollar against the Euro on the date of revaluation. As of the date of this report, our Euro-denominated revenues generally approximate our Euro-denominated operating expenses and our Euro-denominated interest and principal repayments.

Equity Loss from Joint Ventures. Equity loss of \$36.1 million for 2008 was primarily comprised of our share of the Angola LNG Project loss. The majority of the loss relates to unrealized losses on interest rate swaps.

Income Tax Recovery. Income tax recovery was \$56.2 million for 2008 compared to \$3.2 million for 2007. The \$53.0 million increase to income tax recoveries was primarily due to an increase in deferred income tax recoveries relating to unrealized foreign exchange translation losses.

Other (Loss) Income. Other loss of \$3.9 million for 2008 was primarily comprised of write-down of marketable securities of \$20.2 million, partially offset by leasing income of \$9.5 million from our volatile organic compound emissions equipment, gain on sale of marketable securities of \$4.6 million, and gain on bond redemption of \$3.0 million.

Net Income (Loss). As a result of the foregoing factors, the Company incurred a net loss of \$459.9 million for 2008, compared to a net income of \$72.4 million for 2007.

LIQUIDITY AND CAPITAL RESOURCES**Liquidity and Cash Needs**

Our primary sources of liquidity are cash and cash equivalents, cash flows provided by our operations and our undrawn credit facilities. Our short-term liquidity requirements are for the payment of operating expenses, debt

servicing costs, dividends, the scheduled repayments of long-term debt, as well as funding our working capital requirements. As at December 31, 2009, our total cash and cash equivalents amounted to \$422.5 million, compared to \$814.2 million as at December 31, 2008. Our total liquidity, including cash and undrawn credit facilities, remained unchanged at \$1.9 billion as at December 31, 2009, and 2008.

Our spot tanker market operations contribute to the volatility of our net operating cash flow, and thus our ability to generate sufficient cash flows to meet our short-term liquidity needs. Historically, the tanker industry has been cyclical, experiencing volatility in profitability and asset values resulting from changes in the supply of, and demand for, vessel capacity. In addition, spot tanker markets historically have exhibited seasonal variations in charter rates. Spot tanker markets are typically stronger in the winter months as a result of increased oil consumption in the Northern Hemisphere and unpredictable weather patterns that tend to disrupt vessel scheduling.

As at December 31, 2009, we had \$231.2 million of scheduled debt repayments coming due within the following twelve months. We believe that our existing cash and cash equivalents and undrawn long-term borrowings, in addition to other sources of cash such as cash from operations, will be sufficient to meet our existing liquidity needs for at least the next twelve months.

Table of Contents

Our operations are capital intensive. We finance the purchase of our vessels primarily through a combination of borrowings from commercial banks or our joint venture partners, the issuance of equity securities and cash generated from operations. In addition, we may use sale and lease-back arrangements as a source of long-term liquidity. Occasionally we use our revolving credit facilities to temporarily finance capital expenditures until longer-term financing is obtained, at which time we typically use all or a portion of the proceeds from the longer-term financings to prepay outstanding amounts under the revolving credit facilities. Pre-arranged debt facilities were in place for all of our remaining capital commitments relating to our portion of newbuildings currently on order. Our pre-arranged newbuilding debt facilities are in addition to our undrawn credit facilities. We continue to consider strategic opportunities, including the acquisition of additional vessels and expansion into new markets. We may choose to pursue such opportunities through internal growth, joint ventures or business acquisitions. We intend to finance any future acquisitions through various sources of capital, including internally-generated cash flow, existing credit facilities, additional debt borrowings, and the issuance of additional debt or equity securities or any combination thereof.

As at December 31, 2009, our revolving credit facilities provided for borrowings of up to \$3.5 billion, of which \$1.5 billion was undrawn. The amount available under these revolving credit facilities decreases by \$204.4 million (2010), \$239.2 million (2011), \$349.2 million (2012), \$756.1 million (2013), \$770.4 million (2014) and \$1.2 billion (thereafter). The revolving credit facilities are collateralized by first-priority mortgages granted on 63 of our vessels, together with other related security, and are guaranteed by Teekay or our subsidiaries.

Our outstanding term loans reduce in monthly, quarterly or semi-annual payments with varying maturities through 2023. Some of the term loans also have bullet or balloon repayments at maturity and are collateralized by first-priority mortgages granted on 32 of our vessels, together with other related security, and are generally guaranteed by Teekay or our subsidiaries. Our unsecured 8.875% Senior Notes are due July 15, 2011. In January 2010, we completed a public offering of \$450 million senior unsecured notes due 2020, which bear interest at a rate of 8.5% per year. We used a portion of the offering proceeds to repurchase \$151.1 million of our outstanding 8.875% Senior Notes due July 15, 2011. We used \$150 million of the proceeds to repay amounts under a term loan and the remainder of the offering proceeds to repay a portion of our outstanding debt under one of our revolving credit facilities. Please read Item 18 Financial Statements: Note 24(a) Subsequent Events.

Among other matters, our long-term debt agreements generally provide for the maintenance of certain vessel market value-to-loan ratios and minimum consolidated financial covenants and prepayment privileges, in some cases with penalties. Certain of the loan agreements require that we maintain a minimum level of free cash. As at December 31, 2009, this amount was \$100.0 million. Certain of the loan agreements also require that we maintain an aggregate level of free liquidity and undrawn revolving credit lines (with at least six months to maturity) of at least 7.5% of total debt. As at December 31, 2009, this amount was \$230.3 million. We were in compliance with all loan covenants at December 31, 2009.

We conduct our funding and treasury activities within corporate policies designed to minimize borrowing costs and maximize investment returns while maintaining the safety of the funds and appropriate levels of liquidity for our purposes. We hold cash and cash equivalents primarily in U.S. Dollars, with some balances held in Japanese Yen, Singapore Dollars, Canadian Dollars, Australian Dollars, British Pounds, Euros and Norwegian Kroner.

We are exposed to market risk from foreign currency fluctuations and changes in interest rates, spot tanker market rates for vessels and bunker fuel prices. We use forward foreign currency contracts, interest rate swaps, forward freight agreements and bunker fuel swap contracts to manage currency, interest rate, spot tanker rates and bunker fuel price risks. With the exception of some of our forward freight agreements, we do not use these financial instruments for trading or speculative purposes. Please read Item 11 Quantitative and Qualitative Disclosures About Market Risk.

As described under Item 4 Information on the Company: Regulations Environmental Regulation Other Environmental Initiatives, passage of any climate control legislation or other regulatory initiatives that restrict emissions of greenhouse gases could have a significant financial and operational impact on our business, which we cannot predict with certainty at this time. Such regulatory measures could increase our costs related to operating and maintaining our vessels and require us to install new emission controls, acquire allowances or pay taxes related to our greenhouse gas emissions, or administer and manage a greenhouse gas emissions program. In addition, increased regulation of

greenhouse gases may, in the long-term, lead to reduced demand for oil and reduced demand for our services.

Cash Flows

The following table summarizes our cash and cash equivalents provided by (used for) operating, financing and investing activities for the years presented:

	2009	2008
	(\$000 s)	(\$000 s)
Net operating cash flows	368,251	523,641
Net financing cash flows	(452,782)	676,084
Net investing cash flows	(307,124)	(828,233)

Table of Contents**Operating Cash Flows**

Net cash flow from operating activities decreased to \$368.2 million for the year ended December 31, 2009, from \$523.6 million for the year ended December 31, 2008, primarily due to a decrease in net revenue from vessel operations. Net cash flow from operating activities depends on the tanker utilization and spot market hire rates, changes in interest rates, fluctuations in working capital balances, timing and amount of drydocking expenditures, repairs and maintenance activities, vessel additions and dispositions, and foreign currency rates. The number of vessel drydockings tends to be uneven between years.

Financing Cash Flows

During 2009, our net proceeds from long-term debt net of debt issuance costs were \$1.2 billion. Our repayments of long-term debt were \$1.7 billion during the year. The net proceeds from long-term debt were used to finance our expenditures for vessels and equipment, which are explained in more detail below.

During March 2009, our subsidiary Teekay LNG issued an additional 4.0 million common units in a public offering for net proceeds of \$67.1 million. In June 2009, our subsidiary Teekay Tankers issued an additional 7.0 million shares of Class A Common Stock in a public offering for net proceeds of \$65.6 million. In August 2009, our subsidiary Teekay Offshore issued an additional 7.475 million common units in a public offering for net proceeds of \$102.0 million. In November 2009, Teekay LNG, issued an additional 3.951 million common units in a public offering for net proceeds of \$91.9 million. Please read Item 18 Financial Statements: Note 5 Equity Offerings by Subsidiaries. The net proceeds were used for repayment of debt and general corporate purposes.

During March 2010, Teekay Offshore completed a public offering of 4.4 million common units at a price of \$19.48 per unit, for gross proceeds of \$87.5 million (including the general partner's \$1.7 million proportionate capital contribution). The underwriters concurrently exercised their overallotment option to purchase an additional 660,000 units on March 22, 2010, providing additional gross proceeds of \$13.1 million (including the general partner's \$0.3 million proportionate capital contribution).

During April 2010, Teekay Tankers completed a public offering of 7.7 million common shares at a price of \$12.25 per share, for gross proceeds of \$94.3 million. The underwriters partially exercised their overallotment option and purchased an additional 1,079,500 common shares, for an additional gross proceeds of \$13.2 million. Teekay Tankers issued to us 2.6 million of unregistered common shares valued on a per-share basis at the public offering price of \$12.25).

During 2008, we repurchased 0.5 million shares of our common stock for \$20.5 million, at an average cost of \$41.09 per share, pursuant to previously announced share repurchase programs. There were no common stock repurchases during 2009. Please read Item 18 Financial Statements: Note 12 - Capital Stock.

Distributions from subsidiaries to non-controlling interests during 2009 were \$109.9 million.

Dividends paid during 2009 were \$91.7 million (2008 \$82.9 million), or \$1.265 per share (2008 - \$1.14125). We have paid a quarterly dividend since 1995. We increased our quarterly dividend from \$0.275 per share paid in the third quarter of 2008 to \$0.31625 per share in paid in the fourth quarter of 2008. Subject to financial results and declaration by the Board of Directors, we currently intend to continue to declare and pay a regular quarterly dividend in such amount per share on our common stock.

Investing Cash Flows

During 2009, we:

- incurred capital expenditures for vessels and equipment of \$495.2 million, primarily for the acquisition of one product tanker and shipyard construction installment payments on our newbuilding Suezmax tankers, shuttle tankers, LNG and LPG carriers;
- received proceeds of \$170.8 million from the sale of four product tankers;
- received proceeds of \$32.7 million from the sale of a 1993-built Aframax tanker through a sale-leaseback agreement; and
- received proceeds of \$16.3 million from the sale of a 1992-built Aframax tanker.

Table of Contents**COMMITMENTS AND CONTINGENCIES**

The following table summarizes our long-term contractual obligations as at December 31, 2009:

In millions of U.S. Dollars	Total	2010	2011 and 2012	2013 and 2014	Beyond 2014
U.S. Dollar-Denominated Obligations:					
Long-term debt ⁽¹⁾	4,006.9	218.2	755.3	1,342.6	1,690.8
Chartered-in vessels (operating leases)	637.0	235.1	269.9	89.4	42.6
Commitments under capital leases ⁽²⁾	221.6	23.7	197.9		
Commitments under capital leases ⁽³⁾	1,049.1	24.0	48.0	48.0	929.1
Commitments under operating leases ⁽⁴⁾	482.7	25.1	50.1	50.1	357.4
Newbuilding installments ⁽⁵⁾	463.5	311.8	151.7		
Asset retirement obligation	22.1				22.1
Total U.S. Dollar-denominated obligations	6,882.9	837.9	1,472.9	1,530.1	3,042.0
Euro-Denominated Obligations: ⁽⁶⁾					
Long-term debt ⁽⁷⁾	412.4	13.0	234.7	16.2	148.5
Commitments under capital leases ^{(2) (8)}	131.4	38.6	92.8		
Total Euro-denominated obligations	543.8	51.6	327.5	16.2	148.5
Total	7,426.7	889.5	1,800.4	1,546.3	3,190.5

(1) Excludes expected interest payments of \$75.1 million (2010), \$115.6 million (2011 and 2012), \$71.2 million (2013 and 2014) and \$73.9 million (beyond 2014). Expected interest payments are based on the existing interest rates (fixed-rate loans) and LIBOR plus margins that ranged up to 3.25% at December 31,

2009
(variable-rate loans). The expected interest payments do not reflect the effect of related interest rate swaps that we have used as an economic hedge of certain of our floating-rate debt.

- (2) Includes, in addition to lease payments, amounts we are required to pay to purchase certain leased vessels at the end of the lease terms. We are obligated to purchase five of our existing Suezmax tankers upon the termination of the related capital leases, which will occur in 2011. The purchase price will be based on the unamortized portion of the vessel construction financing costs for the vessels, which we expect to range from \$31.7 million to \$39.2 million per vessel. We expect to satisfy the purchase price by assuming the existing vessel financing, although we may

be required to obtain separate debt or equity financing to complete the purchases if the lenders do not consent to our assuming the financing obligations. We are also obligated to purchase one of our existing LNG carriers upon the termination of the related capital leases on December 31, 2011. The purchase obligation has been fully funded with restricted cash deposits. Please read Item 18 Financial Statements: Note 10 Capital Lease Obligations and Restricted Cash.

- (3) Existing restricted cash deposits of \$479.4 million, together with the interest earned on the deposits, will equal the remaining amounts we owe under the lease arrangements.
- (4) We have corresponding leases whereby we are the lessor and expect to receive \$448.0 million for these

leases from 2010
to 2029.

- (5) Represents remaining construction costs (excluding capitalized interest and miscellaneous construction costs) for three LPG carriers and four shuttle tankers as of December 31, 2009. Please read Item 18 Financial Statements: Note 16(a) Commitments and Contingencies Vessels Under Construction.
- (6) Euro-denominated obligations are presented in U.S. Dollars and have been converted using the prevailing exchange rate as at December 31, 2009.
- (7) Excludes expected interest payments of \$4.4 million (2010), \$4.9 million (2011 and 2012), \$3.4 million (2013 and 2014) and \$9.5 million (beyond 2014). Expected interest payments are based on EURIBOR at

December 31, 2009, plus margins that ranged up to 0.66%, as well as the prevailing U.S. Dollar/Euro exchange rate as of December 31, 2009. The expected interest payments do not reflect the effect of related interest rate swaps that we have used as an economic hedge of certain of our floating-rate debt.

- (8) Existing restricted cash deposits of \$120.8 million, together with the interest earned on the deposits, will be expected to equal the remaining amounts we owe under the lease arrangement, including our obligation to purchase the vessel at the end of the lease term.

We also have a 33% interest in a consortium that has entered into agreements for the construction of four LNG carriers. As at December 31, 2009, the remaining commitments on these vessels, excluding capitalized interest and other miscellaneous construction costs, totaled \$724.8 million of which our share is \$239.2 million. Please read Item 18 Financial Statements: Note 16(b) - Commitments and Contingencies Joint Ventures.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements that have, or are reasonably likely to have, a current or future material effect on our financial condition, results of operations, liquidity, capital expenditures or capital resources.

Table of Contents**Critical Accounting Estimates**

We prepare our consolidated financial statements in accordance with GAAP, which requires us to make estimates in the application of our accounting policies based on our best assumptions, judgments and opinions. On a regular basis, management reviews our accounting policies, assumptions, estimates and judgments to ensure that our consolidated financial statements are presented fairly and in accordance with GAAP. However, because future events and their effects cannot be determined with certainty, actual results could differ from our assumptions and estimates, and such differences could be material. Accounting estimates and assumptions discussed in this section are those that we consider to be the most critical to an understanding of our financial statements because they inherently involve significant judgments and uncertainties. For a further description of our material accounting policies, please read Item 18 Financial Statements: Note 1 Summary of Significant Accounting Policies.

Revenue Recognition

Description. We generate a majority of our revenues from spot voyages and voyages servicing contracts of affreightment. Within the shipping industry, the two methods used to account for revenues and expenses are the percentage of completion and the completed voyage methods. Most shipping companies, including us, use the percentage of completion method. For each method, voyages may be calculated on either a load-to-load or discharge-to-discharge basis. In other words, revenues are recognized ratably either from the beginning of when product is loaded for one voyage to when it is loaded for another voyage, or from when product is discharged (unloaded) at the end of one voyage to when it is discharged after the next voyage. We recognize revenues from time-charters daily over the term of the charter as the applicable vessel operates under the charter. Revenues from FPSO service contracts are recognized as service is performed. In all cases we do not recognize revenues during days that a vessel is off-hire.

Judgments and Uncertainties. In applying the percentage of completion method, we believe that in most cases the discharge-to-discharge basis of calculating voyages more accurately reflects voyage results than the load-to-load basis. At the time of cargo discharge, we generally have information about the next load port and expected discharge port, whereas at the time of loading we are normally less certain what the next load port will be. We use this method of revenue recognition for all spot voyages and voyages servicing contracts of affreightment, with an exception for our shuttle tankers servicing contracts of affreightment with offshore oil fields. In this case a voyage commences with tendering of notice of readiness at a field, within the agreed lifting range, and ends with tendering of notice of readiness at a field for the next lifting. However we do not begin recognizing revenue for any of our vessels until a charter has been agreed to by the customer and us, even if the vessel has discharged its cargo and is sailing to the anticipated load port on its next voyage.

Effect if Actual Results Differ from Assumptions. Our revenues could be overstated or understated for any given period to the extent actual results are not consistent with our estimates in applying the percentage of completion method.

Vessel Lives and Impairment

Description. The carrying value of each of our vessels represents its original cost at the time of delivery or purchase less depreciation or impairment charges. We depreciate our vessels on a straight-line basis over each vessel's estimated useful life, less an estimated residual value. The carrying values of our vessels may not represent their fair market value at any point in time because the market prices of second-hand vessels tend to fluctuate with changes in charter rates and the cost of newbuildings. Both charter rates and newbuilding costs tend to be cyclical in nature. We review vessels and equipment for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. We measure the recoverability of an asset by comparing its carrying amount to future undiscounted cash flows that the asset is expected to generate over its remaining useful life.

Judgments and Uncertainties. Depreciation is calculated using an estimated useful life of 25 years for Aframax, Suezmax, and product tankers, 25 to 30 years for FPSO units and 35 years for LNG and LPG carriers, commencing the date the vessel was originally delivered from the shipyard. However, the actual life of a vessel may be different, with a shorter life resulting in an increase in the quarterly depreciation and potentially resulting in an impairment loss. The estimates and assumptions regarding expected cash flows require considerable judgment and are based upon existing contracts, historical experience, financial forecasts and industry trends and conditions. We are not aware of any indicators of impairments nor any regulatory changes or environmental liabilities that we anticipate will have a

material impact on our current or future operations.

Effect if Actual Results Differ from Assumptions. If we consider a vessel or equipment to be impaired, we recognize a loss in an amount equal to the excess of the carrying value of the asset over its fair market value. The new lower cost basis will result in a lower annual depreciation expense than before the vessel impairment.

Drydocking

Description. We capitalize a substantial portion of the costs we incur during drydocking and amortize those costs on a straight-line basis over the useful life of the drydock. We expense costs related to routine repairs and maintenance incurred during drydocking that do not improve operating efficiency or extend the useful lives of the assets and for annual class survey costs on our FPSO units. When significant drydocking expenditures occur prior to the expiration of the original amortization period, the remaining unamortized balance of the original drydocking cost and any unamortized intermediate survey costs are expensed in the period of the subsequent drydockings.

Judgments and Uncertainties. Amortization of capitalized drydock expenditures requires us to estimate the period of the next drydocking and useful life of drydock expenditures. While we typically drydock each vessel every two and a half to five years and have a shipping society classification intermediate survey performed on our LNG and LPG carriers between the second and third year of the five-year drydocking period, we may drydock the vessels at an earlier date, with a shorter life resulting in an increase in the depreciation

Effect if Actual Results Differ from Assumptions. If we change our estimate of the next drydock date for a vessel, we will adjust our annual amortization of drydocking expenditures.

Table of Contents***Goodwill and Intangible Assets***

Description. We allocate the cost of acquired companies to the identifiable tangible and intangible assets and liabilities acquired, with the remaining amount being classified as goodwill. Certain intangible assets, such as time-charter contracts, are being amortized over time. Our future operating performance will be affected by the amortization of intangible assets and potential impairment charges related to goodwill. Accordingly, the allocation of purchase price to intangible assets and goodwill may significantly affect our future operating results. Goodwill and indefinite-lived assets are not amortized, but reviewed for impairment annually, or more frequently if impairment indicators arise. The process of evaluating the potential impairment of goodwill and intangible assets is highly subjective and requires significant judgment at many points during the analysis.

Judgments and Uncertainties. The allocation of the purchase price of acquired companies requires management to make significant estimates and assumptions, including estimates of future cash flows expected to be generated by the acquired assets and the appropriate discount rate to value these cash flows. In addition, the process of evaluating the potential impairment of goodwill and intangible assets is highly subjective and requires significant judgment at many points during the analysis. The fair value of our reporting units was estimated based on discounted expected future cash flows using a weighted-average cost of capital rate. The estimates and assumptions regarding expected cash flows and the appropriate discount rates require considerable judgment and are based upon existing contracts, historical experience, financial forecasts and industry trends and conditions.

As of December 31, 2009, we had three reporting units with goodwill attributable to them. During the third quarter of 2009, we determined there were indicators of impairment present within our shuttle tanker reporting unit. Consequently, an interim goodwill impairment test was conducted on this reporting unit. This interim goodwill impairment test determined that the fair value of the reporting unit exceeded its carrying value by approximately 75%. As of December 31, 2009, the carrying value of goodwill for this reporting unit was \$130.9 million. Key assumptions that impact the fair value of this reporting unit include the our ability to do the following: maintain or improve the utilization of its vessels; redeploy existing vessels on the expiry of their current charters; control or reduce operating expenses, pass on operating cost increases to its customers in the form of higher charter rates; and continue to grow the business. Other key assumptions include the operating life of our vessels, its cost of capital, the volume of production from certain offshore oil fields, and the fair value of its credit facilities. If actual future results are less favorable than expected results, in one or more of these key assumptions, a goodwill impairment may occur.

Effect if Actual Results Differ from Assumptions. As of the date of this filing, we do not believe that there is a reasonable possibility that the goodwill attributable to its other two reporting units with goodwill attributable to them might be impaired within the next year. However, certain factors that impact our goodwill impairment tests are inherently difficult to forecast and as such we cannot provide any assurances that an impairment will or will not occur in the future. An assessment for impairment involves a number of assumptions and estimates that are based on factors that are beyond our control. These are discussed in more detail in the following section entitled *Forward-Looking Statements* .

Valuation of Derivative Financial Instruments

Description. Our risk management policies permit the use of derivative financial instruments to manage foreign currency fluctuation, interest rate, bunker fuel price and spot tanker market rate risk. Changes in fair value of derivative financial instruments that are not designated as cash flow hedges for accounting purposes are recognized in earnings. Changes in fair value of derivative financial instruments that are designated as cash flow hedges for accounting purposes are recorded in other comprehensive income (loss) and are reclassified to earnings when the hedged transaction is reflected in earnings. Ineffective portions of the hedges are recognized in earnings as they occur. During the life of the hedge, we formally assess whether each derivative designated as a hedging instrument continues to be highly effective in offsetting changes in the fair value or cash flows of hedged items. If it is determined that a hedge has ceased to be highly effective, we will discontinue hedge accounting prospectively.

Judgments and Uncertainties. The fair value of our derivative financial instruments is the estimated amount that we would receive or pay to terminate the agreements in an arm's length transaction under normal business conditions at the reporting date, taking into account current interest rates, foreign exchange rates, bunker fuel prices and spot tanker market rates, and estimates of the current credit worthiness of both us and the swap counterparty. Inputs used to

determine the fair value of our derivative instruments are observable either directly or indirectly in active markets. The process of determining credit worthiness is highly subjective and requires significant judgment at many points during the analysis.

Effect if Actual Results Differ from Assumptions. If our estimates of fair value are inaccurate, this could result in a material adjustment to the carrying amount of derivative asset or liability and consequently the change in fair value for the applicable period that would have been recognized in earnings or comprehensive income.

Recent Accounting Pronouncements Not Yet Adopted

In June 2009, the Financial Accounting Standards Board (or *FASB*) issued an amendment to FASB ASC 810, *Consolidations* that eliminates certain exceptions to consolidating qualifying special-purpose entities, contains new criteria for determining the primary beneficiary, and increases the frequency of required reassessments to determine whether a company is the primary beneficiary of a variable interest entity. This amendment also contains a new requirement that any term, transaction, or arrangement that does not have a substantive effect on an entity's status as a variable interest entity, a company's power over a variable interest entity, or a company's obligation to absorb losses or its right to receive benefits of an entity must be disregarded. The elimination of the qualifying special-purpose entity concept and its consolidation exceptions means more entities will be subject to consolidation assessments and reassessments. During February 2010, the scope of the revised standard was modified to indefinitely exclude certain entities from the requirement to be assessed for consolidation. This amendment is effective for fiscal years beginning after November 15, 2009, and for interim periods within that first period, with earlier adoption prohibited. We are currently assessing the potential impact, if any, of this statement on our consolidated financial statements.

In June 2009, the FASB issued an amendment to FASB ASC 860, *Transfers and Servicing* that eliminates the concept of a qualifying special-purpose entity, creates more stringent conditions for reporting a transfer of a portion of a financial asset as a sale, clarifies other sale-accounting criteria, and changes the initial measurement of a transferor's interest in transferred financial assets. This amendment will be effective for transfers of financial assets in fiscal years beginning after November 15, 2009, and in interim periods within those fiscal years with earlier adoption prohibited. We are currently assessing the potential impacts, if any, on our consolidated financial statements.

Table of Contents

In September 2009, the FASB issued an amendment to FASB ASC 605, *Revenue Recognition* that provides for a new methodology for establishing the fair value for a deliverable in a multiple-element arrangement. When vendor specific objective or third-party evidence for deliverables in a multiple-element arrangement cannot be determined, we will be required to develop a best estimate of the selling price of separate deliverables and to allocate the arrangement consideration using the relative selling price method. This amendment will be effective for us on January 1, 2011. We are currently assessing the potential impacts, if any, on our consolidated financial statements.

In January 2010, the FASB issued an amendment to FASB ASC 820 *Fair Value Measurements and Disclosures*, which amends the guidance on fair value to add new requirements for disclosures about transfers into and out of Levels 1 and 2 and separate disclosures about purchases, sales, issuances, and settlements relating to Level 3 measurements. It also clarifies existing fair value disclosures about the level of disaggregation and about inputs and valuation techniques used to measure fair value. This amendment is effective for the first reporting period beginning after December 15, 2009, except for the requirement to provide the Level 3 activity of purchases, sales, issuances, and settlements on a gross basis, which will be effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. The adoption will have no impact on our results of operations, financial position, or cash flows.

Item 6. Directors, Senior Management and Employees**Directors and Senior Management**

Our directors and executive officers as of the date of this annual report and their ages as of December 31, 2009, are listed below:

Name	Age	Position
C. Sean Day	60	Director and Chair of the Board
Bjorn Moller	52	Director, President and Chief Executive Officer
Axel Karlshoej	69	Director and Chair Emeritus
Dr. Ian D. Blackburne	63	Director
James R. Clark	59	Director
Peter S. Janson	62	Director
Thomas Kuo-Yuen Hsu	63	Director
Eileen A. Mercier	62	Director
Tore I. Sandvold	62	Director
Arthur Bensler	52	EVP, Secretary and General Counsel
Bruce Chan	37	President, Teekay Tanker Services, a division of Teekay
Peter Evensen	51	EVP and Chief Strategy Officer
David Glendinning	55	President, Teekay Gas Services and Offshore, a division of Teekay
Kenneth Hvid	41	President, Teekay Navion Shuttle Tankers and Offshore, a division of Teekay
Vincent Lok	41	EVP and Chief Financial Officer
Peter Lytzen	52	President, Teekay Petrojarl AS, a subsidiary of Teekay
Lois Nahirney	46	EVP, Corporate Resources
Graham Westgarth	55	President, Teekay Marine Services, a division of Teekay

Certain biographical information about each of these individuals is set forth below:

C. Sean Day has served as a Teekay director since 1998 and as our Chairman of the Board since September 1999. Mr. Day has also served as Chairman of Teekay GP L.L.C., the general partner of Teekay LNG since its formation in November 2004, Chairman of Teekay Offshore GP L.L.C., the general partner of Teekay Offshore since its formation in August 2006, and Chairman of Teekay Tankers since its formation in October 2007. From 1989 to 1999, he was President and Chief Executive Officer of Navios Corporation, a large bulk shipping company based in Stamford, Connecticut. Prior to Navios, Mr. Day held a number of senior management positions in the shipping and finance industries. He is currently serving as a director of Kirby Corporation and is Chairman of Compass Diversified

Holdings. Mr. Day is engaged as a consultant to Kattegat Limited, the parent company of Resolute Investments, Ltd., our largest shareholder, to oversee its investments, including that in the Teekay group of companies.

Bjorn Moller became a Teekay director and our President and Chief Executive Officer in April 1998. Mr. Moller has served as Vice Chairman and a Director of Teekay GP L.L.C. since its formation in November 2004, Vice Chairman and a Director of Teekay Offshore GP L.L.C. since its formation in August 2006, and as the Chief Executive Officer and a director of Teekay Tankers since its formation in October 2007. Mr. Moller has over 25 years' experience in the shipping industry, and has served as Chairman of the International Tanker Owners Pollution Federation since December 2006 and on the Board of the American Petroleum Institute since 2000. He has served in senior management positions with Teekay for more than 15 years and has headed our overall operations since January 1997, following his promotion to the position of Chief Operating Officer. Prior to this, Mr. Moller headed our global chartering operations and business development activities.

Axel Karlshoej has served as a Teekay director since 1989 and was Chairman of the Teekay Board from June 1994 to September 1999, and has been Chairman Emeritus since stepping down as Chairman. Mr. Karlshoej is President and serves on the compensation committee of Nordic Industries, a California general construction firm with which he has served for the past 30 years. He is the older brother of the late J. Torben Karlshoej, Teekay's founder. Please read Item 7 Major Shareholders and Certain Relationships and Related Party Transactions.

Dr. Ian D. Blackburne has served as a Teekay director since 2000. Mr. Blackburne has over 25 years' experience in petroleum refining and marketing, and in March 2000 he retired as Managing Director and Chief Executive Officer of Caltex Australia Limited, a large petroleum refining and marketing conglomerate based in Australia. He is currently serving as Chairman of CSR Limited and is a director of Suncorp-Metway Ltd. and Symbion Health Limited (formerly Mayne Group Limited), Australian public companies in the diversified industrial and financial sectors. Dr. Blackburne was also previously the Chairman of the Australian Nuclear Science and Technology Organization.

Table of Contents

James R. Clark has served as a Teekay director since 2006. Mr. Clark was President and Chief Operating Officer of Baker Hughes Incorporated from February 2004 until his retirement in January 2008. Previously, he was Vice President, Marketing and Technology from 2003 to 2004, having joined Baker Hughes Incorporated in 2001 as Vice President and President of Baker Petrolite Corporation. Mr. Clark was President and Chief Executive Officer of Consolidated Equipment Companies, Inc. from 2000 to 2001 and President of Sperry-Sun, a Halliburton company, from 1996 to 1999. He has also held financial, operational and leadership positions with FMC Corporation, Schlumberger Limited and Grace Energy Corporation. Mr. Clark also serves on the Board of Incorporate Members of Dallas Theological Seminary and is a Trustee of the Center for Christian Growth, both in Dallas, Texas.

Peter S. Janson has served as a Teekay director since 2005. From 1999 to 2002, Mr. Janson was the Chief Executive Officer of Amec Inc. (formerly Agra Inc.), a publicly traded engineering and construction company. From 1986 to 1994 he served as the President and Chief Executive Officer of Canadian operations for Asea Brown Boveri Inc., a company for which he also served as Chief Executive Officer for U.S. operations from 1996 to 1999. Mr. Janson has also served as a member of the Business Round Table in the United States, and as a member of the National Advisory Board on Sciences and Technology in Canada. He is a director of Terra Industries Inc and IEC Holden Inc.

Thomas Kuo-Yuen Hsu has served as a Teekay director since 1993. He is presently a director of, CNC Industries, an affiliate of the Expedo Group of Companies that manages a fleet of six vessels of 70,000 dwt. He has been a Committee Director of the Britannia Steam Ship Insurance Association Limited since 1988. Please read Item 7 Major Shareholders and Certain Relationships and Related Party Transactions.

Eileen A. Mercier has served as a Teekay director since 2000. She has over 37 years experience in a wide variety of financial and strategic planning positions, including Senior Vice President and Chief Financial Officer for Abitibi-Price Inc. from 1990 to 1995. She formed her own management consulting company, Finvoy Management Inc. and acted as president from 1995 to 2003. She currently serves as Chairman of the Ontario Teachers Pension Plan, director for ING Bank of Canada and York University, and as a director and audit committee member for CGI Group Inc. and ING Canada Inc.

Tore I. Sandvold has served as a Teekay director since 2003. He has over 30 years experience in the oil and energy industry. From 1973 to 1987 he served in the Norwegian Ministry of Industry, Oil & Energy in a variety of positions in the areas of domestic and international energy policy. From 1987 to 1990 he served as the Counselor for Energy in the Norwegian Embassy in Washington, D.C. From 1990 to 2001 Mr. Sandvold served as Director General of the Norwegian Ministry of Oil & Energy, with overall responsibility for Norway's national and international oil and gas policy. From 2001 to 2002 he served as Chairman of the Board of Petoro, the Norwegian state-owned oil company that is the largest oil asset manager on the Norwegian continental shelf. From 2002 to the present, Mr. Sandvold, through his company, Sandvold Energy AS, has acted as advisor to companies and advisory bodies in the energy industry. Mr. Sandvold serves on other boards, including those of Schlumberger Limited., E. on Ruhrgas Norge AS, Lambert Energy Advisory Ltd., University of Stavanger, Offshore Northern Seas, and the Energy Policy Foundation of Norway.

Arthur Bensler joined Teekay in September 1998 as General Counsel. He was promoted to the position of Vice President in March 2002 and became our Corporate Secretary in May 2003. He was appointed Senior Vice President in February 2004 and Executive Vice President in January 2006. Prior to joining Teekay, Mr. Bensler was a partner in a large Vancouver, Canada, law firm, where he practiced corporate, commercial and maritime law from 1986 until joining Teekay.

Bruce Chan joined Teekay in September 1995. Since then, in addition to spending a year in Teekay's London office, Mr. Chan has held a number of finance and accounting positions with the Company, including Vice President, Strategic Development from February 2004 until his promotion to the position of Senior Vice President, Corporate Resources in September 2005. In April 2008, Mr. Chan was appointed President of the Company's Teekay Tanker Services division, which is responsible for the commercial management of Teekay's conventional crude oil and product tanker transportation services. Prior to joining Teekay, Mr. Chan worked as a Chartered Accountant in the Vancouver, Canada office of Ernst & Young LLP.

Peter Evensen joined Teekay in May 2003 as Senior Vice President, Treasurer and Chief Financial Officer. He was appointed Executive Vice President and Chief Financial Officer in February 2004 and was appointed Executive Vice

President and Chief Strategy Officer in November 2006. Mr. Evensen has served as the Chief Executive Officer and Chief Financial Officer of Teekay GP L.L.C. since its formation in November 2004 and as a director of Teekay GP L.L.C. since January 2005. Mr. Evensen has served as the Chief Executive Officer and Chief Financial Officer and a director of Teekay Offshore GP L.L.C. since 2006, and as Executive Vice President and a director of Teekay Tankers since October 2007. Mr. Evensen has over 20 years of experience in banking and shipping finance. Prior to joining Teekay, Mr. Evensen was Managing Director and Head of Global Shipping at J.P. Morgan Securities Inc. and worked in other senior positions for its predecessor firms. His international industry experience includes positions in New York, London and Oslo.

David Glendinning joined Teekay in January 1987. Since then, he has held a number of senior positions, including service as Vice President, Marine and Commercial Operations from January 1995 until his promotion to Senior Vice President, Customer Relations and Marine Project Development in February 1999. In November 2003, Mr. Glendinning was appointed President of our Teekay Gas Services division, which is responsible for our initiatives in the LNG business and other areas of gas activity. Prior to joining Teekay, Mr. Glendinning, who is a Master Mariner, had 18 years sea service on oil tankers of various types and sizes.

Kenneth Hvid joined Teekay in October 2000 and was responsible for leading our global procurement activities until he was promoted in 2004 to Senior Vice President, Teekay Gas Services. During this time, Mr. Hvid was involved in leading Teekay through its entry and growth in the LNG business. He held this position until the beginning of 2006, when he was appointed President of our Teekay Navion Shuttle Tankers and Offshore division. In this role he is responsible for our global shuttle tanker business as well as initiatives in the floating storage and offtake business and related offshore activities. Mr. Hvid has 18 years of global shipping experience, 12 of which were spent with A.P. Moller in Copenhagen, San Francisco and Hong Kong.

Vincent Lok has served as Teekay's Executive Vice President and Chief Financial Officer since July 2007. He has held a number of finance and accounting positions with Teekay Corporation, including Controller from 1997 until his promotions to the positions of Vice President, Finance in March 2002 and Senior Vice President and Treasurer in February 2004, and Senior Vice President and Chief Financial Officer in November 2006. Mr. Lok has served as the Chief Financial Officer of Teekay Tankers since its formation in October 2007. Prior to joining Teekay Corporation, Mr. Lok worked in the Vancouver, Canada, audit practice of Deloitte & Touche LLP.

Table of Contents

Peter Lytzen joined Teekay Petrojarl as President and Chief Executive Officer on August 1, 2007. Mr. Lytzen's experience includes over 20 years in the oil and gas industry and he joined Teekay Petrojarl from Maersk Contractors, where he most recently served as Vice President of Production. In this role, he held overall responsibility for Maersk Contractors' technical tendering, construction and operation of FPSO and other offshore production solutions. He first joined Maersk in 1987 and held progressively responsible positions throughout the organization.

Lois Nahirney joined Teekay in August 2008, and is responsible for shore-based Human Resources, Corporate Communications, Corporate Services, and IT. Ms. Nahirney brings to the role more than 25 years of global experience as a senior executive and consultant in human resources, strategy, organization change, and information systems. Prior to joining Teekay, she held the position of Acting Chief Human Resources Officer with BC Hydro in Vancouver, Canada, and Partner with Western Management Consultants.

Graham Westgarth joined Teekay in February 1999 as Vice President, Marine Operations. He was promoted to the position of Senior Vice President, Marine Operations in December 1999. In November 2003 Mr. Westgarth was appointed President of our Teekay Marine Services division, which is responsible for all of our marine and technical operations, as well as marketing a range of services and products to third parties, such as marine consulting services. He has extensive shipping industry experience. Prior to joining Teekay, Mr. Westgarth was General Manager of Maersk Company (UK), where he joined as Master in 1987. He has 36 years of industry experience, which includes 18 years' sea service, with five years in a command position. In November 2009, Mr. Westgarth was elected Chairman of the International Association of Independent Tanker Owners.

Compensation of Directors and Senior Management*Director Compensation*

During 2009, the eight non-employee directors received, in the aggregate, \$700,000 in cash fees for their services as directors, plus reimbursement of their out-of-pocket expenses. Each non-employee director receives an annual cash retainer of \$50,000. Members of the Audit Committee, Compensation and Human Resources Committee, and Nominating and Governance Committee each receive an additional annual cash retainer of \$8,000, \$5,000 and \$5,000, respectively. The Chairman of the Board and the Chairman of the Audit Committee receive an additional annual cash retainer of \$278,000 and \$16,000, respectively.

Each non-employee director (excluding the Chairman of the Board) also received an \$85,000 annual retainer to be paid by way of a grant of, at the director's election, restricted stock or stock options under our 2003 Equity Incentive Plan. Pursuant to this annual retainer, during 2009 we granted stock options to purchase an aggregate of 28,500 shares of our common stock (excluding the Chairman of the Board's) at an exercise price of \$11.84 per share and 34,070 shares of restricted stock. During 2009 the Chairman of the Board received a \$470,000 retainer in the form of 52,600 shares of common stock and 13,500 shares of restricted stock under our 2003 Equity Incentive Plan. The stock options described above expire March 8, 2019, ten years after the date of their grant. The stock options and restricted stock vest as to one third of the shares on each of the first three anniversaries of their respective grant date. The stock options and restricted stock are not subject to any forfeiture requirements on the resignation of a director.

Annual Executive Compensation

The aggregate compensation earned by Teekay's ten executive officers listed above (or the *Executive Officers*) for 2009 was \$7.4 million. This is comprised of base salary (\$4.4 million), annual bonus (\$1.9 million) and pension and other benefits (\$1.0 million). These amounts were paid primarily in Canadian Dollars, but are reported here in U.S. Dollars using an exchange rate of 1.0494 Canadian Dollars for each U.S. Dollar, the exchange rate on December 31, 2009. Teekay's annual bonus plan considers both company performance, through comparison to established targets and financial performance of peer companies, and individual performance.

Long-Term Incentive Program

Teekay's long-term incentive program provides focus on the returns realized by our shareholders and acknowledges and retains those executives who can influence our long-term performance. The long-term incentive plan provides a balance against short-term decisions and encourages a longer time horizon for decisions. This program consists of stock option grants and restricted stock units. All grants in 2009 were made under our 2003 Equity Incentive Plan.

During March 2009, we granted stock options to purchase an aggregate of 779,300 shares of our common stock at an exercise price of \$11.84 and 211,260 shares of restricted stock to the Executive Officers under our 2003 Equity

Incentive Plan. The stock options expire March 8, 2019, ten years after the date of the grant. The stock options and restricted stock vest as to one third of the shares on each of the first three anniversaries of their respective grant date. During March 2010, we granted stock options to purchase an aggregate of 474,080 shares of our common stock at an exercise price of \$24.42, 126,572 shares of restricted stock, and 87,054 performance shares to the Executive Officers under our 2003 Equity Incentive Plan. The stock options expire March 8, 2020, ten years after the date of the grant. The stock options and restricted stock vest as to one third of the shares on each of the first three anniversaries of their respective grant date. Performance shares have a bullet vesting at the end of the three year performance cycle.

Table of Contents*Vision Incentive Plan*

In 2005, we adopted the Vision Incentive Plan (or the *VIP*) to reward exceptional corporate performance and shareholder returns. This plan results in an award pool for senior management based on the following two measures: (a) economic profit from 2005 to 2010 (or the *Economic Profit*); and (b) market value added from 2001 to 2010 (or the *MVA*). The Plan terminates on December 31, 2010. Under the VIP, the Economic Profit is the difference between our annual return on invested capital and our weighted-average cost of capital multiplied by our average invested capital employed during the year, and the increase in MVA from January 1, 2001 to December 31, 2010, where the MVA is the amount by which the average market value of Teekay for the preceding 18 months exceeds our average book value for the same period. Teekay reserves the right to amend the terms of the VIP, suspend the VIP or terminate the VIP in its entirety without any obligation or liability to any participant, if the Board has determined that the amendment, suspension or termination is necessary because the operation of the VIP will result in an award pool that is disproportionate to the benefit received by the shareholders of Teekay, having regard to the purpose of the VIP, as a result of unintended or unexpected circumstances. Under the terms of the VIP, awards may only be made to VIP participants in 2008 and 2011. Please read Item 19 Exhibits: Exhibit 4.6 for further information on the VIP.

Under the terms of the VIP, an interim award may only be made to VIP participants in 2008 and the final award may only be made in 2011. During March 2008, the 2008 interim award, with a value of \$5.0 million, was paid to executive officers in the form of 124,500 restricted stock units. These restricted stock units vest in three equal amounts in November 2008, November 2009 and November 2010. Each restricted stock unit is equal in value to one share of our Common Stock and reinvested dividends from the date of the grant to the vesting of the restricted stock unit. During 2009, we issued 13,423 shares and awarded \$0.6 million in cash to the executive officers upon the first vesting of their restricted stock units that were awarded to them in March 2008 as part of their interim award under the VIP. In September 2009, 187,400 restricted stock units, with a two-year bullet vesting, were granted as the June 2009 New Participants Reserve Pool (NPRP) allocation under the VIP. At least 50% of any distribution from the balance of the VIP award pool in 2011 must be paid in a form that is equity-based, with vesting on half of this percentage deferred for one year and vesting on the remaining half of this percentage deferred for two years.

Options to Purchase Securities from Registrant or Subsidiaries

As at December 31, 2009, we had reserved pursuant to our 1995 Stock Option Plan, which was terminated with respect to new grants effective September 10, 2003, and our 2003 Equity Incentive Plan, which was adopted effective on the same date (together, the *Plans*), 6,123,577 shares of common stock for issuance upon exercise of options granted or to be granted. During 2009, 2008, and 2007 we granted options under the Plans to acquire up to 1,517,900, 1,476,100, and 836,100 shares of common stock, respectively, to eligible officers, employees and directors. Each option under the Plans has a 10-year term and vests between two to three years from the grant date. The outstanding options under the Plans are exercisable at prices ranging from \$11.84 to \$60.96 per share, with a weighted-average exercise price of \$31.46 per share, and expire between March 6, 2010 and March 9, 2019.

Board Practices

The Board of Directors consists of nine members. The Board of Directors is divided into three classes, with members of each class elected to hold office for a term of three years in accordance with the classification indicated below or until his or her successor is elected and qualified.

Directors Peter S. Janson, Eileen A. Mercier and Tore I. Sandvold have terms expiring in 2010. Directors Thomas Kuo-Yuen Hsu, Axel Karlshoej and Bjorn Moller have terms expiring in 2011.

There are no service contracts between us and any of our directors providing for benefits upon termination of their employment or service.

The Board of Directors has determined that each of the current members of the Board, other than Bjorn Moller, our President and Chief Executive Officer, has no material relationship with Teekay (either directly or as a partner, shareholder or officer of an organization that has a relationship with Teekay), and is independent within the meaning of our director independence standards, which reflect the New York Stock Exchange (or *NYSE*) director independence standards as currently in effect and as they may be changed from time to time. In making this determination the Board considered the relationships of Thomas Kuo-Yuen Hsu and Axel Karlshoej with our largest shareholder and concluded these relationships do not materially affect their independence as current directors. Please read Item 7

Major Shareholders and Certain Relationships and Related Party Transactions.

The Board of Directors has three committees: Audit Committee, Compensation and Human Resources Committee, and Nominating and Governance Committee. The membership of these committees during 2009 and the function of each of the committees are described below. Each of the committees is currently comprised of independent members and operates under a written charter adopted by the Board. All of the committee charters are available under "Corporate Governance" in the Investor Centre of our website at www.teekay.com. During 2009, the Board held eight meetings. Each director attended all Board meetings, except for two Board meetings at which one director was absent. Each committee member attended all applicable committee meetings, except for one Compensation Committee meeting at which two directors were absent.

Our Audit Committee is composed entirely of directors who satisfy applicable NYSE and SEC audit committee independence standards. Our Audit Committee includes Eileen A. Mercier (Chairman), Peter S. Janson and J. Rod Clark. All members of the committee are financially literate and the Board has determined that Ms. Mercier qualifies as an audit committee financial expert.

The Audit Committee assists the Board in fulfilling its responsibilities for general oversight of:

the integrity of our financial statements;

our compliance with legal and regulatory requirements;

the independent auditors' qualifications and independence; and

the performance of our internal audit function and independent auditors.

During 2009, our Compensation and Human Resources Committee included C. Sean Day (Chairman), Axel Karlshøj, Ian D. Blackburne and Peter S. Janson.

Table of Contents

The Compensation and Human Resources Committee:

- reviews and approves corporate goals and objectives relevant to the Chief Executive Officer's compensation, evaluates the Chief Executive Officer's performance in light of these goals and objectives and determines the Chief Executive Officer's compensation;

- reviews and approves the evaluation process and compensation structure for executive officers, other than the Chief Executive Officer, evaluates their performance and sets their compensation based on this evaluation;

- reviews and makes recommendations to the Board regarding compensation for directors;

- establishes and administers long-term incentive compensation and equity-based plans; and

- oversees our other compensation plans, policies and programs.

During 2009, our Nominating and Governance Committee included Ian D. Blackburne (Chairman), Tore I. Sandvold, Eileen A. Mercier and Thomas Kuo-Yuen Hsu.

The Nominating and Governance Committee:

- identifies individuals qualified to become Board members;

- selects and recommends to the Board director and committee member candidates;

- develops and recommends to the Board corporate governance principles and policies applicable to us,

- monitors compliance with these principles and policies and recommends to the Board appropriate changes;

- and

- oversees the evaluation of the Board and management.

Crewing and Staff

As at December 31, 2009, we employed approximately 5,400 seagoing and 900 shore-based personnel, compared to approximately 5,700 seagoing and 900 shore-based personnel as at December 31, 2008, and 5,600 seagoing and 800 shore-based personnel as at December 31, 2007.

We regard attracting and retaining motivated seagoing personnel as a top priority. Through our global manning organization comprised of offices in Glasgow, Scotland, Manila, Philippines, Mumbai, India, Sydney, Australia, and Madrid, Spain, we offer seafarers what we believe are competitive employment packages and comprehensive benefits. We also intend to provide opportunities for personal and career development, which relate to our philosophy of promoting internally.

During fiscal 1996, we entered into a Collective Bargaining Agreement with the Philippine Seafarers' Union, an affiliate of the International Transport Workers' Federation (or *ITF*), and a Special Agreement with ITF London that cover substantially all of our junior officers and seamen. We are also party to Enterprise Bargaining Agreements with various Australian maritime unions that cover officers and seamen employed through our Australian operations. Our officers and seamen for our Spanish-flagged vessels are covered by a collective bargaining agreement with Spain's Union General de Trabajadores and Comisiones Obreras. We believe our relationships with these labor unions are good.

We see our commitment to training as fundamental to the development of the highest caliber seafarers for our marine operations. Our cadet training program is designed to balance academic learning with hands-on training at sea. We have relationships with training institutions in Canada, Croatia, India, Norway, Philippines, Turkey and the United Kingdom. After receiving formal instruction at one of these institutions, the cadets' training continues on board a Teekay vessel. We also have an accredited Teekay-specific competence management system that is designed to ensure a continuous flow of qualified officers who are trained on our vessels and are familiar with our operational standards, systems and policies. We believe that high-quality manning and training policies will play an increasingly important role in distinguishing larger independent tanker companies that have in-house, or affiliate, capabilities from smaller companies that must rely on outside ship managers and crewing agents.

Share Ownership

The following table sets forth certain information regarding beneficial ownership, as of March 15, 2010, of our common stock by the directors and Executive Officers as a group. The information is not necessarily indicative of beneficial ownership for any other purpose. Under SEC rules a person or entity beneficially owns any shares that the person or entity has the right to acquire as of May 14, 2010 (60 days after March 15, 2010) through the exercise of any

stock option or other right. Unless otherwise indicated, each person or entity has sole voting and investment power (or shares such powers with his or her spouse) with respect to the shares set forth in the following table. Information for certain holders is based on information delivered to us.

Identity of Person or Group	Shares Owned	Percent of Class
All directors and Executive Officers (18 persons)	2,718,455 ^{(1) (3)}	3.7% ⁽²⁾

the outstanding
shares of common
stock.

- (3) Each director is expected to have acquired shares having a value of at least four times the value of the annual cash retainer paid to them for their Board service (excluding fees for Chair or Committee service) no later than May 14, 2010 or the fifth anniversary of the date on which the director joined the Board, whichever is later. In addition, each Executive Officer is expected to acquire shares of Teekay's common stock equivalent in value to one to three times their annual base salary by 2011 or, for executive officers subsequently joining Teekay or achieving a position covered by the guidelines, within five years

after the
guidelines
become
applicable to
them.

Table of Contents**Item 7. Major Shareholders Certain Relationships and Related Party Transactions****Major Shareholders**

The following table sets forth information regarding beneficial ownership, as of March 15, 2010, of Teekay's common stock by each person we know to beneficially own more than 5% of the common stock. Information for certain holders is based on their latest filings with the SEC or information delivered to us. The number of shares beneficially owned by each person or entity is determined under SEC rules and the information is not necessarily indicative of beneficial ownership for any other purpose. Under SEC rules a person or entity beneficially owns any shares as to which the person or entity has or shares voting or investment power. In addition, a person or entity beneficially owns any shares that the person or entity has the right to acquire as of May 14, 2010 (60 days after March 15, 2010) through the exercise of any stock option or other right. Unless otherwise indicated, each person or entity has sole voting and investment power (or shares such powers with his or her spouse) with respect to the shares set forth in the following table.

Identity of Person or Group	Shares Owned	Percent of Class (4)
Resolute Investments, Ltd. ⁽¹⁾	30,431,380	41.9%
Iridian Asset Management, LLC ⁽²⁾	5,797,089	8.0%
JPMorgan Chase & Co. ⁽³⁾	5,068,117	6.9%

(1) Includes shared voting and shared dispositive power as to 30,431,380 shares. The ultimate controlling person of Resolute Investments, Ltd. (or *Resolute*) is Path Spirit Limited (or *Path*), which is the trust protector for the trust that indirectly owns all of Resolute's outstanding equity. This information is based on the Schedule 13D/A (Amendment No. 3) filed by Resolute and

Path with the SEC on February 22, 2010. Resolute's beneficial ownership was 42.0% on December 31, 2008, and 41.8% on December 31, 2007. In 2009, there were no changes to the number of shares of our common stock owned by Resolute. One of our directors, Thomas Kuo-Yuen Hsu, is the President and a director of Resolute. Another of our directors, Axel Karlshoej, is among the directors of Path. Please read Item 18 Financial Statements: Note 13 Related Party Transactions.

- (2) Includes shared voting power and shared dispositive power as to 5,797,089 shares. This information is based on the Schedule 13G/A filed by this investor with the SEC on January 28, 2010. Iridian Asset

Management's beneficial ownership was 10.0% on March 15, 2009, and 8.5% on March 15, 2008.

- (3) Includes shared voting power and shared dispositive power as to 5,068,117 shares. This information is based on the Schedule 13G/A filed by this investor with the SEC on January 22, 2010. JPMorgan Chase & Co.'s beneficial ownership was 7.8% on March 15, 2009, and 5.1% on March 15, 2008.

- (4) Based on a total of approximately 72.7 million outstanding shares of our common stock as of March 15, 2010.

Our major shareholders have the same voting rights as our other shareholders. No corporation or foreign government or other natural or legal person owns more than 50% of our outstanding common stock. We are not aware of any arrangements, the operation of which may at a subsequent date result in a change in control of Teekay.

Teekay and certain of its subsidiaries have relationships or are parties to transactions with other Teekay subsidiaries, including Teekay's publicly-traded subsidiaries Teekay LNG, Teekay Offshore and Teekay Tankers. Certain of these relationships and transactions are described below.

Our major shareholder

As of December 31, 2009, Resolute Investments Ltd., (or *Resolute*), owned approximately 42% of our outstanding common stock. The ultimate controlling person of Resolute is Path Spirit Limited (or *Path*), which is the trust protector for the trust that indirectly owns all of Resolute's outstanding equity. One of our directors, Thomas Kuo-Yuen Hsu, is the President and a director of Resolute. Another of our directors, Axel Karlshoej, is among the directors of Path.

Our directors and executive officers

C. Sean Day, the Chairman of Teekay's board of directors, is also the Chairman of Teekay Tankers, Teekay Offshore GP L.L.C. (the general partner of Teekay Offshore) and Teekay GP L.L.C. (the general partner of Teekay LNG). Bjorn Moller, Teekay's Chief Executive Officer and one of its directors, is also the Chief Executive Officer and a director of Teekay Tankers, as well as a director of Teekay Offshore GP L.L.C. and Teekay GP L.L.C. Peter Evensen, Teekay's Executive Vice President and Chief Strategy Officer, is the Executive Vice President and a director of Teekay Tankers and the Chief Executive Officer and Chief Financial Officer and a director of each of Teekay Offshore GP L.L.C. and Teekay GP L.L.C.

Vincent Lok, Teekay's Executive Vice President and Chief Financial Officer, is also the Chief Financial Officer of Teekay Tankers. Because the executive officers of Teekay Tankers and of the general partners of Teekay Offshore and Teekay LNG are employees of Teekay or other of its subsidiaries, their compensation (other than any awards under the respective long-term incentive plans of Teekay Tankers, Teekay Offshore and Teekay LNG) is set and paid by Teekay or such other applicable subsidiaries.

Table of Contents

Pursuant to agreements with Teekay, each of Teekay Tankers, Teekay Offshore and Teekay LNG have agreed to reimburse Teekay or its applicable subsidiaries for time spent by the executive officers on management matters of such public company subsidiaries. For the year ended December 31, 2009, these reimbursement obligations totaled approximately \$1.2 million, \$1.3 million, and \$1.3 million, respectively, for Teekay Tankers, Teekay Offshore and Teekay LNG, and are included in amounts paid as strategic fees under the management agreement for Teekay Tankers and the services agreements for Teekay Offshore and Teekay LNG described below. For 2007 and 2008, these reimbursement obligations for Teekay Tankers, Teekay Offshore and Teekay LNG totaled \$nil (following Teekay Tankers' initial public offering in December 2007) and \$1.2 million, \$0.2 million and \$1.5 million, and \$0.1 million and \$1.5 million, respectively.

Relationships with our public company subsidiaries**Teekay Tankers.**

Teekay Tankers is a NYSE-listed, Marshall Islands corporation, which we formed to acquire from us a fleet of double-hull oil tankers in connection with Teekay Tankers' initial public offering in December 2007. Teekay Tankers' business is to own oil tankers and employ a chartering strategy that seeks to capture upside opportunities in the spot market while using fixed-rate time charters to reduce downside risks. Its operations are managed by our subsidiary, Teekay Tankers Management Services Ltd.

As of December 31, 2009, we owned shares of Teekay Tankers' Class A and Class B common stock that represent an ownership interest of 42.2% and voting power of 51.6% of Teekay Tankers' outstanding common stock.

Teekay Tankers distributes to its stockholders on a quarterly basis all of its Cash Available for Distribution, subject to any reserves the board of directors may from time to time determine are required for the prudent conduct of the business. Cash Available for Distribution represents Teekay Tankers' net income (loss) plus depreciation and amortization, unrealized losses from derivatives, non-cash items and any write-offs or other non-recurring items less unrealized gains from derivatives and net income attributable to the historical results of vessels acquired by it from Teekay, prior to their acquisition by Teekay Tankers, for the period when these vessels were owned and operated by Teekay. Teekay received distributions from Teekay Tankers of \$23.4 million, for the year ended December 31, 2009.

Teekay Offshore and Teekay LNG.

Teekay Offshore is a NYSE-listed, Marshall Islands limited partnership, which we formed to further develop our operations in the offshore market. Teekay Offshore is an international provider of marine transportation and storage services to the offshore oil industry. We own and control Teekay Offshore's general partner, and as of December 31, 2009, we owned a 38.5% limited partner (including common and subordinated units) and a 2% general partner interest in Teekay Offshore. Teekay Offshore owns a majority of its fleet through OPCO, which is owned 51.0% by Teekay Offshore and 49.0% by us.

Teekay LNG is a NYSE-listed, Marshall Islands limited partnership, which we formed to expand our operations in the LNG shipping sector. Teekay LNG is an international provider of marine transportation services for LNG, LPG and crude oil. We own and control Teekay LNG's general partner, and as of December 31, 2009, we owned a 47.2% limited partner (including common and subordinated units) and a 2% general partner interest in Teekay LNG.

Quarterly cash distributions.

We are entitled to distributions on our general and limited partner interests in Teekay Offshore and Teekay LNG, respectively. In general, each of Teekay Offshore and Teekay LNG pays quarterly cash distributions in the following manner:

- first, 98% to the common unitholders, pro rata, and 2% to the general partner, until Teekay Offshore or Teekay LNG, as applicable, distributes for each outstanding common unit an amount equal to the minimum quarterly distribution for that quarter;
- second, 98% to the common unitholders, pro rata, and 2% to the general partner, until Teekay Offshore or Teekay LNG, as applicable, distributes for each outstanding common unit an amount equal to any arrearages in payment of the minimum quarterly distribution on the common units for any prior quarters during the subordination period;
- third, 98% to the subordinated unitholders, pro rata, and 2% to the general partner, until Teekay Offshore or Teekay LNG, as applicable, distributes for each subordinated unit an amount equal to the minimum quarterly

distribution for that quarter; and

thereafter, in the manner described in Incentive distribution rights below.

The minimum quarterly distributions for Teekay Offshore and Teekay LNG are \$0.35 and \$0.4125, respectively. Teekay Offshore and Teekay LNG have been making their respective current quarterly distributions of \$0.45 per unit and \$0.57 per unit since the third quarter of 2008.

As at December 31, 2009, Teekay holds 9.8 million subordinated units of Teekay Offshore and 7.4 million subordinated units of Teekay LNG. At the end of the respective subordination periods for Teekay Offshore and Teekay LNG, the subordinated units will convert into common units on a one-for-one basis and begin participating pro rata with the other common units in distributions of available cash. Generally, the subordination period will extend until the first day of any quarter, beginning after December 31, 2009 (for Teekay Offshore) and March 31, 2010 (for Teekay LNG), that Teekay Offshore or Teekay LNG, as applicable, meet each of the following tests:

distributions of available cash from operating surplus on each of the outstanding common units and subordinated units equaled or exceeded the minimum quarterly distribution for each of the three, consecutive, non-overlapping four-quarter periods immediately preceding that date;

the adjusted operating surplus generated during each of the three consecutive, non-overlapping four quarter periods immediately preceding that date equaled or exceeded the sum of the minimum quarterly distributions on all of the outstanding common units and subordinated units during those periods on a fully diluted basis and the related distribution on the 2% general partner interest during those periods; and

there are no arrearages in payment of the minimum quarterly distribution on the common units.

Table of Contents

On January 1, 2010, the subordination period for Teekay Offshore ended. We anticipate that pending confirmation of results for the quarter ended March 31, 2010, that the subordination period for Teekay LNG will end on April 1, 2010. If all of the subordinated units of Teekay Offshore or Teekay LNG are converted to common units, Teekay Offshore or Teekay LNG, as applicable, would pay distributions in the following manner:

first, 98% to the common unitholders, pro rata, and 2% to the general partner, until Teekay Offshore or thereafter, in the manner described in Incentive distribution rights below.

Incentive distribution rights. The general partner of each of Teekay Offshore and Teekay LNG is also entitled to distributions payable with respect to incentive distribution rights. Incentive distribution rights represent the right to receive an increasing percentage of quarterly distributions of available cash from operating surplus after the minimum quarterly distribution and the target distribution levels have been achieved.

If for any quarter:

Teekay Offshore or Teekay LNG has distributed available cash from operating surplus to the common and subordinated unitholders in an amount equal to the minimum quarterly distribution; and

Teekay Offshore or Teekay LNG has distributed available cash from operating surplus on outstanding common units in an amount necessary to eliminate any cumulative arrearages in payment of the minimum quarterly distribution;

then, Teekay Offshore or Teekay LNG, as applicable, will distribute any additional available cash from operating surplus for that quarter among the unitholders and its general partner in the following manner:

first, 98% to all unitholders, pro rata, and 2% to the general partner, until each unitholder has received a total of \$0.4025 (Teekay Offshore) or \$0.4625 (Teekay LNG) per unit for that quarter;

second, 85% to all unitholders, and 15% to the general partner, until each unitholder has received a total of \$0.4375 (Teekay Offshore) or \$0.5375 (Teekay LNG) per unit for that quarter;

third, 75% to all unitholders, and 25% to the general partner, until each unitholder has received a total of \$0.525 (Teekay Offshore) or \$0.65 (Teekay LNG) per unit for that quarter; and

thereafter, 50% to all unitholders and 50% to the general partner.

Teekay received total distributions, including incentive distributions, from Teekay Offshore of \$17.7 million, \$25.1 million, and \$29.2 million, respectively, with respect 2007, 2008, and 2009.

Teekay received total distributions, including incentive distributions, from Teekay LNG of \$50.9 million, \$61.1 million, and \$64.0 million, respectively, with respect 2007, 2008, and 2009.

Competition with Teekay Tankers, Teekay Offshore and Teekay LNG

Teekay has entered into an omnibus agreement with Teekay LNG, Teekay Offshore and related parties governing, among other things, when Teekay, Teekay LNG, and Teekay Offshore may compete with each other and providing for rights of first offer on the transfer or rechartering of certain LNG carriers, oil tankers, shuttle tankers, FSO units and FPSO units. Subject to applicable exceptions, the omnibus agreement generally provides that (a) neither Teekay nor Teekay LNG will own or operate offshore vessels (i.e. dynamically positioned shuttle tankers, FSOs and FPSOs) that are subject to contracts with a duration of three years or more, excluding extension options, (b) neither Teekay nor Teekay Offshore will own or operate LNG carriers and (c) neither Teekay LNG nor Teekay Offshore will own or operate crude oil tankers.

In addition, Teekay Tankers has agreed that Teekay may pursue business opportunities attractive to both parties and of which either party becomes aware. These business opportunities may include, among other things, opportunities to charter out, charter in or acquire oil tankers or to acquire tanker businesses.

Sales of vessels and project interests by Teekay to Teekay Tankers, Teekay Offshore and Teekay LNG

From time to time Teekay has sold to Teekay Tankers, Teekay Offshore and Teekay LNG vessels or interests in vessel owning subsidiaries or joint ventures. These transactions include those described under Management's discussion and analysis of financial condition and results of operations.

Teekay currently has committed to the following vessel transactions with its public company subsidiaries:

To sell to Teekay LNG a 33% interest in the Angola LNG Project.

To sell to Teekay LNG for a total cost of approximately \$94 million two technically advanced 12,000-cubic meter multi-gas newbuildings capable of carrying LNG, LPG or ethylene. This sale will occur upon delivery and purchase by Teekay of these vessels, which is scheduled for the first half of 2011. Upon delivery, each

vessel will commence service under 15-year fixed-rate charters to I.M. Skaugen ASA.

Table of Contents

To sell to Teekay Offshore existing FPSO units of Teekay Petrojarl that were servicing contracts in excess of three years in length as of July 9, 2008, the date on which Teekay Corporation acquired 100% of Teekay Petrojarl. Teekay Offshore, at its election, may acquire these units at any time until July 9, 2010. The purchase price for any such existing FPSO units would be its fair market value plus any additional tax or other similar costs to Teekay Petrojarl that would be required to transfer the offshore vessels to Teekay Offshore.

To offer to Teekay Tankers a Suezmax tanker prior to June 18, 2010 at fair market value. Teekay Tankers used the net proceeds from its follow-on public offering in April 2010 to acquire from Teekay this additional Suezmax tanker, the *Yamuna Spirit*, in addition to two other vessels: a Suezmax tanker, the *Kaveri Spirit*, and an Aframax tanker, the *Helga Spirit* for the aggregate purchase price of approximately \$168.7 million. As part of the purchase price for these vessels, Teekay Tankers issued to Teekay 2.6 million of unregistered common shares valued on a per-share basis at the public offering price of \$12.25. Please read Item 5 Operating and Financial Review and Prospects Public Offerings by and Sale of Vessels to Teekay Tankers Ltd.

Time chartering and bareboat chartering arrangements

Teekay charters in from or out to its public company subsidiaries certain vessels, including the following charter arrangements:

Nine of OPCO's conventional tankers are chartered out to Teekay subsidiaries under long-term time charters. Two of OPCO's shuttle tankers are chartered out to Teekay subsidiaries under long-term bareboat charters. Pursuant to these charter contracts, OPCO earned voyage revenues of \$142.6 million, \$159.3 million, and \$127.1 million, respectively, for 2007, 2008, and 2009.

From December 2008 to June 2009, OPCO entered into a bareboat charter contract to in-charter one shuttle tanker from a subsidiary Teekay. Pursuant to the charter contract, OPCO incurred time-charter hire expenses of \$0.2 million and \$3.4 million for the years ended December 31, 2008 and 2009, respectively.

During 2008, two of OPCO's shuttle tankers were employed on single-voyage charters with a subsidiary of Teekay. Pursuant to these charter contracts, OPCO earned voyage revenues of \$11.3 million for the year ended December 31, 2008.

From August 2008, Teekay has been chartering in from Teekay Tankers the tanker *Nassau Spirit* under a fixed-rate time charter currently scheduled to expire in August 2010. During 2008 and 2009, Teekay Tankers earned revenues of \$4.9 million and \$13.4 million, respectively, under this time-charter contract.

Services, management and pooling arrangements

Services agreements. In connection with their initial public offerings in May 2005 and December 2006, respectively, and subsequent thereto, Teekay LNG and Teekay Offshore and certain of their subsidiaries have entered into services agreements with certain other subsidiaries of Teekay, pursuant to which the other Teekay subsidiaries provide to Teekay LNG, Teekay Offshore and their subsidiaries administrative, advisory and technical and ship management services. These services are provided in a commercially reasonable manner and upon the reasonable request of the general partner or subsidiaries of Teekay LNG or Teekay Offshore, as applicable. The other Teekay subsidiaries that are parties to the services agreements provide these services directly or subcontract for certain of these services with other entities, including other Teekay subsidiaries. Teekay LNG and Teekay Offshore pay arm's-length fees for the services that include reimbursement of the reasonable cost of any direct and indirect expenses the other Teekay subsidiaries incur in providing these services. During 2007, 2008 and 2009, Teekay LNG and Teekay Offshore incurred \$18.2 million, \$29.5 million, and \$35.1 million, and \$53.0 million, \$50.3 million, and \$39.7 million, respectively, for these services.

Management agreement. In connection with its initial public offering, Teekay Tankers entered into the long-term management agreement with Teekay Tankers Management Services Ltd., a subsidiary of Teekay (the Manager). Subject to certain limited termination rights, the initial term of the management agreement will expire on December 31, 2022. If not terminated, the agreement will automatically renew for five-year periods. Termination fees are required for early termination by Teekay Tankers under certain circumstances. Pursuant to the management agreement, the Manager provides to Teekay Tankers the following types of services: commercial (primarily vessel chartering), technical (primarily vessel maintenance and crewing), administrative (primarily accounting, legal and

financial) and strategic (primarily advising on acquisitions, strategic planning and general management of the business). The Manager has agreed to use its best efforts to provide these services upon Teekay Tankers' request in a commercially reasonable manner and may provide these services directly to Teekay Tankers or subcontract for certain of these services with other entities, primarily other Teekay subsidiaries.

In return for services under the management agreement, Teekay Tankers pays the Manager an agreed-upon fee for commercial services (other than for Teekay Tankers vessels participating in pooling arrangements), a technical services fee equal to the average rate Teekay charges third parties to technically manage their vessels of a similar size, and fees for administrative and strategic services that reimburse the Manager for its related direct and indirect expenses in providing such services and which includes a profit margin. During 2007, 2008, and 2009, Teekay Tankers incurred \$nil (following its initial public offering in December 2007), \$6.6 million, and \$5.6 million, respectively, for these services.

The management agreement also provides for the payment of a performance fee in order to provide the Manager an incentive to increase cash available for distribution to Teekay Tankers' stockholders. During 2007, 2008, and 2009, Teekay Tankers incurred \$nil (following its initial public offering in December 2007), \$1.2 million, and \$nil, respectively, for performance fees.

Pooling arrangements. Certain Aframax and Suezmax tankers of Teekay Tankers participate in vessel pooling arrangements managed by other Teekay subsidiaries. The pool managers provide commercial services to the pool participants and administer the pools in exchange for a fee currently equal to 1.25% of the gross revenues attributable to each pool participant's vessels and a fixed amount per vessel per day which ranges from \$275 (for the Suezmax tanker pool) to \$350 (for the Aframax tanker pool). Voyage revenues and voyage expenses of Teekay Tankers' vessels operating in these pool arrangements are pooled with the voyage revenues and voyage expenses of other pool participants. The resulting net pool revenues, calculated on a time charter equivalent basis, are allocated to the pool participants according to an agreed formula. Teekay Tankers incurred pool management fees during 2007, 2008, 2009, of \$0.1 million (following its initial public offering in December 2007), \$2.2 million and \$1.5 million, respectively.

Please read Item 18 below.

Legal Proceedings

From time to time we have been, and we expect to continue to be, subject to legal proceedings and claims in the ordinary course of our business, principally personal injury and property casualty claims. Such claims, even if lacking merit, could result in the expenditure of significant financial and managerial resources. We are not aware of any legal proceedings or claims that we believe will have, individually or in the aggregate, a material adverse effect on our financial condition or results of operations.

Dividend Policy

Commencing with the quarter ended September 30, 1995, we declared and paid quarterly cash dividends in the amount of \$0.1075 per share on our common stock. We increased our quarterly dividend from \$0.1375 to \$0.2075 per share in the fourth quarter of 2005, from \$0.2075 to \$0.2375 in the fourth quarter of 2006, from \$0.2375 to \$0.275 in the fourth quarter of 2007, and from \$0.275 to \$0.31625 in the fourth quarter of 2008. Subject to financial results and declaration by the Board of Directors, we currently intend to continue to declare and pay a regular quarterly dividend in such amount per share on our common stock. Pursuant to our dividend reinvestment program, holders of common stock are permitted to choose, in lieu of receiving cash dividends, to reinvest any dividends in additional shares of common stock at then-prevailing market prices, but without brokerage commissions or service charges. All per-share data give effect to this stock split retroactively.

The timing and amount of dividends, if any, will depend, among other things, on our results of operations, financial condition, cash requirements, restrictions in financing agreements and other factors deemed relevant by our Board of Directors. Because we are a holding company with no material assets other than the stock of our subsidiaries, our ability to pay dividends on the common stock depends on the earnings and cash flow of our subsidiaries.

Significant Changes

Please read Item 18 Financial Statements: Note 24 Subsequent Events.

Item 9. The Offer and Listing

Our common stock is traded on the NYSE under the symbol TK. The following table sets forth the high and low sales prices for our common stock on the NYSE for each of the periods indicated.

Years Ended	Dec. 31, 2009	Dec. 31, 2008	Dec. 31, 2007	Dec. 31, 2006	Dec. 31, 2005			
High	\$ 26.50	\$ 54.71	\$ 63.69	\$ 46.50	\$ 50.85			
Low	11.35	10.95	42.20	35.16	36.50			
Quarters Ended	Mar. 31, 2010	Dec. 31, 2009	Sept. 30, 2009	June 30, 2009	Mar. 31, 2009	Dec. 31, 2008	Sept. 30, 2008	June 30, 2008

Item 10. Additional Information**Memorandum and Articles of Association**

Our Amended and Restated Articles of Incorporation, as amended, have been filed as exhibits 1.1 and 1.2 to our Annual Report on Form 20-F (File No. 1-12874), filed with the SEC on April 7, 2009, and are hereby incorporated by reference into this Annual Report. Our Bylaws have previously been filed as exhibit 2.3 to our Annual Report on Form 20-F (File No. 1-12874), filed with the SEC on March 30, 2000, and are hereby incorporated by reference into this Annual Report.

The rights, preferences and restrictions attaching to each class of our capital stock are described in the section entitled Description of Capital Stock of our Rule 424(b) prospectus (Registration No. 333-52513), filed with the SEC on June 10, 1998, and hereby incorporated by reference into this Annual Report, provided that since the date of such prospectus (1) the par value of our capital stock has been changed to \$0.001 per share, (2) our authorized capital stock has been increased to 725,000,000 shares of common stock and 25,000,000 shares of Preferred Stock, (3) we have been domesticated in the Republic of The Marshall Islands and (4) we have adopted a staggered Board of Directors, with directors serving three-year terms.

Table of Contents

The necessary actions required to change the rights of holders of our capital stock and the conditions governing the manner in which annual and special meetings of shareholders are convened are described in our Bylaws filed as exhibit 2.3 to our Annual Report on Form 20-F (File No. 1-12874), filed with the SEC on March 30, 2000, and hereby incorporated by reference into this Annual Report.

We have in place a rights agreement that would have the effect of delaying, deferring or preventing a change in control of Teekay. The rights agreement has been filed as part of our Form 8-A (File No. 1-12874), filed with the SEC on September 11, 2000, and hereby incorporated by reference into this Annual Report.

There are no limitations on the rights to own securities, including the rights of non-resident or foreign shareholders to hold or exercise voting rights on the securities imposed by the laws of the Republic of The Marshall Islands or by our Articles of Incorporation or Bylaws.

Material Contracts

The following is a summary of each material contract, other than material contracts entered into in the ordinary course of business, to which we or any of our subsidiaries, other than our publicly-listed subsidiaries, is a party, for the two years immediately preceding the date of this Annual Report:

- (a) Indenture dated June 22, 2001 among Teekay Corporation and The Bank of New York Trust Company of Florida (formerly U.S. Trust Company of Texas, N.A.) for U.S. \$250,000,000 8.875% Senior Notes due 2011.
- (b) First Supplemental Indenture dated as of December 6, 2001, among Teekay Corporation and The Bank of New York Trust Company of Florida, N.A. for U.S. \$100,000,000 8.875% Senior Notes due 2011.
- (c) Agreement, dated June 26, 2003, for a U.S. \$550,000,000 Secured Reducing Revolving Loan Facility among Norsk Teekay Holdings Ltd., Den Norske Bank ASA and various other banks.
- (d) Agreement, dated September 1, 2004 for a U.S. \$500,000,000 Credit Facility Agreement to be made available to Teekay Nordic Holdings Incorporated by Nordea Bank Finland PLC, New York Branch.
- (e) Supplemental Agreement dated September 30, 2004 to Agreement, dated June 26, 2003, for a U.S. \$550,000,000 Secured Reducing Revolving Loan Facility among Norsk Teekay Holdings Ltd., Den Norske Bank ASA and various other banks.
- (f) Agreement, dated May 26, 2005 for a U.S. \$550,000,000 Credit Facility Agreement to be made available to Avalon Spirit LLC et al by Nordea Bank Finland PLC and others.
- (g) Agreement, dated October 2, 2006 for a U.S. \$940,000,000 Secured Reducing Revolving Loan Facility among Teekay Offshore Operating L.P., Den Norske Bank ASA and various other banks. Please read Note 8 to the Consolidated Financial Statements of Teekay Corporation included herein for a summary of certain contract terms relating to our revolving loan facilities.
- (h) Agreement, dated August 23, 2006 for a U.S. \$330,000,000 Secured Reducing Revolving Loan Facility among Teekay LNG Partners L.P., ING Bank N.V. and various other banks. Please read Note 8 to the Consolidated Financial Statements of Teekay Corporation included herein for a summary of certain contract terms relating to our revolving loan facilities.
- (i) Agreement, dated November 28, 2007 for a U.S. \$845,000,000 Secured Reducing Revolving Loan Facility among Teekay Corporation, Teekay Tankers Ltd., Nordea Bank Finland PLC and various other banks. Please read Note 8 to the Consolidated Financial Statements of Teekay Corporation included herein for a summary of certain contract terms relating to our revolving loan facilities.

(j)

Agreement dated May 16, 2007 for a U.S. \$700,000,000 Credit Facility Agreement to be made available to Teekay Acquisition Holdings LLC et al by HSH NordBank AG and others.

- (k) Annual Executive Bonus Plan.
- (l) Vision Incentive Plan.
- (m) 2003 Equity Incentive Plan.
- (n) Amended 1995 Stock Option Plan.
- (o) Rights Agreement, dated as of September 8, 2000, between Teekay Corporation and The Bank of New York, as Rights Agent.
- (p) Amended and Restated Omnibus Agreement dated as of December 19, 2006, among Teekay Corporation, Teekay GP L.L.C., Teekay LNG Partners L.P., Teekay LNG Operating L.L.C., Teekay Offshore GP L.L.C., Teekay Offshore Partners L.P., Teekay Offshore Operating GP. L.L.C. and Teekay Offshore Operating L.P. govern, among other things, when Teekay Corporation, Teekay LNG L.P. and Teekay Offshore L.P. may compete with each other and to provide the applicable parties certain rights of first offer on LNG carriers, oil tankers, shuttle tankers, FSO units and FPSO units.
- (q) Indenture dated January 27, 2010 among Teekay Corporation and The Bank of New York Mellon Trust Company, N.A. for U.S. \$450,000,000 8.5% Senior Unsecured Notes due 2020.

Exchange Controls and Other Limitations Affecting Security Holders

We are not aware of any governmental laws, decrees or regulations, including foreign exchange controls, in the Republic of The Marshall Islands that restrict the export or import of capital or that affect the remittance of dividends, interest or other payments to non-resident holders of our securities.

We are not aware of any limitations on the right of non-resident or foreign owners to hold or vote our securities imposed by the laws of the Republic of The Marshall Islands or our Articles of Incorporation and Bylaws.

Table of Contents**Taxation**

Teekay Corporation was incorporated in the Republic of Liberia on February 9, 1979 and was domesticated in the Republic of The Marshall Islands on December 20, 1999. Its principal executive headquarters are located in Bermuda. The following provides information regarding taxes to which a U.S. Holder of our common stock may be subject.

Material U.S. Federal Income Tax Considerations

The following discussion summarizes certain material U.S. federal income tax considerations that may be relevant to stockholders. This discussion is based upon the provisions of the Internal Revenue Code of 1986, as amended (or the *Code*), applicable U.S. Treasury Regulations promulgated thereunder, judicial authority and administrative interpretations, as of the date of this Annual Report, all of which are subject to change, possibly with retroactive effect, or are subject to different interpretations.

This discussion is limited to stockholders who hold their stock as a capital asset for tax purposes. This discussion does not address all tax considerations that may be important to a particular stockholder in light of the stockholder's circumstances, or to certain categories of investors that may be subject to special rules, such as:

- dealers in securities or currencies,
- traders in securities that have elected the mark-to-market method of accounting for their securities,
- persons whose functional currency is not the U.S. dollar,
- persons holding our common stock as part of a hedge, straddle, conversion or other synthetic security or integrated transaction,
- certain U.S. expatriates,
- financial institutions,
- insurance companies,
- persons subject to the alternative minimum tax,
- persons that actually or under applicable constructive ownership rules own 10% or more of our common stock; and
- entities that are tax-exempt for U.S. federal income tax purposes.

If a partnership (including an entity treated as a partnership for U.S. federal income tax purposes) holds our common stock, the tax treatment of a partner generally will depend upon the status of the partner and the activities of the partnership. If you are a partner of a partnership holding our common stock, you should consult your own tax advisor about the U.S. federal income tax consequences of owning and disposing of the common stock.

This discussion does not address the tax considerations arising under the laws of any state, local or other jurisdiction. Each stockholder is urged to consult its own tax advisor regarding the U.S. federal, state, local and other tax consequences of the ownership or disposition of our common stock.

United States Federal Income Taxation of U.S. Holders

As used herein, the term *U.S. Holder* means a beneficial owner of our common stock that is a U.S. citizen or U.S. resident alien, a corporation or other entity taxable as a corporation for U.S. federal income tax purposes, that was created or organized in or under the laws of the United States, any state thereof or the District of Columbia, an estate whose income is subject to U.S. federal income taxation regardless of its source, or a trust that either is subject to the supervision of a court within the United States and has one or more U.S. persons with authority to control all of its substantial decisions or has a valid election in effect under applicable U.S. Treasury Regulations to be treated as a United States person.

Distributions

Subject to the discussion of passive foreign investment companies (or *PFICs*) below, any distributions made by us with respect to our common stock to a U.S. Holder generally will constitute dividends, which may be taxable as ordinary income or qualified dividend income as described in more detail below, to the extent of our current or accumulated earnings and profits, as determined under U.S. federal income tax principles. Distributions in excess of our earnings and profits will be treated first as a nontaxable return of capital to the extent of the U.S. Holder's tax basis in its common stock and thereafter as capital gain. U.S. Holders that are corporations for U.S. federal income tax purposes generally will not be entitled to claim a dividends received deduction with respect to any distributions they receive from us. Dividends paid with respect to our common stock generally will be treated as passive category

income or, in the case of certain types of U.S. Holders, general category income for purposes of computing allowable foreign tax credits for U.S. federal income tax purposes.

Dividends paid on our common stock to a U.S. Holder who is an individual, trust or estate (or a *U.S. Individual Holder*) will be treated as qualified dividend income that currently is taxable to such U.S. Individual Holder at preferential capital gain tax rates provided that: (i) our common stock is readily tradable on an established securities market in the United States (such as the New York Stock Exchange on which our common stock is traded); (ii) we are not a PFIC for the taxable year during which the dividend is paid or the immediately preceding taxable year (we intend to take the position that we are not now and have never been a PFIC, as discussed below); (iii) the U.S. Individual Holder has owned the common stock for more than 60 days in the 121-day period beginning 60 days before the date on which the common stock become ex-dividend; (iv) the U.S. Individual Holder is not under an obligation to make related payments with respect to positions in substantially similar or related property; and (v) certain other conditions are met. There is no assurance that any dividends paid on our common stock will be eligible for these preferential rates in the hands of a U.S. Individual Holder. Any dividends paid on our common stock not eligible for these preferential rates will be taxed as ordinary income to a U.S. Individual Holder. In the absence of legislation extending the term of the preferential tax rates for qualified dividend income, all dividends received by a taxpayer in tax years beginning after December 31, 2010 will be taxed at ordinary graduated tax rates.

Special rules may apply to any extraordinary dividend paid by us. An extraordinary dividend generally is a dividend with respect to a share of stock if the amount of the dividend is equal to or in excess of 10.0 percent of a stockholder's adjusted basis (or fair market value in certain circumstances) in such stock. If we pay an extraordinary dividend on our common stock that is treated as qualified dividend income, then any loss derived by a U.S. Individual Holder from the sale or exchange of such common stock will be treated as long-term capital loss to the extent of such dividend.

Table of Contents

Newly enacted legislation requires certain U.S. holders who are individuals, estates or trusts to pay a 3.8 percent tax on, among other things, dividends for taxable years beginning after December 31, 2012. U.S. holders should consult their tax advisors regarding the effect, if any, of this legislation on their ownership of our common stock.

Consequences of Possible PFIC Classification

A non-U.S. entity treated as a corporation for U.S. federal income tax purposes will be a PFIC in any taxable year in which, after taking into account the income and assets of the corporation and certain subsidiaries pursuant to a look through rule, either: (i) at least 75.0 percent of its gross income is passive income; or (ii) at least 50.0 percent of the average value of its assets is attributable to assets that produce passive income or are held for the production of passive income. For purposes of these tests, passive income includes dividends, interest, and gains from the sale or exchange of investment property and rents and royalties, other than rents and royalties that are received from unrelated parties in connection with the active conduct of a trade or business. For purposes of these tests, income derived from the performance of services does not constitute passive income.

There are legal uncertainties involved in determining whether the income derived from our time chartering activities constitutes rental income or income derived from the performance of services, including the decision in *Tidewater Inc. v. United States*, 565 F.3d 299 (5th Cir. 2009), which held that income derived from certain time-chartering activities should be treated as rental income rather than services income for purposes of a foreign sales corporation provision of the Code, and a recent unofficial IRS pronouncement issued to provide guidance to IRS field employees and examiners, which cites the *Tidewater* decision favorably in support of the conclusion that income derived by foreign taxpayers from time-chartering vessels engaged in the exploration for, or exploitation of, natural resources on the Outer Continental Shelf in the Gulf of Mexico is characterized as leasing or rental income for purposes of the income-sourcing provisions of the Code. However, we believe that the nature of our and our subsidiaries time chartering activities, as well as our and our subsidiaries time charter contracts, differ in certain material respects from those at issue in *Tidewater*. Consequently, based on our and our subsidiaries assets and operations, we intend to take the position that we are not now and have never been a PFIC. No assurance can be given, however, that the IRS, or a court of law, will accept our position or that we would not constitute a PFIC for any future taxable year if there were to be changes in our or our subsidiaries assets, income or operations.

Current law provides that dividends received by a U.S. Individual Holder from a qualified foreign corporation are subject to U.S. federal income tax at preferential rates through 2010. However, if we are classified as a PFIC for a taxable year in which we pay a dividend or the immediately preceding taxable year, we would not be considered a qualified foreign corporation, and a U.S. Individual Holder receiving such dividends would not be eligible for the reduced rate of U.S. federal income tax.

Additionally, as discussed more fully below, if we were to be treated as a PFIC for any taxable year, a U.S. Holder would be subject to different taxation rules depending on whether the U.S. Holder makes a timely and effective election to treat us as a Qualified Electing Fund (a *QEF election*). As an alternative to making a QEF election, a U.S. Holder should be able to make a mark-to-market election with respect to our common stock, as discussed below. In addition, U.S. Holders of PFICs may be subject to additional reporting requirements.

Taxation of U.S. Holders Making a Timely QEF Election. If a U.S. Holder makes a timely QEF election (an *Electing Holder*), the Electing Holder must report each year for U.S. federal income tax purposes the Electing Holder's pro rata share of our ordinary earnings and net capital gain, if any, for our taxable years that end with or within the Electing Holder's taxable year, regardless of whether or not the Electing Holder received distributions from us in that year. Such income inclusions would not be eligible for the preferential tax rates applicable to qualified dividend income. The Electing Holder's adjusted tax basis in the common stock will be increased to reflect taxed but undistributed earnings and profits. Distributions of earnings and profits that were previously taxed will result in a corresponding reduction in the Electing Holder's adjusted tax basis in common stock and will not be taxed again once distributed. An Electing Holder generally will recognize capital gain or loss on the sale, exchange or other disposition of our common stock. A U.S. Holder makes a QEF election with respect to any year that we are a PFIC by filing IRS Form 8621 with the holder's timely filed U.S. federal income tax return (including extensions).

If a U.S. Holder has not made a timely QEF election with respect to the first year in the holder's holding period of our common stock during which we qualified as a PFIC, the holder may be treated as having made a timely QEF election

by filing a QEF election with the holder's timely filed U.S. federal income tax return (including extensions) and, under the rules of Section 1291 of the Code, a deemed sale election to include in income as an excess distribution (described below) the amount of any gain that the holder would otherwise recognize if the holder sold the holder's common stock on the qualification date. The qualification date is the first day of our taxable year in which we qualified as a qualified electing fund with respect to such U.S. Holder. In addition to the above rules, under very limited circumstances, a U.S. Holder may make a retroactive QEF election if the holder failed to file the QEF election documents in a timely manner. If a U.S. Holder makes a timely QEF election for one of our taxable years, but did not make such election with respect to the first year in the holder's holding period of our common stock during which we qualified as a PFIC and the holder did not make the deemed sale election described above, the holder will also be subject to the more adverse rules described below.

A U.S. Holder's QEF election will not be effective unless we annually provide the holder with certain information concerning our income and gain, calculated in accordance with the Code, to be included with the holder's U.S. federal income tax return. We have not provided our U.S. Holders with such information in prior taxable years and do not intend to provide such information in the current taxable year. Accordingly, you will not be able to make an effective QEF election at this time. If, contrary to our expectations, we determine that we are or will be a PFIC for any taxable year, we will provide U.S. Holders with the information necessary to make an effective QEF election with respect to our common stock.

Table of Contents

Taxation of U.S. Holders Making a Mark-to-Market Election. If we were to be treated as a PFIC for any taxable year and, as we anticipate, our stock were treated as marketable stock, then, as an alternative to making a QEF election, a U.S. Holder would be allowed to make a mark-to-market election with respect to our common stock, provided the U.S. Holder completes and files IRS Form 8621 in accordance with the relevant instructions and related Treasury Regulations. If that election is made for the first year a U.S. Holder holds or is deemed to hold our common stock and for which we are a PFIC, the U.S. Holder generally would include as ordinary income in each taxable year that we are a PFIC the excess, if any, of the fair market value of the U.S. Holder's common stock at the end of the taxable year over the holder's adjusted tax basis in the common stock. The U.S. Holder also would be permitted an ordinary loss in respect of the excess, if any, of the U.S. Holder's adjusted tax basis in the common stock over the fair market value thereof at the end of the taxable year that we are a PFIC, but only to the extent of the net amount previously included in income as a result of the mark-to-market election. A U.S. Holder's tax basis in the holder's common stock would be adjusted to reflect any such income or loss recognized. Gain recognized on the sale, exchange or other disposition of our common stock in taxable years that we are a PFIC would be treated as ordinary income, and any loss recognized on the sale, exchange or other disposition of the common stock in taxable years that we are a PFIC would be treated as ordinary loss to the extent that such loss does not exceed the net mark-to-market gains previously included in income by the U.S. Holder. Because the mark-to-market election only applies to marketable stock, however, it would not apply to a U.S. Holder's indirect interest in any of our subsidiaries that were also determined to be PFICs.

If a U.S. Holder makes a mark-to-market election for one of our taxable years and we were a PFIC for a prior taxable year during which such holder held our common stock and for which (i) we were not a QEF with respect to such holder and (ii) such holder did not make a timely mark-to-market election, such holder would also be subject to the more adverse rules described below in the first taxable year for which the mark-to-market election is in effect and also to the extent the fair market value of the U.S. Holder's common stock exceeds the holder's adjusted tax basis in the common stock at the end of the first taxable year for which the mark-to-market election is in effect.

Taxation of U.S. Holders Not Making a Timely QEF or Mark-to-Market Election. If we were to be treated as a PFIC for any taxable year, a U.S. Holder who does not make either a QEF election or a mark-to-market election for that year (a *Non-Electing Holder*) would be subject to special rules resulting in increased tax liability with respect to (i) any excess distribution (*i.e.*, the portion of any distributions received by the Non-Electing Holder on our common stock in a taxable year in excess of 125.0 percent of the average annual distributions received by the Non-Electing Holder in the three preceding taxable years, or, if shorter, the Non-Electing Holder's holding period for the common stock), and (ii) any gain realized on the sale, exchange or other disposition of the stock. Under these special rules:

the excess distribution or gain would be allocated ratably over the Non-Electing Holder's aggregate holding period for the common stock;

the amount allocated to the current taxable year and any taxable year prior to the taxable year we were first treated as a PFIC with respect to the Non-Electing Holder would be taxed as ordinary income in the current taxable year;

the amount allocated to each of the other taxable years would be subject to U.S. federal income tax at the highest rate of tax in effect for the applicable class of taxpayers for that year; and an interest charge for the deemed deferral benefit would be imposed with respect to the resulting tax attributable to each such other taxable year.

If we were treated as a PFIC for any taxable year and a Non-Electing Holder who is an individual dies while owning our common stock, such holder's successor generally would not receive a step-up in tax basis with respect to such stock.

U.S. Holders are urged to consult their own tax advisors regarding the applicability, availability and advisability of, and procedure for, making QEF, Mark-to-Market Elections and other available elections with respect to us and our subsidiaries, and the U.S. federal income tax consequences of making such elections.

Sale, Exchange or other Disposition of Common Stock

Assuming we do not constitute a PFIC for any taxable year, a U.S. Holder generally will recognize taxable gain or loss upon a sale, exchange or other disposition of our common stock in an amount equal to the difference between the amount realized by the U.S. Holder from such sale, exchange or other disposition and the U.S. Holder's tax basis in

such stock. Subject to the discussion of extraordinary dividends above, such gain or loss will be treated as long-term capital gain or loss if the U.S. Holder's holding period is greater than one year at the time of the sale, exchange or other disposition, and subject to preferential capital gain tax rates. Such capital gain or loss generally will be treated as U.S.-source gain or loss, as applicable, for U.S. foreign tax credit purposes. A U.S. Holder's ability to deduct capital losses is subject to certain limitations.

Newly enacted legislation requires certain U.S. holders who are individuals, estates or trusts to pay a 3.8 percent tax on, among other things, capital gains from the sale or other disposition of stock for taxable years beginning after December 31, 2012. U.S. holders should consult their tax advisors regarding the effect, if any, of this legislation on their disposition of our common stock.

United States Federal Income Taxation of Non-U.S. Holders

A beneficial owner of our common stock (other than a partnership, including any entity or arrangement treated as a partnership for U.S. federal income tax purposes) that is not a U.S. Holder is a *Non-U.S. Holder*.

Distributions

Distributions we make to a Non-U.S. Holder will not be subject to U.S. federal income tax or withholding tax if the Non-U.S. Holder is not engaged in a U.S. trade or business. If the Non-U.S. Holder is engaged in a U.S. trade or business, distributions we make will be subject to U.S. federal income tax to the extent those distributions constitute income effectively connected with that Non-U.S. Holder's U.S. trade or business. However, distributions made to a Non-U.S. Holder that is engaged in a trade or business may be exempt from taxation under an income tax treaty if the income represented thereby is not attributable to a U.S. permanent establishment maintained by the Non-U.S. Holder.

Sale, Exchange or other Disposition of Common Stock

The U.S. federal income taxation of Non-U.S. Holders on any gain resulting from the disposition of our common stock generally is the same as described above regarding distributions. However, an individual Non-U.S. Holder may be subject to tax on gain resulting from the disposition of our common stock if the holder is present in the United States for 183 days or more during the taxable year in which such disposition occurs and meet certain other requirements.

Table of Contents***Backup Withholding and Information Reporting***

In general, payments of distributions or the proceeds of a disposition of common stock to a non-corporate U.S. Holder will be subject to information reporting requirements. These payments to a non-corporate U.S. Holder also may be subject to backup withholding if the non-corporate U.S. Holder:

- fails to timely provide an accurate taxpayer identification number;
- is notified by the IRS that it has failed to report all interest or distributions required to be shown on its U.S. federal income tax returns; or
- in certain circumstances, fails to comply with applicable certification requirements.

Non-U.S. Holders may be required to establish their exemption from information reporting and backup withholding on payments within the United States by certifying their status on IRS Form W-8BEN, W-8ECI or W-8IMY, as applicable.

Backup withholding is not an additional tax. Rather, a stockholder generally may obtain a credit for any amount withheld against its liability for U.S. federal income tax (and a refund of any amounts withheld in excess of such liability) by accurately completing and timely filing a return with the IRS.

Non-United States Tax Consequences

Marshall Islands Tax Consequences. Because Teekay and our subsidiaries do not, and do not expect that we or they will, conduct business or operations in the Republic of The Marshall Islands, and because all documentation related to issuances of shares of our common stock was executed outside of the Republic of The Marshall Islands, under current Marshall Islands law, no taxes or withholdings will be imposed by the Republic of The Marshall Islands on distributions made to holders of shares of our common stock, so long as such persons do not reside in, maintain offices in, or engage in business in the Republic of The Marshall Islands. Furthermore, no stamp, capital gains or other taxes will be imposed by the Republic of The Marshall Islands on the purchase, ownership or disposition by such persons of shares of our common stock.

Bermudian Tax Consequences. Under current Bermudian law, no taxes or withholdings will be imposed by Bermuda on distributions made in respect of the shares of our common stock, and no stamp, capital gains or other taxes will be imposed by Bermuda on the ownership or disposition of the shares of our common stock, as there are no personal income or corporation taxes, capital gains taxes or death duties in Bermuda.

Documents on Display

Documents concerning us that are referred to herein may be inspected at our principal executive headquarters at 4th Floor, Belvedere Building, 69 Pitts Bay Road, Hamilton, HM 08, Bermuda. Those documents electronically filed via the Electronic Data Gathering, Analysis, and Retrieval (or *EDGAR*) system may also be obtained from the SEC's website at www.sec.gov, free of charge, or from the Public Reference Section of the SEC at 100F Street, NE, Washington, D.C. 20549, at prescribed rates. Further information on the operation of the SEC public reference rooms may be obtained by calling the SEC at 1-800-SEC-0330.

Item 11. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to market risk from foreign currency fluctuations and changes in interest rates, bunker fuel prices and spot tanker market rates for vessels. We use foreign currency forward contracts, interest rate swaps, bunker fuel swap contracts and forward freight agreements to manage currency, interest rate, bunker fuel price and spot tanker market rate risks but do not use these financial instruments for trading or speculative purposes, except as noted below under Spot Tanker Market Rate Risk. Please read Item 18 Financial Statements: Note 15 Derivative Instruments and Hedging Activities.

Foreign Currency Fluctuation Risk

Our primary economic environment is the international shipping market. This market utilizes the U.S. Dollar as its functional currency. Consequently, a substantial majority of our revenues and most of our operating costs are in U.S. Dollars. We incur certain voyage expenses, vessel operating expenses, drydocking and overhead costs in foreign currencies, the most significant of which are the Singapore Dollar, Canadian Dollar, Australian Dollar, Australian Dollar, British Pound, Euro and Norwegian Kroner.

We reduce our exposure by entering into foreign currency forward contracts. In most cases we hedge a substantial majority of our net foreign currency exposure for the following 12 months. We generally do not hedge our net foreign

currency exposure beyond 3 years forward.

As at December 31, 2009, we had the following foreign currency forward contracts:

	Expected Maturity Date			Total Fair value ⁽¹⁾ Asset (Liability)
	2010 Contract	2011 Contract	Total Contract	
	Amount ⁽¹⁾	Amount ⁽¹⁾	Amount ⁽¹⁾	
Norwegian Kroner:	\$ 158.3	\$ 43.3	\$ 201.6	\$ 9.7
Average contractual exchange rate ⁽²⁾	6.17	5.96	6.13	
Euro:	\$ 61.7	\$ 11.0	\$ 72.7	\$ (0.7)
Average contractual exchange rate ⁽²⁾	0.69	0.69	0.69	
Canadian Dollar:	\$ 45.3	\$ 3.9	\$ 49.2	\$ 2.0
Average contractual exchange rate ⁽²⁾	1.10	1.07	1.10	
British Pounds:	\$ 45.8	\$ 7.4	\$ 53.2	\$ (0.5)
Average contractual exchange rate ⁽²⁾	0.61	0.62	0.61	

(1) Contract amounts and fair value amounts in millions of U.S. Dollars.

(2) Average contractual exchange rate represents the contractual amount of foreign currency one U.S. Dollar will buy.

Table of Contents

Although the majority of our transactions, assets and liabilities are denominated in U.S. Dollars, certain of our subsidiaries have foreign currency-denominated liabilities. There is a risk that currency fluctuations will have a negative effect on the value of our cash flows. We have not entered into any forward contracts to protect against the translation risk of our foreign currency-denominated liabilities. As at December 31, 2009, we had Euro-denominated term loans of 288.0 million Euros (\$412.4 million) included in long-term debt and Norwegian Kroner-denominated deferred income taxes of approximately 80.5 million (\$13.9 million). We receive Euro-denominated revenue from certain of our time-charters. These Euro cash receipts generally are sufficient to pay the principal and interest payments on our Euro-denominated term loans. Consequently, we have not entered into any foreign currency forward contracts with respect to our Euro-denominated term loans, although there is no assurance that our exposure to fluctuations in the Euro will not increase in the future.

Interest Rate Risk

We are exposed to the impact of interest rate changes primarily through our borrowings that require us to make interest payments based on LIBOR or EURIBOR. Significant increases in interest rates could adversely affect our operating margins, results of operations and our ability to repay our debt. We use interest rate swaps to reduce our exposure to market risk from changes in interest rates. Generally our approach is to hedge a substantial majority of floating-rate debt associated with our vessels that are operating on long-term fixed-rate contracts. We manage the rest of our debt based on our outlook for interest rates and other factors.

In order to minimize counterparty risk, we only enter into derivative transactions with counterparties that are rated A- or better by Standard & Poor's or A3 by Moody's at the time of the transactions. In addition, to the extent possible and practical, interest rate swaps are entered into with different counterparties to reduce concentration risk.

The table below provides information about our financial instruments at December 31, 2009, which are sensitive to changes in interest rates, including our debt and capital lease obligations and interest rate swaps. For long-term debt and capital lease obligations, the table presents principal cash flows and related weighted-average interest rates by expected maturity dates. For interest rate swaps, the table presents notional amounts and weighted-average interest rates by expected contractual maturity dates.

	Expected Maturity Date							Fair Value Asset / (Liability)	Rate ⁽¹⁾
	2010	2011	2012	2013	2014	Thereafter	Total		
	(in millions of U.S. dollars, except percentages)								
Long-Term Debt:									
Variable Rate (\$U.S.) ⁽²⁾	169.8	251.4	231.6	399.8	847.5	1,433.2	3,333.3	(3,033.4)	1.1%
Variable Rate (Euro) ^{(3) (4)}	12.9	227.5	7.3	7.8	8.4	148.5	412.4	(368.2)	1.1%
Fixed-Rate Debt (\$U.S.)	48.5	224.3	48.0	47.6	47.6	257.5	673.5	(653.8)	6.1%
Average Interest Rate	5.2%	8.0%	5.2%	5.2%	5.2%	5.2%	6.1%		
Capital Lease Obligations^{(5) (6)}									
Fixed-Rate (\$U.S.) ⁽⁷⁾	9.6	185.5					195.1	(195.1)	7.4%
Average Interest Rate ⁽⁸⁾	7.5%	7.4%					7.4%		

Interest Rate Swaps:

Edgar Filing: TEEKAY CORP - Form 20-F

Contract Amount (\$U.S.) ⁽⁶⁾ ⁽⁹⁾	279.3	170.3	276.3	82.5	96.4	2,742.1	3,646.9	(330.6)	4.8%
Average Fixed Pay Rate ⁽²⁾	4.3%	3.5%	3.1%	4.9%	4.8%	5.3%	4.8%		
Contract Amount (Euro) ⁽⁴⁾ ⁽¹⁰⁾	13.0	227.4	7.3	7.8	8.4	148.5	412.4	(10.6)	3.8%
Average Fixed Pay Rate ⁽³⁾	3.8%	3.8%	3.7%	3.7%	3.7%	3.8%	3.8%		

(1) Rate refers to the weighted-average effective interest rate for our long-term debt and capital lease obligations, including the margin we pay on our floating-rate, which as of December 31, 2009, ranged from 0.3% to 3.25%. The average interest rate for our capital lease obligations is the weighted-average interest rate implicit in our lease obligations at the inception of the leases.

(2) Interest payments on U.S. Dollar-denominated debt and interest rate swaps are based on LIBOR. The average fixed pay rate for our interest rate swaps excludes the margin we pay our floating-rate debt.

(3) Interest payments on Euro-denominated debt and interest rate swaps are based on EURIBOR.

- (4) Euro-denominated amounts have been converted to U.S. Dollars using the prevailing exchange rate as of December 31, 2009.
- (5) Excludes capital lease obligations (present value of minimum lease payments) of 83.1 million Euros (\$119.1 million) on one of our existing LNG carriers with a weighted-average fixed interest rate of 5.8%. Under the terms of this fixed-rate lease obligation, we are required to have on deposit, subject to a weighted-average fixed interest rate of 5.0%, an amount of cash that, together with the interest earned thereon, will fully fund the amount owing under the capital lease obligation, including a vessel purchase obligation. As at December 31, 2009, this amount was 84.3 million Euros (\$120.8 million). Consequently, we are not subject to interest rate risk from these obligations or deposits.

Table of Contents

(6) Under the terms of the capital leases for the RasGas II LNG Carriers (see Item 18 Financial Statements: Note 10 Capital Lease Obligations and Restricted Cash), we are required to have on deposit, subject to a variable rate of interest, an amount of cash that, together with interest earned on the deposit, will equal the remaining amounts owing under the variable-rate leases. The deposits, which as at December 31, 2009 totaled \$479.4 million, and the lease obligations, which as at December 31, 2009 totaled \$470.1 million, have been swapped for fixed-rate deposits and fixed-rate obligations. Consequently, we are not subject to interest rate risk from these obligations and deposits and, therefore, the lease obligations,

cash deposits and related interest rate swaps have been excluded from the table above. As at December 31, 2009, the contract amount, fair value and fixed interest rates of these interest rate swaps related to the RasGas II LNG Carriers capital lease obligations and restricted cash deposits were \$455.4 million and \$473.8 million, (\$37.3) million and \$36.7 million, and 4.9% and 4.8% respectively.

- (7) The amount of capital lease obligations represents the present value of minimum lease payments together with our purchase obligation, as applicable (see Item 18 Financial Statements: Note 10 Capital Lease Obligations and Restricted Cash.
- (8) The average interest rate is the weighted-average interest rate implicit in the capital lease obligations at the inception of the leases.

(9) The average variable receive rate for our interest rate swaps is set monthly at the 1-month LIBOR or EURIBOR, quarterly at the 3-month LIBOR or semi-annually at the 6-month LIBOR.

(10) Includes interest rate swaps of \$300.0 million and \$200.0 million that have commencement dates of 2010 and 2011, respectively.

Commodity Price Risk

From time to time we use bunker fuel swap contracts as economic hedges to protect against changes in forecasted bunker fuel costs for certain vessels being time-chartered-out and for vessels servicing certain contracts of affreightment. As at December 31, 2009, we were committed to contracts totaling 23,400 metric tonnes with a weighted-average price of \$439.23 per tonne and a fair value asset of \$0.6 million. The fuel swap contracts expire between January and December 2010.

Spot Tanker Market Rate Risk

We use forward freight agreements (or *FFAs*) as economic hedges to protect against changes in spot tanker market rates earned by some of our vessels in our spot tanker segment. *FFAs* involve contracts to move a theoretical volume of freight at fixed-rates. As at December 31, 2009, the *FFAs*, had an aggregate notional value of \$30.5 million, which is an aggregate of both long and short positions, and a net fair value liability of \$0.5 million. The *FFAs* expire between January 2010 and December 2010.

We use *FFAs* in speculative transactions to increase or decrease our exposure to spot tanker market rates, within strictly defined limits. Historically, we have used a number of different tools, including the sale/purchase of vessels and the in-charter/out-charter of vessels, to increase or decrease this exposure. We believe that we can capture some of the value from the volatility of the spot tanker market and from market imbalances by utilizing *FFAs*. As at December 31, 2009, we were not committed to any speculative related *FFAs*.

Item 13. Defaults, Dividend Arrearages and Delinquencies

None.

Item 14. Material Modifications to the Rights of Security Holders and Use of Proceeds

None.

Item 15. Controls and Procedures

We maintain disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities and Exchange Act of 1934, as amended (or the *Exchange Act*)) that are designed to ensure that (i) information required to be disclosed in our reports that are filed or submitted under the Exchange Act, are recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and (ii) information required to be disclosed by us in the reports we file or submit under the Exchange Act is accumulated and communicated to our management, including the principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

We conducted an evaluation of our disclosure controls and procedures under the supervision and with the participation of the Chief Executive Officer and Chief Financial Officer. Based on the evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective as of December 31, 2009. During 2009, there were no changes in our internal controls that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

The Chief Executive Officer and Chief Financial Officer do not expect that our disclosure controls or internal controls will prevent all error and all fraud. Although our disclosure controls and procedures were designed to provide reasonable assurance of achieving their objectives, a control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within us have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls also is based partly on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

Table of Contents**Management's Report on Internal Control over Financial Reporting**

Our management is responsible for establishing and maintaining for us adequate internal controls over financial reporting.

Our internal controls were designed to provide reasonable assurance as to the reliability of our financial reporting and the preparation and presentation of the consolidated financial statements for external purposes in accordance with accounting principles generally accepted in the United States. Our internal controls over financial reporting includes those policies and procedures that, 1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets; 2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of the financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made in accordance with authorizations of management and the directors; and 3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements. We conducted an evaluation of the effectiveness of our internal control over financial reporting based upon the framework in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. This evaluation included review of the documentation of controls, evaluation of the design effectiveness of controls, testing of the operating effectiveness of controls and a conclusion on this evaluation.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements even when determined to be effective and can only provide reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies and procedures may deteriorate. However, based on the evaluation, management believes that we maintained effective internal control over financial reporting as of December 31, 2009.

Our independent auditors, Ernst & Young LLP, a registered public accounting firm has audited the accompanying consolidated financial statements and our internal control over financial reporting. Their attestation report on the effectiveness of our internal control over financial reporting can be found on page F-2 of this Annual Report.

Item 16A. Audit Committee Financial Expert

The Board has determined that director and Chair of the Audit Committee, Eileen A. Mercier, qualifies as an audit committee financial expert and is independent under applicable NYSE and SEC standards.

Item 16B. Code of Ethics

We have adopted Standards for Business Conduct that includes a Code of Ethics for all employees and directors. This document is available under Other Information – Corporate Governance in the Investor Center of our website (www.teekay.com). We also intend to disclose under Other Information – Corporate Governance in the Investor Center of our web site any waivers to or amendments of our Standards of Business Conduct or Code of Ethics for the benefit of our directors and executive officers.

Item 16C. Principal Accountant Fees and Services

Our principal accountant for 2009 and 2008 was Ernst & Young LLP, Chartered Accountants. The following table shows the fees Teekay Corporation and our subsidiaries paid or accrued for audit and other services provided by Ernst & Young LLP for 2009 and 2008.

Fees	2009	2008
Audit Fees ⁽¹⁾	\$ 6,082,000	\$ 6,744,000
Audit-Related Fees ⁽²⁾	269,000	20,400
Tax Fees ⁽³⁾	120,000	235,400
All Other Fees ⁽⁴⁾	4,000	2,500
Total	\$ 6,475,000	\$ 7,002,300

- (1) Audit fees represent fees for professional services provided in connection with the audits of our consolidated financial statements, reviews of our quarterly consolidated financial statements and audit services provided in connection with other statutory or regulatory filings for Teekay or our subsidiaries including professional services in connection with the review of our regulatory filings for public offerings of our subsidiaries. Audit fees for 2009 and 2008 include approximately \$1,060,000 and \$1,375,900, respectively, of fees paid to Ernst & Young LLP by Teekay LNG that were approved by the Audit Committee of the Board of Directors of the general partner

of Teekay LNG. Audit fees for 2009 and 2008 include approximately \$1,335,000 and \$1,356,000, respectively, of fees paid to Ernst & Young LLP by our subsidiary Teekay Offshore that were approved by the Audit Committee of the Board of Directors of the general partner of Teekay Offshore. Audit fees for 2009 and 2008 include approximately \$383,000 and \$489,900, respectively, of fees paid to Ernst & Young LLP by our subsidiary Teekay Tankers that were approved by the Audit Committee of the Board of Directors of Teekay Tankers.

- (2) Audit-related fees consisted primarily of accounting consultations, employee benefit plan audits, services related to

business
acquisitions,
divestitures and
other attestation
services.

- (3) For 2009 and
2008,
respectively, tax
fees principally
included
international tax
planning fees,
corporate tax
compliance fees
and personal
and expatriate
tax services
fees.

- (4) All other fees
principally
include
subscription
fees to an
internet
database of
accounting
information.

Table of Contents

The Audit Committee has the authority to pre-approve permissible audit-related and non-audit services not prohibited by law to be performed by our independent auditors and associated fees. Engagements for proposed services either may be separately pre-approved by the Audit Committee or entered into pursuant to detailed pre-approval policies and procedures established by the Audit Committee, as long as the Audit Committee is informed on a timely basis of any engagement entered into on that basis. The Audit Committee separately pre-approved all engagements and fees paid to our principal accountant in 2009.

Item 16D. Exemptions from the Listing Standards for Audit Committees

Not applicable.

Item 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers

In October 2008, we announced that our Board of Directors has authorized the repurchase of up to \$200 million of shares of our common stock. No shares of our common stock were repurchased related to this program for the period covered by this report.

Item 16F. Change in Registrant's Certifying Accountant

Not applicable.

Item 16G. Corporate Governance

There are no significant ways in which our corporate governance practices differ from those followed by U.S. domestic companies under the listing requirements of the New York Stock Exchange.

PART III**Item 17. Financial Statements**

Not applicable.

Item 18. Financial Statements

The following consolidated financial statements and schedule, together with the related reports of Ernst & Young LLP, Independent Registered Public Accounting Firm thereon, are filed as part of this Annual Report:

	Page
<u>Reports of Independent Registered Public Accounting Firm</u>	F-1 and F-2
Consolidated Financial Statements	
<u>Consolidated Statements of Income (Loss)</u>	F-3
<u>Consolidated Balance Sheets</u>	F-4
<u>Consolidated Statements of Cash Flows</u>	F-5
<u>Consolidated Statements of Changes in Total Equity</u>	F-6

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
TEEKAY CORPORATION

We have audited the accompanying consolidated balance sheets of **Teekay Corporation** (the Company) as of December 31, 2009 and 2008, and the related consolidated statements of income (loss), changes in total equity and cash flows for each of the three years in the period ended December 31, 2009. These financial statements are the responsibility of the Company s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Teekay Corporation at December 31, 2009 and 2008, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2009, in conformity with U.S. generally accepted accounting principles.

As discussed in Note 1 to the consolidated financial statements, in 2009, the Company adopted an amendment to FASB ASC 810 *Consolidation*, related to the accounting for non-controlling interests in the consolidated financial statements.

As discussed in Note 1 to the consolidated financial statements, in 2009 the Company changed its method of presentation for realized and unrealized gain (loss) on non-designated derivative instruments.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Teekay Corporation s internal control over financial reporting as of December 31, 2009, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated April 29, 2010 expressed an unqualified opinion thereon.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
TEEKAY CORPORATION

We have audited Teekay Corporation's internal control over financial reporting as of December 31, 2009, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (the *COSO criteria*). Teekay Corporation's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Teekay Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2009, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Teekay Corporation as of December 31, 2009 and 2008 and the related consolidated statements of income (loss), changes in total equity and cash flows for each of the three years in the period ended December 31, 2009 and our report dated April 29, 2010 expressed an unqualified opinion thereon.
