**Notes to Schedule of Investments:**

- \* Portfolio securities and other financial instruments for which market quotations are readily available are stated at market value. Market value is generally

determined on the basis of last reported sales prices, or if no sales are reported, on the basis of quotes obtained from a quotation reporting system, established market makers, or independent pricing services.

Portfolio securities and other financial instruments for which market quotations are not readily available or for which a development/event occurs that may significantly impact the value of a security, are fair-valued, in good faith, pursuant to procedures established by the Board of Directors, or persons acting at their discretion pursuant to procedures established by the Board of Directors. The Fund's investments are valued daily and the net asset value ( NAV ) is calculated as of the close of regular trading (normally 4:00 p.m. Eastern time) on the New York Stock Exchange ( NYSE ) on each day the NYSE is open for

business using prices supplied by dealer quotations, or by using the last sale price on the exchange that is the primary market for such securities, or the last quoted mean price for those securities for which the over-the-counter market is the primary market or for listed securities in which there were no sales. For Korean equity securities (with rare exceptions), the Fund fair values its securities daily using modeling tools provided by a statistical research service. This service utilizes statistics and programs based on historical performance of markets and other economic data (which may include changes in the value of U.S. securities or security indices). Short-term securities maturing in 60 days or less are valued at amortized cost, if their original term to maturity was 60 days or less, or by amortizing their value on the 61st day prior to maturity, if the

original term to maturity exceeded 60 days.

Investments initially valued in currencies other than the U.S. dollar are converted to the U.S. dollar using exchange rates obtained from pricing services. As a result, the NAV of the Fund's shares may be affected by changes in the value of currencies in relation to the U.S. dollar. The value of securities traded in markets outside the United States or denominated in currencies other than U.S. dollar may be affected significantly on a day that the NYSE is closed. The prices used by the Fund to value securities may differ from the value that would be realized if the securities were sold and these differences could be material.

- (a) Securities with an aggregate value of \$373,072,343, representing 87.9% of net assets, were valued utilizing modeling tools provided by a third-party vendor.

- (b) Non-income producing.
  - (c) Security purchased with cash proceeds from securities on loan.
  - (d) All or portion of securities on loan with an aggregate market value of \$11,410,934; cash collateral of \$11,945,614 was received with which the Fund purchased short-term investments.
  - (e) In connection with the Fund's cash collateral investment in BNY Institutional Cash Reserves ( CR ) at September 12, 2008, the Fund may be subject to losses on investments in certain Lehman Brothers securities held in CR.

**Fair Value Measurements**

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e. the exit price) in an orderly transaction between market participants. The three levels of the fair value hierarchy are described below:

Level 1 quoted prices in active markets for identical investments that the Fund has the ability to access

Level 2 valuations based on other significant observable inputs (including quoted prices for similar investments, interest rate prepayment speeds, credit risk, etc.) or quotes from inactive exchanges

Level 3 valuations based on significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

An investment asset's or liability's level within the fair value hierarchy is based on the lowest level input, individually or in the aggregate, that is significant to fair value measurement. The objective of fair value measurement remains the same even when there is a significant decrease in the volume and level of activity for an asset or liability and regardless of the valuation technique used.

The valuation techniques used by the Fund to measure fair value during the nine months ended March 31, 2010 maximized the use of observable inputs and minimized the use of unobservable inputs. When fair-valuing securities, the Fund utilized the estimation of the price that would have prevailed in a liquid market for international equities, given information available at the time of evaluation.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The Fund's policy is to recognize transfers between levels at the end of the reporting period.

A summary of the inputs used at March 31, 2010 in valuing the Fund's assets and liabilities is listed below:

	Level 1 Quoted Prices	Level 2 Other Significant Observable Inputs	Level 3 Significant Unobservable Inputs	Value at 3/31/10
<b>Investments in Securities Assets</b>				
Common Stock:				
Food Products	\$ 2,488,925	\$ 3,578,187		\$ 6,067,112
Hotels, Restaurants & Leisure	13,265,014	11,881,320		25,146,334
Industrial Conglomerates	13,544,324	1,412,557		14,956,881
Personal Products	2,777,884			2,777,884
Pharmaceuticals	6,108,653			6,108,653
All Other		356,200,279		356,200,279
Short-Term Investment		11,945,614		11,945,614
<b>Total Investments</b>	<b>\$38,184,800</b>	<b>\$385,017,957</b>		<b>\$423,202,757</b>

There were no significant transfers into and out of Levels 1 and 2 during the nine months ended March 31, 2010.
