EXCHANGE ACT OF 1934**

For the quarterly period ended April 30, 2010

OR

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934**

For the transition period from _____ to _____

Commission file number: 1-9494

TIFFANY & CO.

(Exact name of registrant as specified in its charter)

Delaware

(State of incorporation)

13-3228013

(I.R.S. Employer Identification No.)

727 Fifth Ave. New York, NY

(Address of principal executive offices)

10022

(Zip Code)

Registrant's telephone number, including area code:

(212) 755-8000

Former name, former address and former fiscal year, if changed since last report _____

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

APPLICABLE ONLY TO CORPORATE ISSUERS: Indicate the number of shares outstanding of each of the issuer's classes of common stock as of the latest practicable date: Common Stock, \$.01 par value, 127,154,368 shares outstanding at the close of business on May 31, 2010.

TIFFANY & CO. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

The accompanying condensed consolidated financial statements include the accounts of Tiffany & Co. (the Company) and its subsidiaries in which a controlling interest is maintained. Controlling interest is determined by majority ownership interest and the absence of substantive third-party participating rights or, in the case of variable interest entities (VIEs), if the Company has the power to significantly direct the activities of a VIE, as well as the obligation to absorb significant losses of or the right to receive significant benefits from the VIE. Intercompany accounts, transactions and profits have been eliminated in consolidation. The interim statements are unaudited and, in the opinion of management, include all adjustments (which represent normal recurring adjustments) necessary to fairly state the Company's financial position as of April 30, 2010 and 2009 and the results of its operations and cash flows for the interim periods presented. The condensed consolidated balance sheet data for January 31, 2010 is derived from the audited financial statements, which are included in the Company's Annual Report on Form 10-K and should be read in connection with these financial statements. As permitted by the rules of the Securities and Exchange Commission, these financial statements do not include all disclosures required by generally accepted accounting principles.

The Company's business is seasonal in nature, with the fourth quarter typically representing at least one-third of annual net sales and approximately one-half of annual net earnings. Therefore, the results of its operations for the three months ended April 30, 2010 and 2009 are not necessarily indicative of the results of the entire fiscal year.

2. DISCONTINUED OPERATIONS

In the fourth quarter of 2008, management concluded that it would no longer invest in its IRIDESSE business due to its ongoing operating losses and insufficient near-term growth prospects, especially in the economic environment at the time the decision was made. All IRIDESSE stores were closed in 2009. These amounts have been reclassified to discontinued operations for all periods presented. Prior to the reclassification, IRIDESSE results had been included within the Other non-reportable segment.

Summarized statement of earnings data for IRIDESSE is as follows:

<i>(in thousands)</i>	Three Months Ended April 30, 2009
Net sales	\$ 5,444
Loss before income taxes	5,077
Benefit from income taxes	(1,975)
Net loss from discontinued operations	\$ 3,102

3. INVENTORIES

Inventories, net	\$ 1,473,730	\$ 1,427,855	\$ 1,553,717

7

Table of Contents**4. INCOME TAXES**

The effective income tax rate for the first quarter of 2010 was 30.9% versus 41.7% in the prior year. The decrease in the effective income tax rate in 2010 was due to an unfavorable geographical mix of earnings in the prior year and non-recurring items recorded in the first quarter ended April 30, 2010. In the first quarter of 2010, the Company recorded a non-recurring benefit of \$5,006,000 due to a change in tax status of certain subsidiaries associated with the acquisition in 2009 of additional equity interests in diamond sourcing and polishing operations. This was partially offset by a \$1,910,000 charge as a result of recent healthcare reform legislation, which eliminated the tax benefit associated with the Medicare Part D subsidy.

In the first quarter ended April 30, 2010, the change in the gross amount of unrecognized tax benefits and accrued interest and penalties was not significant.

The Company is subject to taxation in the U.S. and various states and foreign jurisdictions. As a matter of course, various taxing authorities regularly audit the Company. The Company's tax filings are currently being examined by tax authorities in jurisdictions where its subsidiaries have a material presence, including New York state (tax years 2004-2007), Japan (tax years 2003-2008) and by the Internal Revenue Service (tax years 2007-2008). Tax years from 2001-present are open to examination in U.S. Federal and various state, local and foreign jurisdictions. The Company believes that its tax positions comply with applicable tax laws and that it has adequately provided for these matters. However, the audits may result in proposed assessments where the ultimate resolution may result in the Company owing additional taxes. The Company does not anticipate any material changes to the total gross amount of unrecognized tax benefits over the next 12 months. Future developments may result in a change in this assessment.

5. EARNINGS PER SHARE

Basic earnings per share (EPS) is computed as net earnings divided by the weighted-average number of common shares outstanding for the period. Diluted EPS includes the dilutive effect of the assumed exercise of stock options and unvested restricted stock units.

The following table summarizes the reconciliation of the numerators and denominators for the basic and diluted EPS computations:

<i>(in thousands)</i>	Three Months Ended April 30,	
	2010	2009
Net earnings for basic and diluted EPS	\$ 64,425	\$ 24,341
Weighted-average shares for basic EPS	126,699	124,001
Incremental shares based upon the assumed exercise of stock options and unvested restricted stock units	1,844	163
Weighted-average shares for diluted EPS	128,543	124,164

For the three months ended April 30, 2010 and 2009, there were 431,000 and 8,485,000 stock options and restricted stock units excluded from the computations of earnings per diluted share due to their antidilutive

effect.

6. HEDGING INSTRUMENTS

Background Information

The Company uses derivative financial instruments, including interest rate swap agreements, forward contracts, put option contracts and net-zero-cost collar arrangements (combination of call and put option contracts) to mitigate its exposures to changes in interest rates, foreign currency and precious metal prices. Derivative instruments are recorded on the consolidated balance sheet at their fair values, as either assets or liabilities, with an offset to current or comprehensive earnings, depending on whether the derivative is designated as part of an effective hedge transaction and, if it is, the type of hedge transaction. If a derivative instrument meets certain hedge accounting criteria, the derivative instrument is designated as one of the

Table of Contents

following on the date the derivative is entered into:

Fair Value Hedge A hedge of the exposure to changes in the fair value of a recognized asset or liability or an unrecognized firm commitment. For fair value hedge transactions, both the effective and ineffective portions of the changes in the fair value of the derivative and changes in the fair value of the item being hedged are recorded in current earnings.

Cash Flow Hedge A hedge of the exposure to variability in the cash flows of a recognized asset, liability or a forecasted transaction. For cash flow hedge transactions, the effective portion of the changes in fair value of derivatives are reported as other comprehensive income (OCI) and are recognized in current earnings in the period or periods during which the hedged transaction affects current earnings. Amounts excluded from the effectiveness calculation and any ineffective portions of the change in fair value of the derivative are recognized in current earnings.

The Company formally documents the nature and relationships between the hedging instruments and hedged items for a derivative to qualify as a hedge at inception and throughout the hedged period. The Company also documents its risk management objectives, strategies for undertaking the various hedge transactions and method of assessing hedge effectiveness. Additionally, for hedges of forecasted transactions, the significant characteristics and expected terms of a forecasted transaction must be specifically identified, and it must be probable that each forecasted transaction will occur. If it were deemed no longer probable that the forecasted transaction would occur, the gain or loss on the derivative financial instrument would be recognized in current earnings. Derivative financial instruments qualifying for hedge accounting must maintain a specified level of effectiveness between the hedging instrument and the item being hedged, both at inception and throughout the hedged period.

The Company does not use derivative financial instruments for trading or speculative purposes.

Types of Derivative Instruments

Interest Rate Swap Agreements In the second quarter of 2009, the Company entered into interest rate swap agreements to effectively convert its fixed rate 2002 Series D and 2008 Series A obligations to floating rate obligations. Since the fair value of the Company's fixed rate long-term debt is sensitive to interest rate changes, the interest rate swap agreements serve as a hedge to changes in the fair value of these debt instruments. The Company is hedging its exposure to changes in interest rates over the remaining maturities of the debt agreements being hedged. The Company accounts for the interest rate swaps as fair value hedges. As of April 30, 2010, the notional amount of interest rate swap agreements outstanding was \$160,000,000.

Foreign Exchange Forward Contracts The Company uses foreign exchange forward contracts to offset the foreign currency exchange risks associated with foreign currency-denominated liabilities and intercompany transactions between entities with differing functional currencies. These foreign exchange forward contracts are designated and accounted for as either cash flow hedges or economic hedges that are not designated as hedging instruments. As of April 30, 2010, the notional amount of foreign exchange forward contracts accounted for as cash flow hedges was \$42,501,000 and the notional amount of foreign exchange forward contracts accounted for as undesignated hedges was \$12,568,000. The term of all outstanding foreign exchange forward contracts as of April 30, 2010 ranged from one to 10 months.

Put Option Contracts The Company's wholly-owned subsidiary in Japan satisfies nearly all of its inventory requirements by purchasing merchandise, payable in U.S. dollars, from the Company's principal subsidiary. To minimize the potentially negative effect of a significant strengthening of the U.S. dollar against the Japanese yen, the Company purchases put option contracts as hedges of forecasted purchases of merchandise over a maximum term of 13 months. If the market yen exchange rate at the time of the put option contract's expiration is stronger than the contracted exchange rate, the Company allows the put option contract to expire, limiting its loss to the cost of the put option contract. The Company accounts for its put option contracts as cash flow

hedges. The Company assesses hedge effectiveness based on the total changes in the put option contracts cash flows. As of April 30, 2010, the notional amount of put option contracts accounted for as cash flow hedges was \$76,100,000. During October 2009, the Company de-designated several of its outstanding put option contracts (notional amount of \$38,000,000 outstanding at April 30, 2010) and entered into offsetting call option contracts. These put and call option contracts are accounted for as undesignated

Table of Contents

hedges. Any gains or losses on these de-designated put option contracts are substantially offset by losses or gains on the call option contracts.

Precious Metal Collars & Forward Contracts The Company periodically hedges a portion of its forecasted purchases of precious metals for use in its internal manufacturing operations in order to minimize the effect of volatility in precious metal prices. The Company may use either a combination of call and put option contracts in net-zero-cost collar arrangements (precious metal collars) or forward contracts. For precious metal collars, if the price of the precious metal at the time of the expiration of the precious metal collar is within the call and put price, the precious metal collar would expire at no cost to the Company. The Company accounts for its precious metal collars and forward contracts as cash flow hedges. The Company assesses hedge effectiveness based on the total changes in the precious metal collars and forward contracts cash flows. The maximum term over which the Company is hedging its exposure to the variability of future cash flows for all forecasted transactions is 13 months. As of April 30, 2010, there were approximately 12,500 ounces of platinum and 295,300 ounces of silver precious metal derivative instruments outstanding.

^b The gain or loss recognized in earnings is included within Cost of Sales on the Company's Condensed Consolidated Statement of Earnings.

^c Gains or losses on the undesignated foreign exchange forward contracts substantially offset foreign exchange losses or gains on the liabilities and transactions being hedged.

There was no material ineffectiveness related to the Company's hedging instruments for the periods ended April 30, 2010 and 2009. The Company expects approximately \$944,000 of net pre-tax derivative losses included in accumulated other comprehensive income at April 30, 2010 will be reclassified into earnings within the next 12 months. This amount will vary due to fluctuations in foreign currency exchange rates and precious metal prices.

For information regarding the location and amount of the derivative instruments in the Condensed Consolidated Balance Sheet, refer to Note 7. Fair Value of Financial Instruments.

Concentration of Credit Risk

A number of major international financial institutions are counterparties to the Company's derivative financial instruments. The Company enters into derivative financial instrument agreements only with counterparties meeting certain credit standards (a credit rating of A/A2 or better at the time of the agreement), limiting the amount of agreements or contracts it enters into with any one party. The Company may be exposed to credit losses in the event of nonperformance by individual counterparties or the entire group of counterparties.

Table of Contents**7. FAIR VALUE OF FINANCIAL INSTRUMENTS**

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. U.S. GAAP establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. U.S. GAAP prescribes three levels of inputs that may be used to measure fair value:

Level 1 Quoted prices in active markets for identical assets or liabilities. Level 1 inputs are considered to carry the most weight within the fair value hierarchy due to the low levels of judgment required in determining fair values.

Level 2 Observable market-based inputs or unobservable inputs that are corroborated by market data.

Level 3 Unobservable inputs reflecting the reporting entity's own assumptions. Level 3 inputs are considered to carry the least weight within the fair value hierarchy due to substantial levels of judgment required in determining fair values.

The Company uses the market approach to measure fair value for its mutual funds and derivative instruments. The Company's interest rate swap agreements are valued using the 3-month LIBOR rate. The Company's put and call option contracts, as well as its foreign exchange forward contracts, are valued using the appropriate foreign exchange spot rates. The Company's precious metal collars and precious metal forward contracts are valued using the relevant precious metal spot rate. For further information on the Company's hedging instruments and program, see Note 6. Hedging Instruments.

Financial assets and liabilities carried at fair value at April 30, 2010 are classified in the table below in one of the three categories described above:

<i>(in thousands)</i>	Carrying Value	Estimated Fair Value			Total Fair Value
		Level 1	Level 2	Level 3

^a This amount is included within Other assets, net on the Company's Condensed Consolidated Balance Sheet.

^b This amount is included within Prepaid expenses and other current assets on the Company's Condensed Consolidated Balance Sheet.

^c This amount is included within Accounts payable and accrued liabilities on the Company's Condensed Consolidated Balance Sheet.

Table of Contents

The fair value of cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities approximates carrying value due to the short-term maturities of these assets and liabilities. The fair value of debt with variable interest rates approximates carrying value. The fair value of debt with fixed interest rates was determined using the quoted market prices of debt instruments with similar terms and maturities. The total carrying value of short-term borrowings and long-term debt was \$759,755,000 and \$821,846,000 and the corresponding fair value was approximately \$800,000,000 at both April 30, 2010 and April 30, 2009.

8. COMMITMENTS & CONTINGENCIES

In April 2010, Tiffany and Company, the Company's principal operating subsidiary (Tiffany) committed to a plan to consolidate its New York headquarters staff within one location in New York City from three separate locations currently leased in midtown Manhattan. The move, expected to occur in spring 2011, will enable Tiffany to consolidate all headquarters staff in one location and generate occupancy savings. Tiffany intends to sublease its existing properties through the end of their lease terms which run through 2015, but expects to recover only a portion of its rent obligations due to current market conditions. Accordingly, Tiffany anticipates recording expenses of approximately \$30,000,000 primarily within selling, general and administrative expenses in the consolidated statement of earnings in the fiscal year ending January 31, 2012; this expense is related to the fair value of the remaining non-cancelable lease obligations reduced by the estimated sublease rental income. Additionally, Tiffany will incur expenses of approximately \$20,000,000 in the fiscal year ending January 31, 2011 and \$5,000,000 in the fiscal year ending January 31, 2012 related to the acceleration of the useful lives of certain property and equipment and incremental rents during the transition period. Changes in market conditions may affect the total expenses ultimately recorded. The expenses recorded during the three months ended April 30, 2010 were not significant. This new lease, which expires in 2026, will increase total minimum annual rental payments as disclosed in the January 31, 2010 Annual Report on Form 10-K by the following amounts:

<i>(in thousands)</i>	Total	2010	2011-2012	2013-2014	Thereafter
Unrecorded contractual obligations:					
Operating leases	\$ 226,462	\$	\$ 25,068	\$ 27,347	\$ 174,047

9. STOCKHOLDERS' EQUITY

Net expense	\$ 5,840	\$ 5,097	\$ 878	\$ 748

11. SEGMENT INFORMATION

Effective with the first quarter of 2010, management has changed the Company's segment reporting in order to align with a change in its organizational and management reporting structure. Specifically, the Company is now reporting results in Japan separately from the rest of the Asia-Pacific region, and results for certain emerging market countries that were previously included in the Europe and Asia-Pacific segments are now included in the Other non-reportable segment. Prior year results have been revised to reflect this change. The Company's reportable segments are as follows:

Americas includes sales in TIFFANY & CO. stores in the United States, Canada and Latin/South America, as well as sales of TIFFANY & CO. products in certain markets through business-to-business, Internet, catalog and wholesale operations;

Japan includes sales in TIFFANY & CO. stores, as well as sales of TIFFANY & CO. products through business-to-business, Internet and wholesale operations;

Asia-Pacific includes sales in TIFFANY & CO. stores in Asia-Pacific markets (excluding Japan), as well as sales of TIFFANY & CO. products in certain markets through Internet and wholesale operations;

Europe includes sales in TIFFANY & CO. stores, as well as sales of TIFFANY & CO. products in certain markets through Internet and wholesale operations; and

Other consists of all non-reportable segments. Other consists primarily of wholesale sales of TIFFANY & CO. merchandise to independent distributors for resale in certain emerging markets (such as the Middle East and Russia) and wholesale sales of diamonds obtained through bulk purchases that were subsequently deemed not suitable for the Company's needs. In addition, Other includes earnings received from a third-party licensing agreement.

The results of IRIDESSE are presented as a discontinued operation in the condensed consolidated financial statements for all periods presented. Prior to the reclassification, IRIDESSE results had been included within the

Other non-reportable segment. Refer to Note 2. Discontinued Operations.

Table of Contents

Certain information relating to the Company's segments is set forth below:

<i>(in thousands)</i>	Three Months Ended April 30,	
	2010	2009
Net sales:		
Americas	\$ 315,258	\$ 258,994
Japan	115,049	117,029
Asia-Pacific	122,336	81,696
Europe	68,628	54,956
Total reportable segments	621,271	512,675
Other	12,315	4,940
	\$ 633,586	\$ 517,615

<i>(in thousands)</i>	Three Months Ended April 30,	
	2010	2009
Earnings (losses) from continuing operations*:		
Americas	\$ 54,922	\$ 29,469
Japan	30,996	30,964
Asia-Pacific	32,174	17,262
Europe	14,628	7,530
Total reportable segments	132,720	85,225
Other	248	(1,224)
	\$ 132,968	\$ 84,001

*Represents earnings (losses) from continuing operations before unallocated corporate expenses and interest and other expenses, net.

The following table sets forth a reconciliation of the segments' earnings from continuing operations to the Company's consolidated earnings from continuing operations before income taxes:

<i>(in thousands)</i>	Three Months Ended April 30,	
	2010	2009
Earnings from continuing operations for segments	\$ 132,968	\$ 84,001
Unallocated corporate expenses	(27,551)	(24,487)
Interest and other expenses, net	(12,138)	(12,440)
Earnings from continuing operations before income taxes	\$ 93,279	\$ 47,074

Unallocated corporate expenses includes certain costs related to administrative support functions which the Company does not allocate to its segments. Such unallocated costs include those for information technology,

finance, legal and human resources.

12. SUBSEQUENT EVENT

On May 20, 2010, the Company's Board of Directors declared a 25% increase in the quarterly dividend rate on its Common Stock, increasing it from \$0.20 per share to \$0.25 per share. A quarterly dividend of \$0.25 per share will be paid on July 12, 2010 to stockholders of record on June 21, 2010.

Table of Contents

PART I. Financial Information

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

OVERVIEW

Tiffany & Co. (the Company) is a holding company that operates through its subsidiary companies. The Company's principal subsidiary, Tiffany and Company (Tiffany), is a jeweler and specialty retailer whose principal merchandise offering is fine jewelry. The Company also sells timepieces, sterling silverware, china, crystal, stationery, fragrances and accessories. Through Tiffany and Company and other subsidiaries, the Company is engaged in product design, manufacturing and retailing activities.

Effective with the first quarter of 2010, management has changed the Company's segment reporting in order to align with a change in its organizational and management reporting structure. Specifically, the Company is now reporting results in Japan separately from the rest of the Asia-Pacific region, and results for certain emerging market countries that were previously included in the Europe and Asia-Pacific segments are now included in the Other non-reportable segment. Prior year results have been revised to reflect this change. The Company's reportable segments are as follows:

Americas includes sales in TIFFANY & CO. stores in the United States, Canada and Latin/South America, as well as sales of TIFFANY & CO. products in certain markets through business-to-business, Internet, catalog and wholesale operations;

Japan includes sales in TIFFANY & CO. stores, as well as sales of TIFFANY & CO. products through business-to-business, Internet and wholesale operations;

Asia-Pacific includes sales in TIFFANY & CO. stores in Asia-Pacific markets (excluding Japan), as well as sales of TIFFANY & CO. products in certain markets through Internet and wholesale operations;

Europe includes sales in TIFFANY & CO. stores, as well as sales of TIFFANY & CO. products in certain markets through Internet and wholesale operations; and

Other consists of all non-reportable segments. Other consists primarily of wholesale sales of TIFFANY & CO. merchandise to independent distributors for resale in certain emerging markets (such as the Middle East and Russia) and wholesale sales of diamonds obtained through bulk purchases that were subsequently deemed not suitable for the Company's needs. In addition, Other includes earnings received from a third-party licensing agreement.

The results of IRIDESSE, a business that was closed in 2009, are presented as a discontinued operation in the condensed consolidated financial statements for all periods presented. Prior to the reclassification, IRIDESSE results had been included within the Other non-reportable segment. Refer to Item 1. Notes to Condensed Consolidated Financial Statements Note 2. Discontinued Operations.

All references to years relate to fiscal years ended or ending on January 31 of the following calendar year.

HIGHLIGHTS

Worldwide net sales increased 22% in the three months (first quarter) ended April 30, 2010. Sales in the Americas, Asia-Pacific and Europe increased in the quarter, while sales in Japan declined slightly in the same period.

On a constant-exchange-rate basis (see Non-GAAP Measures below), worldwide net sales increased 18% and comparable store sales increased 10% in the first quarter.

The Company opened one store, in China, in the first quarter of 2010. Management's current objective is to open 16 stores in 2010.

Operating margin increased 5.1 percentage points due to a higher gross margin and a lower ratio of selling, general and administrative expenses to net sales.

Table of Contents

Net earnings from continuing operations increased to \$64,425,000 in the first quarter of 2010. Net earnings from continuing operations per diluted share of \$0.50 increased 127% in the same period.

NON-GAAP MEASURES

The Company's reported sales reflect either a translation-related benefit from strengthening foreign currencies or a detriment from a strengthening U.S. dollar.

The Company reports information in accordance with U.S. Generally Accepted Accounting Principles (GAAP). Internally, management monitors its sales performance on a non-GAAP basis that eliminates the positive or negative effects that result from translating international sales into U.S. dollars (constant-exchange-rate basis). Management believes this constant-exchange-rate basis provides a more representative assessment of sales performance and provides better comparability between reporting periods.

The Company's management does not, nor does it suggest that investors should, consider such non-GAAP financial measures in isolation from, or as a substitute for, financial information prepared in accordance with GAAP. The Company presents such non-GAAP financial measures in reporting its financial results to provide investors with an additional tool to evaluate the Company's operating results. The following table reconciles sales percentage increases (decreases) from the GAAP to the non-GAAP basis versus the previous year:

	First Quarter 2010 vs. 2009		
	GAAP Reported	Translation Effect	Constant-Exchange- Rate Basis
<u>Net Sales:</u>			
Worldwide	22%	4%	18%
Americas	22%	2%	20%
Japan	(2)%	5%	(7)%
Asia-Pacific	50%	13%	37%
Europe	25%	6%	19%
<u>Comparable Store Sales:</u>			
Worldwide	14%	4%	10%
Americas	17%	2%	15%
Japan	(5)%	5%	(10)%
Asia-Pacific	33%	12%	21%
Europe	20%	6%	14%

RESULTS OF OPERATIONS**Net Sales**

Net sales by segment were as follows:

<i>(in thousands)</i>	First Quarter		Increase (Decrease)
	2010	2009	
Americas	\$ 315,258	\$ 258,994	22%
Japan	115,049	117,029	(2)%
Asia-Pacific	122,336	81,696	50%
Europe	68,628	54,956	25%
Other	12,315	4,940	149%
	\$ 633,586	\$ 517,615	22%

Table of Contents

Comparable Store Sales. Reference will be made to comparable store sales below. Comparable store sales include only sales transacted in company-operated stores and boutiques. A store's sales are included in comparable store sales when the store has been open for more than 12 months. In markets other than Japan, sales for relocated stores are included in comparable store sales if the relocation occurs within the same geographical market. In Japan, sales for a new store or boutique are not included if the store or boutique was relocated from one department store to another or from a department store to a free-standing location. In all markets, the results of a store in which the square footage has been expanded or reduced remain in the comparable store base.

Americas. Total sales in the Americas increased \$56,264,000, or 22%, in the first quarter of 2010 primarily due to an increase in the number of units sold. Comparable store sales increased \$36,852,000, or 17%, in the first quarter, consisting of increases in both comparable branch store sales of 15% and New York Flagship store sales of 26%. Non-comparable store sales grew \$9,615,000. On a constant-exchange-rate basis, Americas sales increased 20% and comparable store sales increased 15%. Combined Internet and catalog sales in the Americas increased \$6,520,000, or 23%, in the first quarter due to increases in both the number of orders and the average price per order.

Japan. Total sales in Japan decreased \$1,980,000, or 2%, in the first quarter of 2010 equally due to decreases in the average price per unit sold and in the number of units sold. This decrease included a comparable store sales decline of \$5,105,000, or 5%, partly offset by non-comparable store sales growth of \$1,174,000. On a constant-exchange-rate basis, Japan sales decreased 7% and comparable store sales decreased 10% in the first quarter.

Asia-Pacific. Total sales in Asia-Pacific increased \$40,640,000, or 50%, in the first quarter of 2010 primarily due to an increase in the number of units sold. This included increased comparable store sales of \$24,393,000, or 33%, and non-comparable store sales growth of \$14,492,000. On a constant-exchange-rate basis, Asia-Pacific sales increased 37% and comparable store sales increased 21% in the first quarter due to growth in most markets.

Europe. Total sales in Europe increased \$13,672,000, or 25%, in the first quarter of 2010 primarily due to an increase in the number of units sold. This included increased comparable store sales of \$9,753,000, or 20%, and non-comparable store sales growth of \$4,288,000. On a constant-exchange-rate basis, sales increased 19% and comparable store sales increased 14% in the first quarter, reflecting broad-based geographical growth in Continental Europe.

Other. Other sales increased \$7,375,000, or 149%, in the first quarter of 2010 primarily due to higher wholesale sales of diamonds that were deemed not suitable for the Company's needs, as well as an increase in wholesale sales of TIFFANY & CO. merchandise to independent distributors.

Store Data. Management currently expects to open 16 Company-operated TIFFANY & CO. stores and boutiques in 2010, increasing the store base by approximately 7%, which includes the following locations which have already been opened and/or where plans have been finalized:

Location	Openings as of April 30, 2010	Remaining Openings 2010
<i>Americas:</i>		
Baltimore, Maryland		Third Quarter
Santa Monica, California		Third Quarter
Jacksonville, Florida		Fourth Quarter
Houston Woodlands, Texas		Fourth Quarter
<i>Asia-Pacific:</i>		
Shanghai Hong Kong Plaza, China	First Quarter	
Shanghai IFC Mall, China		Second Quarter
Marina Bay, Singapore		Second Quarter
<i>Europe:</i>		
London Canary Wharf, England		Third Quarter
Barcelona, Spain		Fourth Quarter

Table of Contents**Gross Margin**

	First Quarter	
	2010	2009
Gross profit as a percentage of net sales	57.8%	55.9%

Gross margin (gross profit as a percentage of net sales) increased in the first quarter of 2010 by 1.9 percentage points primarily due to sales leverage on fixed costs and manufacturing efficiencies.

Management periodically reviews and may adjust its retail prices, as it did in the first quarter of 2010, to address specific market conditions, product cost increases and longer-term changes in foreign currencies/U.S. dollar relationships. Among the market conditions that the Company addresses is consumer demand for the product category involved, which may be influenced by consumer confidence and competitive pricing conditions. The Company uses derivative instruments to mitigate foreign exchange and precious metal price exposures (see Item 1. Notes to Condensed Consolidated Financial Statements Note 6. Hedging Instruments).

Selling, General and Administrative (SG&A) Expenses

	First Quarter	
	2010	2009
SG&A expenses as a percentage of net sales	41.1%	44.4%

SG&A expenses increased \$30,856,000, or 13%, in the first quarter of 2010, primarily due to increased labor and benefit costs of \$9,298,000, increased depreciation and store occupancy expenses of \$7,756,000 due to new and existing stores and increased marketing expenses of \$4,685,000. Changes in foreign currency exchange rates had an insignificant effect on overall SG&A expenses in the first quarter compared to the prior year. SG&A expenses as a percentage of net sales decreased by 3.3 percentage points in the first quarter due to sales leverage on fixed costs.

Earnings from Continuing Operations

<i>(in thousands)</i>	First Quarter 2010	% of Net Sales*	First Quarter 2009	% of Net Sales*
Earnings (losses) from continuing operations:				
Americas	\$ 54,922	17.4%	\$ 29,469	11.4%
Japan	30,996	26.9%	30,964	26.5%
Asia-Pacific	32,174	26.3%	17,262	21.1%
Europe	14,628	21.3%	7,530	13.7%
Other	248	2.0%	(1,224)	(24.8)%
	132,968		84,001	
Unallocated corporate expenses	(27,551)	(4.3)%	(24,487)	(4.7)%
Earnings from continuing operations	\$ 105,417	16.6%	\$ 59,514	11.5%

* Percentages represent earnings (losses) from continuing operations as a percentage of each segment's net sales. Earnings from continuing operations increased 77% in the first quarter. On a segment basis, the ratio of earnings (losses) from continuing operations (before the effect of unallocated corporate expenses) to each segment's net sales in the first quarter of 2010 and 2009 was as follows:

Edgar Filing: TIFFANY & CO - Form 10-Q

Americas the ratio increased 6.0 percentage points primarily resulting from an increase in gross margin, as well as the leveraging of operating expenses;

Japan the ratio increased 0.4 percentage point;

Asia-Pacific the ratio increased 5.2 percentage points primarily due to an increase in gross margin, as well as the leveraging of operating expenses;

Europe the ratio increased 7.6 percentage points primarily due to an increase in gross margin, as well as the leveraging of operating expenses; and

Table of Contents

Other the ratio increased 26.8 percentage points primarily due to sales growth.

Unallocated corporate expenses includes certain costs related to administrative support functions which the Company does not allocate to its segments. Such unallocated costs include those for information technology, finance, legal and human resources. Total unallocated corporate expenses increased in the first quarter of 2010. However, as a percentage of net sales, unallocated corporate expenses decreased 0.4 percentage point in the first quarter of 2010.

Interest and Other Expenses, net

Interest and other expenses, net decreased \$302,000 in the first quarter of 2010.

Provision for Income Taxes

The effective income tax rate for the first quarter of 2010 was 30.9% versus 41.7% in the prior year. The decrease in the effective income tax rate in 2010 was due to an unfavorable geographical mix of earnings in the prior year and non-recurring items recorded in the first quarter ended April 30, 2010. In the first quarter of 2010, the Company recorded a non-recurring benefit of \$5,006,000 due to a change in tax status of certain subsidiaries associated with the acquisition in 2009 of additional equity interests in diamond sourcing and polishing operations. This was partially offset by a \$1,910,000 charge as a result of recent healthcare reform legislation, which eliminated the tax benefit associated with the Medicare Part D subsidy.

Net Loss from Discontinued Operations

The loss from discontinued operations related to the Company's IRIDESSE business was \$5,077,000 pre-tax (\$3,102,000 after tax) for the first quarter of 2009. See Item 1. Notes to Condensed Consolidated Financial Statements

Note 2. Discontinued Operations.

2010 Outlook

Management's outlook for full year 2010 is based on the following assumptions, which may or may not prove valid, and should be read in conjunction with Item 1A. Risk Factors on page 27:

A worldwide net sales increase of approximately 11%. By region, sales are expected to increase by a low double-digit percentage in the Americas, to increase by a mid-twenties percentage in Asia-Pacific, to decline by a low single-digit percentage in Japan and to increase by a high single-digit percentage in Europe. Other sales are expected to be equal to the prior year.

The opening of 16 new Company-operated stores (six in the Americas, eight in Asia-Pacific and two in Europe).

An increase in operating margin primarily due to a higher gross margin, as well as an improved ratio of SG&A expenses to net sales.

Interest and other expenses, net of approximately \$50,000,000.

An effective income tax rate of approximately 35%.

Net earnings from continuing operations per diluted share of \$2.55 - \$2.60.

A high single-digit percentage increase in net inventories.

Capital expenditures of approximately \$200,000,000.

Note that the items listed above exclude i) approximately \$20,000,000 of accelerated depreciation charges and incremental rent related to the Company's recently announced plans and signed lease for office space to relocate and house Tiffany's New York headquarters staff and ii) \$3,096,000 net tax benefit (see Item 1. Notes to Condensed Consolidated Financial Statements Note 4. Income Taxes). In total, these items will reduce earnings in 2010 by approximately \$0.09 per diluted share. See Item 1. Notes to Condensed Consolidated Financial Statements Note 8. Commitments & Contingencies.

Table of Contents**LIQUIDITY AND CAPITAL RESOURCES**

The Company's liquidity needs have been, and are expected to remain, primarily a function of its seasonal and expansion-related working capital requirements and capital expenditures needs. Over the long term, the Company manages its cash and capital structure to maintain a strong financial position and provide flexibility for future strategic initiatives. Management continuously assesses its working capital needs, capital expenditure requirements, debt service, dividend payouts, share repurchases and future investments. Management believes that cash on hand, internally-generated cash flows and the funds available under its revolving Credit Facility are sufficient to support the Company's liquidity and capital requirements for the foreseeable future. Within the next 12 months, \$252,720,000 of the Company's long-term debt will reach maturity. Management currently anticipates refinancing ¥10 billion, or approximately \$110,000,000, and will repay the remaining amount coming due in the next 12 months with internally-generated cash flows.

The following table summarizes cash flows from operating, investing and financing activities:

<i>(in thousands)</i>	First Quarter	
	2010	2009
Net cash (used in) provided by:		
Operating activities	\$ (92,016)	\$ 40,723
Investing activities	(25,761)	(15,949)
Financing activities	9,362	115,070
Effect of exchange rates on cash and cash equivalents	(3,537)	3,017
Net cash provided by discontinued operations		423
Net (decrease) increase in cash and cash equivalents	\$ (111,952)	\$ 143,284

Operating Activities

The Company's net cash outflow from operating activities of \$92,016,000 in the first quarter of 2010 compared with an inflow of \$40,723,000 in the same period in 2009. The cash outflow in the first quarter of 2010 is primarily due to an increase in inventories. In addition, in the first quarter of 2010, the Company contributed \$40,000,000 to its pension plan (reflected in Other, net on the Condensed Consolidated Statements of Cash Flows).

Working Capital. Working capital (current assets less current liabilities) and the corresponding current ratio (current assets divided by current liabilities) were \$1,827,467,000 and 4.3 at April 30, 2010, compared with \$1,845,393,000 and 4.1 at January 31, 2010 and \$1,758,751,000 and 5.8 at April 30, 2009. The decrease in the ratio from April 30, 2009 was primarily due to an increase in the current portion of long-term debt.

Accounts receivable, less allowances at April 30, 2010 were 12% lower than January 31, 2010 due to the seasonality of the Company's business. Accounts receivable, less allowances at April 30, 2010 was 3% higher than April 30, 2009 due to sales growth. Changes in foreign currency exchange rates had an insignificant effect on the change in accounts receivable balances.

Inventories, net at April 30, 2010 were 3% higher than January 31, 2010 and were 5% lower than April 30, 2009. The changes in inventories, net have been affected by sales growth and management's objective in 2009 to reduce inventory levels. Changes in foreign currency exchange rates had an insignificant effect on the change in inventories, net compared to January 31, 2010 and increased inventories, net by 2% compared to April 30, 2009.

Investing Activities

The Company's net cash outflow from investing activities of \$25,761,000 in the first quarter of 2010 compared with an outflow of \$15,949,000 in the first quarter of 2009. The increased outflow in the current year is primarily due to higher capital expenditures.

Financing Activities

The Company's net cash inflow from financing activities of \$9,362,000 in the first quarter of 2010 compared with an inflow of \$115,070,000 in the first quarter of 2009. The variance between 2010 and 2009 was primarily due to the decrease in net proceeds received from borrowings.

Table of Contents

Share Repurchases. The Company's share repurchase activity was as follows:

<i>(in thousands, except per share amounts)</i>	First Quarter	
	2010	2009
Cost of repurchases	\$ 14,257	\$
Shares repurchased and retired	320	
Average cost per share	\$ 44.62	\$

The Company suspended share repurchases during the third quarter of 2008 in order to conserve cash. In January 2010, the Company resumed repurchasing its shares of Common Stock on the open market. The Company's stock repurchase program expires in January 2011. At least annually, the Company's Board of Directors reviews its policies with respect to dividends and share repurchases with a view to actual and projected earnings, cash flows and capital requirements. At April 30, 2010, there remained \$387,703,000 of authorization for future repurchases.

Recent Borrowings. The Company had net repayments of or net proceeds from short-term and long-term borrowings as follows:

<i>(in thousands)</i>	First Quarter	
	2010	2009
Proceeds from (repayment of) credit facility borrowings, net	\$ 15,291	\$ (70,289)
Short-term borrowings:		
Repayments of short-term borrowings		(93,000)
Long-term borrowings:		
Proceeds from long-term borrowings		300,000
Net proceeds from total borrowings	\$ 15,291	\$ 136,711

In addition, there was \$32,155,000 outstanding and \$367,845,000 available under the revolving credit facility at April 30, 2010. The weighted average interest rate at April 30, 2010 was 3.65%. The Credit Facility will expire in July 2012.

The ratio of total debt (short-term borrowings, current portion of long-term debt and long-term debt) to stockholders equity was 39% at April 30, 2010, 40% at January 31, 2010 and 51% at April 30, 2009. The decrease in the ratio as of April 30, 2010 largely reflects increased stockholders' equity.

At April 30, 2010, the Company was in compliance with all debt covenants.

Contractual Obligations

In April 2010, Tiffany committed to a plan to consolidate its New York headquarters' staff within one location in New York City from three separate locations currently leased in midtown Manhattan. The move, expected to occur in spring 2011, will enable Tiffany to consolidate all headquarters' staff in one location and generate occupancy savings. Tiffany intends to sublease its existing properties through the end of their lease terms which run through 2015, but expects to recover only a portion of its rent obligations due to current market conditions. Accordingly, Tiffany anticipates recording expenses of approximately \$30,000,000 primarily within selling, general and administrative expenses in the consolidated statement of earnings in the fiscal year ending January 31, 2012; this expense is related to the fair value of the remaining non-cancelable lease obligations reduced by the estimated sublease rental income. Additionally, Tiffany will incur expenses of approximately \$20,000,000 in the fiscal year ending January 31, 2011 and \$5,000,000 in the fiscal year ending January 31, 2012 related to the acceleration of the useful lives of certain property and equipment and incremental rents during the transition period. Changes in market conditions may affect the total expenses ultimately recorded. The expenses recorded during the three months ended April 30, 2010 were not

Edgar Filing: TIFFANY & CO - Form 10-Q

significant. Tiffany expects overall savings of approximately \$125,000,000 over the lease term as a result of an overall reduction in rent expense; these estimated savings are based on current rental costs and assumptions made regarding future potential rent increases at the existing locations. This new lease, which expires in 2026, will increase total minimum annual rental payments as disclosed in the January 31, 2010 Annual Report on Form 10-K by the following amounts:

<i>(in thousands)</i>	Total	2010	2011-2012	2013-2014	Thereafter
Unrecorded contractual obligations:					
Operating leases	\$ 226,462	\$	\$ 25,068	\$ 27,347	\$ 174,047

Table of Contents

The Company's contractual cash obligations and commercial commitments at April 30, 2010 and the effects such obligations and commitments are expected to have on the Company's liquidity and cash flows in future periods have not changed significantly since January 31, 2010, except as noted above.

Seasonality

As a jeweler and specialty retailer, the Company's business is seasonal in nature, with the fourth quarter typically representing at least one-third of annual net sales and approximately one-half of annual net earnings. Management expects such seasonality to continue.

Forward-Looking Statements

This quarterly report on Form 10-Q contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 concerning the Company's goals, plans and projections with respect to store openings, sales, retail prices, gross margin, expenses, effective tax rate, net earnings and net earnings per share, inventories, capital expenditures, cash flow and liquidity. In addition, management makes other forward-looking statements from time to time concerning objectives and expectations. One can identify these forward-looking statements by the fact that they use words such as believes, intends, plans, and expects and other words and terms of similar meaning and expression in connection with any discussion of future operating or financial performance. One can also identify forward-looking statements by the fact that they do not relate strictly to historical or current facts. Such forward-looking statements are based on management's current plan and involve inherent risks, uncertainties and assumptions that could cause actual outcomes to differ materially from the current plan. The Company has included important factors in the cautionary statements included in its 2009 Annual Report on Form 10-K and in this quarterly report, particularly under Item 1A. Risk Factors, that the Company believes could cause actual results to differ materially from any forward-looking statement.

Although the Company believes it has been prudent in its plans and assumptions, no assurance can be given that any goal or plan set forth in forward-looking statements can or will be achieved, and readers are cautioned not to place undue reliance on such statements which speak only as of the date this quarterly report was first filed with the Securities and Exchange Commission. The Company undertakes no obligation to update any of the forward-looking information included in this document, whether as a result of new information, future events, changes in expectations or otherwise.

Table of Contents

PART I. Financial Information

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company is exposed to market risk from fluctuations in foreign currency exchange rates, precious metal prices and interest rates, which could affect its consolidated financial position, earnings and cash flows. The Company manages its exposure to market risk through its regular operating and financing activities and, when deemed appropriate, through the use of derivative financial instruments. The Company uses derivative financial instruments as risk management tools and not for trading or speculative purposes, and does not maintain such instruments that may expose the Company to significant market risk.

Foreign Currency Risk

The Company's Japanese subsidiary satisfies nearly all of its inventory requirements by purchasing merchandise, payable in U.S. dollars, from the Company's principal subsidiary. To minimize the potentially negative effect of a significant strengthening of the U.S. dollar against the Japanese yen, the Company purchases put option contracts as hedges of forecasted purchases of merchandise over a maximum term of 13 months. The fair value of put option contracts is sensitive to changes in yen exchange rates. If the market yen exchange rate at the time of the put option contract's expiration is stronger than the contracted exchange rate, the Company allows the put option contract to expire, limiting its loss to the cost of the put option contract.

The Company also uses foreign exchange forward contracts to offset the foreign currency exchange risks associated with foreign currency-denominated liabilities and intercompany transactions between entities with differing functional currencies. Gains or losses on these foreign exchange forward contracts substantially offset losses or gains on the liabilities and transactions being hedged. The term of all outstanding foreign exchange forward contracts as of April 30, 2010 ranged from one to 10 months.

Precious Metal Price Risk

The Company periodically hedges a portion of its forecasted purchases of precious metals for use in its internal manufacturing operations in order to minimize the effect of volatility in precious metals prices. The Company may use either a combination of call and put option contracts in net-zero-cost collar arrangements (precious metal collars) or forward contracts. For precious metal collars, if the price of the precious metal at the time of the expiration of the precious metal collar is within the call and put price, the precious metal collar would expire at no cost to the Company. The maximum term over which the Company is hedging its exposure to the variability of future cash flows for all forecasted transactions is 13 months.

Interest Rate Risk

The Company uses interest rate swap agreements to effectively convert certain fixed rate debt obligations to floating rate obligations. Additionally, since the fair value of the Company's fixed rate long-term debt is sensitive to interest rate changes, the interest rate swap agreements serve as hedges to changes in the fair value of these debt instruments. The Company is hedging its exposure to changes in interest rates over the remaining maturities of the debt agreements being hedged.

PART I. Financial Information

Item 4. Controls and Procedures

Disclosure Controls and Procedures

Based on their evaluation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934), the Registrant's chief executive officer and chief financial officer concluded that, as of the end of the period covered by this report, the Registrant's disclosure controls and procedures are effective to ensure that information required to be disclosed by the Registrant in the reports that it files or submits under the Securities Exchange Act of 1934 is (i) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (ii) accumulated and communicated to our management, including our chief executive officer and chief financial officer, to allow timely decisions regarding required disclosure.

In the ordinary course of business, the Registrant reviews its system of internal control over financial reporting and makes changes to its systems and processes to improve controls and increase efficiency, while ensuring that the Registrant maintains an effective internal control environment. Changes may include such activities as implementing new, more efficient systems and automating manual processes.

The Registrant's chief executive officer and chief financial officer have determined that there have been no changes in the Registrant's internal control over financial reporting during the period covered by this report identified in connection with the evaluation described above that have materially affected, or are reasonably likely to materially affect, Registrant's internal control over financial reporting.

The Registrant's management, including its chief executive officer and chief financial officer, necessarily applied their judgment in assessing the costs and benefits of such controls and procedures. By their nature, such controls and procedures cannot provide absolute certainty, but can provide reasonable assurance regarding management's control objectives. Our chief executive officer and our chief financial officer have concluded that the Registrant's disclosure controls and procedures are (i) designed to provide such reasonable assurance and (ii) are effective at that reasonable assurance level.

Table of Contents**PART II. Other Information****Item 1A. Risk Factors**

As is the case for any retailer, the Registrant's success in achieving its objectives and expectations is dependent upon general economic conditions, competitive conditions and consumer attitudes. However, certain factors are specific to the Registrant and/or the markets in which it operates. The following risk factors are specific to the Registrant; these risk factors affect the likelihood that the Registrant will achieve the financial objectives and expectations communicated by management:

(i) Risk: that a continuation or worsening of challenging global economic conditions and related low levels of consumer confidence over a prolonged period of time could adversely affect the Registrant's sales.

As a retailer of goods which are discretionary purchases, the Registrant's sales results are particularly sensitive to changes in economic conditions and consumer confidence. Consumer confidence is affected by general business conditions; changes in the market value of securities and real estate; inflation; interest rates and the availability of consumer credit; tax rates; and expectations of future economic conditions and employment prospects.

Consumer spending for discretionary goods generally declines during times of falling consumer confidence, which negatively affects the Registrant's earnings because of its cost base and inventory investment.

Many of the Registrant's competitors may continue to react to falling consumer confidence by reducing their retail prices; such reductions and/or inventory liquidations can have a short-term adverse effect on the Registrant's sales.

In addition, some observers believe that the short-term attractiveness of luxury goods may have waned in certain markets, such as Japan, thus reducing demand. This could adversely affect the Registrant's sales and margins.

The Registrant has invested in and operates more than 20 stores in the Hong Kong, Macau and mainland China markets and anticipates significant further expansion. Some observers believe that the high levels of Chinese economic growth may be unsustainable. Should the Chinese economy experience an economic slowdown, the sales and profitability of its stores in this region could be affected.

Uncertainty surrounding the current global economic environment makes it more difficult for the Registrant to forecast operating results. The Registrant's forecasts employ the use of estimates and assumptions. Actual results could differ from forecasts, and those differences could be material.

(ii) Risk: that sales will decline or remain flat in the Registrant's fourth fiscal quarter, which includes the Holiday selling season.

The Registrant's business is seasonal in nature, with the fourth quarter typically representing at least one-third of annual net sales and approximately one-half of annual net earnings. Poor sales results during the Registrant's fourth quarter will have a material adverse effect on the Registrant's sales and profits.

(iii) Risk: that regional instability and conflict will disrupt tourist travel and local consumer spending.

Unsettled regional and global conflicts or crises which result in military, terrorist or other conditions creating disruptions or disincentives to, or changes in the pattern, practice or frequency of tourist travel to the various regions and local consumer spending where the Registrant operates retail stores could adversely affect the Registrant's sales and profits.

(iv) Risk: that foreign currencies will weaken against the U.S. dollar and require the Registrant to raise prices or shrink profit margins in locations outside of the U.S.

The Registrant operates retail stores and boutiques in various countries outside of the U.S. and, as a result, is exposed to market risk from fluctuations in foreign currency exchange rates. In 2009, the Registrant's sales in those countries represented approximately half of its net sales, of which Japan represented 19% of net sales. A substantial weakening of foreign currencies against the U.S. dollar would require the Registrant to raise its retail prices or reduce its profit margins in various locations outside of the U.S. Consumers in those markets may not accept significant price

Table of Contents

increases on the Registrant's goods; thus, there is a risk that a substantial weakening of foreign currencies will result in reduced sales or profit margins.

(v) Risk: that the current volatile global economy may have a material adverse effect on the Registrant's liquidity and capital resources.

The global economy and the credit and equity markets have undergone significant disruption in the past two years. A prolonged weakness in the economy, extending further than those included in management's projections, could have an effect on the Registrant's cost of borrowing, could diminish its ability to service or maintain existing financing and could make it more difficult for the Registrant to obtain additional financing or to refinance existing long-term obligations. In addition, increased disruption in the markets could lead to the failure of financial institutions. If any of the banks participating in the Registrant's revolving credit facility were to declare bankruptcy, the Registrant would no longer have access to those committed funds.

Any significant deterioration in the stock market could negatively affect the valuation of pension plan assets and result in increased minimum funding requirements.

(vi) Risk: that the Registrant will be unable to continue to offer merchandise designed by Elsa Peretti.

The Registrant's long-standing right to sell the jewelry designs of Elsa Peretti and use her trademarks is responsible for a substantial portion of the Registrant's revenues. Merchandise designed by Ms. Peretti accounted for 10% of 2009 net sales. Tiffany has an exclusive license arrangement with Ms. Peretti; this arrangement is subject to royalty payments as well as other requirements. This license may be terminated by Tiffany or Ms. Peretti on six months notice, even in the case where no default has occurred. Also, no agreement has been made for the continued sale of the designs or use of the trademarks ELSA PERETTI following the death or disability of Ms. Peretti, who is now 70 years of age. Loss of this license would materially adversely affect the Registrant's business through lost sales and profits.

(vii) Risk: that changes in prices of diamonds and precious metals or reduced supply availability might adversely affect the Registrant's ability to produce and sell products at desired profit margins.

Most of the Registrant's jewelry and non-jewelry offerings are made with diamonds, gemstones and/or precious metals. Acquiring diamonds for the engagement business has, at times, been difficult because of supply limitations; Tiffany may not be able to maintain a comprehensive selection of diamonds in each retail location due to the broad assortment of sizes, colors, clarity grades and cuts demanded by customers. A significant change in the prices or supply of these commodities could adversely affect the Registrant's business, which is vulnerable to the risks inherent in the trade for such commodities. A substantial increase or decrease in the price or supply of raw materials and/or high-quality rough and polished diamonds within the quality grades, colors and sizes that customers demand could affect, negatively or positively, customer demand, sales and gross profit margins.

If trade relationships between the Registrant and one or more of its significant vendors were disrupted, the Registrant's sales could be adversely affected in the short-term until alternative supply arrangements could be established.

(viii) Risk: that the value of the TIFFANY & CO. trademark will decline due to the sale of counterfeit merchandise by infringers.

The TIFFANY & CO. trademark is an asset which is essential to the competitiveness and success of the Registrant's business and the Registrant takes appropriate action to protect it. Tiffany actively pursues those who produce or sell counterfeit TIFFANY & CO. goods through civil action and cooperation with criminal law enforcement agencies. However, the Registrant's enforcement actions have not stopped the imitation and counterfeit of the Registrant's merchandise or the infringement of the trademark, and counterfeit TIFFANY & CO. goods remain available in many markets. In recent years, there has been an increase in the availability of counterfeit goods, predominantly silver jewelry, in various markets by street vendors and small retailers, as well as on the Internet. The continued sale of counterfeit merchandise could have an adverse effect on the TIFFANY & CO. brand by undermining Tiffany's reputation for quality goods and making such goods appear less desirable to consumers of luxury goods. Damage to the brand would result in lost sales and profits.

Table of Contents

(ix) Risk: that the Registrant will be unable to lease sufficient space for its retail stores in prime locations.

The Registrant, positioned as a luxury goods retailer, has established its retail presence in choice store locations. If the Registrant cannot secure and retain locations on suitable terms in prime and desired luxury shopping locations, its expansion plans, sales and profits will be jeopardized.

In Japan, many of the retail locations are located in department stores. TIFFANY & CO. boutiques located in department stores in Japan represented 79% of net sales in Japan and 15% of consolidated net sales in 2009. In recent years, the Japanese department store industry has, in general, suffered declining sales and there is a risk that such financial difficulties will force further consolidations or store closings. Should one or more Japanese department store operators elect or be required to close one or more stores now housing a TIFFANY & CO. boutique, the Registrant's sales and profits would be reduced while alternative premises were being obtained. The Registrant's commercial relationships with department stores in Japan, and their abilities to continue as leading department store operators, have been and will continue to be substantial factors affecting the Registrant's business in Japan.

(x) Risk: that the Registrant's business is dependent upon the distinctive appeal of the TIFFANY & CO. brand.

The TIFFANY & CO. brand's association with quality, luxury and exclusivity is integral to the success of the Registrant's business. The Registrant's expansion plans for retail and direct selling operations and merchandise development, production and management support the brand's appeal. Consequently, poor maintenance, promotion and positioning of the TIFFANY & CO. brand, as well as market over-saturation, may adversely affect the business by diminishing the distinctive appeal of the TIFFANY & CO. brand and tarnishing its image. This would result in lower sales and profits.

Table of Contents**PART II. Other Information****Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

The following table contains the Company's stock repurchases of equity securities in the first quarter of 2010:

Issuer Purchases of Equity Securities

Period	(a) Total Number of Shares (or Units) Purchased	(b) Average Price Paid per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares, (or Units) that May Yet Be Purchased Under the Plans or Programs
February 1, 2010 to February 28, 2010	133,300	\$41.18	133,300	\$396,471,000
March 1, 2010 to March 31, 2010	117,300	\$46.03	117,300	\$391,072,000
April 1, 2010 to April 30, 2010	68,900	\$48.89	68,900	\$387,703,000
TOTAL	319,500	\$44.62	319,500	\$387,703,000

In March 2005, the Company's Board of Directors approved a stock repurchase program ("2005 Program") that authorized the repurchase of up to \$400,000,000 of the Company's Common Stock through March 2007 by means of open market or private transactions. In August 2006, the Company's Board of Directors extended the expiration date of the Company's 2005 Program to December 2009, and authorized the repurchase of up to an additional \$700,000,000 of the Company's Common Stock. In January 2008, the Company's Board of Directors extended the expiration date of the 2005 Program to January 2011 and authorized the repurchase of up to an additional \$500,000,000 of the Company's Common Stock.
