ITEM 12. RESULTS OF OPERATIONS AND FINANCIAL CONDITION.

On August 12, 2003, Emerson Radio Corp. (the "Company") held an earnings teleconference call during which it discussed free cash flow. Free cash flow is comprised of earnings before interest, income taxes, cumulative effect of change in accounting principle, depreciation and amortization, less capital expenditures and the change in the Company's working capital. Free cash flow represents the cash generated by the Company's business operations that is available to be used to repurchase common stock, repay debt obligations and invest in future growth through new business development activities or acquisitions. Such metric is useful to management and the Company's investors in measuring the Company's ability to execute upon these initiatives. Free cash flow is not a measure recognized under generally accepted accounting principles ("GAAP") and should not be construed as a substitute in measuring operating results or liquidity. Such metric may not be comparable to similarly titled measures used by other companies.

The Company's determination of free cash flow is as follows:
