The Fund invests primarily in debt securities issued by California municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at December 31, 2008, 88.9% of total investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 2.3% to 26.6% of total investments.

- (1) Security (or a portion thereof) has been pledged as collateral for open swap contracts.
- (2) Security (or a portion thereof) has been segregated to cover margin requirements on open financial futures contracts.
- (3) Security represents the underlying municipal bond of a tender option bond trust.

A summary of financial instruments at December 31, 2008 is as follows:

Futures Contracts

| Expiration Date | Contracts | Position | Aggregate Cost | Value | Net Unrealized Depreciation |
|-----------------|-----------------------|----------|----------------|----------------|-----------------------------|

| | | | | | \$ (1,639,485) |

The effective date represents the date on which the Fund and the counterparty to the interest rate swap contract begin interest payment accruals.

At December 31, 2008, the Fund had sufficient cash and/or securities to cover commitments under these contracts.

The cost and unrealized appreciation (depreciation) of investments of the Fund at December 31, 2008, as determined on a federal income tax basis, were as follows:

| | |
|------------------------------------|------------------------|
| Aggregate cost | \$ 73,493,328 |
| Gross unrealized appreciation | \$ 563,006 |
| Gross unrealized depreciation | (13,728,632) |
| Net unrealized depreciation | \$ (13,165,626) |

The Fund adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157 (FAS 157), Fair Value Measurements, effective October 1, 2008. FAS 157 established a three-tier hierarchy to prioritize the assumptions, referred to as inputs, used in valuation techniques to measure fair value. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including a fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

At December 31, 2008, the inputs used in valuing the Fund's investments, which are carried at value, were as follows:

| | Valuation Inputs | Investments in Securities | Other Financial Instruments* |
|--------------|-------------------------------------|----------------------------------|-------------------------------------|
| Level 1 | Quoted Prices | \$ | \$ (632,096) |
| Level 2 | Other Significant Observable Inputs | 69,902,702 | (1,639,485) |
| Level 3 | Significant Unobservable Inputs | | |
| Total | | \$ 69,902,702 | \$ (2,271,581) |

* Other financial instruments include futures and interest rate swap contracts not reflected in the Portfolio of Investments, which are valued at the unrealized appreciation (depreciation) on the instrument.

The Fund held no investments or other financial instruments as of September 30, 2008 whose fair value was determined using Level 3 inputs.

For information on the Fund's policy regarding valuation of investments and other significant accounting policies, please refer to the Fund's most recent financial statements included in its semiannual or annual report to shareholders.
