EX-99.2

Table of Contents**Item 2.02 Results of Operations and Financial Condition**

On October 24, 2007, Kennametal Inc. (Kennametal or the Company) issued an earnings announcement for its fiscal first quarter ended September 30, 2007.

The press release contains certain non-generally accepted accounting principles (GAAP) financial measures. The following GAAP financial measures have been presented excluding special items: gross profit, operating expense, operating income, effective tax rate, income from continuing operations, net income and diluted earnings per share. These special items include: (1) impact of a German tax reform bill for the three months ended September 30, 2007, (2)(a) loss on divestiture of consumer retail product line, including industrial saw blades (CPG) and transaction-related charges and (b) adjustment on J&L Industrial Supply (J&L) divestiture and transaction-related charges for the three months ended September 30, 2006 and (3)(a) Kemmer Praezision Electronics business (Electronics) impairment and divestiture-related charges, (b) loss on divestiture of CPG and transaction-related charges and (c) adjustment on J&L divestiture and transaction-related charges for the year ended June 30, 2007. Management excludes these items in measuring and compensating internal performance to more easily compare the Company's financial performance period-to-period. The press release also contains adjusted free operating cash flow and adjusted return on invested capital, which are also non-GAAP measures and are defined below.

Management believes that presentation of these non-GAAP financial measures provides useful information about the results of operations of the Company for the current period and past periods. Management believes that investors should have available the same information that management uses to assess operating performance, determine compensation and assess the capital structure of the Company. These non-GAAP measures should not be considered in isolation or as a substitute for the most comparable GAAP measures. Non-GAAP financial measures utilized by the Company may not be comparable to non-GAAP financial measures used by other companies.

Adjusted Free Operating Cash Flow

Free operating cash flow is a non-GAAP financial measure and is defined by the Company as cash provided by operations (which is the most directly comparable GAAP measure) less capital expenditures plus proceeds from disposals of fixed assets. Management considers free operating cash flow to be an important indicator of Kennametal's cash generating capability because it better represents cash generated from operations that can be used for strategic initiatives (such as acquisitions), dividends, debt repayment and other investing and financing activities. Management may further adjust free operating cash flow for significant unusual cash items. Management considers adjusted free operating cash flow to be an important indicator of Kennametal's cash generating capability because it excludes significant unusual items.

Adjusted Return on Invested Capital

Adjusted Return on Invested Capital is a non-GAAP financial measure and is defined by the Company as the previous 12 months' net income, adjusted for interest expense, securitization fees, minority interest expense and special items, divided by the sum of the previous 12 months' average balances of debt, securitized accounts receivable, minority interest and shareowners' equity. Management believes that this financial measure provides additional insight into the underlying capital structure and performance of the Company. Management utilizes this non-GAAP measure in determining compensation and assessing the operations of the Company. The most directly comparable GAAP measure is return on invested capital calculated utilizing GAAP net income.

A copy of the Company's earnings announcement is furnished under Exhibit 99.1 attached hereto. Reconciliations of the above non-GAAP financial measures are included in the earnings announcement.

Additionally, during our quarterly teleconference we may use various non-GAAP financial measures to describe the underlying operating results. Accordingly, we have compiled below certain reconciliations as required by Regulation G. These non-GAAP measures should not be considered in isolation or as a substitute for the most comparable GAAP measures. Non-GAAP financial measures utilized by the Company may not be comparable to non-GAAP financial measures used by other companies.

Table of Contents**Adjusted EBIT**

EBIT is an acronym for Earnings Before Interest and Taxes and is a non-GAAP financial measure. The most directly comparable GAAP measure is net income. However, we believe that EBIT is widely used as a measure of operating performance and we believe EBIT to be an important indicator of the Company's operational strength and performance. Nevertheless, the measure should not be considered in isolation or as a substitute for operating income, cash flows from operating activities or any other measure for determining liquidity that is calculated in accordance with GAAP. Additionally, Kennametal will adjust EBIT for minority interest expense, interest income, securitization fees, pre-tax income from discontinued operations and special items. Management uses this information in reviewing operating performance and in determining compensation.

Primary Working Capital

Primary working capital is a non-GAAP financial measure and is defined as accounts receivable, net plus inventories, net minus accounts payable. The most directly comparable GAAP measure is working capital, which is defined as current assets less current liabilities. We believe primary working capital better represents Kennametal's performance in managing certain assets and liabilities controllable at the business unit level and it is used as such for internal performance measurement.

EBIT RECONCILIATION (Unaudited)

(in thousands, except percents)	Three Months Ended	
	September 30,	2006
	2007	2006

Item 8.01 Other Events

At its meeting on October 23, 2007, the Kennametal Inc. Board of Directors approved a 14 percent increase to the quarterly dividend rate and also approved a 2-for-1 split of the company's common stock. The increase in the quarterly dividend rate, from 21 cents to 24 cents per pre-split share, is payable November 19, 2007 to shareowners of record on November 7. The split will take the form of a stock dividend; each shareowner of record on December 4, 2007 will receive one additional share for each share outstanding. The split shares are expected to be distributed on December 18, 2007.

Further details are set forth in the press release furnished herewith as Exhibit 99.2.
